
Holes like lock gates were made in the side of the ship, and as each shell struck her she heeled over to a considerable angle.

That was at a distance of something like 16,000 yards, 7,000 yards beyond the effective range of an armor-piercing shell. If this report be true, and if a high-explosive shell can put out of business a vessel 16,000 yards away, then the armor-piercing shell would have no chance in such a conflict. It would be like arming a man with a bow and arrow and his antagonist with a Winchester rifle at a distance of 100 yards apart.

Mr. Chairman, the distinguished Alabamian [Mr. HOBSON], whom I regard as an authority upon naval questions in many respects—and I have learned to follow him because of his experience in the Spanish-American War, and because of his experience as a student in connection with the Navy Department—last Saturday made a statement of the case I have read here as to the target practice and the destruction of the *Empress of India* at a distance of 16,000 yards.

Gentlemen, if we are to arm our Navy and make it equal to any other navy in the world, we ought to give it just as effective projectiles as the best navy in the world. We can not do this without supplying it with high-explosive torpedo shells. There is no provision in this bill for the manufacture or purchase of such shells. The adoption of my amendment will not impair this bill in the least and it may be the means of saving our Navy and the lives of our seamen. [Applause.]

Mr. ROBERTS of Massachusetts. Mr. Chairman——

The CHAIRMAN. The gentleman from Massachusetts is recognized.

Mr. ROBERTS of Massachusetts. Mr. Chairman, the gentleman from Illinois who has just taken his seat, in his anxiety to bolster up his argument, began it by two distinct misstatements, and I would like to have his attention. He tells us that the explosive gelatin placed against the armor of the *Puritan* when detonated sunk that vessel in two minutes. I want to say to the gentleman that that ship did not sink for 24 hours after that explosion against her side, and she would not have sunk then if it had not been for a defective bulkhead, and even with the defective bulkhead it is a question if she would have sunk at all if the naval authorities had promptly salvaged her.

Mr. FOWLER. Will the gentleman yield?

Mr. ROBERTS of Massachusetts. I will yield.

Mr. FOWLER. I will ask if it was not a high explosive made out of guncotton?

Mr. ROBERTS of Massachusetts. No. It was gelatine. It was the explosive that was desired to be exploded by Mr. Ishem in carrying out the line of experiments that he has requested of the Navy Department.

Then the gentleman told us about taking two days to sink the *Texas* with armor-piercing shells.

Mr. Chairman, I was present and saw the first day's firing against the *Texas*, afterwards renamed the *San Marcos*. I mention the change of name so that there will be no misapprehension and no quibbling. I want to say to the gentleman that the *San Marcos* was sunk on the second salvo from the *New Hampshire's* guns. It did not take two days' pounding with armor-piercing shells to sink that battleship, but only the second broadside.

Mr. COX. What do you mean by the "second salvo"?

Mr. ROBERTS of Massachusetts. The second broadside. They were firing 8 and 12-inch projectiles at her, and it is not definitey known whether it was an 8 or a 12-inch projectile that sunk the ship.

Mr. HOBSON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Massachusetts yield to the gentleman from Alabama?

Mr. ROBERTS of Massachusetts. I do.

Mr. HOBSON. I will simply ask the gentleman to state the range at which the salvo was fired?

Mr. ROBERTS of Massachusetts. My recollection is that it was either 10,000 or 12,000 yards.

Mr. HOBSON. The gentleman is mistaken, unless my memory is at fault.

Mr. ROBERTS of Massachusetts. Now, Mr. Chairman, the gentleman has much to say about these so-called high-explosive torpedo shells. I want to call the attention of this committee to the fact that there is not a line in this bill or in this paragraph under discussion which prohibits or in any way prevents the Navy Department from spending all of that $5,800,000 for these so-called torpedo shells. No limit whatever is fixed.

Mr. PADGETT. Will the gentleman yield right there a moment?

Mr. ROBERTS of Massachusetts. I will.

Mr. PADGETT. I want to call the attention of the gentleman to the fact that this appropriation is not the appropriation out of which shells are purchased. That is further on, and we have already passed it. If you will look at the hearings on page 430, you will find how the appropriation of last year was expended and what is expected to be used this year. It does not include the purchase of the shells.

Mr. ROBERTS of Massachusetts. No. The purpose of the amendment here is to specify——

Mr. PADGETT. To tie up everything else unless they purchase $250,000 worth of shells of a different kind out of this appropriation. It ties up the whole appropriation.

Mr. ROBERTS of Massachusetts. Exactly; and further along there is an appropriation out of which these so-called torpedo shells can be purchased.

Why has not the Navy Department gone ahead and purchased these armor-piercing shells? This explosive is nothing new. Nitrogelatin was invented in 1875, and some time afterwards, in 1880 and 1881, our Government took up the matter of using this high explosive in its shells. Experiments were made, but difficulties were encountered because of the shells exploding near the muzzle of the gun, so that in about 1886 the experiments were discontinued.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I ask unanimous consent for an additional 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. ROBERTS of Massachusetts. In 1891 mention was first made of using a shell subdivided by longitudinal diaphragms, by transverse diaphragms, and by a combination of longitudinal and transverse diaphragms with considerable success. However, in 1892 a 7-inch rifle was destroyed at Sandy Hook by the use of a projectile so divided and containing nitrogelatin. In 1898 two 3-inch guns were destroyed in a similar manner in the so-called Nixon experiments. The matter was abandoned until July, 1898, when Mr. Isham first submitted his claims to the Ordnance Department of the United States Army. Projectiles of the Isham type were tested by the Army, with the result that on January 22, 1903, a 12-inch rifled gun was destroyed at Sandy Hook by the premature explosion of an Isham shell. It is only fair to say that the gelatin used in that explosion was frozen, making it much more sensitive. Further tests were made to ascertain the destructive force of the Isham shell. One in August, 1899, fired at an angle of 45° from the normal; one in November, 1899, in which the projectile was simply suspended against the plate; and a third one in August, 1905, in which the projectile was fired from a gun at a velocity of 1,400 foot-seconds.

Now, mild, the whole claim for these explosive shells is that when they strike they explode and do terrific damage. No one of these three just mentioned injured the plates to any appreciable extent. The great objection that has been made heretofore to the use of nitrogelatin for explosive charges in shells is its lack of stability and to the fact that it is dangerous to handle at all times and under all conditions.

I was advised yesterday by the Chief of the Bureau of Ordnance that the persons now manufacturing nitrogelatin to be used in the Isham shell, with which the department is now experimenting, refuse to guarantee the stability of that explosive charge. Why use that when we have two substances in the Navy, one of which is equal and the other superior in it power to this highly dangerous nitrogelatin?

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Massachusetts yield to the gentleman from Illinois?

Mr. ROBERTS of Massachusetts. I yield.

Mr. FOWLER. Why not leave any particular shell out of the question for the present? Let Isham take care of his shell and let Gathmann take care of his shell and every other fellow take care of his shell. I have one idea only in view, and that is to give the United States Navy as strong a projectile as is possessed by any other navy.

Mr. ROBERTS of Massachusetts. I yielded to the gentleman for a question and not for an argument. My answer is this—and I think I can make the statement without fear of successful contradiction—that this amendment is prompted and suggested by Mr. Isham.

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS of Massachusetts. I will.

Mr. FOWLER. It is only justice to me, Mr. Chairman, to say that I never saw Mr. Isham in my life until after I had introduced this amendment, and no living soul on earth suggested to me the idea of this amendment before it was prepared right here on the floor of the House and submitted to Capt. HOBSON and other members of the committee before I introduced it.

Mr. ROBERTS of Massachusetts. Then I will withdraw what I said in regard to the gentleman's action being prompted by Mr. Isham. But I will say this, that Mr. Isham has been very active about the corridors and offices of Members in the House Office Building all this session in advocacy of his particular type of shell and explosive.

Mr. FOWLER. He did not deign to come to my room.

Mr. ROBERTS of Massachusetts. That is neither here nor there.

Mr. HOBSON. Mr. Chairman, will the gentleman yield right there?

The CHAIRMAN. Does the gentleman from Massachusetts yield to the gentleman from Alabama?

Mr. ROBERTS of Massachusetts. I do.

Mr. HOBSON. Will the gentleman kindly tell me what explosive he refers to as being equal or superior to that of nitrogelatin?

Mr. ROBERTS of Massachusetts. Explosive D is equal, and trinitrotoluol is superior.

Mr. HOBSON. I think the gentleman is mistaken in that.

Mr. ROBERTS of Massachusetts. If the gentleman has any doubt about it, I have the results here of the tests made with regard to those types of shells, and there is no question about it.

Mr. HOBSON. I hope the gentleman will please put that in the RECORD. In my opinion, it is not correct. It is only in certain ways that they thought them equal and superior, by reason of certain conditions in the experiments.

Mr. ROBERTS of Massachusetts. Well, the Chief of the Bureau of Ordnance, who has spent years on the subject of high explosives, is not on the same plane as my distinguished contemporary, the gentleman from Alabama, but I am satisfied, and I think the House will be satisfied, to take the judgment of the Chief of the Bureau of Ordnance on this subject.

Mr. HOBSON. The gentleman does not wish to have the Chief of the Bureau of Ordnance making statements that are contrary to all the scientific facts.

Mr. ROBERTS of Massachusetts. To go a little further, Mr. Chairman, with regard to the danger of using this high explosive in guns in the United States Army prior to the use of the Isham shell, six guns were burst as a result of explosive gelatin and dynamite as shell fillers, and after the introduction of the Isham shell a 12-inch gun was burst in January, 1903; and while the Navy Department have been carrying on experiments to demonstrate the utility or lack of utility of the high-explosive shell and the high explosive as carried in the particular make of shell designed by Mr. Isham, we have exploded four guns. One 6-pounder was destroyed in 1912 while firing 6-pound projectiles against a plate, the projectile being charged with 2 per cent camphorated explosive gelatin, frozen at 25° F. We have exploded three 1-pounders in trying to fire this highly dangerous explosive out of guns, and, in addition to that, two 6-inch projectiles, made after the Isham design, exploded after leaving the gun and before reaching the target.

Now, why should we go on compelling the Navy Department to purchase these high-priced patented shells? It was stated a moment ago that the department has a contract with Mr. Isham for 100 of his type of shell, the price being $350 each. I am advised and understand and believe that these 100 shells will not cost Mr. Isham over $10,000 at the outside, and that there is a clean profit in that little contract of at least $25,000. These shells, furnished by Mr. Isham at $350 apiece, are cast-steel, thin-walled shells. Fifty dollars apiece would be a very high price for them, I am advised. We are securing to-day under contract 12-inch tool-steel shells at $165 each—less than half what is being paid Mr. Isham for his shells; and if it is desirable to use a torpedo shell carrying a high explosive, in the American Navy, we can procure those shells without number at a cost of less than one-third of the price paid to Mr. Isham. We hear a great deal about trusts—armor trusts, powder trusts, shell trusts. It looks to me as though we had one of the cleverest little shell trusts in the country in this very Isham game that is being put up to us now under the guise of going on with further experiments on high-power explosives for shells.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROBERTS of Massachusetts. I should like five minutes more.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent that his time be extended five minutes. Is there objection?

There was no objection.

Mr. ROBERTS of Massachusetts. Much has been said about the so-called Shimose powder that was used by the Japanese with such deadly effect against the Russians. Mr. Chairman, it has been learned that Shimose powder is nothing more nor less than melted picric acid, being substantially the same thing as lyddite, the English shell filler. So much for this wonderful unknown explosive.

Mr. FOWLER. Will the gentleman yield?

Mr. ROBERTS of Massachusetts. I do.

Mr. FOWLER. Is it not a fact that Capt. Seminoff, in his book, says that the Japanese used high-explosive torpedo shells?

Mr. ROBERTS of Massachusetts. I understand one man made that statement; but I also understand and know that since that war we have been able to secure samples of so-called Shimose powder and analyze it, and find it to be what I have stated.

Mr. FOWLER. Capt. Seminoff was on the Russian fleet at the time the Japanese fire was poured into their ships.

Mr. ROBERTS of Massachusetts. I understand he was, and so were a lot of other people. You get his view only.

Something has been said about what other first-class powers are doing. I want to say here, Mr. Chairman, that the first-class naval powers—and we have positive information on this point—are using armor-piercing projectiles very much the same as our own. Many of them have in addition thinner wall shells, loaded with some explosive; none, so far as we are able to learn, using nitrogelatin as the filler of those last-named shells. Our armor-piercing shell, loaded with explosive D, has very great destructive effect and, when not overmatched by the armor, will pierce it and destroy material protected by that armor. If, however, it were considered advisable to supply a certain number of so-called torpedo shell, they can very readily be manufactured for less than one-third of the price we have been paying for the first 100 Isham shells; and while their contents would be equally destructive, the operation of handling and firing them would be attended with absolute safety.

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS of Massachusetts. I do.

Mr. FOWLER. Is it not a fact that the Gathmann shell is absolutely safe, and has been so decided by high naval authority?

Mr. ROBERTS of Massachusetts. We only know that the Gathmann shell uses a high explosive, and that it has exploded in the guns and out of the guns before reaching the target.

Mr. FOWLER. Is that all that is known about it?

Mr. ROBERTS of Massachusetts. Oh, I have not made a study of the Gathmann shell or of the Gathmann explosive, but it must be on a par with all the other high explosives of nitrogelatin.

Mr. FOWLER. It is guncotton.

Mr. ROBERTS of Massachusetts. I have only a moment, and I do not wish to detain the committee much longer. I have here official photographs of the *Puritan*, showing the nature and extent of the damage done by the explosion of 200 pounds of nitrogelatin, one charge against the armored side of the ship and the other against the turret; and I want to call attention to the fact that the explosion against the side armor did not break or shatter the armor, but bent it in slightly.

The explosion against the turret, which was of 8-inch harveyized armor, cracked the plate and buckled it a little, but did no damage inside of the turret. And I want to emphasize again the fact that the explosion against the side of the *Puritan*, instead of sinking that ship in two minutes, as stated by the gentleman from Illinois [Mr. FOWLER], did not cause that ship to sink until after 24 hours had expired, and she would not have sunk then had there been anybody on board to have taken proper care of her, and she would not have been injured enough to have caused her to sink in any event but for a defective bulkhead on the inside of the ship. I want to call further attention to the fact that the *Puritan* was built more than 40 years ago, of the old iron construction, and was in no way comparable to a modern steel battleship. So that what evidence has been presented to the Naval Committee points to one thing, that we get no greater results with this high explosive detonated against the outside, provided we can safely fire it from the guns and land it on the target, than we get from the armor-piercing projectiles loaded with explosive D or trinitrotoluol.

Mr. HOBSON. Mr. Chairman, I ask unanimous consent to discuss this amendment for 15 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. HOBSON. Mr. Chairman, I desire to call attention to the fact that the Naval Committee has been carrying out experiments on this question for the last two years, and I have been the chairman of the special subcommittee conducting these ordnance experiments.

These experiments have covered the comparative strength and effectiveness of two types of shell, designed for two types of attack. The subject is still under investigation. I will point out, in a few moments, just how far we have progressed in the investigation. The investigation of the armor-piercing projectile has been substantially completed. We have not made public, and do not wish to have made public, the detailed results of that investigation. But I think, in view of the statement of the gentleman from Massachusetts [Mr. ROBERTS] the last time we were discussing this bill, and the general impression produced by him to-day as to the power of armor-piercing projectiles, I think it is only proper to state, in order that there may be no question as to the effectiveness of the armor-piercing shell, that the experiments were conducted under battle conditions at 10,000 and 12,000 yards distance. That the plates used were modern plates 8 inches and 10 inches in thickness. These plates were substantially thinner than the plates on modern dreadnaughts, and the guns used were the 40-caliber guns on the *Tallahassee*, which are not quite as powerful as the 50-caliber guns mounted on two of our dreadnaughts, but the relation of target to gun was such that it made the test absolutely fair and the results must be considered conclusive.

I may say that in the attack on this target with armor-piercing shells not a single shell penetrated in a way to explode behind the armor; not a single shell penetrated the armor intact without breaking up, and this was true with respect to either the 8 or 10 inch armor at even the shortest range. This test established the fact that it would have been impossible for these shells to send a fragment through the protective deck or into the vitals of any first-class ship at that range. I do not hesitate to state that if a dreadnaught had been there in the place of the target it would not have been put out of action. I will go further than that, it would not have been, as far as its vitals are concerned, even seriously injured.

We fired some eighty-odd shots and made 26 hits. I believe we could have continued to fire until we made 100 hits without sinking an actual ship anchored there in place of the target and placed like the target, at right angles to the line of fire and under the most favorable conditions for the shell. I wish to state, without going into details, which we do not wish to be made public, that it showed that the contention of the department as to the power of the armor-piercing shell to destroy an up-to-date ship at battle range was exploded by this test.

Mr. COLLIER. Will the gentleman state at what range those shots were fired?

Mr. HOBSON. At 10,000, 12,000, and 14,000 yards.

Mr. PADGETT. Ten and twelve thousand yards only.

Mr. HOBSON. Ten and twelve thousand yards. Our plan was to go up to 14,000, but there was no use when we found that we could not penetrate the belt armor and the protective deck behind it at even 10,000 yards. It was no use to go to longer ranges.

We first tried at 12,000 yards, expecting the shells to conquer the plates, but the shells failed. Then we came down to 10,000 yards, and there it failed. The conclusion was that the armor-piercing shell at battle range was impotent, as it broke up upon the face of the armor or in going through and therefore had no chance of penetrating or breaking in the deck armor behind the belt armor of a modern up-to-date ship.

Certain changes in the armor-piercing shell have been made as a result of the experiments. It is not my purpose to say what those changes are. I believe the armor-piercing shell to-day, as a result of the experiments, is substantially stronger and more powerful than it was before and that these experiments have been of incalculable value from the standpoint of bringing an improvement in the armor-piercing shell. I do not hesitate to say, however, that I was astounded by the results of this test, and I hope Members here will bear it in mind that the Navy Department's complete reliance on the armor-piercing shell must have been very seriously shaken by the results of this test and that our country should not have its success in battle against any modern power to rest solely upon any attack we could make with the armor-piercing shell.

Now, I am convinced that if the range could come down to 8,000 yards or less the armor-piercing shell—particularly if the caliber is a little larger, and the tendency is to larger caliber—will be very efficient. The fact that all navies are adopting a larger caliber is a practical admission that the 12-inch gun can not destroy a battleship at battle range, as the increase in caliber reduces the number of shells that can be carried because of the great increase in their weight, and this great sacrifice would not be made if it could be avoided. I believe, however, that if the fleets close in at the finish of a battle to less than 8,000 yards, then the great, powerful, armor-piercing shell can give the coup de grâce and can get into the vitals and destroy the ship.

So I believe we should continue to have the armor-piercing shell, running to high calibers, which are both stronger and more powerful shell. But, Mr. Chairman, we ought not to fail to see and profit by the other fact established by these experiments. You can hit with certainty at these long ranges. Think of it! Firing ten and twelve thousand yards at this comparatively small target and making 26 hits out of eighty-odd shots.

It simply shows that you can expect to get hits at long ranges—an appreciable percentage, at least—where the armor-piercing shell will be impotent to conquer the armor or destroy the ship. At those long ranges torpedo shell, carrying large charges of high explosive, will not only blow in the side of a battleship, if exploding against it, but they will sink such ships by their mine effect when striking and exploding at a distance from the ship. A torpedo shell which we are developing will also destroy a ship if it strikes on the armor with a glancing blow or after it has struck the water and ricocheted. The armor-piercing shell will have no effect under such conditions, as our tests showed. The great advantage, however, we are attempting to secure is the mine effect. To obtain this we must have a shell that will take the water.

To meet this requirement a torpedo shell is now being developed by us of such a nature as to take the water when it hits at long range and go off underneath the water, and when this high-explosive shell detonates underneath the water near a ship, water being an incompressible fluid, the hydraulic effect is terrific, and a ship would be sunk at even 30 or 40 feet away. It would crush in the weak bottom of a ship below the armor like an eggshell and put it out of action. The armor-piercing shell can never give under-water results, and it has never given them. Its nose has to be made long in order to give the velocity necessary to secure penetration against armor, and that shell will always ricochet when it strikes the water or explode upon contact with the water, as our tests conclusively showed, whereas torpedo shell not being dependent for their effect upon velocity are so constructed at the point as to take the water and to travel underneath it. They are also provided with a fuse to explode them when they have lost their motion; if then they are near a ship it will be destroyed. As to the experiments that have been conducted in the development of the shell to determine the strength of different explosives, let me point out that explosive D, shimosa, melinite, and other explosives, to which the gentleman from Massachusetts [Mr. ROBERTS] has been referring, are only about 40 to 60 per cent as powerful as gelatin. That is the reason why the effort is being made to de-

velop the gelatin-charged shell, which will make even 12-inch shell destructive. In the experiments to which the gentleman from Massachusetts refers, as showing the powerful effects of these other explosives, as compared to gelatin, he ought to have pointed out that in that test the density of the gelatin loaded in the shell was, as I recall, only about 0.7, where it ought to have been 1.6. This is not open to discussion, but shows that the comparison is not fair, but is very misleading.

Take all of these explosives to which the gentleman refers; the explosives with which they charge the armor-piercing shells are scarcely more than half as powerful as gelatin. That is why the effort has been made and is now being made to utilize this extremely powerful high explosive. Experiments thus far made by the Navy Department show that where explosions in guns have taken place they were fired in ordinary shells without compartments; that is, the ordinary service shell was charged with the gelatin and explosion was expected to result. The object being to determine how long a column could be used, they used a 1-pounder shell with a single compartment, firing this gelatin, and they fired it again and again and scores and scores of times, and the severity of the test of the gelatin within those 1-pounder shells, some of them with a column of 2 inches, was nearly twice as severe a condition as that which will be present in the compartment shell which is now being tested; and yet the firing under these conditions shows that the gelatin was practically safe and could be relied upon not to explode. There has not been frankness in this matter, and I deeply regret it.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. HOBSON. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HOBSON. Mr. Chairman, this is in the nature of a brief report upon these experiments. We have reached the point where I believe we are justified in actually using the explosive itself in the big projectiles, and probably within a few days, or weeks at most, they are going to fire a 12-inch shell with the nose compartments charged with explosive gelatin, and, unless all calculations and indications fail, they will be fired successfully. Following upon the firing of these shells with the nose compartment filled with gelatin similar shells will be fired with all of the compartments filled with gelatin.

The shells are ready and the gelatin is ready, and these experiments will be made within a very short time. Here is the position in which we stand to-day: These experiments have been going on for two years. They are now very nearly coming to their end in so far as one type of shell is concerned. When they are completed we shall know the uses and limitations of this shell. The armor-piercing shell is a valuable shell. We ought to have them, but we can not rely upon them to do the work at all ranges, and there ought to be a torpedo shell aboard our ships or they will be outranged. There is no doubt in the world that other navies have a torpedo shell already developed. Just whether they use gelatin or not we do not know, but the experiment on the *Empress of India*, where that armored ship was sunk at 16,000 yards, at a distance where the armor-piercing shell could not penetrate—and the report said that great gaps were blown in her side as big as lock gates—indicate that the British Navy was not using the armor-piercing shell, but that they were using a real torpedo shell charged with high explosive.

The fact that they have been building these fast armored cruisers or dreadnaught battle cruisers in all the navies of the world except the United States indicates clearly that they expect those vessels to contend with dreadnaughts, that they expect to put them on the firing line with the dreadnaughts. After you get beyond a certain range the dreadnaught guns can not conquer the battle cruisers' armor any more than the battle cruisers' armor-piercing shell can conquer the dreadnaught armor. They are on an equality as far as armor-piercing shells are concerned; neither type can be sunk by such a shell at long range, and since both ships are equally exposed to torpedo shell firing, these faster ships can choose their range, weather gauge, and so forth, and be in control of the situation. They can accept battle or decline it. They can run ahead of the line and drop a mine, and cause the dreadnaught to turn to an unfavorable position or be exposed to the danger of being blown up by the mine.

The torpedo shell gives the ship great power, and all the nations of the world now realize this. There is now no need for further discussion as to the reality of the torpedo shell. It has come, and has come to stay. It is now an accomplished fact. And I will say this, that this kind of fire, where the shell can bite and take the water and stay in the water and explode, even in smaller calibers down to the 6-inch and smaller, will make a new defense against torpedo boats, destroyers, and submarines, and that may possibly be one indication of why opposition is so strong against the development of this kind of a shell.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. HOBSON. Five minutes more, Mr. Chairman, and then I will not——

Mr. PADGETT. Mr. Chairman, I must object; I can not consent to further prolongation of time.

The CHAIRMAN. The question is on the amendment——

Mr. HOBSON. Mr. Chairman, I move to strike out the last word.

Mr. PADGETT. That is not in order, Mr. Chairman.

Mr. HOBSON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman has been proceeding under that motion.

Mr. HOBSON. Then I move to strike out the last two words.

Mr. PADGETT. That is not in order.

The CHAIRMAN. The gentleman from Tennessee has been recognized.

Mr. HOBSON. I am making a report at this time, I will state to the Chairman, and I am nearly through.

Mr. PADGETT. The gentleman has been given 20 minutes. However, Mr. Chairman, I withdraw the objection to the five minutes additional, with the statement that I am going to object hereafter to any extension of remarks above 15 minutes.

The CHAIRMAN. Is there objection to the gentleman from Alabama having his time extended five minutes? [After a pause.] The Chair hears none.

Mr. HOBSON. Now, the defense and usefulness of the submarine result from its ability to conceal itself below the water; but when with magnetic apparatus, which it is claimed is available, you can locate the position of a submarine and then can fire these high explosive shells and make them explode below the water the submarine will loose its terrors and the gun will return to its supremacy. It is of great importance for this reason that this development should go on in our Navy, a cordial development by the Navy Department of the torpedo shell. Mr. Chairman, the Navy Department has been conducting experiments as our subcommittee requested them to be made. They have done that loyally, but I must say that the policy of the Bureau of Ordnance of the Navy Department has been so long committed to the fetish of the armor-piercing shell that it is very, very difficult to get them out of that rut. They ought to take this matter up and develop it themselves, and if, as the gentleman says, they can develop a torpedo shell of their own, why we want them to do it. If they can take an explosive such as trinitrotoluol or any other high explosive and develop a perfectly safe torpedo shell that will be as efficient as any other, they ought to do it and test in competition with the one now being tested. But they are not doing it. They simply do what the subcommittee calls upon them to do, and then frequently we have long delays in getting them to do that. Now, I will not be in this House very long——

Mr. HENSLEY. Will the gentleman yield for a question right there?

Mr. HOBSON. In a moment; I desire to conclude, because I will not have any more time. I will not be in this House very much longer, but I have tried to contribute my little during the period I have been here to have an intelligent development of our national defense, particularly in the direction in which we have been conducting these experiments, and I have been chairman of the subcommittee to carry them on, and I say to the Members of this House that our Navy Department ought to take up, on its own initiative, this development of the torpedo shell of one type or another, and I believe the insertion of this provision that $250,000 shall be used—and I will offer an amendment to it—for the manufacture or purchase of torpedo shells, specifying no type, ought to go in. This amendment ought to be sustained. I submit this as a technical proposition, and I have reached this conclusion after long and careful scientific investigation. Gentlemen of the House can give heed to it. In the same spirit I have tried to develop a true policy for national defense, and gentlemen can give that due consideration. I now yield to the gentleman from Missouri.

Mr. HENSLEY. Is not the gentleman from Alabama afraid lest his language be regarded by some as a criticism upon the Navy Department?

Mr. HOBSON. Now, the gentleman knows——

Mr. HENSLEY. I call the gentleman's attention to it.

Mr. HOBSON (continuing). I am loyal to the Navy. I believe in the Navy and believe in the naval officers; but it is a

fact that they feel in there that there is very little knowledge outside in technical matters and it is always hard to get initiative. That is one reason why we have had the development of an experimental fund. We had none when I first joined the Naval Committee. They made no initiative, no experiments, and now they are making some which will be of permanent good, and there ought to be some expression, I believe, on the part of Congress to indicate that Congress desires the initiative to be taken in the Navy Department with the idea of following this line of development of the torpedo shell.

Mr. WITHERSPOON. Mr. Chairman, I hope that this amendment will be voted down. I regard this question of projectiles as one of the most important questions in the Navy. I think, as I have argued here before, that the whole thing depends upon the destructive power of the shell—not, as some people believe, on the numbers of ships, but upon the destructive force of the shell; and that is what naval experts say when they face us in the Naval Affairs Committee and we present that question to them. They admit that. I am in favor of securing the most destructive shells that can be made; but, Mr. Chairman, there are two questions to be determined here before any intelligent action can be taken. One is the question of getting an explosive that can be safely used. A great many guns have been destroyed by these explosives bursting before they got out of the gun; sometimes they are not far out of the gun when they explode. But experiments have been made to determine how you can get an explosive that can be safely used. A great many experiments have been made, and the experts in the Navy have demonstrated that some of these high explosives can not, especially at certain temperatures, be used at all with any safety. Now, the other question is to get a high explosive that you can safely use that will not explode until it reaches the enemy's ship and at the same time have a destructive force enough to destroy.

Now, Mr. Chairman, I submit to the committee that both of those questions must either be determined by the experts of the Navy Department or must be determined, as this amendment proposes, by this House. Here is a provision directing that $250,000 of this money shall be invested in these torpedo shells. Now, we have either got to determine it or we have got to let the experts of the Navy Department determine it. I say we have not the information to determine it on. The Naval Affairs Committee has never devoted enough time to investigate it sufficiently for us to have an intelligent opinion about it. If the House wants to determine this question, the way to do it is to instruct the Committee on Naval Affairs to investigate it and collate all the facts in reference to it, and report to you so that you can act upon it intelligently. [Applause.] But for us, with the meager information we have, to undertake here in this House to determine this most vital question, and one that depends upon scientific knowledge, is, in my judgment, unreasonable. I think if the House wants to prosecute this matter—and I am very much in favor of it—the best way would be to amend this bill and instruct the Naval Affairs Committee that hereafter, instead of wasting all their time on the question of building battleships, they devote a part of it to the investigation of questions that affect the efficiency and power of the Navy. Then we could ascertain the facts and the House could act upon them.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that I may have 15 minutes, and then I will not ask for an extension.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. PADGETT. Now, Mr. Chairman, I ask unanimous consent that at the expiration of the 15 minutes the debate on this paragraph and all amendments thereto may conclude.

The CHAIRMAN. Is there objection?

Mr. FOWLER. Mr. Chairman, reserving the right to object, I feel that under the circumstances, in view of what was said by the gentleman on the other side, I ought to ask for 5 minutes.

Mr. PADGETT. I must object, Mr. Chairman. I was very liberal. I gave the gentleman 35 minutes, I believe.

Mr. FOWLER. No; it was only 30 minutes.

Mr. PADGETT. Well, 30. And that has been very liberal, and this debate has been proceeding here——

Mr. MANN. Let him have 5 minutes more now.

Mr. PADGETT. Well, take the 5 minutes now. Mr. Chairman, I ask unanimous consent that the debate close in 20 minutes.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that the debate be closed in 20 minutes, 15 minutes to be used by himself and 5 minutes by the gentleman from Illinois [Mr. FOWLER]. Is there objection? [After a pause.] The Chair hears none.

Mr. FOWLER. Mr. Chairman, in view of what the gentleman from Massachusetts said with reference to a certain shell that had been produced or had been patented by Mr. Isham, I think it is due that I should state to the House that no man since I have become a Member of Congress has influenced me to father any proposition of his. I never met Mr. Isham in my life until after I had prepared this amendment. I submitted the amendment to some members of the committee before I offered it. I want to say further, Mr. Chairman, that I have never accepted an invitation from anybody to be wined and dined as a means of securing my support. I have persistently refused all of them. I was assisting a widow woman in her efforts to secure a pension because I believed she had a meritorious cause. She said to me one day, "If you succeed in getting my pension, I will remember your daughter." I regarded that as a statement to induce my activity in her behalf, and although she is a woman, I refused to go any further with her claim. I have refused to accept automobile rides to visit private interests when invited by the owner or his agent. And I now say that no man can question my honor upon any question on the floor of this House without it being resented by me. There are some things in this life that men prize above others, and while all like to live as long as possible, the greatest legacy that any man ever left to his posterity was death in the defense of his own honor or of the honor of his family. [Applause.]

Mr. Chairman, it is said that this explosive is a dangerous one. I desire to read from some very noted naval authorities. First, Capt. Charles D. Sigsbee, United States Navy, said on February 6, 1901:

> I know nothing of the Gathmann system excepting what I have read and have heard from the inventors, but the Gathmann fuse seems to have reached a high state of development, so far as I can judge from the drawings. I believe that it is a great mistake to suppose that the armor of a ship must be pierced in order to defeat her.

Further, I quote from a letter from Commander R. B. Dashiell, United States Navy, of February 28, 1899, as follows:

> As to the effect of projectiles of each type on an enemy's battleship, experience has shown that a ship can receive a number of 12-inch steel shells and yet survive; in fact, there are a large number of battleships that can stand a long continuous series of hits from such shells and not have their vitals injured or their flotation destroyed. But experiments with submarine mines detonated at varying distances from the hull, and the recent detonation at Sandy Hook of a 12-inch shell at high velocity against a heavy armor plate all shows conclusively that the detonation of a shell containing 500 pounds of guncotton, either against a ship's side or even in the water and a few feet from the hull, is sufficient to place her hors de combat. Such a result is not to be measured by or compared with any outlay of money by which it may be accomplished.
>
> Very respectfully,
>
> R. B. DASHIELL,
> *Assistant Naval Constructor, United States Navy.*

The CHAIRMAN (Mr. ALEXANDER). The time of the gentleman has expired.

Mr. FOWLER. Mr. Chairman——

Mr. HUMPHREY of Washington. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Washington [Mr. HUMPHREY] asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. FOWLER. Mr. Chairman, I ask the same privilege.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] makes the same request. Is there objection? [After a pause.] The Chair hears none.

Mr. PADGETT. Mr. Chairman, in the 15 minutes allotted to me I must proceed hurriedly, and I must not submit to interruptions, because I have a number of things to answer.

My good friend and colleague upon the committee, Capt. HOBSON, made the statement that it was very hard to get the Navy officers to take the initiative. I think that is a criticism that is uncalled for and unjustified by the facts. I simply have to call your attention to the fact that the Navy Department has up to this time spent more than $295,500 experimenting on the Isham shell and high-explosive shells, and we have simply gotten a goose egg up to this time. We have accomplished nothing, but have spent $295,500 on such shells; and yet they come here and say that the Navy Department will not take the initiative in experimenting with matters.

Another thing. He says that the department has reached the conclusion that these 12-inch torpedo shells are safe and that shortly they are going to fire some of them. Why, in a conversation only this morning with Admiral Strauss, the chief of the bureau, who is conducting experiments, he said to me: "We are going to try to fire them. We are going to fire them with a small quantity, and test to see what we can do, but it is only in an experimental stage." They have had numbers of experiments, and I have the reports here. They had experiments with 1-pounders and 6-pounders, and what has been the

result? We have burst three 1-pound guns and one 6-pound gun and one 12-inch gun that were experimented with in the Army, and the English have burst a 12-inch gun in experimenting with this explosive gelatin. And then there are other cases where it even exploded as it went out of the muzzle. And yet they would come here and tie up $5,400,000, or else compel the department to spend $250,000 more upon this matter.

Now, Capt. HOBSON is so constituted that he uses all of his adjectives in the superlative degree. He can not avoid it; he is so intensive and feels so deeply. Now, he made the statement that our high explosives were only 40 to 60 per cent of the power of explosive gelatin. I got this memorandum this morning from Admiral Strauss, and I read:

Guncotton is to T. N. T. as 11.63 to 13.05; T. N. T. is to gelatin as 11 to 10.

Not 40 or 60 per cent of the explosive power of explosive gelatin, but as 11 to 10. I read further:

Experiments with pressure gauges at Indianhead indicate that wet guncotton, properly detonated, has a relative force as compared with nitrogelatin of 19.97 to 20.

Guncotton is 19.97 and nitrogelatin is 20.

Now, let me call your attention to some matters here about these explosives, because I am not going to take up the time in arguing. I want to get down to facts. I read:

The foregoing results confirm those previously secured from similar tests. No law as to the action of explosive gelatine can be derived from them, but they confirm previous opinion as to the unreliability, nonuniformity, and irregularity of this explosive.

And yet in the face of that we must tie up five and a half million dollars of appropriations for the Navy for other things unless the department will consent to spend $250,000 in this manner.

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. No; I said I could not. I read again:

In numerous experiments made heretofore, reference has been made to explosive gelatine and nitrogelatine as being subjects of tests. It is a fact, however, that there are two kinds of freezing for nitroglycerine, and presumably for explosive gelatine, a higher freezing point being at about 55° F., and the other 39° or 40°.

Think of it—dealing with a substance that will freeze at 55° F., and then at 39° or 40°. Yet we must spend this sum of money or else tie up this whole amount.

I call your attention, if you please, to other matters:

It has been stated in previous reports, and will be stated in subsequent portions of this report, that the action of gelatine, both in the firing and in the pressure-gauge tests, has been extremely irregular, and that no law can be marked by which action under particular conditions could be predicted.

I called your attention awhile ago to the fact that we had had these guns exploding. I read:

Three of these projectiles were then fired, rounds 1 and 2 being fired without accident, but on the third round the gun was burst in a manner similar to that in which the previous gun had been burst. With the bursting of the gun last referred to, the series of tests of this character was closed, it having been shown to be unsafe to fire projectiles with smooth interiors with the 3-inch length of cavity, the projectiles having normal protecting bands, and the others were fired with rough, so that either with rough interiors or smooth interiors they had the same results—the bursting of the guns.

Here it goes on to discuss the case of gun No. 1272, a rough-interior projectile with 2½-inch collar. The gun burst. In the case of gun No. 910, it was burst by a smooth-interior projectile with a 3-inch collar. Then this is added:

From the experience thus far gained in experimenting with explosive gelatin, the hypothesis has been formed that the cause of explosion when firing from the guns is not primarily or solely static pressure or pressure of any nature, but it is heat, due to the pressure of air in cavities in the gelatin, its operation producing heat in the gelatin sufficient to cause it to burn like smokeless powder.

Yet gentlemen, after we come here with all these facts from candid tests and experiments, would tie up $5,800,000 for other purposes unless we shall spend $250,000 additional to that already expended, namely, $295,500, upon this one.

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. No; I can not.

The CHAIRMAN. The gentleman declines to yield.

Mr. PADGETT. Now, Capt. HOBSON said that the results of tests and experiments with armor-piercing shells was that they were impotent. Now, I am reading a statement of Admiral Twining, the former chief of the bureau that conducted the test and one of the finest men that this country ever produced, in the Navy or out of the Navy; and I make that statement after an intimate acquaintance with him of several years and after testing him on that line. He says:

The result has been to prove to the satisfaction of the department that the theoretical penetration of armor, as based on proving-ground data, can be realized at long ranges; also, it has demonstrated to the satisfaction of the department that an armor-piercing shell, even when it does not pass through a protective deck behind armor, can do a great deal of damage by detonation and explosion behind the armor. It has also demonstrated that an armor-piercing shell striking the armored deck of the vessel can seriously damage the ship, even though it may not penetrate; it can do a great deal of damage by blowing large holes in the deck and throwing large fragments of shell and the deck into the machinery and boilers of the ship. Those are the three principal things we have concluded so far.

Now, then, they speak also about the Gathmann shell. I have here a Senate document as to the result of those tests. In those tests three firings were made against armor at the same distance. There were 507 pounds of guncotton put in the torpedo or explosive shell. There was 23 pounds of maximite, which is far inferior to the high explosive that we have at the present time. That was put in the armor-piercing shells and they were exploded against 11½-inch armors.

We have here the photographs showing the result of each test and each firing. You will find that the effect of the explosion of the 507 pounds of guncotton was practically nil. If you turn here, you will see the effect of the armor-piercing shell, showing that it pierced the armor, tore great holes through it, and on the back side tore up the building representing the ship, and there is no comparison between the two. Here are the photographs for the inspection of the Members, and they show for themselves how the armor-piercing shells tore things all to pieces and the 507 pounds of guncotton had no effect. Yet it is proposed to put something like 100 pounds of guncotton into these 12-inch shells, as against the tests that were made by the Gathmann gun, of 507 pounds of guncotton.

Gentlemen, let me say to you that we have gone into this matter, and we are developing these things as fast as we can. We are spending money every year. They are testing, they are studying, they are working to get everything they can out of these matters, and I do appeal to you not to tie up $5,500,000 of appropriations for other matters and prohibit their expenditure unless the Navy Department shall spend $250,000 of that money in purchasing—they do not say in testing, but they have got to go and purchase them whether they are worth a copper or not—when we are spending all the money that is needed and that we ought to spend to test and develop these matters.

I call for a vote.

The CHAIRMAN. The question is on the passage of the amendment offered by the gentleman from Illinois [Mr. FOWLER].

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. FOWLER. Division, Mr. Chairman.

The committee divided; and there were—ayes 18, noes 40.

Accordingly the amendment was rejected.

The Clerk read as follows:

That the unobligated balance under the appropriation, Marine Barracks, Boston, Mass., for the fiscal year ending June 30, 1914, not exceeding $148,000, is hereby made available for building slip and equipment.

Mr. JONES. Mr. Chairman, I make a point of order against this paragraph. The expenditure here proposed is not authorized by existing law, and is not in continuation of any appropriation for a public work now in progress. Neither does it retrench expenditures.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I desire to be heard on the point of order. The gentleman states that the work is not authorized. I desire to call the attention of the Chair to the naval appropriation act of last year, approved March 4, 1913. Page 24 in the copy which I hold in my hand, which contains the following item:

Increase of the Navy: That for the purpose of further increasing the Naval Establishment of the United States, the President is hereby authorized to have constructed—

Then follows a list of different vessels, containing the following:

One supply ship, to cost, exclusive of armor and armament, not to exceed $1,425,000.

The naval appropriation bill of last year authorized the construction of a supply ship. The chairman of the Committee on Naval Affairs has in his possession a letter from the Secretary of the Navy, in which he states that the supply ship authorized by the last bill has been placed in the Boston Navy Yard to be constructed; and he states further that it is necessary in the construction of that ship to have the building slips, for which he has recommended the reappropriation of $148,000 herein mentioned. So much for that point, as to whether or not these slips are authorized.

It is absurd to say that the authorization of the construction of a ship is law, and yet that the means and appliances by which you are to construct it are not authorized by that same law. It seems to me there is no question but that the authorization of the construction of this ship carries with it full authorization, as being a work in progress, for appropriating the money for any purpose necessary and incident to the construction of the ship.

But I do not want to rest the matter on that argument alone, because there is an absolute precedent for the appropriation for building slips in navy yards. I want to call attention here to Hinds' Precedents, volume 4, page 563, section 3837. In May, 1902, the naval appropriation bill was under consideration in the Committee of the Whole House on the state of the Union, and the following paragraph had been read——

The CHAIRMAN (Mr. ALEXANDER). The Chairman of the committee [Mr. JOHNSON of Kentucky] has returned, and will resume the chair. The temporary occupant of the chair suggests that the gentleman from Massachusetts repeat his argument against the point of order.

Mr. JOHNSON of Kentucky took the chair.

Mr. ROBERTS of Massachusetts. In view of the fact that my argument is interrupted by the return of the chairman, it will necessitate my repeating what I have said. The matter under consideration is a point of order raised by the gentleman from Virginia [Mr. JONES] against the language found in lines 1 to 5, inclusive, at the top of page 22. That language is as follows:

That the unobligated balance under the appropriation, Marine Barracks, Boston, Mass., for the fiscal year ending June 30, 1914, not exceeding $148,000, is hereby made available for building slip and equipment.

And the point of order is made by the gentleman from Virginia [Mr. JONES] that it is not authorized by law and not a work in progress. Am I correct in stating the substance of the point of order?

Mr. JONES. That the work is not authorized by law and that this appropriation is not to continue any work that is now in progress, and that it does not come within the exception that it retrenches expenditures.

Mr. ROBERTS of Massachusetts. Does the gentleman raise any point that money appropriated for one purpose can not be reappropriated without violating existing law?

Mr. JONES. I have not made that point.

Mr. ROBERTS of Massachusetts. If there is any question in the mind of the Chair as to the propriety of reappropriating money already appropriated, to use for another purpose, I should like to be heard on that feature of it. It seems to me that point is thoroughly established by a number of precedents.

I commenced my argument by calling the attention of the Chair to the naval appropriation bill of last year, approved March 4, 1913. On page 24 of the printed law as obtained from the document room is the following language:

Increase of the Navy: That for the purpose of further increasing the Naval Establishment of the United States, the President is hereby authorized to have constructed—

Then follows a list of different vessels, containing the following:

One supply ship, to cost, exclusive of armor and armament, not to exceed $1,425,000.

The law last year authorized the President to have constructed one supply ship, to cost, exclusive of armor and armament, not to exceed $1,425,000. No question can be raised that the construction of that ship was authorized by law. The chairman of the Committee on Naval Affairs [Mr. PADGETT] has in his possession a letter from the Secretary of the Navy, advising him that the supply ship has been placed in the Boston yard to be constructed.

Mr. PADGETT. Will the gentleman yield for a moment?

Mr. ROBERTS of Massachusetts. I will, if the chairman will read that letter.

Mr. PADGETT. I will hand the letter to the gentleman and let him read it.

Mr. ROBERTS of Massachusetts. If the Chair pleases, I now have the letter and will read it.

NAVY DEPARTMENT,
Washington, March 10, 1914.

Hon. LEMUEL P. PADGETT, M. C.,
Chairman Committee on Naval Affairs,
House of Representatives, Washington, D. C.

MY DEAR MR. PADGETT: In reply to your letter of the 7th instant requesting certain information in reference to provisions in the naval appropriation bill for the construction of building slips in the navy yards at Boston and Philadelphia, I beg to state as follows:

The naval appropriation act of March 4, 1913, has the following under "Increase of the Navy":

"That for the purpose of further increasing the Naval Establishment of the United States the President is hereby authorized to have constructed * * *:

"One transport, to cost, exclusive of armor and armament, not to exceed $1,850,000.

"One supply ship, to cost, exclusive of armor and armament, not to exceed $1,425,000."

Bids were invited in the usual manner from private shipbuilders, and, in addition, estimates were obtained from the principal navy yards. After careful examination of the various bids and estimates, including the revision by the Boston and Philadelphia Navy Yards of the estimates at first submitted by them, I decided on February 19 to place the building of these two vessels in Government yards—the supply ship to be built at Boston, and the transport to be built at Philadelphia. The estimates from these yards, even after being revised upward, were well within the limit of expenditure named in the appropriation bill and were materially below the lowest bids received from private shipyards.

In my annual report for the fiscal year ended June 30, 1913, I invited attention to the desirability of inaugurating a system of shipbuilding in a number of our more important navy yards. The placing of the above-mentioned building work at the Boston and Philadelphia yards is in furtherance of this policy, which is designed to render the Government largely independent of private shipbuilding concerns—keeping the cost of naval vessels within the department's control—and to improve navy-yard conditions by maintaining a more uniform force of employees.

The estimates received from these two navy yards are based on the assumption that they are to be equipped with building slips and suitable handling facilities. The building slips are absolutely essential for the construction of the vessels, and the handling facilities are equally essential if the ships are to be built rapidly and economically.

The department deems the provision of building slips at Boston and Philadelphia absolutely necessary at the present time for the specific purpose of constructing the vessels awarded as stated, and authorized by the Congress.

Sincerely, yours,

JOSEPHUS DANIELS,
Secretary of the Navy.

Now, Mr. Chairman, we have these points: The supply ship was authorized by law last year "to be constructed." Acting under the power conferred upon the President and the Secretary of the Navy, the construction of that supply ship has been placed in the Boston Navy Yard. The Secretary of the Navy advises us that it is absolutely essential in order to construct the ship that there must be a building slip. It would be absurd to hold for a moment that the construction of the ship is authorized by law, and yet it is contrary to law to make provision for the necessary things for the construction of that ship.

The CHAIRMAN. Does the gentleman from Massachusetts contend that an appropriation to build a ship carries with it an appropriation to build a dock wherein it can be built?

Mr. ROBERTS of Massachusetts. This is not a dock.

The CHAIRMAN. The Chair is not familiar with the naval terms, but he means a suitable place in which to construct it.

Mr. ROBERTS of Massachusetts. It is something on which the ship rests; it is a launchway.

The CHAIRMAN. Does the gentleman contend that the appropriation to build a ship carries with it an appropriation to build the launchway?

Mr. ROBERTS of Massachusetts. Not the appropriation, but the authorization and the construction of the ship carries with it necessarily the power of Congress at a future time to appropriate whatever money is necessary for the construction of that ship.

Mr. JONES. Will the gentleman yield?

Mr. ROBERTS of Massachusetts. Certainly.

Mr. JONES. Battleships have to have armor, do they not?

Mr. ROBERTS of Massachusetts. They do.

Mr. JONES. Would the authorization of a battleship authorize the appropriation of $10,000,000 in a naval bill to build an armor plant?

Mr. ROBERTS of Massachusetts. This is not a battleship.

Mr. JONES. I ask the question; it is an analogous proposition.

Mr. ROBERTS of Massachusetts. We authorize the construction of battleships, exclusive of armor and armament.

Mr. JONES. I understand.

Mr. ROBERTS of Massachusetts. In another part of the bill we make provision for armor and armament for ships already authorized. I never have yet known of a point of order being raised against an appropriation for armor and armament.

Mr. JONES. We will show the gentleman before we get through this debate that it has been raised many times and that the point of order has been uniformly sustained by the Chair.

Mr. MADDEN. Will the gentleman yield?

Mr. ROBERTS of Massachusetts. Certainly.

Mr. MADDEN. Is there a slip at this yard now?

Mr. ROBERTS of Massachusetts. There is a partial slip; that is, a part of the foundations which were put in there years ago, when we were constructing wooden ships, and the foundations for the slip have remained and will be utilized in the construction of the slip mentioned here.

Mr. MADDEN. This slip would have to be enlarged and extended.

Mr. ROBERTS of Massachusetts. It is practically an enlargement and extension of an existing slip. It is simply to put the launchway on a foundation and a possible extension of the foundation somewhat, in order to get the requisite length.

Mr. Chairman, there is a precedent directly in point to which I wish to call the attention of the Chair. On page 563, volume 4 of Hinds' Precedents, section 3837, there is this precedent:

On May 19, 1902, the naval appropriation bill was under consideration in Committee of the Whole House on the state of the Union, and the following paragraph had been read:

"That for further increasing the Naval Establishment of the United States the President is hereby authorized to have constructed by contract, except as herein otherwise provided, two first-class battleships"—

And so forth.

Then follows the authorization for the increase of the Navy in the usual form, which I will not read. To that I offered the following amendment, and I invite the particular attention of the Chair to this amendment:

Provided, That the Secretary of the Navy shall build at least one of the battleships, one of the armored cruisers, and one of the gunboats herein authorized in such Government navy yard or navy yards as he may designate; and for the purpose of preparing and equipping such navy yard or navy yards as may be so designated for the construction of such ships the sum of $175,000, or so much thereof as may be necessary, is hereby appropriated for each of the navy yards in which the Secretary of the Navy may direct any such ship or ships to be built.

The point of order was made; and, after much argument, the Chair, the Hon. James S. Sherman, then presiding, said:

The Chair thinks that the section of the Revised Statutes to which the gentleman from Pennsylvania [Mr. Adams] refers does not control in this case. In the opinion of the Chair, that section does not cover such a provision as is included in this section of the bill.

I will not read the decision. The result of the thought of the chairman on the point of order was that the point of order was good, and he therefore sustained it, ruling out of order the provision for $175,000 for equipping the yards designated for the construction of the ships.

Mr. ROBERTS having appealed, the question was put, Shall the decision of the Chair stand as the judgment of the committee? and on the vote by tellers there were 86 ayes and 109 noes. So the decision of the Chair was overruled.

There is one of the highest parliamentary authorities that we can have—the decision of the Committee of the Whole. It is on the question as to whether or not the provision for building a slip or equipping a yard for the construction of a ship or a battleship is in order. I assume, Mr. Chairman, with due regard for precedents and having in mind that here is a decision of the committee, not of any one chairman or series of chairmen, but a holding by the Committee of the Whole that this is in order, that the chairman can do nothing else than hold it in order.

The CHAIRMAN. From what money is this $148,000 to be taken? The Chair would like to understand that clearly.

Mr. ROBERTS of Massachusetts. Mr. Chairman, the naval appropriation bill of last year provided for the construction of barracks and officers' quarters at the Boston yard, at a cost of not to exceed $148,000, and this is a reappropriation of that money.

The CHAIRMAN. Has the gentleman that law before him?

Mr. MURRAY of Massachusetts. It is the act of 1913.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I have the act here. The appropriation last year was as follows:

Marine Barracks, Boston, Mass.: Barracks, $100,000; officers' quarters, $48,000; in all, $148,000.

The CHAIRMAN. And that money has not been expended?

Mr. ROBERTS of Massachusetts. That money has not been expended or obligated, and the Secretary of the Navy informed the committee, when appearing before it, that the money would not be expended.

The CHAIRMAN. The idea the Chair had in mind was whether there had been a flat appropriation or whether there had been an appropriation limited by a maximum amount, a smaller amount of which had been used?

Mr. ROBERTS of Massachusetts. No part of the amount authorized for barracks has been used.

The CHAIRMAN. As the Chair understands, it is a flat appropriation and therefore can be reappropriated?

Mr. ROBERTS of Massachusetts. That is my opinion, and if there is any question on that, I would like to cite the authorities holding the reappropriation of money in order.

Mr. LOGUE. Mr. Chairman, in connection with the argument of the gentleman from Massachusetts, I desire to call attention to the rule sought to be invoked, which provides:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for such public works and objects as are already in progress or for the contingencies for carrying on the several departments of the Government.

As the attention of the Chair has been called by the gentleman from Massachusetts, we have here, first, the authorization for the construction of a particular ship, and, second, the direction to the Secretary of the Navy, in his judgment, to place the construction of that ship in a Government yard. While we may be compelled to stick to the record and be bound merely by the bill, still I presume that the letter of the Secretary of the Navy and the report of the committee are advisory to the Chair as to the exact condition that exists in connection with this appropriation. We have, therefore, Mr. Chairman, the fact that the constructive work has been authorized to be done in this particular yard. We have it also, therefore, that it has now become administrative work of the Department of the Navy for the purpose of constructing that ship. The report, which becomes a part of the record, to my mind, places the Chairman in possession of the fact that the very appropriation is to be used in connection with the construction of an authorized piece of work, and therefore the continuance of the construction of an authorized piece of work. I take it that the authority in law that the appropriation of money, that the authorization for a thing to be done at a particular place, is the commencement of the particular public work. It does not mean that they are in construction of a building and that the soil should be turned and that part of the foundation should be laid. I consider that the appropriation and, further, the awarding of a contract, constitutes it a public work, and, therefore, as we have it in the nature of a recommendation from the committee, accompanied with their report, this is in continuation; it is administrative, and it is outside of the restriction that is sought to be imposed by the work.

The CHAIRMAN. Is the gentleman contending that the report of the committee makes it in order?

Mr. LOGUE. No; I am not contending that. I am contending that while if it was a legal proposition I might be discussing on the pleadings before the court, still at the same time, if there was a report accompanying that which would be illuminating with regard to presenting facts, those facts would be entitled to consideration for the purpose of ascertaining exactly that which was purposed to be done. I do not consider that the report of the committee could of itself authorize an appropriation; but if the report of the committee is a statement of existing facts, that is the only way in which the Chair could get in possession of the facts, and I presume the Chairman would desire to know the facts in connection with this particular expenditure.

There are many precedents which, while not directly upon this point, show that appropriations made in continuance of a public work are in order.

The CHAIRMAN. Just at this point in the argument of the gentleman from Pennsylvania, may the Chair be indulged to ask the gentleman from Massachusetts [Mr. ROBERTS] a question? Does the Chair understand the gentleman from Massachusetts to say that no part of the $148,000 has been used for the original purpose for which it was appropriated?

Mr. ROBERTS of Massachusetts. None of it has been used and none of it has been obligated.

The CHAIRMAN. Then does the gentleman call it an "unexpended balance"? The precedents that the Chair has before him speak of an "unexpended balance."

Mr. MURRAY of Massachusetts. The language is "unobligated balance."

Mr. ROBERTS of Massachusetts. It is an unobligated balance. It is the whole appropriation, none of which has been used.

The CHAIRMAN. If the Chair may be indulged, this is a total appropriation, unused, and the time within which it may be used has not yet expired?

Mr. ROBERTS of Massachusetts. That is a fact.

The CHAIRMAN. So that the appropriation, while made for one purpose, is now sought to be diverted in toto to another?

Mr. ROBERTS of Massachusetts. That is the fact; and if there is any doubt in the mind of the Chair with respect to that, I would like to submit some authorities.

The CHAIRMAN. The Chair has some doubt upon that, and will be glad to hear the gentleman.

Mr. PADGETT. Mr. Chairman, in order to get it clear before the Chair, in the bill last year the appropriation of $148,000 was made for the purpose of constructing marine barracks in the yard at Boston. Since then the Secretary of the Navy and the Navy Department have changed their desires and purposes, and they do not longer desire to construct the barracks. They abandoned that purpose.

The CHAIRMAN. Who made the abandonment?

Mr. PADGETT. The Secretary of the Navy.

The CHAIRMAN. In what way?

Mr. PADGETT. He stated that he does not think they are needed.

The CHAIRMAN. But suppose to-morrow we were to have another Secretary of the Navy, and he should desire to go ahead with it, would not this, then, be a repeal of that act?

Mr. PADGETT. It would, if this is made available for this purpose.

The CHAIRMAN. Would that not be legislation?

Mr. PADGETT. Oh, I do not know; it is legislation to the extent it is making it available for one purpose instead of another, but I think it is legislation that is in order upon this bill for this reason——

The CHAIRMAN. That is one of the questions.

Mr. PADGETT. Now, for instance, coming back to the question of legislation. Appropriating money directly out of the Treasury for this purpose would be legislation in the same sense that this is legislation and that that would be in order.

The CHAIRMAN. This goes further than that, and the Chair thinks it repeals the former and in lieu enacts this.

Mr. PADGETT. But it is not the extent of legislation. If this is legislation at all and is subject to the objection, it would be subject if it is legislation to any extent. Now, I say it is in order for the reasons that have not been suggested, which are these: The naval bill of last year in authorizing the ships, one of which has been assigned to Philadelphia—and the same question will be presented later, which the Chair will bear in mind—the Secretary has assigned one to be built in the yard at Boston, the matter which the Chair has before him now. The bill of last year authorized the President, and through him the Secretary of the Navy representing the President, to construct these ships either in navy yards or by private contract. Now, the President has authority to build them in yards. He has directed that they be built in yards. Now, in the exercise of lawful authority it becomes necessary to have these slips to construct these ships, and providing the money for the building of these ways is simply providing money ancillary through and in aid and completion of a construction of the ship that has heretofore been authorized to be built in the manner in which the President has directed it to be built.

Mr. MADDEN. Will the gentleman yield for a question there?

The CHAIRMAN. Does the Chair understand the gentleman to say this was in the bill of last year?

Mr. PADGETT. Yes.

The CHAIRMAN. Can the gentleman refer the Chair to the authority authorizing the building?

Mr. PADGETT. Yes.

Mr. MADDEN. I would like to ask the gentleman a question.

Mr. PADGETT. Yes, sir.

Mr. MADDEN. I would like to suggest to the gentleman from Tennessee that if the President had authorized the construction of this ship at a yard with the facilities needed that he would not then have gone beyond his authority; but in authorizing the construction of a ship at a yard where there are no facilities is adding to the construction of a ship in the amount that may be required.

Mr. MURRAY of Massachusetts. Oh, but there are some facilities.

Mr. PADGETT. That may be a question of the propriety of his order, but that is not a question as to his authority, because his authority gives him the right to build them where he shall designate.

The CHAIRMAN. The gentleman from Illinois has made a suggestion that there are "no facilities," while other gentlemen are insisting that there "are facilities." That is a question to be ascertained.

Mr. ROBERTS of Massachusetts. Mr. Chairman, the gentleman from Illinois does not know the conditions in that yard.

The CHAIRMAN. And so the question is: Which is correct?

Mr. MURRAY of Massachusetts. Mr. Chairman, we stand ready on that point to prove to the Chair that there are "existing facilities," and we will prove that by a long history of ships that have been built there.

The CHAIRMAN. The Chair will hear the gentleman from Pennsylvania [Mr. LOGUE].

Mr. ROBERTS of Massachusetts. Mr. Chairman——

Mr. PADGETT. Will the gentleman permit me to continue for just a moment? At Boston we have a navy yard with a number of machine shops, several hundred hands employed constructing smaller ships than this, and it is a regular shipyard, and this is simply an additional facility that is rendered necessary by reason of the assignment by the President to this yard the duty of building this ship.

The CHAIRMAN. Yes; but the gentleman takes the position that this is a proposition to enlarge the facilities for building a ship which is not to be built. Is that right or not?

Mr. PADGETT. I did not understand the Chair.

The CHAIRMAN. Is this ship to be built there?

Mr. PADGETT. Yes, sir.

The CHAIRMAN. Very well.

Mr. PADGETT. It is to be built in the Boston yard, because it has already been assigned to be built there, and the work of building it is under way, and it now becomes necessary to have these ways.

Mr. JONES. Mr. Chairman, may I ask the gentleman a question?

Mr. PADGETT. Yes.

Mr. JONES. What work is under progress at the Boston yard? Is the work of building this ship under progress?

Mr. ROBERTS of Massachusetts. Yes; the plans and the assembling of material are going forward.

Mr. PADGETT. They are preparing the plans, they are gathering the material, they are assembling it and getting it together.

Mr. JONES. I understand the gentleman is entirely mistaken about that.

Mr. PADGETT. No, sir.

Mr. JONES. That is not my understanding about it.

Mr. PADGETT. They are getting materials ready and this has already been designated at this yard.

Mr. JONES. No material has been assembled at all, I understand.

Mr. PADGETT. The concluding sentence of the Secretary's letter is:

> The department deems the provision for building ships at Boston and Philadelphia absolutely necessary at the present time for the specific purpose of constructing the vessels awarded as stated and authorized by the Congress.

Now, that is an official letter of the Secretary. Now, I called attention to the provisions of the bill of last year, which is as follows:

> The Secretary of the Navy shall build the battleship authorized by this act in such navy yard as he may designate and shall build any of the other vessels herein authorized in such navy yards as he may designate.

Now, there is the authority. He may build any of those two vessels, and he has designated one to be built at Boston and one at Philadelphia.

The CHAIRMAN. The Chair will ask the gentleman if he thinks a direct appropriation for the work to be done by this $148,000 would have been in order?

Mr. PADGETT. I think so, because we have got it in order on the very same page lower down in regard to the navy yard at Philadelphia—building slips and equipment, $200,000. We have it on the same page for building slips in the navy yard at Philadelphia, which is a direct appropriation out of the Treasury.

Mr. JONES. And a point will be made against that.

Mr. PADGETT. I understand it will. And I understand he had both questions before him. The Secretary having authority to build these ships in navy yards, and these being yards with machines for ironworking and woodworking and every form of work that is necessary, these slips are simply the foundations or ways on which to rest the structure of the ship.

Mr. BROWNING. Mr. Chairman, will the chairman finish reading the balance of the paragraph that he started to read?

Mr. PADGETT. Yes.

Mr. BROWNING. "Should it reasonably appear."

Mr. PADGETT. I will read:

> And shall build any of the other vessels herein authorized in such navy yards as he may designate, should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels, have entered into any combination, agreement, or understanding, the effect, object, or purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the construction of any of said vessels.

Mr. BROWNING. That was all. I wanted the gentleman to read "should it reasonably appear."

Mr. PADGETT. That does not interfere with the authority of the Secretary. He states here in his letter that he designates these ships to be built at Boston or at Philadelphia for the reason that the estimates of cost coming from those two yards for the construction of the two ships were very much below the bids submitted by private contractors.

Mr. JONES. May I ask the gentleman a question before he sits down?

The CHAIRMAN. The Chair will hear further from the argument from the gentleman from Pennsylvania [Mr. LOGUE] before he yields.

Mr. LOGUE. I yield now for the purpose of a question.

Mr. JONES. There seems to be some confusion in the minds of gentlemen as to just what these slips are. They are generally spoken of, are they not, as building ways?

Mr. PADGETT. They may be a building way or a launch way. It is a structure upon which the ship is built and holds it up off the ground, and when they get the ship ready to launch it slides off of them into the water.

Mr. JONES. It is known as a building way?

Mr. PADGETT. Yes.

Mr. JONES. And is it not true that the Boston yard can not build a ship unless it is equipped with this building way? Is it not true that this yard, the business of this yard, chiefly is confined to repair work, and that the object of this proposed appropriation is to make it a shipbuilding yard and not a ship-repair yard, as it is?

Mr. PADGETT. They could not build a ship of this size without having the ways already contemplated or needed for this ship. But they are completing at this time smaller vessels, and they have the structure upon which they rest.

Mr. JONES. But they have no building ways suitable for building a great ship?

Mr. PADGETT. Of this size they have not, and this is needed by virtue of the fact that the Secretary of the Navy under this authority has assigned these ships to be built, and this is an appropriation in aid of the work that has been lawfully designated and is in course of progress.

Mr. JONES. To a yard that is not prepared for it.

Mr. PADGETT. That might be.

Mr. LOGUE. Mr. Chairman, the chairman of the committee has very clearly stated, and more clearly than I could, many of the reasons why this point of order should be overruled. The reading of the additional portion of the act of 1913 as regards the circumstances under which the Secretary of the Navy may award contracts to Government navy yards does not change in the slightest degree his action. The awarding of the contract is an administrative action, and it is presumed the Secretary acted in accordance with the law. I do not want to get away from the main question. I do not want to bring in outside facts. Therefore, I have restricted myself merely to those things which appear to me to be a part of the record, if I may so style it, in this case, meaning the reports and the Secretary's letter. We have the fact that ships are built, barges are built, boats are built, at both of the navy yards referred to. It is maintained by an unbroken line of authority that appropriations which seek to extend existing work do not come within the spirit of the rule. The decisions——

Mr. SAUNDERS. May I ask the gentleman a question in that connection?

Mr. LOGUE. Yes.

Mr. SAUNDERS. May I ask you to cite some of those precedents that hold that the extension of existing lines are a continuation of work in progress?

Mr. LOGUE. I will do that. I have a number of them here. They are not this character of work, but they are applicable.

Mr. SAUNDERS. I wanted you to cite them in order to show that they are not applicable.

Mr. LOGUE. Oh, they are. We will take the question of the armor plant, on which a point of order was sustained, and it was sustained on the sole ground that the Government was not up to that time engaged in any such work, and therefore it was a new enterprise and a new undertaking that had not been authorized by any existing or previously enacted law. But there are multitudes of cases, such as the purchase of a site, which is an extension of and an addition to work already authorized by existing law and is held not to be new legislation, but as coming within the spirit of this rule. For the erection of a fireproof building in the grounds of the Naval Academy. Why? Because it would be in line that the Naval Academy should be properly protected. The Chairman, Mr. Kilgore, of Texas, in that case decided that a building proposed to be erected, a fireproof building, on the site of the public grounds at West Point was within the purview of the law. We also have it in connection with an appropriation for the building of a bridge upon a road already authorized; at West Point, for an additional building; and at Annapolis for an additional building, because they were a continuance of existing work which had been authorized and was an extension. I do not want to burden the Chairman with the citation of 40 or 50 cases and the precedents and endeavor to apply them, but I wish to say that "land on the other side of the road" has been held to be the extension of an existing public work, and therefore an appropriation authorized therefor.

The CHAIRMAN. Right there the Chair will say to the gentleman that the construction of officers' quarters in the navy yard was not held to be an extension.

Mr. MURRAY of Massachusetts. That was at a navy yard where the marines were not held to be an essential part of the navy yard, and that is easily distinguishable, as the Chair will see.

The CHAIRMAN. The Chair does not think this part of the gentleman's argument bears directly upon the point.

Mr. LOGUE. I may have been misunderstood in reference to the particular case the Chairman referred to.

I believed that the reason it was was because it was not part of the navy yard. We are now dealing with a navy yard which we know is an existing thing by plenty of appropriations that have been made for it. We know that it is a navy yard actually in force. We know not only by this appropriation bill, but by other appropriation bills, that it has shops. It has force. It has means of equipment, and there comes along here a case where work has been authorized at that particular yard of a constructive character for which an appropriation has been made, and it is now asked, as auxiliary, as an aid to the fulfillment or carrying out or completion of public work duly authorized, that a certain appropriation might be made.

It might be well at this time, and still I fear to do it because it may be foreign, to call the attention of the Chair to the fact that the very figures at which these contracts are awarded to the respective yards are within the sums of the appropriations. If I could in that way anticipate an answer to any thought of this throwing an additional burden on the Government, I would hold closely to the line without endeavoring to bring in anything collateral, except that we take notice of the fact of the existence of this yard as a shipyard, as a yard that has been authorized in the judgment, in the discretion, in the administrative power of the Secretary of the Navy to be a place where ships should be built, and where ships can be built with the money already appropriated for that work. I consider, therefore, with an appropriation made, with a contract awarded to a Government navy yard, that this is not in any way at all new legislation, but it is clearly in the line of aiding, assisting, furthering, and making possible the successful accomplishment of work which has been appropriated for, which has been authorized, and which the Secretary of the Navy in his judgment has directed to be done at a particular place, at a particular sum within the appropriation, which particular place is a Government yard, engaged in Government work, which the Government itself has undertaken to perform.

Mr. SAUNDERS. Mr. Chairman, this point of order can be very easily sustained by reference to the established precedents of this body. The whole difficulty in this connection arises out of certain exceptions that have heretofore been engrafted upon the plain rule; and the reason I asked the gentleman from Pennsylvania [Mr. LOGUE] to cite some of his cases was because I felt perfectly sure that when he cited those cases he would cite cases falling within the excepted class. These exceptions like all precedents that strain, a plain law, to furnish authority, to meet some particular case, serve no purpose save to muddy the current of the precedents of the House.

The first exception was one in which a point of order was made against an unauthorized appropriation for an additional battleship. The point of order was overruled. There was no foundation authority upon which that decision could rest. I suppose that it was rendered because at that time there was an ardent desire to appropriate for an additional battleship. Hence the appropriation was sustained. The appropriation for this ship, was not for a work in progress, and in no sense did the decision come within the plain meaning of the rule, and the terms of the precedents.

The gentleman cited one or two cases from West Point, and Annapolis. They also come within the exceptions that have followed from the battleship precedent. The Chair will find, when he comes to examine these decisions to which I shall refer him, that they stand upon a separate footing of their own.

It is perfectly obvious, should the Chair sustain the contention made here to-day by the chairman of the Committee on Naval Affairs [Mr. PADGETT,] and by the gentleman from Pennsylvania [Mr. LOGUE] that the Chair would hold that when the Government has a particular policy in view, and the committee appropriates to carry out that policy, such action on its part would be authorized. It is the policy of the Government to maintain a Navy, but it has never been held that in order to effectuate that policy the Naval Committee could provide for unauthorized, though necessary improvements in navy yards.

Mr. MURRAY of Massachusetts. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Massachusetts?

Mr. SAUNDERS. Yes.

Mr. MURRAY of Massachusetts. Does the gentleman contend that there was any limit of cost fixed in the enabling act that established the navy yard at Charlestown, Mass.?

Mr. SAUNDERS. No; I did not say so.

Mr. MURRAY of Massachusetts. Can the gentleman undertake to point out where any limit has been set in the law or any limit fixed against equipment?

Mr. SAUNDERS. No. I say that if the Chair sustains the contention of you gentlemen, then the Committee on Naval Affairs will have authority to provide for additional equipment for any navy yard to whatever extent they may deem the same necessary to bring that yard up to the highest state of modern efficiency. This House would hardly support such a contention, and it is hardly necessary to say that it would be an unwise and dangerous policy, to extend such authority to the Naval Committee, or to any other committee. We should retain

on the part of the House, a greater control over appropriations than would be possible should such a power be given to a committee.

I wish to call the attention of the Chair to a citation that plainly makes the distinction that I have sought to draw. From Hinds' Precedents, volume 4, page 4493, I read as follows from the ruling of the Chairman:

The logical inference from the precedents is that the Navy proper, consisting of the war fleet, officers, and seamen—

This refers to the ships and the military plants that turn out officers for the two forces, namely, the Naval Academy at Annapolis, and the Military Academy at West Point—

with necessary equipment and supplies, is a public work or object already in progress within the meaning of the rule, and appropriations therefor are in order in appropriation bills without previous authority of law.

This ruling covers the additional buildings that have been allowed at West Point, and the additional buildings that have been allowed at Annapolis; and later as I said, but from time to time buildings have been allowed to be appropriated for at these institutions without any specific authority.

These rulings however have never been admitted to be more than exceptions, and the tendency of the presiding officers of this body has been to curtail, rather than extend the application of these exceptions.

The opinion goes further.

The administrative branches and the construction and repair establishments of the Navy Department, including, among other things, naval stations, navy yards, hospitals, magazines, and stationary dry docks, do not ipso facto constitute a public work, or object in progress, and appropriations therefor must be previously authorized by law.

If this constitutes a sound statement of the principle, and this ruling has been followed, it is perfectly apparent that the contention of these gentlemen is without authority of precedent, or of law.

Such is the basic decision. Subsequent to this decision, many efforts have been made to have dry docks, hospitals, magazines, and officers' quarters at navy yards appropriated for, without authority. In every instance these efforts have been overruled by the presiding officers, and the points of order made to them, have been sustained.

Let me call the attention of the Chair in this connection to some of these rulings.

In 1896—and that takes us back exactly 18 years—Albert J. Hopkins, Chairman of the Committee of the Whole (see Hinds' Precedents, sec. 3731) declared that a provision for a dry dock at League Island Navy Yard was out of order. There was a navy yard at that place, and I do not know that any limit of cost was ever prescribed for the same. Precisely the same argument was advanced in that connection that is now advanced, namely that the dry dock was a necessary addition to this navy yard to enable it to do the effective work for which it was devised. Nevertheless the point of order in that connection was sustained.

In 1897 Mr. James S. Sherman of New York, Chairman of the Committee of the Whole House on the state of the Union, declared that a provision for a concrete dry dock at the Boston Navy Yard was out of order.

The CHAIRMAN. What is the citation?

Mr. SAUNDERS. Hinds' Precedents, Volume IV, section 3732.

In 1907 Mr. James S. Sherman (Hinds' Precedents, Vol. IV, sec. 3734) declared that a stone dry dock at Pensacola Navy Yard was out of order.

In February 1913, at the third session of the Sixty-second Congress, RECORD page 3948, a provision for a dry dock at League Island was held to be out of order.

The CHAIRMAN. Was there a navy yard at that place?

Mr. SAUNDERS. Yes. I wish to call attention in this connection to the fact that the very same argument was then made as is now made, namely that it was in continuation of a public work, and that it was necessary in order that that plant, which the Government already owned, might do more effective work.

The CHAIRMAN. May the Chair invite the attention of the gentleman to the authority given to the President to have this particular ship constructed?

Mr. SAUNDERS. I expect to take that up a little later. The proponents of the above amendments insisted that they were in order because they provided needed additions to the several navy yards.

In 1902 James S. Sherman, Chairman of the Committee of the Whole House on the state of the Union, declared that barracks for enlisted men at the New York Navy Yard were out of order (Hinds' Precedents, vol. 4, sec. 3755).

In 1907 a naval prison at Pensacola Navy Yard was held to be out of order (Hinds' Precedents, vol. 4, sec. 3756).

In the same year the same chairman, Mr. Sherman of New York, held that officers' quarters at the New Orleans Navy Yard were out of order (Hinds, 3758). By the same chairman in the same year a new foundry at the Washington Navy Yard was held to be out of order (Hinds, 3761).

And so on, Mr. Chairman. I might multiply these precedents, but as I will give a memorandum of them to the Chairman, I will not cite them further in this connection.

Mr. MURRAY of Massachusetts. May I interrupt the gentleman to say that I feel sure we can differentiate all the precedents that he has mentioned, and he had better cite the rest of them.

Mr. SAUNDERS. Would the gentleman mind differentiating them right now?

Mr. MURRAY of Massachusetts. I shall be glad to do it.

The CHAIRMAN. Does the gentleman from Virginia yield?

Mr. MURRAY of Massachusetts. He has asked me to do so.

Mr. SAUNDERS. Yes, I should like to hear the process of differentiation.

Mr. MURRAY of Massachusetts. May I respectfully ask the Chair to read along with me at page 493 of volume 4, Hinds' Precedents, which the gentleman from Virginia makes the keystone of his argument? The gentleman tells us about dry docks, about floating cranes, about officers' quarters, and about marine barracks. Let me emphasize to the Chair——

The CHAIRMAN. Where is the gentleman reading?

Mr. MURRAY of Massachusetts. Page 493, volume 4, Hinds' Precedents. But before I read, let me emphasize to the Chair that the pending paragraph relates, not to dry docks, not to floating cranes, not to marine barracks or officers' quarters, but it relates to the necessary equipment for a supply ship. I emphasize that point because the Chair will see in reading with me:

The logical inference from the precedents is that the Navy proper, consisting of the war fleet, officers and seamen, with necessary equipment and supplies, is a public work or object already in progress within the meaning of the rule, and appropriations therefor are in order in appropriation bills without previous authority of law, while the administrative branches and the construction and repair establishments of the Navy Department, including, among other things, naval stations, navy yards, hospitals, magazines, and stationary dry docks, do not ipso facto constitute a public work or object in progress, and appropriations therefor must be previously authorized by law.

Mr. SAUNDERS. I do not want to interrupt my friend, but that is exactly what I read in support of the contention I am making.

Mr. MURRAY of Massachusetts. Of course, the gentleman read it, and he emphasized the things regarding which this rule clearly is against us; but he glossed over the words—

with necessary equipment and supplies, is a public work or object already in progress within the meaning of the rule.

Mr. SAUNDERS. I think I read that in the same connection as the other matter.

Mr. MURRAY of Massachusetts. Not at all.

Mr. SAUNDERS. As I rely on it, I would not have glossed it over.

Mr. MURRAY of Massachusetts. You do not rely on it.

Mr. SAUNDERS. I do rely on it.

Mr. MURRAY of Massachusetts. Let me read further:

The question for decision is whether a floating dry dock is an essential part of the equipment of the Navy proper or whether it belongs to the administrative service of the Navy Department.

Of course, it says no.

Colliers have been held to be an essential part of the equipment of the Navy, obviously because they sail with naval squadrons and attend them in action as supply boats.

Now, Mr. Chairman, that is the point of the entire contention that we who support the committee's report make. This item relates to a supply ship; not to a dry dock, not to naval grounds, not to officers' quarters, not to marine barracks, but to a supply ship, which is defined as the very existence of the gentleman's contention as an essential part of the naval squadron. The Chair can see that language for himself.

Now, Mr. Chairman, the gentleman from Virginia and myself are agreed on one point. He emphasizes the danger of extravagance, in the absence of some rule which will put a limit on committees and on Members in the authorizations that we may make. Surely, then, we are agreed that the purpose of this rule is to safeguard the Treasury and is in the interest of economy. May I use that fact—and it is a fact—to state to the Chair the fundamental point of this paragraph, which is the saving of $148,000 appropriated by the last Congress in the naval appropriation bill for a purpose that Congress thought to be wise and just, for a purpose which the Secretary of the Navy, with his own ideas of mobilizing marines, believes to be unwise? The Chair put some question to the gentleman from Massachusetts, my colleague [Mr. ROBERTS], in regard to the possible repeal of

the legislation of last year. May I state to the Chair that the saving is a real economy? May I get away from that argument and treat it as the language must be treated when the item in regard to the Philadelphia Navy Yard, which comes later on, in line 13, same page, is made? May I suggest to the Chair that if the Chair shall hold this paragraph out of order because of the contention that it repeals existing law of last year, I shall offer an amendment appropriating the sum of $148,000 in order that this thing may not go off on a tangent, and have a square ruling, as the Philadelphia advocates will have in respect to their item?

Mr. Chairman, those who oppose this thing seem to miss the fundamental purpose and idea of navy yards. I have been amazed to learn of the early activities of shipyards and the construction of navy yards of the country. I have here the American State Papers which recite in detail the construction of ships at navy yards and point out the continuous development by the Government of its naval stations for the construction and repair of ships.

The CHAIRMAN. May I ask the gentleman from Massachusetts if he does not think the adoption of this amendment would repeal the purpose for which it was originally made for marine barracks?

Mr. MURRAY of Massachusetts. I do, and in the opinion of the Secretary of the Navy that is the commendable thing to do.

The CHAIRMAN. No matter whether it is commendable or not; can it be done in this way?

Mr. MURRAY of Massachusetts. Yes.

The CHAIRMAN. Is it not legislation? You are seeking to repeal a thing which is authorized.

Mr. MURRAY of Massachusetts. Yes; but we are doing it for a definite purpose.

Mr. ROBERTS of Massachusetts. There are authorities on that point, Mr. Chairman, and when the Chair is ready to hear us I will be glad to furnish them.

Mr. MURRAY of Massachusetts. That point seems to me to be beside the major point, and if the Chair rules on that proposition, I am anxious to submit an amendment on all fours with the item on page 22, line 13.

The CHAIRMAN. If the chairman of the Committee on Appropriations will permit the item to be passed without prejudice until the subsequent item is reached, so that the same ruling can be made, that may be done. The Chair has not seen the other item, but takes the statement of the gentleman from Massachusetts that they are similar propositions.

Mr. MURRAY of Massachusetts. It has been said that there is a condition of affairs in the Charlestown Navy Yard affected by this item. I come from the district——

Mr. SAUNDERS. Mr. Chairman, I prefer to proceed with my legal argument, and not have conditions at the navy yard at Boston injected into it.

Mr. MURRAY of Massachusetts. The gentleman invited me.

Mr. SAUNDERS. Yes; but I can withdraw it.

Certainly, I yielded to the gentleman from Massachusetts who said he wanted to differentiate the authorities cited by me, from this case. I have given him full opportunity to do so. But I have found that he has merely reiterated the authorities that I have cited, and admitted as exceptions. Almost the last word that my friend said was that we misapprehended the purpose of navy yards, that they were a part of the continuous development of our Government. That is absolutely true. But it is also true that with respect to policies, the precedents all hold that they do not furnish authority for appropriations to make the same effectual. There must be some specific authority of law.

Certain it is that if these gentlemen are striving to secure an appropriation for these ships on the ground that it is the policy of our Government to establish and maintain navy yards, they can find no authority in the precedents to sustain them. The whole body of our decisions is absolutely against such a contention.

The gentleman read the same section to which I called the attention of the Chair, to show the distinction that has been made between navy yards and West Point and Annapolis, and declared that I misapprehended a portion of it. I did not misapprehend any portion of what I read. I will read it again in order to show my friend that he and not I, is at fault.

"The logical inference from the precedents is that the Navy proper"—in this connection I will say that a navy yard is not the Navy proper. No one can contend for that proposition——

Mr. MURRAY of Massachusetts. But a supply ship belongs to the Navy proper.

Mr. SAUNDERS. We are dealing with the permanent equipment of a navy yard, and not a supply ship.

Mr. MURRAY of Massachusetts. We are dealing with a proposition for a Navy supply ship authorized one year ago. This is an incidental effect of that authorization, and the gentleman knows it.

Mr. SAUNDERS. Suppose the gentleman reads the item referred to. What does that provide for?

Mr. MURRAY of Massachusetts. That provides in order to pay $148,000——

Mr. SAUNDERS. Oh, I am not talking about the purposes. I say what does the bill say?

Mr. MURRAY of Massachusetts. The gentleman knows what it says just as well as I do.

Mr. SAUNDERS. If the gentleman does not desire to read it, I shall. The only reason I asked the gentleman to read it was because I thought he had the bill before him.

Mr. MURRAY of Massachusetts. I have. The bill provides:

That the unobligated balance under the appropriation, Marine Barracks, Boston, Mass., for the fiscal year ending June 30, 1914, not exceeding $148,000, is hereby made available for building slip and equipment.

Mr. SAUNDERS. Mr. Chairman, just as I have said, there is no reference in that to a supply ship, or anything of the sort. It refers to putting a yard in permanent condition to build ships. That is an entirely different proposition from a work in progress, such as a ship in process of construction.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS. Certainly.

Mr. MOORE. How does the gentleman interpret that provision of the act of March 4, 1913, which says that the Secretary of the Navy shall build the battleship authorized, and so forth?

Mr. SAUNDERS. Mr. Chairman, I will come to that in a minute.

Mr. MOORE. Is not that in the nature of a direction to the Secretary of the Navy to carry out this project?

Mr. SAUNDERS. That is not authority for the Naval Committee to provide for permanent additions of all sorts to a navy yard. I will deal with that in a few minutes.

Mr. Chairman, as I have said, the language in the act itself provides for a permanent addition to a navy yard. What do the authorities say in that connection? As I was saying, when this distinction was made heretofore with respect to the Navy proper, the war fleet, the officers and seamen, the chairman referred to equipment and supplies. This language referred to such things as are in the nature of supplies for the officers, for the seamen, namely, clothes, subsistence, and so forth. If it referred to the things that my friend has in mind, then the distinction that has been made could never have been established, and the rulings that were subsequently rendered in relation to buildings and plant at navy yards, would have had no foundation in reason.

Mr. MURRAY of Massachusetts. Mr. Chairman, will the gentleman let me direct his attention to the sentence—

Colliers have been held to be an essential part of the equipment of the Navy, obviously, because they sail with naval squadrons and attend them as supply boats.

The gentleman does not read the part I want him to read.

Mr. SAUNDERS. I did not read that because it has nothing to do with the present situation. If the first proposition was true, then all of the provisions heretofore ruled out relating to dry docks, cranes and buildings at navy yards, would have been in order. All of those things are as essential for the Navy, as a collier, or a slip.

Mr. ROBERTS of Massachusetts. Mr. Chairman, would it make any difference in the gentleman's opinion if the Secretary of the Navy were to notify Congress that the construction of a foundry was essential to the construction of a ship?

Mr. SAUNDERS. None whatever. The judgment of the Secretary of the Navy in a matter of that sort should not override positive law, or the decisions of this House. The Members of this House, are as well able as the Secretary of the Navy, to determine whether the construction of a foundry is essential to the construction of a ship.

The CHAIRMAN. If the Secretary of the Navy should not use this money, there is provision of law as to what shall be done with it.

Mr. SAUNDERS. Mr. Chairman, I asked the gentleman from Massachusetts [Mr. MURRAY] to read the section of law referred to, because I wished to emphasize in that connection the fact that a shipway is a yard structure, and is not a part of the equipment of a vessel.

Mr. MURRAY of Massachusetts. Nobody said that it was.

Mr. SAUNDERS. I know the gentleman did not, but he is arguing that this structure is authorized because it is a necessary addition to the equipment of this navy yard to build this ship.

Mr. MURRAY of Massachusetts. I did not argue any such thing. The gentleman, perhaps, is muddying some water himself.

Mr. SAUNDERS. Possibly, but I think not. The gentleman was certainly emphasizing the question of supplies, while we are dealing with a permanent addition to a navy yard.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield on that point?

Mr. SAUNDERS. Yes.

Mr. ROBERTS of Massachusetts. Does it make the slightest difference whether in carrying out a purpose already authorized by law we make a permanent or a temporary addition to a navy yard?

Mr. SAUNDERS. Navy yards are already authorized by law.

Mr. ROBERTS of Massachusetts. The gentleman is going wide of the discussion. The discussion here is the building of a supply ship. That is the question.

Mr. SAUNDERS. I understand that perfectly well. Navy yards are already authorized by law. The building of ships is already authorized by law, and if the contention of these gentlemen is sound, whatever may be regarded as incidental to, and necessary as a part of a navy yard, to forward the construction of these ships, may be appropriated for without any further authority of law. I utterly challenge and assail any such contention.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS. Yes.

Mr. ROBERTS of Massachusetts. Has the gentleman followed the language of the naval appropriation bills for several years past?

Mr. SAUNDERS. In a general way, yes.

Mr. ROBERTS of Massachusetts. That is the gentleman's trouble.

Mr. SAUNDERS. No, it is not my trouble at all. The trouble with my friend is that he has got some particular project——

Mr. ROBERTS of Massachusetts. Just one moment——

Mr. SAUNDERS. Oh, I can not let the gentleman take up my time.

Mr. ROBERTS of Massachusetts. I want to give the gentleman a little information. The language of authorization of the naval appropriation bill is hardly the same language any two years, and the language of any particular authorization is the language that must control.

Mr. SAUNDERS. If the gentleman has any particular language that cuts any figure in this connection he ought to insert it. I am perfectly willing to yield to the gentleman if he can put in any language that is relevant in this connection.

Mr. ROBERTS of Massachusetts. Will the gentleman permit me to ask this question, Can a ship of the size and character of the ship authorized last year be constructed unless there are building slips constructed?

Mr. SAUNDERS. Why, no.

Mr. ROBERTS of Massachusetts. Then the gentleman gives away his whole case, because the law of last year authorized the construction of a ship, and that carries with it everything necessary to construct it.

Mr. SAUNDERS. The law never contemplated any such thing. The law never contemplated that the Secretary of the Navy should undertake to place a ship at a yard not equipped to build it, when there were yards amply able to take care of such construction.

Mr. ROBERTS of Massachusetts. That is the gentleman's statement; there is nothing in the law that warrants that.

Mr. SAUNDERS. Maybe not, and there may be as much in it, as in the suggestion of the gentleman from Massachusetts.

The CHAIRMAN. Does the gentleman from Virginia admit the statement made by the gentleman from Massachusetts?

Mr. SAUNDERS. Why, no, I do not admit it at all.

The CHAIRMAN (continuing). That the President is authorized by law to have that ship built at this particular navy yard?

Mr. SAUNDERS. No, sir, I do not admit it at all. The gentlemen who make those statements, should furnish the authority—make them good.

The CHAIRMAN. The Chair will say to the gentleman from Virginia that the Chair has looked up that very question.

Mr. MURRAY of Massachusetts. Will the gentleman from Virginia yield?

Mr. SAUNDERS. I yield.

Mr. MURRAY of Massachusetts. Until I read the act at page 762 of the Naval Yearbook, which is as follows:

> And shall build any of the other vessels herein authorized in such navy yards as he may designate.

That is the authorization.

The CHAIRMAN. Has he authorized a ship to be built there?

Mr. MURRAY of Massachusetts. He has, indeed.

Mr. SAUNDERS. In what way did he do it?

Mr. MURRAY of Massachusetts. By Executive order under the terms of this act passed last year.

Mr. ROBERTS of Massachusetts. The communication of the Secretary of the Navy sets forth this fact. It has been read and is in the RECORD, Mr. Chairman.

Mr. BRYAN. If the gentleman will permit, I have a little information as to that. The Secretary of the Navy submitted the matter of bids and he found that the bid of the Boston yard was $250,000 under——

The CHAIRMAN. The Secretary of the Navy submitted what?

Mr. BRYAN. The question of building this ship; this million-dollar ship.

The CHAIRMAN. He submitted the building of a ship to competitive bidding?

Mr. BRYAN. Yes; and the Boston yard bid was $250,000 under any other bid. The Secretary of the Navy knew there were no building ways at the Boston yard, but knowing also about this $148,000, which was to be used for barracks and officers' quarters at the Boston yard, which he concluded were not needed, he suggested that the money be used for these permanent structures, for these building ways or slips. The Secretary is to be commended for this effort at economy.

Mr. MURRAY of Massachusetts. And at the same time saving $148,000.

Mr. SAUNDERS. Let me say something about the suggestion——

Mr. BROWNING. Will the gentleman permit me to make a statement?

Mr. SAUNDERS. Yes.

Mr. BROWNING. I understand the Boston yard never submitted a bid, never made a bid, but they made an estimate of what they thought it would cost.

Mr. SAUNDERS. Yes.

Mr. BROWNING. The gentleman spoke about a bid being made at the Boston Navy Yard. It was an estimate.

Mr. SAUNDERS. Mr. Chairman, these gentlemen are endeavoring to show that an opportunity for economy is presented. They speak of the submission of bids. These yards did not bid at all. They furnished estimates, and if hereafter it is found that the estimate is a mistake, all that Congress can do is to foot the bill, and pay just as much more as may be necessary, as a result of the error into which we have fallen.

Mr. ROBERTS of Massachusetts. Will the gentleman yield?

Mr. SAUNDERS. Yes.

Mr. ROBERTS of Massachusetts. Is not that true of everything, with all navy yards in competitive bidding?

Mr. SAUNDERS. There is no competition here. Here is one yard that will be held to its bid, and on the other hand estimates submitted from a yard that is in nowise bound. Should we go into the history of this matter, it will be very clearly developed that in the opinion of the naval experts these ships can not be built within the estimates. If the estimates prove to be a mistake, no one can be held responsible. Yet our friends talk about saving money. Now, Mr. Chairman——

Mr. REED. Will the gentleman yield for a question?

Mr. SAUNDERS. Yes.

Mr. REED. I would like to ask if any other yards made estimates besides the Boston yard?

Mr. ROBERTS of Massachusetts. Oh, a half a dozen yards.

Mr. SAUNDERS. Yes.

Mr. REED. Can the gentleman inform the House what other yards there were that made estimates and how those estimates compared with the estimates made at the Boston yard?

Mr. SAUNDERS. I am informed that Mare Island made estimates.

Mr. JONES. Permit me to answer the gentleman.

Mr. SAUNDERS. Certainly.

Mr. JONES. I will give the gentleman the facts—Portsmouth, Charlestown, Norfolk, New York, and Mare Island——

Mr. PADGETT. And Puget Sound.

Mr. JONES. And Puget Sound.

Now, the New York yard and the Mare Island yard are yards that have had large experience in building vessels and are thoroughly equipped. Neither of these yards has ever had any experience, and the estimate of the New York yard that has just turned out the great superdreadnaught *New York* and built other great vessels and is thoroughly equipped was $530,000 higher than the estimate of this little yard in Boston that never has been building at all. And the Mare Island bid was two or three hundred thousand dollars higher.

Mr. REED. If that is the case, there is no apology offered that the Boston yard got the contract when they are two or three hundred thousand dollars lower than the other yards.

Mr. JONES. I will answer the gentleman and tell him that when these estimates came in the expert advisers of the Secretary of the Navy informed him that it was impossible for either the Philadelphia or the Boston yard to do the work for the amount estimated by those yards, respectively. The Secretary then asked for revised estimates, and when they came back they were something over $100,000 higher than they originally were, but still in the one case $266,000 and in the other $436,000 higher than those of the New York yard.

Mr. REED. Is it not a fact that the New York yard does not want this contract, but that they have all the business they can care for?

Mr. JONES. I think not. I think the gentleman will find before we get through with this bill that the friends of that yard are going to make an effort to get one of the big ships provided for.

Mr. ROBERTS of Massachusetts. The gentleman says that the difference between the Boston yard and the New York yard is about half a million dollars. I wish to say that the difference between the New York highest and the Boston lowest was, before the reduction of the figures, $331,000.

Mr. JONES. I was speaking of the Philadelphia yard. I have the exact figures here. The difference between the New York yard and the Boston yard, on the first estimate, was $383,000. After they had raised their figures there was a difference of $266,000. As to the Philadelphia yard, the difference was $545,161 before that yard raised its figures. After they were revised the difference was $436,000.

Mr. LOGUE. As between what, sir?

Mr. JONES. As between the Philadelphia yard and the New York yard.

Mr. LOGUE. That is on the transport?

Mr. JONES. That is on the transport.

Mr. LOGUE. Is the gentleman taking into consideration the availability of Philadelphia as a base of supplies?

Mr. JONES. I was just answering a question. When the merits of this proposition are discussed I shall be very glad to give the gentleman my views as to the relative cost of building ships in the New York and the Philadelphia Navy Yards.

Mr. VARE. You explained the difference between the New York and Boston yards, and will you kindly explain what the difference is as between the Norfolk Navy Yard and the Newport News yard, both in your vicinity?

Mr. JONES. The Norfolk yard and the Charleston yard——

Mr. VARE. Between the Norfolk yard and the Newport News yard.

Mr. JONES. I have not the figures before me. There is a blue print here that contains them all. If anyone wishes them, I will give those figures. I have compared these two inexperienced yards with two experienced yards that have built ships. I have shown that the two yards without experience claim to be able to build ships for much less than those that have had experience can build them.

Mr. REED. We do not consider that our yards east of Philadelphia are inexperienced.

Mr. JONES. Neither the Philadelphia nor the Boston yard has ever built a large ship, and therefore certainly has had no experience in building such ships.

Mr. MITCHELL. Were not the estimates in the Boston yard made by naval experts?

Mr. JONES. Yes; but they were repudiated by the naval experts, the highest naval authority, who are the constituted advisers of the Secretary of the Navy.

Mr. MITCHELL. But they were made by naval experts, were they not?

Mr. JONES. Yes; by men in the navy yard seeking to secure the work.

Mr. SAUNDERS. Mr. Chairman, I believe I have the floor.

Mr. MOORE. Mr. Chairman, will the gentleman from Virginia yield for a question?

Mr. SAUNDERS. Certainly.

Mr. MOORE. I asked him a while ago about the last naval act which gave the Secretary of the Navy direction to build these vessels in Government yards.

Mr. SAUNDERS. Yes.

Mr. MOORE. He seems to have had that direction by Congress.

Mr. SAUNDERS. Yes.

Mr. MOORE. Now, why should Congress give him direction to build a ship in a navy yard, leaving him discretion which he has exercised as to that selection and then deny him the tools with which to do the work?

Mr. SAUNDERS. It was presumed that when he made an investigation, and found that you were not equipped to build this ship, he would not provide for the construction at your yard.

Mr. MOORE. The gentleman knows there is not more than one yard along the Atlantic coast that is equipped to build a ship. I would like the gentleman to explain why it is that Congress should give the Secretary of the Navy the power to build a ship, with direction to build it in a navy yard, and then say to him that Congress has not the power to give him the facilities with which to build the vessel. Does the gentleman answer?

Mr. SAUNDERS. I will undertake to answer all of that in my time.

Mr. CURRY. There are two navy yards in the United States equipped to construct a dreadnaught, the one at New York and the other at Mare Island?

Mr. JONES. There is not any question about that.

Mr. SAUNDERS. Now, if there are no further questions, I wish to say that I arose, Mr. Chairman, to endeavor to make a legal argument on this point of order, and have gotten into a controversy about shipbuilding. I think it is very clear from what has been developed, that the suggested economic side of this proposition has no merit. It is proposed, so it is said, to save money by building at this particular yard. The amount that is expected to be saved is stated, but before building can even begin at this yard, we are called upon to provide an equipment, the cost of which must certainly be deducted from the proposed saving.

Then we go a step further——

Mr. MADDEN. And then you want to take into consideration the fact that the estimate of saving is simply hypothetical and does not amount to anything.

Mr. SAUNDERS. I was on the point of developing that thought. When it comes to the question of saving, there is no guaranty here, and there has been none given that any amount will be saved. The judgment of the naval experts is entirely against the contention that these yards can construct these ships within the estimates submitted.

Mr. VARE. The gentleman has stated that no bond has been given. I want to say that I have so much confidence in those who made the estimates for the League Island Navy Yard at Philadelphia that were it a matter of private business I would be willing to go on the bond to guarantee the faithful performance of the contract. The estimate of the League Island yard is $220,000 less than that of the Newport News Shipbuilding Co., and I say that were it a matter of private business I have such confidence in the correctness of the estimates that I would be willing to go on a bond.

Mr. SAUNDERS. No one has ever heard of a Government yard giving a bond to build a vessel within the limits of a particular estimate.

Mr. MURRAY of Massachusetts. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Massachusetts?

Mr. SAUNDERS. Yes; I yield.

Mr. MURRAY of Massachusetts. Has the gentleman heard of the proposition to put upon the record of a naval constructor that work estimated by him actually cost more than his estimates? And is it not a sufficient guaranty that these naval constructors are going to be careful in the estimates which they will submit?

Mr. SAUNDERS. Well, I might refer my friend to the fact that heretofore these estimates of officers have been exceeded, and as a result we have had to make many large appropriations on account of errors in estimates.

Mr. CALDER. Mr. Chairman, will the gentleman yield right there?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from New York?

Mr. SAUNDERS. Yes.

Mr. CALDER. I will say to the gentleman that the battleship *New York*, just gone into commission, cost $600,000 less than the original estimates.

Mr. MURRAY of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS. Yes.

Mr. MURRAY of Massachusetts. That is a navy yard that is building ships, and that estimate was made by an officer who is now assigned to Boston—Naval Constructor Baxter.

Mr. SAUNDERS. How does the gentleman propose to guarantee this saving? This vessel is to be built at a navy yard, and when errors are subsequently found, the United States simply steps in, and makes them good. These gentlemen have

no grounds upon which they can make good their claims that in the result any economy will be effected.

Mr. PADGETT. Mr. Chairman, the gentleman is mistaken. He must have misunderstood the statement that was made. This vessel, the *New York*, was built for $600,000 less than the original estimate of the Navy Department.

Mr. SAUNDERS. Now, Mr. Chairman, I have taken up the time unnecessarily of the House and of the Chair by yielding to a variety of questions which have been showered upon me. [Laughter.] I wish in this connection to sum up what I have said and point out that when on one side a proposition is made that a bond will be given and a guaranty afforded, and on the other side estimates on the part of the United States, with no one in a position to afford a guaranty that the building will be done within those estimates, there can be no question of comparison. No comparison can be made.

Mr. ROGERS. Mr. Chairman, will the gentleman yield there?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Massachusetts?

Mr. SAUNDERS. Yes; I will yield, although I said I would not yield.

Mr. ROGERS. Does not the gentleman think there is some assurance of accuracy when, at the request of the Secretary of the Navy, these estimates are sent back to some of the most expert officers in the United States Navy, and they are all gone over, and to make assurance doubly sure they are increased $117,000?

Mr. SAUNDERS. Does the gentleman know what the Secretary of the Navy said about coming within the limit of the estimates herein made?

Mr. MURRAY of Massachusetts. Yes; and I know what has been said by the gentleman himself with reference to the experts in the course of this debate.

Mr. SAUNDERS. I am merely referring you to the experts, as you are relying on them. You can not quote your experts against me.

Mr. KELLEY of Michigan. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. KELLEY of Michigan. I make the point of order, Mr. Chairman, that a discussion of the manner of making these estimates, or the manner in which the Secretary of the Navy has assigned these ships to the various navy yards, is not pertinent to the question now pending before the committee.

The CHAIRMAN. The Chair does not agree with the gentleman on that proposition. The law in the case says that the Secretary of the Navy shall build a battleship. It does not authorize the President of the United States to build it, as the gentleman from Massachusetts [Mr. MURRAY] has just recently stated. Is there any other law which provides otherwise?

Mr. MURRAY of Massachusetts. No; there is no law; but I think the language I used was in reference to an Executive order, and I supplemented that by using afterwards the word "President."

The CHAIRMAN. It has been repeatedly stated here that the President is authorized to build battleships. I have wondered if there was any other law on the subject.

Mr. SAUNDERS. That is the reason, Mr. Chairman, why I stated a moment ago that I did not agree to these statements. I am not informed as to them, and call for the proof.

Mr. JONES. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Virginia yield to his colleague?

Mr. SAUNDERS. Yes.

Mr. JONES. The gentleman from New York [Mr. CALDER] said a moment ago that the *New York*, which was just commissioned, was built for $600,000 less than the estimate.

Mr. CALDER. Yes; I said that.

The CHAIRMAN. The Chair will say to the gentleman that——

Mr. JONES. I just wanted to make a reply to that. I have a letter here from the Secretary of the Navy, dated April 18, in which he says that the cost of the *New York* was $6,956,442.55 up to the present time, and she is not completed now, and has never had a test, and that is several hundred thousand dollars more than the limit of cost, which, I believe, was $6,500,000.

Mr. CALDER. If the gentleman will pardon me, he must have misread the Secretary's statement. I have the same figures before me.

Mr. JONES. The gentleman can read them if he wants to.

Mr. CALDER. The statement here sets forth the fact that, including all indirect charges and clerk hire and salaries of classified employees, and everything, including armament, to complete the ship, $6,956,442.55 is the amount, and that is $600,000 less than the department's estimate.

Mr. JONES. I have a letter from the Secretary containing that statement, and I have given you the purport of the Secretary's letter. I wrote to him for the information.

Mr. PADGETT. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Tennessee?

Mr. SAUNDERS. Yes; I yield to the gentleman.

Mr. PADGETT. The Chairman of the Committee of the Whole House on the state of the Union asked a question a while ago, and I want to call attention to certain language in that connection.

The CHAIRMAN. The Chair has that language before him now.

Mr. PADGETT. The Chair will see that under the "Increase of the Navy" the language is, "For further increase of the Naval Establishment of the United States the President is hereby authorized to have constructed," and so forth, and proceeding down with various things——

The CHAIRMAN. From what act is the gentleman reading?

Mr. PADGETT. From the act of March 4, 1913, which the Chair has before him, under the heading "Increase of the Navy." You will see that the President is authorized to have the ships constructed, and then, further on, below, it is said the Secretary of the Navy shall do certain things, acting under the orders of the President.

Mr. SAUNDERS. Now, Mr. Chairman, I will continue my argument on the legal proposition. If the contention that was made in connection with the authorization, is well taken, it would irresistibly follow therefrom that the Secretary of the Navy, or the President of the United States, or whoever might be designated, could select any navy yard, however inadequate, and then the committee could thereupon proceed to establish there a vast plant without any further authority. Incidentally it could establish at the yard an armor factory for the purpose of armoring the vessels. Such action would be just as logical and just as much in contemplation of the law, as the view that these gentlemen have undertaken to present.

Mr. MURRAY of Massachusetts. Mr. Chairman, will the gentleman yield there for a correction?

Mr. SAUNDERS. Yes.

Mr. MURRAY of Massachusetts. Does not the authorization of the building of a supply ship expressly say "exclusive of armor and armament"?

Mr. SAUNDERS. There is nothing about a supply ship here.

Mr. MURRAY of Massachusetts. But there is in the act of March 4, 1913, about which we are talking.

Mr. SAUNDERS. We are talking about a permanent addition to the navy yard, to the plant at that yard.

Mr. MURRAY of Massachusetts. You are talking about armor plate. Is it not a fact that the act of March 4 says "exclusive of armor"? I say, does it not say that in express terms?

Mr. SAUNDERS. I do not know. If the gentleman has it there, I am perfectly willing to agree that it does.

Mr. MURRAY of Massachusetts. It does say so.

Mr. SAUNDERS. Very well, I will agree that it does. That does not alter the situation one particle; because, as I am seeking to point out, these gentlemen are contending that whenever it is provided that a ship may be built at a yard, authority is thereby lodged in the Naval Committee to establish in that yard any sort of incidental equipment that will forward the construction of that vessel. That is the contention that is made here. That is the fundamental contention of the gentlemen who maintain that this item is in order. The fact that no provision is made for armor on this particular ship, has nothing to do with the principle upon which they rely to support an appropriation for this slip.

The contention is that the authority to build carries with it the right to appropriate for such additions to the plant as they conceive may be necessary to enable that yard to build the ship in question.

Let us see how that will work out. Suppose that there was some little navy yard in the United States that had nothing in the way of a proper equipment, or proper plant, while there were two other navy yards that were adequately equipped. Suppose further that the President, or the Secretary, is given the right to have a ship built at some navy yard. Would anyone conceive that as a part of that authorization Congress contemplated that the Secretary should pass by the navy yards which required no additional plant, which were adequately equipped, which had everything necessary to enable him to carry out the authorization of Congress, and in the result select some inadequately equipped navy yard, with a consequent right on the part of the Naval Committee to appropriate for cranes, and slips, and foundries, and dry docks, or whatever else

it might be suggested was needed at that yard in connection with the construction of that vessel?

This is the great fundamental proposition here. I contend that giving the very fullest meaning reasonably to be given to that authorization, it did not mean that the Secretary, or the President could select some inadequately equipped yard, and as a result of that selection empower the Naval Committee to make appropriations for practically unlimited additions in the way of equipment at that yard, without original authority from Congress for such additions.

Mr. MURRAY of Massachusetts. Mr. Chairman, is it not a fact that there is only one such yard, and that is the yard in New York?

Mr. SAUNDERS. No; there are two such yards, as I understand, the Mare Island yard and the New York yard.

Mr. MURRAY of Massachusetts. Does not the language of the act of March 4 show that the construction of Congress was the one that the gentleman objects to?

Mr. SAUNDERS. I do not know.

Mr. MURRAY of Massachusetts. Does it not say "in such navy yards as he may designate"?

Mr. SAUNDERS. Yes; but I have tried to point out that it would be a most unwise, a most unnecessary and a most illogical view, having in mind the precedents of this House, to take the language used there as authorizing the Secretary of the Navy to pass by two efficiently equipped yards, calling for no additional plant, and select a yard without the necessary equipment, and then allow appropriations to be made for equipment, and allow thereby the possible establishment of the most extensive yard on the American continent, without any further authority of law. That result logically follows, if this authority is to be broadened to that extent.

Such a view is in conflict with our precedents, is opposed to the rights of the House, and to our just authority over appropriations. This view rests upon rulings that are exceptions, as I have endeavored to point out. There is no occasion to add to these exceptions, and thereby furnish a precedent that will give trouble hereafter.

Mr. O'SHAUNESSY. Will the gentleman yield for a question?

Mr. SAUNDERS. Yes.

Mr. O'SHAUNESSY. I want to ask the gentleman if his objection does not come too late? Should not his argument have been made last year?

Mr. SAUNDERS. Why?

Mr. O'SHAUNESSY. It says—

At such yard as the Secretary may designate.

That was the time for objection, when that language was under consideration.

Mr. SAUNDERS. It does not follow that because the Secretary has selected some particular yard, that the conclusion that the gentleman seeks to draw, should be drawn. I am arguing against the contention that when the authority to build at some yard was given it followed therefrom that the committee acquired the right to add to the plant at that yard without further authority from Congress. Having made his selection, the Secretary of the Navy should come to us and say, "I have selected the yard in which I wish to build this ship, and finding that it needs some additional equipment, I wish you to afford it." Why not? This would put the matter up to us, to provide the necessary equipment.

Mr. O'SHAUNESSY. Will the gentleman yield?

Mr. SAUNDERS. Yes.

Mr. O'SHAUNESSY. Was it not the understood and well-defined policy of the Secretary of the Navy to utilize the yards throughout the country?

Mr. SAUNDERS. I have undertaken to point out——

Mr. O'SHAUNESSY. I do not know whether he stated it through the medium of a report or through the press, but I understood that it was his policy to utilize the navy yards of the country and to have ships built there.

Mr. SAUNDERS. Granted that that is the policy of the Secretary of the Navy, the rulings empiatically hold that a policy of that sort can never be taken as furnishing authority to make appropriations for construction. The rulings are positive on that point.

Mr. O'SHAUNESSY. I want to ask the gentleman, Did he object last year to the language of the bill?

Mr. SAUNDERS. There was no occasion to object to it. Unless until this unreasonable interpretation was sought to be placed upon the language, why should I object? I am trying to put upon this language a reasonable interpretation which would not afford the Naval Committee an authority which is at variance with our precedents.

Mr. O'SHAUNESSY. Is it not a fact that many works of construction have been done at navy yards where it was not an economy to do it?

Mr. SAUNDERS. I do not know about that.

Mr. O'SHAUNESSY. That is the history of our policy——

Mr. SAUNDERS. I will grant it. I say I do not know anything about that.

Mr. O'SHAUNESSY. It is the history of our policy to do things in navy yards where they should not have been done. In fact, there are navy yards that ought not to exist.

Mr. SAUNDERS. What has that to do with parliamentary precedents, and the interpretation of parliamentary law? I do not know about this waste at these navy yards. In fact, it is a sort of treason now to suggest that there has been any waste, or extravagance in naval construction. I am afraid to suggest the thought that my friend is advancing that works of construction have not been economically done at some navy yards.

Mr. O'SHAUNESSY. Oh, no; do not be afraid to advance that thought. I am never afraid to criticise anybody. If you can point out any extravagance to me at any time, I will join you in criticizing it.

Mr. ROBERTS of Massachusetts rose.

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Massachusetts, or does he yield the floor?

Mr. SAUNDERS. Yes.

Mr. ROBERTS of Massachusetts. Does the gentleman yield the floor?

Mr. SAUNDERS. I yield to the gentleman from Massachusetts.

Mr. ROBERTS of Massachusetts. I do not want the gentleman to yield; I want to read some precedents.

Mr. SAUNDERS. Well, the gentleman can not read them in my time.

Mr. ROBERTS of Massachusetts. I understood the gentleman had yielded the floor.

The CHAIRMAN. The Chair asked the gentleman from Virginia if he would yield to the gentleman from Massachusetts, or if he yielded the floor, and the gentleman from Virginia said yes.

Mr. SAUNDERS. I understood that the gentleman from Massachusetts wanted me to yield for a question.

Mr. ROBERTS of Massachusetts. I do not want the gentleman from Virginia to yield for a question; I want to take the floor in my own right.

Mr. SAUNDERS. Mr. Chairman, I wish to call the attention of the Chair to some further precedents in support of the contentions that I have advanced. I wish to call the attention of the Chair to a ruling made in February, 1911, in the Sixty-first Congress, holding that a provision for a floating crane for the Boston Navy Yard, was out of order.

On May 25, 1912, second session Sixty-second Congress, page 7177 of the RECORD, quarters for officers and a naval prison at Portsmouth Navy Yard was held to be out of order. In that very connection it was urged that the navy yard being a public work, the buildings were not subject to a point of order.

On the same day, and for the same reason it was held that the Key West Naval Station could not be provided with officers' quarters.

I wish to call attention to the fact that although buildings had been provided at Annapolis and West Point, when the same sort of buildings were sought to be provided at navy yards, they were not held to be within the benefit of the decisions, as to West Point, and Annapolis.

February 25, 1913, about a year ago a provision for a structural steel storage plant for tools and materials at the navy yard, Puget Sound, was held to be out of order.

Now Mr. Chairman, these authorities are directly in point in connection with the contention that provision for equipment for a plant does not come within the exceptions as to Annapolis and West Point. The absolutely uniform current of decisions is to the effect that provisions for additional equipment and buildings at a navy yard are out of order. That is all there is to be said in this connection unless some authority for the addition to a navy yard is sought to be found in the provision for the construction of a ship at some navy yard.

On that point I have had something to say, and I will elaborate it a trifle more. We must eliminate from consideration all reference to ships, because this ship is not in process of construction. The plans for it are not completed. There is nothing before the House in relation to that ship. As presiding officer the Chair must deal with what is before this body, and when these statements are made with reference to a progress that is said to have taken place with respect to assembling materials, there is absolutely nothing in an official way before the House, of which the Chair can take cognizance. So far as that

goes, the gentlemen who have undertaken to keep themselves informed on that point deny that any such steps have been taken.

The burden is on the gentlemen who allege that this work is in progress, to show what has been done in the way of progress. I deny that this is a work of progress. I assert that even if the ship itself was in process of construction, such construction would not authorize additions to the navy yard to be considered as a part of the work in progress on the ship.

The gentleman from Rhode Island [Mr. O'SHAUNESSY] and some other gentlemen have talked about the policy of the Secretary of the Navy. The policy and decisions of this House are far more important, and more in point than the policy of the Secretary of the Navy. One has the force of law, and the other has no binding effect on this body whatever. Whatever may be the policy of the Secretary of the Navy, in selecting a navy yard not equipped to do the work in contemplation, it can not be held that such selection is binding on this House, or afford authority for appropriations that our precedents forbid. I have pointed out that the very moment that assent is given to the contention that because certain things may be needed in connection with such a policy, authority is thereby afforded to make appropriations to that end, we have cut loose from all the safeguards with which this House has heretofore undertaken to surround the action of the appropriating committees. There is nothing, therefore, in this contention of policy. It is a part of the permanent policy in this country to maintain a standing army. As a part of that policy we do not allow the recommendations of the Secretary of War, or of anyone else to afford authority for appropriations not otherwise authorized, to carry out some scheme, or policy in connection with the Army. The same principle applies to the Navy. Unless this item can be brought within the rulings that make the exceptions, it is out of order. The decisions cited clearly show that navy yards have been put on an entirely different footing from West Point, or Annapolis.

Mr. MOORE. Does the gentleman decline to consider the direction of Congress made to the Secretary in the act of 1913? The gentleman from Virginia uses the word "policy" all through.

Mr. SAUNDERS. I have undertaken to reply directly to that. I maintain that the authority to build a ship at a particular yard, does not carry with it the idea that you can make unlimited appropriations for additions to the permanent plant in that yard. If a yard is selected which is inadequate, which is not prepared to go forward with the work, Congress must be asked for authority to provide the necessary equipment.

Mr. MURRAY of Massachusetts. May I ask the gentleman whether or not in his opinion, independent of any ship, a point of order would lie against an appropriation of $148,000 in this bill for a building to be used in connection with the proper naval repair work at the navy yard in Boston?

Mr. SAUNDERS. Unquestionably, and it shows that I have read my authorities to but little purpose, when the gentleman from Massachusetts asks me that question. Instead of repeating my statement I will read the gentleman from the authorities. Here is a case where a point of order was made against a provision for a floating crane for the Boston Navy Yard.

Mr. MURRAY of Massachusetts. But that is not a building.

Mr. SAUNDERS. It seems to me the principle is the same. But here is a provision for officers' quarters at the naval station at Key West.

Mr. MURRAY of Massachusetts. Those are for marine officers, are they not?

Mr. SAUNDERS. Yes.

Mr. MURRAY of Massachusetts. What about naval officers' quarters at Key West? Was that in order? We had that fought out two years ago, and it was held in order.

Mr. SAUNDERS. Let me give the gentleman another authority. On February 13, a bill providing for a structural steel storage plant for tools and materials at Puget Sound was held out of order.

Here is another case in point. In 1907 a paragraph for officers' quarters at the New Orleans Navy Yard was held to be out of order. (Hinds, 3758.) A provision for a new foundry at the Washington Navy Yard was held to be out of order. (Hinds, 3761.)

Mr. MURRAY of Massachusetts. What is the citation of that?

Mr. SAUNDERS. RECORD 3956. Certainly there is an authority that is precisely in point.

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS. Yes.

Mr. GARRETT of Tennessee. I do not know to what extent it might be regarded in point by the gentlemen who are arguing this question, but I call the attention of the gentleman from Virginia to the fact that last year, if I am not mistaken, certainly in a very recent year, the Chairman of the Committee of the Whole House held out of order a proposition providing for the construction of a collier as a part of the Navy, the argument being made that of course a collier was essential to the maintenance of the Navy; and the Chairman, the gentleman from Missouri, Mr. ALEXANDER, sustained the point of order which was made to that.

Mr. SAUNDERS. Mr. Chairman, I will call the attention of the Chair, in connection with the precedent cited, to the fact that that is precisely in line with the distinction made in favor of battleship construction. In other words, the rulings have never extended that distinction, but on the contrary have kept it within its original narrow limits. The decision of Judge ALEXANDER is in exact conformity with the original ruling. Of course a collier, upon the theory that has been advanced this evening in respect to the building of these slips, is an inherent and necessary part of the Navy. Yet the presiding officers have never extended the rulings to provide for its construction.

With respect to the buildings, the gentleman from Massachusetts [Mr. MURRAY] seems to draw a distinction between a building for naval officers at naval stations, and other buildings. That does not help him. Officers and seamen, and battleships constitute a class apart. The buildings mentioned in the precedent cited were for the people who are the output of Annapolis, in other words for naval officers.

Mr. MURRAY of Massachusetts. Let us go a step further. The gentleman is familiar with the decisions, and he knows the decision of January 24, 1901, when it was proposed to appropriate for a certain building at the Naval Observatory.

Mr. SAUNDERS. Oh, I am familiar with that. I have that cited here.

Mr. MURRAY of Massachusetts. It was certainly held in order to appropriate for that.

Mr. SAUNDERS. The gentleman does not seem to realize that there are provisions for certain buildings which have been sustained, and which constitute an excepted class, but that it has been always held that these rulings do not apply to navy yards.

Mr. MURRAY of Massachusetts. Oh, that is not so.

Mr. SAUNDERS. It is so, because I have a number of precedents here which I have cited to the Chair.

Mr. MURRAY of Massachusetts. Most of them relating to dry docks and floating cranes.

Mr. SAUNDERS. Not at all. They do not all relate to dry docks and cranes. They relate to buildings, and foundries, to barracks, and prisons, and quarters, and storage houses. The administrative branches, the construction and repair establishments of the Navy Department, including the naval stations, the navy yards, the hospitals, magazines, and stationary dry docks, do not, ipso facto, constitute a public work or object in progress. Appropriations therefor must be previously authorized by law. If any more emphatic authority can be found, I would like to have it cited. From the time of that decision forward the later decisions have been distinctly accordant with the principles announced.

The CHAIRMAN. The Chair is ready to rule.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I would like to ask the Chair if he desires to have the precedents cited with regard to the reappropriation of money. The Chair expressed the desire for that earlier in the discussion.

The CHAIRMAN. The Chair is ready to rule upon all points.

The language of the bill to which the point of order has been made reads as follows:

That the unobligated balance under the appropriation, Marine Barracks, Boston, Mass., for the fiscal year ending June 30, 1914, not exceeding $148,000, is hereby made available for building slip and equipment.

The point of order is directed to the whole paragraph, and the Chair can not but think that this language is a repeal by implication of an authority to expend $148,000 for marine barracks before the time has expired within which the $148,000 could be spent. To take away the money with which the barracks could be constructed would make it impossible for the barracks to be constructed, and the Chair holds that it is a repeal by implication; and the point of order is therefore sustained.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I desire to offer an amendment to insert, at the beginning of page 22, in place of the language which is stricken out of the bill, the following:

That the unexpended balance under the appropriation "Marine Barracks, Boston, Mass.," for the fiscal year ending June 30, 1914, not exceeding $148,000, is hereby made available for building slip and equipments.

Mr. JONES. Mr. Chairman, I make the point of order against that.

The CHAIRMAN. The Chair does not see any material difference between that and the proposition he has just ruled out of order.

Mr. ROBERTS of Massachusetts. If the Chair will bear with me a moment, I would like very much, before the Chair rules, to point out certain decisions that seem to me to fully cover this question of an unexpended balance being appropriated.

The CHAIRMAN. The Chair is treating this as not being an unexpended balance.

Mr. JONES. Mr. Chairman, it has been admitted that not a dollar of it has been expended, and that this provision works a repeal.

The CHAIRMAN. And it is yet available. It is available until it is repealed, spent, or the time limit has expired.

Mr. SAUNDERS. It is another and different application of money set apart for another application and a change of law.

Mr. ROBERTS of Massachusetts. Now I would like to be heard on the merits of this proposition. I am not speaking to the point of order——

The CHAIRMAN. The Chair will hear the gentleman, although the Chair has decided——

Mr. ROBERTS of Massachusetts. I will call the attention of the Chair to the fact that nobody has raised the point of order against the motion.

Mr. JONES. Mr. Chairman, I made the point of order.

Mr. ROBERTS of Massachusetts. Mr. Chairman, it is too late.

Mr. JONES. But I made my point of order the second the gentleman finished.

Mr. ROBERTS of Massachusetts. Nobody on this side heard it.

Mr. STAFFORD. Mr. Chairman, I call attention to the fact that the amendment has not been reported.

Mr. SAUNDERS. The amendment has not been reported.

The CHAIRMAN. The Chair did not understand the point of order was finally disposed of.

Mr. MADDEN. Mr. Chairman, I make the point that the amendment has not been reported.

Mr. ROBERTS of Massachusetts. The amendment has not been reported.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

At the top of page 22, insert the following:

"That the unexpended balance of the appropriation, Marine Barracks, Boston, Mass., for the fiscal year ending June 30, 1914, not exceeding $148,000 is hereby made available for building slip and equipment."

Mr. JONES. Mr. Chairman, I again make the point of order against the amendment.

Mr. ROBERTS of Massachusetts. Now, Mr. Chairman, I would like to be heard, begging the indulgence of the Chair, for a few moments.

The CHAIRMAN. The Chair will say to the gentleman in advance of his argument that the Chair thinks the original draft is very much stronger from his side than the one which he now offers.

Mr. ROBERTS of Massachusetts. I realize that; but the amendment is made to conform to the language of precedents which I would like the Chair at least to hear before ruling.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. ROBERTS of Massachusetts. Volume 4, Hinds' Precedents, page 394, section 3591:

On February 12, 1897, the Post Office appropriation bill was under consideration in the Committee of the Whole House on the state of the Union, when this paragraph was read:

"The Postmaster General is authorized to apply to the payment of salaries of letter carriers for the fiscal year 1897 the sum of $23,000, being an unexpended balance of $13,500 of the appropriation for the current fiscal year for street letter boxes, posts, and pedestals, and unexpended balance of $9,500 of the appropriation for the current fiscal year for packing boxes."

Now, there was an instance where the unexpended balance for the current fiscal year, which had not been ascertained and nobody knew whether there would be an unexpended balance or not, was reappropriated to pay salaries.

The CHAIRMAN. What was the original appropriation for?

Mr. ROBERTS of Massachusetts. The original appropriation was part of it for street letter boxes, posts, and pedestals, and the other part for packing boxes, and the unexpended balance of those two items was combined and made available during that fiscal year for the payment of salaries of letter carriers, an entirely different proposition. Mr. Miller, of Kansas, having made the point of order, the Chairman ruled:

The Chair is of opinion that this is simply in the nature of an additional appropriation for letter carriers. There can be no question as to the authority of the Committee on the Post Office and Post Roads to report an appropriation giving an additional amount to letter carriers. The provision in the bill has simply the effect of a new appropriation—

And that is what I want to emphasize—

Has simply the effect of a new appropriation.

The CHAIRMAN. Does the gentleman insist that this $148,000 is an additional appropriation for the slip provided for in the same bill?

Mr. ROBERTS of Massachusetts. It will be a new appropriation for the slip.

The CHAIRMAN. And consequently not an additional appropriation?

Mr. ROBERTS of Massachusetts. It is not an additional appropriation; it is a new appropriation of money appropriated for another purpose. That is what was done in the case I am citing. The money was appropriated to buy street letter boxes, posts, and pedestals, and another part of it appropriated for packing boxes—two entirely different propositions—and the unexpended balance of that fiscal year in the bill was diverted to be used as additional compensation to letter carriers, in addition to the compensation they were already getting.

This appropriation is applied to an object already provided for by law—the payment of letter carriers.

Nobody questions but what the payment of letter carriers was carried by law, and therefore you could reappropriate this unexpended balance for any purpose authorized by law. The Chair said:

The Chair overrules the point of order on the ground the provision is simply an application of a previous unexpended appropriation to a purpose contemplated by law.

Now, that is the point of this whole thing. It is to divert—a repeal, if you will it, of a prior law diverting that money to another lawful purpose; and providing the purpose for which it is diverted is lawful, it is within the power of the Committee of the Whole House to make those changes. Now, again, on January 29, 1898, the District of Columbia appropriation bill was under consideration, and this paragraph was reached——

The CHAIRMAN. Before the gentleman gets on that subject, the question arises whether or not the building of a slip and equipment here is authorized by law.

Mr. ROBERTS of Massachusetts. Well, that is a separate question.

The CHAIRMAN. The gentleman raised it.

Mr. ROBERTS of Massachusetts. I do not understand.

The CHAIRMAN. The gentleman raised the question here.

Mr. ROBERTS of Massachusetts. Oh, certainly; and if there is any question about it, I will be glad to argue that. The whole argument has been going on whether or not that slip was a work in progress and authorized by law.

The CHAIRMAN. The Chair wishes the gentleman was confined to that.

Mr. ROBERTS of Massachusetts. That was the main part. Of course, it went into the merits of shipbuilding, and so on.

And, further:

On January 29, 1898, the District of Columbia appropriation bill being under consideration, this paragraph was read:

"Bathing beach: For the care and repair of the public bathing beach on the Potomac River, in the District of Columbia, $1,000. That any balance remaining of the appropriation 'toward adapting the inner basin on the Potomac Flat for a public bathing pool,' contained in 'An act making appropriations to provide for the expense of the government of the District of Columbia for the fiscal year ending June 30, 1887, and for other purposes,' approved June 11, 1896, which remains unexpended, may be applied by the Commissioners of said District for the examination, improvement, repair, and care of the public bathing beach on the Tidal Reservoir."

There is where money was appropriated for one purpose, namely, for repair and care of the pool, and diverted to the bathing beach.

Mr. James D. Richardson, of Tennessee, reserved a point of order.

After debate, during which it was developed that the bathing beach had already been appropriated for, and therefore was a public work or object in progress, the Chairman ruled:

"The Chair finds this precedent established on the 12th of February last: In the Post Office bill was a paragraph devoting an unexpended balance for street letter boxes, etc., to the payment of salaries of letter carriers. A point of order being made, the Chairman ruled that inasmuch as the carriers were authorized by law, the appropriation might be made. Regarding that as a precedent, it would be decisive of this case. So the point of order will be overruled."

That is, you could reappropriate the unexpended balance of another fund.

On February 14, 1907, the naval appropriation bill was under consideration in the Committee of the Whole House on the state of the Union, when the Clerk read as follows:

"*And provided further*, That the unexpended balance under appropriations 'Provisions, Navy, for the fiscal years ending June 30, 1906 and 1906,' are hereby reappropriated for 'Provisions, Navy, for fiscal year ending June 30, 1908.'"

Mr. JOHN J. FITZGERALD, of New York, made a point of order.

After debate, the Chairman held:

"It seems to the Chair that these two decisions precisely cover the questions presented. Money has been appropriated for an object authorized by law and is now reappropriated for a similar object."

That seems to be the criterion, whether the money first authorized to be appropriated was authorized by law, and, second, whether the purpose to which you are diverting it here is authorized by law. If both are authorized by law, it is within the province of the committee to reappropriate this unexpended balance. I will quote further:

That is a decision made by predecessors in the chair, and it has been held not to be a change of law and a thing that could properly be done upon an appropriation bill, and the Chair therefore overrules the point of order.

Now, here is what seems to me even a still stronger case:

The reappropriation of a sum required by law to be covered into the Treasury was held not to be a change of law. On January 12, 1899, the consular and diplomatic appropriation bill was under consideration in the Committee of the Whole House on the state of the Union. The following paragraph was read:

"Commercial Bureau of American Republics, $36,000: *Provided*, That any moneys received from the other American Republics for the support of the bureau, or from the sale of the bureau publications, from rents, or other sources, shall be paid into the Treasury as a credit in addition to the appropriation, and may be withdrawn therefrom upon requisitions of the Secretary of State for the purpose of meeting the expenses of the bureau."

Mr. Alexander M. Dockery, of Missouri, made the point of order that the proviso would involve a change of existing law, since the law of the first session of the Fifty-second Congress provided as follows:

"Commercial Bureau of the American Republics, for the prompt collection and distribution of commercial information, as recommended by the International American Conference, $30,000. The sums contributed by the other American Republics for this purpose when collected shall be covered into the Treasury."

You will note the difference. The law as it stood simply required the amount to be covered into the Treasury, while the amendment, the paragraph under consideration, to which the point of order was raised, provided that when covered into the Treasury they should become a credit fund, diverting the intention entirely for which they went into the Treasury.

And again, in section 3594:

A provision returning an unexpended balance to the Treasury shall be held in order on an appropriation bill. On February 17, 1905, the naval appropriation bill was under consideration in Committee of the Whole House on the state of the Union, when Mr. John F. Rixey, of Virginia, offered this amendment:

After line 20, page 33, insert:

"Naval station, Guantanamo, Cuba: The unexpended balance on July 1, 1905, of the $200,000 heretofore appropriated for a dry dock is hereby directed to be covered into the Treasury."

A point of order was made. The Chairman ruled:

It does not seem to the Chair that the provision in the last appropriation bill upon this subject is existing law in the sense that the amendment would come within the provision of Rule XXI. The Chair can see no reason why an unexpended balance can not be reappropriated, as, in point of fact, is proposed in this case. Instead of appropriating the money to the dock at Guantanamo it is proposed to cover it into the Treasury of the United States. If it is competent to divert an appropriation already made for one purpose to another purpose, it is equally competent to divert an appropriation made for a certain purpose back into the United States Treasury. The Chair therefore overrules the point of order. The question is on agreeing to the amendment offered by the gentleman from Virginia.

Now, Mr. Chairman, there is a line of decisions that are uniform and all to the point—that an unexpended balance may be reappropriated if the purpose to which it is to be applied by reappropriation is itself lawful. If the Chair follows me in that and agrees with me, it would bring us down to this question: Is the purpose to which we are appropriating this money a lawful purpose? And if the Chair agrees, I would like to argue that point. If the Chair is prepared to rule without going further into the question as to whether or not the purpose for which these moneys should be appropriated is lawful, then it would be idle to argue further.

The CHAIRMAN. The Chair is ready to rule, and feels that practically every phase of the question has been discussed.

Mr. SAUNDERS. I would like to call the attention of the Chair to one authority in response to those quoted by the gentleman.

The CHAIRMAN. The Chair is ready to rule. I will say to the gentleman from Massachusetts that a few moments ago we saw the gentleman from Massachusetts [Mr. MURRAY] and the gentleman from Virginia [Mr. SAUNDERS], two very able gentlemen, each in opposition to the other, relying upon the same precedent in support of his position.

The Chair and the gentleman from Massachusetts [Mr. ROBERTS] are now practically in that position; and, after the citation of the authorities by the gentleman from Massachusetts, the Chair sustains the point of order.

Mr. MURRAY of Massachusetts. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Massachusetts [Mr. MURRAY].

The Clerk read as follows:

Page 22, insert a new paragraph, as follows——

Mr. MURRAY of Massachusetts. Page 22, line 1, it is intended to be.

The CHAIRMAN. Line 1 is stricken out.

Mr. MURRAY of Massachusetts. This is a substitute for what has been stricken out. It is at the top of the page.

The Clerk read as follows:

Page 22, in lieu of the matter stricken out on the point of order, insert the following as a new paragraph:

"Navy yard, Boston, Mass.: That to carry out the purpose of so much of the act of March 4, 1913, as authorizes the President to have constructed one supply ship, to cost, exclusive of armor and armament, not to exceed $1,425,000, there is hereby made available for improvement of building facilities and equipment, $148,000."

Mr. JONES. Mr. Chairman, I make a point of order against that amendment.

The CHAIRMAN. The gentleman from Virginia [Mr. JONES] makes a point of order to the amendment.

Mr. MURRAY of Massachusetts. Mr. Chairman, may I modify my amendment? I ask unanimous consent to modify it, so as to make it read "is hereby appropriated" instead of "made available."

The CHAIRMAN. Without objection, the modification will be made.

Mr. JONES. Mr. Chairman, I make a point of order to the amended amendment.

The CHAIRMAN. The gentleman from Virginia [Mr. JONES] makes a point of order to the amendment as modified.

Mr. JONES. If the Chair is in doubt about the matter, I would like to be heard.

The CHAIRMAN. The Chair is ready to rule. The Chair is of the opinion that this amendment is subject to a point of order, for the reason that the latter part of it reads as follows: "For improvement of building facilities and equipment." That is so very broad that it authorizes almost anything, and the point of order is sustained.

Mr. MURRAY of Massachusetts. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Massachusetts [Mr. MURRAY].

The Clerk read as follows:

In lieu of the matter stricken out on the point of order, at the top of page 22, insert the following as a new paragraph:

"Navy yard, Boston, Mass.: That to carry out the purpose of so much of the act of March 4, 1913, as authorizes the President to have constructed one supply ship, to cost, exclusive of armor and armament, not to exceed $1,425,000, there is hereby appropriated for building slip and equipment $148,000."

Mr. JONES. Mr. Chairman, I make the point of order as to that, and if the Chair has any doubt about it I would like to be heard for a moment.

The CHAIRMAN. The Chair is ready to rule. The Chair is of the opinion that the amendment is still subject to a point of order, for the reason that it is for the building of a slip, and, maybe, not in continuation of work already commenced.

Mr. JONES. That is the point.

Mr. PADGETT. Mr. Chairman, I want to offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Tennessee [Mr. PADGETT].

The Clerk read as follows:

Insert, at the top of page 22, before the words "Navy yard, New York," as a new paragraph, the following:

"Navy yard, Boston, Mass.: Building slips and equipment to enable the Secretary of the Navy to have constructed the supply ship designated to be constructed at navy yard, Boston, Mass., $148,000."

Mr. JONES. Now, Mr. Chairman, I make a point of order against that. Exactly the point stated by the Chair is what I desire to present. It is not authorized by law, and it is not to continue any work in progress.

The CHAIRMAN. The Chair would like to ask the gentleman from Massachusetts [Mr. MURRAY] a question. In getting back to the amendment to which the point of order was just sustained, just what is meant by the two words "building slip"? Is "building slip" a compound word?

Mr. MURRAY of Massachusetts. Yes; it is a hyphenated word, but I followed the language of the bill. "Building slip" does not mean building a slip.

The CHAIRMAN. The Chair was under the impression that it did. The language of the pending bill does not use a hyphen.

Mr. MURRAY of Massachusetts. I know; but it should, and I would have put it in, except that I wanted to follow the language of the committee's report.

The CHAIRMAN. The Chair is not familiar with these technical terms. A building-slip is one thing, and the building of a slip is another thing.

Mr. MADDEN. This is to build ways.

Mr. PADGETT. The amendment I have offered obviates all that and makes it clear.

The CHAIRMAN. The amendment offered by the gentleman from Tennessee [Mr. PADGETT] reads to the Chair as meaning the building of a slip, and therefore not in continuation of an existing work.

Mr. PADGETT. I ask unanimous consent to insert a hyphen between the word "building" and the word "slip." That is what it is—a building-slip.

Mr. MOORE. May I call attention to the language used in line 15, page 22—

Building slips and equipment.

That is the language of the Secretary of the Navy, as I understand it. I think you will find the term technically stated there.

The CHAIRMAN. We have not yet reached line 15, page 22.

Mr. MOORE. I know; but that is the technical language of the Secretary of the Navy.

Mr. BRYAN. The word "building" is not a verb at all.

The CHAIRMAN. The Chair has been construing it as a verb. He is not familiar with these technical terms.

Mr. BRYAN. It is an adjective, like sounding board, talking man, or jumping horse. It is not a verb authorizing the building of anything. It refers to a noun. It is a structure on which a ship is to be built.

The CHAIRMAN. The Chair thinks it can be called either, because of the lack of one or two explanatory words that might have been used.

Mr. BRYAN. It means building-ways.

Mr. MOORE. It might have been called building-ways, but the technical term is—

Building slips and equipment.

Mr. MAPES. Mr. Chairman, the Standard Dictionary defines a building-slip as—

A raised and inclined way for a ship while being built.

The CHAIRMAN. The Chair will ask the gentleman if in the dictionary it is a hyphenated word?

Mr. MAPES. It is.

The CHAIRMAN. In the bill it is not.

Mr. MAPES. The word "building" is used as an adjective, and there is enumerated among the different compounds building-block, building-slip, and so forth.

The CHAIRMAN. The trouble with the gentleman's amendment is that he uses it in the plural——

Building slips.

Mr. PADGETT. I will ask unanimous consent to change it to read—

A building slip.

Mr. MADDEN. If it is left to read that way, it will simply mean one set of timbers.

Mr. PADGETT. That will be the slip on which it rests.

Mr. MADDEN. You have got to have more than one slip if you are going to build a ship. You can not launch it if you do not have more than one.

Mr. PADGETT. A building-slip is simply——

Mr. JONES. A building-way.

Mr. PADGETT. A building-way.

Mr. SAUNDERS. If the gentleman from Tennessee has finished——

The CHAIRMAN. The Chair is of the opinion that the trouble grows out of too much economy of words. If a few more descriptive words had been used in the bill, all this trouble might have been obviated. In other words, the Chair feels compelled, under existing circumstances, to indicate just the direction in which his mind is running. It is this: If an amendment is offered to improve a "building-slip" that exists in the Boston Navy Yard, the Chair will hold it in order, but until that is done the Chair will rule against it.

Mr. SAUNDERS. Just in that connection, I wanted to point out that it did not make any difference whether the word is hyphenated or not, because what they have in mind is to build a "building-slip."

Mr. MURRAY of Massachusetts. That is not true. We built a ship there as late as 1904. I do not want this to go off on a hyphen. We built the *Cumberland* there as recently as 1904. We have some facilities there for shipbuilding.

The CHAIRMAN. The Chair has indicated pretty clearly what he will hold.

Mr. MURRAY of Massachusetts. I ask unanimous consent to offer a substitute for the pending amendment.

The CHAIRMAN. The Chair sustains the point of order as to the amendment offered by the gentleman from Tennessee.

Mr. MURRAY of Massachusetts. I offer an amendment.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

In lieu of the matter stricken out on the point of order at the top of page 22 insert a new paragraph, as follows:

"Navy yard, Boston, Mass.: That to carry out the purpose of so much of the act of March 4, 1913, as authorizes the President to have constructed one supply ship to cost, exclusive of armor and armament, not to exceed $1,425,000, there is hereby appropriated for the improvement of building slips and equipment $148,000."

Mr. JONES. Mr. Chairman, I make a point of order against this amendment, and I wish to be heard upon it. I do not profess to be a parliamentarian, and I have therefore thus far left the discussion of these parliamentary questions to others. When I raised the point of order against the paragraph as it originally stood I did not specifically make the point on which the Chairman ruled that paragraph out of order. I believed then, and I believe now, that this appropriation is not authorized by law. I think this much will be admitted. Nobody has undertaken to point out any law which authorizes it. It is not, in my judgment, a continuation of a public work now in progress.

The gentleman from Massachusetts by his amendment ingeniously seeks to connect the building of the supply ship authorized a year ago with the equipment of the navy yard at Boston simply because it is to be built there. They are two separate and distinct subjects, and in ruling upon this amendment, in my judgment, the Chair can not take into consideration the language of the statute passed more than a year ago authorizing the building of a number of ships, including the supply ship which gentlemen now wish to have built at Boston.

The Secretary of the Navy could as well have authorized the building of half a dozen ships at the Boston Navy Yard under the authority given him in that statute as to have authorized the building of one. If he had authorized the building of half a dozen, then this amendment would, I imagine, have been for six times this amount.

The CHAIRMAN. One ship provided for in the act must be built at a Government yard. The other ships may be built in a Government yard if the Secretary believes that there is some trust or combination.

Mr. JONES. If the Chair puts that construction on the language of the statute, then the Secretary can not build either of these ships at Boston, because the Secretary has never believed for a moment that there was any combination between the private shipbuilding yards.

The CHAIRMAN. The Chair does not think that that is a material point here.

Mr. JONES. No; but the point I make is this: That the Secretary might as well under that authority have directed that both the supply ship and the transport be built either at Boston or at Philadelphia as to have directed that one be built at Boston and the other at Philadelphia. The law gave him authority to have both built at either one of the yards.

The gentleman from Massachusetts [Mr. MURRAY] takes rather a different view of the subject to-day from what he did in his speech a few days ago when general debate was in progress. Then he did not confine himself to stating that this slip was necessary in order to carry out the provisions of the statute which directed the Secretary—or, rather, permitted the Secretary—to have the supply ship built at the Boston yard. On the contrary, he took the broad ground that it was the purpose and object of the Secretary, independent of the building of the supply ship, to equip that yard for the purpose of building such ships as may hereafter be authorized.

Mr. MURRAY of Massachusetts. Does not the gentleman think that there is a wide difference between the broad and general latitude in general debate and the attempt to meet objections on points of order?

Mr. JONES. The gentleman can reply to me when I get through.

Mr. MURRAY of Massachusetts. I am asking the gentleman a question.

Mr. JONES. I will answer it. Mr. Chairman, when general debate was in progress upon this bill I undertook to demonstrate that the Secretary acted unadvisedly and unwisely in ordering the supply ship to be built at the Boston yard and the transport to be built at Philadelphia. I undertook to show that it would cost the Government perhaps a million dollars more to build these ships at these two yards than it would at a private yard. The gentleman from Massachusetts [Mr. MURRAY] replied to my speech, mentioned me more than once by name, and in the course of his remarks used the words which I will read:

Mr. Chairman, let me briefly say we had Moody, of Massachusetts, in the Navy Department, we had Meyer, of Massachusetts, in the Navy Department, and neither one of them would recommend the equipment of the Charlestown, Mass., yard for shipbuilding purposes. But when

we had a southern gentleman, Josephus Daniels, in that department, the recommendation was made and is now reported to this Committee of the Whole House on the state of the Union by the Naval Affairs Committee, and I hope it will soon be enacted into law.

These words, although uttered in general debate, were used in connection with this paragraph and were in reply to my criticisms. The statement of the gentleman was that although they had had in the Navy Department Moody, who was a citizen of Massachusetts, and Meyer, who was also a citizen of Massachusetts, both of those gentlemen had refused to recommend the equipment of this yard for shipbuilding purposes. Now, when Moody and Meyer were Secretaries of the Navy this supply ship had never been thought of, for it was only authorized a year ago.

The CHAIRMAN. That does not relieve the Chair in deciding this matter.

Mr. MURRAY of Massachusetts. Mr. Chairman, lest the RECORD may read incorrectly, does not the gentleman from Virginia know that I was at that time directing my remarks to the report of the committee and the language as it was before it went out on a point of order? Does not the gentleman mean to be fair?

Mr. JONES. Of course I do, and this amendment in effect is exactly what that provision was, except, Mr. Chairman, this is an effort to take out of the Treasury $148,000, leaving to be expended for other purposes at Boston the $148,000 which the Secretary of the Navy says ought never to have been appropriated at all. It just doubles the amount appropriated for the Boston yard, and will cause to be expended there not only the money asked for by the Secretary of the Navy to equip the Boston yard for shipbuilding purposes but an equal amount, namely, $148,000, which the Secretary tells us ought not to be expended.

This is the only real difference between the paragraph ruled out and this amendment. The point I am trying to make is this, that the object of this amendment, as was that of the paragraph, is not so much to carry out the purpose of the Secretary of the Navy to build this supply ship at the navy yard in Boston as it is to equip that navy yard for shipbuilding purposes generally. I desire to make it clear that the work in progress which this appropriation is to continue is not the building of a ship. I wish to distinguish between the ship and the navy yard. It was said by the gentleman from Pennsylvania [Mr. MOORE] that a collier was essential to a navy, but a collier is not essential to a navy yard, is it?

The CHAIRMAN. But is not a navy yard essential to the building of any ship?

Mr. JONES. A navy yard is essential to the building of a ship, and therefore I take the ground that the navy yard should be authorized by law before it is provided that a ship be built in it; that the cart should not be put before the horse. There are two navy yards in the United States which are fully equipped to build these ships, or even larger ones. The Mare Island Navy Yard has just completed two great ships—the *Prometheus* and the *Jupiter*—of precisely the same type as this ship, and it is now building two other ships; and the Brooklyn Navy Yard, as everybody knows, has built great dreadnaughts. The gentleman, in his speech before this House, congratulated Secretary Daniels and complimented him to the skies because he, "a southern gentleman"—and he used in this connection the phrase "the South being in the saddle"—had ordered the supply ship to be constructed at Boston, thus, in an indirect way, transforming that yard from one where repairs are made to one equipped for shipbuilding.

Mr. MURRAY of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. JONES. Not now. Mr. Chairman, the work in progress, to which the rule refers, is the building slip. If there was a building slip in course of construction at the Boston Navy Yard, it would be perfectly proper, upon this bill, to appropriate money to continue the work upon that slip; but a building slip and a ship are two very different things. It is not the ship that is the work in progress referred to in the rule; it is the yard. But even if it were the ship to which the rule is to be made applicable, there is no work in progress upon it, and there never has been any. The drawings for the ship have never even been made.

Therefore, this is a bald effort to secure an appropriation to equip the navy yard at Boston for the building of ships, and it is put upon the ground that this is a continuation of some existing work, some work in progress. It is not. It is true that prior to the Civil War some small wooden ships were constructed there. It is true that 10 years ago the *Cumberland*, a wooden training ship of 1,800 tons, was constructed there.

Mr. MURRAY of Massachusetts. Did they not have to have slips?

Mr. JONES. But this is a great ship of 8,500 tons, a steel ship; and in order to build it at Boston a building way must first be provided. It is true that there is an old building way at Boston, but a practically new one must be built to accommodate this great supply ship. The object of this amendment is not to repair this old and wholly inadequate building slip, but, on the contrary, to provide for a new and modern building way sufficiently large to accommodate large ships of war.

It seems to me that this is the question which is presented for the determination of the Chair: Is this appropriation asked to complete a building way now in process of construction—to continue some work now in progress—or is it to build what will be and what is intended to be practically a large and expensive new building way?

It is true that new buildings at West Point and Annapolis have been held in order. They were held in order upon the theory that their construction was an incident to the maintenance of the academy itself, the main object contemplated being already in progress. The Boston yard was not designed to build large ships, and no building ways for such ships were ever constructed. It is now for the first time proposed to equip this yard to build large ships, and therefore the building of this proposed building way was never so much as contemplated, much less in progress.

My colleague, Judge SAUNDERS, has cited a great many rulings to show that dry docks for navy yards have uniformly been held out of order, and I need not again refer to them. It seems to me, therefore, that this amendment must, under the rules of this House, be out of order.

Mr. SAUNDERS. Mr. Chairman, I do not desire to repeat the arguments I have made heretofore in this connection, but I do wish to call the attention of the Chair to the language of this amendment, having in mind that a point of order has been made to it. This puts upon the party who offers the amendment the burden of showing that he comes within the benefit of some existing authority. The mere use of language for the improvement of a slip, a building slip, or whatever it may be called, does not thereby make that language in order as against the point of order. When the amendment is challenged by the point of order, the burden is put upon the gentleman offering the same to show that there is an existing work in progress which will be continued by virtue of this appropriation.

Mr. MURRAY of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS. Yes.

Mr. MURRAY of Massachusetts. Does the gentleman differ from his colleague in the statement that the *Cumberland* was recently constructed there, a matter of 10 years ago, and that in the construction of the *Cumberland* it was necessary to have slips and building ways?

Mr. SAUNDERS. Why, no. I am using that very statement against the gentleman. The slip for the *Cumberland* is a completed project.

Mr. MURRAY of Massachusetts. Of course we had to have some facilities in order to build the *Cumberland*. Now we are asking to improve those facilities.

Mr. SAUNDERS. I desire to call the attention of the Chair to the statement of the gentleman from Massachusetts. He says that there is no work there which is in progress. It never has been held that because there is some existing work which has served a completed purpose at a navy yard, you can therefore appropriate to erect another building for a larger or different purpose. It appears that some years ago a small ship was built at this yard which required for its specific construction a slip, or way. This slip was built, and the ship was completed. The slip has served its purpose. It is functus officio, so to say. Hence there is no slip building in progress at that yard. The decisions expressly say that the words "work in progress" do not apply to a completed thing. If they were building slips at this yard, under appropriations for slip-building purposes, I freely admit that an appropriation for an extension of slips authorized as a general proposition, would be entirely in order. But all the gentleman from Massachusetts can say is that in connection with the building of another ship, a slip that was sufficient for that ship, was constructed. The end of that construction having been attained, there is no work in progress in that navy yard in the way of slip building. This provides for an entirely different improvement in that navy yard, for the construction of another and distinct ship, and the gentleman can not by the use of the words "for the improvement of," make this amendment in order. He is required to show that there is in progress at that navy yard a process of slip con-

struction, and that this appropriation will carry forward that construction in the way of enlargement, not that it will be used to build another and entirely different slip.

The CHAIRMAN. Does the gentleman contend, since he has just mentioned a house, that the point of order would lie to an item in an appropriation bill making an addition to a house?

Mr. SAUNDERS. If it were a completed house authorized for a specific purpose, and the limit of cost had been put on it, a new and distinct house could not be built upon the theory that a work is in progress. I understand as a matter of fact that the slip used for the *Cumberland* can not be used for the new ship. The utility of the old slip was terminated, when the *Cumberland* was finished. Some one suggests that this slip may be partially rotted, or in part removed. There is no evidence to show that the new slip will be an extension and enlargement of the old one.

Mr. ROBERTS of Massachusetts. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Massachusetts?

Mr. ROBERTS of Massachusetts. I thought the gentleman had finished.

Mr. SAUNDERS. No, but I have nearly finished. It is suggested to me that no part of the slip for the *Cumberland* could be used for the slip for the new ship. If that is a fact——

Mr. JONES. That is absolutely true.

Mr. SAUNDERS. Then the construction of a new way or slip could not possibly be regarded as an extension of the old way that was built for the construction of the ship *Cumberland*.

Mr. ROBERTS of Massachusetts. Mr. Chairman, if the gentleman has finished, I ask unanimous consent that the amendment be again reported.

The CHAIRMAN. The Clerk will again report the amendment.

The amendment was again reported.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I would like to state from personal knowledge that there is at present a building slip in the Boston Navy Yard, and since I have been a Member of this body I have seen a ship built and launched in that building slip. The gentleman from Virginia suggests that it may have rotted down or it may have disappeared.

Mr. JONES. May I ask the gentleman if that ship was not an 1,800-ton ship?

Mr. ROBERTS of Massachusetts. It was a steel ship, a training ship built for the Naval Academy, a steel built ship.

Mr. JONES. A training ship?

Mr. ROBERTS of Massachusetts. It does not make any difference whether it was a training ship, but it was a ship built in that slip at the Boston Navy Yard. That is the point at issue.

Mr. JONES. They might have built a canoe there, too.

Mr. ROBERTS of Massachusetts. My colleague offers an amendment here for the improvement of that existing slip. I submit, Mr. Chairman, that if there is anything clear in parliamentary law, under all the precedents cited by all the gentlemen from Virginia in opposition to this proposition, it is clearly in order that you may extend an existing work.

Mr. JONES. May I ask the gentleman a question?

Mr. ROBERTS of Massachusetts. Certainly; although the gentleman would not yield to me when he had the floor.

Mr. JONES. If it were admitted there was a slip there large enough——

Mr. ROBERTS of Massachusetts. Does the gentleman deny there is a slip there?

Mr. JONES. No.

Mr. ROBERTS of Massachusetts. Then that is sufficient for that part of it.

Mr. JONES. If I admit there is a slip there large enough to build a yawl boat, would the gentleman contend that would be sufficient to authorize this appropriation to make it large enough to build a great battleship?

Mr. ROBERTS of Massachusetts. Most decidedly; yes. If there is a building that is in use, or may be put to use, it is within the province of this Congress to enlarge that building to any extent. There is no getting away from that proposition.

Mr. GARRETT of Tennessee. On an appropriation bill?

Mr. ROBERTS of Massachusetts. On an appropriation bill. The building being there, you can go to any length in the extension of it. The principle of the thing is what we are arguing, and not the merits of the question. Now, the slip in the Boston yard that the gentleman speaks of so slightingly, I will say for his benefit, was stone paved with great granite blocks. They are there for all time, and it takes only a comparatively small amount of money to make the slip available for building a ship of the largest size, as shown by the small amount of money that is asked in this bill for the purpose.

I want to call attention to the fact that when the Brooklyn yard was equipped with a slip and ways we appropriated $175,000. Why? Because they had nothing there whatever. They had no slips which they could improve, which they could extend, or which they could build on.

Mr. JONES. How was that appropriation made?

Mr. ROBERTS of Massachusetts. That was made by an amendment to the appropriation bill, which I offered. A point of order was raised, the point of order was sustained, and an appeal was taken from the decision of the Chair, and we got the highest parliamentary authority, the decision of the full committee, that it was in order.

Mr. JONES. The gentleman had friends enough to overrule the decision of the Chair.

Mr. ROBERTS of Massachusetts. Does the gentleman question the intelligence of the full committee? He was a member of it at that time.

Mr. JONES. I very much question it.

Mr. ROBERTS of Massachusetts. I have nothing further to say than the fact that there is an existing building slip, and that the motion of my colleague from Massachusetts is to improve something already in existence in that yard, and is clearly in order by all the precedents cited by the gentleman from Virginia in his brief of 40 cases.

The CHAIRMAN. When this discussion first commenced the Chair—and I have no doubt a great number of the Members—treated the expression "building slip" or treated the word "building" as a verb, and thought it meant the building of a slip. Later along in the discussion it has developed that a "building slip" is a technical term used in navy yards.

The current act appropriating money for the Navy provides—

> The Secretary of the Navy shall build the battleship authorized in this act in such a navy yard as he may designate——

Mr. JONES. Would the Chair permit me to ask just a question right there? The Chair does not mean to say that the Secretary of the Navy under that law was obliged to build the ship in a Government navy yard?

The CHAIRMAN. This act says "the battleship therein authorized shall be built in a Government navy yard"——

Mr. JONES. A battleship?

The CHAIRMAN. Yes.

Mr. JONES. I was speaking of the supply ship. That is not a battleship.

The CHAIRMAN. Even if it be not——

Mr. JONES. And the supply ship under the law would be built in a private yard or a Government yard.

The CHAIRMAN. The Chair was interrupted by the gentleman from Virginia, and will continue to read from the act, as follows:

> The Secretary of the Navy shall build the battleship authorized in this act in such navy yard as he may designate, and shall build any of the other vessels herein authorized in such navy yards as he may designate should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels, have entered into any combination, agreement, or understanding, the effect, object, or purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the construction of any of said vessels.

Under that paragraph in the current law discretion is given to the Secretary of the Navy to determine where the ships shall be built. The Chair has been furnished with a letter dated March 10, 1914, addressed to the Hon. LEMUEL P. PADGETT, chairman of the Committee on Naval Affairs, by Josephus Daniels, Secretary of the Navy, in which he says:

> After careful examination of the various bids and estimates, including the revision of the Boston and Philadelphia Navy Yards of the estimates at first submitted by them, I decided on February 19 to place the building of these two vessels in Government yards—the supply ship to be built at Boston and the transport to be built at Philadelphia—

Therefore we find that the Secretary of the Navy, acting within his legal discretion, has authorized this ship to be built in the Boston Navy Yard. In order to build it it is necessary to have a "slip," about which the Chair had never heard until this question came up. Some time has been used in discussing whether "building slip" was a hyphenated word or two words, but the time has not been thrown away entirely, for only a few days ago we found the Comptroller of the Treasury deciding a very important question upon the placing of a comma, and at the same time wrestling with the grammar used in the bill which he was construing.

It is true there is not a very great deal of difference in effect between the amendment which is now presented to the Chair for determining the point of order and those which preceded it, and to each of which a point of order has been sustained. It very much resembles the distinction made in the common law between an attorney undertaking the prosecution of a case for

one-third of all he may recover and the undertaking of it for an amount equal to one-third of all he may recover. The first would be champertous and the latter legal. There is just about that much difference between this amendment and the ones previously offered. The language of the several others, to each of which the Chair has sustained a point of order, is like this one in effect, but is different in wording. The Chair is of opinion that the change of wording makes it different from the others, and therefore overrules the point of order. [Applause.]

Mr. PADGETT. Mr. Chairman, I ask for a vote.

The CHAIRMAN. In addition to the reasons just given, I desire to refer to section 3837 of Hinds' Precedents, volume 4, in reference to the point of order which was raised in that case, where the Chair was overruled. The Chair thinks the present ruling is in accord and keeping with that.

Mr. PADGETT. Mr. Chairman, I ask for a vote on the amendment.

Mr. JONES. Mr. Chairman, I desire to address the Chair on the subject of this amendment.

The CHAIRMAN. The gentleman from Virginia [Mr. JONES] is recognized.

Mr. JONES. Mr. Chairman, the act of March 4, 1913, of which a good deal has been said in discussing the points of order, provided for the building of a supply ship, to cost not exceeding $1,425,000, and a transport, to cost not exceeding $1,850,000, discretion being given to the Secretary of the Navy to build these ships either at Government yards or at private shipyards.

The Secretary of the Navy advertised for bids, and some five or more of the great private shipbuilding concerns of this country submitted bids for the building of these ships. The Secretary of the Navy also requested the several navy yards to submit estimates for the building of these ships, and all of them submitted estimates. All of the estimates of the navy yards, with the exception of those of the Philadelphia yard and the Boston yard, were higher than the lowest private bidder. The Boston yard estimate was about $300,000 less than the bid of the Newport News Shipbuilding & Dry Dock Co.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Wisconsin?

Mr. JONES. Yes.

Mr. STAFFORD. Can the gentleman inform the House whether there was much competition among the private shipbuilders for the building of those vessels?

Mr. JONES. Yes. All of the five great private concerns submitted bids.

The Newport News Shipbuilding & Dry Dock Co. submitted the lowest bid on both these ships. Now there was, according to the specifications, considerable duplication of machinery in these two ships, so that a yard equipped to build both ships could bid on the two lower proportionately than it could bid on one of them. The Newport News Shipbuilding Co. bid on both of these ships, and its bids were lower than the mere estimates of any of the navy yards except the Philadelphia yard and the Boston yard. As I have said, the estimate of the Boston yard was more than $300,000—I can give the exact figures if necessary—lower than the estimates of the New York Navy Yard, and the estimates of the Philadelphia yard on the transport were some $545,000 less than the estimate of the New York Navy Yard. One of the remarkable and thus far unexplained things about this business is that the Navy Department only asked the Philadelphia yard for an estimate on one ship, and only asked the Boston yard to estimate on one ship, but it asked all of the other navy yards to estimate on both of the ships. But as I have said, Mr. Chairman, the estimates of the Philadelphia and Boston yards were a great deal lower than any of the others, and lower than the lowest of the private bids.

The CHAIRMAN. The time of the gentleman has expired.

Mr. JONES. Mr. Chairman, as I have not occupied much of the time of the committee up to this time, and as I have some information to which I think the committee is entitled, I ask unanimous consent that I may be permitted to speak for 20 minutes on this amendment.

The CHAIRMAN. Is there objection?

Mr. MURRAY of Massachusetts. Mr. Chairman, reserving the right to object, the gentleman addressed himself to this at great length in the course of the general debate, and personally I would like to get a vote on this to-night. I wonder if the gentleman can not conclude his remarks in less time.

Mr. JONES. I shall be glad to conclude my remarks in less time if I can, but I do not know that I can. I do not speak as rapidly as the gentleman does. He can say twice as much in five minutes as I can say in the same length of time.

Mr. MURRAY of Massachusetts. If the gentleman talks 20 minutes, he will make points that some of the rest of us will want to reply to.

Mr. ROGERS. I want to talk on this for at least 10 minutes.

Mr. JONES. I do not think it is likely that we can come to a vote to-night. There are other gentlemen who will wish to speak.

Mr. MURRAY of Massachusetts. Then, let us stick to the five-minute rule and see if we can get a vote on it to-night.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia that he have 20 minutes?

Mr. ROBERTS of Massachusetts. Reserving the right to object, I should like to ask the gentleman from Virginia if he did not include in his speech under the general debate substantially all that he is now desiring to bring before the committee?

Mr. JONES. I may say in reply to the gentleman that I only had some 20 minutes on the general debate, and that most of my speech was published under leave to extend my remarks, so that very few of the Members of the House are informed as to the facts contained in that speech.

Mr. ROBERTS of Massachusetts. There are only a few more than 1 per cent of the membership present here now.

Mr. PADGETT. I will ask the gentleman from Virginia if he can not conclude what he has to say in 15 minutes?

Mr. JONES. I will try to conclude in 15 minutes.

Mr. MURRAY of Massachusetts. I object. One item of this bill has taken the whole day, and it does not seem reasonable to spend the whole day on this item. Let us see if we can finish this to-night.

The CHAIRMAN. Objection is made.

Mr. FOSTER. I ask unanimous consent that the gentleman from Virginia have 10 minutes.

Mr. JONES. If the gentleman objects to reasonable debate on this amendment, he will find that it will take a good deal more time to reach a vote than he may expect.

Mr. MURRAY of Massachusetts. But this is only one item, and we are not halfway through the bill yet.

Mr. FOSTER. I ask unanimous consent that the gentleman from Virginia have 10 minutes.

Mr. MURRAY of Massachusetts. Mr. Chairman, I object.

Mr. STAFFORD. I ask unanimous consent that the gentleman from Virginia have 5 minutes.

Mr. MURRAY of Massachusetts. I object.

The CHAIRMAN. Objection is made.

Mr. FOSTER. Has debate on this amendment been exhausted?

Mr. JONES. I move to strike out the last word.

Mr. MURRAY of Massachusetts. The gentleman has addressed himself to the amendment for 5 minutes, and has consumed his time under the rule.

The CHAIRMAN. The Chair is compelled to hold that the gentleman has used his 5 minutes.

Mr. ROGERS. I hope the gentleman from Massachusetts will allow the gentleman from Virginia to proceed.

Mr. MURRAY of Massachusetts. All I want to do is to get this to a vote to-night, if I can. If we can arrive at any understanding to that effect, I am willing to consent to it.

Mr. STAFFORD. This is a very important proposition. Is not the gentleman willing——

Mr. FOSTER. I ask unanimous consent that the gentleman from Virginia be allowed to proceed for 10 minutes.

Mr. MURRAY of Massachusetts. The gentleman from Illinois does not realize that we have spent the whole day on this thing.

Mr. FOSTER. I realize that the gentleman from Virginia does not occupy much of the time of the House.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the gentleman from Virginia have 10 minutes. Is there objection?

Mr. MURRAY of Massachusetts. Reserving the right to object, may I ask the gentleman from Virginia whether or not it is possible to arrive at some decision for a vote on this amendment to-night?

Mr. JONES. I am not in a position to make any agreement.

Mr. FOSTER. The gentleman from Virginia is not in charge of the bill.

Mr. MURRAY of Massachusetts. But he is holding up this amendment.

The CHAIRMAN. Is there objection to the request that the gentleman from Virginia have 10 minutes more? [After a pause.] The Chair hears none, and the gentleman from Virginia is recognized for 10 minutes.

Mr. JONES. Now, Mr. Chairman, what I wish to say is that when the original estimates came in the Secretary of the Navy referred them to a board of experts, consisting of the Chief of the Bureau of Construction and Repairs, Admiral Watt;

the Chief of the Bureau of Steam Engineering, Admiral Griffin; and to the Aid to Material; and these gentlemen, after having examined the figures carefully, reported to the Secretary of the Navy that it was impossible for either of these navy yards to build the ship upon which it had estimated for anything like the sum for which it was claimed it could be built. The board therefore unanimously recommended that the contract for the building of these ships should be awarded to the lowest contract bidder.

The Secretary of the Navy, under these circumstances, referred the estimates back to these yards and requested them to revise their figures. They did revise their estimates, but when they did so they had before them then the estimates of all the other navy yards and the bids of all the private yards. They revised them by raising them something over $100,000 each, so that after they had been revised the Boston yard was still $266,000 below the New York yard, and the Philadelphia yard some $436,000 lower than the New York yard.

The estimates were again referred to the board of experts, and that board went over them most carefully. After the most painstaking examination, as I am informed, the board reported unanimously to the Secretary of the Navy that neither of these yards could build the ship which it had estimated on for the sum named. Notwithstanding that fact, and in the face of the definite recommendation of his own advisers, the Secretary of the Navy gave these ships to these yards to build, yards that it is now admitted are not equipped to build either of them.

Now, I do not know what influences were brought to bear on the Secretary of the Navy to induce him to disregard the advice of his own expert advisers. I have read very carefully what the Boston newspapers had to say upon this subject, and I learned from those papers that the Massachusetts delegation, headed by the gentleman who sits on my left [Mr. MURRAY of Massachusetts], were continually urging the Secretary to give the supply ship to Boston, notwithstanding the advice of his expert advisers. I learned from these papers that it was claimed that the Secretary of the Navy had made a speech in Boston some time last year in which he had promised that if the Boston yard put in an estimate on the supply ship lower than any private bid, that that ship should be built at the Boston yard.

The Boston newspapers and certain Boston statesmen and politicians, it seems, all insisted that the Secretary of the Navy should live up to this alleged promise, notwithstanding that the board of naval experts informed him that the Boston yard could not do the work for the amount named in the revised estimates.

I will say in this connection that the gentleman who was once a Member of this House and who is now the mayor of the great city of Boston publicly stated, if the Boston papers can be relied upon, that if the Secretary of the Navy did not give this ship to Boston his word could not be relied upon for anything.

Mr. MURRAY of Massachusetts. Mr. Chairman, will the gentleman yield long enough for me to say that I never saw any such statements and do not know of anybody but the gentleman from Virginia that did see them?

Mr. JONES. I know of many people that saw them. I have some of them in my hand, and I will now read one and ask the gentleman from Massachusetts if he did not see this statement?

Mr. MURRAY of Massachusetts. I saw it in the RECORD; I saw it when I read the gentleman's speech.

Mr. JONES. I do not find it readily, Mr. Chairman, but I can state its contents substantially. It stated that on one occasion the news reached the Capitol that the Secretary of the Navy had determined to award the supply ship to the Newport News Shipbuilding Co., and that Mr. MURRAY immediately summoned the whole Massachusetts delegation and that, with one exception, they descended upon the Secretary of the Navy; that when they got to the Navy Department the Secretary confirmed the report which had come to Mr. MURRAY to the effect that he had about decided to award the contract to the Newport News Shipbuilding Co. Then, so the Boston paper stated, Mr. MURRAY informed him that if he did so the matter would be taken up on the floor of the Senate and the House, and that he would hear from the men from Massachusetts.

Another paper stated that it did not know to whose influence was due the fact that the Boston yard had gotten this ship to build, whether it was Mr. MURRAY, the governor of the State, or the mayor of the city of Boston, to whom the credit was due, or "whether some silent influence turned the trick." But, it added, "it is enough to know that Boston wins."

Now, Mr. Chairman, I do not know what influences were brought to bear, but I do not believe the Secretary of the Navy knows any more about building ships than I do. I am told that his expert advisers, who are certainly among the most capable men in the Navy, every single man of them, with absolute unanimity, advised him that neither of these yards could build these ships for the sum that it had estimated that it could do it for. I do know, Mr. Chairman, that if they do not build them within the estimates there is no penalty attached to their failure. If they shall cost double the amounts of the estimates, then Congress will be asked to furnish the money to complete them. I am told by competent naval authorities, and I believe them, that it will probably cost $1,000,000 more to build these ships in these navy yards than it will take to build them in a private yard. A private yard is required to give a heavy bond. If contract-built ships do not come up to every requirement of the contracts, the Government may refuse to accept them; but if these two ships shall, if built at these navy yards, prove utterly worthless, the Government must bear the loss.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield for a question?

Mr. JONES. For a question.

Mr. ROBERTS of Massachusetts. Would the gentleman object to building either one of these ships in the Norfolk yard had that yard put in the lowest bid?

Mr. JONES. Most decidedly I would, although the Norfolk yard built the *Texas*, and the gentleman's navy yard never even built so much as a yawl boat, so far as I know.

Mr. MURRAY of Massachusetts. Oh, it built the *Cumberland*.

Mr. JONES. Yes; I should have said the Philadelphia yard. I beg the gentleman's pardon. I was thinking that he was speaking for Philadelphia.

Mr. PADGETT. The Norfolk yard did not build the *Texas*.

Mr. JONES. I beg the gentleman's pardon; it did. There have been two boats of that name. I did not say that the sister ship to the *New York*, the new *Texas*, was built at the Norfolk Navy Yard, but I do say that the old *Texas* was built there.

Mr. ROBERTS of Massachusetts. The one that was no good.

Mr. JONES. She may have been no good, but she was built at the Norfolk Navy Yard. There never has been a ship built by the Newport News Shipbuilding Co. that has been thrown back on the company, nor one that has not been first class in every respect. Up to a short time ago 40 per cent of all of the ships in the American Navy were built at Newport News. The dreadnaught *Texas*, just launched, and the *Pennsylvania*, which is being built there now, will be amongst the largest and best in our Navy. It is the best equipped yard in the United States, if not in the world, and it can build a better ship, in my judgment, than can be built at any navy yard in the world.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I would like to ask the gentleman if he cares to know why the old *Texas* was no good?

Mr. JONES. I do not. She was an ill-fated ship, but she was built at a United States navy yard. Perhaps some advocate of building ships in navy yards in preference to building them in private yards may have some curiosity to know.

Mr. ROBERTS of Massachusetts. She was built on the English plan. It was not the yard construction that was defective. It was the plan that was defective—the English plan under which she was constructed.

Mr. JONES. I do not know why she was defective. Some gentlemen on that side seemed to be very much amused when they learned that she was built at Norfolk, evidently under the impression that she was built in a private yard. Now that they are better informed they appear to have lost all interest in the subject.

Mr. ROBERTS of Massachusetts. The gentleman has just said the new *Texas* was built at the Newport News yard?

Mr. JONES. Yes.

Mr. ROBERTS of Massachusetts. Does he know where she is now?

Mr. JONES. I do not.

Mr. ROBERTS of Massachusetts. Then I will tell him that she is in the New York yard undergoing repairs that will take four months, while her sister ship the *New York*, built in the New York yard, is at Vera Cruz. [Applause.]

Mr. JONES. Mr. Chairman, the gentleman probably does not mean what he says.

Mr. ROBERTS of Massachusetts. I mean exactly what I say.

Mr. JONES. Because the *Texas* is not there undergoing necessary repairs at all. She is being fitted with certain extras that were not provided for in the specifications and for which the Newport News Co. was never paid.

Mr. ROBERTS of Massachusetts. I asked the gentleman a while ago if he knew where she was, and he said that he did not.

Mr. JONES. The *New York* never has had her engines even tried.

Mr. ROBERTS of Massachusetts. She does not need it. She is in the service now.

Mr. JONES. She is not completed now, and she will not be completed for two months to come.

Mr. ROBERTS of Massachusetts. I want to say that a navy-yard ship does not require all of these tests that we require from a private shipbuilder.

Mr. JONES. And, Mr. Chairman, the *New York* has cost a million dollars more than did the *Texas*, which was built in a private shipyard. She is in every respect as good and as powerful a ship as the *New York*.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. ROGERS. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

Mr. MURRAY of Massachusetts. Mr. Chairman, can not the gentleman get along with five minutes, so that we can get a vote on this matter to-night?

Mr. ROGERS. There are two or three things that I desire to discuss.

Mr. MURRAY of Massachusetts. I suggest that the gentleman try to get along with five minutes.

Mr. ROGERS. Mr. Chairman, I will not ask for the second five minutes at this time.

The CHAIRMAN. The gentleman from Massachusetts is recognized for five minutes.

Mr. ROGERS. Mr. Chairman, on the 21st day of this month the gentleman from Virginia who has just taken his seat made a vigorous attack upon the award of the Secretary of the Navy whereby a supply ship is to be built at the Boston Navy Yard. I say in all deference to the gentleman from Virginia [Mr. JONES] that, to my mind, his own statement of the case in that carefully prepared utterance is the strongest possible argument that can be found for the construction of this vessel in Massachusetts, though, of course, his intention was to argue that the vessel should be built by the Newport News private concern, which is in his district and in which he is naturally and perhaps properly interested.

At the outset of the gentleman's remarks he analyzed the bids which were submitted both by the Government yards and by the private shipbuilding companies. He shows that the Boston Navy Yard bid was just a trifle over a million dollars and that the other six Government yard bids ranged from $1,286,000 to $1,429,000. Hence there was a clear saving of from a quarter to nearly a half million dollars if the vessel were built at Boston as compared with any of the other Government yards. And he goes on to show that there is a similar saving in favor of Boston of over a quarter million of dollars as compared with the lowest figure of any private concern which submitted a bid. I am advised by the Navy Department that the Boston figures were evolved after great care and consideration by one of the ablest of the younger naval constructors in the Navy, and that they would probably have stood the test if the construction had actually been undertaken in accordance therewith; but the Secretary of the Navy, for one reason or another which I will not attempt to develop now, concluded that it was the safer course to refer that bid for further consideration—some question about it having been raised—to one of the oldest and most experienced naval constructors on the Atlantic coast. Thereupon that veteran constructor reexamined the figures, and to make assurance doubly sure, he increased the bid $117,000 to a total of $1,163,000. It will be observed that there was still a very substantial margin of saving as compared with any other public or private bid. Now, Mr. Chairman, if the position of the gentleman from Virginia is to be sustained, we are in this embarrassing predicament whenever we call for bids upon Government work: If a bid is too high, it will, of course, be rejected forthwith without argument. If, on the other hand, as in this case, it is low, then it is at once subject, in the eyes of the gentleman from Virginia, to almost equal criticism. The logical result of such an argument will be, of course, that a bid must be precisely what the gentleman from Virginia, or whoever may be interested in the particular contract, may think it ought to be. Otherwise the finger of scorn will be pointed at it and out it will go. Is there any incentive to the highly desirable spirit of emulation and competition in any such doctrine?

The gentleman from Virginia goes on to say:

It may be urged that "these appropriations for the Boston yard are essential in order that these yards when placed in readiness for work will give employment to those seeking work.

That is exactly the position of the men who are interested in the Massachusetts project, and it needs no defense. It is well known that if a yard is obliged to go on half time or quarter time or to shut down altogether, when work comes again in full flood the yard must reassemble its equipment, must get together its entire force of trained workmen who have vanished all over the country, and that an enormous percentage of efficiency is lost as well as time, labor, and expense. Of course, the Boston yard wants to keep its equipment and force in operation so that when emergency comes it may be ready. This consideration is of prime importance not only to the Boston yard but to the entire United States Navy. Lack of work in a navy yard inevitably means loss of power and efficiency, and loss of power and efficiency means a poorer Navy.

Then the gentleman goes on to say, speaking of the climate of Boston——

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. ROGERS. Mr. Chairman, now I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. ROGERS. He says "the climate of Boston is such that work such as is required in building the hull of a ship can not be economically done during at least five months in the year." Mr. Chairman, we of New England thought we lived in the Temperate Zone, but now we are told that only for seven months in the year is our part of the world tolerable even for the ordinary mechanical pursuits, such as are involved in the building of a supply ship. For nearly half the year, in the opinion of the gentleman from Virginia [Mr. JONES], the climate of Massachusetts and of New England is unfit for such labor as the construction of a supply ship entails. I submit to any man in this House that the statement carries with it its own refutation. Those who have been in Washington during the summer season and in Norfolk and Newport News in the month of August will be inclined to——

Mr. JONES. I refer to the winter months. How about the winter months?

Mr. ROGERS. You have not been in the habit of complaining about the severity of the cold here. Yet I think most of us Massachusetts men will say that although the mean temperature may be higher in Washington, nevertheless we have suffered as much from the cold the past winter as we would have suffered in Massachusetts.

Mr. JONES. Will the gentleman state that in the winter months men can work outdoors on the hull of a steel ship in Boston?

Mr. ROGERS. I have never seen it denied, Mr. Chairman, and certainly the gentleman offered no evidence to that effect in the course of his remarks beyond his bald assertion.

Mr. JONES. I ask the gentleman——

Mr. ROGERS. I have no reason to think they can not work during the winter. I know building goes on in Massachusetts, even concrete construction work, throughout the winter months, and in the quite intensely cold weather which, of course, we sometimes get there. But even assuming that winter work may be somewhat more comfortably done in Newport News than in Massachusetts, the additional hardship of summer work in the intense heat of the former would easily more than wipe out the handicap.

Now, Mr. Chairman, the gentleman in his concluding paragraph gets at the real gist of the whole question from his point of view. He says:

When a thousand men lose employment in large cities such as Boston it is hardly felt.

I commend that humane and enlightened doctrine to the consideration of the voters of the district of the gentleman from Massachusetts [Mr. MURRAY]. A man who is unemployed does not care very much whether he is living in a city of 300,000 inhabitants or in a city of 30,000 inhabitants. It is just as important to him to get bread and butter and clothing for his wife and children whether he lives in a hamlet or in a metropolis.

And then the gentleman from Virginia concludes in this way:

I can not but feel, in view of all the circumstances surrounding the award of these ships, that the Newport News Shipbuilding & Dry Dock Co. has not received a square deal.

Now, Mr. Chairman, this Newport News company is a private one. We want the private concerns of this country who are doing business properly to succeed, but we do not want them to supersede the Government yards, which we have built up at such time and labor and expense, and utterly put the Government yards out of business. Of course, the gentleman is defending his constituent, the Newport News company, but I do not think that is a reason why this Congress should take a step which, while it will enrich a great private plant in Virginia, will at the same time cost the Government an unnecessary $150,000, will deprive of employment 1,000 men at Massachusetts, and turn over our Boston Navy Yard to the spiders

and the mice. If that be the kind of a "square deal" which the gentleman from Virginia says he craves, I hope that his yearning may ever go unrequited. [Applause.]

In the course of a speech upon this subject on April 24 my colleague Mr. MURRAY said:

I have never known a greater Secretary of the Navy than the present Secretary, Josephus Daniels.

I do not care at this time to debate that general proposition with my eloquent friend. The fact is, however, as the entire context shows, that the gentleman was jubilant over the award of the contract to the Boston yard, and was prepared to bestow his blessing upon anyone who had contributed to the result.

But whatever the merits of the present Secretary, as a man or as a sailor, is he, in fact, deserving—so far, at least, as this particular instance goes—of the somewhat extravagant eulogy of the gentleman from Massachusetts? Would not that eulogy have been curtailed, if not altogether omitted, if the award had been made by the Secretary to some yard other than the Boston yard? And is it to the undying credit of the Secretary that he finally, after two months of vacillation, awarded the contract to a Government yard, whose bid was $150,000 lower than that of any competitor, public or private?

But perhaps it was the eagerness and solicitude for Boston shown by the Secretary that brought him this pæan of praise. Let us see.

The bids for the supply ship were opened December 20 last. Boston was the lowest of 12 competitors—7 Government yards and 5 private concerns—by about $250,000. It was supposed that the award to it would follow as of course, but it did not. The Secretary turned over the Boston bid for refiguring to Naval Constructor Baxter, one of the ablest and strongest men in his department in the United States.

While things were in this situation a dispatch, dated January 15, 1914, appeared in the Boston Advertiser of January 16, as follows:

Congressman ROBERTS arranged to-day for a visit to the Navy Department of all the Senators and Representatives from Massachusetts to-morrow to lay before Secretary Daniels the desirability of ordering that the new naval supply ship be built at Charlestown, which has made the lowest bid. Much contrary pressure is being brought upon the Secretary to favor Virginia shipyards and navy yards.

The conference referred to took place, and was attended by both Massachusetts Senators and by most of the Representatives, myself among the number. The meeting was of perhaps 40 minutes' duration, and the Massachusetts case thoroughly presented. The Secretary was friendly but noncommittal.

The next news of consequence appears in the Boston Advertiser of February 7:

The revised estimates of the Boston Navy Yard on the bid for the supply ship to be built by the Navy, and which Boston desires built at the yard there, were received from Naval Constructor Baxter to-day. Congressman ROBERTS inspected them and said that they seemed to be 10 per cent above the original bid submitted by the Boston yard. This increase is, however, still substantially lower than the next lowest bid. It is the belief of Congressman ROBERTS, as well as Congressman MURRAY and Senator LODGE, that as a result the Boston yard will be authorized by the Navy Department to build the ship, unless, indeed, Secretary Daniels reverses himself on his promise, which is hardly expected. His decision is expected next Tuesday (Feb. 10).

February 10 I addressed the House, pointing out various instances in recent legislation which manifestly tended to favor the Southern States at the expense of the remainder of the country.

The Boston Advertiser of February 12 has a Washington dispatch dated February 11 to the following effect:

There was still another postponement to-day by Secretary Daniels of a decision whether or not the new Navy supply ship is to be built at the Boston Navy Yard. To-day it was said that to-morrow an announcement may be expected. An announcement was to have been made to-day. The Massachusetts delegation, inclusive of the Democrats, are becoming suspicious of these frequent postponements and are beginning to believe that they are symptomatic of a disappointment, the Secretary effecting some other arrangement.

A Washington dispatch in the Boston Advertiser of February 14 says, under date of February 13:

SAY NORFOLK WILL GET SUPPLY SHIP—MASSACHUSETTS MEN IN DESPAIRING APPEAL.

Announcement as to whether or not the new Navy supply ship is to be built at the Boston Navy Yard was again postponed to-day, Monday (the 16th) being the date now fixed. The contract to build the ship has been all but awarded elsewhere—to Norfolk, it is learned. That this was the decision of Secretary Daniels became known to Congressman MURRAY to-day. He became exceedingly active at once and, accompanied by Congressmen PETERS, DEITRICK, PHELAN, THACHER, and MITCHELL, he called upon the Secretary to confer with him once more over awarding the contract to the Boston Navy Yard.

Mr. MURRAY then narrated to him the bad political effect the awarding of the contract elsewhere than to Boston would have. There was Boston apparently with the lowest bid and yet it was to be disappointed. He pointed to the speeches Congressman ROGERS of Massachusetts was making and to the effect that now that the South was in the saddle the South was being given the major share of everything. No other interpretation could be put on awarding the contract to Norfolk, said Mr. MURRAY.

The prospect does not look the best, but the delegation is doing its best.

The Boston Advertiser of February 16 contains a statement issued by Mayor Curley, of Boston, who, as a Member of this House, had participated actively in the conference with Secretary Daniels above referred to. In part the statement is:

At a conference held at the office of the Hon. Josephus Daniels, Secretary of the Navy, some three weeks ago, the Secretary agreed with the Congressmen representing the State of Massachusetts, irrespective of party, that in the event of the revised bid to be submitted in behalf of the Boston Navy Yard being within the Naval Construction Board's estimate of cost of construction, the building of the ship would be awarded to the Charlestown yard.

Upon Wednesday of last week information was received through Washington channels that the revised bid was less than the Naval Construction Board's estimate, and reliance was placed in the statement of the Secretary of the Navy that, if such proved the case, the building of the ship would be awarded to the Charlestown yard.

To award the building of the supply ship to any other yard is equivalent to saying to the entire country that the word of the Secretary of the Navy is valueless and that political pressure is more potent than a sound business policy.

The Boston Advertiser, February 17, contains a dispatch, dated February 16:

The Navy Department announced to-day one more postponement as to whether or not the new Navy supply ship shall be awarded to the Boston Navy Yard. "To-morrow," it was said to-day. A decision was expected to-day. The frequent postponements make the prospects for Boston grow dimmer.

And then, finally, the following day came the welcome announcement that Boston had succeeded after all in securing what so clearly was rightly hers. The Washington dispatch says:

It is believed that it came hard for the Secretary to make the decision he did. * * * The Massachusetts men in Congress are jubilant, especially Congressman MURRAY, in whose district the navy yard is, and but for whose timely discovery that it was planned to award the contract elsewhere than to Boston the announcement to-day would have been different. He aroused the delegation and the governor, and the wires became too hot for the Secretary to handle in a manner to suit himself.

Here endeth the chronicle of how the Secretary of the Navy became great in the eyes of the energetic Member from Massachusetts. Politics were undoubtedly played to get the contract for Boston, as the gentleman from Virginia [Mr. JONES] has alleged. But it was necessary to play politics, as the recital shows, to force the Secretary to reach the only just and business-like result. Perhaps the necessity was unfortunate; but at least the weapon was wielded in a righteous cause. But how, from the record of the case, is my colleague [Mr. MURRAY] consistently able to extol the Democratic administration or the Secretary of the Navy for the result so laboriously achieved? If there is any laurel to be accorded, should it not most appropriately rest upon the brow of the gentleman himself?

Mr. KELLEY of Michigan. Mr. Chairman, just a word. Coming from out in the Middle West, of course I have not any interests whatever that would influence me one way or another as to whether these ships should be built by private capital or by the navy yards of the Government. I want to say, however, that in my judgment, wherever it is possible to do so, the Government navy yards ought to be kept up to the highest possible point of efficiency, and that can not be done if the work in those yards is slack a greater portion of the time. The thing that struck me as I visited these various navy yards—and I have visited all of them, from Portsmouth, Va., to Portsmouth, N. H., up the Atlantic coast—was apparently the small amount of work that was going on in the yards and the enormous capital invested by the Government there. Now, that being the case, it seems to me whenever the Government can keep its organization together and make these yards efficient by bringing in the Government work to those yards, it should do so.

And so, Mr. Chairman, I believe this ship and other ships like it should be built in the Government yards, everything else being anything like equal. [Applause.]

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the Chairman announced that the ayes seemed to have it.

Mr. JONES. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 65, noes 14.

Mr. JONES. No quorum, Mr. Chairman.

The CHAIRMAN. The point of no quorum is made. The Clerk will call the roll.

Mr. MURRAY of Massachusetts. It is evident, Mr. Chairman, that there is not a quorum present.

The CHAIRMAN. The Chair will count. [After counting.] Eighty-three gentlemen are present—not a quorum.

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. JOHNSON of Kentucky, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 14034, the naval appropriation bill, and had come to no resolution thereon.

LOUIS FRANK BOSWELL.

Mr. HILL. Mr. Speaker, I desire to have two or three minutes in which to speak with reference to the death of one of the soldiers from my district, who died in Vera Cruz.

The SPEAKER. The gentleman from Illinois [Mr. HILL] asks unanimous consent for three minutes in which to memorialize a soldier from his district. Is there objection?

There was no objection.

Mr. HILL. Mr. Chairman, I arise to say a few words in honor of Louis Frank Boswell, of Coulterville, Ill., first gunner's mate, who was killed on last Friday at Vera Cruz. The deceased was the first, and so far the only, soldier from Illinois to give up his life in defense of the honor and dignity of his country and his country's flag.

The home of this patriot was in my district. His parents are my constituents. No words that I can say will add luster, glory, or renown to the bravery of this soldier.

Only a few days ago he was a living, hopeful, and brave soldier; to-day his proud and patriotic spirit rests for all eternity in the bosom of his Creator.

He came of that sturdy stock of manhood endowed with love of country that is willing to fight for the honor of its flag; yea, willing and ready to give up life rather than allow the flag of the country to be disrespected and dishonored.

Whether we are finally engulfed into general warfare with the Republic of Mexico, or whether there is a peaceful settlement through mediation, the bravery, valor, and fortitude of this soldier's life and his ending sacrifice for his country's honor and his country's cause will forever remain the same.

I am for peace, this Congress is for peace, the Nation is for peace, the President is for peace, if peace can be had by upright and worthy means, but if peace is to be attained at the expense of our national honor, I am for war and I am ready to put on the uniform and fight for my Nation's dignity, and if need be I am willing that my epitaph shall be written in my blood, just as Louis Frank Boswell has written his epitaph in his blood.

Mr. Chairman, the only consolation that I can now offer his aged father, family, and friends is that I hope and pray that the God of us all, who directed the footsteps of this brave and patriotic young soldier, may give courage and hope to them with an unfailing memory that his son and their associate died a brave hero, fighting for our national honor. [Applause.]

EXTENSION OF REMARKS.

Mr. BROCKSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of Panama Canal tolls.

The SPEAKER. The gentleman from Delaware [Mr. BROCKSON] asks unanimous consent to extend his remarks in the RECORD on the subject of Panama Canal tolls. Is there objection?

There was no objection.

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 2314. An act for the relief of Allen Edward O'Toole and others who sustained damage by reason of accident at Rock Island Arsenal.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. ASHBROOK, for two weeks, on account of important business.

To Mr. KEY of Ohio, for one week, on account of important business.

ADJOURNMENT.

Mr. PADGETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock p. m.) the House adjourned until to-morrow, Friday, May 1, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Skagit River, Wash. (H. Doc. No. 935); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

2. A letter from the Secretary of the Treasury resubmitting a communication relative to the necessity for making provision in the old building of Engraving and Printing for the accommodation of the stamps division of the Internal Revenue Bureau, with a view to the utilization of the space in the Treasury Building now occupied by the stamps division for the accommodation of the income-tax division (H. Doc. No. 934); to the Committee on Appropriations and ordered to be printed.

3. A letter from the chairman of the Public Buildings Commission submitting the report and recommendations of said commission, constituted under section 36 of the public-buildings act approved March 4, 1913 (H. Doc. No. 936); ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. SINNOTT, from the Committee on the Public Lands, to which was referred the bill (H. R. 13717) to provide for leave of absence for homestead entrymen in one or two periods, reported the same without amendment, accompanied by a report (No. 596), which said bill and report were referred to the House Calendar.

Mr. CRAMTON, from the Committee on Invalid Pensions, to which was referred the bill (H. R. 15987) to amend section 3646 of the Revised Statutes of the United States as reenacted and amended by act of February 23, 1909, reported the same without amendment, accompanied by a report (No. 597), which said bill and report were referred to the House Calendar.

Mr. BURKE of Wisconsin, from the Committee on the Merchant Marine and Fisheries, to which was referred the bill (S. 5289) to provide for warning signals for vessels working on wrecks or engaged in dredging or other submarine work, reported the same with amendment, accompanied by a report (No. 599), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. GARRETT of Texas, from the Committee on Military Affairs, to which was referred the bill (H. R. 7205) to correct the military record of H. S. Hathaway, reported the same without amendment, accompanied by a report (No. 598), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. ESTOPINAL: A bill (H. R. 16167) making appropriations for the construction of a roadway and walk leading to and around the Chalmette Monument, Chalmette, La.; to the Committee on Military Affairs.

By Mr. SELDOMRIDGE: A bill (H. R. 16168) to amend the third section of the act of Congress approved May 14, 1880, entitled "An act for the relief of settlers on the public lands"; to the Committee on the Public Lands.

By Mr. WATKINS: A bill (H. R. 16170) to provide for a site and public building at Mansfield, La.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 16171) regulating the method of keeping the mortality statistics by the Census Bureau and providing for tabulating and rating separately white and colored people, and that the mortality rates of cities be based upon deaths of those residing in the city, and nonresident deaths, or deaths of transients, be tabulated separately; to the Committee on the Census.

By Mr. DUPRÉ: A bill (H. R. 16172) to give the consent of the Congress to the construction of a bridge across the Mississippi River at or near New Orleans, La.; to the Committee on Interstate and Foreign Commerce.

By Mr. SMITH of Maryland: Joint resolution (H. J. Res. 258) providing for the repeal of the Hay-Pauncefote treaty as

one of the conditions of the proposed transfer of southeastern Alaska to Canada; to the Committee on Foreign Affairs.

By Mr. HAY: Joint resolution (H. J. Res. 259) making immediately available appropriations carried in the act approved April 27, 1914, making appropriations for the support of the Army for the fiscal year ending June 30, 1915; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALLEN: A bill (H. R. 16173) waiving the age limit for admission to the Pay Corps of the United States Navy in the case of Samuel B. Deal, jr.; to the Committee on Interstate and Foreign Commerce.

By Mr. BRITTEN: A bill (H. R. 16174) to correct the military record of George W. Eckerson; to the Committee on Military Affairs.

By Mr. BRUMBAUGH: A bill (H. R. 16175) granting a pension to Mary A. McCann; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16176) to remove the charge of desertion against John M. Giberson; to the Committee on Military Affairs.

By Mr. CANTRILL: A bill (H. R. 16177) granting an increase of pension to Ottoway Bryant; to the Committee on Invalid Pensions.

By Mr. CARLIN (by request): A bill (H. R. 16178) granting a pension to William Caton; to the Committee on Invalid Pensions.

By Mr. CARR: A bill (H. R. 16179) granting an increase of pension to Amanda E. Coughanour; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16180) granting an increase of pension to Richard Varndell; to the Committee on Invalid Pensions.

By Mr. ESTOPINAL: A bill (H. R. 16181) granting a pension to Richard D. Powers; to the Committee on Pensions.

Also, a bill (H. R. 16182) granting an honorable discharge to John Proctor, alias John Neal; to the Committee on Military Affairs.

By Mr. FITZHENRY: A bill (H. R. 16183) granting a pension to Stephen Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16184) granting a pension to William W. Reser; to the Committee on Invalid Pensions.

By Mr. FRANCIS: A bill (H. R. 16185) granting an increase of pension to George T. Biggs; to the Committee on Invalid Pensions.

By Mr. HAMLIN: A bill (H. R. 16186) granting an increase of pension to Nancy C. McCurdy; to the Committee on Invalid Pensions.

By Mr. KENNEDY of Rhode Island: A bill (H. R. 16187) to remove the charge of desertion from the military record of Frank Oldis; to the Committee on Military Affairs.

By Mr. LANGHAM: A bill (H. R. 16188) granting an increase of pension to John Saint Clair; to the Committee on Invalid Pensions.

By Mr. MAPES: A bill (H. R. 16189) granting a pension to Mary Sanford; to the Committee on Invalid Pensions.

By Mr. McKENZIE: A bill (H. R. 16190) granting a pension to Katherine L. S. Brown; to the Committee on Invalid Pensions.

By Mr. PLUMLEY: A bill (H. R. 16191) granting an increase of pension to Zolva W. Chase; to the Committee on Invalid Pensions.

By Mr. SELDOMRIDGE: A bill (H. R. 16192) to authorize the issuance of patent to Rachel E. Dangerfield Boast for the southeast quarter of section 21 and the northeast quarter of section 28, township 1 south, range 57 west of the sixth principal meridian; to the Committee on Public Lands.

By Mr. TAVENNER: A bill (H. R. 16193) granting an increase of pension to Dr. Ralph B. McCleary; to the Committee on Invalid Pensions.

By Mr. TOWNER: A bill (H. R. 16194) granting an increase of pension to Mary Willison; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petitions of sundry citizens of Manistee, Mich., Astoria City, N. Y., and Pittsburgh, Pa., protesting against the practice of polygamy in the United States; to the Committee on the Judiciary.

Also (by request), memorial of the Florida Everglade Homebuilders' Association, favoring passage of the Clark drainage bill; to the Committee on Rivers and Harbors.

Also (by request), memorial of the Jewish Community (Kehillah) of New York City, pledging the active support of their members to the United States Government in any situation that may arise out of the Mexican situation; to the Committee on Foreign Affairs.

By Mr. ALLEN: Petition of John Koenig and 105 other citizens of Cincinnati, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. ASHBROOK: Resolutions of Union Veteran Legion, No. 31, of Newark, Ohio, opposing monthly payments of pensions; to the Committee on Invalid Pensions.

Also, petition of 23 citizens of Canal Dover, Ohio, protesting against nation-wide prohibition; to the Committee on the Judiciary.

By Mr. BARTON: Petition of sundry citizens of Ragan, Nebr., protesting against the Sunday-observance bill; to the Committee on the District of Columbia.

Also, petition of sundry citizens of Ragan, Nebr., favoring an amendment to postal and civil-service laws (H. R. 12928); to the Committee on the Post Office and Post Roads.

By Mr. BATHRICK: Petition of sundry citizens of Summit County, Ohio, against national prohibition; to the Committee on the Judiciary.

By Mr. BEAKES: Petitions of 127 voters of Lenawee County, Mich., and 70 voters of Clinton County, Mich., in opposition to national prohibition; to the Committee on the Judiciary.

Also, petitions of the Jackson Retail Grocers' Association, of Jackson, Mich., and the Detroit Retail Druggists' Association, favoring House bill 13305, the price-maintenance bill; to the Committee on Interstate and Foreign Commerce.

Also, memorials of various boards of trade and organizations of the State of Michigan, in opposition to Senate bill 136, known as the La Follette seamen's bill; to the Committee on the Merchant Marine and Fisheries.

By Mr. BRITTEN: Petition of the Chicago Federation of Labor, relative to Palmer bill reducing hours of night work for post-office employees; to the Committee on the Post Office and Post Roads.

Also, petition of the Chicago Federation of Labor, protesting against excessive overtime in the Chicago post office; to the Committee on the Post Office and Post Roads.

By Mr. BROWNING: Memorial of the Clementon (N. J.) Branch, Socialist Party, relative to the strike situation in Colorado; to the Committee on the Judiciary.

Also, petition of sundry citizens of Camden, N. J., favoring national prohibition; to the Committee on the Judiciary.

By Mr. BRUCKNER: Petitions of Josef Voge, R. L. Noit, Aug. Baier, and Paul F. Miller, all of New York City, favoring passage of the Bartlett-Bacon bill (H. R. 1873); to the Committee on the Judiciary.

Also, petition of the Federal Council of the Churches of Christ in America, relative to war with Mexico; to the Committee on Foreign Affairs.

Also, petition of the International Association of Machinists, of Washington, D. C., favoring building of one battleship in a Government navy yard; to the Committee on Naval Affairs.

Also, petition of the New York State Millers' Association, relative to Lever grain bill; to the Committee on Agriculture.

Also, petition of Camp No. 171, United Confederate Veterans, disclaiming that they had given authority to one of their number to ask subscriptions to defray expenses of Confederate veterans to Jacksonville, Fla.; to the Committee on Military Affairs.

Also, petition of Branch No. 2, of Local Bronx Socialist Party, of New York, and national executive board of the Workmen's Sick and Death Benefit Fund, relative to mine conditions in Colorado; to the Committee on Rules.

Also, petition of William Rupp, of New York, favoring the Bartlett-Bacon anti-injunction bill; to the Committee on the Judiciary.

Also, petition of Charles N. Prouty, of Spencer, Mass., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of H. C. Maine, of Rochester, N. Y., and sundry citizens of New York City, against national prohibition; to the Committee on the Judiciary.

Also, petition of the affiliated trades of the New York Navy Yard, favoring building battleships in Government navy yards; to the Committee on Naval Affairs.

Also, petition of Arthur F. Dieckman, of New York City, favoring intervention by the Government in mining trouble of Colorado; to the Committee on the Judiciary.

By Mr. BRYAN: Memorial of the school committee of Stamford, Conn., favoring the passage of the Hamill bill for the retirement of Federal employees; to the Committee on Reform in the Civil Service.

Also, memorial of the Chamber of Commerce of Seattle, Wash., protesting against change in parcel-post rates; to the Committee on the Post Office and Post Roads.

By Mr. BURKE of Pennsylvania: Petition of sundry citizens of the thirty-first congressional district of Pennsylvania, against national prohibition; to the Committee on the Judiciary.

Also, petition of North Star Lodge, No. 2, International Order of Good Templars, favoring erection of a memorial to John Ericsson; to the Committee on the Library.

By Mr. CARR: Petition of 31 citizens of Brave, Pa., favoring joint resolution of Mr. HOBSON, prohibiting manufacture, sale, etc., of intoxicating liquors; to the Committee on the Judiciary.

Also, resolution of various members of the Methodist Episcopal Church of Mount Morris, Pa., favoring joint resolution of Mr. HOBSON, prohibiting manufacture, sale, etc., of intoxicating liquors; to the Committee on the Judiciary.

By Mr. CARY: Petition of John Heincke, of Milwaukee, Wis., against House bill 11321; to the Committee on Patents.

By Mr. CRAMTON: Petitions of James Willis and 170 other voters of St. Clair County, A. E. Schenk and 71 other residents of Tuscola County, E. H. Chrysler and 74 other voters of Lapeer County, Theodore Goebel and 305 other voters of Huron County, E. L. McCafferty and 155 other voters of Macomb County, all in the State of Michigan, protesting against the proposed resolution providing for national prohibition; to the Committee on the Judiciary.

Also, petition of Detroit Post, No. 384, Grand Army of the Republic, for establishment of a national park on the Franklin battle field, Tenn.; to the Committee on Military Affairs.

By Mr. CURRY: Petition of three citizens of Sacramento, Oakley, and Vallejo, all in the State of California, against national prohibition; to the Committee on the Judiciary.

By Mr. DALE: Petition of the affiliated trades of the New York Navy Yard, relative to building battleships in the Government navy yard; to the Committee on Naval Affairs.

By Mr. DANFORTH: Petitions of Mr. George Robinson and 51 others, of Kendall; A. J. Knight and 37 others, of Arcade; G. E. Hanford and 13 others, of Etna; John Garvey and 15 others, of Avon; Raymond Downing and 7 others, of Avon; D. C. Herrell and 29 others, of Holley; Charles J. Piper and 15 others, of Buffalo; Forrest Dassance and 71 others, of Perry; W. V. Te Winkel and 17 others, of Perry; Martin C. Soule and 31 others, of Perry; J. H. Harmon and 7 others, of Brockport; A. C. Starkweather and 27 others, of Eagle Harbor; Charles W. Vincent and 42 others, of Batavia; Fred Warren and 14 others, of Batavia; Charles A. Thompson and 21 others, of Avon; J. A. Wakeman and 14 others, of Basom and Alabama; L. E. Ford and 54 others, of Brockport; Charles W. Buchholtz and 62 others, of Batavia; and Daniel A. Wallace and 67 others, of Batavia, all in the State of New York, favoring national prohibition; to the Committee on the Judiciary.

By Mr. DIETRICK: Petition of members of the Middlesex Central Christian Endeavor Union at Medford, Mass., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of the State of New Jersey, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens and voters of Washington County, N. J., favoring national prohibition; to the Committee on the Judiciary.

By Mr. VARE: Petition of sundry citizens of the first congressional district of Pennsylvania, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. YOUNG of North Dakota: Petition of 35 citizens of Bismarck, 60 citizens of Rugby, and 200 citizens of Courtenay, all in the State of North Dakota, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of North Dakota, against Sabbath-observance bill; to the Committee on the District of Columbia.

SENATE.

FRIDAY, *May 1, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, from everlasting to everlasting Thou art God. Thy years have no end. A thousand years in Thy sight are but as yesterday when it is past and as a watch in the night. How swiftly our years roll on in the mighty tide of the divine order. How uncertain is our stay. Every step in the pathway is a step into the unknown future. And yet every act of life holds an essential relation to all the divine order, working out the plans of God for us in life. Help us to hold in remembrance this day our relation to Thee as stewards of God in the eternal order. May every act and thought be acceptable in Thy sight and be well accounted for when we stand before the judgment seat of God to render an account of the deeds done in the body. To this end bless us and keep us by Thy grace. For Christ's sake. Amen.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. MCCUMBER and by unanimous consent, the further reading was dispensed with and the Journal was approved.

LABOR TROUBLES IN COLORADO.

Mr. THOMAS. Mr. President, a telegram was introduced and read yesterday morning referring to the conditions in Colorado, which was followed by some remarks upon the subject by the Senator from New Jersey [Mr. MARTINE]. I intended in consequence of that episode to have said something about the matter at the time, but was prevented from doing so by the requirement that the regular order should be observed.

Mr. President, I have no present intention of commenting on or criticising the statements of others concerning the strike within the borders of my State, which I hope has subsided, but I am impressed with the fact that these conditions are still active, and that it behooves Senators, as well as the public in general, to suspend their judgment and to extend to the people of Colorado that patience and charity which are always helpful to the subsidence of an inflamed local sentiment.

The situation in Colorado to-day is so well outlined in a communication to the New York Herald that I shall read two short extracts from it. It was sent from the city of Denver.

> The Federal troops are here solely to restore and preserve order. The district in which they are encamped is not to be declared under martial law. In other words, the military will not assume the functions of government, but will render what is essentially a police service, the restoration of law and order.
>
> All over the State sighs of relief have been breathed. The coming of the Government troops has been like a benediction to this war-haunted

Commonwealth. Just now the great thing, it is recognized, is to calm the fighting camps, restore a more normal mental attitude on all sides, and reduce the supplies of powder and bullets and rifles among employees and strikers. After this the subject of the controversy itself can be approached.

Meanwhile, although peace has come, there is no indication of a spirit of compromise or conciliation on either side.

NO ORDINARY STRIKE.

The observer of events who comes to Colorado to get a comprehensive survey of the situation is appalled at the outset by its complexities.

It is no ordinary strike, with all the details on the surface, but it is an industrial war, the culmination of deep-seated troubles, and it ramifies in many directions.

Politics has a bearing on it as well as industrial conditions, and to get a real perspective it appears that one must go far back into history.

* * * * * * *

SEARCH FOR FACTS IS ARDUOUS.

In trying to get a broad view of the cause of the Colorado trouble, the various steps in the progress of the strike and their meaning, the search for the actual facts is necessarily arduous.

Each side has a different version. About the only thing that both agree upon is that the strike in the southern zone started September 23, 1913. For the rest there is an amazing conflict of stories, not that there is any apparent effort on either side to suppress the facts or to distort them. Leaders on both sides give their version and then cheerfully counsel the inquirer to check up on every statement they have made.

It seems to be the natural outcome of a fight that has proceeded with such passion on both sides that mental processes have become abnormal. The intensity of the hatred that the struggle has engendered is almost unbelievable. This morning I talked with men who almost wept with fury when speaking of the other side. One man broke off in the middle of a conversation and excused himself from continuing it, saying that his feelings might lead him into an intemperance of statement that would make his observations valueless.

Others were not so restrained, and the net result of a long day's work is a mass of contradictory information.

It is a question of unraveling the facts slowly, and that is what these articles will attempt to do without bias, varnish, or prejudice.

To begin with, What is the real issue of this great industrial controversy? What is the trouble all about?

I am sure, Mr. President, that this is not an overdrawn sketch of the mental attitude of people in my State or of the bitterness and passion which have been engendered by this terrible and unfortunate conflict. As a consequence there rests a duty upon the people of the country and upon public men to abstain from impulsive expressions of opinion and from drawing conclusions which if given publicity may only serve to continue this unhappy strife and possibly make the work of the Federal troops and the Federal Government more difficult than would otherwise be the case.

The people of the State of Colorado are American citizens just like those in other States—Americans born or Americans naturalized. They have the same stake in constitutional government; and, disguise it as we may, the supremacy of the State government has there been imperiled and almost overthrown. It must be reasserted, because in its final analysis the stability of the government is an essential condition to the security of all men and to the accomplishment of all needed changes and reforms. Therefore the first duty of the people of Colorado, assisted now by the Government, is to restore the imperiled authority which finds expression in the normal exercise of the functions of properly constituted officials.

If this were a purely local issue, Mr. President, I might not feel so seriously about it, but the causes of the trouble are not confined to the State of Colorado. They extend almost universally through the country, and it is by no means improbable that a prolongation of the passion and the bitterness there now so rife may involve other Commonwealths in their deadly circuit and other States be face to face with the same terrible conditions.

I have, Mr. President, since the 20th day of April been in receipt of more telegrams and letters than I perhaps could safely enumerate, coming from all sorts and conditions of people, expressing many divergences of sentiment, but to some extent a unit in the fact that whoever commenced the conflict of the 20th day of April at Ludlow camp incurred the awful and terrible responsibility of all that has since ensued, and that it is the duty of the people there, fortified as they will be by the discriminative judgment of public opinion, to ascertain who is so responsible, that the world may know and place the blame upon the shoulders which should carry it.

I trust, therefore, Mr. President, that Senators will extend to the Commonwealth of Colorado, one of the great States of the Union, patience and forbearance of public expression of sentiment, of criticism, or of imputation until all the facts appear. This will aid in quelling the awful condition, accounts of which have filled the public prints and which perhaps may continue, as I have stated, if fanned into further flames by unseemly indulgence in crimination and recrimination.

I should add, Mr. President, before taking my seat, because I want to give credit where credit is due, that the American Smelting & Refining Co. are the owners and operators of a coal camp almost in the center of this disturbed district. My information is that this camp has not been disturbed for a single moment from the commencement of the unfortunate strike on the 23d day of September down to the present hour. I am told that their men seem to be contented; that they have continued their operations and, on the other hand, have not been interfered with.

I am told that the company operates under a system of pensions, which became operative with men after they have served for a certain length of time, and it may be that this little ray of sunshine which has constantly gleamed forth from the lurid fires of warfare and conflagration may light the pathway to some method of procedure and cooperation by which the brotherhood of man can be reestablished and capital and labor continue their work of development side by side.

The VICE PRESIDENT. The Chair, at this moment of calm in the discussion, will state that he fears Senators have forgotten paragraph 3 of Rule XIX, which provides that—

No Senator in debate shall refer offensively to any State of the Union.

The Chair calls attention to that rule now, when there is no excitement about any pending matter in the Senate, upon the theory and in the belief that Senators will not violate the rule and impose upon the Chair the imperative necessity of enforcing it in the future. It is always unpleasant for the Chair to make a suggestion to a Senator that he is out of order, and that is his reason for calling attention to the rule now.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented petitions of sundry citizens of New York City and Astoria, N. Y.; of Manistee, Mich.; of Lansdowne and Pittsburgh, Pa.; of Vincennes, Ind.; and of Poplar Bluff, Mo., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of New York City, N. Y., praying for an appropriation of $164,620 for the maintenance of the Children's Bureau in the Department of Labor, which was referred to the Committee on Appropriations.

Mr. SHEPPARD presented a petition of sundry citizens of Brenham, Tex., praying for the enactment of legislation to provide compensatory time for Sunday services performed by employees of the Post Office Department, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of sundry citizens of Brenham, Tex., remonstrating against the enactment of legislation to compel the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a memorial of sundry citizens of Houston, Tex., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Rosebud, Tex., praying for the enactment of legislation providing for Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

He also presented the petition of Mrs. Frances M. Dunningham, of Bay City, Tex., praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which was referred ot the Committee on the Judiciary.

Mr. SMITH of Maryland presented resolutions adopted by the city council of Baltimore, Md., favoring the adoption of a 1-cent letter postage, which were referred to the Committee on Post Offices and Post Roads.

He also presented petitions of sundry citizens of the State of Maryland, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of Bartenders' Local Union No. 428, of Washington, D. C., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the District of Columbia.

Mr. TOWNSEND presented petitions of the congregations of the First Congregational Church of Pittsford and of the People's Church, of Lansing, and of members of the faculty of the Michigan State Normal College, of Ypsilanti, all in the State of Michigan, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of the Calhoun County Pomona Grange, Patrons of Husbandry, of Battle Creek, Mich., praying for the enactment of legislation to establish a system of rural credits, which was referred to the Committee on Banking and Currency.

He also presented a petition of the congregation of the La-Grave Avenue Christian Reformed Church, of Grand Rapids, Mich., praying for the enactment of legislation to grant a compensatory time privilege to post-office employees, which was referred to the Committee on Post Offices and Post Roads.

Mr. SHIVELY presented a petition of the congregation of the Riverside Christian Church, of Elkhart, Ind., praying for the enactment of legislation to provide Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

He also presented a petition of Atlantic Division, No. 120, Order of Railway Conductors, of Huntington, Ind., praying for the enactment of legislation to further restrict immigration, which was ordered to lie on the table.

He also presented a petition of the Woman's Christian Temperance Union of Dearborn, Ind., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. BRADLEY presented a petition of Local Union, Brotherhood of Railway Trainmen, of Paducah, Ky., praying for the enactment of legislation to further restrict immigration, which was ordered to lie on the table.

He also presented a petition of Local Branch National Association of Vicksburg Veterans, of Chicago, Ill., praying for an appropriation for the celebration of the semicentennial of the ending of the Civil War, which was referred to the Committee on Military Affairs.

Mr. COLT presented petitions of sundry citizens of Pawtucket and Warwick, in the State of Rhode Island, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. PERKINS presented a memorial of Waiters' Local Union No. 30, of San Francisco, Cal., remonstrating against the existing conditions in the mining district of Colorado, which was referred to the Committee on Education and Labor.

He also presented a petition of Victor Valley Chamber of Commerce, of San Bernardino, Cal., praying for an appropriation for the development of the water power of the Mojave River, in the Victor Valley, which was referred to the Committee on Irrigation and Reclamation of Arid Lands.

Mr. OLIVER presented petitions of sundry citizens of Pennsylvania, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Pennsylvania, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry unions of the United Mine Workers of Pennsylvania, praying for an investigation into the conditions existing in the mining districts of Colorado, which were referred to the Committee on Education and Labor.

He also presented a petition of Washington Camp, No. 576, Patriotic Order Sons of America, of Halifax, Pa., praying for the enactment of legislation to further restrict immigration, which was ordered to lie on the table.

He also presented a petition of North Lodge, No. 2, International Order of Good Templars, of Braddock, Pa., praying for an appropriation for the erection in the city of Washington of a monument to the memory of Capt. John Ericsson, which was referred to the Committee on the Library.

Mr. McLEAN presented memorials of sundry citizens of Hartford, Conn., commending the action of the President in accepting the offer of mediation looking to a peaceful solution of the Mexican difficulties, which were referred to the Committee on Foreign Relations.

He also presented the memorial of H. C. Blinn, of Southington, Conn., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. PAGE presented a petition of sundry citizens of the State of Vermont, praying for the adoption of certain amendments to the postal and civil-service laws, which was referred to the Committee on Civil Service and Retrenchment.

Mr. BURLEIGH presented petitions of sundry citizens of Pemaquid Harbor; of John P. Hill Grange, Patrons of Husbandry, of Eliot; of Salus Lodge, Independent Order of Good Templars, of Kennebunk, all in the State of Maine, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. MARTIN of Virginia. I present a joint resolution adopted by the Legislature of the State of Virginia, which I ask may be printed in the RECORD and referred to the Committee on Military Affairs.

There being no objection, the joint resolution was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

Joint resolution in reference to the establishment and maintenance of a national park on the battle fields of Fredericksburg, Spotsylvania Court House, Chancellorsville, and the Wilderness.

Whereas the senior Senator from Virginia has been for years laboring to secure an appropriation by the National Government to establish and maintain a national park in Spotsylvania County on the historic and hallowed ground where were fought the great battles of Fredericksburg, Spotsylvania Court House, Chancellorsville, and the Wilderness; and

Whereas in this worthy and patriotic endeavor he now has the enthusiastic and able support of our junior Senator and the Congressman from the first Virginia district, who are together laboring to have the National Government preserve these great battle fields and connect them by improved highways, thus rendering them accessible to visitors and suitable for Army maneuvers and students of military science in the shortest possible time; and

Whereas these historic battle fields have the sad distinction of having more men killed on them than any other similar area on the face of the globe, and by reason of the heroism and devotion to duty of those from every part of the Union who fought and bled and died there they are sacred to the memory of not only all Virginia people and those of the Southland, but to all Americans everywhere, and are the common heritage of our great united and inseparable Nation; and

Whereas it is highly proper that our National Government should maintain them as a shrine for all time to venerate and all generations to study and adore: Therefore be it

Resolved by the House of Delegates of Virginia (the Senate concurring), That our representatives in the National Congress above named are most enthusiastically indorsed and encouraged in their efforts in this great and patriotic cause, and the several Members of the National Congress representing this Commonwealth are respectfully requested to do what they think proper to aid in securing this action by our National Government, and that a copy of this resolution be forwarded to each Member of Congress.

Agreed to by house of delegates March 13, 1914.

JOHN W. WILLIAMS,
Clerk of the House of Delegates.

Agreed to by senate March 14, 1914.

O. V. HANGER,
Clerk of the Senate.

Mr. MARTIN of Virginia presented a memorial of the Retail Clerks' International Association, of Newport News, Va., remonstrating against an appropriation of $400,000 for the Philadelphia and Boston Navy Yards, which was referred to the Committee on Naval Affairs.

REPORTS OF COMMITTEES.

Mr. SHIVELY, from the Committee on Pensions, submitted a report (No. 472), accompanied by a bill (S. 5446) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, which was read twice by its title, the bill being a substitute for the following pension bills heretofore referred to that committee:

S. 170. Hiram Strayer
S. 250. Cornelia F. Lintleman.
S. 252. Mary B. Edwards.
S. 300. Melly L. Ford.
S. 324. Delia Wight.
S. 330. Elizabeth J. Braman.
S. 358. Bridget D. Farrell.
S. 379. Emma E. Edgerton.
S. 436. Anna M. Fowler.
S. 442. Mary J. Irons.
S. 451. Anna Nicholson.
S. 515. Nathaniel Little.
S. 629. Margaret J. Roberts.
S. 715. Cornelia Cayton.
S. 933. Carrie H. Chace.
S. 971. Emmett Langston.
S. 981. Milton Cobler.
S. 1116. Delight A. Allen.
S. 1333. Margaret J. Woodworth.
S. 1581. Rebecca J. Manning.
S. 1660. Mary L. Parker, formerly Landers.
S. 1825. Mary Britton.
S. 1980. Martina M. de Sanchez.
S. 2008. Verona H. Coon.
S. 2026. Charles A. Voorheis.
S. 2418. Sophia M. Pollock.
S. 2526. Henrietta Doolittle.
S. 2805. Jennie A. Norton.
S. 2881. Francis G. Newton.
S. 2914. Catherine E. Stamp.
S. 3167. Mary H. Kennedy.
S. 3327. Anna Denison.
S. 3329. Mary L. Gaffney.

S. 3333. Mary L. Latham.
S. 3441. William H. Stewart.
S. 3566. Jeremiah Robbins.
S. 3567. Mary J. Schenck.
S. 3702. Catharine Ewing.
S. 3709. Charles Kretchmar.
S. 3840. Lilla A. Holliday.
S. 3842. William H. Marsden.
S. 3862. Anna O. Stanton.

S. 5312. Merritt Perham.
S. 5317. Robert S. Parker.
S. 5320. William H. H. Beadle.
S. 5321. James D. Bennett.
S. 5338. Alexander Curd.

Mr. WARREN, from the Committee on Military Affairs, to which was referred the bill (S. 5065) to correct the military record of Mirick R. Burgess, reported it with an amendment and submitted a report (No. 473) thereon.

Mr. LEA of Tennessee, from the Committee on Military Affairs, to which was referred the bill (S. 146) for the relief of Aaron Kibler, reported it with an amendment and submitted a report (No. 474) thereon.

Mr. HITCHCOCK, from the Committee on Military Affairs, to which was referred the bill (H. R. 1291) for the relief of George Gardells, reported it without amendment and submitted a report (No. 476) thereon.

He also, from the same committee, to which was referred the bill (S. 1751) providing for the presentation of medals to all surviving soldiers of the Battle of Gettysburg, reported adversely thereon and the bill was postponed indefinitely.

THE AMERICAN NATIONAL RED CROSS.

Mr. CHAMBERLAIN. From the Committee on Military Affairs I report back favorably without amendment the joint resolution (H. J. Res. 242) authorizing the Secretary of War and the Secretary of the Navy to loan equipment, for the purpose of instruction and training, to sanitary organizations of the American National Red Cross. I ask for the immediate consideration of the joint resolution.

Mr. McCUMBER. Mr. President the Senator from Nebraska [Mr. NORRIS] has given notice of his intention to speak this morning, and he desires to close his remarks by 2 o'clock, when the unfinished business will come up. While there is to be no debate and it is a very short measure, I will not raise an objection at this time; I give notice now that I shall exercise that right in the case of other matters which may come up.

Mr. CHAMBERLAIN. I will state that this is a measure in the interest of the Red Cross and its work. The joint resolution has already passed the House and the American National Red Cross are very anxious to have it acted upon by the Senate.

The VICE PRESIDENT. The joint resolution will be read.

The Secretary read the joint resolution; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LANDS IN CADDO COUNTY, OKLA.

Mr. PITTMAN. From the Committee on Public Lands I report back favorably, without amendment, the bill (H. R. 9829) authorizing the Secretary of the Interior to sell certain unused, remnant lands to the board of county commissioners of Caddo County, Okla., for fair ground and park purposes, and I submit a report (No. 475) thereon.

As it is purely a local matter, affecting a town in Oklahoma, as there will be no contest on it, as there was none in the Public Lands Committee, as the bill has passed the other House, and has been favorably reported by the committees of both Houses, and has the approval of the Department of the Interior, I ask for its present consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. McCUMBER. I think the bill can go over until to-morrow, and I object.

The VICE PRESIDENT. Objection is made, and the bill goes to the calendar.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMITH of Arizona:

A bill (S. 5447) authorizing the Secretary of the Treasury to confer upon Marcus A. Jordan the life-saving medal of the first class (with accompanying papers); to the Committee on the Library.

By Mr. KENYON:

A bill (S. 5448) to repeal the act to incorporate the General Education Board; to the Committee on Education and Labor.

By Mr. McCUMBER:

A bill (S. 5449) to make Pembina, N. Dak., a port through which merchandise may be imported for transportation without appraisement; to the Committee on Commerce.

By Mr. SHERMAN:

A bill (S. 5450) granting an increase of pension to Nancy Matsel;

A bill (S. 5451) granting a pension to Monroe Cole;

A bill (S. 5452) granting a pension to Eliza A. Gordon; and

A bill (S. 5453) granting an increase of pension to Marcus E. Ferguson; to the Committee on Pensions.

A bill (S. 5454) to appropriate $300,000 for additions to and enlarging the Federal building at Springfield, Ill.; to the Committee on Public Buildings and Grounds.

By Mr. PITTMAN:

A bill (S. 5455) granting an increase of pension to Thomas Kiernan; to the Committee on Pensions.

By Mr. HITCHCOCK:

A bill (S. 5456) to correct the hospital record of Robert McFarland; to the Committee on Naval Affairs.

A bill (S. 5457) granting a pension to Vesta V. Holden; to the Committee on Pensions.

By Mr. OLIVER:

A bill (S. 5458) granting an increase of pension to John Winebark (with accompanying papers); to the Committee on Pensions.

By Mr. McLEAN:

A bill (S. 5459) granting an increase of pension to William R. Latimer (with accompanying papers); to the Committee on Pensions.

By Mr. BURLEIGH:

A bill (S. 5460) granting a pension to John F. Haines; to the Committee on Pensions.

By Mr. JONES:

A bill (S. 5461) for the relief of the heirs of Ari Cantrell (with accompanying paper); to the Committee on Indian Depredations.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. MARTINE of New Jersey submitted an amendment proposing to increase the salary of 16 privates on the police force for the Senate Office Building from $1,050 each to $1,200 each, etc., intended to be proposed by him to the legislative, etc., appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. JONES submitted an amendment proposing to appropriate $6,500 each for three commissioners, Civil Service Commission, etc., intended to be proposed by him to the legislative, etc., appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. GORE submitted an amendment proposing to increase the salary of the Commissioner of the General Land Office from $5,000 to $7,500 per annum, intended to be proposed by him to the legislative, etc., appropriation bill, which was referred to the Committee on Appropriations.

He also submitted an amendment proposing to increase the salary of the captain of the Capitol police from $1,800 to $2,000 per annum, intended to be proposed by him to the legislative, etc., appropriation bill, which was referred to the Committee on Appropriations.

He also submitted an amendment authorizing the Secretary of the Interior to make a per capita payment of $15 to the members of the Cherokee Tribes of Indians in Oklahoma out of the tribal funds now on hand, intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

OMNIBUS CLAIMS BILL.

Mr. SHEPPARD submitted four amendments intended to be proposed by him to the omnibus claims bill, which were ordered to lie on the table and be printed.

Mr. LODGE submitted an amendment intended to be proposed by him to the omnibus claims bill, which was ordered to lie on the table and be printed.

THE AMERICAN MERCHANT MARINE (S. DOC. NO. 476).

Mr. McCUMBER. I have here an analysis and explanation, prepared by Andrew Furuseth, president of the American Seamen's Union, dealing with the American merchant marine and the London convention on safety of life at sea. It is so arranged that the treaty will appear in one column and the objections of that organization and the explanations in a corresponding column. It is very short, and I ask that it may be printed as a document for the use of the Senate.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it will be so ordered.

PANAMA CANAL TOLLS.

Mr. O'GORMAN. Mr. President, I wish to give notice that on to-morrow I shall move that House bill 14385, relating to Panama Canal tolls, be taken up for consideration.

Mr. BRISTOW. Mr. President, I desire to give notice that on Wednesday, May 6, following the remarks of the Senator from Kentucky [Mr. BRADLEY], and if I can find an opportunity, I shall address the Senate on the Panama Canal tolls bill.

Mr. O'GORMAN. Mr. President, I desire to give notice that on Thursday next, the 7th instant, after the routine morning business, I shall address the Senate on the subject of the Panama Canal tolls.

AGRICULTURAL EXTENSION WORK.

Mr. SMITH of Georgia. Mr. President, yesterday, on the motion to lay on the table a motion to reconsider the action of the Senate approving the report of the committee of conference with reference to the agricultural extension bill, I voted. I did not then observe that the Senator from Massachusetts [Mr. LODGE], with whom I have a general pair, was out of the Chamber and had not voted. My vote, however, did not affect the result.

The VICE PRESIDENT. The motion to reconsider the vote by which the conference report on the agricultural extension bill was adopted having been laid on the table, the Chair orders the bill returned to the House of Representatives.

Mr. TOWNSEND. Mr. President, I desire to call attention briefly to a matter which was before the Senate on yesterday and the day before, with the idea that the Senate may understand whether absolute good faith was maintained in the Senate toward those Senators who had asked for a reconsideration of the vote on the agricultural extension work conference report.

It appears that the report of the committee of conference was made on Monday last, late in the afternoon, when very few Senators were in the Chamber. There was no discussion of it; no Senator, save the members of the conference committee, knew what was in it. The report was adopted. When the RECORD on the following day disclosed that action, the attention of the Senate was called to the fact that certain Senators who had been interested in a provision which had been unanimously adopted by the Senate when the bill was before the Senate but rejected by the conference committee, would like to have an opportunity to be heard upon it, the Senator from Georgia [Mr. SMITH] said that he would not agree to a unanimous consent to have the report recalled, but that it could be done upon motion. The motion was made.

After some discussion and various attempts to get the matter before the Senate so that it could be discussed, a vote was taken, and the motion was carried for the recall of the conference report. Shortly after that the Senator from New Hampshire [Mr. HOLLIS] moved to reconsider the vote by which the conference report was ordered recalled. After some discussion the Senator from Georgia used this language:

I would not want it done—

I am reading now from page 7427 of the CONGRESSIONAL RECORD of April 29, where the Senator from Georgia stated that he would not wish to cut off debate; that he would not wish to take an advantage of any of the Senators; and he said:

I would not want it done, unless the Senate was really in favor of it; and under the circumstances, if the Senator is willing, I will ask the Senator from New Hampshire [Mr. HOLLIS] to withdraw his motion to reconsider. I think by unanimous consent it could be withdrawn. We would have defeated the motion; the Senator from New Hampshire would have voted with us, as he stated to the Senate; but since the statements made upon the floor by the Senator from Iowa [Mr. CUMMINS] I would not myself feel entirely happy if he did not have the opportunity to let this bill be brought back here and be discussed on a motion to reconsider. It seems to me that on that motion we can fully discuss the subject, test out the sentiment of the Senate, and, I hope, decline a reconsideration of the bill, and send it right back to the other House and pass it.

The conference report was brought back here from the House, a motion to reconsider was entered, and the Senator from Georgia moved to table that motion, thus effectively cutting off all debate.

Mr. SMITH of Georgia. Mr. President, let me interrupt the Senator just for a moment. I did not move to table the motion to reconsider until the Senate had ordered the yeas and nays on the motion itself and until it seemed to be apparent that no Senator was seeking to speak. I preferred to make the motion to lay on the table before the motion on the main question was submitted, because it gave me two opportunities to be sure that Senators were here. I did not offer that motion at once. I did not offer it until there had been a call of the Senate and a vote by the yeas and nays had been ordered on the motion to reconsider.

Mr. TOWNSEND. Mr. President——

Mr. SMITH of Georgia. Just a moment. Then, as it seemed that a vote was about to be taken, anyhow, without discussion, I substituted the motion to lay on the table.

Mr. TOWNSEND. Mr. President, the situation is clearly before the Senate, and I think all Senators who were present understood exactly what the object of the Senator from Georgia was. The motion to reconsider had been made. The Chair had decided that that motion was not debatable. That came about just as I entered the Chamber. There was absolute good faith on the part of Senators who wanted to discuss this measure; there was no disposition to delay action, but there seemed to be a desire to pass this bill or to dispose of the motion to reconsider in such a way that there could be no discussion of the subject.

I do not believe it was treating Senators fairly not to reconsider when debate would have been in order. I do not believe that the Senate would have approved the action which was taken if it had understood exactly what the situation was. It was not fair treatment of Senators who wished to

present the great principle involved in this bill before the Senate and before the country. It was simply a common courtesy which we were asking; yet it was denied us under the parliamentary tactics which I have described and which are set out in the RECORD. I simply want to call attention to this matter in order that the Senate may know exactly what was done in connection with that conference report.

Mr. SMITH of Georgia. Mr. President, I do not exactly understand what the Senator from Michigan means by his remarks, but I wish to say that, so far as the motion which I made to lay the motion to reconsider on the table is concerned, it was only made, as I have stated, after the Chair had ruled that there could be no debate; with this ruling I had no connection. I did not invoke it, and I did not know it would be made until it was made. There was no appeal by any Senator from the decision of the Chair. The rules make the motion to reconsider debatable. If Senators wished to speak, they should have called attention to the rules. If the Senator means that I cut Senators off from debate or that I did not treat them fairly, I resent the suggestion, because it is uncalled for and it is an unjust suggestion.

PANAMA CANAL TOLLS.

THE PANAMA CANAL TOLLS DISPUTE, ITS ECONOMIC ASPECT, AND ITS ARBITRATION.

THE QUESTION INVOLVED.

Mr. NORRIS. Mr. President, whether there should be any discrimination in the way of partial or total exemption from tolls in favor of American vessels when passing through the Panama Canal presents for our consideration two questions—one of national scope, dealing with the economic problem as to whether or not it is a good national policy to exempt our vessels from tolls and pay the expense of putting such ships through the canal out of the National Treasury. The other question is international in its scope, and deals with the construction to be placed upon the treaty with Great Britain of November 18, 1901, commonly known as the Hay-Pauncefote treaty. I shall take these questions up separately.

THE ECONOMIC QUESTION.

In the discussion of the first question—the economic question—as to whether the exemption of American vessels from the payment of tolls is economically fair and right, let us forget entirely the international question involved. Let us assume, for the purpose of discussing this point, that there is no international question, and that no other nation except our own Nation has any concern or has any right to be concerned in the settlement of the tolls question.

THE EXISTING LAW.

The act of August 24, 1912, making provision for the government of the Canal Zone, provided, among other things, that "no tolls shall be levied upon vessels engaged in the coastwise trade of the United States." In the same section authority is given to the President to fix the rate of tolls that shall be charged other vessels going through the canal. The President, of course, has no authority to levy any tolls on coastwise vessels. The law, as above quoted, specifically exempts such vessels from the payment of tolls, but the President is not required by the law to fix the same toll upon all other vessels passing through the canal. His authority in this respect, under the law, as to ships of commerce is found in the following language contained in the same section of the law:

> When based upon net registered tonnage for ships of commerce the tolls shall not exceed $1.25 per net registered ton, nor be less (other than for vessels of the United States and its citizens) than the estimated proportionate cost of the actual maintenance and operation of the canal.

It will be seen, therefore, that the President, under the law, is directed to fix the tolls at not more than $1.25 per ton and at not less per ton than the estimated proportionate cost of the maintenance and operation of the canal. This minimum does not, however, apply to vessels of the United States and its citizens; but the President has the authority under this law to fix tolls for American vessels at a nominal figure, and it will be noted that this has no reference to coastwise vessels, but means American vessels engaged in the foreign trade. It can not mean coastwise vessels, because they are specifically provided for wherein it is stated that no tolls whatever shall be charged them. He could, for instance, under this law, fix the tolls on American vessels engaged in the foreign trade at a nominal figure. He would have a right to say that American vessels engaged in foreign trade passing through the canal should pay tolls at the rate of 1 cent per net registered ton. The President has not exercised this discretion, it is true, and in the order now in force, made by the President in pursuance of this law, he has fixed tolls upon American vessels engaged in foreign trade the same as upon foreign vessels, and under the authority thus given him he has fixed the toll at $1.20 per net registered ton. But there can be no doubt whatever that under the law he has the right, if he sees fit, to discriminate in favor of American vessels engaged in the foreign trade and, for all practical purposes, to put them upon the same basis with vessels engaged in the coastwise trade by making the toll so low that it would be for practical purposes absolutely free. I call particular attention to this point because the discussion, so far as it relates to the economic question, both here and in the country at large, has related almost entirely and exclusively to the exemption of coastwise vessels. The principle involved is just the same as though the law specifically provided that no tolls should be levied upon any American vessels, whether in the coastwise trade or in the foreign trade, because, while the coastwise vessels must be free, the President has the authority to levy a toll so low upon American vessels engaged in foreign trade that, for practical purposes, they will be free also.

THE EFFECT OF THE PENDING BILL.

The bill now before the Senate, and which has passed the House, contains two sections. Section 1 amends the existing law by striking out of the law the words "no tolls shall be levied upon vessels engaged in the coastwise trade of the United States."

If this section alone were passed, then the President would be required under the law to fix a toll upon coastwise vessels the same as on all other American vessels; and in fixing the tolls he could, as I have shown, discriminate in favor of American vessels to such an extent as to make them all practically free. But section 2 of the bill now before us amends the provision of the law referring to American ships engaged in the foreign trade, and in the place of the language which I have quoted applying to such ships it would insert the following language:

> When based upon net registered tonnage for ships of commerce the tolls shall not exceed $1.25 per net registered ton nor be less than 75 cents per net registered ton.

In order that the effect of the passage of the bill now before the Senate upon existing law may be clearly pointed out and understood I will insert in parallel columns the exact changes that are made in existing law by the passage of the pending bill.

EXISTING LAW.	SECTION 1 OF THE PENDING BILL.
No tolls shall be levied upon vessels engaged in the coastwise trade of the United States.	This section repeals this clause now exempting coastwise shipping.
Existing law relating to all tonnage excepting coastwise shipping:	Section 2 of the pending bill strikes out this clause in existing law and inserts in lieu thereof the following:
"When based upon net registered tonnage for ships of commerce the tolls shall not exceed $1.25 per net registered ton nor be less (other than for vessels of the United States and its citizens) than the estimated proportionate cost of the actual maintenance and operation of the canal, subject, however, to the provisions of article 19 of the convention between the United States and the Republic of Panama, entered into November 18, 1903."	"When based upon net registered tonnage for ships of commerce the tolls shall not exceed $1.25 per net registered ton nor be less than 75 cents per net registered ton, subject, however, to the provisions of article 19 of the convention between the United States and the Republic of Panama, entered into November 18, 1903."

COASTWISE SHIPPING A MONOPOLY.

If we are to exempt any American ships, I would much prefer to exempt American ships engaged in foreign trade than to exempt American ships engaged in the coastwise trade. We have provided by law that no foreign ships can engage in our coastwise trade. That means that no foreign ship has the right of carrying freight or passengers from one American port to another American port. The law provides that only American vessels can engage in this business, and there can be no competition from foreign vessels. American ships engaged in foreign trade must compete with ships of the entire world.

However, at the present time no man can tell with any degree of accuracy what the tonnage passing through the Panama Canal is going to be. From the very nature of things, such estimates, even by the so-called experts, can be little more than guesses. No man is able to say just what the expense of the maintenance and the operation of the canal is going to be. It has been estimated all the way from five to ten millions of dollars. After the canal has been in operation a few years it will be then definitely known just what the expense of maintenance and operation is and what the annual tonnage passing through the canal is, and it will be possible to estimate with great accuracy what the tonnage of the future will be. It seems to me that before we undertake to exempt any shipping from tolls or to discriminate in favor of any vessels we ought at least to operate the canal without discrimination and without exemption long enough to know what the expense is going to be and what the tonnage passing through the canal is going to be.

I am opposed to the exemption of American coastwise shipping because I believe it to be fundamentally and economically unjust and unfair. We have built the canal at an enormous ex-

pense. In round numbers, it has cost the taxpayers of the United States nearly $400,000,000. Its operation, protection, and sanitation will cost the taxpayers annually millions of dollars in addition to the original outlay. Why should the people of the country be required to expend through taxation these enormous amounts without requiring any contribution from the men and the corporations that will receive a direct benefit therefrom? We have already said to the coastwise shipper, "We will give you a monopoly in your business and protect you from competition with the outside word," and it is now demanded that in addition to this the taxpayers of the country, who have constructed this waterway, shall be required to give to these people not only its free use but to actually pay the expense of putting their ships through the canal.

The actual expense of putting a ship through the Panama Canal will amount to considerable. No man can tell now just what that expense will be, but under the law when a ship desires to pass through the canal it will be taken in charge by Government officials, who will have charge of the vessel until it emerges on the other side. When a ship passes through the locks the power of propulsion will be furnished by four electric engines operated on railways located on the banks of the locks. The electricity for the power will be supplied from water power developed at the adjacent dam. It will require a small army of experts to maintain the buoys, the lights, and to look after the various other necessary instrumentalities of operation. It will require a large number of high-salaried men to look after the sanitation of the zone. If but few ships pass through the canal, the actual expense proportioned to each vessel will be proportionately much larger than though there were a larger number of ships. The minimum amount of cost to put a vessel through the canal will be attained only when there is a maximum use of the canal. This army of men and all the other utilities must be maintained whether there is one ship or a hundred ships to pass through the canal. The annual expense for the Government will be practically the same whether there are but few vessels or many vessels that pass through.

WHAT IS A NET REGISTERED TON?

Before I proceed further with the discussion of this question it is important that I should show the difference between an actual ton in weight and the meaning of the phrase in the law, a "net registered ton." The term "net registered ton" is, in many respects, misleading. It has no reference whatever to the weight of anything. It has no connection with the weight of the freight that the ship is carrying or the weight of freight that it can carry. It means the capacity in cubic feet of the freight and passenger carrying possibilities of the vessel. One net registered ton means 100 cubic feet of freight or passenger space. When freight is shipped, it is shipped according to the real weight, and the computation is made on large quantities by the ton and on smaller quantities by the pound; but when a ship passing through the canal pays toll it pays on the net registered tonnage—that is, it pays $1.20 for a hundred cubic feet of freight capacity. Upon most freight that is carried there is a great deal more than 1 ton in weight contained in 1 net registered ton. A net registered ton of coal will be between 2¼ and 2½ actual tons. A net registered ton of raw sugar will contain 2½ tons of actual weight of sugar. A net registered ton of wheat will contain about 2¼ actual tons in weight.

It will be found upon investigation that nearly every commodity that will likely be shipped from one coast to the other through the Panama Canal and which is sold on the market by weight will consist of heavy articles, wherein there will be from 2 to 4 tons actual weight contained in every net registered ton. Coal, iron ore, steel, machinery, wheat, dry goods, clothing, canned goods, and similar articles will constitute a large proportion of the shipping, and in practically every instance it will be found that it will take from 2 to 4 tons of actual weight to make a net registered ton. Prof. Johnson, of the University of Pennsylvania, formerly one of the canal commissioners, and regarded, I think, the world over as perhaps the best authority on this question, he having been appointed by the President to make a study of the subject with a view of fixing a basis for tolls, has said that after an exhaustive examination of the world's trade he reached the conclusion that, on an average, the world over, it took 1¾ tons actual weight to constitute 1 net registered ton. Prof. Johnson thinks that, from the nature of the traffic that will likely pass through the canal, it will take on an average 2 tons of actual weight to constitute 1 net registered ton. In all figures that are given in this discussion it will be important and necessary to bear this distinction in mind. For all practical purposes, with some exceptions, of course, it will be safe to say that when we speak of paying $1.20 toll per net registered ton we will in fact mean 60 cents per ton for the actual weight of the cargo.

Mr. CUMMINS. Mr. President, will the Senator from Nebraska yield for a question?

Mr. NORRIS. Yes; I yield to the Senator.

Mr. CUMMINS. I simply wish to ask whether those figures of Prof. Johnson are not given upon the assumption that the vessel is loaded to its capacity?

Mr. NORRIS. Yes, sir. I have, as I state further on in the estimates, and also in this estimate, allowed for a vessel occasionally, perhaps frequently, passing through that is not loaded to its full capacity. I presume there will be vessels passing through that are loaded beyond their registered capacity, too; so that, of course, it is only an estimate, but in my judgment it is a very liberal one. In my judgment, 60 cents per ton of actual weight will be more than will be paid on the average when they are paying $1.20 per registered ton.

Mr. BRISTOW. Mr. President——

Mr. NORRIS. I yield to the Senator from Kansas.

Mr. BRISTOW. I think if the Senator will investigate the amount of tonnage that is carried by merchant vessels he will find that he is mistaken. He will find in the hearings that in the case of the ships that ply between the port of Boston and Europe, if this rule of $1.20 per net ton had been applied, the tolls would have been all the way from 95 cents to $2.60 per ton on the merchandise or tonnage carried.

Mr. NORRIS. I presume that is true under the conditions that exist now and that have existed in the past. When the canal is finished there will be handled more and a different class of freight. Of course I give it only as an estimate. In my judgment it is a liberal one. When the canal has been in operation a few years we will know just what the facts are in regard to it. Even though we said the actual payment would be a dollar or $1.20, however, the difference would be only one of degree; and, as I think, as I shall be able to show, it would have an effect only in degree, and would result only in additional profit to the men engaged in the business.

Mr. BRISTOW. Of course I shall not attempt to argue the question with the Senator. I utterly disagree with him, as he knows.

Mr. NORRIS. Yes; I understand that.

Mr. BRISTOW. I did not think, however, that the Senator wanted to make a statement which the experience of merchant vessels in actual operation would contradict, as shown by the data that have been submitted to the committee.

Mr. NORRIS. The experience, as I understand, taking the entire world into consideration, and all the shipping of the world, is that it takes on an average about 1¾ tons of actual weight to make a net registered ton. I think it is safe to estimate that the difference will be greater in the case of the freight that will pass through the Panama Canal, for the reason that in the world average is included the weight of the actual freight in a net registered ton shipped between points where there can not be any competition from the railroads. The world average includes all freight shipped between points where all freight must go by water. Shipment through the canal will include only commodities suitable for water carriage. Light articles will mostly be shipped by rail.

In other words, all freight shipped from Boston to Europe must go by water. Freight shipped across our country, instead of going through the canal by water, can go by railroad. It will often occur, perhaps, in the experience of the future that the railroads will get shipments for the reason, among others, that there is not enough freight to load a ship or that the ship's time is such, since ships will not sail every day, that it would be more economical even to pay a higher rate of freight to ship the article at once across the country by railroad than to wait perhaps for a week until a ship would be ready to start on the voyage.

Mr. O'GORMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from New York?

Mr. NORRIS. Yes; I yield to the Senator.

Mr. O'GORMAN. Does not the Senator think that where the boats belong to a regular line, running on schedule dates, a boat very frequently will not have a cargo even to her capacity?

Mr. NORRIS. Yes; I think that is true. I agree with the Senator on that point. I think, also, that the ship sometimes would be overloaded—loaded to more than her registered capacity.

Mr. O'GORMAN. In the opinion of the Senator, would that happen frequently?

Mr. NORRIS. Perhaps not so frequently as the other. I think it would depend a great deal on the schedule. If there was a ship going once a day, it would be vastly different from the condition if there were a ship going once a month only.

Mr. O'GORMAN. As the Senator may be aware, if he has read the testimony taken before the Committee on Interoceanic Canals, sometimes ships with 5,000 tons capacity have an actual cargo of only 2,000 or 2,500 tons, and in a case such as that, where there is any substantial difference between the capacity and the actual cargo, the figure fixed in the President's proclamation—$1.20 per ton—will not begin to represent the actual cost imposed upon each ton of actual cargo in the ship.

Mr. NORRIS. I think that will occur sometimes, but not often.

Mr. O'GORMAN. Because, as the Senator perhaps may have stated—I am not aware whether he has or not; I did not have the pleasure of hearing him from the beginning of his address—however small the cargo, if there be but 500 pounds of cargo, or if there be but a single pound of actual cargo, under the proclamation of President Taft, fixing rates through the canal, tolls must be paid upon the carrying capacity, whether it be 5,000 or even 10,000 tons.

Mr. NORRIS. Yes; there is not any dispute about that.

Mr. O'GORMAN. That would have a very important bearing upon the estimate that the Senator made a moment ago.

Mr. NORRIS. Yes. I have taken that into consideration as well as I can. As I said, even though we take the figures given by the Senator from Kansas [Mr. BRISTOW], for instance, and assume that the figure will be as high as 90 or 95 cents—I have forgotten which he said—in the view that I take of the matter it will only make a difference of a small degree. If every ton of freight had to pay the full $1.20 per net registered ton—and everybody admits that it will not be that bad—but even if that had to be done, as I look at the question, there would still be no reason, and I think I can demonstrate it, why the taxpayers of the country should not require the shipper to pay the tolls.

So that if we pass this law and therefore do not exempt our coastwise shipping, it will simply mean that all the freight in our coastwise business that goes from one ocean to the other through the canal under the present regulations fixed by the President will pay on an average, after making due allowance for vessels not fully loaded, 60 cents per actual ton of weight.

EXEMPTION FROM TOLLS IS A SUBSIDY.

Men may honestly disagree as to whether we ought to try to make a profit out of the canal. There may be also an honest disagreement as to whether we should try to get a reasonable amount of interest on our investment in addition to the actual expense of sanitation and operation. But it seems to me there can be no disagreement that as to the actual expense of operation all those who get the direct benefit from such operation ought to contribute their share, and that to exempt our coastwise shipping from this fair, equitable, and reasonable item is unjust to the people of the country who must pay this burden through taxation.

Mr. CHAMBERLAIN. Mr. President——

Mr. NORRIS. I yield to the Senator from Oregon.

Mr. CHAMBERLAIN. Does not the Senator's argument lead to the conclusion that the same rule ought to be applied as to freight that is shipped through any canalized river or other——

Mr. NORRIS. I should like to suggest that that is a question which I shall take up further on. I would rather not be interrupted on that point now. I am going to discuss it later, and would be glad to have the Senator interrupt me then.

Mr. CHAMBERLAIN. Very well. I did not know the Senator was going to touch upon it.

Mr. SUTHERLAND. I should like to ask the Senator a question for my information right at this point in his discussion. Am I correct in understanding that a net registered ton is determined by cubic measurement and not by actual weight?

Mr. NORRIS. Yes; that is correct.

Mr. SUTHERLAND. Do I understand the Senator to say that the ordinary cargo will weigh less than the registered tonnage?

Mr. NORRIS. No; my argument is that it will weigh more.

Mr. SUTHERLAND. It will weigh more?

Mr. NORRIS. I think it is conceded by everyone that it will weigh more on the average. In some cases it might weigh less.

Mr. SUTHERLAND. The average commodity which would be carried will weigh more in actual weight than would be indicated by cubic measurement?

Mr. NORRIS. Yes.

Mr. SUTHERLAND. Can the Senator give us an illustration of some particular commodity?

Mr. NORRIS. Yes; I have already done that.

Mr. SUTHERLAND. I beg the Senator's pardon. I was not here; I came into the Chamber afterwards.

Mr. SIMMONS. Mr. President——

Mr. NORRIS. I yield to the Senator from North Carolina.

Mr. SIMMONS. I should like to suggest to the Senator, in this connection, that the witnesses before the committee in the hearings discussed pretty elaborately the character of traffic that was likely to find a market through the canal, and I do not recall that they mentioned a single subject of commerce through the canal which would not weigh more than 2,000 pounds to a hundred cubic feet vessel space.

Mr. NORRIS. There are such commodities, but there will not be many of them shipped through the canal.

Mr. SIMMONS. I say I do not recall a witness who mentioned a single commodity in the enumeration of freight that would be likely to pass through the canal that would weigh more than 2,000 pounds to a hundred cubic feet of vessel space.

Mr. NORRIS. No; I myself do not know of any that will probably go through the canal. As I was saying, Mr. President, this course is giving to this class of vessels a subsidy just as direct and just as clear as though we paid it to them by direct appropriation. What is the difference whether we make a direct appropriation out of the Treasury to pay the expense of putting a ship through the canal or whether we let the shipowner pay this in the shape of tolls, and then make a direct appropriation for the payment of money to the shipowner? In either case it is a direct subsidy and is paid by the taxpayer. Everybody wants to cheapen freight rates. I have no doubt whatever but what the opening of the canal will have the effect of lowering freight upon transcontinental traffic. There is an item of transportation which enters into the cost of practically everything that we use. We are all interested and all desirous that this item be reduced as much as possible, but it is a legitimate item of cost. It can not be entirely eliminated, and there is no economy in making an attempt to reduce freight rates below cost. The cost must be paid by somebody and in some way, and it is beyond the ingenuity of man to devise a plan that can make freight rates less than actual cost. If they are not paid in the shape of freights, they must be paid in some other way. It costs something to put a ship through the Panama Canal. This item of cost is legitimate, and if it is not paid in the shape of tolls then it will be paid by the taxpayers. It can not be eliminated. If the shipowner does not pay it, the taxpayers must. The proper proportionate cost of the operation and maintenance of the canal and the sanitation of the Canal Zone is a part of the actual transportation cost of every ton of freight that goes through the canal, and when a toll is exacted proportionate to this expense such an item is just as much a part of the necessary transportation cost of every ton of freight passing through the canal as is the salary of the engineer and the fireman who are working in the hold of the ship. It is just as much a part of the transportation cost as is the cost of the coal that is consumed in the engine while the ship is traversing the waters of the ocean.

The Government is now, and has been ever since it acquired the Panama Canal Zone, engaged in the operation of a railroad across the Isthmus. The present charge made by the Panama Railroad Co. for carrying freight across the Isthmus on this railroad, including the expense of unloading from the vessel on the one side and reloading on the other vessel on the other side, varies somewhat according to the kind of freight that is being handled, but on the average, taking all kinds of freight into consideration, it amounts to $3 per actual weight ton. I have never heard of anyone demanding that the Government should perform this work for nothing. It is conceded on all sides, I believe, that this is a fair and legitimate charge for the service performed. Why would it not be just as reasonable to say to the American coastwise ships, "If you will ship your freight from New York to Colon, we will carry the freight across the Isthmus on the railroad free of charge and deliver it to you at the Pacific side of the Isthmus, where you can put it in another coastwise vessel and carry it to San Francisco?"

Mr. WEST. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Georgia?

Mr. NORRIS. I yield to the Senator for a question.

Mr. WEST. Yes, sir. Was not that the idea advanced by the Senator from California [Mr. WORKS] some days ago when he made a speech here on the floor?

Mr. NORRIS. I am not sure as to that. There are those, of course, who believe that the canal should be free to everybody and to all people. The only difference that I see in the illustration I have given and what is demanded in behalf of the shipowners is that the Government owns the freight cars in which the freight would be carried across the Isthmus, whereas in taking a ship through the canal the shipper owns the ship. So that to make the illustration absolutely fair, we ought to say to the coastwise shipper: "If you will build freight cars to be used in the operation of the Panama Railroad, we will

operate such cars; we will supply the railroad upon which they are to be operated; we will maintain the railroad and keep it in repair and carry your freight from one side of the Isthmus to the other, shipped in your cars, free of charge."

The Government by the building of this canal is going to reduce this charge so that the cost to the shipowner, even though he is compelled to pay tolls, instead of being $3 a ton, will on an average amount, as I have heretofore shown, to about 60 cents per actual weight ton, thus making a direct saving to the shipowners of $2.40 per actual weight ton. This saving, however great, is not all that is brought about. It is not only the saving of this $2.40 in cash that will accrue to the benefit of the coastwise shipper, but there will be a great deal of other expense and a large amount of time that will be saved, as I shall hereafter show.

All these losses will be obviated when the canal is completed, so that not only will the coastwise shipowner be relieved of the payment in actual cash of $2.40 a ton for the freight which he carries through the canal, but he will be saved the enormous amount of these various items that enter into the necessary operation at the present time, and which amount in the aggregate to a large sum.

Notwithstanding this immense saving that will inure to the direct benefit of the coastwise shipper, it is now demanded that the Government go one step further and relieve the shipowners of the payment of anything connected with this cost and take upon itself the entire burden of doing all this work free of charge. It would be just as reasonable and just as fair to ask the Government to supply these coastwise ships with coal for the entire trip. There is no more reason why the Government should pay the cost of transportation over this 50 miles of canal than that it should pay the cost of transportation from San Francisco to Panama or from Colon to New York. We have given the coastwise ships a monopoly of the American trade. By law, we prohibit foreigners from entering into competition with them in this business. We have built the canal at an enormous expense and propose to give the coastwise shipper the benefit of the enormous reduction that this will mean to him in the cost of transportation, and yet, not satisfied with all these favors, he is holding out his itching palm and demanding more.

Mr. BORAH. Mr. President——

Mr. NORRIS. I yield to the Senator from Idaho.

Mr. BORAH. Does the Senator believe that this toll will be paid by the shipper or by the consumer?

Mr. NORRIS. I believe it will be paid by the shipper, and I will go into that a little later on in my remarks.

Mr. BORAH. The Senator believes——

Mr. NORRIS. I would rather not discuss that point now, if the Senator will permit me. I do not want to take it up twice.

Mr. BORAH. Very well.

Mr. NORRIS. Mr. President, if we should subsidize shipping, why should we not subsidize the railroads for the same reason? Why should we not, at public expense, construct a railroad from New York to San Francisco, employ the necessary men to maintain it and keep it in repair, build station houses, build the engines, and then say to some corporation, "If you will go to the expense of building cars, we will not only permit you to use this railroad free of charge, but we will pay the actual expense of its maintenance and operation"?

This would undoubtedly reduce freight rates across the country, but it would be no saving. No one could defend such a system. The taxpayers would have to pay the freight, and everybody knows that the ultimate consumer would not get all the benefit of the reduction. The greatest profit would be made by the company engaged in the transportation business. But while the consumer might get some reduction in the way of freight, he would have to foot the entire bill when he pays his taxes. It is a theory that is fundamentally and economically wrong. We can not perform the impossible. We can not lift ourselves over the fence by pulling on our boot straps.

BECAUSE SOME OTHER CANALS ARE FREE IS NO REASON WHY COASTWISE VESSELS SHOULD BE EXEMPTED FROM TOLLS AT PANAMA.

In defense of this policy of exempting coastwise shipping from tolls it is said by those advocates that we ought to do this because the Government has built and maintains locks and canals between the Great Lakes and others on some of our navigable rivers, and that it permits these locks and canals to be used free of charge. To begin with, this alleged illustration of American policy assumes that it is not only right, but that it is the duty of the United States Government to maintain these canals and these locks and keep them in repair and to permit their use by ships free of charge. The wisdom of this policy may well be questioned. The Government is not bound to perform this service on any principle of justice, and there is no reason why, if the expense connected with such a policy becomes burdensome on the taxpayers, the Government should not charge a toll for this service sufficient, at least, to pay the expense of maintenance and operation.

It can well be questioned whether the Government should continue indefinitely this expense, contributed by the entire people for the benefit of a few. Certainly, if such a policy is to be extended to an unlimited degree and to cover expenditures of such vast magnitude as the Panama Canal, the taxpayers will eventually demand that they be relieved at least to the extent of the operation and maintenance cost from the payment of this charge. In the next place, this illustration is unfair, because in all such canals and locks so maintained by the Government the same are free not only to coastwise shipping but to the shipping of the entire world, including all foreign ships. And if that is an argument in favor of exemption from tolls, then to logically apply it to the Panama Canal we should say that the canal should be free to the ships of the entire world, that the Government should operate and maintain the canal and permit its free use not only by American ships, but by foreign ships as well. And the man who relies on this illustration, if he is logical, must stand in favor of making the canal free to the entire world.

It seems to me, however, that the very magnitude of the Panama Canal undertaking puts it in a class by itself. There is no other canal in the world that can be compared to it which is free. Because the Government operates some short canal or some lock in some river and permits its free use by all ships that want to use it is no reason why it should go to an unlimited degree in the same direction and pay for the benefit of the world's shipping out of the Treasury of the United States the enormous amounts that would be necessary.

If a friend from some distant State happened into my town and came to my office and desired to write a few letters to his friends or to his home, I would give him the use of my stationery, my typewriter, my desk, my office, and would supply him with stamps to meet his demands. He would not think of paying; I would not think of asking pay for the accommodation or for the postage. But if, because I did this one day, he came back the next day and using that precedent as a right should demand that I give possession of my office and sufficient postage for him to send out 10,000 letters, I would probably draw the line. Because the Government maintains for the free use of the world's shipping a number of locks and canals in different parts of the country is no reason why we should spend $400,000,000 in building the canal and then from five to ten millions of dollars annually for its maintenance in order to give a shipping monopoly an advantage not possessed by the balance of our citizens. Because a man contributes a reasonable donation to some enterprise is no logical reason why he should be compelled to contribute a million times greater to some other enterprise. And even conceding that the Government is desirous of contributing something, should this contribution be made to some favored interest that has already been given special favors? Because we have already given the coastwise commerce of the United States to the American coastwise vessels, is that any reason why we should now grant to them a direct subsidy? We have already given them a monopoly, and now they demand pay for operating that monopoly. It seems to me it comes with poor grace for an industry already protected from foreign competition and already given free use of the locks in our rivers and the canals connecting our lakes to cite these favors as argument why it should be given additional favors.

FREE TOLLS WILL NOT REDUCE FREIGHT RATES.

It is claimed by those who are demanding free tolls for our coastwise vessels that such a course will result in a reduction of the freight rates charged by coastwise vessels between the ports on the Atlantic and Pacific coasts. It is claimed by these advocates that unless coastwise shipping is exempted from tolls we will get no reduction in transcontinental freight rates. This argument would have considerable weight if it were true, but, as I shall show, there is no truth in it. I believe when the canal is in operation one of its beneficial results will be the reduction of transcontinental freight rates on railroads, but these freight rates will not be reduced one penny more by the exemption of coastwise shipping from tolls. Men engaged in the coastwise carrying trade will charge all that the traffic will bear. In securing business they will bid just enough under the railroads to get the business. The cost of carrying freight by water, as everybody knows, is very much less than carrying it on the railroads. The shipowners will be able to underbid the railroads on that class of freight that can be reasonably carried by water, and will be able to do this, as I shall show, without regard to the question of tolls at the Panama Canal. The consumer will get no benefit from the exemption of tolls, but such exemption will inure entirely to the shipowners. Under the

regulation fixed by the President, the toll on all vessels which pay tolls is $1.20 per net registered ton. If the coastwise vessels were compelled to pay tolls on the freight which they carried, their profits would be just that much less than though they were not required to pay tolls. If the difference in the cost of carrying freight over the railroad from San Francisco to New York and between the same cities by way of the water route through the canal was only $1.20 per net registered ton, which, as I have shown, means about 60 cents per actual weight ton, then there would be some reason for the argument, but since the cost in favor of the water route will be only about one-half of the cost on the railroad, it requires no great wisdom to see that the shipowner, having this big leverage in his favor, would charge just exactly the same amount to carry a ton of freight from San Francisco to New York if he had free tolls as though he were compelled to pay toll in going through the canal. In other words, he can pay the toll and still make a large profit on a rate so low that the railroads can not meet it without suffering a large loss. If to the real cost of water transportation you add a liberal profit and also the toll charges at Panama, you will have an amount much less than the actual cost of transportation on the railroad. Under these circumstances it is folly to expect that an exemption from tolls will reduce the freight charge.

Mr. O'GORMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from New York?

Mr. NORRIS. I yield to the Senator; but I should like to suggest to him that I hope he will make his interruption short, because I have been notified by the Senator from North Dakota [Mr. MCCUMBER] that he wants to go on with the grain-inspection bill at 2 o'clock, and I am anxious to get through by that time.

Mr. O'GORMAN. I have no particular desire to interrupt the Senator unless he is willing that I shall do so.

Mr. NORRIS. I have no objection to the Senator doing so, except the one which I have stated. I have been yielding to a good many interruptions, and have already consumed considerable time.

Mr. O'GORMAN. I simply want to ask the Senator whether he believes that there will be competition between the ships using the Panama Canal?

Mr. NORRIS. Yes; I think so.

Mr. O'GORMAN. Does the Senator realize that on an ordinary ship of 5,000 tons a toll charge of $1.20 a ton will average about $13,000 for a trip both ways, from coast to coast?

Mr. NORRIS. Well, whatever the cost is, it would be a matter of computation entirely.

Mr. O'GORMAN. That brings me to the direct question I desire to submit to the Senator, and that is whether he thinks that $13,000 charge for taking a ship to the Pacific coast and back is so small and negligible that it will not eventually fall either upon the producer or upon the consumer of the commodity carried?

Mr. NORRIS. I will answer the Senator's question. If you take the amount named and compare it with the capacity of the ship, the amount of freight that it carries, then the amount is relatively small. I have been comparing—and I believe that is fair—the ability of these ships to compete with the railroads, and I do not believe anybody will deny that the actual cost of water transportation is very much less than the actual cost of shipping the same freight over the railroads between the two oceans. If the shipowner gets the business, he will get it because he underbids the railroads; and, as I have just shown, I think he will be able to pay the tolls and still underbid the railroads. If he did not have to pay tolls, he would only bid slightly under the railroads, practically making the same bid to get the business. Whatever he pays in the shape of tolls is just as large for the taxpayer as for the shipowner.

Mr. SMITH of Michigan. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Michigan?

Mr. NORRIS. I yield to the Senator.

Mr. SMITH of Michigan. I think the Senator from Nebraska will admit, even with the favor now extended to our coastwise shipping, we do but 8 per cent of American commerce in American bottoms. I am unable to see how we shall do a very much larger proportion of our shipping with unrestricted competition.

Mr. NORRIS. Does the Senator mean that the coastwise shipping is only 8 per cent of the traffic of the country?

Mr. SMITH of Michigan. I mean that of the seaboard commerce of the United States we carry now under our flag but 8 per cent.

Mr. NORRIS. Well, as to the coastwise shipping, the United States does all of the coastwise shipping of America—the Senator from Michigan can not dispute that—whether it be 8 per cent or 90 per cent.

Mr. SMITH of Michigan. Yes; but suppose that our coastwise shipping were not exclusively our own, the proportion of shipping that would be done under the American flag would be absolutely inconsequential. The Senator from Nebraska, who is fair and who I know has given this matter a great deal of thought, must admit that we can not equalize the situation at all by putting a tax upon coastwise shipping through the Panama Canal, because our coastwise shippers would pay that tax, whereas the Governments of the respective countries in competition with us would themselves pay the tax.

Mr. NORRIS. That is an entirely different proposition, Mr. President.

Mr. SMITH of Michigan. But that is the situation we shall meet.

Mr. NORRIS. No; we are not led there. I do not care to go over it again, but I think I have shown that the cost of freight through the Panama Canal is a legitimate and honest item of transportation, because somebody must pay it; it can not be done for nothing. We may legislate from now until doomsday, and we can not take the burden off some one of the liability to pay that item of cost, which is a necessary transportation item.

Mr. SMITH of Michigan. Very well, now——

Mr. NORRIS. I hope the Senator will yield to me just a moment.

Mr. SMITH of Michigan. Certainly. I do not want to interrupt the Senator, if he objects.

Mr. NORRIS. We might just as well, Mr. President, as I view it, say we will build a new railroad across the country, and we will let the people ship freight on that for nothing. We would reduce the price of transportation; the man who ships freight would not have to pay anything; but we never could get away from the fact that somebody had to pay the expense of operating that railroad. If it were operated by a private corporation or an individual, he would be entitled, in addition to the actual cost, to get a fair return on the money he invested; but those of us who are opposed to ship subsidies are not asking that the Government get any return on the money it has invested. We are willing, if the men who ought to pay the toll charge through the canal would pay the actual cost of transportation; and that is an item which, if they do not pay, we must pay. Regardless of whether it reduces the cost to the consumer, regardless of everything, it can not be obviated.

Mr. SMITH of Michigan. The Senator from Nebraska is right when he says some one must pay this cost. The only difference between the Senator and myself is that I want the foreigner to pay the cost and he seems to be quite willing that our domestic shipowners shall pay it.

Mr. NORRIS. The Senator from Michigan will not be able to get the foreigner to pay it. The foreigner will not pay it. He is under no obligations to pay it.

Mr. SMITH of Michigan. Mr. President, suppose we have—if I am not intruding——

Mr. NORRIS. All right.

Mr. SMITH of Michigan. Suppose we have $400,000,000 invested in this canal, and that the upkeep of it will amount to $5,000,000 a year; suppose the traffic of all the world through the canal at fair rates should take care of the upkeep and raise a sinking fund by which the bonds, which represent the money invested in the canal, may be retired. If we can do that and at the same time allow our coastwise shipping to enjoy the same privileges at Panama which they enjoy in all the other rivers and harbors of our country, it seems to me we shall have accomplished a very desirable purpose.

For what did England pay $19,000,000 for over a third of the stock of the Suez Canal?

Mr. WEST. Mr. President, England owned over a third, and she obtained 31 per cent on the investment.

Mr. NORRIS. Now, Mr. President, I shall have to insist on proceeding. I do not want to be discourteous to the Senator——

Mr. SMITH of Michigan. The Senator can not be discourteous, because it would not be natural for him to be discourteous.

Mr. NORRIS. As I have stated, I have been notified by the Senator from North Dakota that at 2 o'clock he is going to insist on going on with his bill, and he has the right of way. I will ask Senators not to interrupt me unless for a question. I can not yield for the purpose of getting into these side discussions, much as I should like to do so.

Mr. SMITH of Michigan. I do not desire that the Senator shall do so.

Mr. NORRIS. I shall have to decline to yield.

Mr. KENYON. Mr. President——

Mr. NORRIS. If the Senator from Iowa desires to ask me a question, I will yield.

Mr. KENYON. I was going to ask the Senator from Nebraska a question, but I do not want to inconvenience him.

Mr. NORRIS. I will yield for a question. I dislike to refuse to yield, and I have never heretofore refused to yield; but I am going to be in a condition at 2 o'clock that I shall be just half through, in the middle of my address.

Mr. KENYON. I take it that the Senator will go on at 2 o'clock just the same.

Mr. NORRIS. I hope I shall be able to do so, but I am entirely at the mercy of the Senator from North Dakota.

Mr. KENYON. I simply desire to ask the Senator from Nebraska a question, and I shall be very sorry if it prolongs the discussion. I want to get my mind clear on the suggestion made by the Senator from Michigan [Mr. SMITH]. It is true, is it not, that the President in fixing the tolls for the passage of vessels through the Panama Canal took into consideration the vessels engaged in the coastwise trade?

Mr. NORRIS. I so understand.

Mr. KENYON. So that England has not been discriminated against, but somebody must pay these tolls. Who pays them? The Government of the United States; and it seems to me it is a subsidy.

Mr. NORRIS. I dislike to take the time to reply at length to the remarks made by the Senator from Michigan [Mr. SMITH], but I think I ought to say this. I have been arguing this proposition on the basis of the present regulation made by the President. The President can change that regulation to-morrow; he can vary it under the law as he wants to. The Senator's argument, however, is based on an entirely different condition of affairs. If he wants to get interest on our investment and add enough to it to pay in a few years for the cost of the canal and get it all out of the foreign shipping, then we will have to change the law and give the President power to impose a higher rate, so high that we would probably drive the traffic away from the canal.

Mr. SMITH of Michigan. Or increase the volume.

Mr. NORRIS. We can not increase the volume by increasing the tolls. Just as soon as you increase the tolls, you decrease the volume of the traffic. Under all estimates which have been made there will not be enough under the present rule and regulation of $1.20 a net registered ton to pay the cost of the canal. It will do well under the present estimate if it pays the cost of operation and maintenance.

WATER RATES AND RAILROAD RATES COMPARED.

Those who believe in subsidizing our coastwise shipping interests are occupying the illogical position of giving a bonus to a ship-carrying trade that is already naturally possessed of advantages that enables it to underbid its railroad competitors. If we desire to reduce freight transportation by a subsidy, paid from the Treasury of the United States, then to have our action effective in the way of a reduction of rates such a subsidy must be given to that system of transportation that is not able to compete on account of natural barriers with its competitors. If the subsidy is given to the system that already possesses natural advantages, it simply means increased profits to those engaged in that advantageous part of the business.

For quite a number of years our coastwise shippers have been engaged in freight traffic between Atlantic and Pacific ports by way of the Panama Railroad across the Isthmus. The water rates that have been in force for some time by this route have been about 33⅓ per cent less than the transcontinental railroad rates. When the canal is completed, even though the coastwise vessels pay tolls, the actual cost of transportation will be greatly reduced. As I have shown, after the payment of tolls at Panama the coastwise shipper will save on an average $2.40 per actual ton, but this amount is not all of the saving that will inure to his benefit. When the ship passes through the canal it will save several days' time, not only for the ship, but for all the employees on the ship, and, as I will show, it will not only save the time of one ship, but, as a rule, it will save the time of two ships, because in the most expeditious method under present conditions it is necessary to have a ship waiting on each side of the Isthmus—one unloading and the other loading. This means a delay of several days of two ships and the expense of paying all the employees of two ships. The saving of time will bring about another great advantage on account of expedition. For the very reason that a great deal of time is saved the coastwise shipper will be able, after the completion of the canal, to carry by ship a great many commodities that he can not now handle simply because of the time involved. I shall later on show more fully just what this saving of time will be. For the moment I am interested in the actual saving of freight charge. The average freight rate, based on one year's business per actual ton shipped from New York to San Francisco by water across the Panama Railroad under present conditions, is $10.48. Of this amount 22 per cent represents the freight from New York to Colon, 18 per cent represents the freight from Colon to Balboa over the Panama Railroad, and 60 per cent represents the freight from the Pacific terminus of the railroad to San Francisco.

I might pause here, Mr. President, to say that everybody who has given any consideration to this question knows that the shipowner on the Pacific side—and the shipowner in this case is the Southern Pacific Railway, having a monopoly from San Francisco down to Panama of the business—is charging now, and is getting now, under the rates that I have given, at least twice what is a reasonable charge under the circumstances.

When the canal is completed this average charge can be reduced from $3 to $4 per ton, even though the shipowner is required to pay the toll. The average freight rate per ton from New York to San Francisco over the railroad on the same commodities is impossible of definite ascertainment, because it involves the carrying in connection with such commodities of a great many other commodities that are not carried by water, but from estimates carefully made as well as from every man's general knowledge of the subject it is known that the average transcontinental freight rates over the railroads are at least 33⅓ per cent greater than the figures above given for the freight charge by the water route. I have here a table comparing freight charges from New York to San Francisco by the water route over the Panama Railroad with the freight charges on the same commodities between the same two points over the all-rail route. In comparing these rates it is well to remember that the charges on water transportation are, with very few exceptions, just the same between all Atlantic ports and all Pacific ports. It is necessary also to remember in making a comparison that the water rates given are those in existence now. They will be, as I have shown, very materially reduced after the Panama Canal is completed. It will be noticed, also, that upon two of the important items in the table, anthracite coal and pig iron, the railroad rate of 55 cents per hundred is not from the Atlantic seaboard, but from Pennsylvania points. A ton of anthracite coal or pig iron can be shipped by water from the Atlantic seaboard by way of the Panama Railroad to Pacific points for $2 a ton less than the same coal or pig iron could be shipped by rail from Pittsburgh to the Pacific coast. From this table it will be found, for instance, that the freight upon structural steel and building material by water over the Panama Railroad is $9 per ton; the freight on the same commodity by railroad from New York to San Francisco is $16 per ton; the freight upon canned goods is $11 per ton by water and $17 per ton by railroad. Mr. President, I ask unanimous consent to insert this table without reading.

The VICE PRESIDENT. Without objection, that may be done.

The table referred to is as follows:

Comparison of railroad and water freight rates from New York City to San Francisco.

[Railroad rates in cents per 100 pounds, in carload lots, minimum of 30,000 pounds, unless otherwise shown. Water rates in cents per 100 pounds, in carload lots.]

	Water.	Railroad.
Structural iron (railroad minimum 40,000 pounds)	$0.45	$0.80
Coal (anthracite), (railroad rate from Pennsylvania points)	.45	.55
Pig iron (railroad rate from Pennsylvania points)	.45	.55
Lumber (railroad minimum 40,000 pounds)	.60	.80
Wire, plain or barbed (railroad minimum 40,000 pounds)	.45	.85
Dry goods	1.80	3.00
Bags, burlap, gunny or jute	.60	.85
Canned goods (railroad minimum 40,000 pounds)	.55	.95
Cereals, flaked goods, oatmeal, etc	.60	.90
Wheat flour (railroad minimum 40,000 pounds)	.65	.80
Dried or smoked fish	.84	1.20
Seed, alfalfa, clover, etc	.88	1.35
Books, boxed	.85	1.80
Coffee, green	.50	.80
Drugs	1.00	1.50
Dry hides	1.05	1.85
Machinery, mining	1.00	1.50
Woodenware	.95	1.50
Automobiles	2.00	3.30
Liquors	.70	1.25
Fruit juices	.70	1.50
Grape juice	.70	1.10
Matches	.95	1.10
Condensed milk (railroad minimum, 40,000 pounds)	.60	.85
Mineral water	.52	.75
Petroleum oil	.60	.90
Pickles	.70	1.60
Sirups	.52	.85
Tallow	.70	1.20
Tobacco, manufactured (railroad minimum, 40,000 pounds)	.95	1.75
Building paper, roofing, etc. (railroad minimum, 40,000 pounds)	.52	.78
Rubber, belting, packing, etc	.84	1.20
Soap (railroad minimum, 40,000 pounds)	.55	.80
Spices (railroad minimum, 24,000 pounds)	.88	1.25
Cotton, piece goods	.70	1.10
Farm machinery, agricultural implements	.88	1.25-1.85
Household furniture (railroad minimum, 20,000 pounds)	.90	1.52
Hardware	.90	1.75

Mr. NORRIS. Mr. President, the freight on farm machinery and agricultural implements from the Atlantic seaboard by water and over the Panama Railroad to Pacific points is $17.60 per ton, while the transcontinental freight on the same commodity across the country ranges from $25 to $37 per ton. The freight by the water route on cereals is $12 per ton, while the transcontinental rate is $18 per ton. The freight on cotton piece goods by water and over the Panama Railroad from New York to San Francisco is $14 per ton and by the railroad between the same two points it is $22 per ton.

A most important element to be taken into consideration in connection with this table is that the water rates higher than the minimum as given in the table are subject to a maximum absorption of 20 cents per hundred pounds freight charges from interior points to the Panama Railroad pier in New York City. This means that the water rates given in the table often include a railroad charge for frieght from interior points in the eastern part of the United States to the pier in New York City. To illustrate: Suppose we take a shipment of canned goods from some interior city in the State of New York by rail to New York City, to be shipped from there by water to San Francisco. In the table the water rate on this commodity from New York to San Francisco is 55 cents a hundred. The lowest or minimum rate on any commodity from New York by water to San Francisco is 45 cents a hundred. This rate would therefore permit an absorption of 10 cents per hundredweight on the canned goods, to be applied on the railroad rate from the interior point from which the shipment was started. In other words, the real freight charge from New York to San Francisco would be, in fact, only 45 cents per hundred pounds.

Let us take another illustration where the amount of the rate that can be absorbed reaches the maximum allowed for absorption. Let us take grape juice, one of the commodities that has not only increased in use but in popularity, and it is to be hoped and expected that both its use and popularity will be further increased.

Mr. MARTINE of New Jersey. What article is that?

Mr. NORRIS. Grape juice.

Mr. MARTINE of New Jersey. Oh, that harmless commodity!

Mr. NORRIS. The Senator is not interested in that. [Laughter.]

The water rate on grape juice from New York to San Francisco, as shown in the table, is 70 cents per hundredweight. If a shipment of grape juice is to be made from some interior point in the eastern part of the United States by water and over the Panama Railroad to San Francisco 20 cents per hundred pounds could be allowed out of the rate to pay railroad charges from the shipping point to the pier in New York City. This, in reality, would make the net rate from New York to San Francisco by water 50 cents instead of 70 cents, as given in the table. This same process of absorption can be applied to any other commodity where the rate given in the table exceeds the minimum, 45 cents per hundredweight, whenever the shipment originates at an interior point.

These figures, it seems to me, demonstrate that the coastwise shipping does not need a subsidy, is not entitled to it under any process of reasoning, and that to exempt such ships from tolls at the canal is simply to saddle upon the taxpayer a burden the benefit of which will go to increase unjustly and out of proportion profits of an industry that is already in possession, under the law, of a monopoly. Under present conditions no one is even seriously contemplating giving to this industry a bonus in the shape of a subsidy. What reasonable argument can exist, therefore, in favor of giving it a subsidy after the completion of the canal, when its advantages and its profits will be still greater than they are under present conditions?

THE SAVING OF TIME WHEN THE CANAL IS COMPLETED.

One of the important elements that must be taken into consideration in comparing conditions when the canal is completed with present conditions, is the saving of time of all transcontinental shipments by way of the canal. It will take from 10 to 12 hours for a ship to pass through the canal. If it is necessary for the ship to take on coal, this will require on an average an additional time of 10 hours. So that, including the time taken for coaling, the average time of the ship passing through the canal will be less than one day. The most favorable condition that can exist, as far as time is concerned under present conditions, is to have one ship unloading on one side of the Isthmus while there is another ship waiting to be loaded on the other side. Of course, the length of time that is consumed in this operation of unloading and reloading varies somewhat according to the class of freight that is being transferred and also somewhat according to the conditions existing at the time in the railroad traffic across the Isthmus. The most favorable condition that could possibly exist would be at a time when the railroad instrumentalities could be devoted entirely to the operation of carrying the freight across the Isthmus. If there were other freight to be carried, other ships to be loaded or unloaded, it would necessarily delay operations and extend the time of transfer. Under the most favorable conditions, it is safe to say that the average time required to transfer the cargo of a vessel over the Panama Railroad from one side of the Isthmus to the other will vary from 7 to 15 days, depending upon the size of the cargo, the kind of freight of which it is composed, and traffic conditions of the railroad. I am informed by the officials of the Panama Railroad Co. that during the past year the average time consumed in transferring from one side of the Isthmus to the other, cargoes of from 4,000 to 5,000 tons, has been 12 days. This means that on an average, with vessels of reasonable speed, almost one-half of the time required for a shipment of a 10,000-ton cargo from Atlantic to Pacific ports of the United States is consumed in transferring the cargo across the Isthmus by rail.

In addition to the loss of time by the two vessels waiting for this operation to take place, the pay roll of the employees on the vessels would amount to a considerable sum. The number of employees on a vessel of 10,000 net registered tons will exceed 100, and to get the aggregate amount of loss on account of the salaries of employees we would, of course, have to double this amount, because the employees of two ships must be paid their regular salaries while the freight is being transferred. In addition to all this, we should consider the loss and damage by breakage, and so forth, necessarily connected with the loading and unloading operations.

This saving of time upon the completion of the canal will enable the ships engaged in the coastwise service to carry a class of freight which they do not and can not now, under present conditions, carry, for the very reason that it takes too long to make the shipment. I have a table showing the time that it will take for vessels of different speeds to go from New York to San Francisco through the canal. There is no doubt but what a vessel that is able to make fast time will carry, to a great extent, a different class of freight from a vessel that requires more time, and undoubtedly the freight charges on such a vessel will be comparatively higher. This table shows the time required from a slow vessel making only 9 knots to a vessel making 22 knots. We have at the present time, owned by the Government, suitable freight-carrying vessels under the control of the Navy Department making time in excess of any of these vessels noted in the table. We have recently had a recommendation from the Secretary of the Navy that these vessels be put into service, and showing what the expense would be to remodel them so that they would be fit for the service. I understand that three of these vessels have a speed of 26 knots an hour and that one of them has a speed of 23 knots an hour. Another one has a speed of 16 knots, with a capacity of 20 000 tons. A vessel traveling at the rate of 26 knots an hour, allowing one day to go through the canal, would be able to go from New York to San Francisco in about nine days. The slowest vessel in the table, one traveling at 9 knots an hour, would require 24 days and 16 hours to make the trip from New York to San Francisco. A vessel of 16 knots an hour would make the trip in 14 days and 2 hours; one traveling 20 knots an hour would go in 11 days and 9 hours; while a 22-knot vessel would consume 10 days and 8 hours.

Table showing time required by vessels of various speeds to go from New York to San Francisco by way of the Panama Canal.

9 knots	24 days, 16 hours.
10 knots	22 days, 6 hours.
12 knots	18 days, 15 hours.
14 knots	16 days, 1 hour.
16 knots	14 days, 2 hours.
18 knots	12 days, 14 hours.
20 knots	11 days, 9 hours.
22 knots	10 days, 8 hours.

It must be observed that the saving of time at the canal would be just as great for a slow vessel as for a fast one. If we compare this time with the average time that it takes to ship freight in carload lots from New York to San Francisco, we will find that vessels of reasonable speed in coastwise service between Atlantic and Pacific points, passing through the canal, will be able to make time that will compare favorably with the best possible time that can be made by the railroads across the country. From a careful calculation made by officials connected with the Interstate Commerce Commission, it is estimated that the average time taken by the railroads to carry freight in carload lots from New York to San Francisco is between 16 and 18 days. When freight is shipped across the continent in trainloads and given special privileges as to right of way, this time would, of course, be lessened to a considerable degree, and no doubt such freight will be carried in the future as it is now, where time is one of the principal elements involved. But in

the average shipment of freight in lots as large as a carload it will be found that when the canal is completed vessels of ordinary speed engaging in coastwise trade between our two oceans will be able to make as good time and successfully compete with the railroads so far as transcontinental shipments are concerned. The shipment of freight by water will depend to some extent upon the condition of the weather and the sea. The shipment of freight in carload lots by railroad varies greatly on account of existing conditions in the traffic, but, taking all things into consideration, there is no doubt but what, when the canal is completed, our coastwise shipping will receive an impetus that will in a short time more than treble its present business.

But it is not only carload lots that these ships will be enabled to compete in and secure business that they can not get now, but in my judgment their competition will be still greater in ordinary package freight. It will take, on an average, twice as long to ship package freight in less than carload lots from the Atlantic to the Pacific by rail as it will to send freight by the carload. After the completion of the canal, there is no doubt but what ships will be put in service that will have regular schedules and will be able to handle package freight and carry it from one ocean to the other in less time than under ordinary conditions such freight could be transferred from ocean to ocean by rail.

GENERAL DEDUCTIONS.

When all these things are taken into consideration it seems to me to be the height of folly to pay out of the Treasury of the United States a subsidy to our coastwise shipping. The opening of the canal will give to them a new world for operation. Protected from competition by foreign vessels, they will be able to take on a business and enter a field from which they have heretofore been excluded. While their business will be increased, they will be able to save a large amount in cash, and will have the advantage of a still greater saving in time. Their profits under present conditions will be vastly increased because of the expenditure by the taxpayers of the country of $400,000,000 that will inure directly to their financial gain. All this has been brought about without the expenditure on their part of one penny. The taxpayers of the country have built the canal. The interests of the taxpayers ought to be taken into consideration in its operation, and while no one is asking for a profit; no one is demanding that the coastwise shipping should pay a bonus, yet common ordinary business sense ought to and does demand that the particular business that gets the greatest benefit from all this outlay should contribute its fair proportionate share toward the operation and maintenance of the canal.

THE INTERNATIONAL QUESTION.

I come now to the discussion of the international question involved in our treaty relations with the Government of Great Britain. I do not intend to discuss this question in detail or to make an argument either for or against the position assumed by our Government in its controversy with Great Britain. I desire only to show that it is a question that can be properly, and should be honorably, submitted for settlement to an international arbitration tribunal. If I am right in my conclusions reached in the discussion of the economic question involved, then this bill should be passed regardless of what we may think of our treaty rights with Great Britain and the rest of the world. If free tolls is a policy that at the present time is economically wrong for our Government to adopt, we should repeal the present law allowing discrimination to American vessels, even though we believe under the treaty with Great Britain that we have a right to make such discrimination.

On the other hand, even though we believe at the present time that an American policy which in effect gives a subsidy to American shipping is economically wrong, we may still realize that in the future it may be desirable for some discrimination to be made, and therefore our right to discriminate if it exists should be properly preserved. The right to discriminate and the economic policy of actually discriminating at the present time are two entirely different things. After the canal has been in operation a sufficient length of time to give us definite ideas of the tonnage that passes through it and the expense of operation and maintenance has been definitely ascertained, it may be desirable to inaugurate a policy that shall give preference to American ships using the canal. I want to take no step now that shall foreclose us in the exercise of this right if, after the submission of the controversy to an unbiased arbitration tribunal, it shall be demonstrated that such right exists.

Personally, I doubt whether the time will ever come when it would be good economic policy for us to subsidize our coastwise shipping. The monopoly which such shipping is given under the law as against foreign shipping is, it seems to me, a sufficient protection. It may be, however, that in the years to come conditions may so change that it will be desirable, even if not necessary, for a preference in the way of tolls to be given to such shipping. To my mind, if any American ships are to receive a preference, it should be those engaged in foreign trade, and particularly those engaged in trade between our Nation and the nations of Central and South America. We are so situated geographically that we ought to control the trade with South America. Our ships that engage in that trade come in competition with the ships of the entire world, and if later it should be found that American ships engaged in this trade can not compete with the balance of the world without some preferential advantages in the way of toll at the Panama Canal, it may be a wise national policy that such preference should be given in order to develop this trade. It does not necessarily follow that this policy should be permanent, because, it seems to me, everything else being equal, American shipping ought to retain this business after it is once acquired. I doubt whether it would be wise to give to these ships an entire exemption from tolls, but some preference might be given that would enable our ships to develop this trade that now is controlled almost entirely by Europe.

It seems to me, under all the circumstances, that we should take no steps now that could be construed by the world as an admission on the part of our Government that we do not have this right of discrimination incident to our ownership of the canal. It is true that the passage of this bill unamended would not necessarily imply that we had given such a construction to the treaty, because it could be said that the bill was passed because Congress believed that it was wrong for the Government of the United States to inaugurate an economic policy which would result in giving subsidy to any branch of shipping. But most of the discussion that has taken place in the country and, indeed, in the world has been on the international question; and if we pass this bill without amendment there is no doubt but what the world will place upon our action a meaning that implies that we have passed the bill because we believed that under the treaty with Great Britain we had no right to give any preference to American shipping. It will be construed as a construction by Congress in favor of Great Britain's present contention.

I take it that no patriotic American citizen desires that our Government should take any course that would in any way violate or transgress any agreement that we have made. Even though we believe that in the past we have made a bad bargain, we can not think for a moment of doing anything except to stand behind it and carry it out in good faith. It is often said that we have built the canal with our own money; that it is the result of American ingenuity and American engineering, constructed upon land upon which we are to a degree, at least, sovereign; and that, therefore, it is not the concern of any other nation what rule we may adopt as to its regulation, and that we have the right, being the owner of the canal, to subsidize, by exemption from tolls, our own ships if we see fit, and that no nation has any right to complain. In other words, that it is our own individual property, and that we can do with it as we see fit. Those who argue thus do not take into consideration how we acquired this right and what agreements and stipulations it was necessary for us to enter into in order to get it. If we have acquired property through any means that has left upon our title any limitation as to its operation and its use, we must comply with the limitations and conditions and exercise our ownership and control in accordance therewith. Those who make this claim do not, in my judgment, give proper consideration to the historic events that transpired during a long course of years prior to the time when we entered upon the construction of the canal. I am satisfied that a proper consideration of the history of events that have transpired during the course of many years will lead any unbiased mind to the conclusion that we have not made a bad bargain, and that we have not surrendered our rights to any other Government, or that we have done anything as a nation that has compromised us in any way during the years that have passed.

HISTORICAL DEVELOPMENT OF OUR INTEREST.

Ever since the discovery of the Pacific Ocean, which occurred a few years after the discovery of America by Columbus, a canal across the Isthmus connecting the two oceans has been the dream of statesmen. Millions of dollars have been spent—thousands of lives have been lost in surveying and investigating different routes between the two great waters. It must be remembered that early in our history we had no territory bordering on the Pacific Ocean. It was not until, I believe, in 1846 that we acquired the Territory of Oregon, which at that time contained also the territory now included in the State of Washington. At that time the importance of this country was unknown and unrealized. Canada, a British Province, extended

from the Atlantic to the Pacific. England had other vast interests in the Pacific Ocean and the Suez Canal was not then constructed. England was therefore more interested in a canal than we were. Later on, we had the War with Mexico, and in the treaty of peace with that nation there was ceded to us a vast territory, including Arizona, Utah, Nevada, California, and parts of Colorado and New Mexico. This gave us a Pacific shore line equal to that of our Atlantic coast, and it increased by manyfold our interest in any contemplated interoceanic canal. In 1849, on account of the discovery of gold in California, the importance of our possessions and our Pacific shore line was greatly increased. We, however, were not financially able to undertake the construction of such a waterway ourselves. We were anxious that no other nation should construct such a canal that by any possibility might interfere with its use on equal terms by us. We were particularly anxious that this waterway should not be constructed and controlled by Great Britain. She was our principal rival, as far as the coast lines of the Atlantic and Pacific were concerned. We did then, it seems to me, the perfectly natural thing. Not being able to construct the canal ourselves, and being anxious that Great Britain should not construct it, we began negotiations with that Government with a view of reaching an agreement as to the control of any canal that might be constructed connecting the two oceans. These negotiations ended in 1850 in the consummation of what is known as the Clayton-Bulwer treaty. In the preamble of this treaty it was stipulated:

> The United States of America and Her Britannic Majesty, being desirous of consolidating the relations of amity which so happily subsist between them by setting forth and fixing in a convention their views and intentions with reference to any means of communication by ship canal which may be constructed between the Atlantic and Pacific Oceans—

And so forth.

In article 1 of the treaty the agreement carrying out the objects mentioned in the preamble was stipulated in the following words:

> The Governments of the United States and Great Britain hereby declare that neither the one nor the other will ever obtain or maintain for itself any exclusive control over the said ship canal—

And so forth.

It was further stipulated in this treaty that neither Government should take any advantage or make use of any alliance or use any influence with any State or Government through whose territory the canal should pass for the purpose of acquiring any rights or advantages in regard to commerce or navigation through the canal which should not be the same to the citizens of both Great Britain and the United States. There were a great many other stipulations of similar import in the treaty, all going to the one object that seemed to have been in contemplation at that time by the two Governments, to the effect that neither Government should consent to any arrangements in any way for the construction of such a canal by any Government or by any corporation or individual unless the use of the canal to be constructed should be open on equal terms to the Governments and citizens of both of the contracting parties.

No one has ever doubted but what this treaty made it impossible for either one of these Governments to construct the canal without the consent of the other. I believe it can be fairly said that the negotiation of this treaty was regarded by the leading American statesmen as a diplomatic victory for the United States. At least, it was regarded as a settlement of the canal question on a basis entirely satisfactory to the United States. We were anxious then to bring about a condition that this canal should not be built by Great Britain without our consent; that when it was built no conditions as to its control should be negotiated that should discriminate against us or against our shipping. This treaty accomplished this end. It placed us in a position so that no matter how or by whom the canal should be built, we were in a position to demand equal treatment in its use with the balance of the world. But as time went on and the great West developed and out of that vast territory there were built up the great States of California, Oregon, and Washington, with their immense commerce and valuable harbors and industries, and the wealth and the influence of the entire country increased and developed until we had become one of the world powers of the globe, not only did the necessity and the desire for a canal across the Isthmus increase in importance, but the sentiment of the country gradually crystallized into a desire that this, the greatest engineering undertaking of the world, should be owned and controlled by our own Government. A time had come when the canal meant more to the United States than it did to any other nation of the world, and after we had fought the Spanish War the importance of such a canal, not only for our commerce, but for our Navy, had been so fully demonstrated that the sentiment of the country became unanimous in the conviction that the canal should be constructed under the supervision, if not under the absolute ownership, of the United States Government.

CLAYTON-BULWER TREATY A BARRIER TO OUR PROGRESS.

And now for the first time in years it dawned upon us that the treaty which in 1850 we had made for our protection stood in the way of the achievement of our ambitions. That which had been a protection when we were poor and weak had become a barrier to our advancement now since we were strong and able. We pursued the only honorable course that was open to us. We asked Great Britain to abrogate the Clayton-Bulwer treaty and give us permission either to build the canal ourselves or to have it built and operated under our supervision. The result of these negotiations was the so-called Hay-Pauncefote treaty. I will not go into a minute discussion of the details of these proceedings. It is sufficient to say that they extended over quite a long period of time. The first Hay-Pauncefote treaty negotiated was rejected by the Senate, or, to be more explicit, it was amended by the Senate, and England refused to agree to the amendments. Negotiations were then begun, and the second Hay-Pauncefote treaty, the one now in force, was the result.

THE HAY-PAUNCEFOTE TREATY.

It is the terms of this treaty that are now in dispute between the two Governments. In construing it it is well to remember that at the time of its negotiation it was not known by our own Government whether we would construct the canal as a Government-owned concern or whether it should be constructed under Government supervision along the lines of the construction of the Suez Canal, by a corporation, the stock of which might be owned by American citizens, and also in part by the Government itself. I think that many of us are apt to be led astray in the construction to be given to this treaty on account of the fact that we construe it in the light of subsequent events, when the Government itself undertook in its own name the construction of the canal, and thus fail to realize that many of the stipulations contained in the treaty were put in to cover a condition that would exist if the canal were constructed along the same lines and in the same way as the Suez Canal, which was by means of organizing a corporation for its construction and likewise for its operation after construction. And it might be well to say here that had the canal been constructed in this way there would now be no ambiguity or misunderstanding as to the meaning of the language used in the treaty. The particular clause of this treaty which is the subject of practically all of the contention reads as follows:

> The canal shall be free and open to the vessels of commerce and of war of all nations observing these rules, on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic or otherwise. Such conditions and charges of traffic shall be just and equitable.

The chief contention centers about the words "all nations observing these rules." The question is, Does this term include American vessels or does it exclude them? If it includes American vessels, then the United States has no right to give any preference in the way of partial or total exemption to any American ships. If, however, American vessels are not included in this term, then we have a right to discriminate in any way we see fit in favor of American vessels, whether they are engaged in coastwise trade or engaged in trade with foreign nations. I confess that when the subject was first brought to my attention in the discussion of the present Panama Canal act I reached the conclusion from a hasty examination of the subject that we were included in the term "all nations," and that we had no right to pass the law now upon the statute books and which the present bill seeks to amend, and I am satisfied that if we consider the language of the treaty alone no other reasonable conclusion can be reached. But upon a further and a more exhaustive examination of the subject, giving proper consideration to the conditions that existed at the time the treaty was made, and giving due weight to the fact that the rules laid down in the treaty were very likely intended to apply to an ownership similar to the Suez Canal, I am in serious doubt as to whether my first conclusion was right. But, as I said before, I do not intend to make an argument in favor of either side of the controversy. I desire only to demonstrate that it is an honest and genuine controversy, with much logic in favor of both contentions. There can be no doubt whatever in the mind of any student who has given fair consideration to the subject that there is, at least, room for serious doubt. This language has been discussed all over the civilized world. The greatest statesmen and ablest jurists of our own country disagree as to what is the proper construction to be placed upon it. There is no doubt but what in the balance of the world the prevailing judgment is that our

ships are included in the term "all nations," although I am satisfied that the most of this sentiment comes from an immature and surface examination of the subject. The construction by Europeans who do not go into a full investigation of the question is apt to be along the lines that agree with the wishes of the investigators; and I think it can with equal truth be said that the opposite construction placed upon it by perhaps a large majority of American citizens is influenced to a great extent by the American desire to have supreme control and complete management of a canal which we have ourselves built.

DISPUTE SHOULD BE ARBITRATED.

Notwithstanding this, there can be no denying the fact that the greatest students of the world who have given the subject full and complete investigation and thought are divided as to whether this treaty permits us to discriminate in favor of American shipping. There can be no doubt and, as far as I know, no one disputes the fact that these disagreements are honest and sincere. The question in dispute is the construction of what under ordinary circumstances would be simple language. It is the meaning to be placed upon an international statute. There is no dispute as to the facts. It is only a question of law. To my mind it is absolutely demonstrated that this disagreement, this misunderstanding, this dispute, is a proper subject for settlement by international arbitration. To me it seems not only presumptuous but absolutely unreasonable and unfair that our Government, being one of the parties to this contract, should say to the other party and to the balance of the civilized world, "We will construe this disputed point ourselves and will refuse to permit the other party to the contract to have anything to say as to what the contract in fact means." If there ever was in the history of the world a question that could properly be submitted to arbitration, it seems to me that this is certainly one. If this question—one purely of law, purely of a construction of a contract between two parties—is not a proper subject for arbitration, then I can not conceive how it is possible for such a question ever to arise. And if we refuse to submit this question to arbitration, we are arrogating to ourselves the decision of a purely legal question, when it must be admitted by all fair-minded men there is an honest ground for dispute as to what the contract really means. We would be dealing for many years a deathblow to arbitration. We would be reversing the pretenses that we have been making in the family of nations for many years. On the other hand, if we express our willingness to permit this question to be arbitrated, we will be taking the greatest step in favor of the settlement of international disputes by arbitration that has ever been taken in the civilized world. For many years our Government has occupied a leading place in the settlement by peaceful methods of disputes among the nations of the world. We have been acknowledged leaders in the wonderful progress humanity and civilization have been making toward the abolition of war between nations and the settlement of controverted national questions by the more humane, reasonable, and just method of arbitration. The history of the world in recent years will give to us an advanced position in the family of nations, in human progress, and in the development of peaceful methods in the settlement of international disputes. Wherever our flag has floated it has been an emblem of justice, of honesty, and of peace. Our counsel has been sought, our advice has been followed, until we had reached a position second to none. It must be confessed, however, that at the present time we are not occupying this high estate. The nations of the world in this great international question may not have condemned us, but they have at least questioned our motives in enacting a law that to many of them honestly appears to be a violation of our plighted word.

SHOULD MAINTAIN OUR RIGHTS.

I do not agree with those who frankly say they believe we have a right to discriminate in favor of American vessels, but who advocate the surrender of that right because a majority of the civilized nations do not agree with our position. I do not believe that the civilized nations of the world demand that we should surrender any right that we honorably possess. There can be no justice in such a demand. If we have an honorable and a legal right under our treaty obligations to discriminate in favor of American shipping, then no fair-minded man—no honorable nation—has any right to demand that we should surrender this right. We are not called upon by the civilization of this enlightened age to do anything more than justice. In fact, I believe we will be entitled to, and will receive a greater respect in the years that are to come, if in an honorable and legal way, we shall demand the right to exercise all the rights that honestly and rightfully belong to us. If we believe that we have the right to discriminate in favor of American shipping or if there is a reasonable and just ground to sustain such a position, then we should in a dignified and respectful way maintain such right. The world will respect us in this contention. Whether we are right or wrong, history will demonstrate, if we pursue an honorable course, that we have only done what an honest person or an honest nation has an honorable right to do. And when we say to the world that while we believe we have a right under the treaty to discriminate in favor of American shipping, or if we should say to the world that as long as there is an honest dispute as to whether we have such right, we will make honest claim to it, but that we are willing to submit the question to arbitration and abide by the result, we have done all that the most advanced civilization can demand; all that an honest nation or an intelligent people could ask, and we have once more placed ourselves before the world in a position of honor and fidelity, and have not only regained whatever prestige we may have recently lost, but we have by such conduct done more to abolish wars between nations in the future than any other one step that has been taken by any nation since the beginning of organized government. If in the face of a world's opposition, we shall have the courage to submit this dispute to the judgment of a world's court, we have achieved a greater victory in behalf of civilization and humanity than ever before has fallen to the lot of any people. By such a course there will be established a precedent in favor of arbitration that no civilized nation in the future can withstand the favorable sentiment that it will create. We have an opportunity now to take a step that will bring the nations of the world nearer together than they have ever been before. If we refuse to take this step, we can not in the future demand of other nations that they should settle their troubles by arbitration. We will have lost our prestige, and will have subjected ourselves to the just criticism that we are not willing to have the same rule applied to us in our difficulties that we have asked and have been asking should be applied to others.

NO DIFFICULTY IN SECURING A FAIR TRIBUNAL.

But it is said by those who oppose arbitration that we would not be able to get a fair and unbiased tribunal—that practically all of the other nations of the earth are against our contention in this dispute, and that therefore any arbitration tribunal would necessarily be biased and prejudiced against our position. It might be well for those who argue thus to pause and consider for a moment the effect of the claim which they make. When we say that all the civilized world is against us, do we not thereby admit the weakness of our position? Are we going to claim before the world that we are contending for something that nobody except ourselves believes is right? Are we in effect going to say that we are not going to arbitrate this question, because, to begin with, the preponderance of the evidence is against us? Or, if we are conscientious in our belief in the righteousness of our position, are we going to charge the balance of civilization with being dishonest and unjust? Are we going to say that we will only arbitrate such questions in which the sentiment of the civilized world is in our favor to begin with? Do we want to take the position that we will only arbitrate when we know in advance that the decision must be favorable to us? Arbitration always implies that each side must respect the position taken by the other side. It always implies that each of the nations interested must surrender its arbitrary right to decide for itself the question in dispute. Arbitration is based upon the same principle of justice that underlies every court in civilization. It is no greater or different principle than one involved in the settlement of questions before a justice of the peace or questions that come up for settlement before the highest court of the land. It assumes that no nation should have the right to take the law into its own hands. The refusal to arbitrate means the settlement of international difficulties by war, with all its horrors, all its miseries, and all its sufferings. I do not mean that a refusal to arbitrate this question would necessarily result in war. I do not believe it would, and have no idea that it would, but the principle involved is just the same, and this precedent will in the future years, if we refuse to arbitrate, not only come home to plague us, but it will rise up in the road of progress before every civilized nation of the world. If we eliminate arbitration, there is no way to settle international disputes except by war, and everybody knows that the settlement of any dispute by war is not based on any principle of justice, right, or equity. Might has never made right since the dawn of history—it never will. It must give way to reason and justice or else the world must cease to advance and civilization must retrograde into barbarism.

But there is nothing in the claim that a just tribunal can not be obtained. The selection of an arbitration tribunal, as far as this dispute is concerned, could be made without difficulty and without any danger whatever of having a tribunal that would

be moved by any other motive except the purest and the highest. As I have said, the question involved is purely one of law. It involves the construction of a few words contained in a treaty. Suppose it should be agreed between the United States and Great Britain that the settlement of this question should be left to a tribunal composed, let us say, of three members of our Supreme Court and three members from the highest judicial tribunal of England. Is there any man who doubts but what this great tribunal would render a decision that would be based entirely upon justice and right? No man here would question for a moment but what this question could be submitted to our own Supreme Court without a suspicion that the court would not render a fair and just judgment, uninfluenced by bias or prejudice. What reason have we to say that the judges of Great Britain would not be equally fair, equally just, and equally competent? I would expect such a court to render a unanimous opinion. The judges of such a court, clothed with a mantle of authority as great as any that ever fell from the shoulders of any tribunal in the past, sitting in judgment upon a question in which all the nations of the world are interested, realizing that the scrutinizing eye of civilization was resting upon them, would be as free from prejudice and bias as it is possible for the human mind to conceive. The probabilities are that under this grave responsibility and in the presence of a civilized world and realizing, as they would, that they were not simply deciding the question before them, but that they were establishing a precedent that would be followed in the years and the ages that are yet to come, the judges of this court would forget that they were Americans and Englishmen and remember only that they were representatives of a world's civilization, a world's humanity.

But if it is thought that an arbitration tribunal should be composed of an uneven number and that there is danger of such judges as I have suggested following whatever prejudices might exist in their respective countries, then let me suggest that, in addition to the judges mentioned, the seventh member of that tribunal should be the President of the Republic of Switzerland, or that the President of the Republic of Switzerland should name a citizen of Switzerland as the seventh member. These are only suggestions. Numberless other suggestions of equal merit will appeal to those who honestly try to select a tribunal that would be fair and just.

AMENDMENT PROVIDING FOR ARBITRATION.

I have offered an amendment to the bill under consideration that would bring about the protection of all the rights that the American Government can possibly have under the treaty by the submission of the disputed question to arbitration. The amendment provides for an additional section to the bill and reads as follows:

That the passage of this act shall not be construed as a surrender of the right claimed by the United States Government to regulate the traffic passing through the Panama Canal by giving to vessels engaged in the coastwise trade of the United States and other vessels of the United States and its citizens either partial or total exemption from the payment of tolls when passing through said canal. The protest heretofore filed with the Government of the United States by the Government of Great Britain against such a construction of the treaty of November 18, 1901, between said Governments, commonly known as the Hay-Pauncefote treaty, is hereby recognized as presenting an international question suitable and proper for settlement by arbitration, and the President of the United States is hereby authorized to begin negotiations with the Government of Great Britain for the determination of said question by arbitration.

If this bill is passed with this amendment added, we will have protected every American right so far as such right can be honorably protected and so far as any patriotic citizen has any right to ask that it should be protected. But while this would settle the present difficulty in a fair, honest, and statesmanlike manner, yet, to my mind, the general good to posterity, to civilization, and to humanity that would be accomplished would far outweigh the importance of the present dispute. It would satisfy the world of the honesty of our contention and convince all civilization that we are ready to abide by the fair and honest judgment of honest men. It would establish a precedent that would bring forth much fruit long after all of us have passed away. It would bring the nations of the world to a realization of the great demand of humanity everywhere, that every honest nation ought to be willing to submit every honest dispute to a trial in reason's court. It would be one of the greatest steps toward bringing the nations of the world together upon the highest pedestal of civilization that history has ever seen, and if we adopt this amendment—and that time shall eventually come, as I believe it must, when all the civilized nations of the world shall enter the great international temple of reason and of justice—the flag that by common consent of the assembled nations shall float above all others will be that unstained banner—that emlem of freedom and of justice—our own Stars and Stripes.

During the delivery of Mr. NORRIS's speech,

The VICE PRESIDENT. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. MCCUMBER. Without formally laying it aside, I presume the Senator from Nebraska can go right on and finish his address if he desires.

The VICE PRESIDENT. The Senator from Nebraska will proceed.

After the conclusion of Mr. NORRIS's speech,

INSPECTION AND GRADING OF GRAIN.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. STERLING. Mr. President, my chief excuse for occupying the time of the Senate briefly now is that I may bring into the RECORD at this time and present to the Senate some documents of recent date bearing upon the question of Federal grain inspection. But, first, before coming to that, I must confess some surprise at the turn this discussion has from time to time taken. One might infer, from some of the denunciations of the bill now under consideration, that the Senator from North Dakota [Mr. MCCUMBER], the author of the bill, had committed an affront against the intelligence of the Senate in bringing forward such a bill for its consideration; this, too, Mr. President, notwithstanding the fact that one of the most distinguished Senators who ever occupied a seat in this body was, as I recall, the author of the first bill for Federal grain inspection introduced in the Senate; notwithstanding the fact, too, that two Secretaries of Agriculture have advocated Federal grain inspection; and notwithstanding the fact that it was earnestly advocated by the President of the United States, in a message to the Sixtieth Congress.

We might infer from some of the arguments adduced against the bill, or rather from some of the statements made against the bill, that its effect would be to destroy the grain market; that the buying and selling of grain as a legitimate and independent business would be interfered with; and that the ordinary incentive which men have for dealing in a great marketable commodity would be crushed. One might think, too, according to the view of some of the Senators in opposition, that the operation of the law of supply and demand would cease if this bill should become a law.

Mr. President, we know that none of these things would happen to the hurt of any legitimate grain business. On the face of it, there is no reason why they should happen. In the long and exhaustive arguments against the bill no reason has been advanced showing why anything should happen injurious to the grain trade or any legitimate grain business, intrastate or interstate. With slight exceptions, the whole argument in opposition is based on the efficiency of the State inspection laws of a few States in the Union.

The Senator from Massachusetts [Mr. LODGE] has spoken for the chamber of commerce inspection and its relation particularly to the export trade, while the Senator from Minnesota [Mr. NELSON], the Senator from Illinois [Mr. SHERMAN], and the Senator from Missouri [Mr. REED] have appeared as the champions of State inspection.

Mr. President, what magic can there be about a system of State inspection that makes it par excellence over and above and better than anything else that can be devised, the supplanting of which would bring havoc or disturbance to the grain trade? What else is inspection, when justly and honestly administered and kept within its legitimate sphere, but the expert examination of different kinds and qualities of grain, in the course of shipment or delivery, with a view to determining the true quality or grade according to certain rules and tests to be applied, and from those determining the market price which the seller, whether he be the producer or whether he be some middleman, should receive for the grain?

I think, Mr. President, that it must be agreed that this is of the essence of proper inspection under any State system, and it must be the essence of any system of Federal inspection. If State inspection proper does not injure business or make chaos in the grain market, why should Federal inspection disturb the interstate grain business?

Mr. President, either system of inspection—State or Federal—will primarily involve just three processes, and no more:

First, the law or the rule fixing standards; second, examinations, tests, and comparisons of grain with the standards; and third, the judgment or decision as to what grade the particular grain belongs. So, taking it on our common understanding now as to what inspection really is, the inspection contemplated by this bill, if you please, we must conclude that no business upheaval will result from the adoption of a Federal system of grain inspection.

The opponents of the bill claim to see advantages of State inspection; nay, more, they see the very necessity of some system of inspection. It is essential, they will admit, to the safe conduct of the wheat trade, flax trade, or oats trade, essential to prevent imposition and fraud, essential to the protection of both producer and consumer, and Senators from States with State systems of inspection have realized the frailties of board-of-trade systems and have made inspection a Government function, or a function under Government control in the States.

Is the inspection of grain in the course of interstate commerce a proper State function? It may be. I am not disputing the proposition that within limits it is, and especially when there is no other system of inspection provided; but I contend that it is more properly a subject of Federal control and Federal inspection than it is of State inspection.

In this connection, Mr. President, I call attention to the views of the court as expressed in the case of Globe Elevator Co. against Andrew, the opinion rendered by Justice Sanborn, of the circuit court of appeals, and found in 144 Federal Reporter at page 872. In the course of the opinion, after having decided that the Wisconsin law was in violation of the provision of the Constitution relating to interstate commerce, the court says:

It is also clear to me that so important a matter as fixing the grades by which grain in interstate transportation can be sold, and without which it can not be sold on any large scale, admits of one uniform system or plan of regulation, and only one, and therefore falls within the exclusive power of Congress.

Certainly it can not readily be bought and sold according to two systems of inspection. The point is that where we have State inspection we are liable to have, and will have, more than the one system of inspection, and the likelihood is that no two States, whatever their situation with reference to each other, whether they are adjoining or not, whatever their situation with reference to the production of grain or particular kinds of grain, will agree in their systems of inspection. In any event there is no force or power that will compel them to agree.

The court says:

It can not be bought by one and sold by another. Conflicting State systems would only obstruct. Like the regulation of tolls on an interstate bridge, the fixing of a standard of sale for grain moving in interstate commerce admits of only one uniform system. Because also the control of this great grain trade has become a matter of rivalry and commercial conflict between two States and agencies acting under their respective laws leads me to think that the subject is one of National and not State regulation. The power vested in Congress to regulate commerce among the States was designed to prevent commercial conflicts among them. The purpose of committing to Congress the regulation of commerce was to insure equality of commercial facilities by preventing one State from building up her own trade at the expense of sister States.

And, Mr. President, this case itself grew out of the effort on the part of one State by its inspection law to build up its grain trade as against that of another State.

It was to prevent unjust and invidious distinctions which local jealousies or local and partial interests might be disposed to introduce and maintain. These were the views pressed upon the public attention by the advocates for the adoption of the Constitution and the expositions of that instrument by the Supreme Court have been in accordance therewith. It is undoubtedly true that among the reasons, if not the strongest reasons, for placing the power in Congress to regulate interstate commerce was to insure uniformity of regulations against conflicting and discriminating State legislation. Does not a commercial conflict exist between the agencies of the two States, each struggling to maintain necessarily antagonistic systems of inspection?—

Referring to the States of Minnesota and Wisconsin—

Is not Minnesota building up her own trade in grain at the expense of Wisconsin, and is not Wisconsin fairly entitled to her share, and is not Wisconsin attempting to get not only her share but complete domination of the inspection, weighing, and sale of grain? Both systems, as I think, should be held to amount to regulations of interstate commerce not within the concurrent powers of State and Nation, but exclusively subject to congressional control.

Mr. President, under a State system of inspection, granting that conditions may be different now as between Wisconsin and the State of Minnesota, there is the condition described, which may occur at any time as between two rival States in the matter of the shipment and control of grain.

Mr. President, reference has been made in the course of the discussion—and it is for that more particularly that I arose—to the fact that the hearings from which arguments have been deduced in favor of this bill were away back in 1906, 1907, and 1908; that that is now ancient history; and that we can not rely on those hearings to show present need or demands. The documents to which I shall now call attention are not ancient history. I wish to read an extract from a letter received from a gentleman in Illinois by the name of Thomas Lamb—an old acquaintance of mine. I have known him for a little more than 35 years. He is one of the most prominent and one of the most reliable citizens of that State. He was raised a farmer, on a farm near the little town of Bement, Ill. He was a prosperous farmer; he has been in the grain business for many years, and is now at the head of a grain elevator company at his home town. I think he was either the president or the secretary of the State Cooperative Grain Association; I am not sure which office he held, but he had some high official position there. His letter is of date April 13, 1914. Mr. Lamb says:

We want Federal inspection under civil-service rules. A grain inspector should not hold his job as a political appointment. He should know his business and not be beholden for his job to those commercial interests which control the politics which for the time being dictates the choice of the inspector for the benefit of the commercial interests which practically own the man and the job. The argument for Federal inspection is summed up thus:

The Chicago grain market is dominated by certain allied big corporations. They control the public warehouse system and, through it, monopolize the handling of grain coming to Chicago. The law against warehousemen storing their own grain has been broken down, and warehouses have been converted into hospitals for taking in of low grades and taking out of higher grades for the profit and advantage of the grain combine. The inspection is of vital importance in the working of this game. Hence the Chicago grain trade is in Illinois politics, and no man could be appointed State grain inspector who was persona non grata to the grain crowd. Hence the need for a system of Federal inspection to divorce this function from local or State politics as the only guaranty of a square deal to both producer and consumer.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). Does the Senator from South Dakota yield to the Senator from Idaho?

Mr. STERLING. I yield, with pleasure.

Mr. BORAH. I want to ask the Senator if he proposes before he sits down to discuss the difference between this bill and the general principles of the bill which, I understand, is going to be offered as a substitute?

Mr. STERLING. Mr. President, I have hardly thought of doing that. There has been a general feeling that the time would be limited, and I had not thought to go into that discussion. I think perhaps the Senator from North Dakota [Mr. MCCUMBER] may consider that somewhat.

Mr. President, the writer of the letter just read corroborates exactly what appears in the report of the committee filed February, 1914. Reference is made in the letter to the grain hospitals, where the grain is doctored. Mr. President, when 100,000 bushels of No. 1 northern, 141,000 bushels of No. 2 northern, 272,000 bushels of No. 3 northern, 201,000 bushels of No. 4, and 116,000 bushels of no-grade grain, and 60,000 bushels of what is called "rejected" go into an elevator within three months as the entire receipts of that elevator, and that same wheat goes out of the elevator in the form of 196,000 bushels of No. 1 instead of 100,000 bushels, 468,000 bushels of No. 2 instead of 141,000 bushels of No. 2, 213,000 bushels of No. 3, with nothing going out as No. 4 at all, nothing going out as "no grade," nothing going out as "rejected," it shows that there has been some "doctoring" at the place you are pleased to call "a grain hospital." Eighty-three thousand seven hundred and twenty dollars and sixty-nine cents was the snug profit realized in these three months over and above legitimate elevator charges. It was a hospital, Mr. President, but not a charity institution.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Missouri?

Mr. STERLING. I yield to the Senator.

Mr. REED. The Senator, I understand, is quoting from the figures of the report?

Mr. STERLING. Yes, sir.

Mr. REED. I call his attention to the fact that the report itself shows the item "on hand (estimated), 12,733.10 bushels"; that is to say, the receipts exceeded the shipments by 12,733 bushels. Does the Senator want us to understand that the taking of that much false material out of wheat might not improve the grade?

Mr. STERLING. Mr. President, in answer to that I will say that I have not yet quoted the whole report. I ask leave, Mr. President, to incorporate here as a part of my remarks the one paragraph, paragraph No. 12 of the report, including the table from which I made the summary a moment ago.

The PRESIDING OFFICER. Without objection, that may be done.

The matter referred to is as follows:

(12) A report from a committee appointed by the Bankers' Association of North Dakota, which takes its figures from the records of the grain-inspection department of Minnesota, shows the following table of receipts and shipments of a single terminal elevator for only three months:

	Receipts.	Shipments.
	Bushels.	*Bushels.*
No. 1 northern	99,711.40	106,288.30
No. 2 northern	141,455.10	467,764.00
No. 3 northern	272,047.20	213,459.30
No. 4	201,267.20	None.
No grade	116,021.10	None.
Rejected	59,742.30	None.
	890,245.10	877,512.00
On hand (estimated)		12,733.10
		890,245.10

The profit in mixing at this elevator for three months, as shown by their report, over and above the regular elevator charges, was $83,720.69. There should be added to this the amount realized from the screenings at about $8 per ton.

A glance at this table will show that there were shipped out of this elevator about twice as many bushels of No. 1 northern as were received in; that there were shipped out about three and one-half times as many bushels of No. 2 northern as were received in. It will also show that 201,000 bushels of No. 4 were received in and none shipped out; that 116,000 bushels of "no grade" were received in and none shipped out, and about 60,000 bushels of "rejected" were received in and none shipped out. In other words, about one-half of the entire grain received in passed from No. 4, "no grade" and "rejected," to No. 1 and No. 2. Anyone acquainted with the grain trade will know at a glance that this great difference arising from changing a grade from a low grade to two or three grades higher, whereby all of the lower grades are entirely lost, could not be produced by any system of mixing if both the inspection in and the inspection out were made by the same standard.

Mr. STERLING. That table will show that 12,733.10 bushels was the estimated amount on hand after the various shipments; and so, by taking into account all that was shipped out, with the estimated amount on hand, every bushel of wheat received into the elevator is accounted for.

Mr. REED. Of course, the Senator knows—and we ought to discuss this question, I think, with a view to getting at the facts—that if wheat is carried into an elevator and run through the separating machinery of the elevator there is bound to be a loss in weight, because there is false material taken out. The Senator does not want us to understand, I think, that he is asserting that the books of this elevator company showed exactly the same amount of wheat on hand or shipped out that had come in. Does he not think that what this statement means is that there was added to the wheat which had been shipped out a sufficient amount to balance the two accounts?

Mr. STERLING. Mr. President, in answer to that, I will say that I have no reason for so thinking. I take the table with the statement it contains, and the statement is to the effect that there were 12,733.10 bushels on hand after all the shipments which are described in the table.

Mr. REED. But the Senator omits a very important word that is the key to the whole situation—the word "estimated."

Mr. STERLING. No; I will say to the Senator he has misunderstood me. I have again and again stated that that was the estimated amount.

Mr. REED. Now——

Mr. STERLING. Let me say——

Mr. REED. Certainly.

Mr. STERLING. I think the Senator is aware of that fact. This investigation was first made by the Bankers' Association of North Dakota, and the committee embodies the bankers' report in this report, and this report must be accurate.

Mr. REED. I do not want to trench upon the Senator's time or his patience, but he made the statement that there was the same amount of grain shipped out as had come in, or else that that amount was on hand. I called his attention then to the item of twelve thousand and odd bushels, and asked him if he did not understand that that was a mere estimate, and that it probably represented the refuse matter that had been taken out. The Senator, in reply to that, referring to the table, spoke of the amount on hand as though it were wheat and as though it had been measured or weighed and found to be wheat, and omitted the very important words "on hand" and then the word "estimated." In other words, does not the Senator draw the deduction that this committee, having found the amount that was shipped in and having found the amount that was shipped out, estimated that there must be something on hand?

Mr. STERLING. Mr. President, I think there was no estimation here by the committee of dirt or chaff, but it was an estimate, as the report says, of wheat on hand.

Mr. REED. Would the Senator, then, want us to understand that there went through the elevator these hundreds of thousands of bushels of wheat, that there was not even a pound of dirt taken out of it, and that exactly the same amount was shipped out that was shipped in, or else was on hand in the shape of wheat?

Mr. McCUMBER. Mr. President, will the Senator from South Dakota allow me to make that as clear as it is possible, at least for me, to make it?

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from North Dakota?

Mr. STERLING. I yield to the Senator.

Mr. McCUMBER. Let me give an illustration. Suppose I ship a car of 1,500 bushels of wheat to the terminal at Minneapolis. That wheat is graded and classified as No. 2 northern, with 2 pounds per bushel off. That means that there is taken off for dirt and chaff two times 1,500, or 3,000 pounds, which amounts on that shipment to 50 bushels. When the elevator takes that wheat in, according to its books and accounting it takes into its elevator not 1,500 bushels, but 1,450 bushels of wheat. The chaff, the stuff that is allowed for cleanings, and so forth, which is supposed to be accurately estimated and measured, is not put on the debit side of the elevator ledger at all, but 50 bushels less, if the dockage is 2 pounds to the bushel, as it was in the instance which I have stated, and in that case the chaff, dirt, and such stuff is simply sold independent of the grain. It is not sold for wheat, nor is it estimated for even in inspecting the grain into the elevator or in inspecting it out of the elevator.

Mr. REED. Mr. President, I did not address my interrogatory to the Senator from North Dakota, but since he has come into the arena, it would be very interesting to know upon what testimony he bases that statement, and to have it brought down to date and to present the conditions. I have not seen any such testimony.

Mr. STERLING. Mr. President, I thank the Senator from North Dakota for his very clear illustration of the point. These figures show that somebody has been wronged; they show the rigid inspection into the elevator, whereby wheat is graded lower than it should be graded, and the liberal or loose inspection out of the elevator. The result of the practice has been that the producer of wheat has not been given a square deal; not having received the grade to which he is entitled, he has been denied the fair market price the proper grading would have brought him.

Now, Mr. President, to refute the statement so frequently made that the complaints against present systems of inspection do not exist at the present time, I call attention to a further communication. These are the resolutions adopted in February last by the board of directors of the Farmers' Cooperative Association of South Dakota:

Whereas conditions surrounding the inspection of grain entering into interstate commerce are open to severe criticism because of the local influence that manifests itself, and the charges of a rigid inspection in and an easy inspection out that in the absence of standardized grades inspection is permitted at any and all grain centers, thereby subjecting shipments to the judgment of different inspectors while in transit from the shipper and producer to the seller or consumer; that cars grading No. 1 at one point may grade No. 2 and even 3 before reaching their destination; this has a demoralizing effect on the grain trade, and is confusing to the shipper, until the shipper is unable to establish a grade on his shipment with any degree of accuracy; and

Whereas a uniform grade established for the entire country and inspected by a board appointed by the Federal Government under the civil-service rules would tend to reestablish confidence in the entire grain trade and form a basis upon which to adjust differences between shipper and seller or buyer: Therefore be it

Resolved, That a law be enacted by the United States Congress providing for Federal inspection, standardization of grades, and weighing of grain entering into interstate commerce.

These resolutions are not ancient history. As I stated, they were adopted February 2 last, and similar resolutions were adopted by the same association at its annual meeting in 1913.

Mr. President, the evidence in this respect is cumulative. We can not escape from the fact that the grain dealers' associations throughout the country and the farmers' cooperative associations dealing in grain are in favor of the proposed Federal legislation.

I read now an extract from a letter which I presented and had printed in the RECORD on April 1. My object is that these expressions may be brought together here at this time in the discussion of this question. The letter is from W. J. Ray, secretary of the National Council of Farmers' Cooperative Associations and secretary of the Farmers' Grain Dealers' Association, of Iowa. I do not know Mr. Ray personally, but I have made some inquiry in regard to Mr. Ray's standing and responsibility, and I am assured that he is a man who is held in high esteem for his honor, his integrity, and his business ability.

The letter is addressed to myself, and among other things the writer says:

I, as secretary of the National Council of Farmers' Cooperative Associations and secretary of the Farmers' Grain Dealers' Association of Iowa, appeal to you to use due wisdom in this matter of grain inspection. Of seven States I represent as secretary of the National Council—Iowa, Kansas, Nebraska, South Dakota, North Dakota, Minnesota, and Illinois—there are approximately 1,800 farmers' elevators or grain companies. This represents approximately 245,000 stockholders, generally producers of grain. Three hundred and sixty companies of Iowa, 48,000 members, are shippers and producers of grain.

Through correspondence and filing of information documents by these local companies to these separate secretaries and the centralization of them all, I find that they almost unanimously request, desire, and appeal for Federal inspection of grains under civil service. We think this will be the most perfect, proper, and just method of handling the grain-inspection department of all terminal markets, making them governmental departments of inspection, appointed or elected by the Government or Department of Agriculture.

Mr. President, what better evidence do we need than the reading of these documents affords in regard to the sentiment of the grain-producing interests throughout this country, and especially throughout the Middle West, the West, and the Northwest?

I am sometimes inclined to ask, Mr. President, who are represented by the opposition to this bill. Whatever else that opposition represents we know that it represents the business of buying and selling grain in the great cities. It is from this interest and not from the people of the country that the opposition comes.

The Senators on the other side of the proposition may in good faith believe that by representing these interests they are representing the interests of the whole country. I am not questioning that they do so believe in good faith; but here is the evidence to the contrary. All of these associations, all of these elevator companies scattered throughout the country, at the places at which the farmer sells his grain, are in favor of Federal inspection.

I can not help the conclusion that in view of the fact that this is so appropriately and so properly a question for Federal regulation, one affecting so materially our interstate commerce, we can do no more appropriate or beneficial thing than to enact this legislation, for which there has long been such general demand.

Mr. CRAWFORD obtained the floor.

Mr. McCUMBER. Mr. President, if the Senator from South Dakota will yield to me for a moment, I wish to say that it has been urged that there is only one State, namely, North Dakota, that is asking for this legislation. The Senator who has just spoken and the Senator who is about to speak represent another one of the greatest grain-raising States in the United States. I feel that they ought to be able to speak to more than four Senators, and I therefore suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Brady	Hitchcock	Page	Smoot
Brandegee	Hughes	Perkins	Sterling
Bristow	Johnson	Reed	Swanson
Bryan	Jones	Robinson	Thomas
Burton	Kern	Shafroth	Thompson
Catron	Lea, Tenn.	Sheppard	Thornton
Chamberlain	Lewis	Sherman	Vardaman
Clark, Wyo.	McCumber	Shively	Warren
Clarke, Ark.	Martine, N. J.	Simmons	West
Crawford	Nelson	Smith, Ga.	Works
Cummins	Norris	Smith, Md.	
Dillingham	O'Gorman	Smith, Mich.	
Fall	Oliver	Smith, S. C.	

Mr. PAGE. I was requested to announce that the senior Senator from Wisconsin [Mr. LA FOLLETTE], the senior Senator from Arizona [Mr. ASHURST], the junior Senator from Minnesota [Mr. CLAPP], and the junior Senator from Oregon [Mr. LANE] are absent on official duty.

Mr. SMOOT. I desire to announce the unavoidable absence of the senior Senator from Kentucky [Mr. BRADLEY] and the junior Senator from Wisconsin [Mr. STEPHENSON].

Mr. SMITH of Maryland. I desire to announce that the junior Senator from Delaware [Mr. SAULSBURY] is unavoidably absent. He is paired with the junior Senator from Rhode Island [Mr. COLT].

The PRESIDING OFFICER. Forty-nine Senators have answered to their names. A quorum of the Senate is present.

Mr. CRAWFORD. Mr. President, so far as any intention of mine to address the Senate is concerned, it was wholly unnecessary to raise the question of the presence of a quorum, because I rose to say only a single word in regard to this bill.

It has been discussed at great length. A great mass of testimony from those directly interested has been placed in the RECORD. Coming, as I do, however, from one of the great States of the Northwest, in which the principal avocation of the people is the raising and marketing of cereals, I have felt that it was hardly fair for those of us representing other States to leave the distinguished senior Senator from North Dakota [Mr. MCCUMBER] to carry the entire burden of supporting this measure so far as presenting it to the Senate and manifesting interest in it is concerned.

I was a member of the committee which several years ago gave hearings and took considerable testimony in relation to the merits of this bill. The testimony that had been taken before that time, in a large volume, when the late Senator from Iowa [Mr. Dolliver] was chairman of the Committee on Agriculture and Forestry, went into the matter exhaustively. That testimony is here in the record. The fact that the hearings have not been repeated every year since signifies nothing more than that the testimony taken at the first hearings has practically gone unchallenged from that time until now. I know, from being in touch with the men engaged in the local elevator business in my State, that since those hearings, at the annual gatherings of their conventions, declarations have been made in favor of this legislation.

These people believe, and I think they have good reason for believing, that the method of inspection which now prevails is one in which the men who make the inspection are largely under the influence of the terminal elevators; that the men upon boards of trade and chambers of commerce, who are engaged in many ways in speculating upon margins and selling futures, have a larger influence over the inspectors and the results of their work than is fair to the producers, who unload the grain from the wagons at the elevators throughout the country; and that, as indicated by the testimony, the grain which the farmer markets and sells upon a certain standard in his locality goes into the elevator upon that grade and comes out for sale at a higher and a different grade, which gives an undue advantage to the middleman who is handling it in these large centers.

It seems to me very reasonable to conclude that a system in which the selection of inspectors is influenced by the boards of trade and chambers of commerce, or where it is influenced by a local political situation, where the men naturally are under obligations of that kind, can not equal in efficiency and impartiality a civil-service system of Federal inspection which will be independent of influences of that character, and that it will promote uniformity and coordination to make the system country-wide and put it under the jurisdiction of the Federal Government.

To have inspectors across the river in Kansas City, Kans., acting under the influence of a board there and under a law of the State of Kansas, make one inspection, and then to have another set of inspectors in Kansas City, Mo., acting under the influence of a chamber of commerce there and under a law of the State of Missouri, make another inspection, in the very nature of things creates confusion, strife based upon selfish interests, and danger of abuse that would not be incident to a system under the supervision of the Federal Government.

My purpose in adding a word here was simply to give testimony to the fact that the interest in this legislation is not confined to the farmers of the State of North Dakota, but is universal throughout the great cereal-producing section of the United States.

Mr. MCCUMBER. Mr. President, in all of my 15 years of service here I do not think I have been accused of being overradical. If there has been any complaint whatever against my course, I think it has been that I have been rather too conservative. I do not think that complaint is entirely justified, because I believe all true progress must necessarily be a conservative progress; but I may use that fact to justify myself in the belief that I have not been radical in formulating this bill and pressing it for adoption before the Senate of the United States.

It has been claimed that the effect of passing this bill will be to disarrange the business of the country. Mr. President, if I believed that was true, even in the slightest degree, I not only would not be supporting this measure to-day but I would vote against its enactment. As a matter of fact, you would not hear the grating of a single cog in the machinery of the grain trade of the country if this bill should go into effect to-morrow. On the contrary, instead of disarranging matters it would bring into harmony all of the great grain centers of the country. If this bill should become a law to-morrow, I could ship two carloads of grain from North Dakota, sending one to Chicago and one to Minneapolis, and I would receive the same kind of a grade and would sell them both upon that grade to the consumers of the country; whereas under the present system if I send one carload to Minneapolis and another carload to Superior or Buffalo, each one of them will have a grading that will have to conform to the rules of the particular locality where it

is graded, thus compelling me to sell each one on a different basis, and, in all probability, upon a different grade, even though they were exactly the same kinds of grain.

Mr. President—and I now desire to direct my remarks especially to Senators on the other side of the Chamber, and more especially to those from the Southern States, where cotton is raised—I voted for your cotton bill the other day. I heard your arguments as to the disastrous effect of the system of grading by the New York exchange upon the farmer who raised cotton. I voted for that bill because I knew and because you knew that if you could prevent that manipulation in grades in the city of New York or elsewhere, which worked detrimentally to your cotton growers, you would get a better price at home.

You had a condition there with which you had to deal. You formulated your bill to meet that condition. You knew more about the condition than I knew about it; but I concurred with you that your remedy probably would be a good one, and conformed my vote to your views.

Now, I do know about the grain-grading business. I have lived all my life in States that were peculiarly agricultural in their industries. I have dealt in and have been connected with grain grading and grain inspection and grain selling all my life. I certainly have the ordinary knowledge of a western farmer upon the subject, and possibly, with the study I have given it, I have more knowledge upon it than the average person in my State.

I can not reach the conditions by such a bill as you brought in to protect your cotton interest, because, while all the evils that flow from the cotton exchanges of the country were in reference to the many kinds of grades and the unjust grades, the evils that affect the grain trade are from the inspection in the first instance. That inspection is not in two or three cities of the United States, but at all the great grain centers, and the only way by which we can secure the relief that we demand is by securing an accurate, a certain, and an honest grade right at the point of first inspection; that is, at each individual car inspected.

Mr. SMITH of Georgia. Mr. President——

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Does the Senator from North Dakota yield to the Senator from Georgia?

Mr. SMITH of Georgia. May I interrupt the Senator?

Mr. McCUMBER. I yield.

Mr. SMITH of Georgia. So far the Government has never standardized wheat?

Mr. McCUMBER. It has not.

Mr. SMITH of Georgia. The present Agricultural appropriation bill carries, I believe, something like $75,000 for that purpose.

Mr. McCUMBER. Yes.

Mr. SMITH of Georgia. That you regard simply as a step in the right direction?

Mr. McCUMBER. Yes.

Mr. SMITH of Georgia. And then after that the Senator thinks it is necessary to have these Government officials to see that they follow those standards?

Mr. McCUMBER. I do; because I claim that we can not have adequate Government supervision unless we have as many supervisors as there are inspectors, so long as there is that close relation between the wheat buyer and the wheat inspector.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Missouri?

Mr. McCUMBER. For a question.

Mr. REED. I did not quite understand the Senator's yielding. Of course, if he means to limit me absolutely to asking a question after I yielded to him yesterday and permitted him to interject four speeches in the middle of my speech, I do not desire to interrupt him at all. I wanted to ask a question in the ordinary manner. I ask the Senator if he charges now that the grain-inspection department of the State of Missouri is under the control of the grain buyers or the grain sellers, and if he answers "yes," I want him to tell me upon what evidence he bases it.

Mr. McCUMBER. Mr. President, in my opinion, from the evidence and from my knowledge, there is not a single inspection system in any one of the great cities, whether the appointments are made directly and controlled by the boards themselves, or whether they are controlled by the State, that is not more or less influenced and dominated by the grain trade. Now, that is as clear as I can make it.

Mr. REED. That is very clear as to the Senator's opinion. It impugns the integrity and the honesty of some of the best citizens of my State. I ask the Senator to call the name of the witness who will make the statement, or who has ever made the statement under oath, that the State grain inspection of Missouri is a dishonest inspection.

Mr. McCUMBER. Mr. President, I am not going over a subject, on which the Senator spent several days, in an attempt to collect the evidence which I did collect in my opening address. In this volume, which contains considerable of the grain hearings, which we have all had before us, the Senator will find all the evidence he desires on that particular point. I will have occasion before I get through to refer to it, and for that reason I would prefer not to yield for any discussion, in order that I may get through in a very short time. I will have occasion to quote from at least one of the boards in one of the great cities of the Senator's own State.

I regret exceedingly, Mr. President, that every Senator here who did not and would not listen to the discussion on either side should not at least have read the testimony that has been taken upon this case. If that testimony had been thoroughly read by Senators here, I doubt if there are many who would have found any excuse to vote against the provisions of the bill.

In these hearings the particular evil practiced under each system has been gone into fully. The testimony came from all over the United States. The testimony took up one of the great centers after another and went fully into the question of the methods of dealing in that particular locality, and every one of the witnesses came back to only one conclusion: That all the evils emanated from the improper inspection, and that the improper inspection was due, to a great extent, to the close relation between the buying interest and the inspection department; and every one of them gives as the only complete remedy the absolute divorce of the buying interest from the weighing or the inspection department.

I think that where we have had State inspection it is a great improvement over board inspection. I want to say, further, that I believe the system in the State of Minnesota, if it is properly executed, is one of the best in the United States. I am perfectly willing to give that system that credit. But until we can have Federal inspection, not merely supervision, we shall be unable to prevent the abuses that are possible under that system.

Mr. President, all who gave their testimony before the committee are gentlemen who have had years of experience in the grain trade, and I certainly believe that they are all honest men. I know some of them; I know of their special acquaintance with the business; and if you will read their testimony you can judge for yourself both as to its accuracy and as to its reasonableness. The conclusion I say is this: Divorce your inspection from your buying interest and you will have reached a complete remedy, or a remedy as complete as it is possible to be made in the systems. Where it is governed by the board of trade, as every one knows, the board of trade or the chambers of commerce employ all the inspectors, and they are not only under their domination, but they are their actual agents. Thus you have in the buyer, the weigher, and the inspector practically one man.

I may have entire confidence in the Senator from Colorado [Mr. SHAFROTH], and I would be willing to sell him a load of hay or a load of wheat and allow him to weigh it and inspect it, although he was buying it, and I would take his word for it, but I might not be willing to trust anyone else or everyone else I might deal with in exactly the same way. There is the temptation always to make your rules conform to your particular interest. The people who are engaged in the wheat-buying business are intent to make as much out of it as they reasonably can, and they, like all other human beings, will conform their rules toward that particular end.

In order that the producer of the grain may have an equal opportunity and as fair a degree of justice, all we are asking in this instance is that we may substitute a disinterested party who can not be in any way either influenced or controlled. I know the Senator from Minnesota [Mr. NELSON], the Senator from Missouri [Mr. REED], and the Senator from Illinois [Mr. SHERMAN] say that we have accomplished this when we have adopted State inspection, which takes it entirely without the control of the local board or anything of that kind. To some extent they have done so.

Mr. NELSON. Will the Senator yield to me for a minute?

Mr. McCUMBER. I yield.

Mr. NELSON. I want to say to the Senator from North Dakota that the State inspection system of Minnesota has nothing at all to do with buying the grain. Our system is as much divorced from that as the Senator from North Dakota is. That system never has had anything to do with the buying of the grain. The buyers of the grain are the men who operate the elevators, and they have no control or management over the

State inspection service. It is as much divorced from it as it is possible to divorce one service from another.

Mr. McCUMBER. I just stated, Mr. President, that that was the claim of the Senator. So far as the law reads that might be said to be true, and so far as the rules are concerned that might be said to be true.

Mr. NELSON. Is it not true as a matter of fact?

Mr. McCUMBER. No; Mr. President. I insist that it is not true as a matter of fact. It may be true to-day; it may be true that for a few years it has been the fact; but under the same law, according to the evidence which has been introduced in this case, and I will give but a single instance of it, I will show that it does not always work justly. Here is an undisputed case. I know it is a single case, and it is a single case, possibly, of dishonesty, but I can not square it with any honest purpose.

It is the instance I cited here in which there was a corner in the market, either in Duluth or Chicago, I think in Chicago, one of the Leiter corners. Two hundred thousand bushels of grain had been given a No. 2 grade. It had been given that grade in the elevator. It was necessary to use that grain to get it into the Chicago market and break the corner. An attempt was made for a reinspection, and in the reinspection the inspection department of Minnesota refused to change its grade. An appeal was taken, and the refusal to change its grade was again sustained. They held it was No. 2 and could not be used on the contract grade. Once again an attempt was made, not as an appeal, but an order went forth to grant it as No. 1, and it was graded as No. 1 and was thrown in to break that market.

Mr. REED. May I ask the Senator——

Mr. McCUMBER. Mr. President, I do not know; I simply say it is quite evident that there was some wrong influence at work, and it was worked upon somebody or something that was capable of being influenced. It is not that the law is not a good law, not that the system may not be all right, but I want to get the temptation far removed, and I have more confidence after all in the Government in being uninfluenced than I have in any State board or any single individual.

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Missouri?

Mr. McCUMBER. For a question.

Mr. REED. Just for light. The Senator referred to the wheat deal known as the Leiter deal, and stated that that grain had gone into an elevator inspected as No. 2; that there was another inspection demanded and it still stood as No. 2, and a third and it still stood at No. 2, and then the order went forth to change it to No. 1. Now, who issued that order? Where is the evidence that there was such an order issued?

Mr. McCUMBER. Right in this book; but I am not going to stop and turn to it now.

Mr. REED. I wish the Senator would find it. I am seeking light.

Mr. McCUMBER. I can not go back into all the evidence that was given. It is a part of the testimony here. Each time the Senator asks where one can get that evidence I can not stop and read it. The evidence was taken. I am not going to quote anything that is not in the evidence.

Mr. REED. I thought the Senator might tell me whether that order was issued by Mr. Leiter, or whether it was issued by the governor of the State of Minnesota.

Mr. McCUMBER. It could not have been issued by anybody but the head of the grading department, if issued at all.

Mr. REED. Could the Senator cite me to the page of the record so that I may read that remarkable testimony?

Mr. McCUMBER. I could not do it. I can not take the time to look it up now.

Mr. REED. Very well.

Mr. McCUMBER. Mr. President, I wish to make plain the system of handling grain in our State. I can not make it plain to the Senator from Missouri, because he will deny that I make accurate statements and will insist that I must bring some evidence from this record.

Mr. REED. No, Mr. President.

Mr. McCUMBER. Right in the beginning I want to compliment the Minnesota system of dockage as being preferable to the other system, where a lower grade is given instead of docking when the grain is not clean.

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Missouri?

Mr. McCUMBER. I yield, Mr. President.

Mr. REED. The Senator ought not to have made the remark that I would challenge his statement of fact. I have not impugned the integrity of the Senator, and I do not intend to do so; but when a Senator states a thing as his deduction or conclusion, it is entirely proper for another Senator to ask him for a citation of the evidence.

That means no more than that the other Senator might possibly like to examine the evidence and reserve the right to arrive at another conclusion. That is the only reason why I interrupted him. I want the Senator to understand that I have not impugned his integrity, and he ought not to put into the RECORD a statement which indicates that I have so demeaned myself as to challenge his word. I have not done that. I differ from the Senator very radically on this bill, but I can differ from a man and still regard him as a gentleman and demean myself as a gentleman.

Mr. McCUMBER. I gave a short time ago, Mr. President, an illustration of how the business was done in the elevator that was referred to by the Senator from South Dakota, and the Senator from Missouri desired me to show any evidence of any such a method of dealing. Mr. President, we who deal with that market every day know how the business is done, and I am going to repeat the statement. If I have 1,500 bushels of wheat and ship it to Minneapolis, it may be graded No. 2, with 2 pounds off. The 2 pounds on 1,500 bushels would mean 3,000 pounds, or 50 bushels; in other words, 50 bushels of the actual weight of all I have in that car are taken out for weeds and foul seed or whatever they may find in it. Then when that is taken into the elevator the elevator reports to the Minnesota board that it has taken in not 1,500 bushels but 1,450 bushels, which is correct. That is what it has taken in in wheat. The other is foul stuff. There will be sent to me a certificate, and that certificate will recite that there are 1,500 bushels of wheat, less 2 pounds per bushel dockage, net 1,450 bushels, and I am credited with 1,450 bushels, and when I receive my pay for it I am paid for 1,450 bushels and not for 1,500 bushels. So when the elevator takes that in it has taken in 1,450 bushels of wheat and not 1,500 bushels, because there is no account made of the chaff and foul stuff.

Now, how is this foul matter taken out? While the elevator actually takes in the 1,500 bushels, there are only 1,450 bushels of real good wheat. That is immediately elevated. As it is elevated it passes through a suction draft, where it whirls around pretty lively and all this lighter stuff is taken out. So by the time it gets up to the bin where it is finally to be placed practically all the foul stuff is taken out and only the good wheat is binned.

Ordinarily if the inspector has made a fair inspection the foreign matter that is taken out will just about equal the dockage. That foreign matter is taken and, as a rule, some of it is cleaned over again and sold perhaps for a lower grade of grain. The rest of it is ground into what they call cattle feed and sold, as shown here, for about $8 a ton. In other words, the estimate is that all the foul seed, and so forth, that is taken out is generally sold for $8 a ton. That pays the elevator owner fairly well for the mere matter of elevating and getting out the foul stuff.

But we are not complaining about that, because if the farmer wants to sell clean wheat, as was stated by the Senator from Minnesota, all he has to do is to put it through a fanning mill, and then possibly there will be no deduction whatever for weeds, and so forth. He does not do it in my State for a good reason, because the cost of handling that grain from the thrashing machine, bringing it to the granary, unloading it, putting it in the bin, running it through a fanning mill, and hauling back again would more than make the difference in the dockage. Therefore, as a rule, it is more profitable to send it right from the machine and have the docking done at the terminal, even though he has to pay the freight, and that explains why he does not use the fanning mill and answers the inquiry which was made by the Senator from Minnesota.

Mr. President, I want to call attention again to this table for another reason. No one questions the integrity of this table. It was not made by political farmers such as have been denounced here, but the bankers' association of my State, knowing from their own dealings in grain that the system was not working accurately and justly, appointed their own committee and made an investigation, and they made this report. They took but a single elevator. I want to call attention to that again. There were inspected in the particular elevator 90,000 bushels of No. 1. There were inspected out of it 196,000 bushels, or nearly twice as many bushels. There were inspected into it 141,000 bushels of No. 2. There were inspected out of it 467,000 bushels, or over three times as many bushels. There were taken into it 201,000 bushels of No. 4. There was not a bushel of No. 4 that went out. There were taken into it 116,000 bushels of no grade, which is worse than No. 4, and not a bushel of that was shipped out. There were taken into it about 60,000

bushels of rejected, which is worse than no grade, and not a bushel of that was shipped out.

So you will see that all these lower grades were metamorphosed into higher grades. That could be done to some extent, and be honestly and fairly done, and I will show you how it could be done. If I have 200,000 bushels of very good grade of No. 1 and buy 100,000 bushels of a fair grade of No. 2, I might mix the No. 2 with the 200,000 bushels of No. 1 and make it all a No. 1 grade. That can be done and that is legitimate and proper mixing.

All I want to say of this particular table is that it is evident that so far as the dealing with that elevator is concerned it was possible, under this good law of the State of Minnesota, that somebody was imposed upon. There can not, by any system of mixing upon the face of the earth, be brought about a result of that kind. No one has denied that table or denied that it is accurate in any respect whatever.

I want to agree with the Senator from Minnesota that any such rank violation of the good of the law of the State of Minnesota may not be practiced to-day, but what I insist upon is that under that law and under that system it has been done for years and can be continued to be done.

These were not all the tables that have been introduced along that line. On the contrary, I introduced in the evidence the tables covering a number of years of the shippings in and the shippings out of the elevators in the State of Minnesota, and in every word that I am uttering I am not impugning the honesty or integrity, but rather showing the inefficiency of the system. It is inefficient in that it has been and can be imposed upon, and I can still give another reason.

I want to call attention to another table here. It is on page 297 of the testimony. There are covered three years, and while it does not show such rank conditions between the shipping in of a grade into an elevator and the shipping out, it does show such an enormous difference that it would be impossible to secure that difference with any legitimate method of doing business. I will not stop to quote it, but I simply call attention to it.

Now, Mr. President, I want to call attention to another matter, because it relates to the same thing. The Senator from Minnesota says that his system is as perfect as it can be made. The Senator from Minnesota takes a just pride in the Minnesota system, because he was really the father of it, and it has been close to his heart all the time since. A good system, a much better system, was inaugurated in Minnesota at the time the Senator was governor of that State, and it has been made better year after year as he has stated, and yet under that system, as shown by the resolution of his own State, it has been abused. I want to put the system where that abuse will have to cease.

I want to call attention to the fact that a few years ago, on the first day of the meeting of the Minnesota Legislature in 1899—this Minnesota law is much older than that—a resolution was introduced which reads as follows:

> Whereas it has been freely charged that the department of grain inspection has become corrupt; that the inspection has been in the interest of the buyer as against the shipper and producers; that grain has been inspected in as No. 2 or 3 and inspected out as No. 1; that the dockage has been unreasonable, unjust, and excessive; that the department has employed incompetent and corrupt men as inspectors; that the only qualification necessary to secure a place on the force was a political pull; that a large number of men have been employed that have performed no other services for the State save and except they have regularly drawn their salary; that the freight charges on farm produce have been extortionate, unequal, and unjust; that the distribution of cars for the shipment of grain has been unequally distributed and often withheld from independent shippers; that the public elevators, licensed by the State, have formed unjust and corrupt combinations to buy grain at from one to two grades below what it actually was, and to take excessive dockage: Now, therefore, be it
>
> *Resolved*, That a joint committee be appointed to thoroughly investigate all these charges and report by bill or otherwise at their earliest possible convenience.

This came from the same State, and it is not a condemnation of the system at all, but merely a condemnation of the abuses that have been made possible under the system. I should like the Senator's attention to that. This is what that committee of the Minnesota Legislature reported back:

> We find from the evidence produced:
>
> 1. That the grading of wheat has not been uniform; that prior to the month of October the new crop of wheat had not been graded solely on its merits, it being the policy of the inspection department to give lower grades than later.
>
> 2. That the system of appeals from the inspector's decision is impracticable and of little benefit.
>
> 3. That it appears that some of the inspectors have been incompetent or careless.
>
> 4. That the weighing of grain at the terminals is carried on in a loose manner.
>
> 5. That the farmers suffer a great loss by shipping uncleaned wheat and by loading wheat into dirty and unswept cars.
>
> From the investigation had before this committee, it clearly appears to this committee that wheat inspections have not been uniform throughout the year. That the grading of wheat has been rigid during the first three or four weeks of each season and less rigid during the balance of the year, and we can not in too strong language condemn this practice, as it must necessarily result in great loss to the producer, from the fact that a large proportion of the crop has been marketed before the change takes place, and on all the wheat sold prior to that time the loss must necessarily fall on the producer.

That explains to some extent the great discrepancy in the ingrading and the outgrading. Why? Because during the time that the farmer was selling his wheat a rigid inspection had been adopted, and it had been adopted for years. Then, when the farmer had practically disposed of all his grain, this loose inspection, this less rigid inspection, took place, which operated to give a higher grading to the same grain. That has been possible under these State systems and it has been possible, Mr. President, under the best system, in my opinion—and I will agree with the Senator from Minnesota [Mr. NELSON] that it is the best system—in the State of Minnesota. If such a thing is possible under the best system, it is quite probable under the other systems.

I will not go over the Chicago, the Baltimore, and the other methods of inspection and grading, but only say that the testimony here shows a peculiar kind of evil in the trade of each of these centers, all dependent upon the ability to manipulate grades. If you take away that ability to manipulate the grades, you have taken an enormous forward step for the benefit of the grain trade in the United States.

This evidence all shows that the farmer can not depend upon any of these inspections. I can cite you resolutions and pages in this testimony to the effect that our wheat is graded lower and bought lower upon the same grade because of the distrust of the grade and because the purchaser must always take under his contract the particular grade that is certified, and he has no remedy.

Practically all of the millers in the country are for Federal inspection of grain. Why? Because they are consumers; because they are purchasers. They want certainty. They are compelled to buy from a hundred thousand to five hundred thousand bushels, it may be, one month or six months in advance, and they want to know that the grade they are going to get is the grade for which they contract. They say in all of their resolutions which have been introduced here that they can not get that grade at the terminals.

Again all the independent elevators of the country have appealed for Federal inspection of grain; all of the farmers' elevators have been appealing for this inspection of grain. You have just heard read a resolution of February, 1914, representing seven of the greatest grain-growing States in the United States and over eighteen hundred farmers' elevators, including those in the State of Minnesota, the State of Illinois, and other Western States; every one of them demanding not Federal supervision, but Federal inspection, so that they may know what kind of grades they will secure. I have here resolutions and letters from all of the consuming States in the South, every one of them portraying the fact that when they buy corn of a certain grade or when they buy oats of a certain grade they seldom get the grade for which they contract. Now they are asking for relief.

Mr. President, I want to call attention for a moment to the two bills and to make a comparison of them. My bill provides for a Federal standardization of grades. Five years ago every one of these exchanges was fighting it. To-day there is not one of them that is doing so openly, but, on the contrary, they come out now and say that they are for the Lever bill; they want Federal standards.

My bill also calls for uniformity of grade. Every one of these exchanges, who 5 or 10 years ago were fighting with a ferocity that seemed to me to almost verge on insanity, have now come around, and every one of them declares they are in favor of uniformity of grade. They say so, but they do not mean it.

It is possibly best here to explain what uniformity of grade means. The Senator from Missouri [Mr. REED] made a long argument showing the impossibility of securing a grade that would be uniform. Uniformity of grade does not mean that I am to take any blue-stem and velvet chaff and macaroni and half a hundred other kinds and get a single standard that will apply to all; it means that if I take Scotch fife, for instance, that I shall have one, two, three, or four grades of Scotch fife, one or two or three or four grades of blue-stem, and a grade where they are mixed or where one predominates. So with your oats and corn.

As has been stated by the Senator from Minnesota, there are about 12 important species of grain raised in the United States, but there are, in fact, only about 8 important ones, and the others are unimportant. Each one of those is raised in a particular section of the country. You have turkey red; you have winter red; you have winter white; you have the kind of grain

that is raised on the Pacific coast and up in southwestern Canada, the same as we raise in the two Dakotas and Minnesota. All of a particular kind of grain raised in the same section can be graded exactly under the same system. To-day, if I send one carload, as I have said, to one of the States, I get one kind of a grade, and if I send another carload of exactly the same kind to another State, I get another grade; yet they are both sold by their grade and their value represents from 3 to 5 cents difference, according to the grade that is placed upon that grain. It is therefore most essential to me as a seller, and most necessary to you as a buyer, that we shall buy and sell the same grade, whether it is bought in the Chicago market, in the Duluth market, or in the Buffalo market.

We come now to the next comparison. My bill calls for inspection by the Federal Government. The Lever bill, which is to be proposed as a substitute, calls for supervision. It is only just and fair to say that my bill is drawn to conform to the wishes of the consumers and the producers, while the Lever bill is drawn to conform to the wishes of the dealers. It is drawn by them, it is of their nature, it is for them, and it is most natural that it should conform to their views and should facilitate the accomplishment of the end which they desire to accomplish—that is, to make the most out of their business they can under the full and fair terms of the law. My bill conforms to what the millers want; it conforms to what the farmers all over the country want where they have given any expression whatever to their views.

If—

Says the Acting Secretary of Agriculture—

I have Government supervision, I think I can do just as well as though I had the actual inspection.

That is what is said by Mr. Galloway. I wrote to Mr. Galloway asking if he had changed his mind. He replied that he had not changed his mind; that he still could go ahead and do the inspecting. When he was before the committee he declared and Secretary Wilson said:

Yes; we can do this and put the system into operation without any trouble whatever.

I think I know why the present Acting Secretary of Agriculture takes rather a different view from what he did before the committee. He really does not take a different view, for he could not do that; but he supports the other bill simply because he has seen the necessity of it; that with the little farmer organizations and with mighty active boards of trade organizations we have been unable to get a vote of the Senate upon the proposition, and so he has despaired of getting a vote. The bill that they have got is satisfactory to the boards of trade, and if they can put that through they will be satisfied, as they prefer, it is stated, to get half a loaf rather than to get no bread.

Mr. President, there is no supervision in the Lever bill; when you come right down to it, you can not have supervision. The viciousness in the present system everywhere in the United States lies in the possibility of reaching the man who inspects through his friendship, through his acquaintanceship, through that general family relation that exists between the great buying interests and those with whom they are in daily converse and whom they meet day after day, friends and acquaintances. It so happens that they do make those changes; it so happens that they are not always just; and, as stated by the chief inspector of the State of Minnesota, in answer to questions put to him by his own legislature—

Yes; we do grade every year higher when the wheat first comes in. We do this because we do not know exactly what we are up against, and we want to be certain; in other words, we resolve every doubt against the farmer and in favor of the buyer.

That is what it means, and it means nothing else. We want a corps of inspectors who will be absolutely free from such influences, who will not meet demands made upon them, and who, to be sure that the purchaser will be protected at all times, will not resolve all doubts against the farmer.

Mr. STERLING. Mr. President——

Mr. McCUMBER. I yield to the Senator.

Mr. STERLING. I should like to ask the Senator to state, if he will, what class of farmers are most affected injuriously by that course of "rigid" inspection and grading early in the season.

Mr. McCUMBER. Mr. President, we who farm and have grave difficulty in making both ends meet know where the pinch comes. We can not hold our grain until the winter, until the grades get easy; we have debts to pay, and we have to put that grain on the market just as quickly as we can get it on the market, because the collector is at our door for his money. The man who is in debt, the poor men, the men who can not afford to store their grain, the men who have no granaries, are the men who get pinched under this loose and rigid system of grading and inspecting.

Mr. President, I want to say a word about the cost of this system, because it has been asserted over and over again that the proposed Federal inspection system is going to cost a million and a half dollars. It is not going to cost one penny. Who pays for the grading to-day? Every man who sells a bushel of wheat pays for it. The Government does not pay for it; the State does not pay for it; the boards of trade and chambers of commerce do not pay for it. Under the proposed new system the expense will be paid in just the same way as it is paid now. The farmers have not the influence that the great meat packers have. You make the Government pay $3,000,000 for inspecting the meats of the packers, so that they may have a Government certificate back of them; but the farmer does not dare ask such favor, because it would be said that it would cost a million and a half dollars for the Government to do it. He does not ask the Government to pay a penny. He says, "Give me the right to have a person in whom I have confidence inspect my grain, and I will pay 50 cents or $1 or $1.50 a carload; I will not grumble about the price." But, Mr. President, it will not begin to cost the amount the Senator from Missouri has stated. He says, in effect, if I caught him correctly, that the Secretary of Agriculture estimated that the cost would be a million and a half dollars at the 16 places mentioned in the bill.

If the Senator will look over the manuscript from which he was reading, he will find that the Secretary did not refer only to those places. I sent down to the Secretary of Agriculture some few years ago—and I want you to understand we do not raise any more wheat and grain now than we raised then—I sent down to the Secretary of Agriculture to get his report, and I found he named 34 places at which possibly there might be Federal inspection. Then he estimated the number of men at all these places. I can get the same number, because I can write over to Baltimore or any other place where grain inspection is carried on, and I can get the number of inspectors who are employed there, and I can add up the number and arrive at a final conclusion of the cost. The Secretary of Agriculture added up the figures, with a sufficient number in addition to make certain, and placed the number at 650 men, which is more than are inspecting to-day all the grain in the United States. Then he made a statement of the cost of the inspection in the 34 places. I can not at this moment put my hands on the statement of the Secretary, but it is found in one of the Senate documents.

I have the figures as to what it costs in Minnesota. May I ask the Senator from Minnesota what is the charge now for inspecting a carload of grain in that State? Is it 25 or 35 cents?

Mr. NELSON. I think it is 25 cents.

Mr. McCUMBER. I think that is right—25 cents a car for inspecting. In the year for which I have the figures, 1903, when they raised a fairly good crop—and the crop in Minnesota is about the same as that in my State—the expenses of the grain-inspection department in Minnesota were $236,355 and the receipts for weighing were $261,381, leaving a balance of more than $25,000; and that, I think, was at 25 cents a car, although I am not sure that that was the charge at that time; I can not state that accurately; but those figures will show that with a charge of only 25 or 35 cents a car for inspecting, you can more than pay the expenses of grain inspection in the State of Minnesota; and every one of these boards has a profit at the end of the inspection year.

Mr. SMITH of Michigan. Mr. President——

Mr. McCUMBER. I yield.

Mr. SMITH of Michigan. The suggestion of the Senator from North Dakota puts a new aspect upon this case. If we are to go into the business of Federal inspection for the purpose of raising revenue to run the Government, it would be quite a serious temptation with the present prospect of a deficit.

Mr. SMITH of Georgia. I trust the Senator from Michigan will not trouble himself about that. I thought he rose to suggest to the Senate that, as revenue was to be raised by this bill, it should have originated in the House, as the Constitution provides that revenue measures must originate in that body.

Mr. SMITH of Michigan. No; I would not raise a constitutional point at this time, especially with so many of my Democratic friends absent from the Chamber.

Mr. SMITH of Georgia. I am glad to know that there is some question which the modesty of the Senator from Michigan would deter him from raising.

Mr. McCUMBER. Mr. President, I regret that the bill is not drawn to conform to the suggestion made by the Senator from Michigan, but it provides that only such fees shall be charged as will pay the legitimate expense of the inspection at those

points and that the salaries paid for inspection shall correspond, as nearly as possible and practicable, to the present salaries paid inspectors in all the places. So that I have carefully guarded that proposition.

Mr. President, to make certain what this bill means, let me make these declarations as clearly and succinctly as it is possible for me to make them.

First, by the provisions of this bill, there is to be no Federal inspection where there is not State or board inspection to-day.

Second, it is proposed to take over the machinery now in operation in all of the inspection departments and simply to put that machinery under the arm of the Government and have grain inspected by the Government instead of by a board or by the State.

Third——

Mr. NELSON. Mr. President, will the Senator yield for a question?

Mr. McCUMBER. With pleasure.

Mr. NELSON. Are the men who are to be transferred from the State inspection service to the Federal inspection service likely to be more honest under the Federal Government than under the State government?

Mr. McCUMBER. They are not one bit more likely to be inherently honest; but take away the influence that may bear upon human beings to make them step without the straight and narrow path and they will be more likely to stay within it. That is all I am claiming for them; that is all I expect they will do.

Again, three things are sought in the bill; a Federal standardization that will mean the same the world over; second, uniformity of grades that will allow me to sell the same kind of wheat in any market in the United States or abroad upon the same grade; and, third, integrity of inspection. That is all this bill seeks to do, and if it does not entirely conform to these propositions, I am ready now to make it conform to those three specifications. I want, now, to go over the bill a little in detail, so as to explain these three propositions. Section 1 provides—

That the Secretary shall organize in the Bureau of Plant Industry—

Which he already has—

a section of grain inspection.

Well, that is unnecessary, because he has organized it already, and it has been organized for years.

SEC. 2. That the Secretary shall appoint, in accordance with the rules of the civil service, at each of the following cities, to wit—

Then are named a dozen or more of the most important cities. I do not pretend to name them all, but to show the general class. Then the bill provides:

and at such other important centers of interstate trade and commerce in grain as he may consider necessary or proper for carrying out the provisions of this act, one chief grain inspector and such assistants as may be required to inspect and grade grains as herein provided.

I shall ask to insert in the list of inspection cities, after the word "Seattle," Portland, Oreg., and Detroit, Mich. Again, section 3 provides:

That said inspectors shall be paid a salary or compensation to be fixed by the Secretary of Agriculture, which shall correspond—

I am reading this to answer the argument of the Senator from Missouri—

as nearly as possible to salaries and compensations paid other officers or employees of the Government performing similar duties.

Complaint has been made, Mr. President, of the bill because no bond is required of the inspectors. There is another section which provides that the Secretary shall promulgate and make all necessary rules, and I did not want to insert a bond provision, for I knew that he would require a bond under the rules, because he is to adopt the present system as nearly as may be; and, as it is the custom to require a bond, he would undoubtedly exact it; but to be absolutely certain that that complaint can not be lodged against the bill I shall propose an amendment which will read:

Each inspector shall execute a bond, with sufficient surities, for the faithful performance of his duties and for the benefit of any party who may be injured by any act or omission of such inspector, in such sum and with such conditions as the Secretary of Agriculture may by rule provide.

You might need different conditions in different sections of the country; one might be an exporting, the other an internal purchasing agency; and the conditions might be different. That should properly be left to be governed by rule.

Section 5 authorizes the Secretary of Agriculture to establish the grades, and it provides further:

In the inauguration of the work herein provided—

That is inserted so that there shall be no hiatus of time or condition—

In the inauguration of the work herein provided he may, if in his judgment the best interests of trade and commerce in said grains require it, adopt the standards of classification and grades now recognized by commercial usages or established by the laws of any State or by boards of trade or chambers of commerce.

This is so that there shall be no sudden change, no disarrangement. He is to take your present grades and your present system and make his modifications upon due and proper notice and after a full investigation. If it takes him a year or two years, he will continue your present grades at least until he finds a system that is better in the matter of grading.

It was feared that it would throw a lot of these men out of employment, and it is asked where we will get the inspectors; and Senators criticize this bill upon the ground that we will have to go to the colleges and get young, inexperienced men. I assume that without any rule the Secretary would naturally call for those who had had experience, and he would naturally go to these very places; but to make that certain I insert:

And may employ the forces now employed in the inspection and grading of grain at the several grain-trade centers.

That would naturally be done, even without that provision; but I want it certain that we will get only the best men. I am quite certain that he will find no difficulty, at least this year, in securing the services of these men at the salaries that are now being paid them.

Mr. SMITH of Michigan. Mr. President, whether he would get people who were familiar with cereals is greatly to be doubted. I remember a case that arose in my own State, where the Civil Service Commission advertised for applicants for appointment as boiler inspectors, to inspect the boilers on our vessels on the Lakes. A captain who had been on the Lakes for 25 years and was perfectly familiar with boilers was ruthlessly cast aside in favor of a young man who had just come out of school, but who could foot up a column of figures quicker than the captain could. On the same theory the chances are that you would want an entire stranger to cereals to make these inspections.

Mr. McCUMBER. The Senator perhaps knows that I am not wedded to the civil service itself.

Mr. NELSON. Mr. President, will the Senator yield to me?

Mr. McCUMBER. Certainly.

Mr. NELSON. Would it not be dangerous to take the men employed under these State systems, who have been so corrupt and bad, and transfer them to the Federal system? Would not they be apt to corrupt it?

Mr. McCUMBER. Oh, Mr. President, I do not think very many of them have been corrupt and bad. It is enough that the system has worked a wrong. The evidence speaks for itself. I am not impugning the motives of these men. They perhaps average just as honest as the average man—no better, no worse. It is simply that when I am representing a country that is dealing in 700,000,000 bushels of wheat alone, and in farm cereals that amount to eight or ten billion dollars, that we must sell upon grades, I want to put the credit of the certificate beyond any possible question, so far as it can be done.

Mr. NELSON. But you do not eat it on grades.

Mr. McCUMBER. Just a moment, Mr. President. I would not say that the Minnesota men could not coin the gold dollars of the United States just as accurately as the Government can do it, but when I take a gold eagle I would rather have the Government's stamp on it than the stamp of any State in the Union. I feel safer about it, and I think any foreign purchaser or seller taking that coin would feel exactly the same way.

Mr. NELSON. Mr. President——

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Minnesota?

Mr. McCUMBER. Yes.

Mr. NELSON. I suppose the Senator from North Dakota would feel safer in eating a loaf of bread if there were a Government stamp on it?

Mr. McCUMBER. Mr. President, I thank the Senator. I have seen a load of bread go down these streets, and I have seen half of the loaves tumble off into the street. I have seen some colored man shining with grease and dirt get those loaves and push them against the sweating side of a horse and put them back again; and they were delivered, of course, as good No. 1 bread. I would rather have upon the loaf the Government certificate that it is well wrapped and protected and that it is good and that it is clean.

Mr. SMITH of Michigan. Yes; but if the certificate was put on at the oven that would not remedy the difficulty of which the Senator complains.

Mr. McCUMBER. No; but I would remedy the difficulty by having it protected all along the line. That is just what I am trying to do here. I do not expect to have anything perfect as long as there is imperfection in human nature, but I want to get it just as nearly perfect as it is possible to get it. The fact that the people of my State, the millers, all of those who have

been asking for this, all of the independent grain dealers, say "put it under Government inspection and put the inspectors under the civil service," has made me yield my views. I would not care whether they were under civil service or not, so far as I am concerned. Remove the inspectors from this influence, this family influence, this marriage influence with the boards of trade, and I am not afraid that we will not get substantial justice. I do not expect that we will have everything absolutely perfect.

Again, it is asserted that under this bill we would have to inspect at every possible point; that if a car went through a corner of a State it would have to be reinspected. Mr. President, under the bill as it originally stood there was no necessity for any inspection except at those great terminals; but to make it absolutely unquestionably so I have offered certain amendments, so that no man can make that argument, which to me has at all times seemed to be without any foundation whatever. That result is obtained by adding different amendments in several places.

One is in section 9:

That it shall be the duty of said inspectors to inspect and grade all grain—

Now, as it originally read, it was—

Which at the time of inspecting and grading of the same has been shipped from any other State—

And so forth.

That related back to the other section, which provides where these inspectors shall do their inspecting, and so forth; but to make it certain, I say:

Arriving or collected at any of the aforesaid grain centers and—

So that will be beyond any question.

Again, in section 9, concerning the weighing and grading of grain, I propose, on page 6, line 12, after the word "Agriculture," to insert:

Provided further, That no inspection or grading of grain shall be required except at the aforesaid important grain terminals.

I can not make it stronger than that.

Mr. SHERMAN. Mr. President—

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. Certainly.

Mr. SHERMAN. I wish to inquire, before the Senator leaves this branch of the subject, whether it is possible, under this bill as amended, for me to ship grain from any point in Nebraska to any point in Indiana, or from Illinois to any point in Indiana, by way of Chicago, without inspection?

Mr. McCUMBER. Mr. President, if the grain was consigned from one State to a particular point in another State outside of this great terminal, the fact that it had to pass through Chicago would not require any inspection, because it would be inspected at the place of consignment, as the Senator will see from reading the language—"when consigned to these terminals." If it is sold in Chicago; if it is not merely transferred, but goes into the market in Chicago of course it would be inspected; but if the Senator were shipping it to a place in Indiana, of course, he would not stop it in Chicago at all for any purpose.

Mr. SHERMAN. But a large part of the freight must go through Chicago as the point of transmission.

Mr. McCUMBER. Oh, yes.

Mr. SHERMAN. Either that point or St. Louis, because they are the collecting points for the great bulk of the freight of that part of the country. I wish to inquire specifically whether I could ship from Bloomington, Ill., to Fort Wayne, Ind., by way of Chicago, without having my grain inspected at all, either at Bloomington, at Chicago, or at Fort Wayne?

Mr. McCUMBER. If Bloomington is not one of the important grain centers—and it is not mentioned here——

Mr. SHERMAN. No; it is not covered by the bill, and I am assuming that it has not been added by the Secretary of Agriculture.

Mr. McCUMBER. Then the Senator can. It will not need to be inspected, under this bill.

Mr. SHERMAN. I wish to say that in my judgment, in view of section 13, the Senator is totally mistaken. I believe that section makes it compulsory, so that I could not escape it without being subject to the penal provisions of the bill. In other words, section 13, when read with sections 8 and 9, even as amended, absolutely bars it. It makes grain shipped from Bloomington, Ill., to Fort Wayne, Ind., by way of Chicago contraband of commerce unless it be inspected at some of the points—for instance, Chicago, which is one of the inspection points specifically provided in section 2. Otherwise the grain is absolutely barred under this bill.

Mr. McCUMBER. Mr. President, I will read section 13, and we will see:

That the shipment or consignment of any grain aforesaid—

Now, we are speaking all the time of the grain at these great terminals—

from any of the places mentioned herein—

That is, the inspection terminals—

to another State or foreign country—

That is, where it starts from that terminal; not where it passes through it—

without the same being inspected and graded as herein provided is hereby prohibited; but where grain has been once inspected hereunder and remains unmixed with other grain the same need not be reinspected at the place from which it is exported: *Provided, however*, That said secretary may, in his discretion, reinspect any cargo of such grain before the same is exported.

To a foreign country. That is what that means. Then I add, on page 7:

but may be reinspected upon demand if for any cause its character or quality has been materially changed since the previous inspection.

There is no question as to the meaning. I do not think it possible to get that intent from the section indicated by the Senator from Illinois; but there is no question but that it would not have to be inspected. If the Senator feels that that language does not make it sufficiently clear, certainly a few added words would make it so. I think it does.

Mr. SHERMAN. Mr. President, will the Senator permit me to interrupt him again?

Mr. McCUMBER. Certainly.

Mr. SHERMAN. That all depends upon what the word "shipment" means. I think the word "shipment" in this bill means that if it be transmitted——

Mr. SMITH of Michigan. From the producer.

Mr. SHERMAN. From the producer, by way of Chicago, or any other one of the grain centers mentioned in section 2, to its point of destination in another State, it is a shipment.

Mr. SMITH of Michigan. It is an interstate shipment, of course.

Mr. SHERMAN. It passes inevitably under the interstate provision, and is prohibited.

Mr. McCUMBER. No; Mr. President, I can not see that the mere fact that it passes through one of these centers would make it subject, if you will read the whole bill, to reinspection at that place. I have proposed to insert here the words "or collected." Now, you may say there, "collected or disposed of at such place," if you desire. I do not think it is necessary, but that would place it beyond any possible question. It is not so intended.

Mr. SMITH of Michigan. Mr. President, suppose the farmers of Cass County, Mich.—a county adjoining one of the counties of the State of Indiana—gather their wheat in Michigan and find their market in Elkhart, Ind., and this grain is transported from the farms in Michigan across the border into Indiana and is there sold to an elevator company. Must there be any inspection of that grain before it arrives at the elevator?

Mr. McCUMBER. Not the slightest.

Mr. SMITH of Michigan. Then, if it is inspected after it reaches the elevator, and by reason of that inspection is given a higher classification than the farmer in Cass County sold for, the elevator man gets the benefit of the higher classification and the farmer gets nothing. Am I right about that?

Mr. McCUMBER. Of course, that would naturally follow; but neither of those places would be subject to inspection under this bill.

Mr. SMITH of Michigan. Notwithstanding the commodity becomes an interstate commodity from the farmer's barn until it reaches the elevator at Elkhart. Now, if the quality be not tested until it has passed into the hands of the middleman at Elkhart, any benefit to be derived from the legal test inures to the benefit of the owner of the elevator and not to the producer of the wheat.

Mr. McCUMBER. Mr. President, the Senator can see the impossibility of having Federal inspection or any other inspection for every bushel of wheat. We do not have it now.

Mr. SMITH of Michigan. No.

Mr. McCUMBER. You would not have it at those places, and you have not it now under any of your systems. I am not changing those in any way. I will discuss a little later what happens when the grain has passed out of the farmer's hands, and what effect giving it a higher grade, or any manipulation of it, has upon him.

Mr. SMITH of Michigan. I am very anxious to hear that branch of the matter discussed, because I am deeply impressed with the idea that the producer gets no benefit unless the stand-

ard of American production is elevated by the Government stamp, and the market as a whole is thereby widened.

Mr. McCUMBER. Mr. President, I have noted down a few points of the Senators who spoke, and I am going to follow them right up as rapidly as I can and answer each one of them very briefly, because I can not do otherwise and bring this to a vote to-day.

I will take up, first, one of the points made by the Senator from Missouri [Mr. REED]. He says:

> This is not a bill which affects the morals of the people. Therefore, unlike the pure-food bill, there is no demand for it.

Mr. President, like the pure-food legislation and like the fraud-order legislation, this bill protects the pocketbook as well as the morals of every person; it compels the grain which is now sold by grade all over the United States to be sold upon its honest grade.

Secondly, the Senator says:

> The same argument for inspection could apply to every product of the farm and factory.

Mr. President, the reason does not apply to every product of the farm and factory; and the very fact that all of the States and all of the grain centers in the United States have adopted this policy evidences the necessity of selling grain by grade. Therefore that policy having been adopted, our only desire is to secure a grade upon which we can depend.

Again, he says:

> The Secretary can employ as many persons as he sees fit, and pay them whatever salaries he sees fit.

That is especially guarded in the bill, which provides that he shall employ only such persons as are necessary, and shall pay only the usual salaries paid for that kind of work.

Again, in answer to a query from the junior Senator from Georgia [Mr. WEST], the Senator from Missouri says:

> Would a carload of grain have to be inspected when it crosses a corner of a State?

A carload of grain will not have to be inspected except at these great terminals; nowhere else; and only when it is disposed of at those terminals.

Again, the Senator speaks of the "discourteous treatment" given certain witnesses by the committee.

I am not a member of the Committee on Agriculture and Forestry, but I happened to be present when the "discourteous treatment" of which he speaks occurred. A number of gentlemen were here who wanted to be heard. The acting chairman took their names. Every one of them had testified before. He said to these gentleman: "Have you anything new?" "No." "What object is there in taking further testimony if you have nothing new to tell us?" "Well, we do not know; we simply want to express our opposition to this bill." "If you have anything new, we will hear you." One or two witnesses offered something new and that was taken. That is the "discourteous treatment"; nothing more.

Again the Senator says:

> Not 5 per cent of the grain which is sold at these great terminals is farmers' grain.

I am coming right directly to the point now about which the Senator from Michigan asks. Not 5 per cent of the cotton, for which you had a bill passed here the other day, is in the hands of and owned by the farmer when it reaches New York; possibly not 1 per cent or one-half of 1 per cent of it; but when you passed that bill you knew that you were legislating for the producer.

Let me explain that to the Senator.

I have in my granary a thousand bushels of wheat. It is good No. 2 wheat. It is worth 90 cents a bushel if I can get No. 2 grade for it. If I send it to Chicago or to Minneapolis or to Duluth and get only No. 3 for it, we will say that it is worth only 85 cents a bushel. Then I have lost 5 cents a bushel, have I not, if I send it directly there? But suppose I sell it to the elevator man, and the elevator man has some more just like it, good No. 2 wheat, and he can get only No. 3 when he sells it, what will he pay me for mine? Why, he will pay me a No. 3 price. My price, whether it is bought by the elevator man or not, is always dependent upon what it will bring at the great terminal, and what it will bring at the great terminal always depends upon the grade.

That is the direct evil, and that is how it reacts back upon me.

Here is the secondary evil, which is just as bad: Suppose I send out some No. 2 wheat, and it is worth, we will say, 85 cents a bushel. The elevator man pays me 85 cents a bushel. It is only No. 2. Suppose, however, that by means of a little doctoring, or whatever he does, the elevator man palms it off on the next man and grades it No. 1. He takes it to his mill to grind, and he finds that it does not correspond to No. 1. What does he do when he buys the next lot from the same man? He says: "I will pay only a No. 2 price for No. 1," and that means a No. 3 price for No. 2.

So, you see, in either event that will affect every bushel that I have in my granary, because the elevator man has destroyed the market of my good grain by adulterating it.

Let me give another illustration, which I think is a very important one. I was told, just after we passed the pure-food law, of a little incident in a very important neighboring city. I will not mention its name, but I will simply say that it has not been burdened with a regional bank. There was a great sign across the whole front of a building there reading: "Pure Vermont maple sirup." We passed the pure-food law. A few days after it was signed down came that sign, and in place of it there was elevated another sign, reading: "Corn sirup; the best in the world."

The man who had been buying the corn sirup was getting, perhaps, just as digestible an article as maple sirup, and perhaps a better article, so far as the physical system was concerned. He thought it was maple sirup. He was not hurt at all. Perhaps his health was improved. Can you not see, however, than when you unloaded all of that colored and flavored glucose on the country as maple sirup it drove down the price of all of your real maple sirup? So it is when you foist No. 3 and No. 4 and No. 5 grades on the consuming public as Nos. 1 or 2 grade; you drive down the value of all of your good wheat. The farmers know that; every wheat buyer knows it; and that is the thing that they have been struggling against. They want honest grades, an honest market, and honest certifications.

Now, I want to call attention to another thing. The Senator from Missouri says that the St. Louis exchange did not resolve in favor of Federal inspection. He criticized me, I thought, rather unjustly for having dared to make such an assertion; and then he read a portion of the testimony to show that it had not done anything of the kind.

I desire to call attention to the resolution which appears on page 221 of the hearings. Let us see what the St. Louis Merchants' Exchange resolved. This is the resolution:

> *Resolved*, That the uniform and correct grading of grain and the accurate weighing of same in the United States are not only highly desirable but essential to the continued welfare and growth of our foreign and domestic trade, and can best be secured by Federal control of the inspection and weighing.

The Senator means, of course, to draw from that the inference that they meant merely supervision and control over the inspection. I immediately go back to the testimony of Mr. Thomas B. Teasdale, a member of that board, who voted to pass that resolution, and I call attention to his statement. This is from the St. Louis Merchants' Exchange:

> Mr. TEASDALE. I simply want to say, gentlemen, that there has been a good deal said here in apparent derogation of boards of trade and merchants' exchanges; and that they are not all of them as black as they have been painted. At least the St. Louis Merchants' Exchange stands for a square deal for everybody. They have evidenced that by coming out flat-footed for Federal inspection, because they think it is going to remedy and do away with some of the abuses that undoubtedly do exist in the grain business to-day.

He says they are in favor of Federal inspection, and it is worth while for Senators to listen to his argument. There is a grain man who will measure up just as well as the man who was quoted so fully the other day by the Senator from Missouri [Mr. REED]. Mr. Teasdale continues:

> One of those abuses is the nonuniformity of the grading of grain in this country. It has been asked here how that affects the farmer who brings his grain into the country station and sells it on view, or by selling to the little dealer at the country station.

Here he answers that same question. He says:

> But how does the country shipper determine the price which he is going to pay the farmer? He looks at the market reports of St. Louis, Chicago, Kansas City, or Minneapolis, whichever market he may be tributary to. He deducts from that price the freight, the commission he has to pay at the terminal market, the inspection charge, the weighing charge; and there is another deduction for probable natural shrinkage of the weight of the grain in transit. He also has to make up his mind what that grain will grade in that terminal market. Having all that information, he knows what that grain will net him on his track; and he bids the farmer as much less than that net price as will afford him a fair margin of profit for shipping that grain. Therefore, you can readily see that if the dealer's price in the terminal market is reduced by reason of this irregularity in the inspection, or for any other cause, the price which he pays the farmer is correspondingly reduced. And, as one of the gentlemen preceding me has said, that price affects not only the grain which goes to the terminal market, but practically all of the grain that is sold by the farmer, because the price he gets on the farm for any other purpose than market shipment is fixed by the price it is worth in the market.

Now, reading from the statement of Crowell, the Senator says that in the past few years these exchanges have been honest. I want to keep them that way and I want to prevent them from doing otherwise. He also says there is no foreign association protesting against our certificates. I quoted an association. In this record there is the resolution of the association which

met in Berlin where they resolve against the American standards and declare that they could not be depended upon, and offered a resolution to boycott American grain, and that grain was driven out of a great many of the markets.

Mr. SMITH of Michigan. They frequently use one excuse or another to prevent our products from having very much opportunity on the German markets.

Mr. McCUMBER. I know, but it was not simply at Berlin. They took in England, Holland, and France, and representatives from the whole of Europe met there in convention. It was an association, the object of which was to make certain the American grades; that was all. Then they sent those resolutions to the President of the United States and to the Secretary of Agriculture, and the Secretary of Agriculture sent over Mr. Shanahan, an expert, who spent a whole year in Europe, and he came back and made his report that our grain was actually better than any other grain, and that it was tabooed and commanded a less price, although of the same grade generally over the Continent, because they could not depend upon our certificates; and he especially called attention to the fact that the Manitoba grades were accepted with much greater reliance, because they were Government grades. You will find that in the report of Mr. Shanahan.

Mr. SHERMAN. Before the Senator leaves that branch of the subject I will state that I have read all the reports I have been able to find on the Euroepan situation and their resolutions and the documents they prepared. I can conceive of no other purpose than a deliberate intention on the part of the European countries involved to control the inspection as well as the legislation of the United States. It is a most insolent and impudent attempt.

Mr. McCUMBER. I suppose they are selfish. They are compelled to buy upon our certificates, because in the sale it is provided that they shall have no recourse, but they must accept the grade that is given. Of course they have to buy the grain without seeing it, and they are quite anxious that they should get the correct grade. They have no remedy except in cases of fraud, and to come over here and establish that fraud would be rather more costly than it would be to accept the grade.

Mr. SHERMAN. They could cease buying grain altogether from us, could they not?

Mr. McCUMBER. Oh, yes.

Mr. SHERMAN. They have the world to buy from.

Mr. McCUMBER. But we would get a better price if they had confidence in our grades. That is all I ask.

Mr. SHERMAN. If the Senator will kindly yield——

Mr. McCUMBER. Certainly.

Mr. SHERMAN. There is a certain matter I wish to have him consider. The largest corn crop ever produced in the United States found less than one and a half per cent of it sold in Europe or any foreign market, and 10 per cent is a high rate of all the wheat production of the United States. The market for the European consumer is not obliged to buy a bushel from the United States, unless it finds the grades and prices and quality to be satisfactory. Europe is not dependent for her grain supply upon the United States. The Europeans have access to the markets of the world.

Mr. McCUMBER. I admit that, Mr. President, but it would be better for our grain trade if we could send a consignment they could depend upon. We would get a getter price for it. We want a part of that market, even though they can supply it somewhere else.

Now, the Senator from Illinois says:

> Some of the criticism in my State has in years past been abundantly established, but it is not true to-day.

That may be true; but the causes criticized existed under the laws substantially as they are to-day. The abuses, if they do not exist, may recur at any time, and why not prevent the possibility of their recurrence by taking away the ability to go back to the old system?

But that that is not true is shown by a letter I have, and it is one the Senator will consider I am justified in reading. I have here a letter from Princeton, Ill., dated March 17. It is as follows:

> DEAR SIR: I notice in the Chicago Tribune that you and Senator SHERMAN do not agree on the subject of grain inspection. At a recent meeting of the stockholders of the Farmers' Elevator Co. at Kasbeer, Ill., this subject received some attention. While I am not authorized to speak for the company, I am satisfied that it is the general opinion of the farmers in this locality that they suffer as much or more from improper grain inspection in Chicago than from almost any other one thing. That business should be taken out of State politics. Unless improvement in this is made, there will be concerted action by all of the farmers' elevators in the country for better inspection. I hope the measure before Congress will be so framed as to give relief.

That is a letter such as I have received from all over the Northwest, equally from States where there are 1,800 farmers' elevators, who have sent in their petition pleading for Federal inspection.

Again, the Senator says:

> Within the last five years the public warehouses of Chicago have performed their duties and have not defrauded their customers.

That is an indictment in itself. It means that prior to five years ago they did defraud their customers. I think the evidence abundantly proves the fact that they did defraud them, and I want to put them in a position where they can not have a recurrence of the old condition.

Again, the Senator says:

> These warehouses, called doctoring warehouses, clean and make the grain better. That is why they ship no "no grade" grain.

Mr. President, they do not make the grain better. The value of a berry of grain depends upon the percentage of protein, of starch, and of gluten, and all the polishing in the world will not change that condition or make it any better. It will make it look better to the eye; it may deceive, but it is not any better. It will not make better flour.

In my opinion, the Minnesota method of dockage, as I have said, is far better than the other method of reducing grades. I think you will find that there are as many bushels in Chicago of grain shipped out as are shipped in. That is the record I had some years ago, and I do not know of any change. Even though they lower the grade because the weeds and seeds, and so forth, have been taken out, they ought to have a less number of bushels shipped out to correspond with the lowering they make; but my own investigation shows that a few years ago, unless there has been a change, there were none less shipped out.

What opportunity have Iowa, Dakota, or Montana, or other citizens of the Northwest to appeal to Chicago or Minneapolis or Duluth? Under Federal control we will reach something through Congress. We are absolutely at their mercy. We have to sell the grain in their markets under rules adopted by them for their special benefit, and they are rules beneficial neither to the producer nor to the ultimate consumer.

Again, the Senator says:

> Six years is an age in commercial changes, and the evidence taken six years ago is now stale.

Mr. President, there has been no material change in 30 years in the methods of handling grain. I say there has been no material change. Pocket-picking and other methods of thievery have not changed in 6,000 years. It is the same to-day that it was when Fagin taught his urchins how to work the trade.

Now, he says:

> The rules say that "no grain shall be inspected out at a higher grade than it is inspected in."

If the inspection was certain and sure, why is it necessary to have that rule? The rule admits that it had to be put there to check this course. I do not know how long it will remain so. It was only put in a short time ago and you may take it away to-morrow. I want a continuing condition where you can not change the grade and make it different when inspected out than when it was inspected in.

Again, he says:

> The hospital does for the farmer what the farmer fails to do for himself.

The hospital does not help the farmer. The hospital does nothing whatever for the farmer except to buy his grain as cheaply as it can buy it, pay him an adequate price, mix that grain with others, and then certify it out again at a much higher grade, because it looks better than it is entitled to receive. When it gets to the miller, the miller soon detects its poor quality as flour-making grain, and he immediately strikes down the price of the grade, of which this is a false imitation.

Again, I want to take up what the Senator from Minnesota [Mr. NELSON] said. He says he has no objection to standards, no objection to uniformity, no objection to supervision, and that the Minnesota system is scientific. Now, he has come over and the exchanges have come over one-third of the way across the bridge to meet us on this proposition.

No one complains of the rules of inspection in the State of Minnesota. It may be sufficiently comprehensive. It is the enforcement, the actual things that are done under that system, that are most unjust to both purchasers and consumers. The rules governing the operation of banks are good and sufficient and comprehensive, but the bank itself may be rotten.

Again, the Senator indicates in his argument that this bill would abolish exchanges, and he makes a long argument on the benefit of exchanges. Of course, under our present system the exchanges are beneficial. They are absolutely necessary under the present system. The exchanges, those that are dealing in the wheat that they buy and selling the wheat that they buy, are asking for Federal inspection. They are not objecting

to it. It is only the mixers who are objecting to it. The exchange will go on just the same. Most of them want certainty of grades.

Again, the Senator states that these exchanges have acted badly in the past; but, Mr. President, their bad actions have been due entirely to their ability to manipulate the grades. There is where all the bad actions come in. If we place the system where they can not manipulate the grade, we will have at least removed that evil.

The Senator says it is strange that a system that should be satisfactory to Minnesota should not be satisfactory to the farmers in North Dakota. I have here and I have read over again a resolution passed by the farmers' warehouses, the independent warehouses of the State of Minnesota, praying for this legislation. Every year we have about 1,500 representative farmers from the States of Minnesota and North and South Dakota who meet at Fargo, in my State. They call themselves the Tri-State Grain Growers' Association. They are not politicians; they are good, honest, earnest farmers. Every year until the last two or three years they have been passing resolutions again and again for the Federal inspection of grain.

How can it be said that the farmers of that State and of the other States do not care when, through their only organization and their representatives and their elevator associations and their general associations, they declare in favor of it? Farmers do not like to write letters, and they will not write letters to those whom they think will not take their view. I receive letters from the State of Minnesota, as from all these other States.

The Senator says that it is only North Dakota that is asking for these grades. I want to call your attention to some of the elevators and other systems. First, I want to call attention to the statement made by the Senator that the trouble with the farmer in North Dakota is that the local buyer is dishonest; that he lies to the farmer about the grades that he can get. Undoubtedly that does happen in some cases, but in my State I can take a little town, for instance, of 500 inhabitants, and show you 15 elevators, and every one of them is competing to get the farmers' grain. They all buy on the same basis; they all sell on the same basis. They are going to get the very best grade that they can. They get from 2 to 3 cents a bushel or from 2 to 2½ cents a bushel for their profit in handling and insuring and delivering and selling the grain.

Mr. SMITH of Michigan. How many elevators are there in the State of North Dakota?

Mr. McCUMBER. Several thousand.

Mr. SMITH of Michigan. Thousands?

Mr. McCUMBER. There are thousands of them; I do not know how many. The farmer takes his grain to one of those elevators and it may be that there will be half a dozen men soliciting him for his business. He will deliver it to one elevator. That elevator will give him just as good a grade as it dare, but it is dependent upon the grade that it gets at the terminal, and if it can not get a good grade there it can not give a good grade to the farmer.

Now, I want to ask Senators, candidly and honestly, why do all of these independent elevators ask for Federal inspection? Is it not evident that they want accurate grading; that they believe that they are not getting accurate grading; and that that is why they are asking for this bill?

Mr. President, almost every grain-raising farmer in the United States supports this bill. I want to call attention to a few of its supporters. All of the independent elevators in the United States, all of the cooperative elevators in the United States, all of the grain growers' associations of the United States that I know anything about, practically all of the millers in the United States—the only exceptions possibly being the millers at Minneapolis, who can buy on sample and who do buy on sample—all of the importers, practically all of the ultimate consumers—we have resolutions from Minnesota, Nebraska, Kansas, Alabama, Florida, Mississippi, North Carolina, Georgia, South Dakota, Indiana, South Carolina, Kansas, Illinois, and from a large number of other States throughout the Union, all of them asking for Federal inspection.

Mr. President, I want some kind of a bill to be passed. I will admit frankly that there are two good propositions in the Lever bill, but the main thing, the thing that we want to get, is absolute certainty in inspection; and the grain dealers do not want that. Their supervision is not an adequate supervision. It provides, for instance, that the Secretary of Agriculture may pay a nominal salary to some inspectors. I do not know what "nominal" means, but it evidently is intended to cripple the service. There can be only one sure supervision, and that is a supervisor over every inspector; and if the Government can supervise, that supervisor can inspect. That is what we are asking for in this case.

I wish I had time to go fully into the Lever bill; but you will find, if you take that bill and examine it, that the method of appeal, for instance, makes it almost impossible of application. You have got to send to the Secretary of Agriculture and put up for the expense, and he will then send a man to investigate and see whether there ought to be an appeal. If a foreign purchaser, say in Hamburg, is dissatisfied, that foreign purchaser has to make his complaint to the Secretary of Agriculture and put up the money to send an expert across the ocean and back. Then, perhaps, he will get the same inspection, or he may get a modification. No one will accept that method; and if I had drawn a bill purposely to make supervision inadequate and inefficient, I should have drawn the Lever bill as it is drawn in reference to supervision. It will not operate as such.

Mr. President, I have spoken longer than I intended, and yet I have not spoken half so long as I ought to do to bring this matter fully to the attention of the Senate.

Mr. NELSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ASHURST in the chair). The Senator from Minnesota suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gore	Norris	Smith, Ga.
Bankhead	Hollis	O'Gorman	Smith, Md.
Borah	Hughes	Oliver	Smith, Mich.
Brady	Johnson	Overman	Smith, S. C.
Brandegee	Jones	Page	Sterling
Bristow	Kenyon	Perkins	Swanson
Bryan	Kern	Pomerene	Thomas
Burton	Lea, Tenn.	Reed	Thornton
Chamberlain	Lee, Md.	Shafroth	Tillman
Chilton	Lewis	Sheppard	Townsend
Clapp	Lodge	Sherman	Vardaman
Clark, Wyo.	McCumber	Shields	Walsh
Clarke, Ark.	Martine, N. J.	Shively	Weeks
Dillingham	Nelson	Simmons	

The PRESIDING OFFICER. Fifty-five Senators have answered to their names. A quorum of the Senate is present.

Mr. GORE. I gave notice several days ago of my intention to offer a substitute for the pending bill. I now ask that the Secretary read the proposed substitute.

The PRESIDING OFFICER. The Secretary will read the amendment proposed by the Senator from Oklahoma.

The SECRETARY. It is proposed to strike out all after the enacting clause and to insert:

That this act shall be known by the short title of the "Grain-grades act."

SEC. 2. That, as used in this act, the term "grain" shall include and shall apply only to corn (maize), wheat, oats, barley, rye, spelt, emmer, rough rice, milled rice, flaxseed, and buckwheat, and kafir, milo, durra, and every other sorghum.

SEC. 3. That the Secretary of Agriculture is authorized to investigate the handling, grading, and transportation of, and to fix and establish, from time to time, standards of quality and condition for grain. In promulgating the standards the Secretary shall specify the date or dates when the same are to become effective, and may give public notice thereof by such means as he deems proper.

SEC. 4. That the standards so fixed and established shall be known as the official grain standards of the United States.

SEC. 5. That whenever standards shall have been fixed and established under this act for any grain no person thereafter shall ship or deliver for shipment for any State, Territory, or District, to or through any other State, Territory, or District, or to any foreign country, any such grain which is sold or offered for sale by grade, unless the grade by which it is sold or offered for sale be one of the grades fixed therefor in the official grain standards of the United States and the grain conforms to the standard fixed and established for the specified grade: *Provided*, That variations from the official grain standards may be permitted under such rules and regulations as the Secretary of Agriculture shall prescribe. No person shall, in any contract or agreement of sale or agreement to sell, either oral or written, or in any invoice or bill of lading or other shipping document relating to such shipment or delivery for shipment, describe, or in any way refer to any of such grain as being of any grade other than a grade fixed therefor in the official grain standards of the United States.

SEC. 6. That whenever standards shall have been fixed and established under this act for any grain, no person thereafter shall ship or deliver for shipment from any State, Territory, or District, to or through any other State, Territory, or District, or to any foreign country, any such grain which is sold or offered for sale, whether by grade or not, under any name, description, or designation which is false or misleading in any particular: *Provided*, That nothing contained herein shall prevent the shipment or delivery for shipment, otherwise lawful, of any grain which is sold or offered for sale, without reference to grade, under names, descriptions, or designations which are not false or misleading.

SEC. 7. That the Secretary of Agriculture is authorized to cause inspections and examinations to be made of any grain which has been certified or represented to conform to any grade fixed in the official grain standards of the United States, and to ascertain whether the grain is, in fact, of the specified grade, and whenever, after opportunity for hearing is given to the owner or shipper of the grain involved, it is determined by the Secretary that any lot of grain has been incorrectly certified or represented to conform to a specified grade, he may publish his findings.

SEC. 8. That whenever a dispute arises whether any grain, for which standards have been fixed and established under this act, is in fact a specified grade of such standards, and such grain has been sold, offered

for sale, transported, or delivered for transportation in interstate or foreign commerce, any interested party may refer the question to the Secretary of Agriculture, and the Secretary of Agriculture is authorized to cause such investigations to be made and such tests to be applied as he may deem necessary and to determine the grade. In such cases the party or parties referring the question shall pay to the Secretary of Agriculture, and he shall charge, and cause to be collected, fees, in amounts to be fixed by him to cover the cost of such investigations, tests, and grading. All such fees shall be deposited and covered into the Treasury as miscellaneous receipts. The findings of the Secretary of Agriculture as to grade, made after the parties in interest have had opportunity to be heard, shall be accepted in the courts of the United States in all suits between such parties, or their privies, as prima facie evidence of the true grade of the grain in question.

SEC. 9. That no person authorized or employed by any State, county, city, town, board of trade, chamber of commerce, corporation, society, or association to inspect or grade grain shall certify, or otherwise state or indicate in writing, that any grain which has been inspected or graded by him, or by any person acting under his authority, is of one of the official grades of the United States, unless he holds an unsuspended and unrevoked license issued by the Secretary of Agriculture, and a commission issued by the Secretary of Agriculture, authorizing him to inspect and grade grain for interstate and foreign commerce. The Secretary may issue a license and commission to any person upon presentation to him of satisfactory evidence that such person is competent to inspect and grade grain. Any such license and commission may be suspended or revoked whenever the Secretary of Agriculture is satisfied that the holder thereof has failed to grade grain correctly, in accordance with the official grain standards of the United States, or has violated any provision of this act or of the rules and regulations made thereunder, or that the license and commission have been used for any improper purpose whatsoever: *Provided*, That nothing in this act shall authorize the Secretary of Agriculture to pay more than a nominal salary to any inspector of grain authorized to be appointed under this section.

SEC. 10. That the Secretary of Agriculture shall, from time to time, make such rules and regulations as he may deem necessary for the efficient execution of the provisions of the act.

SEC. 11. That every person who shall violate any provision of this act or of the rules and regulations made hereunder shall be deemed guilty of a misdemeanor, and, upon conviction thereof, shall be fined not exceeding $200 for the first offense and for each succeeding offense not exceeding $1,000. After judgment by the court notice thereof shall be given by publication in such manner as the Secretary of Agriculture may prescribe.

SEC. 12. That every person who forcibly assaults, resists, impedes, or interferes with any officer or employee of the United States Department of Agriculture in the execution of any duties authorized to be performed by this act or the rules and regulations made hereunder shall, upon conviction thereof, be fined not less than $100 nor more than $1,000, or be imprisoned not less than one month nor more than one year, or by both such fine and imprisonment.

SEC. 13. That the word "person" wherever used in this act shall be construed to import the plural or singular, as the case demands, and shall include individuals, corporations, companies, societies, and associations. When construing and enforcing the provisions of this act, the act, omission, or failure of any official, agent, or other person acting for or employed by any corporation, company, society, or association within the scope of his employment or office shall, in every case, also be deemed the act, omission, or failure of such corporation, company, society, or association, as well as that of the person.

SEC. 14. That this act shall be effective on and after July 1, 1914.

SEC. 15. That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $300,000 for the fiscal year beginning July 1, 1914, for the expenses of carrying into effect the provisions of this act, including rent and the employment of such persons as the Secretary of Agriculture may deem necessary in the city of Washington and elsewhere.

The PRESIDING OFFICER. The question is on the amendment in the nature of a substitute offered by the Senator from Oklahoma.

Mr. McCUMBER. I understand the Senator from Oklahoma desires to speak upon that amendment before it is voted upon. I wish to perfect the bill by certain amendments before the substitute is acted upon.

Mr. GORE. Mr. President, I understood the Senator from North Dakota had perfected his bill. Has the Senator some amendments which he desires to submit?

The PRESIDING OFFICER. He so states at this time.

Mr. GORE. Then I do not care to proceed until the Senator finishes the presentation of his amendments.

Mr. McCUMBER. If that is satisfactory, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 2, section 2, line 4, after the name "Seattle," it is proposed to insert "Portland, Oreg.; Detroit, Mich."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McCUMBER. On page 2, line 22, after the word "duties," I move to insert:

Each inspector shall execute a bond, with sufficient sureties, for the faithful performance of his duties and for the benefit of any party who may be injured by any act or omission of such inspector, in such sum and with such conditions as the Secretary of Agriculture may by rule provide.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 2, section 3, line 22, after the word "duties," it is proposed to insert:

Each inspector shall execute a bond, with sufficient sureties, for the faithful performance of his duties and for the benefit of any party who may be injured by any act or omission of such inspector, in such sum and with such conditions as the Secretary of Agriculture may by rule provide.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from North Dakota.

The amendment was agreed to.

Mr. McCUMBER. On page 3, line 15, after the word "trade," I move to insert "and may employ the forces now employed in the inspection and grading of grain at the several grain-trade centers."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 3, section 5, line 15, after the word "trade," it is proposed to insert "and may employ the forces now employed in the inspection and grading of grain at the several grain-trade centers."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McCUMBER. On page 4, section 8, line 16, after the word "grain," I move to insert "at such terminal point," so that it will read:

That it shall be unlawful for any person herein named to willfully unload or otherwise discharge any load, cargo, or consignment of grain at such terminal point which has been at any time during the period of its transit an article of interstate commerce and which has not been inspected in accordance with the provisions of this act, until the same has been inspected as provided herein.

Mr. REED. Mr. President, I suppose the Senator has offered that to meet the objection which was raised that the bill as drawn compelled the inspection of all grain in interstate shipments?

Mr. McCUMBER. It is to meet that objection. While I have said I did not think it was necessary, I want to make it certain that the effect of the bill will not be to require inspection of all such shipments.

Mr. REED. I am not going to object to the amendment, but I wish to remark that it does not cover the case.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from North Dakota.

The amendment was agreed to.

Mr. McCUMBER. The next amendment is on page 5, line 4, after the word "grain," to insert:

Arriving or collected at any of the aforesaid grain centers and.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 5, line 4, after the word "grain," it is proposed to insert the words:

Arriving or collected at any of the aforesaid grain centers and.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McCUMBER. On page 6, line 7, after the word "Agriculture," I move to insert:

Provided further, That no inspection or grading of grain shall be required except at the aforesaid important grain terminals.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 6, line 7, after the word "Agriculture," it is proposed to insert the words:

Provided further, That no inspection or grading of grain shall be required except at the aforesaid important grain terminals.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from North Dakota.

The amendment was agreed to.

Mr. McCUMBER. On page 7, line 11, after the word "exported," I move to insert:

But may be reinspected upon demand if for any cause its character or quality has been materially changed since the previous inspection.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 7, line 11, after the word "exported," it is proposed to insert:

But may be reinspected upon demand if for any cause its character or quality has been materially changed since the previous inspection.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Nebraska?

Mr. McCUMBER. I yield.

Mr. NORRIS. I wish to inquire of the Senator from North Dakota regarding the other amendment that was offered just before this. As I understand, the effect of the other amendment is that no inspection will be required excepting at the places named in the bill?

Mr. McCUMBER. Yes; or at such places as the Secretary may designate.

Mr. NORRIS. That is the point I wanted to ask about.

Mr. McCUMBER. Yes; because when it says "at the aforesaid important grain terminals," I mentioned that the bill provides that the Secretary may establish Federal inspection at these important grain terminals, and I used the words "the

aforesaid important grain terminals" in the amendment so as to refer to that as being included within it.

Mr. NORRIS. The only question in my mind was whether the amendment would include other places that might be named by the Secretary.

Mr. McCUMBER. I will say that it does.

Mr. NORRIS. I have just heard it read, and yet I had some doubt about it. Of course, it ought to do that, because there probably will be other places named by the Secretary, taking advantage of the provisions of the bill.

Mr. McCUMBER. I have used the exact words that I used in the others, providing for other important grain terminals; so when I say "the aforesaid important grain terminals" it refers to the same ones that may be designated.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from North Dakota.

The amendment was agreed to.

Mr. McCUMBER. Those are all the amendments I desire to offer to perfect the bill.

The PRESIDING OFFICER. The bill having been perfected, the amendment in the nature of a substitute, proposed by the Senator from Oklahoma [Mr. GORE], is now in order.

Mr. GORE. Mr. President, I desire to avoid a repetition of the debate on this subject at the present time. Therefore, I shall detain the Senate only for a few moments.

The end proposed by the pending bill and the end proposed by the substitute are the same. They differ merely as to the means proposed for the accomplishment of the common end.

It is not my purpose to discuss the necessity or the desirability of establishing uniform grades of grain throughout the United States. That necessity is universally appreciated. Such a uniformity of grade would be serviceable to everybody connected with the production, transportation, and sale of grain. It would be serviceable to the producer, to the shipper, to the dealer, to the consumer, to the exporter, and to the purchasers in foreign countries. I believe that everybody in this country, at least, now appreciates the importance of establishing uniform grades of grain throughout the country.

That end can be brought about only under the authority of the Federal Government. It can not be done by the several States acting independently.

One of these bills proposes Federal inspection; the other Federal supervision. The pending bill proposes Federal inspection. The substitute I have offered, I may say, in the main proposes Federal supervision.

The General Government and the Congress have appreciated the importance of such uniformity of grade. In 1907 the agricultural appropriation bill carried an item of $15,000, with the direction that the Secretary of Agriculture should investigate the handling, grading, and transportation of grain with a view to the ultimate standardization of grades. Each and every agricultural appropriation bill since passed has carried a similar appropriation. Last year the agricultural appropriation bill carried an item of $65,000, continuing the direction that the Secretary should investigate the subject, with a view to ultimate standardization.

The measure which I have proposed as a substitute is the result of these years of research and of investigation. The measure was prepared under the direction of the Department of Agriculture. In their judgment, as in my own, it will accomplish the end desired. It will establish uniformity of grades. It will avoid the erection of an elaborate system of machinery and will avoid the enormous expense incident to the bill proposed by the Senator from North Dakota.

In my own judgment, as in the judgment of the department, the pending substitute will accomplish the purpose desired by the country and will avoid the difficulties and objections to which the other measure is subject.

The PRESIDING OFFICER. The question is on the amendment, in the nature of a substitute, proposed by the Senator from Oklahoma [Mr. GORE].

Mr. McCUMBER. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. REED. Mr. President, I desire to say just one word. The Gore amendment is a vast improvement upon the original bill, and therefore I am going to vote now for the substitute; but if it is adopted, there will be some suggestions as to amendments to be made hereafter.

Mr. JONES. I should like to ask the Senator if he can state, briefly, what the improvements are as between the substitute and the principal bill?

Mr. REED. The Senator from Oklahoma has introduced a substitute, which was practically prepared by the Department of Agriculture, which proposes that the Government shall establish grades, and that the Government shall supervise the enforcement of those grades; but it leaves to the various States the right to maintain the inspection machinery. His bill could be enforced for about $100,000 a year, according to the estimate. The other bill would cost $1,500,000, according to the latest and best estimate, and it takes away from the States the right to control their local markets.

Mr. JONES. I understand that under the substitute the inspectors would be State employees?

Mr. REED. Yes; but licensed, and controlled in that way, under the substitute of the Senator from Oklahoma, by the Secretary of Agriculture.

Mr. WEST. Mr. President, did I understand the Senator from Missouri to say that after the substitute was adopted it would be subject to amendment?

Mr. REED. Yes.

Mr. WEST. Then I will vote for it.

The PRESIDING OFFICER. The question is on the amendment, in the nature of a substitute, offered by the Senator from Oklahoma [Mr. GORE], on which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. BURTON (when his name was called). I am paired with the junior Senator from North Dakota [Mr. GRONNA] on this measure. I transfer that pair to the junior Senator from Maine [Mr. BURLEIGH] and will vote. I vote "nay."

Mr. CHILTON (when his name was called). I have a general pair with the senior Senator from New Mexico [Mr. FALL] and therefore withhold my vote.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE], who has indicated that he will not be able to be here this afternoon, and I therefore withhold my vote.

Mr. SHEPPARD (when Mr. CULBERSON'S name was called). I wish to announce the unavoidable absence of my colleague [Mr. CULBERSON], who is paired with the senior Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.

Mr. HUGHES (when his name was called). I have a pair on this bill with the junior Senator from West Virginia [Mr. GOFF] and therefore withhold my vote. If the Senator from West Virginia were present, I should vote "nay."

Mr. KERN (when his name was called). I transfer my pair with the senior Senator from Kentucky [Mr. BRADLEY] to the junior Senator from Nevada [Mr. PITTMAN] and will vote. I vote "yea."

Mr. WALSH (when Mr. MYERS'S name was called). The absence of my colleague [Mr. MYERS] is due to illness. I will let this announcement stand for the day.

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from California [Mr. PERKINS] and therefore withhold my vote.

Mr. OLIVER (when Mr. PENROSE'S name was called). My colleague [Mr. PENROSE] is unavoidably absent. He is paired with the senior Senator from Mississippi [Mr. WILLIAMS].

Mr. SMITH of South Carolina (when his name was called). I have a pair with the senior Senator from New Hampshire [Mr. GALLINGER]. In his absence I withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from New York [Mr. ROOT], and therefore withhold my vote.

Mr. TILLMAN (when his name was called). I have a general pair with the junior Senator from Wisconsin [Mr. STEPHENSON]. I transfer that pair to the junior Senator from Delaware [Mr. SAULSBURY] and will vote. I vote "nay."

Mr. WALSH (when his name was called). I have a general pair with the senior Senator from Rhode Island [Mr. LIPPITT]. In his absence I refrain from voting.

Mr. CLARK of Wyoming (when Mr. WARREN'S name was called). My colleague [Mr. WARREN] is unavoidably absent from the Chamber. He is paired with the senior Senator from Florida [Mr. FLETCHER], who is also absent.

Mr. WEEKS (when his name was called). I have a general pair with the junior Senator from Kentucky [Mr. JAMES]. I transfer that pair to the junior Senator from California [Mr. WORKS] and will vote. I vote "nay."

Mr. KERN (when Mr. WILLIAMS'S name was called). I desire to announce the unavoidable absence of the senior Senator from Mississippi [Mr. WILLIAMS], and to state that he is paired with the senior Senator from Pennsylvania [Mr. PENROSE].

The roll call was concluded.

Mr. McCUMBER. I wish to announce the unavoidable absence of my colleague [Mr. GRONNA], and to state that he is paired with the senior Senator from Ohio [Mr. BURTON].

Mr. SMOOT. I wish to announce the unavoidable absence of the senior Senator from Kentucky [Mr. BRADLEY]. He has

a general pair with the junior Senator from Indiana [Mr. KERN]. I also desire to announce the unavoidable absence of the junior Senator from Wisconsin [Mr. STEPHENSON]. He is paired with the senior Senator from South Carolina [Mr. TILLMAN].

Mr. CLARKE of Arkansas. I have a pair with the junior Senator from Utah [Mr. SUTHERLAND]. I transfer that pair to the senior Senator from Nevada [Mr. NEWLANDS] and will vote. I vote "yea."

Mr. HUGHES. I transfer my pair with the junior Senator from West Virginia [Mr. GOFF] to the senior Senator from Nebraska [Mr. HITCHCOCK] and will vote. I vote "nay."

Mr. REED. My colleague [Mr. STONE] is unavoidably detained from the Senate, owing to the condition of his health.

The result was announced—yeas 26, nays 34, as follows:

YEAS—26.

Ashurst	Kern	Reed	Smith, Ariz.
Bryan	Lea, Tenn.	Robinson	Smith, Ga.
Chamberlain	Lee, Md.	Shafroth	Swanson
Clarke, Ark.	Lewis	Sheppard	Thompson
Gore	Martine, N. J.	Shields	West
Hollis	Owen	Shively	
Johnson	Pomerene	Simmons	

NAYS—34.

Bankhead	Crawford	Nelson	Smith, Mich.
Borah	Dillingham	Norris	Smoot
Brady	Hughes	O'Gorman	Sterling
Brandegee	Jones	Oliver	Thornton
Bristow	Kenyon	Page	Tillman
Burton	Lane	Poindexter	Townsend
Catron	Lodge	Ransdell	Weeks
Clapp	McCumber	Sherman	
Colt	Martin, Va.	Smith, Md.	

NOT VOTING—35.

Bradley	Gallinger	Newlands	Stone
Burleigh	Goff	Overman	Sutherland
Chilton	Gronna	Penrose	Thomas
Clark, Wyo.	Hitchcock	Perkins	Vardaman
Culberson	James	Pittman	Walsh
Cummins	La Follette	Root	Warren
du Pont	Lippitt	Saulsbury	Williams
Fall	McLean	Smith, S. C.	Works
Fletcher	Myers	Stephenson	

So Mr. GORE's amendment was rejected.

The PRESIDING OFFICER. The bill is still in Committee of the Whole and open to amendment. If there be no further amendment as in Committee of the Whole the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, and was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass?

Mr. REED. I ask for the yeas and nays.

Mr. LODGE. Let us have the yeas and nays on the passage of the bill.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BURTON (when his name was called). On this measure I have a pair with the junior Senator from North Dakota [Mr. GRONNA]. I transfer that pair to the junior Senator from Maine [Mr. BURLEIGH] and vote. I vote "nay."

Mr. CHILTON (when his name was called). I wish to renew the announcement I made on the previous vote, and I withhold my vote.

Mr. CLARK of Wyoming (when his name was called). Again announcing my pair with the senior Senator from Missouri [Mr. STONE], who is unavoidably detained from the Chamber, I withhold my vote.

Mr. SHEPPARD (when Mr. CULBERSON's name was called). I make the same announcement that I formerly made in regard to the absence and the pair of my colleague [Mr. CULBERSON].

Mr. HUGHES (when his name was called). I am paired with the junior Senator from West Virginia [Mr. GOFF] and therefore withhold my vote.

Mr. KERN (when his name was called). I announce my pair with the senior Senator from Kentucky [Mr. BRADLEY] and withhold my vote, not knowing how he would vote if present.

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from California [Mr. PERKINS], but by an arrangement with the Senator from Massachusetts [Mr. WEEKS] I transfer my pair to the junior Senator from Kentucky [Mr. JAMES] and vote. I vote "nay."

Mr. SMITH of South Carolina (when his name was called). I again announce my pair with the Senator from New Hampshire [Mr. GALLINGER] and withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from New York [Mr. ROOT] and withhold my vote.

Mr. TILLMAN (when his name was called). I transfer my pair with the junior Senator from Wisconsin [Mr. STEPHENSON] to the Senator from Delaware [Mr. SAULSBURY] and vote "nay."

Mr. WALSH (when his name was called). I again announce my pair with the senior Senator from Rhode Island [Mr. LIPPITT], and withhold my vote in consequence of his absence.

Mr. KERN (when Mr. WILLIAMS's name was called). I again announce the unavoidable absence of the Senator from Mississippi [Mr. WILLIAMS]. He is paired with the Senator from Pennsylvania [Mr. PENROSE].

The roll call was concluded.

Mr. McCUMBER. I again announce the unavoidable absence of my colleague [Mr. GRONNA]. I will state that he is paired with the Senator from Ohio [Mr. BURTON].

Mr. HUGHES. I desire to transfer my pair with the junior Senator from West Virginia [Mr. GOFF] to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote. I vote "yea."

The result was announced—yeas 20, nays 37, as follows.

YEAS—20.

Ashurst	Gore	Lane	Robinson
Borah	Hughes	McCumber	Shafroth
Brady	Johnson	Norris	Sheppard
Bristow	Jones	Page	Sterling
Crawford	Kenyon	Poindexter	Thompson

NAYS—37.

Bankhead	Lea, Tenn.	Pomerene	Smith, Mich.
Brandegee	Lee, Md.	Ransdell	Swanson
Bryan	Lewis	Reed	Thornton
Burton	Lodge	Sherman	Tillman
Catron	Martin, Va.	Shields	Townsend
Chamberlain	Martine, N. J.	Shively	Weeks
Clapp	Nelson	Simmons	West
Colt	O'Gorman	Smith, Ariz.	
Dillingham	Oliver	Smith, Ga.	
Hollis	Overman	Smith, Md.	

NOT VOTING—38.

Bradley	Gallinger	Newlands	Stone
Burleigh	Goff	Owen	Sutherland
Chilton	Gronna	Penrose	Thomas
Clark, Wyo.	Hitchcock	Perkins	Vardaman
Clarke, Ark.	James	Pittman	Walsh
Culberson	Kern	Root	Warren
Cummins	La Follette	Saulsbury	Williams
du Pont	Lippitt	Smith, S. C.	Works
Fall	McLean	Smoot	
Fletcher	Myers	Stephenson	

So the Senate refused to pass the bill.

RADIUM-BEARING ORES.

Mr. WALSH. Mr. President, pursuant to the notice heretofore given and in order that it may assume the character of unfinished business upon the adjournment to-day, I move that the Senate proceed to the consideration of the bill (S. 4405) to provide for and encourage the prospecting, mining, and treatment of radium-bearing ores in lands belonging to the United States, for the purpose of securing an adequate supply of radium for Government and other hospitals in the United States, and for other purposes. I will say in this connection that I am in hopes that we shall be able to dispose of the bill to-morrow, so that it will be out of the way of the consideration of the Panama Canal tolls bill.

Mr. SMOOT. Mr. President, I do not believe there will be any question about taking up the bill to-morrow. The Senator from Montana can make the motion immediately on the close of the morning business just as well as this evening.

Mr. WALSH. I do not know any reason why the motion should not be made now just as well as to-morrow.

Mr. SMOOT. There are a number of Senators who are not here. I have not any objection to the motion, and I will vote with him to-morrow to take up the bill immediately after the close of the morning business.

EXECUTIVE SESSION.

Mr. SHIVELY. Pending the motion of the Senator from Montana, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened, and (at 6 o'clock and 20 minutes p. m.) the Senate adjourned until to-morrow, Saturday, May 2, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 1, 1914.

COLLECTOR OF CUSTOMS.

Harris Bennett, of Duluth, Minn., to be collector of customs for the district of Duluth and Superior, in place of Levi M. Willcuts, whose term of office expired by limitation January 31, 1914.

James W. Woolf to be postmaster at Tempe, Ariz., in place of John O. Mullen, resigned.

ARKANSAS.

Robert S. Allen to be postmaster at Mena, Ark., in place of Levi Wimberly. Incumbent's commission expired March 17, 1914.

William D. Jacoway to be postmaster at Dardanelle, Ark., in place of Henry M. Sugg. Incumbent's commission expired February 1, 1914.

John H. Nance to be postmaster at Earl, Ark., in place of Eva V. Moss, removed.

W. A. Ragon to be postmaster at Clarksville, Ark., in place of John N. Sarber, jr. Incumbent's commission expired February 7, 1914.

Ellis Turley to be postmaster at Forrest City, Ark., in place of Thomas O. Fitzpatrick. Incumbent's commission expired February 7, 1914.

CALIFORNIA.

George R. Bellah to be postmaster at Oxnard, Cal., in place of S. B. Bagnall. Incumbent's commission expired March 8, 1914.

Wright S. Boddy to be postmaster at Oakdale, Cal., in place of Robert G. Benson. Incumbent's commission expires June 10, 1914.

C. W. Corey to be postmaster at Escondido, Cal., in place of W. B. McCorkle, resigned.

James A. Lewis to be postmaster at Carpinteria, Cal. Office became presidential October 1, 1913.

Lottie L. Miracle to be postmaster at Campbell, Cal., in place of Meda L. Waite. Incumbent's commission expires May 18, 1914.

Joseph Scherrer to be postmaster at Placerville, Cal., in place of Shelley Inch. Incumbent's commission expires May 2, 1914.

James F. Trout to be postmaster at Avalon, Cal., in place of Edwin Stanton, resigned.

CONNECTICUT.

Andrew Leary to be postmaster at South Norwalk, Conn., in place of Edmund E. Crowe, resigned.

GEORGIA.

F. D. Colson to be postmaster at Ocilla, Ga., in place of Henry B. Sutton. Incumbent's commission expires May 19, 1914.

Marshall G. Merritt to be postmaster at Trion, Ga. Office became presidential April 1, 1914.

Henry T. Sewell to be postmaster at Lavonia, Ga., in place of T. A. Gulley. Incumbent's commission expired April 25, 1914.

HAWAII.

W. F. Young to be postmaster at Honolulu, Hawaii, in place of Joseph G. Pratt. Incumbent's commission expired February 25, 1914.

IDAHO.

Anna McMahon to be postmaster at Spirit Lake, Idaho, in place of Carl F. Zinnius. Incumbent's commission expired February 9, 1914.

ILLINOIS.

George Hanlon to be postmaster at Shawneetown, Ill., in place of Allen T. Spivey, removed.

F. O. Lovins to be postmaster at East Moline, Ill., in place of Frank J. Clendenin. Incumbent's commission expires June 10, 1914.

Henry J. Richardson to be postmaster at Pecatonica, Ill., in place of William J. De La Mater. Incumbent's commission expired January 26, 1914.

Charles Walkup to be postmaster at Oregon, Ill., in place of John T. Gantz. Incumbent's commission expired April 5, 1914.

INDIANA.

Charles B. Beck to be postmaster at Richmond, Ind., in place of Edgar M. Haas. Incumbent's commission expires June 2, 1914.

George B. Davis to be postmaster at Logansport, Ind., in place of John M. Johnston. Incumbent's commission expires June 10, 1914.

Simon Doenges to be postmaster at Connersville, Ind., in place of Samuel R. De Haven. Incumbent's commission expires June 2, 1914.

Lewis Sartor to be postmaster at Martinsville, Ind., in place of Frank T. Singleton. Incumbent's commission expires May 4, 1914.

Albert T. Sering to be postmaster at Liberty, Ind., in place of James M. Freeman. Incumbent's commission expires June 2, 1914.

Lucius C. Wann to be postmaster at Warsaw, Ind., in place of Eugene Alleman. Incumbent's commission expired April 29, 1914.

IOWA.

B. M. Jacobsen to be postmaster at Clinton, Iowa, in place of E. L. Martindale. Incumbent's commission expired March 5, 1914.

Katherine E. Morcombe to be postmaster at Storm Lake, Iowa, in place of Thomas Walpole. Incumbent's commission expired January 26, 1914.

KANSAS.

A. E. Bruner to be postmaster at Highland, Kans., in place of Harvey S. Hogue, deceased.

A. M. Markley to be postmaster at Mound City, Kans., in place of Edwin R. Smith. Incumbent's commission expired February 18, 1914.

Henry C. Mayse to be postmaster at Ashland, Kans., in place of George W. McNickle. Incumbent's commission expired April 28, 1914.

MAINE.

Daniel A. Michaud to be postmaster at East Millinocket, Me., in place of Guy S. Baker, resigned.

Frank A. Millett to be postmaster at Mechanic Falls, Me., in place of Forest L. Waterman, resigned.

MICHIGAN.

F. J. Bertschy to be postmaster at Spring Lake, Mich., in place of Samuel Falls, resigned.

Henry C. Glasner to be postmaster at Nashville, Mich., in place of L. W. Feighner, removed.

Peter F. Gray to be postmaster at Lansing, Mich., in place of Harris E. Thomas, declined.

John Loughnane to be postmaster at Lapeer, Mich., in place of Francis McElroy, deceased.

MISSOURI.

John T. Haley to be postmaster at Harris, Mo. Office became presidential April 1, 1914.

Oscar L. Meek to be postmaster at Koshkonong, Mo., in place of Elijah L. Brown, resigned.

NEBRASKA.

W. D. Bradstreet to be postmaster at Spencer, Nebr., in place of Josiah Coombs. Incumbent's commission expired January 11, 1914.

Thomas A. Kelly to be postmaster at Republican City, Nebr., in place of Charles W. Whitney. Incumbent's commission expired January 31, 1914.

M. T. Kilmer to be postmaster at Western, Nebr., in place of William Kaup. Incumbent's commission expired March 22, 1914.

I. A. Manchester to be postmaster at North Loup, Nebr., in place of William H. Rood. Incumbent's commission expired June 16, 1913.

NEW HAMPSHIRE.

John R. Willis to be postmaster at Manchester, N. H., in place of Edward H. Chadbourne. Incumbent's commission expires May 2, 1914.

NEW JERSEY.

Anton J. Mikolajczak to be postmaster at Maurer, N. J., in place of Frederick W. Bohlen. Incumbent's commission expired December 16, 1912.

NEW YORK.

Edward A. Clark to be postmaster at Greene, N. Y., in place of Richard Carter. Incumbent's commission expired March 30, 1914.

John D. Crosby to be postmaster at Inwood, N. Y., in place of W. A. Reinhart, resigned.

Myron L. Fisher to be postmaster at Spencer, N. Y., in place of Henry L. Emmons, removed.

Daniel Grant to be postmaster at Afton, N. Y., in place of Peter S. Krum. Incumbent's commission expired March 29, 1913.

Elbert G. Harris to be postmaster at Cuba, N. Y., in place of J. Fenton Olive. Incumbent's commission expires May 28, 1914.

Abram Lang to be postmaster at Eden, N. Y. Office became presidential January 1, 1913.

Andrew J. McMahon to be postmaster at Groton, N. Y., in place of L. J. Townley. Incumbent's commission expires May 23, 1914.

James L. Seely, jr., to be postmaster at Canisteo, N. Y., in place of Herman E. Buck. Incumbent's commission expired April 12, 1914.

Robert F. Talbot to be postmaster at New Berlin, N. Y., in place of Percy J. Thomas. Incumbent's commission expired March 30, 1914.

NORTH CAROLINA.

James D. Babb to be postmaster at Murfreesboro, N. C. Office became presidential January 1, 1914.

T. L. Grant to be postmaster at Old Fort, N. C., in place of William J. Souther. Incumbent's commission expired April 21, 1914.

George C. Lynch to be postmaster at Hillsboro, N. C., in place of C. G. Rosemond, resigned.

NORTH DAKOTA.

George E. Duis to be postmaster at Grand Forks, N. Dak., in place of Frank V. Kent. Incumbent's commission expired March 22, 1914.

OHIO.

William D. Caldwell to be postmaster at Canton, Ohio, in place of George H. Clark. Incumbent's commission expires June 6, 1914.

Crayton V. Calvin to be postmaster at Columbiana, Ohio, in place of Samuel S. Stewart. Incumbent's commission expires June 6, 1914.

Clarence D. Crumb to be postmaster at Cuyahoga Falls, Ohio, in place of Richard L. Moore, resigned.

Frank H. Davet to be postmaster at Madison, Ohio, in place of Charles W. Searls. Incumbent's commission expires June 6, 1914.

Charles A. Eberle to be postmaster at Dillonvale, Ohio, in place of William S. Parlett. Incumbent's commission expired April 21, 1914.

M. A. Houghton to be postmaster at Oberlin, Ohio, in place of Judson N. Stone. Incumbent's commission expired January 24, 1914.

Franzo D. Miller to be postmaster at Alliance, Ohio, in place of Edwin Morgan. Incumbent's commission expires June 6, 1914.

David Snyder to be postmaster at Archbold, Ohio, in place of Edward L. Downer. Incumbent's commission expires June 6, 1914.

William E. Warren to be postmaster at Leetonia, Ohio, in place of Henry D. Weaver. Incumbent's commission expires June 6, 1914.

OKLAHOMA.

William I. Bowen to be postmaster at Haileyville, Okla., in place of Odel S. Combs. Incumbent's commission expired March 2, 1914.

B. F. Suter to be postmaster at Randlett, Okla., in place of Will W. Fowler. Incumbent's commission expired April 5, 1914.

William T. Vest to be postmaster at Pondcreek, Okla., in place of Elmer E. Darrough. Incumbent's commission expired January 25, 1914.

OREGON.

T. B. Vernon to be postmaster at Lakeview, Oreg., in place of Fred C. Ahlstrom, resigned.

PENNSYLVANIA.

Charles J. Hansell to be postmaster at Cynwyd, Pa., in place of Elizabeth R. Skelton. Incumbent's commission expired January 25, 1913.

Martin Klinger to be postmaster at Allentown, Pa., in place of J. H. Kohler. Incumbent's commission expires June 10, 1914.

John J. McCoy to be postmaster at Crum Lynne, Pa. Office became presidential April 1, 1914.

Harvey Zeigler to be postmaster at Red Lion, Pa., in place of John S. Brooks. Incumbent's commission expires June 7, 1914.

SOUTH DAKOTA.

John Knuckey to be postmaster at Clear Lake, S. Dak., in place of J. Melroy Staley. Incumbent's commission expired February 25, 1914.

TENNESSEE.

William B. Hunt to be postmaster at Tellico Plains, Tenn., in place of Joseph M. Hawkins. Incumbent's commission expired April 21, 1914.

A. M. Riggs to be postmaster at Lafollette, Tenn., in place of William H. Delap, resigned.

TEXAS.

J. J. Evans to be postmaster at Bloomington, Tex. Office became presidential April 1, 1914.

Evye Kennedy to be postmaster at Kirbyville, Tex., in place of C. W. Bradbury, deceased.

UTAH.

Berdie P. Olson to be postmaster at Ephraim, Utah, in place of Fred Jorgensen. Incumbent's commission expired April 15, 1914.

VERMONT.

W. H. Boardman to be postmaster at Charlotte, Vt. Office became presidential October 1, 1913.

Redding M. Harper, La Grange.

OHIO.

H. J. Spitler, Brookville.

WITHDRAWAL.

Executive nomination withdrawn May 1, 1914.

POSTMASTER.

Clarence E. Butler to be postmaster at Osceola, in the State of Arkansas.

HOUSE OF REPRESENTATIVES.

FRIDAY, *May 1, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou, who art the life of men, the light of the world, the source of all good, cleanse our hearts, illumine our minds, quicken our conscience, strengthen our will, and give us the courage of our convictions, that we may prove ourselves worthy sons of the living God this day and in all subsequent days. In the spirit of the Lord Jesus Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

SESSION OF THE HOUSE NEXT TUESDAY EVENING.

Mr. POU. Mr. Speaker, under the rule this is private-bill day. I presume the House wants to go on with the naval appropriation bill. I ask unanimous consent that on next Tuesday night the House meet at 8 o'clock and remain in session until 11 o'clock p. m. for the consideration of bills on the Private Calendar which are unobjected to.

Mr. MURDOCK. Reserving the right to object, this same thing was done about two weeks ago.

Mr. POU. With respect to bills from the Committee on Claims only.

Mr. MURDOCK. Was it successful? Were any bills passed?

Mr. POU. We passed over 40 bills. I am now making the request that the House meet at 8 o'clock Tuesday night and remain in session until 11 o'clock for the consideration of bills on the Private Calendar which are not objected to.

Mr. MANN. I suppose the gentleman means that the House shall remain in session not later than 11 o'clock?

Mr. POU. Not later than 11 o'clock. That is the request I make.

Mr. MANN. Does that carry with it a recess from 5 o'clock until 8 o'clock?

Mr. POU. I presume the House would stand in recess from 5 o'clock until 8 o'clock.

Mr. MANN. That had better be included in the request.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that on next Tuesday the House take a recess from 5 o'clock to 8 o'clock p. m., and that there shall be a session extending from 8 o'clock until not later than 11 o'clock, for the purpose of considering bills on the Private Calendar not objected to. Is there objection?

There was no objection.

THE COLORADO STRIKE.

Mr. TOWNER. Mr. Speaker, I ask unanimous consent to extend by remarks in the RECORD by inserting a short letter received from a former Iowa citizen now in Colorado regarding the strike conditions at Trinidad.

The SPEAKER. The gentleman from Iowa [Mr. TOWNER] asks unanimous consent to extend his remarks in the RECORD by printing the letter which he names. Is there objection?

There was no objection.

The document referred to is as follows:

STRIKE CONDITIONS, TRINIDAD, COLO.

Letter from a former citizen of Iowa, now in Trinidad, Colo., who was formerly an engineer on the railroad and was considered reliable in every way.

TRINIDAD, COLO.

———— ————,

————— ————.

————: I know you will be surprised to hear from me. For God's sake, if you ever did anything in your life for which you expect the Almighty to reward you, write ———— a line to back up FOSTER on anything he does or says in regard to this trouble here. It is a blot on civilization. The heathens never committed such crimes as the thugs and murderers recruited by the Colorado Fuel & Iron Co. under the name of the National Guard. This district has been under martial law. The guards took away all the arms from the miners, withdrew from the field last Thursday, and yesterday a few gunmen (150) planted six machine guns on the hills surrounding the tent colony at Ludlow—this was land leased by the Western Mine Workers. They opened fire on the colony; never gave the women and children time to get away. The miners resisted as much as possible until they could get women and children away. Last night they set fire to the tent colony. In one tent 13 women and children were suffocated and their bodies burned, and to-night authoritative word comes to the effect that 11 people, 2 women and 9 children, were found smothered under a blanket. I just came from the Trinidad Trades and Labor Assembly, and I had to break down and cry. Language can not be found to picture such desolation and misery. I just thought, My God, what if my little girl and boys were left in such a condition.

The thugs in the employ of the Colorado Fuel & Iron Co. have burned all the bodies they could find in order to hide their crimes. It is surely a pitiful state of affairs. I am not concerned, only so far as humanity goes. I don't believe the Almighty would refuse the vilest wretch on earth a home in heaven if he were to pick up a gun and clean out these gunmen. If you can do anything to help FOSTER, for God's sake do it.

———— ————.

————— ————.

LEAVE TO EXTEND REMARKS.

Mr. MURDOCK. Mr. Speaker, I ask unanimous consent to print in the RECORD some remarks on the subject of the bureau of employment, provided in a bill which I have introduced, incorporating a paper on the subject by Elizabeth Read.

The SPEAKER. The gentleman from Kansas asks unanimous consent to print remarks in the RECORD.

Mr. FITZGERALD. Does the gentleman from Kansas object to making that speech?

Mr. MURDOCK. No; but I am trying to save the House.

Mr. FITZGERALD. I think the House would be very glad to hear the speech.

The SPEAKER. Is there objection to the request of the gentleman that he be allowed to print remarks in the RECORD?

There was no objection.

LOT 44, SQUARE 172, WASHINGTON, D. C.

Mr. WEBB. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 5031) quieting the title to lot 44, in square 172, in the city of Washington. An identical House bill has been favorably reported by the Judiciary Committee.

The SPEAKER. The gentleman from North Carolina [Mr. WEBB] asks unanimous consent to take from the Speaker's table Senate bill 5031, a House bill identical in words having been reported by a House committee.

Mr. WEBB. House bill 14730, which is identical, has been favorably reported by the Committee on the Judiciary.

The SPEAKER. Has that bill come over from the Senate?

Mr. WEBB. Yes; it has been passed by the Senate. I am informed that it is on the Speaker's table.

The SPEAKER. It appears that this Senate bill, S. 5031, was, on last Tuesday, referred to the Committee on the Public Lands.

Mr. WEBB. I ask unanimous consent to discharge the Committee on the Public Lands from the further consideration of the bill and to take it from the Speaker's table.

The SPEAKER. The gentleman from North Carolina asks unanimous consent to discharge the Committee on the Public Lands from the further consideration of Senate bill 5031, and to take it from the Speaker's table. Is there objection?

Mr. MANN. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. Is the engrossed Senate bill here?

The SPEAKER. The Clerk says it is not.

Mr. MANN. Then the House can not consider it if it is not here.

Mr. FITZGERALD. Mr. Speaker, what is the nature of the bill?

Mr. SLAYDEN. The gentleman from New York wishes an explanation of the bill. I can explain it.

Mr. WEBB. The corresponding House bill was referred to the Committee on the Judiciary, and we reported it unanimously; but when the Senate bill came over here it was by mistake referred to the Committee on the Public Lands.

Mr. SLAYDEN. I think when the gentleman understands the situation he will be entirely satisfied to let the committee be discharged and the bill passed.

Mr. MANN. Mr. Speaker, it is impossible for the House to act on a Senate bill without having the engrossed Senate bill before the House.

The SPEAKER. That is true.

Mr. MANN. It is easy enough to send over and get the engrossed bill.

Mr. WEBB. I supposed the engrossed bill was here.

The SPEAKER. The Chair supposed so, too, but when the bill was referred on Tuesday last, of course the engrossed copy went to the committee. Is there objection to discharging the Committee on the Public Lands from the further consideration of this bill?

Mr. MANN. Mr. Speaker, I think they ought to get the bill here.

Mr. WEBB. I want to say that when this bill was originally introduced it went to the Judiciary Committee for some reason or other. We unanimously reported it.

Mr. MANN. But we make an invariable rule in both bodies not to act upon a bill of the other House without having the engrossed copy of the bill here.

The SPEAKER. The first step is to get the bill here, and one way of getting the bill here is to discharge the committee, and then it can send over and get it.

Mr. MANN. The committee can send over and get it anyway.

The SPEAKER. Physically, yes. Is there objection to discharging the Committee on the Public Lands from the further consideration of the bill?

Mr. MANN. Suppose that some one should object to the consideration of the bill?

The SPEAKER. Then the Speaker would rerefer it.

Mr. MADDEN. What is the purpose of the bill?

The SPEAKER. It clears up the title to a small strip of land for the building which is to be erected for the benefit of the Red Cross.

Mr. WEBB. It is a memorial building to the women of the Civil War.

Mr. SLAYDEN. This is to clear up the title to a strip of land upon which the building is to be erected as a memorial to the women of the Civil War, to be used by the American Red Cross. Block 172 was originally deeded to the Government at the time of the organization of the District of Columbia, and subsequently the Government sold it. It subsequently passed by various sales to a gentleman by the name of Maher, an Irishman, who died a number of years ago. It changed owners several times, and finally, in 1866, became the property of James Maher.

James Maher, by will duly proven and admitted to probate, devised to his two children, Annie Maria Maher and James B. Maher, jointly, in fee simple. The wife of James Maher died November 8, 1877, the daughter died January 2, 1878, and the son, James B. Maher, died May 9, 1879. The widow of James Maher died without children other than James and Annie, and these two children died intestate, unmarried, and without issue.

Now, it is a question whether or not this lot has escheated to the United States. The Government has been paid for the property.

Mr. FITZGERALD. The United States is taking the property. What are you going to do, release it to itself?

Mr. SLAYDEN. Release it to itself.

Mr. FITZGERALD. That is a peculiar thing to do.

Mr. SLAYDEN. That is what the bill proposes to do and what the attorneys think is desirable.

Mr. FITZGERALD. Does the committee recommend that?

Mr. WEBB. It is necessary under the laws of the District of Columbia.

Mr. FITZGERALD. That the United States release any title it may have to itself?

Mr. WEBB. Absolutely.

Mr. SLAYDEN. So the question involved is the question of escheat to the Government of the United States in passing title to the property that it originally owned.

Mr. BORLAND. Mr. Speaker, I do not understand yet the exact situation from the explanation of the gentleman from Texas—whether any private person is to be paid. Is the object of this bill to give some private person a chance to be paid for this property?

Mr. SLAYDEN. If the gentleman will read a paragraph or two in the report he will see it stated as succinctly as it is possible to state it.

Mr. GARRETT of Tennessee. May I ask the gentleman a question?

Mr. SLAYDEN. Certainly.

Mr. GARRETT of Tennessee. Has a similar bill been reported by the House committee?

Mr. SLAYDEN. Yes; by the Judiciary Committee.

Mr. GARRETT of Tennessee. Is there an emergency about this?

Mr. WEBB. There is; they want to get the title cleared.

Mr. GARNER. Mr. Speaker, I ask for the regular order.

The SPEAKER. The regular order is, Is there objection to discharging the Committee on the Public Lands from the further consideration of Senate bill 5031? [After a pause.] The Chair hears none. The Chair will notify gentlemen that as soon as the committee rises this evening he will recognize the gentleman to take up the bill.

LEAVE OF ABSENCE.

Mr. BALTZ, by unanimous consent, was given leave of absence for 10 days, on account of important business.

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the naval appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. JOHNSON of Kentucky in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the bill of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 14034) making appropriations for the naval service for the fiscal year ending June 30, 1915, and for other purposes.

Mr. PADGETT. Mr. Chairman, when the committee rose yesterday it was dividing on an amendment. I ask that the amendment be reported to the House.

The Clerk read as follows:

In lieu of the matter stricken out on the point of order at the top of page 22 insert a new paragraph, as follows:

"Navy yard, Boston, Mass.: That to carry out the purpose of so much of the act of March 4, 1913, as authorizes the President to have constructed one supply ship to cost, exclusive of armor and armament, not to exceed $1,425,000, there is hereby appropriated for the improvement of building slips and equipment $148,000."

Mr. MANN. Mr. Chairman, I would like to ask the gentleman from Massachusetts a question. The gentleman repeats in the amendment "Navy yard, Boston, Mass." That heading is in the bill. Does he want it in twice?

Mr. MURRAY of Massachusetts. I put it in so that there would be no doubt as to the place where the money was to be expended. I am perfectly willing that it should be stricken out. I ask, Mr. Chairman, to strike out the words "Navy yard, Boston, Mass.," because it appears in the caption under "Public works, Bureau of Yards and Docks," page 21 of the bill.

The CHAIRMAN. Is there objection to the modification of the amendment?

There was no objection.

The CHAIRMAN. The question is on the adoption of the amendment.

The question was taken, and the amendment was agreed to.

Mr. PADGETT. Mr. Chairman, I offer the following amendment, to follow the amendment just adopted.

The Clerk read as follows:

Amendment to follow the amendment just adopted, page 22: Insert "the unexpended balance under the appropriation 'Marine barracks, Boston, Mass.,' for the fiscal year ending June 30, 1914, is hereby covered back into the Treasury."

Mr. MURRAY of Massachusetts. Mr. Chairman, may I briefly say that I join with the chairman of the committee in support of this amendment, because we believe that this money which was appropriated for officers' quarters and marine barracks may well be covered back, in view of this appropriation?

Mr. MANN. Mr. Chairman, I notice the amendment says "unexpended balance."

Mr. PADGETT. All of it is unexpended.

Mr. MANN. There have been no obligations incurred at all?

Mr. PADGETT. No.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

Navy yard, New York, N. Y.: Paving and grading, to continue, $15,000; yard railroad, extension and equipment, $15,000; to complete Pier D, $12,000; toward construction of Pier C (cost not to exceed $130,000), $65,000; distributing system, extensions, to continue, including separator receivers, $15,000; in all, navy yard, New York, N. Y., $122,000.

Mr. MADDEN. Mr. Chairman, I make the point of order against the language in lines 9, 10, and 11—

Toward construction of Pier C (cost not to exceed $130,000), $65,000; distributing system, extensions, to continue, including separator receivers, $15,000.

Mr. PADGETT. Mr. Chairman, what is the point of order the gentleman makes?

Mr. MADDEN. Mr. Chairman, my point of order is that this is a new project not authorized by law.

Mr. PADGETT. Mr. Chairman, I will say to the gentleman that it is not a new project. It is a part of the improvement of the water front, but the committee this year adopted a different plan from what has been pursued heretofore. Heretofore we have appropriated toward water-front improvement, to continue, appropriating so much money, but the committee thought it better in this water-front improvement to designate in the bill what it should be, so that instead of making it read, as it has always read, "Water-front improvement, to continue," say, "$65,000," we have designated that it should be for Pier C, so that the House will know what it is that is being done.

Mr. MADDEN. This is a new project altogether. It is toward the construction. They have not begun the construction of this Pier C?

Mr. PADGETT. But it is a part of the water-front improvement, and if it be stricken from the bill it would be in order to offer an amendment by substituting the words "water-front improvement, to continue, $65,000," and we would accomplish the same thing, but not limit it and give the House control over the improvement.

Mr. MADDEN. This looks like a matter that ought to be in the river and harbor bill.

Mr. PADGETT. No; it is something that is carried regularly in the appropriation bill, but we have simply given the House the benefit of a specific designation, so that we would not say water-front improvement. This is not a new work or enterprise. Of course, this particular item that is to be constructed is a new thing, because it has not been constructed; but they have other piers there, and it is a water-front improvement. It has always been carried in the bill as water-front improvement, to continue, at whatever amount has been appropriated.

Mr. MADDEN. Just what are they trying to do down there?

Mr. PADGETT. They are developing the water front and improving the basin at the navy yard.

Mr. MADDEN. Does the gentleman mean that they are deepening the river?

Mr. PADGETT. Some of it has been deepened. Last year we appropriated for deepening the river, and this year we need this pier for the care and proper management and handling of the ships that come into the yard. There are a large number of ships that are handled there, and instead of putting it in the form that has heretofore been used—water-front improvement, to continue—we have specified what the work should be, so that Congress would know specifically what it was authorizing and what the department could do, and not give the money under the broad authority of water-front improvement, so that the department could do what it pleased with it. We thought this better legislation.

Mr. MADDEN. Does the gentleman from Tennessee say that when the language "toward construction of Pier C" appears in this bill, that under that the department would have the right to dredge the river and to deepen it?

Mr. PADGETT. No; they would not. We put it in that way for the reason that we wanted to limit it to this specific purpose; but if we put it in the language that has been used heretofore, they could either dredge the river or build the pier. We wanted to limit it so that it would be the pier, so that the House would designate what the improvement should be.

Mr. MADDEN. Does the gentleman say there is general authority of law to authorize the construction of piers in the navy yard?

Mr. PADGETT. Oh, yes; we have been doing that in the bill time out of mind under water-front improvement.

Mr. MADDEN. But it is all new law.

Mr. PADGETT. Oh, if the gentleman strikes this out, I would offer an amendment which would be in order to insert the language, "water-front improvement to continue, $65,000." Then the department could either build the pier or dredge the river; but we thought it better to preserve the rights of the House and designate what improvements should be made under this appropriation, thinking it better legislation.

Mr. CALDER. Mr. Chairman, if the gentleman will yield, last year the bill appropriated $100,000 for dredging the basin and $100,000 for water-front improvement to continue.

Mr. MADDEN. Of what did that consist?

Mr. CALDER. The first $100,000 was for dredging the basin, and the second $100,000 was for building this Pier C and for work on other piers.

Mr. MADDEN. But Pier C appears to be a new project.

Mr. CALDER. Oh, no; Pier D is a new project.

Mr. MADDEN. Is there unlimited authority for the extension of piers? Can they build as many piers as they want to?

Mr. PADGETT. They can.

Mr. GARNER. So long as Congress gives them the money.

Mr. PADGETT. When we insert language such as was used in the bill last year, "improvement of water front, to continue, $100,000," they could use that money to build a pier if they wanted to or to dredge the river. Heretofore they have been using it to build piers, but the committee thought it better when we authorize money for water-front improvement to designate how the money should be used, and not leave the broad, unlimited authority to the department.

Mr. MADDEN. Mr. Chairman, I withdraw the point of order.

The Clerk read as follows:

Navy yard, Philadelphia, Pa.: Quay walls and piers, $50,000; power plant improvement (to install rotary converters), $15,000; building slips and equipment, $200,000; in all, navy yard, Philadelphia, $265,000.

Mr. JONES. Mr. Chairman, I make the point of order against the words "building slips and equipment, $200,000," lines 15 and 16 of this paragraph. This, Mr. Chairman, is new legislation. There is no law which authorizes the construction of these building slips and equipment, and it can not be said that this proposed appropriation is to continue any work now in progress, as was said in reference to the building slip and equipment for the Boston yard. I think it will be admitted that there is not now, and never has been, a building slip at the Philadelphia Navy Yard. There never has been one and there is none there now. This is then an authorization for the construction of a building slip and equipment at a navy yard where there is none at present. I assume, Mr. Chairman, that the only excuse which will be offered in behalf of this appropriation is the fact that the Secretary of the Navy has ordered the building of a ship at this yard; that the law under which he acted authorized him to build it in a navy yard, and that therefore this authorization carries with it the authority to construct any necessary building way. I do not believe that such a contention will be entertained by the Chair for a moment. The law under which the transport is to be built provides that the Secretary of the Navy should build it either at a navy yard or by contract at one of the private yards of the country. The Secretary of the Navy has not thought fit to have this ship built at a navy yard equipped to build it, or at any one of the great private yards prepared to do so, but instead he has directed that it be built at a yard which is admittedly unprepared to do so. He now asks Congress to equip the Philadelphia yard to build this ship. Will it be contended that authority conferred upon the Secretary of the Navy to build a battleship carries with it authority to construct an armor-plate factory at a cost of $10,000,000? It will hardly be contended that such a factory could be appropriated for on a naval appropriation bill.

If it be permissible to provide for this building slip on a naval appropriation bill, then it would be equally permissible to so provide for the building of a new and complete navy yard. If the Secretary of the Navy can, under the act of March, 1913, order this ship to be built at a navy yard that can not build it, then he could order it built at a navy yard not in existence. But would it be competent under the rules of this House to provide upon a naval appropriation bill the funds to build the navy yard?

Mr. MOORE. Will the gentleman yield?

Mr. JONES. I will.

Mr. MOORE. The $148,000 that was appropriated for a building slip at the Boston yard would be expended for the construction of a ship, would it not?

Mr. JONES. I did not catch what the gentleman said.

Mr. MOORE. Yesterday the committee voted $148,000 for a building slip and equipment at the Boston yard. The gentleman does not contend that the $148,000 will not be spent for new work of construction on that building slip at the Boston yard, does he?

Mr. JONES. I may say, Mr. Chairman, that it was stated to the committee that there was a slip at Boston and that the appropriation was for the continuation of work upon that slip. That appropriation was held in order on the ground that it was for the improvement of an existing building slip. I took the position that if there was such a slip at Boston it was of small capacity, old, and practically worthless, and that the appropriation to which I objected was really to build a new building slip. In answer to my contention the gentleman from Massachusetts [Mr. ROBERTS] said that the existence of a slip at Boston capable of holding a yawl boat would make in order an appropriation to improve it to any extent. Now, the point I make is that there is absolutely no building way at Philadelphia at this time and that there never was one there at any time. The advocates of the appropriation to improve the building way at Boston undertook and, it seems, succeeded in differentiating the conditions which obtain at Boston from those which obtain at Philadelphia.

They contended that the appropriation for the Boston yard was not in violation of the rule, because it was to continue a work already in progress. It was stated that the Boston yard was a very old yard; that a great many ships had been built there; that the *Cumberland* was built there as late as 10 years ago; and that the slip upon which these ships had been built was there now. They defended that appropriation on the ground that it was to enlarge and improve a slip long since constructed under authorization of law; in other words, in the language of the rule. "a work in progress." As to this item there can be no such contention.

The gentleman from Massachusetts [Mr. ROBERTS] even described the building slip at Boston. He said it was a very massive one, built of stone, and therefore permanent in character. The gentleman from Boston [Mr. MURRAY] spoke to the same effect. This is an entirely different proposition. Nobody will claim, I think, that there is any sort of a building slip at the Philadelphia yard. This is a bald, naked proposition to authorize the construction of a building slip at a navy yard where there is not now and never has been one, and it is therefore clearly obnoxious to the rules of this House.

In my opinion, the Secretary of the Navy greatly erred in directing that the transport provided for in the act of March 4, 1913, should be built in a navy yard which lacked an equipment so essential as a building way; but, however that may be, to appropriate the money to supply this lacking building way upon a naval appropriation bill would be a palpable violation of one of the most wholesome rules of this body.

Mr. VARE. Mr. Chairman, it seems to me that the act of March 4, 1913, is very clear. It says, under the head "Increase of the Navy":

That for the purpose of further increasing the naval establishment of the United States the President is hereby authorized to have constructed one first-class battleship, carrying as heavy armor and as powerful armament as any vessel of its class, to have the highest practicable speed and greatest desirable radius of action, and to cost, exclusive of armor and armament, not to exceed $7,425,000: *Provided*, That the battleship herein authorized shall be built in a Government navy yard.

It goes on further to say that there shall be six torpedo-boat destroyers, and so forth. Further down in the law it says that the Secretary of the Navy "shall"—it does not say "may"—it does not say there shall be any discretion, but it says the Secretary of the Navy "shall" build the battleship, "shall" build any of the other vessels "herein authorized, in such navy yards as he may designate, should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels, have entered into any combination, agreement, or understanding the effect of which or purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the construction of said work."

The Chair ruled yesterday that the latter part of that law had no bearing whatever on the case. It is not my intention to take up the time of the committee going over matters that were discussed on the floor yesterday. These two propositions are identically the same, namely, Philadelphia and Boston. The same authority had authorized and demanded and commanded; had authorized the construction of and had made it mandatory on the Secretary of the Navy that these vessels shall be built. The Chair ruled yesterday, after listening to the different arguments for and against this proposition, and I will read his exact language:

The Secretary of the Navy shall build the battleship authorized in this act in such navy yard as he may designate, and shall build any of the other vessels herein authorized in such navy yards as he may designate should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels have entered into any combination, agreement, or understanding the effect, object, or purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the construction of any of said vessels.

I am still quoting from the language of the Chair yesterday:

Under that paragraph in the current law discretion is given to the Secretary of the Navy to determine where the ships shall be built. The Chair has been furnished with a letter, dated March 10, 1914, addressed to the Hon. LEMUEL P. PADGETT, chairman of the Committee on Naval Affairs, by Josephus Daniels, Secretary of the Navy, in which he says:

"After careful examination of the various bids and estimates, including the revision of the Boston and Philadelphia navy yards of the estimates at first submitted by them, I decided on February 19 to place the building of these two vessels in Government yards—the supply ship to be built at Boston and the transport to be built at Philadelphia."

Therefore—

Still quoting the language of the chairman—

we find that the Secretary of the Navy, acting under his legal discretion, has authorized this ship to be built at the Boston Navy Yard. In order to build it it is necessary to have a "slip," about which the Chair had never heard until this question came up. Some time has been used in discussing whether "building slip" was a hyphenated word or two words, but the time has not been thrown away entirely, for only a few days ago we found the Comptroller of the Treasury deciding a very important question upon the placing of a comma, and at the same time wrestling with the grammar used in the bill which he was construing.

It is true there is not a very great deal of difference in effect between the amendment which is now presented to the Chair for determining the point of order and those which preceded it, and to each of which a point of order has been sustained. It very much resembles the distinction made in the common law between an attorney undertaking the prosecution of a case for one-third of all he may recover and the undertaking of it for an amount equal to one-third of all he may recover. The first would be champertous and the latter legal. There is just about that much difference between this amendment and the ones previously offered. The language of the several others, to each of which the Chair has sustained a point of order, is like this one in effect, but is different in wording. The Chair is of opinion that the change of wording makes it different from the others, and therefore overrules the point of order.

Now, Mr. Chairman, I submit in that ruling there is not a single line or any question of whether or not there was a slip many years ago at the Charlestown Navy Yard. I submit, further, how ridiculous it would appear if this Congress had made an appropriation authorizing the construction of a house or a building, to tell a navy yard that they had no right to build a scaffold around that building in order to carry out the purpose of the law and the appropriation. How ridiculous it would appear for this Congress to appropriate $1,850,000 for a transport, and giving us the right to build it in Government navy yards if the Secretary of the Navy deemed wise and proper, and for us to say that we could go and erect that ship, but we could not build a great scaffold around it in order that we could carry into effect the law as passed on the 3d of last March. I suggest, Mr. Chairman, that this case is identical with the Boston Navy Yard case decided yesterday by the Chair.

Mr. MOORE. Will my colleague yield?

Mr. VARE. I will yield.

Mr. MOORE. In connection with what my colleague, the gentleman from Pennsylvania, has just said, I desire to call his attention to the letter of Mr. Daniels, the Secretary of the Navy, to Mr. PADGETT, the chairman of the Committee on Naval Affairs, dated March 10, 1914, wherein he informed the chairman of the committee of the award he had made for the construction of these vessels, the supply ship and the transport, one of which he had assigned to the Boston yard and the other of which he had assigned to the Philadelphia yard. In concluding that letter the Secretary said:

The estimates received from these two navy yards are based on the assumption that they are to be equipped with building slips and suitable handling facilities. The building slips are absolutely essential for the construction of the vessels, and the handling facilities are equally essential if the ships are to be built rapidly and economically.

Hence it would appear that the gentleman's argument is entirely borne out by the Secretary of the Navy, who has already made the award to the Philadelphia yard, and who indicates in his message to Congress that the building ways, or this building slip, if you prefer to so designate it, is absolutely essential to the construction of the ship, and hence is in the line of continuation.

Mr. VARE. The gentleman is correct, Mr. Chairman. And I believe the Chair will agree with the Secretary of the Navy that, having first the authority of this Congress, under the act of March 4, 1913, authorizing the President to construct this ship, the Secretary of the Navy under that same law is not given discretionary power. The act says that he "shall" construct and build these ships. As my colleague has called to my attention, the Secretary of the Navy says in his letter that in order to carry out this mandate of this Congress under that law—

The department deems the provision of building slips at Boston and Philadelphia absolutely necessary at the present time for the specific

purpose of constructing the vessels awarded as stated and authorized by the Congress.

I submit to the Chair that these cases are identical. [Applause.]

Mr. MONTAGUE. Mr. Chairman, it seems very important that the rulings of the Chair upon the question under consideration shall have such consistency that they may not come hereafter to plague us.

I read the rule. It provides:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for such public works and objects as are already in progress.

I submit to the Chair that the "public works" contemplated by that rule must be the public works provided in the bill under consideration, and this work must be an existing building slip or building slips. That is the character of public work which must be in existence, and the continuation of which will constitute the "progress" stated in the rule.

In order to avoid—in order, if the Chair please, to evade—the manifest purpose of that rule, amendment after amendment was offered on yesterday, I now recall three, with great ingenuity, and the amendment finally presented declared in terms for the improvement of an existing structure at the Boston shipyard. Here there is no such contention. On the contrary, there is a concession that there is no existing building slip at the Philadelphia yard. Therefore, there can be no continuing appropriation for such public work, for you can not continue a nonexisting thing. You can not continue to improve a nonexisting structure. You can not attach substance to a vacuum.

Now, it is conceded here by the opponents of the point of order that there is no building slip at the Philadelphia yard.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Pennsylvania?

Mr. MONTAGUE. With pleasure.

Mr. MOORE. That statement has often been made, but the fact is that small boats have been built at the Philadelphia yard, and perhaps as good a case could be made out for that yard in the matter of construction as for Boston, except that once upon a time they did have a regular building slip at the Boston yard.

Mr. MONTAGUE. Is the gentleman through?

Mr. MOORE. Yes.

Mr. MONTAGUE. Now, I suggest to the Chair that you can never properly decide this point of order by traveling outside the record. You can not determine a question of order by citing the determination of other questions raised upon facts not contained in a pending bill or by statements, however ex cathedra, if outside of the record. We must take the language and the fact as recited in the bill itself.

The CHAIRMAN. The Chair would be glad if others would do as the gentleman is doing—stick to the point of order.

Mr. MONTAGUE. I appreciate the compliment of the Chair, but I am arguing in a new field; I am not a parliamentary lawyer. I am endeavoring to apply the ordinary rules of construction to the questions propounded to the Chair. Let me call your attention to this language of the rule:

Unless in continuation of appropriations for such public works and objects as are already in progress.

That is, works authorized; and "such public works" must inevitably mean works of the same character as are stated in the bill. What are "such public works"? Are they works authorized by laws passed by Congress relating to other subjects? No. They must be the identical public works mentioned in the bill under consideration. Otherwise, the rule is a meaningless piece of written stuff.

Now, what is the work mentioned in the bill? What is "such public works"? It is a public work of the precise character stated in the bill; it is a building slip; not a battleship. Surely an authority to employ men in a navy yard, though essential to the final culmination of a battleship, would not cover and include an appropriation to pay for the seamen and the soldiers and sailors employed in the conduct or the operation of a warship, and vice versa.

Mr. VARE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Pennsylvania?

Mr. MONTAGUE. With pleasure.

Mr. VARE. Is my colleague familiar with the fact that in the amendment already ruled upon by the Chair yesterday there was a provision containing this exact language:

And there is hereby appropriated for the improvement of building slips and equipment.

Mr. MONTAGUE. Yes. I do not know if the gentleman followed me. I hope the Chair understood me as saying that that was a very technical amendment, gotten up to meet several adverse rulings of the Chair upon the construction of this rule of the House.

I desire to repeat that in that case the amendment was for the improvement of an existing structure. Here the amendment is not for the improvement of an existing structure. Here it is conceded that there is no existing structure. Yesterday the amendment was offered to incorporate in the bill itself the precise language that there was an existing structure, and for the improvement thereof the appropriation was provided.

Now, I submit to the Chair that here it is conceded there is no existing structure. Therefore there can be no "continuation," there can be no "progress," because there is no point, object, or thing from which to start. Therefore it seems to me that the point of order must be sustained.

Mr. LOGUE. Mr. Chairman, endeavoring to follow strictly the suggestion of the Chairman to keep within the record, in reply to the gentleman from Virginia [Mr. MONTAGUE] the reference to "public works" certainly does not mean public works only referred to in the bill under consideration. The spirit of the rule is that there may be invoked a restriction on bringing into a departmental appropriation bill legislation of a new character. I do not think I am far wrong when I conclude that the purpose and spirit of this rule is to prevent putting into departmental or general appropriation bills any subject in the nature of legislation that would seek to change existing conditions or existing law. I believe, Mr. Chairman, that the spirit of the rule and a rule of this character is to prevent a vice and not to stop a meritorious consideration and claim. I believe that a technical objection is to be raised at all times to prevent injustice, but never for the purpose of preventing justice being accorded.

I use that as an illustration, that the spirit of this rule is to be invoked to prevent the department from being hampered, or a general law to be changed in an appropriation bill, but is never to be invoked to aid or assist purely on a technicality that which a department has asked for, that which a department has recommended, that which a committee has recommended, that which is found to be necessary for the advance and prosecution of public work.

What is "public work"? Public work is that which is for the general public advantage or good. The navy yard at Philadelphia, you will take notice, legislative notice, if not judicial notice, is an existing thing. I am tempted, sir, but will not do so, to depart from the Chair's admonition, and to refer to an authoritative book relative to Philadelphia and what Philadelphia's navy yard was in the past. But, Mr. Chairman, we are confronted now, and you have it before you now as a part of the record, with a letter from the Secretary of the Navy stating an award to carry out the act of March 4, 1913. You can not now question that decision of the Secretary of the Navy. Every presumption is that he fully complied with the act of 1913 and decided in the interest of the Government; and to prevent that which was complained of in the act, he decided to award that contract to a particular navy yard. He has done so. That is the determination. That is the end of it. You can not go into it collaterally. Is it not public work for the Secretary of the Navy to award a contract for the construction of a large transport? Is not the construction of a large transport public work? And in aid of that public work, in aid of the extension of that undertaking, for the full benefit of the spirit of the act of 1913 to come into play, that Government yards may be brought in as active factors in this, we now ask for this appropriation; and it is asked here, predicated and dependent upon the letter and the facts that you have before you. I do not see how this rule can be invoked. We are not undertaking new work. Let me illustrate further. Suppose coal oil, the old method of illumination, has disappeared, and gas comes in. Is the question of illumination new? No. The method may be new, but the fact of illumination for a yard is the subject matter. Along comes electricity. If an appropriation is asked for electric lighting, can you decide that that is new and may not be provided for? No; the subject matter is that of illuminating, and the means is merely an incident to carrying it out.

This is not new work. Taking it under the statement made, taking it under the conditions, taking it under the recommendation of the Secretary of the Navy himself, that it is in aid and assistance of, and necessary to carry on, the great public work of building a transport, who can say that there is no public work under way at the present time; that there is no public work appropriated for? When the gentleman from Virginia [Mr. MONTAGUE] says it is not in progress, does he mean to say that we have got to wait until the thing is partially constructed and then come in and appeal for it? Rather, in the first instance, as I said yesterday, that which is authorized, that

which has been contracted to be done, is in the eye of the law and all reasonable deduction considered as being done because we bring to play the reasonable deduction that it is based merely upon the authority, merely upon the appropriation.

So, Mr. Chairman, I say that in view of the illuminating character of the debate that we have had as to the purpose, aim, and object of this particular legislation, bearing in mind that which you, Mr. Chairman, referred to yesterday, where the authority was given to the Secretary, where it was almost, by the use of the word "shall," made mandatory upon him to act, and where he has acted, those of us who are familiar with the principle of the law know well that wherever a thing is ordered to be done it is considered as being done, to the extent of associating with it every authority necessary to carry out the act. The man directed under a testamentary instrument to sell has coupled with that direction by implication the necessary authority to do what he has been directed to do—to convey. The Secretary of the Navy has the necessary authority. He has exercised his discretion; he has reached a conclusion. He reports to a committee; he reports to this Congress. It is supplemented by a letter sent to this committee, which is official and made a part of this record, showing that he has acted, and this recommendation upon the part of the committee specifies the direct purpose, aim, and object of it. Clearly that comes in the line of continuing a great public work.

I have nothing to do with private yards. I am concerned with a great public proposition. I am not considering bids one way or the other, and when I made use of that term I meant distinctly to have it understood that I am looking upon this outside of Philadelphia, and outside of any particular locality. As a Representative from that city, I am naturally interested; but I am endeavoring to argue this as a broad proposition of public undertaking, of a Government engaged in public work. A short while ago the question was asked by the gentleman from Virginia, if an act of Congress had been passed directing that the armor for a ship should be made in Government yards, would the Government have the right subsequently to make an appropriation for the making of the armor in Government yards? Why, the question answers itself. It was authorized, it was directed to be done, and the making of the appropriation is merely a sequence, a natural following of the carrying out of those things authorized, those things ordered, those things that are public works.

Mr. PADGETT. Mr. Chairman, this matter was discussed yesterday at very great length, for a number of hours. There is nothing new in it. We devoted nearly all of yesterday to the consideration of one little paragraph. This matter is in the discretion of the Chair, and I appeal to the Chair to rule upon this question and let us proceed with this bill.

The CHAIRMAN. The Chair is ready to rule.

Mr. PADGETT. Then I ask the Chair to rule.

Mr. MOORE. Did the Chair say he was ready to rule?

The CHAIRMAN. Yes.

Mr. PADGETT. I ask the Chair to rule.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. LOGUE] who has just taken his seat has suggested that this ruling ought not to be a technical one. Practically every point of order is determined by a rule more or less technical, and in most instances very technical, as this is. It is so much of a technical question that the Chair will have to be controlled almost entirely by technicalities.

The gentleman from Pennsylvania [Mr. VARE] has suggested that it would be impossible to build a house without a scaffold. The Chair does not believe that a case upon all fours with this. When the house is completed, the scaffold is taken down, and afterwards it is neither a part of the house nor a part of the realty. But where a ship is built in a "slip" and the ship has left the "slip" and gone into the sea it does not take the "slip" with it, but the "slip" remains, and it remains as part of the realty, and the realty is the navy yard.

We have confronting us this situation: The building of this ship has been authorized. The Secretary of the Navy has been given the option to say whether it shall be built in a Government navy yard or elsewhere. We can see plausible reasons upon each side of this question. It has been urged with much plausibility that the Secretary of the Navy may direct this ship built in any Government navy yard. The Chair can hardly see it just that way, but is of the opinion that the Secretary of the Navy, in selecting a Government navy yard where this ship may be built, must select one where it is possible for it to be built. If he select one where it is now impossible to build it, then the Chair is of the opinion that it can not be built until an authorized appropriation has been made to put the navy yard in condition so that it may be built.

Yesterday we had the Boston case before us. There the Secretary of the Navy selected a Government yard in which the ship should be built. In making that selection he designated a Government navy yard having a "slip." It developed that that "slip" needed improvement, and therefore the Chair held the final amendment which was offered to be in order.

But here we have a case where the Secretary of the Navy has selected a navy yard in which to build a ship which not only has no "slip," but never has had one. As indicated, the Chair is of opinion that if it is insisted that this ship be built in this particular navy yard it can not be built until an authorized appropriation has been made with which to build the necessary "slip" on which the ship can be built. Therefore the Chair sustains the point of order.

Mr. PADGETT. Mr. Chairman, I want to submit a request that relates to this paragraph and other matters, that the Clerk may have authority to change the totals.

The CHAIRMAN. The Clerk informs the Chair that that is always done.

Mr. MANN. It is always done by unanimous consent.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. VARE. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 22, line 15, after the figures "$15,000," insert: "That to carry out the purpose of so much of the act of March 4, 1913, as authorizes the President to have constructed one transport, to cost, exclusive of armor and armament, not to exceed $1,850,000, there is hereby appropriated for improvement of building slips and equipment $200,000."

Mr. JONES and Mr. SAUNDERS made points of order against the amendment.

Mr. VARE. Mr. Chairman, in ruling upon the question a few moments ago the Chair seems to have been guided by the statement that there were shipbuilding facilities at the Boston Navy Yard, but there were no shipbuilding facilities at the Philadelphia yard.

The CHAIRMAN. The Chair understood that to be admitted by all.

Mr. LOGUE. Mr. Chairman, I think it is only fair to state that while I was prepared to call the attention of the Chair to the shipbuilding at the Philadelphia Navy Yard, I adhered to the admonition of the Chair not to step outside of the record. Otherwise I would have illuminated the House and the Chair by a statement of facts as to what has been done in the Philadelphia Navy Yard as to constructive work. I regret that I kept strictly to the rule.

Mr. PADGETT. Mr. Chairman, I want the Chair and the House to understand the situation exactly. The language used would bring this under the same state of facts that we had yesterday. This morning I went personally and saw Admiral Stanford, Chief of the Bureau of Yards and Docks, and asked him the question if they had any building slip or building ways at the navy yard at Philadelphia. He said none whatever upon which there could be a shadow or pretense to base an improvement on; so I must deal frankly with the House and give the House the information as it is. I was very anxious to have the building slip come in, but I want it to go in under a clear statement to the House of the facts.

Mr. VARE. Will the gentleman yield?

Mr. PADGETT. Certainly.

Mr. VARE. Does not the chairman regard as equally important from a shipbuilding standpoint whether or not there has been recent construction such as would doubtless leave an old slip?

Mr. PADGETT. The admiral told me that they had no slips over there at all.

Mr. VARE. Did the gentleman inquire whether there had been any recent construction?

Mr. PADGETT. He said they had built some scows.

Mr. VARE. Did not he say that they had built some vessels?

Mr. PADGETT. He used the word "scows." I asked him if there was anything there in the way of building slips or building ways upon which we could predicate an appropriation for improvement or extension, and he said there was not, and he regretted it as much as I did.

The CHAIRMAN. The amendment offered by the gentleman from Pennsylvania is, in effect, almost identical with the one offered by the gentleman from Massachusetts yesterday, but the conditions to which the amendment applies are entirely different. In the first case there was something which could be improved or added to or subtracted from, but in this instance there is no such thing. Therefore the Chair is compelled to sustain the point of order.

Mr. LOGUE. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Page 22, line 15, after the figures "$15,000," insert: "To carry out the purpose of so much of the act of March 4, 1913, as authorizes the President to have constructed a transport to cost, exclusive of armor and armament, not to exceed $1,850,000, there is hereby appropriated for building slip and equipment $200,000."

Mr. JONES. Mr. Chairman, I make the point of order that that is precisely the same thing.

The CHAIRMAN. The Chair is of the opinion that the appropriation is unauthorized by existing law, and sustains the point of order.

Mr. LOGUE. Mr. Chairman, I do not want to seem captious, but I am anxious to get this in if it can be brought within the rule, and I offer another amendment.

The Clerk read as follows:

Page 22, line 15, after the figures "$15,000," strike out "building slips and equipment" and insert in lieu thereof the following: "To carry out the purpose of so much of the act of March 4, 1913, as authorized by the President to be constructed at the Philadelphia Navy Yard, there is hereby appropriated $200,000 for the necessary equipment."

Mr. JONES. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The Chair is of the opinion that it is subject to a point of order.

Mr. MOORE. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Page 22, line 15, after the figures "$15,000," strike out "building slips and equipment" and insert: "Equipment to build the transport *Maume*."

Mr. JONES. I make a point of order.

Mr. MOORE. Will the gentleman reserve it?

Mr. JONES. It does not seem to me that we ought to take up the time.

The CHAIRMAN. The Chair will hear the gentleman from Pennsylvania.

Mr. MOORE. Mr. Chairman, I have not yet spoken upon this point.

The CHAIRMAN. The Chair will hear the gentleman from Pennsylvania upon the point of order.

Mr. MOORE. Mr. Chairman, it is evident that this whole question now hinges upon whether or not there is a building slip at the Philadelphia Navy Yard. It has been contended that vessels have been constructed at that yard, and that contention is undoubtedly true as to certain kinds of craft, but for the purpose of bringing the whole question specifically before the Chairman I have offered this amendment. What is being sought here is an authorization for the expenditure of money for the construction of a vessel that has been assigned to the Philadelphia Navy Yard by the Secretary of the Navy, under direction of Congress. It involves the question whether or not Congress itself acted in good faith when on March 4, 1913, it provided that there should be constructed a supply ship and a transport, the place of construction to be at the discretion of the Secretary of the Navy. Congress undoubtedly conferred that discretionary power upon the Secretary of the Navy in the naval appropriation bill of March 4, 1913, and in the exercise of that discretion the Secretary of the Navy designated Boston as the place at which the supply ship should be constructed and Philadelphia as the place at which the transport should be constructed. He was wholly within his rights—within the powers and rights dictated by Congress itself. Therefore, if this transport is not to be constructed at the Philadelphia Navy Yard, what is to become of the discretionary power conferred upon the Secretary of the Navy and of the act of Congress itself?

I have no special reason for advocating the construction of this ship in the Philadelphia Navy Yard, for within my district is one of the large independent shipbuilding concerns of the world, and I am not now contending for or against Government ownership or for the right to build battleships in private yards, or to control their construction in Government yards. The question is apart from all that. What did that act of March 4, 1913, mean when it gave explicit directions to the Secretary of the Navy to build ships in certain ways and at certain places? Was that act of Congress meaningless, and is the act of the Secretary of the Navy, done apparently in good faith under the instruction of Congress, also meaningless? It would seem so, if this point of order is sustained, because, then, the Congress is in the position of giving instructions to the Secretary of the Navy which it did not intend should be carried out, and the Secretary of the Navy is put in the position of carrying out instructions under warrant of the law which can not be made effective. If this point of order is sustained, then the Navy Department is in the awkward and ridiculous position of saying to the country that a transport for the service of the Navy will be constructed in the Philadelphia yard, but that it is to be constructed without tools, without building ways, and without scaffolding, all of which are essential to its construction, and this in spite of the fact that Congress on March 4, 1913, said specifically that the Secretary of the Navy should have full power in this particular.

Mr. LOGUE. Mr. Chairman, will the gentleman yield?

Mr. MOORE. Yes.

Mr. LOGUE. Has the gentleman in mind the thought that if the Secretary of the Navy awarded this contract to a yard without any equipment the question of appropriation would then come up before Congress, and Congress, by vote, could then determine whether or not his judgment was good?

Mr. MOORE. Mr. Chairman, I have that thought in mind, and also that the Secretary of the Navy had it in mind, in a letter addressed to the chairman of the Committee on Naval Affairs, Mr. PADGETT, on February 14, 1914. In setting down the facilities at the respective yards for the construction of these two ships the Secretary said as to the Philadelphia yard, in the matter of "equipment," which is to be stricken out if this point of order is sustained—and equipment means the foundation under your building or the scaffolding and ways under the ship which would thus be left in the air—the Secretary said with respect to facilities, with respect to equipment, which must be added to in order to take on the construction of this transport:

Except for foundry facilities and certain machine tools, the yard [the Philadelphia yard] is already equipped with shops and tools for carrying on and completing the work.

Here is the authority of the Secretary of the Navy, who is in charge of the yard. He continues:

And expenditures for this purpose will be comparatively small.

The Secretary of the Navy tells the chairman of the Committee on Naval Affairs that this yard is equipped with facilities and tools for carrying on and completing the work. What is asked here is that $200,000 be set aside to further equip that yard for the construction of a vessel which Congress authorized the Secretary to build. According to these facts there is a continuation of equipment work here, and "equipment" is provided for in the sentence which it is proposed to strike out under the point of order.

Mr. JONES. Mr. Chairman, will the gentleman yield?

Mr. MOORE. Yes.

Mr. JONES. I have in my hand the report of the Committee on Naval Affairs, and under the head of "Public works, yards and docks," the report says:

The principal appropriations in the various yards are as follows: To provide for a building slip—

It does not say a word about equipment there—

in the Boston and Philadelphia yards, to construct the vessels awarded to these yards—

And so forth.

Mr. MOORE. Is that the report of the Committee on Naval Affairs?

Mr. JONES. Yes.

Mr. MOORE. I respectfully submit to the gentleman——

Mr. JONES. Just one moment. The Committee on Naval Affairs does not ask for an appropriation for any other purpose than a building slip, and, of course, the gentleman knows that if this be held in order, the money would be used for that purpose and for no other purpose. It is simply a subterfuge.

Mr. MOORE. Mr. Chairman, I wish to answer the gentleman specifically. The Committee on Naval Affairs does ask for something besides a building slip. The report is not accurate in that respect. The bill we are now considering provides for "building slips and equipment," and it is the extension of the equipment already provided for that we are asking.

Mr. JONES. I am reading from the report.

Mr. MOORE. Further than that, since the gentleman has a copy of the report of the committee, I cite against what he has read this statement of the Secretary of the Navy himself that there is equipment there, and that more equipment is needed in order that this ship shall be constructed in the manner directed by law.

Mr. JONES. Equipment is the building slip.

Mr. MOORE. Mr. Chairman, I submit to the Chair that the word "equipment" cuts a very large figure in this whole affair. There is an "equipment" at this yard—an equipment for building ships. There are tools at this yard; there are buildings at this yard. There are facilities at this yard for building this transport, and this the Secretary of the Navy took into consideration before he made the authorization for constructing that ship at this yard. All that he reported to the Committee on Naval Affairs, and the Committee on Naval Affairs, respond-

ing to his request, to his statement of facts, asked here for an appropriation for additional equipment, and the bill so states.

The CHAIRMAN. In line 15, page 22, the following words have gone out of the bill entirely on the point of order:

Building slip and equipment, $200,000.

Those words and figures are no longer in the bill. The gentleman from Pennsylvania [Mr. MOORE] offers an amendment to insert in line 15, after the figures $15,000, the words:

Equipment to build transport *Maumee*.

The Chair can not see in what better fix the gentleman would be if his amendment were held to be in order because of the fact it would leave him entirely without money to do the very thing he seeks to accomplish.

Mr. MOORE. I did not strike out the $200,000.

The CHAIRMAN. It is already out.

Mr. MOORE. Well, I ask unanimous consent to add "$200,000."

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania? [After a pause.] The Chair hears none.

The Chair was proceeding, when the gentleman asked unanimous consent to insert the amount of $200,000 in his amendment, simply to repeat in substance his former ruling. As the Chair said before, there is a plausible argument which can be made on each side of this question. The gentleman has just made a very plausible argument on his side of the question. If it is accepted, the situation will be this, that the Secretary of the Navy, in selecting a navy yard for this work, has selected one out of the many navy yards where, according to present authorized conditions, the ship can not be built. The gentleman from Tennessee [Mr. PADGETT] has made a statement here that he has authority from the Navy Department to say, which the Chair will accept, that there is no slip there upon which an improvement can be made, and the Chair can not but repeat that he is of the opinion that the appropriation of money to build a slip must first be authorized before it can be appropriated for in the naval appropriation bill. Therefore the Chair sustains the point of order to the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

Mr. VARE. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 22, line 15, after the figures "$15,000," insert: "Additional facilities for the specific purpose of constructing the transport authorized to be constructed by the naval appropriation act approved March 4, 1913, the construction of which, in accordance with said act, has been awarded to the Philadelphia Navy Yard by the Secretary of the Navy, $200,000."

Mr. JONES. Mr. Chairman, I make the point of order against the amendment.

The CHAIRMAN. The point of order is made to the amendment, and the Chair might ask the gentleman just here whether or not the expenditure of the money mentioned in his amendment comes out of the amount appropriated for the ship or is to come out of Treasury money not yet appropriated?

Mr. VARE. There is the sum of $1,850,000 appropriated for this ship. Mr. Chairman, I desire to discuss the amendment to the extent of saying that this amendment not only provides for an additional equipment, but it leads to the reducing of the cost of the ship and therefore to a reduction in the amount of the appropriation. My understanding is anything that tends to reduce the expense of the Government is in order on such a proposition. Mr. Chairman, the chairman of the Committee on Naval Affairs [Mr. PADGETT] has told the committee this morning what some of the naval officials told him at the Navy Department. I want to say to this committee that I have conferred with Capt. Grant, who has been the commander at the Philadelphia Navy Yard for several years, and he has assured me that with the authority he can increase the existing facilities there and have that yard ready to build this transport *Maumee* within 90 days. That probably is a little bit at variance with the information the chairman received from the Navy Department in Washington. My information was received from Capt. Grant, who has been located at that yard for many years, that with the authority he could increase the facilities now existing at that yard within a period of three months to build this ship which is under consideration. My contention is that if this amendment is held in order, instead of the Public Treasury expending $1,850,000 for this transport it will be able, including the cost of these additional facilities, admitting that these additional facilities will require an expenditure of $200,000, to reduce the expenses to the Government to the extent of $90,000; or, in other words, if this amendment fails, instead of our Government building this ship at a Government shipyard, it goes to a shipyard known as one of those in the combination, and I use the word "combination" advisedly. The Secretary of the Navy does not specifically say that he has evidence of collusion, but the fact of his awarding this contract and saving $290,000 shows that he is trying to operate in the interest of economy and in the interest of this Government.

Mr. JONES. Will the gentleman permit me to ask him a question?

Mr. VARE. Not now; I will yield later on. I call the attention of the Chair to this bit of saving over the Government yard at Mare Island of $146,000, to the saving over the New York yard of $489,000, and I will explain that to this committee by saying that I have information that the New York yard was so busy that they could not handle this additional work. There is a saving over the Norfolk yard of $306,000, and over the yard at Portsmouth of $415,000, and over the yard on Puget Sound of $212,000, and over the Newport News Shipbuilding Co., which I repeat again is a part of this great combination concerning which the Democratic Party is about to adopt new laws and new regulations, a saving of $289,930. And admitting that this additional equipment as stated by Capt. Grant, one of the most efficient captains in our Navy, admitting that we will require out of this $1,850,000 an expenditure of the additional $200,000, I submit to the Chair, however, that this amendment means a saving to this Government of $89,930.

This amendment having saved that money, I submit it certainly must be in order.

Now, I yield to the gentleman from Virginia [Mr. JONES].

Mr. JONES. I wanted to ask the gentleman this: I understood the gentleman to say in reply to the question of the Chair—although I may have misunderstood him—that this $200,000 was to come out of the appropriation for the ship. Did he mean to say that?

Mr. VARE. The Chair asked that question. There is sufficient saving in this item, so that we could take the $200,000 from the original $1,850,000 and still have a saving of $90,000.

Mr. JONES. The act authorizing this transport limits its cost to $1,850,000. It must be built within that sum. If it can be built within that sum, then only the amount necessary to build it can be properly expended. In my judgment this transport, if built at Philadelphia, will not be built within the limit of cost.

Mr. VARE. And my amendment, if agreed to, will save the Government $89,930, conceding that $200,000 would be spent for additional facilities and equipment.

The CHAIRMAN. The Chair was about to say that he is in full sympathy with the purpose of these several amendments that this ship should be built at a Government navy yard; but the point must not be lost sight of that the money appropriated to build the ship and the money appropriated to build a navy yard is for different purposes. They are two separate and distinct matters. The amendment just offered by the gentleman from Pennsylvania is quite different from the several others which have just preceded it, in that the amendment offered by the gentleman from Pennsylvania provides $200,000 for the "specific" purpose of constructing the transport authorized. The Chair is inclined to the opinion that that would be an additional $200,000 added to the heretofore authorized amount for the construction of the ship and is, therefore, not in order.

Mr. JONES. There is not any question about that.

The CHAIRMAN. And for that reason the Chair put the question to the gentleman from Pennsylvania [Mr. VARE] when his amendment was first offered as to whether or not he intended it to come out of the ship appropriation or to be added to the ship appropriation.

Mr. MOORE. Mr. Chairman, I now present an amendment which I think will cover the point made by the Chair.

Mr. PADGETT. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Tennessee rise?

Mr. PADGETT. I rise to offer a motion to close debate upon the paragraph and all amendments, so that we can make progress.

Mr. MOORE. The gentleman is not going to close our opportunity to settle this matter if we can do so?

The CHAIRMAN. The gentleman can not close debate on a point of order. The Chair is ready to rule upon these amendments as fast as they come, because we have heard every phase of them discussed. The Chair does not want to be discourteous to the gentleman if he insists upon debate upon the point of order, although the mind of the Chair is already made up. The Clerk will report the amendment.

The Clerk read as follows:

Page 22, line 16, at the end of the line add the following: "That of the $1,850,000 appropriated by the act of March 4, 1913, for one transport, exclusive of armor and armament, the construction of which has been awarded to the Philadelphia Navy Yard by the Secretary of

the Navy, the sum of $200,000, or so much thereof as may be necessary, shall be applied to the construction of equipment necessary for the building of such transport."

Mr. JONES. Mr. Chairman, I make a point of order against this amendment. It is clearly a change of existing law. It provides that of the money that has been appropriated for building the ship $200,000 shall be diverted to equip the navy yard at Philadelphia, which is, of course, a change of existing law; and it, moreover, assumes, Mr. Chairman, that $1,850,000 has been appropriated to build the transport, which is a false assumption, to start with.

The CHAIRMAN. The Chair did not catch the last words of the gentleman.

Mr. JONES. I say that it is based upon a false assumption to start with.

The CHAIRMAN. The amendment is?

Mr. JONES. Yes. It is based on the assumption that $1,850,000 has been appropriated to build a ship. That sum is the limit of cost fixed by the act. The cost can not exceed that amount. No such amount has been appropriated, and, therefore, it is based on a false assumption; but, Mr. Chairman, even if it were not, it would be a change of existing law, in that it seeks to take from a fund appropriated by Congress to build a ship $200,000 with which to equip one of our many navy yards, and therefore, of course, changes existing law.

Mr. MOORE. Mr. Chairman, I am perfectly willing to amend that, and ask unanimous consent to do so, if the Chair has any doubt about it, so that it shall read "of the money appropriated, $200,000 shall be."

The CHAIRMAN. If there is no objection, the gentleman will be permitted to change the amendment.

Mr. MOORE. That "of the sum of $1,850,000 appropriated," and so forth, and toward the end there, "for additional equipment" instead of "construction of equipment."

The CHAIRMAN. The Chair has several times ruled, in effect, that money can not in this way be appropriated out of the Treasury. The question again arises, Can it be appropriated out of the sum which has already been appropriated for the ship? It seems to the Chair that if it can not be appropriated for a navy-yard purpose out of the Treasury it can not be appropriated for that purpose out of the amount that has been appropriated for the ship, unless it is shown it is a part of the ship.

Mr. MOORE. Would it influence the Chair at all if I called attention to the fact that the estimate of the department of the cost of construction is $1,405,069.99, and that is $400,000, at least, below the amount appropriated for the construction of the transport, exclusive of armor and armament? Grant that the appropriation provides that the construction of the ship is not to exceed a certain amount. That leaves the opportunity to save $400,000, which, apparently, would be saved if this estimate of the Philadelphia yard were accepted, and it leaves such a saving as might, I think, within the purview of Congress, at least, enable us to delegate or transfer a portion of it to the construction of or the provision for the necessary equipment to carry out the purpose of Congress.

The CHAIRMAN. The maximum sum of $1,850,000 has been appropriated for the building of this ship. The Secretary of the Navy may use all of that amount or he may use less of it. Whatever less of it he may use will remain in the Treasury, and this would be but an indirect way of appropriating from the Treasury for a purpose which the Chair has held has not been authorized.

Mr. MOORE. The Chair will bear with me for a moment. Would not this Congress have the right now, by a new provision, to transfer that money? Have we not the right by law now to say what shall be done with money saved? Here is a new fund, which nobody can transfer except Congress.

The CHAIRMAN. It could do so only for some purpose now authorized by law.

Mr. MOORE. A purpose is specifically stated in the amendment to meet the objection of the Chair. We have the power to make that transfer, and the amendment proposes specifically to make it. It is not within the power of the Secretary of the Navy to make that transfer, but it is within our power to direct that the Secretary of the Navy shall make that transfer for a specific purpose. This seems to be the only time and the only place where it can be done.

Mr. JONES. Mr. Chairman, will the gentleman permit me?

Mr. MOORE. Yes.

Mr. JONES. The gentleman speaks of this as $200,000 which has been saved.

Mr. MOORE. I beg the gentleman's pardon. It would be of a sum saved.

Mr. JONES. That any sum has been or will be saved in the building of this transport is a false assumption. The Philadelphia yard has merely estimated that it can build this ship for a certain sum. It has given no guaranty that it will do so. It will take every dollar, in my opinion, of the $1,850,000, and more besides, to build this ship at Philadelphia. The gentleman knows that the experts of the Navy have said that it will take more than the estimated amount, so that there is no question of saving. The constructor at the Philadelphia Navy Yard has simply said, "I believe I can build the ship for so much money." There has been no saving effected.

Mr. MOORE. Mr. Chairman, I have confidence in the Secretary of the Navy, and I have confidence in his advisers. It makes no difference to me whether he is of the same political party to which I am attached or not. So long as he is the Secretary of the Navy and communicates officially to this body, I take the communication he sends here in good faith, and take it to be correct and true. I know of no other way for Congress to obtain this kind of information than through these heads of departments, who are charged to give us information. Now, first, under the law the Secretary has the right to build this ship and to designate Philadelphia as the place of construction; second, we have a partial equipment at the Philadelphia Navy Yard for the construction of the ship; and, third, the Government will save money from the sum appropriated for the construction of the ship. And that brings us up again to the question as to whether or not we have the right to say what shall be done with that money so saved; that is, the difference between the amount appropriated and the actual cost. Congress has the right to say, and Congress should say, how that money is to be expended.

Mr. JONES. The gentleman speaks of "the difference between the amount appropriated and the actual cost." That is not——

Mr. MOORE. I do not reflect upon the figures of the Secretary of the Navy; apparently the gentleman does.

The CHAIRMAN. The point of order is sustained.

Mr. LOGUE. Mr. Chairman, I offer an amendment. I will not discuss it.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. LOGUE] offers an amendment which the Clerk will report.

The Clerk read as follows:

Insert, after the figures "$15,000," line 15, page 22, the following: "To carry out the purpose of so much of the act of March 4, 1913, as authorizes the President to have constructed a transport to cost, exclusive of armor and armament, not to exceed $1,850,000, there is hereby appropriated for building slip and equipment $200,000; the said sum of $200,000 to be charged against the $1,850,000 heretofore appropriated for construction of said ship."

Mr. JONES. Mr. Chairman, I make a point of order on that.

The CHAIRMAN. The Chair is of the opinion that this, too, is subject to a point of order.

Mr. PADGETT. I will ask, Mr. Chairman, that the Clerk read.

Mr. LOGUE. I ask for an appeal, Mr. Chairman.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. LOGUE] asks an appeal from the decision of the Chair. The question is, Shall the decision of the Chair stand as the judgment of the committee?

The question was taken, and the Chair announced that the ayes seemed to have it.

The CHAIRMAN. It is therefore ruled that the decision of the Chair stands as the judgment of the committee. The Clerk will read.

The Clerk read as follows:

Navy yard, Washington, D. C.: Fireproof general storehouse (cost not to exceed $225,000), $100,000.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] reserves a point of order on the paragraph.

Mr. STAFFORD. As I understand, Mr. Chairman, this provision for a new fireproof general storehouse at the Washington yard was recommended a year ago, and the committee either rejected it or it failed to be incorporated in the bill of that year.

Mr. PADGETT. It has not been incorporated. It has been recommended for several terms, but we have had so many other things to carry out that we did not provide for it until this year.

Mr. STAFFORD. Is that the only reason why the committee did not recommend it in prior years upon those successive recommendations, because there were other matters carried in the bill?

Mr. PADGETT. That is my understanding of it.

Mr. STAFFORD. We all have some acquaintance with the conditions in the Washington yard, the members of the Committee on Naval Affairs probably having more information than the average Member has; but we all know that the work at those shops, misnamed "navy yard," is congested; that the shop there is in need of much more ground; that it is contemplated by the present Secretary of the Navy to manufacture all our large guns at that shop, or at some other shop, and that at the present time, I believe, some 20 of the 30 large guns are now manufactured there by the Government. I would like to suggest to the chairman, as has been suggested by other members of the committee during the hearings, whether it is not a pressing and present question from the business standpoint that the Government, viewing the congested condition there, should consider obtaining some other tract of land where they might be able to enlarge their activities, rather than to purchase adjoining grounds, tear down buildings, as has been proposed for the erection of this building, and whether it would not be more economical to the Government to pursue that policy than to proceed with the erection of this building, which, as I understand, will require the demolishment of some two existing buildings.

In that connection, I wish to say, inasmuch as the gentleman in charge of the bill probably has information with regard to other large industrial concerns that have outgrown their old quarters and then selected another site where the land was more easily obtainable—for instance, did the gentleman notice, when he inspected the Philadelphia Navy Yard, and when he was entertained handsomely, as is customary, by the hospitable citizens of Philadelphia, that the Baldwin Locomotive Works, which had a large plant crowded in between Broad and Seventeenth Street and Spring Garden Street and the Reading Railroad, found their old location unsuitable for the expanding of their business, had accordingly purchased a large tract down near Wilmington, Del., along the Pennsylvania Railroad, for supplemental shops? Now, if the Secretary of the Navy deems it advisable to extend the activities of this plant at the Washington Navy Yard, why not develop a branch at some new tract where they would have more space for future development?

Mr. PADGETT. If the proposition is to abandon the navy yard here in Washington——

Mr. STAFFORD. I was not contemplating the abandonment of the navy yard, but the acquisition of a new site, as in the case of these other establishments, where they will not be cramped in their activities and future development.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent for five minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. PADGETT. I will yield to the gentleman from Wisconsin. I will say, Mr. Chairman, that this building is needed in order to properly and economically handle and care for the business that is going on there now, even if there is no enlargement in the future. This building is needed to take care of the material that is there. There is a large loss each year by leaving out large quantities of metal, material, and implements, and other things exposed to the weather. I have a statement here which I will put in the RECORD as a part of my remarks, showing the cost to the Government each year by way of loss on account of damage from exposure.

Mr. STAFFORD. Does the gentleman intend to have that letter read now?

Mr. PADGETT. It is a little long. Does the gentleman want it read?

Mr. STAFFORD. I do not wish to have it read if the gentleman will give me the gist of it. I have read the hearings on this proposition, and I am concerned, because I believe, from a business standpoint, it may be well not to go ahead with tearing down buildings here, but to have the Government purchase some adjoining tract of land, where the property is not so valuable.

Mr. PADGETT. This letter says:

1. For lack of a suitable storehouse at the Washington Navy Yard there is stored in the open, and consequently subject to deterioration, approximately $6,850,000 worth of ordnance material.

2. It is most surprising, but nevertheless a fact, that while at other yards the material of the Navy is adequately provided with storage, that the output of the Naval Gun Factory, the guns, mounts, accessories, etc.—the material, above all else, which is most vital to the efficiency of the Navy, and which should be available for immediate use and receive the most careful attention—is, so far as necessary storage is concerned, practically neglected.

3. That this situation is not new, and that the necessity for providing some relief has been properly represented by the officials of the Washington Navy Yard, is sufficiently attested by the fact that in 1902 a fireproof general storehouse was recommended and has been included in the estimates for each succeeding year.

4. It is interesting to note the following extract from the report of 1902:

"A large, centrally located, properly designed, fireproof storehouse for the use of the general storekeeper is very necessary for the efficiency of this yard. The present building is not only badly located, but is inadequate for the work, and is little better than a fire trap. The amount of time and money saved by modern methods of storage and of handling materials and of transporting same to and from a centrally located storehouse and the shops would soon reimburse the Government for the cost of the building and appliances, not to speak of the additional security from fire."

At that time—July 1, 1902—there was $4,271,785 worth of ordnance material on the books of the general storekeeper, while now there are stores to the value of $12,219,500, and yet nothing has been done to provide any additional storage facilities.

5. In order to illustrate the immediate need of a building, photographs are appended showing ordnance material now held at this yard.

6. From an economic standpoint, and to save money, a building is urgently required. The actual loss to the Government can be best shown by the single item of preservation. The additional expense of properly protecting ordnance which is exposed to the weather—the cost of protectives, such as white lead, vaseline, slushing compound, etc.; the expense of stripping the mounts by removing all ball-bearing elevating and training gears and disassembling the top carriages, slides, and pivot stands—is a very considerable burden, which would not be necessary if proper storage facilities were provided. A conservative estimate of the extra cost of labor and material for the above work is $15 for each gun and $25 for each mount. During the past year there were 260 guns (over 3-inch) shipped out of this navy yard, entailing cost of preparation for shipment, etc. All of these guns were stored in the open. Upon this basis alone $10,000 per annum will be saved by the increase of storage facilities through the addition of a general storehouse. This cost does not include the expense of renewing parts lost or damaged through exposure to the weather or as a result of disassembling and reassembling.

7. The paramount military necessity of having mounts, guns, etc., intact and complete, with all spare parts and equipment ready for immediate shipment, without the necessity of overhauling and reassembling, is evident. This could be done if a storehouse were provided.

8. It can be safely asserted that the need of the storehouse included in the Secretary's estimates for 1914, submitted to Congress, is vital and imperative.

This is for the work that is going on at the present time, and not with a view to the enlarged operation.

Mr. STAFFORD. Of course the gentleman knows that if the Government should purchase an additional tract of land they would withdraw some of the work that is now being done there, and they would rearrange their plant in an economical, scientific manner, and that would give room for storage space in buildings that are now used for active operations.

Mr. PADGETT. If they were to discontinue some of their operations and activities, of course they might make room for other matters.

Mr. STAFFORD. Does not the gentleman agree that the plant is at the present time in a congested condition, and that they will be obliged to go outside or to purchase additional land for these additional activities, if those activities are going to be pursued?

Mr. PADGETT. It is congested to some extent.

Mr. STAFFORD. From a business standpoint, does not the gentleman think it would be advisable for the Government, and that if this was a business corporation it would be highly profitable, to purchase some land at a point where they have railroad facilities and where they have the men conveniently at hand to do the work?

Mr. PADGETT. I do not know whether it would be better to get some adjoining land and extend the shops there or whether it would be better to go to some other place. I have not sufficiently investigated and passed upon those questions. The territory is congested at the present time.

Mr. MANN. Mr. Chairman, may I ask the gentleman a question?

Mr. PADGETT. Certainly.

Mr. MANN. Is it intended to store guns in this storehouse?

Mr. PADGETT. Guns and material.

Mr. MANN. When they send these guns out for work, where do they store them? When these guns are put aboard ship, where do they store them then?

Mr. PADGETT. When they send them to the ship and place them upon the ship, they bring the old guns back into the yard.

Mr. MANN. Do they protect them on board ship by putting them under cover?

Mr. PADGETT. They keep them oiled all the while, and then they have canvas hoods that they put over them.

Mr. MANN. Is that possible here?

Mr. PADGETT. I should hardly think so.

Mr. MANN. Is not that what they do? Wherever they are, do they not keep these guns all covered with oil or vaseline, or something of the sort?

Mr. PADGETT. Yes; they try to do so.

Mr. MANN. Whether they are under cover or not under cover, whether they are exposed to the weather or not exposed to the weather?

Mr. PADGETT. I do not think they are kept under cover when they are put out. They paint them or oil them, but I do not think there is any cover put over them down at the yard.

Mr. MANN. I mean where they are kept under cover.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. I ask unanimous consent that the time of the gentleman from Tennessee be extended five minutes, because I wish to ask him some questions if he will be good enough to answer them.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that the time of the gentleman from Tennessee be extended five minutes. Is there objection?

There was no objection.

Mr. PADGETT. On board ship they have special men to care for the guns, and they look after them as a part of their regular duty.

Mr. MANN. I suppose they would have them here, whether they are under cover or not. But will the gentleman allow me to ask him one more question?

Mr. PADGETT. Certainly.

Mr. MANN. If this storehouse is located here in Washington, will similar storehouses be required in all the other navy yards?

Mr. PADGETT. I think not, sir.

Mr. MANN. Why not?

Mr. PADGETT. Simply because they do not have a necessity for it. They do not handle the guns. Then the other yards, many of them, have ample facilities for all their activities.

Mr. MANN. Is this storehouse to be located on a railroad track?

Mr. PADGETT. They have tracks inside of the yard. The main line of the railroad has a spur running into the yard. Inside of the yard they have their own engines to operate their own cars, and a spur track would run into this storehouse.

Mr. ROBERTS of Massachusetts. If the chairman of the committee will pardon me, I think the intended use of this building has not been clearly stated. It is not designed as a building to store guns. It is a general storehouse, wherein may be gathered all the general stores in use in this yard, which are now scattered around in various portions of the yard, in small and ill-equipped, improper buildings.

Mr. MANN. Would not the same thing be required in many other yards?

Mr. ROBERTS of Massachusetts. We have general storehouses in the other yards. In some instances we have modern general storehouses; in other cases we have old buildings that have been modernized; and in other cases we have general stores scattered around the yard in small buildings.

Mr. MANN. We have storehouses here now. Here is a proposition to put up a new fireproof storehouse. I do not know whether it would be fireproof or not, but that is all right.

Mr. ROBERTS of Massachusetts. This is not a building in which to keep guns.

Mr. MANN. I got the information from the chairman of the committee.

Mr. ROBERTS of Massachusetts. The chairman of the committee was in error. That is what I was trying to point out.

Mr. MANN. If there is to be a general storehouse located here, you will want one in Boston next year, will you not?

Mr. PADGETT. I will say to the gentleman that I got the information which I gave from a memorandum furnished by the navy-yard authorities themselves.

Mr. ROBERTS of Massachusetts. I have before me the statement of the Chief of the Bureau of Yards and Docks on this very point.

Mr. MANN. It is evident that the Navy Department do not know what they want this storehouse for.

Mr. STAFFORD. Does the gentleman know of any large industrial establishment that has a quarter of a million dollar building used exclusively for storage purposes, no matter how large the establishment may be?

Mr. ROBERTS of Massachusetts. I do not have in mind any particular case, but I should be surprised if many of the large manufacturing establishments did not have extensive buildings for the storage of valuable material.

Mr. STAFFORD. My experience is limited, but I will say that the Allis-Chalmers Machine Works, the Folk plant, and other large manufacturing plants that I am acquainted with in Milwaukee have no such storehouse.

Mr. PADGETT. I will call attention to another clause in this memorandum:

> For lack of suitable storehouse at the Washington Navy Yard there is stored in the open and consequently subject to deterioration approximately $6,850,000 worth of ordnance material.

Mr. ROBERTS of Massachusetts. That does not mean manufactured guns, but material.

Mr. PADGETT. It means a great deal more than guns.

Mr. ROBERTS of Massachusetts. There was not a word said in the hearings about guns. The storehouse is to be used for materials used in active manufacture.

Mr. PADGETT. Yes; the common type of carriages, training gears, and all material.

Mr. STAFFORD. As was suggested by the gentleman from Illinois, whenever any machinery is shipped it is always covered with vaseline and prepared to withstand the elements for weeks and weeks. I will ask the gentleman—and I think it is a pertinent inquiry—whether at the time this was proposed the department did not suggest a rather large proposition looking to a plan that the guns needed in the Navy should be manufactured elsewhere than at the Washington yard?

Mr. PADGETT. The department submitted a proposition to extend the manufacturing plant for guns, but we did not include it in the bill because of the congested conditions.

Mr. STAFFORD. Was it not also rejected because it was an item that had recently been submitted and the plans had not been fairly worked out by the department?

Mr. PADGETT. That is what was said, and then the board on shore stations, that inspects that material, reported against it.

The CHAIRMAN (Mr. SHERLEY). The time of the gentleman has again expired.

Mr. STAFFORD. I ask unanimous consent that the gentleman be given five minutes more.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that the time of the gentleman from Tennessee be extended five minutes. Is there objection?

There was no objection.

Mr. PADGETT. The report of the board of inspection of shore stations, reading from page 281, says:

> In the opinion of the board, the proposition to increase the output of the gun shops in the manner proposed by the Bureau of Ordnance is decidedly inadvisable. The gun shop is too narrow for efficient work, and its proposed extension into the adjoining hill would further decrease light and ventilation. Even now some of the boring bars have to be operated in subways or tunnels built under the street, and the extension proposed contemplates adding to the number of such unusual and unsatisfactory arrangements. One of the lathes of the present shop has its headstock not more than 2 feet from the wall, this most undesirable state of affairs having been necessitated by the insufficient width of the shop. The present buildings in which the construction of guns is carried on are so unsuitable for such work that the board considers that, unless the department deems it advisable to transfer the plant elsewhere, the most efficient way to provide the necessary additional facilities, having due regard to economy of work and to conditions liable to arise in the future, is to build an additional new gun shop, about 500 feet long and not less than 180 feet wide, in a different location. Such a shop would afford the necessary floor space, light, ventilation, and other facilities for expeditiously constructing the largest guns with a high degree of economy.

With that recommendation the committee did not feel authorized to include at the present time a large appropriation to extend or enlarge the gun shop.

Mr. MADDEN. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. MADDEN. They have a dance hall over there, have they not?

Mr. PADGETT. They have dances there.

Mr. MADDEN. Why would it not be a good thing to utilize that as a warehouse?

Mr. PADGETT. They have dances there a part of the year, I understand.

Mr. MADDEN. No part of this appropriation is to be used to improve the dance hall?

Mr. PADGETT. No, sir.

Mr. MADDEN. Or to make better ventilation? It seems to me that if they have a lot of space to use for a dance hall, and they need space for storage, that they ought to utilize the space now used for dancing and put it into storage.

Mr. PADGETT. The place where they have occasional dances is up in the loft of one of the buildings.

Mr. MADDEN. The gentleman says "occasional." They have them there every week.

Mr. PADGETT. I think not. There are some there occasionally. Some one near me says three a winter. I do not know whether that is correct or not. But that is up in the loft over the house where they keep the shells stored. That would not answer in any way the purposes for which this appropriation is sought.

Mr. MADDEN. Until they utilize all the space they have for real business use for the navy yard they ought not to get any more money for storage purposes. I apprehend there is more space used for dancing and things of that sort than there is any necessity for, and that that space could be put to some use-

ful purpose. If there is any part of the material around the navy yard that is being exposed to the weather, and thereby rusted and deteriorated, I suggest to the chairman of the Committee on Naval Affairs and to the members that they ought to look into the feasibility of using this place occupied solely for purposes of pleasure for utilitarian purposes.

Mr. BARTON. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. BARTON. I would like to ask the chairman of the committee for information, whether or not there is any foreign gun finished or put together or assembled in our yard?

Mr. PADGETT. I do not know of any.

Mr. BARTON. When I visited the navy yard I had pointed out a 16-inch gun which they told me was for one of the companies here; it was being assembled and the hoops or bands being put on it.

Mr. PADGETT. I do not know whether that is true or not.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended three minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. STAFFORD. Mr. Chairman, I would like to ask the gentleman what buildings are contemplated to be demolished if this building is to be constructed? I understand there are two buildings, as shown by the hearings, that will have to be razed if they build this quarter of a million dollar warehouse.

Mr. PADGETT. I do not recall at this time, for I have not refreshed my memory upon it.

Mr. STAFFORD. As I glean from the hearings, we would only have one-third more floor space than we now have with the existing quarters.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I can state to the gentleman that the building to be removed is the building 24, the locomotive house and the test house. You will find that on page 170 of the hearings.

Mr. PADGETT. Those are small houses.

Mr. STAFFORD. Mr. Chairman, I think in view of the transition state that this yard is now going through, and the fact that buildings will have to be demolished in order to erect it, it is questionable whether it should be erected, and if they are going to have new grounds to meet the needs of the Navy Department in the construction of guns, then certainly it should be delayed, and accordingly I make the point of order.

The CHAIRMAN. The gentleman from Wisconsin makes the point of order to the language in lines 17, 18, and 19. Does the gentleman from Tennessee care to be heard?

Mr. PADGETT. Mr. Chairman, we have a gun factory there, and we need buildings of different kinds. This is a new building and is an integral part of an entity, the factory where the manufacture of guns and ordnance material is being carried on. This is one of the integral parts of that whole. It seems to me that it is in order to enlarge the work which is carried on in that factory and to enlarge its facilities.

The CHAIRMAN. The Chair will be glad to hear the gentleman from Wisconsin.

Mr. STAFFORD. Mr. Chairman, as I understand the distinction made in the decisions upon this question, it is that the precedents hold that any increase providing for the upkeep of a yard, or for implements or tools needed in the work of the yard, and the like, are in order, but any amendment that provides for a distinct building that has not heretofore been authorized or that is not an extension of an existing structure is subject to a point of order. I can not recall just at this moment the citation which was used on yesterday afternoon by the gentleman from Virginia [Mr. SAUNDERS], which was a decision rendered by Judge Crumpacker while presiding as Chairman of the Committee of the Whole House. If the gentleman from Virginia could give me the reference, I would be very much obliged to him.

Mr. SAUNDERS. I have a number of decisions here, but they are not cited.

Mr. PADGETT. Mr. Chairman, while they are looking that up I desire to call the attention of the Chair to section 1741, page 497, Hinds' Precedents. I have not the volume.

Mr. STAFFORD. Mr. Chairman, I have the decision—fourth volume Hinds' Precedents, paragraph 3736. An amendment was offered to the naval appropriation bill, then under consideration, providing for a steel floating dry dock.

Mr. Tawney made the point of order that the expenditure was not authorized by law. After debate and an exhaustive citation of precedents, the Chairman, Mr. Crumpacker, in a lengthy decision pointed out what I have just referred to as the distinction which is made by the precedents. In the course of that decision, he said:

The logical inference from the precedents is that the Navy proper, consisting of the war fleet, officers, and seamen, with necessary equipment and supplies, is a public work or object already in progress within the meaning of the rule, and appropriations therefor are in order in appropriation bills without previous authority of law, while the administrative branches and the construction and repair establishments of the Navy Department, including, among other things, naval stations, navy yards, hospitals, magazines, and stationary dry docks, do not ipso facto constitute a public work or object in progress, and appropriations therefor must be previously authorized by law.

The question for decision is whether a floating dry dock is an essential part of the equipment of the Navy proper or whether it belongs to the administrative service of the Navy Department. Dry docks are for the purpose of repairing vessels, and the only essential difference between floating dry docks and stationary dry docks is the portability of the former.

The gentleman from Illinois [Mr. MANN] calls my attention to the summary in the Manual at the top of page 358:

Appropriations for new buildings at Government institutions have sometimes been admitted.

I recall those decisions, being those which related to buildings at Annapolis and at West Point, where special distinction was made, but the Digest goes on to say:

But later decisions, in view of the indefinite extent of the practice made possible by the early decisions, have ruled out propositions to appropriate for new buildings in navy yards and other establishments. Appropriations for new school houses in the District of Columbia, for new Army hospitals, for new lighthouses, armor-plate factories, and for additional playgrounds for children in the District of Columbia, have also been held not to be in continuation of a public work.

Mr. Chairman, I respectfully contend that those various concrete cases cited in that paragraph show this is on all fours with them.

Mr. PADGETT. Mr. Chairman, I see that my citation here does not state the number of the volume, but simply says section 1741, page 497, Hinds' Precedents. In that citation it is held:

A fireproof building on a site of public grounds, West Point, is within the purview of the rule. The construction of the building is an incident to the maintenance of the academy itself, the object being already in progress, the main object contemplated not only by the bill, but by the very institution of the academy itself, and the point of order was overruled.

In section 3742 it was held that an amendment to the naval appropriation act authorizing the erection of such new buildings at the Naval Academy, Annapolis, as the Secretary of the Navy might consider necessary and practicable and the removal of old buildings was in order, while the erection of a building at the Naval Academy which was not necessary for the work of the academy was held not to be in order.

Mr. STAFFORD. Mr. Chairman, I will direct the attention of the Chair to the fact that the citations to which the gentleman now refers are all in the summary that are taken from the Manual.

The CHAIRMAN. The Chair is prepared to rule.

Mr. PADGETT. Another one I have here is from Hinds' Precedents, volume 4, section 3750. There it was held that the following appropriation was in order:

Quarters for gas, steam, and electric light connections, and furniture for the same.

These all being regarded as incident to the purpose for which the work was being done.

For instance, take the navy yard, and at West Point and Annapolis, these buildings were held in order because they were a part of and incident to the general purpose and scope of the yard and the work at the yard. At the gun factory these buildings are provided for as incident to and a part of the general scope of the work.

The CHAIRMAN. The Chair is prepared to rule——

Mr. SAUNDERS. Mr. Chairman, just a moment in that connection. The gentleman from Tennessee [Mr. PADGETT] refers to these authorities as if they announce a general principle, whereas by looking at the decisions in reference to West Point and Annapolis it will be found that they constitute a class apart. It has been frequently held that navy yards do not come within the rulings as to buildings at Annapolis, and at West Point.

The CHAIRMAN. The Chair has had an opportunity hastily to examine the precedents during the discussion. The Chair finds in volume 4 of Hinds' Precedents, section 3761, it was held that it was not in order on the naval appropriation bill to appropriate for a new foundry not previously authorized by law at a navy yard. Without taking up the time of the committee to review the decisions, it is that the later decisions have held that the cases originally cited touching the Naval Academy and West Point do not apply, and that it is not in order on the ground of a continuation of a work in progress to authorize a new building, even though the building may be thought desirable for the purpose for which the yard was established. In view of the indefinite extent to which such a practice might be car-

ried and the great field which might be opened up for appropriations which are really unauthorized, the Chair believes that the later rulings represent the better parliamentary practice. The Chair therefore sustains the point of order.

The Clerk read as follows:

Navy yard, Norfolk, Va.: Repairs, buildings, St. Helena, $25,000; the 150-ton crane authorized by the act of March 4, 1913, shall be of the floating revolving type, and the limit of cost is hereby increased to $450,000.

Mr. LOGUE. Mr. Chairman, I reserve the point of order. May I ask the gentleman from Tennessee for a little information on this? Is not this a change?

Mr. PADGETT. I will state to the gentleman that if he makes the point of order it is subject to the point of order, in my opinion.

Mr. LOGUE. Mr. Chairman, I make the point of order.

The CHAIRMAN. Does the gentleman make it to the paragraph?

Mr. LOGUE. No; the $450,000 appropriation, after the $25,000.

Mr. PADGETT. I will ask the gentleman if he will not reserve it a moment to let me make a statement that I may explain the necessity for this. If the gentleman intends to make the point of order, there is no use to take up the time.

Mr. LOGUE. I think I had better insist on it.

The CHAIRMAN. The gentleman from Pennsylvania makes the point of order, line 21, page 22, beginning with the word "the," down to the end of the paragraph. The Chair sustains the point of order.

The Clerk read as follows:

Navy yard, Charleston, S. C.: To complete torpedo boat berths (to cost not exceeding $300,000), $150,000; dredging, to continue, $10,000; sewer system, extensions, $5,000; conduit system, extensions, to continue, $5,000; in all, $170,000.

Mr. PADGETT. Mr. Chairman, I desire to offer an amendment as a separate paragraph, following line 5, page 23.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 23. After line 5, as a separate paragraph, insert the following:

"Naval station, Port Royal, S. C.: The Secretary of the Navy is hereby authorized to pay, from appropriations 'Contingent, Bureau of Yards and Docks,' for the fiscal year 1913, voucher in favor of the Vilter Manufacturing Co., for $4,937 for an ice-making and refrigerating plant for the naval disciplinary barracks, Port Royal, S. C., furnished by said company under contract dated April 28, 1913, with the Secretary of the Navy; and the accounting officers of the Treasury are hereby authorized and directed to allow in the accounts of Passed Assistant Paymaster D. W. Rose credit for payments amounting to $1,184 made by him to said company under contract dated November 5, 1913, from appropriations 'Contingent, Bureau of Yards and Docks,' for the fiscal year 1914, on account of said ice-making and refrigerating plant."

Mr. MANN. Mr. Chairman, I reserve a point of order on the amendment.

Mr. PADGETT. Mr. Chairman, I will state this does not carry any appropriation in this bill. It is an authorization, however, for a payment out of last year's bill, and I have a letter——

Mr. MANN. It is subject to a point of order, and I suggest the gentleman allow it to go over, so we will have a chance to see it in print.

Mr. PADGETT. I will ask that it go over, and we will return to it; and I will ask that this letter——

Mr. MANN. Well, the gentleman offers it at this particular place——

Mr. PADGETT. This is the place. It comes right here in following Charleston, S. C., and the other before Port Royal, S. C., and I have a letter from the Secretary explaining the matter which I desire to put in the RECORD, and I will ask that the amendment may be passed over, with the privilege of returning to it later.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that the amendment may be passed over with the privilege of calling it up later. Is there objection? [After a pause.] The Chair hears none.

The letter referred to by Mr. PADGETT is as follows:

NAVY DEPARTMENT,
Washington, April 27, 1914.

Hon. L. P. PADGETT, M. C.,
Chairman Committee on Naval Affairs,
House of Representatives.

MY DEAR MR. PADGETT: On April 23, 1913, the Vilter Manufacturing Co., of Milwaukee, Wis., entered into a contract with this department to furnish and deliver and to superintend the installation of an ice-making and refrigerating plant at the naval disciplinary barracks, Port Royal, S. C., for the sum of $4,890, which price was later increased by $47—that is, to $4,937—on account of a minor change in construction. No specific appropriation had been made for this plant; but as the climatic conditions and the isolated situation of the barracks made it necessary for the health and comfort of the personnel—near 1,000 men—and to prevent loss to the Government, to provide means as soon as possible for making ice and preserving fresh meats and provisions, the department considered that the demand for the plant during the summer then approaching was of such urgency as to justify the purchase of it from the appropriation "Contingent, Bureau of Yards and Docks," for the fiscal year 1913, contained in the naval act approved August 22, 1912. When, however, the contract was completed and a voucher for the agreed price presented, a question arose as to whether the appropriation mentioned was legally available for the proposed expenditure, and the Comptroller of the Treasury, to whom this question was submitted, held on March 18 last that the installation is not within the scope of a contingent appropriation, and that, Congress having given no authority for it, the expense thereof is not properly chargeable to any appropriation under naval control. Funds under the appropriation named had been set aside for payment for the work under this contract, and are now being held for the purpose.

After the original contract was under way certain changes in the location and arrangement of the apparatus were found to be advantageous, and these were made by the Vilter Manufacturing Co. under a contract dated November 5, 1913, entered into with Passed Asst. Paymaster D. W. Rose, the purchasing pay officer at Port Royal, S. C. The cost of these changes—$1,184—was charged to the appropriation "Contingent, Bureau of Yards and Docks," for the fiscal year 1914, contained in the naval act approved March 4, 1913, and was paid to the contractor by Mr. Rose upon two public bills, one, No. 252, for $1,160.91, paid December 31, 1913; the other, No. 2081, for $23.09, paid January 26, 1914. These payments were made before the question was raised as to whether the contingent appropriations were available for the plant, and it is practically certain that, in view of the comptroller's decision mentioned above, credit for them will be disallowed by the accounting officers in the settlement of the pay officer's accounts.

In these circumstances, and to the end that the contractor may now be paid for the work done under the contract with the department, and that Mr. Rose may not be held personally liable for the payments already made under the supplementary contract, I have the honor to recommend the enactment of legislation authorizing the payment of the sum due the contractor—$4,937—from the appropriation originally intended to be charged with this expenditure, namely, "Contingent, Bureau of Yards and Docks, 1913," and directing that the accounting officers allow credit to Passed Asst. Paymaster Rose for the payments already made. The draft of a clause, which it is believed will accomplish the desired end, is inclosed, and it is recommended that, if the committee deem it proper, this provision be included in the pending naval appropriation bill, H. R. 14034. Should this be done, the clause might, it is thought, appropriately be inserted in the bill on page 23 following the appropriation for the navy yard, Charleston, S. C. As will be noted, the proposed legislation involves no additional appropriation.

Besides being essential to the welfare of the personnel at the station, the ice plant installed has proved to be a good investment, and it is estimated that by reason of the savings it will effect it will more than pay for itself within two years from the time it was placed in operation, including the cost of its maintenance during that period.

A similar communication has been addressed to the chairman of the Committee on Naval Affairs of the Senate.

Sincerely, yours,

FRANKLIN D. ROOSEVELT,
Acting Secretary.

The Clerk read as follows:

Navy yard, Mare Island, Cal.: To complete quay wall, $20,000; modernizing electric-power and light-distributing systems, $10,000; improvement of hydraulics, Mare Island Straits, in accordance with report submitted in House Document No. 1103, Sixtieth Congress, second session, and such modifications as may be made therein in pursuance of the authority contained in the act making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1913, and for other purposes, approved October 22, 1913 (limit of cost $507,000), to complete, $207,000, to be immediately available; in all, $237,000.

Mr. MANN. Mr. Chairman, I reserve a point of order on the paragraph. Has the balance of this been appropriated?

Mr. PADGETT. Yes; $300,000 has been appropriated.

Mr. MANN. Well, the limit of cost was $507,000.

Mr. PADGETT. Yes, sir.

Mr. MANN. Three hundred thousand dollars has been appropriated. Does the gentleman remember when that was appropriated?

Mr. PADGETT. It was appropriated in the Sixtieth Congress, second session; and then there was a modification of it in the urgent deficiency bill for the fiscal year June 30, 1913.

Mr. MANN. What is the necessity of making this additional appropriation now?

Mr. PADGETT. The necessity is this: It was contemplated, and under the contract it was provided, that they should have 24 months in which to complete this work, but the contractors have been making such progress upon it that they expect to complete it in 14 months.

Mr. MANN. Why did not they submit an estimate for a deficiency and let it go to the proper committee?

Mr. PADGETT. I do not know why, but it was sent to us in the regular estimates that came through the Treasury Department.

Mr. MANN. I think I shall make the point of order on the words "to be immediately available," so we may learn something about it later.

The CHAIRMAN. Does the gentleman from Tennessee desire to be heard?

Mr. PADGETT. No; those words are subject to a point of order.

The CHAIRMAN. The gentleman from Illinois makes the point of order to the language "to be immediately available," and the Chair sustains the point of order.

The Clerk read as follows:

Navy yard, Puget Sound, Wash.: To complete ship fitters' shop, mold loft, and structural steel storage, $155,000.

Mr. BRYAN. Mr. Chairman, I move to strike out the last word. We have out on the Pacific coast the two navy yards. One is the navy yard at Puget Sound, which is referred to in the present section, and we have also the navy yard at Mare Island, referred to in the preceding section. It is noticed that the appropriation for the Puget Sound yard is not as large as that for the Mare Island yard. It is noticed that the whole story to be told, so far as the Puget Sound yard is concerned, is contained in two brief lines and one little half inch addendum, whereas the story as to the Mare Island yard comprises half a page.

Now, the situation out there on the Pacific coast as to these two yards ought, I believe, to be more definitely understood by the Members of Congress. The Mare Island yard is absolutely efficient to a certain extent, within its limitations, but its limitations are so definitely set as to make it entirely unfit to handle a battleship or a dreadnaught. A dreadnaught of the present Navy, which is said to be the only part of the Navy that is worth while in a real fight, would no more think of going up to the Mare Island Navy Yard than an aeroplane would think of diving after a submarine. The whole situation is such that a battleship would not think of risking itself up there at that yard. And in order to cure that difficulty, or as a result of that fact, this bill a little further on contains an appropriation for $50,000 and a provision for a continuing contract with the Union Iron Works for a dry dock that battleships or dreadnaughts may use at Hunters Point, 30 or 40 miles from this Mare Island Navy Yard.

On the contrary, the Puget Sound yard is endowed by nature with every requirement for a first-class navy yard. A short time ago the Secretary of the Navy, or somebody in the Navy Department, caused a classification to be made that discriminated somewhat against the Mare Island yard. I understand it was called on paper a second-class yard. A delegation came, and that classification was changed so that, on paper, it figures as a first-class yard. But the dry dock that is proposed, the permanent improvement for shipbuilding, for care of the Navy, and repair of the efficient ships of the Navy ought to be concentrated at Puget Sound. There is no necessity for establishing another yard at Hunters Point. There is no necessity for establishing dry docks 40 miles away from Mare Island. Mare Island is all right for the smaller craft of the Navy, for the cruisers of the Navy, that may go there. There is plenty of work of that kind. But I want to call the attention of the Congress to the fact that no dredging is necessary in order to enable ships of any size or draft to go to the Puget Sound yard. The hydraulics of that yard are not subject to any question or any difficulty whatever.

Mr. KELLEY of Michigan. Mr. Chairman, it was stated before the committee that at high tide the largest battleships could go up to Mare Island. Does the gentleman know anything about that?

Mr. BRYAN. I phoned the office of the Secretary of the Navy for the depth at the Mare Island yard, and he said it was 23 feet. That is what I got from the Navy Department yesterday. The Mare Island Straits are only 1,000 feet wide; that is, they are so narrow that no more than a base channel of 1,000 feet can be devised by any kind of scheme.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. CURRY rose.

Mr. BRYAN. I will yield now to let the gentleman from California make a statement.

Mr. CURRY. The gentleman need not yield to me. I move to strike out the last two words.

Mr. PADGETT. Just one word, Mr. Chairman. There is a fine body of water at Puget Sound, and the gentleman will not speak more laudatory of it than myself. I do not agree with him fully in what he says with reference to the Mare Island yard. I have a letter from the Secretary of the Navy, dated December 22, in reference to the water at the Mare Island yard. He says:

NAVY DEPARTMENT,
Washington, December 22, 1913.

Hon. LEMUEL P. PADGETT, M. C.,
Chairman Committee on Naval Affairs,
House of Representatives.

MY DEAR MR. PADGETT: The following telegram just received from the commandant of the Mare Island Navy Yard is forwarded for your information:

"At request Congressman CURRY following information wired: 'Depth Mare Island Channel, low water, 24 feet; high water, 30 feet. Depth berthing space at quay wall 17 to 26 feet low water. Channel is being dredged to 30 feet at low water; about 2,000 feet, or 12 per cent of contract completed. Entrance to dry docks 20 to 24 feet low water.'"

It is thought that the information contained in this telegram may be of value to your committee.

Sincerely, yours,

JOSEPHUS DANIELS,
Secretary of the Navy.

When this work is completed that we are just providing for in the preceding paragraph, it is expected that they will have water 30 feet deep at low water, and at high water 36 feet deep.

Mr. BRYAN. The gentleman does not mean, though, that the statement of the Secretary would controvert in any way the statement I made that a dreadnaught would not think of going up there to the dock in 24 feet of water?

Mr. PADGETT. Some of the dreadnaughts carry a greater depth than that, but it is possible in the changes of the future there may be better docks on that coast.

Mr. BRYAN. Well, but the committee now provides, as I stated, for a dock down at Hunters Point and not at Mare Island Navy Yard.

Mr. PADGETT. That is not a Government dock. That is simply agreeing to patronize the dock for a period not exceeding six years, as a matter of encouragement to private enterprise to build a dock that would be available to the Government in time of peace as well as in time of war.

Mr. BRYAN. If the Mare Island dock is able to take care of battleships, then certainly I shall object and make a point of order against making a contract with a private yard for $50,000 a year to encourage private enterprise in that way. The reason this dock was to be constructed, I understand, was that the largest battleships could not dock at Mare Island.

Mr. PADGETT. The water at the present dock was not deep enough for the large ships, and in order to remedy that this provision is carried in the bill.

Mr. BRYAN. How soon does the gentleman think that dredging contemplated in this appropriation bill will be completed?

Mr. PADGETT. Inside of 12 months.

Mr. BRYAN. Does the gentleman recognize the fact that the dry dock could not be built in 12 months, and if you appropriate now for the dry dock at Mare Island, it could not possibly be ready until a long time after the dredging is completed?

Mr. PADGETT. The Government is not ready to contemplate the building of another dock at Mare Island at this time. With the information that we have and the condition of affairs, we do not deem it advisable to undertake it at this time. But with this other one, at a nominal cost, we would have a dock there available for the Government at all times; yet it would be built by private enterprise.

Mr. BRYAN. Is it not a fact that the bottom fell out of the dock at Mare Island—that the bottom oozed up—and they had tremendous trouble in building the dock they have?

Mr. PADGETT. No. Pearl Harbor is 2,100 miles distant. They have never had any blowing up of the dock at Pearl Harbor.

Mr. FALCONER. It is a fact, and I think the committee realizes it, that the depth of water at Puget Sound is magnificent.

Mr. PADGETT. It is magnificent.

Mr. FALCONER. And we have the finest harbor in the world.

Mr. PADGETT. I do not know about that.

Mr. FALCONER. Certainly on the Pacific coast.

Mr. PADGETT. The gentleman does not want to cover so much territory, if he expects me to follow him.

Mr. FALCONER. I will not retract that statement, but I will say——

The CHAIRMAN. The time of the gentleman has expired.

Mr. CURRY. Mr. Chairman, I want to say at the outset that I do not like to make any invidious comparisons, but the harbor at Bremerton is a very good harbor of its class. I do not intend to say anything about the four or five months of fog that they have out on Puget Sound, that ships going up and down through that waterway are compelled to follow a narrow and crooked channel; and I do not need to say that in going into Puget Sound a man-of-war has to pass by a foreign territory. It must sail through the Straits of Juan de Fuca, intervening between the British Columbia dominions of Great Britain and the United States.

Mr. FALCONER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from California yield to the gentleman from Washington?

Mr. CURRY. After I get through I will yield. When it comes to a harbor, San Francisco is the finest harbor on our Pacific coast, and one of the three finest harbors in the world,

those of Sydney, Rio de Janeiro, and San Francisco. It is so recognized by all competent and well-informed people.

The Mare Island Navy Yard is located 29 miles from San Francisco, right across the bay, at the very best point where a navy yard could possibly be located on the Pacific coast. It is safe from attack in time of war from outside the heads, and it would be in jeopardy only in case a foreign fleet would be in possession of the bay, which is impossible. Its location protects it from violent storms, and, being practically on fresh water, at the mouth of the Napa River, it is free from the destructive elements that are to be found in salt water.

When it comes to the proposition of a dry dock, in my opinion if the Government intended to construct a dry dock now, it ought to be constructed at the Mare Island Navy Yard. But I understand it to be the policy of the Navy Department to encourage the building of a private dock and afterwards to construct a public dock, so that at times in an emergency the Navy might have the use of two docks in that magnificient harbor.

At the Mare Island Navy Yard we have an organization of men and machinery second to none in this country. The geological formation is perfect for dry-dock purposes. A site for a dock located at Mare Island would not have to be purchased by the Government, because at the present time we own 1,400 acres of building site, on the operative line of which the water is deep enough to accommodate the largest ships. The deepest draft ship in the American Navy draws 28 feet and 10 inches of water. On the southern point of the Mare Island Navy Yard we have 40 feet of water at low tide. In the Mare Island channel proper, as the Secretary of the Navy has stated, the water at low tide is 24 feet, with a 6-foot rise of tide, making a 30-foot channel at high tide.

Recently the department let a contract for the dredging of that channel to make it 36 feet deep at high tide. That work is half completed at the present time, and to-day, at this minute, at the dry dock at Mare Island we have over 30 feet of water at low tide, and the dry dock we have now at Mare Island will accommodate any ship of the Navy except those of the dreadnaught class. We hope and believe that when the dry dock is constructed in San Francisco Bay by the Government it will be located at Mare Island. Mr. Roosevelt, the Assistant Secretary of the Navy, has recently returned from a trip to the Pacific coast, where he inspected the Bremerton yard and the Mare Island yard. He states that the location of the Mare Island yard is magnificent and could not be improved upon.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. CURRY. Mr. Chairman, I would like to have two minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

The CHAIRMAN. The gentleman from California is recognized for two minutes.

Mr. CURRY. Mr. Chairman, from my conversation with the Secretary of the Navy and with the Assistant Secretary of the Navy I feel confident that when the Government constructs a dry dock it will be located at Mare Island.

Now, I do not care what you do for any other navy yard in the United States that is right and proper and in the interest of the public. I do not care how much you spend at Bremerton to increase its efficiency. I believe there ought to be two yards on the Pacific coast, and, so far as the second place is concerned, Bremerton suits me as well as any other. But I do not think it is right or fair for a man who knows nothing about the location of the Mare Island Navy Yard, and has never been near it, and has never seen it, to get up and talk about it, as has the gentleman from Washington. I know Bremerton, and I have been all around that country, and I know all about San Francisco Bay, and all about the Mare Island yard. I do not wish to make any invidious comparisons, as I said, but I will say now that there are but two navy yards in this country that are equipped with men and machinery to construct a battleship, and one of them is at New York and the other is the Mare Island Navy Yard. I hope and believe that we shall have a battleship to construct out there in the near future.

So far as concerns the point of order upon which the item making the money immediately available was cut out by the gentleman from Illinois [Mr. MANN], I am sorry he made that point of order, for this reason: Next year there will be all of the American fleet in San Francisco Bay. We have invited the nations of the world to send their battleships to the Panama-Pacific International Exposition.

Mr. MANN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. MANN. Mr. Chairman, I ask that the gentleman have two minutes more.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the gentleman from California [Mr. CURRY] proceed for two minutes more. Is there objection?

There was no objection.

Mr. MANN. There is no likelihood that this bill will become a law much, if any, before the 1st of July. Now, if the gentleman needs money as a deficiency he ought to ask for it from the Committee on Appropriations, which will have a bill here in the House probably in a few days supplying urgent deficiencies. The cutting out of the clause making the money immediately available probably will not make any difference at all except as a matter of principle, to teach the Navy Department to go to the right place to get money when it desires a deficiency. But if you want money, and it is a deficiency, the only way to get it within this present fiscal year is to go to the proper committee. This bill will not become a law in time to give it to you.

Mr. CURRY. I had nothing to do with the suggestion that this item be put in this bill. That came from the Navy Department.

Mr. MANN. They did not know that I would take it out. It is just one more lesson to teach them.

Mr. CURRY. It was expected that this dredging work would take two years. The fact of the matter is that by next November or December this whole channel will be dredged; and it was nothing but right and proper that the Government should deal as fairly with its citizens as it expects them to deal with each other, and when any job has been completed, to pay for it. So far as the proposition of presenting a deficiency item to the Committee on Appropriations is concerned, while I think the gentleman from Illinois [Mr. MANN] has more experience in the Committee on Appropriations than I have, I do not know whether or not there is much chance of getting anything out of that committee at this time for this purpose.

Mr. MADDEN. If this is a deficiency, they can get it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BRYAN. I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. BRYAN. Mr. Chairman, I do not want to be put in a false light in this matter. I have no objection to Mare Island getting what is coming to her. The only trouble about Mare Island is that she tries all the time to associate with the real first-class navy yards of the country, and she does not belong in that class. Now, in 1905 this Government appropriated $166,812 for that harbor. In 1906 it appropriated $86,000 more. In 1907 it appropriated $80,000 more. In 1908 it appropriated $26,000 more. Then the engineers went out there and made an estimate, and Mr. Metcalf, then Secretary of the Navy, writing a letter in reference to the matter, said:

> The general board has considered the situation as regards the docking and repair facilities for a battle fleet on the Pacific coast of the United States, and finds the condition to be one of great seriousness so far as relates to the maintenance of our ships on that coast.
>
> The Mare Island Navy Yard can not be approached by our largest ships without danger, and even if they could reach the yard at extreme high water they would have to lie on the bottom for a considerable portion of every tide.

Since then we have appropriated money until there has been more than $1,033,738.73, and this bill adds $207,000, appropriated for the purpose of deepening the channel to the Mare Island Navy Yard.

In the Engineers Report it is said that when they dig this channel they are now working on, because of the silt and sediment that comes from the Sacramento River, there is no assurance that it will continue open, and it may be necessary afterwards to build dikes or sea walls on each side of the channel to keep it from filling up again. Then it is further observed that the width of the strait is not more than 1,000 feet, that they can not stand for any wider channel than a thousand feet.

They can not build wharves there at right angles to the stream, or could not in 1908. The report of the Engineers said—

> The proposal to dam the strait, thus diverting the Napa River into San Pablo Bay through the tule marshes, would, it is believed, improve the yard, as it would do away with the current and would permit wharves to be built out at right angles to the stream.

Perhaps my friend, Mr. CURRY, did not want me on the Naval Affairs Committee for fear I might set forth to the committee some of these facts.

The report, which is a part of House Document No. 1103, Sixtieth Congress, second session, and is referred to in this bill, further says:

In 1905 a channel 300 feet wide and 30 feet deep was dredged over a length of about 5 miles, connecting the 5-fathom contours. A survey in May, 1907, showed that this channel had shoaled over about four-fifths of its length and as much as 6 feet in places, reducing the available depth to about 24 feet. The total amount shoaled was about 1,000,000 cubic yards, or about half of the amount dredged.

Later the report adds:

The survey made by the board (in 1908), while not as extensive as that made in 1907, shows a general additional shoaling of this channel of about 1 foot.

Will any careful navigator enter a creek where it must drag its keel in the mud and fill its sea cocks with silt? But consider these plans as necessarily associated with future operations at the yard.

The report further advises:

It is recommended that the dike be extended 1¼ miles, with a proviso that it be further extended at a later date should conditions render it advisable.

The estimated cost of this improvement is as follows:

Dredging Mare Island Channel, 2,500,000 cubic yards, at 15 cents	$375,000
Extension of dikes in straits and entrance, at $50 a foot	120,000
Removal of Commission Rock	112,000
Extension of dike No. 12 into San Pablo Bay, 8,000 feet	400,000
Total	1,007,000

But note the following additional estimate:

Annual maintenance, repairs, and dikes and dredging	70,000

Attention is invited to the fact that the available width of the basin in front of the yard is only 1,000 feet, so that vessels 500 feet long could not enter docks at right angles to the sea wall. Docks at oblique angles or parallel to the direction of the current could, of course, be used.

An alternation plan is proposed to cost $1,553,000 and $134,000 annually for maintenance. Another plan is submitted to cost $5,247,000.

Mr. CURRY. I should like to correct the gentleman.

Mr. BRYAN. I will yield to the gentleman.

Mr. CURRY. The channel is 1,200 feet wide at the narrowest point.

Mr. BRYAN. The report says the base of it is so narrow that we can not maintain over 1,000 feet. Now, our battleships are 600 feet long, and it is some job for a 600-foot ship to turn around in a 1,000-foot channel. It is a mile wide in front of the Puget Sound Yard.

After all these years of appropriating, and spending this $1,000,000 and more on the harbor, we find that to-day the yard is still not able to handle that kind of a ship, as the only means of keeping the dreadnaughts from the Puget Sound yard they have got to arrange for a private contract at Hunters Point, in San Francisco Bay.

Mare Island never misses a bet. I take off my hat to those people. They are energetic and thorough, and their organization is effective, and they have been effective in the United States Senate and in the House in getting things for that yard. They know what congressional and senatorial pull means, and they do not object to putting the fixings onto the Puget Sound yard when they can. They are for Mare Island first, last, and all the time. I do not take the slightest exception to the little incident which I now desire to relate, but I tell it just to show "how doth the busy bee improve each passing hour." A short time ago, after the election returns from Washington were received in California, it appeared that J. W. BRYAN was elected to Congress from the Seattle district, and my good friend Mr. CURRY, the gentleman from California, for whom I have the highest respect, had a little meeting down there at the Mare Island yard, according to the Vallejo News, at which he presided, and it was stated that a nephew of William Jennings Bryan had been elected to Congress from the Puget Sound yard district and that he wanted to get on the Naval Affairs Committee, and it was essential that something be done to prevent him getting on that committee, otherwise he would give the Puget Sound Navy Yard a little too good a show, and suggested that they pass a resolution. In all kindness, there was nothing in this action to show that they were willing for Puget Sound to have such a fair chance as representation would give.

A little later that great Democrat, Theodore Bell, of San Francisco, came here and had a meeting. I do not know whether it was on that subject or not, but, nevertheless, the Curry resolutions of the Mare Island meeting went in. I was recommended for the Naval Affairs Committee. I was green of judgment, however, in wanting to get on that committee, but I was recommended for it, and I thought I wanted to be on it. It is a committee of routine and work, gunpowder, navy yards, and armor plate. One day, with one of those sweet but convincing smiles that sometimes frolic amid the grim and relentless fortifications of his placid but determined countenance, the distinguished leader of the Democratic majority, Mr. UNDERWOOD of Alabama, informed me that I could not go on the Naval Affairs Committee because I had a navy yard in my district. Bingo! It was all over.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CURRY. I ask unanimous consent that the time of the gentleman be extended.

Mr. BRYAN. I should like two minutes.

Mr. PADGETT. Reserving the right to object, I ask unanimous consent that debate upon this paragraph and all amendments thereto close in 10 minutes.

Mr. CURRY. I should like to have two minutes more.

Mr. BRYAN. I hope the gentleman will be allowed two minutes.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] asks unanimous consent that debate on this paragraph and all amendments thereto be closed in 10 minutes. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to proceed for two minutes. Is there objection.

There was no objection.

Mr. BRYAN. It was plainly stated to me by the leader of the majority that the reason why I was not permitted on the Committee on Naval Affairs was because I had a navy yard in my district, and I believe that was the reason I was denied a place on the committee, and Mr. UNDERWOOD was considering the public service alone. I only mention that instance to show the activity of the Mare Island Navy Yard. But the Mare Island mass meeting did all it could with its resolutions.

Mr. MANN. That is the reason why the gentleman from California was not put on.

Mr. BRYAN. I did not know till now that my friend Mr. CURRY was an applicant for that appointment.

Mr. MADDEN. No gentleman who has a navy yard in his district ought to be on the Naval Affairs Committee.

Mr. BRYAN. That may be a good proposition if enforced, and I am glad I am not on the committee. There are so many subjects more interesting than gunpowder and dreadnaughts. I merely mention that to show that Mare Island never misses any chance to look out for its interest and its appropriations. Even a small matter like this did not escape its eagle eye. It is because of that diligence, it is because of that continued hammering and that continued telegraphing, and having information right up to date, that they are able to make impressions here that cause the people of the United States to think that battleships can sometimes be floated and docked there at Mare Island. As I said, it is as impossible and inconceivable as to think of an aeroplane diving after a submarine. There is nothing in it, and I want to call the attention of gentlemen here to the fact that we have a first-class yard on that coast, and it is not right to divide with a new yard at Hunters Point. It is not right to divide up for these big slips with a private plant, with the Union Iron Works or any other organization, and thereby establish a third dock out there, or the nucleus of a third dock, that is going to cause an interminable amount of expense and extended appropriations from time to time. Arrangements are already made for a big dock and repair station at Panama. With Mare Island Yard for the smaller ships and transports and the Puget Sound Yard and the Panama Yard for dreadnaughts and real battle machines, another enterprise at San Francisco (Hunters Point) would in reality be the fourth yard. The Puget Sound Yard ought to be a four-dock yard and should be equipped for building ships.

The commercial interests want a big dock at San Francisco, and they must have one. I do not see why the Government should put $50,000 a year into the proposition when it has a dry dock at Puget Sound in which a dreadnaught cradles itself like a cooing babe. No mud, no silt, no crowding, no danger, plenty of elbow room, good air, and "bully" surroundings. Uncle Joe Cannon said so when he went out there. Senator RANSDELL, former chairman of the Committee on Rivers and Harbors in this House, said so. It is a fact, gentlemen, and the more you know about it the better you will like it. I hope we may concentrate the appropriations between the Mare Island yard and the Puget Sound yard, and classify each yard according to its merits and not attempt to establish another yard and increase beyond all reason the expenses of the Government.

Mr. MANN. If the gentleman from California keeps on telling the truth about the Bremerton yard and the gentleman from Washington keeps on telling the truth about the Mare Island yard, does the gentleman think that either one will have a chance to get an appropriation in the future. [Laughter.]

Mr. BRYAN. I am perfectly willing to have all the truth told about the Puget Sound yard. Mr. Roosevelt when he came back the other day from an inspection of the navy yard said the Bremerton yard was "bully."

Mr. MADDEN. What Roosevelt?

Mr. BRYAN. Oh, it was not T. R., but it was another "bully" Assistant Secretary of the Navy who said that the Puget Sound yard was a "bully" yard.

Mr. FALCONER. Mr. Chairman, following my observation made a few minutes ago about the Puget Sound Harbor being the finest in the world, when I am asked to substantiate the statement I will be prepared to do so. Sufficient at the present time to say that the harbor of Puget Sound is the finest harbor on the Pacific coast, with Grays Harbor a close second. I do not think that any man who knows the facts of the relative merits of Puget Sound and the harbor of San Francisco will contradict that statement. Now, regarding the fogs on Puget Sound, referred to by the gentleman from California [Mr. CURRY], we have occasional fogs in the night, and once in a while in the daytime, but not worse certainly than on the eastern coast harbors of the United States. But how is it in San Francisco?

Mr. CURRY. Oh, we have a few there, too.

Mr. FALCONER. But the waters of Puget Sound do not have silt or mud to the extent found in the harbor of Vallejo or Mare Island.

Mr. MOORE. Will the gentleman yield?

Mr. FALCONER. Yes.

Mr. MOORE. Is it true that you have sufficient depth of water to accommodate battleships?

Mr. FALCONER. To accommodate all the navies of the world.

Mr. MOORE. When you say there is no silt in Puget Sound, is the depth of the water so great that you do not have a safe anchorage?

Mr. FALCONER. Oh, no; there are great areas of anchorage.

Mr. MOORE. Is it not a fact that sometimes by hydraulic process you have to fill up a portion of your basin?

Mr. FALCONER. Oh, if you are building a brick block on the tide flats we put in some filling. And we sometimes remove mountains when we find them in our way. [Laughter.]

Mr. MOORE. What is the depth of water in Puget Sound Harbor?

Mr. FALCONER. Directly in front of the Bremerton yard the depth is probably 7 to 8 fathoms or some deeper.

Mr. BRYAN. Oh, at its greatest depth the harbor is 100 fathoms, but there is ample anchorage ground of reasonable depth.

Mr. MOORE. That is what I am after. If the depth of water is as great as indicated, which I understand to be as much in certain places as 600 feet, perhaps it is not a good place for vessels of the Navy to attempt to anchor.

Mr. FALCONER. I will say that we have all the anchorage ground necessary at Puget Sound. Not confining my remarks particularly to the bay in front of Bremerton, but of Puget Sound, there is anchorage ground enough for all the navies of the world.

Mr. MOORE. You have Lakes Union and Washington running off from Puget Sound?

Mr. FALCONER. Oh, no; not running off from Puget Sound; but there are several lakes inland, and we are building a canal connecting them.

Mr. MOORE. For a harbor?

Mr. FALCONER. Not necessarily for a harbor, but for the best fresh-water harbor in America. Now, I want to say to my friend from California [Mr. CURRY] that I have no objection to appropriations being made for San Francisco Harbor or for the Mare Island yard, but for the information of the gentleman from California and other Members of the House I want to give some statistics about the relative cost of dry docks in the Mare Island and Puget Sound yards.

Dock No. 1, Mare Island, started in 1872, completed 1891; time 19 years. The length is 507 feet, entrance width 80 feet 6 inches, draft of clearance 24 feet 5 inches. The cost was $2,772,000. Foundation, earth; material, concrete and granite.

Dock No. 1, Puget Sound, started 1892, completed 1896; time 4 years. Length, 636 feet, entrance width 92 feet 8 inches, draft of clearance 29 feet 4 inches. The cost was $632,636.33.

Dock No. 2, Mare Island, started 1899, completed 1910; time, 11 years. Length 740 feet, entrance width 101 feet 11 inches, draft of clearance 29 feet 9 inches. The cost was $1,679,655.80.

Dock No. 2, Bremerton, started 1908, completed 1912; time, 4 years. Length 827 feet 6 inches, entrance width 123 feet 9 inches, draft of clearance 35 feet. Cost $1,863,000.

Regarding a dry dock for the handling of large vessels, I want to say that this bay fronting Bremerton is of magnificent proportions, and, as I have said, no silt is deposited by any stream, and where the tide rises and falls without any perceptible current, permitting the docking of vessels at any time. The water is always clear; no coating of mud is left in the dock or clogs up the sea valves of the vessels, and that is quite a factor. There is sufficient depth of water to allow the largest dreadnaughts to dock at low tide. There is every reason why we should consider the advisability of appropriating money for a dry dock in Bremerton at the proper time.

A NAVAL OFFICER'S OPINION.

Lieut. A. B. Wyckoff, United States Navy, retired, the first commandant of this yard, and a man who, by his long and active service, both on Puget Sound and in California, is qualified to judge the comparative merits of this and other locations, recently wrote as follows:

With the completion of the Panama Canal there will undoubtedly exist a necessity for another dry dock upon the Pacific coast, as even in times of peace the great fleet of battleships will spend at least half of every year upon the Pacific. The only other accessible place besides Puget Sound, with perfect defensibility, is San Francisco Bay. The Mare Island Navy Yard is not a suitable location because of the narrow and shallow channel. Even the expenditure of large amounts of money in dredging will not maintain a constant depth on account of the freshets in the Sacramento River and Napa Creek bringing down enormous amounts of alluvial matter held in suspension until it meets the tides of the heavier salt water at this point, when it is deposited. To locate a dry dock elsewhere on San Francisco Bay would necessitate the spending of millions in buildings and machinery to make it effective.

As the Hon. Joseph Cannon has so tersely expressed it when he said, "God Almighty made that location for a navy yard," the present location of the Puget Sound Navy Yard is perfect. It consists of over 200 acres of land, including the filled-in area, with a large level basin at each end suitable for docks and shops, and higher land in the center for residences, barracks, etc. The first dry dock never having settled the hundredth part of an inch shows that no better location could be found for such structures. The front of the yard is over a mile in length.

Mr. Chairman, the Puget Sound Navy Yard, at Bremerton, should command the special attention of this Congress. The great Pacific is the coming center of the commerce of the world. Bremerton has every natural advantage as regards distances to Japan, China, and Manila, and is in close proximity to Alaska. Transcontinental railroads, several in number, connect Puget Sound with the Great Lakes and the Central States at a minimum distance.

The character of the service rendered by the workmen at the Puget Sound Navy Yard should command the attention of the Navy Department and result in giving much repair and construction work to Bremerton. The economics involved demand it. Sir, Bremerton is the last word in navy-yard advantages.

[Mr. BRYAN was given leave to extend his remarks in the RECORD.]

Mr. CURRY. Mr. Chairman, there is no doubt that the harbor at Seattle is a splendid harbor. I do not think anyone has controverted that. No doubt they have got a splendid dry dock at Bremerton. They have the only dreadnaught dry dock on the Pacific coast. I would like to see it protected. There is no reason why some of the great dreadnaughts that come to the Pacific coast should not go up there for dry docking.

I hope they will, but when the gentleman says that a battleship never has and never can get up to the Mare Island Navy Yard he is saying something that I think he knows very little about. Of course it has been said, and an erroneous impression deliberately created, that they could not get up to the Mare Island Navy Yard, but during the time of the visit of the fleet to San Francisco the *Missouri*, when she was in San Francisco Bay, broke her cylinder, and she had to get to the yard. She went up to the yard, and she did not strike the mud or stick in the mud, but she was put on the dry dock, and she was repaired, and was slid off into the channel, and later sailed off into the ocean. Since then other battleships, as well as Army transports, have been up there. There is not a ship in the American Navy that can not without trouble, without injury, without danger, get to any part of the Mare Island Navy Yard now. As I said before, the deepest ships draw only 28 feet 10 inches of water, and at high tide, up to the dock now and beyond and half way up by the yard, the depth of water is 36 feet. The naval engineer at the yard, Mr. McKay, states that after this dredging is completed the channel will more than likely scour itself out 5 feet deeper. Fifty years ago the old *Independence* was taken up to the Mare Island Navy Yard at low tide, and she drew 31 feet of water. We have as good a yard as there is in the United States. With the exception of Bremerton, there is only one other yard that has a greater depth of water leading to it. There is not a great yard in the United States that has not had three or four times as much money expended upon it in dredging, and there is one place now that they are dredging to try and get a 35-foot channel. A great many million dollars have been expended upon that, and ought to be, but when they say that the Mare Island Navy Yard is not a

first-class yard, I think they are talking contrary to what the experts believe. I know they are talking contrary to what experience has demonstrated.

The CHAIRMAN. The time of the gentleman from California has expired. All time has expired. The pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

Naval station, Narragansett Bay, R. I.: Water-front improvements, $10,000.

Mr. HUMPHREY of Washington. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I have listened with some interest to this discussion in regard to the Puget Sound and the Mare Island Navy Yards. It has been my pleasure to represent the Puget Sound Navy Yard, at Bremerton, for almost 12 years. During that time I have seen it grow from a small station to a great yard. During that time I have seen great improvements at the Mare Island Navy Yard. During that period I have never uttered a word of criticism of the Mare Island Navy Yard upon the floor of this House, and, so far as I know, no man from California has ever uttered a word of criticism of the Puget Sound Navy Yard. I am not one of those who believe that you can help yourself by pulling the roof from your neighbor's house. I do not believe that you can magnify your own importance by criticizing your neighbor. When I look upon the Atlantic coast, commencing at the north and running down, see the yards at Portsmouth, at Boston, at New York, at Philadelphia, at Norfolk, at Charleston, at Port Royal, at Washington, and others that I have not mentioned along the Atlantic coast, I think it quite unnecessary for any argument to be raised between the Representatives from the Pacific coast as to the merits of the yards on the Pacific coast. The fact is there ought to be a dock at Mare Island or somewhere in the vicinity of San Francisco capable of taking care of the largest battleships, and the truth is there ought to be an additional dock at Puget Sound. We should be able to handle the largest battleships at each place, and I have no doubt that this will be the result soon. When they have nine or more yards or naval stations upon the Atlantic coast, can it be possible, after the Panama Canal is completed and the fleet is to be kept half of the time in the Pacific, that any patriotic citizen is going to object to having two yards on the Pacific coast, including Alaska, that are capable of caring for that fleet?

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREY of Washington. Certainly.

Mr. STAFFORD. As I understand it, about five years ago we provided for a large dock at Bremerton to accommodate the largest vessel afloat. Do I understand the gentleman to say that the dock will not accommodate the largest battleship?

Mr. HUMPHREY of Washington. The gentleman did not correctly understand me. I say there is one there, and there ought to be another. I think the smaller yard can handle all of the vessels afloat, possibly not the dreadnaughts. We have two docks at Bremerton that can handle battleships. The smaller, the old one, did handle them when the fleet made its trip around the world. As a man who is interested in the growth of the Navy, and in Puget Sound, I must say that I deprecate the arguments that have come up with regard to the merits of the two yards on the Pacific coast. I especially do that, because in all of the years that I have been here, this is the first time the question has ever been brought to the attention of the House, and I think I can say that in all the years I have been here I have never urged anything for the State of Washington when I did not receive the assistance of the entire delegation from California. I have hoped that that good spirit and feeling might continue, and that all the Representatives from the Pacific coast, on all meritorious propositions, could stand as a unit. Especially ought that to be true when we think of the small representation we have as compared with the Atlantic coast.

Mr. CURRY. Mr. Chairman, I think I can say to the gentleman that he will never find any Member from the California delegation who will not do everything in his power to assist the gentleman or the people of Washington or the Northwest in doing what they can for the Bremerton yards.

Mr. HUMPHREY of Washington. I have always thought so. I do not want to be misunderstood. I think perhaps my colleagues are a little overenthusiastic. I do not think either of them will ever be found wanting in any assistance the gentleman may need for the Mare Island yard. I am very sorry this criticism of the two yards came up. I can not see how any possible benefit to either of the Pacific coast yards can come from it.

Mr. MADDEN. It may help the rest of us to vote intelligently when we come to vote for what they want.

Mr. BRYAN. Oh, they do not want intelligence for river and harbor matters.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. IGOE having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12235) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes.

The message also announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 5148. An act for the reinstatement of Lieut. Col. Constantine Marrast Perkins to the active list of the Marine Corps.

NAVAL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Naval station, Guantanamo, Cuba: Quarters for civilian employees, $8,000; recreation building for enlisted men, $30,000; in all, $38,000.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word. I want to say in regard to this apparent rivalry between the navy yards of the Pacific coast that we need both yards, and we need still others. When it comes to a discussion of the harbors on the Pacific coast, the gentleman from California [Mr. CURRY] and my colleague from Washington [Mr. BRYAN] have overlooked the daddy of them all, Grays Harbor, the discovery of which saved all of the Northwest to the United States; Grays Harbor, where the great bulk of the greatest tract of virgin timber owned by the United States will go to sea in the course of time. Why not fortify Grays Harbor? That important port is not mentioned in this bill. It is not mentioned in the Army fortifications bill, but all the boards of strategy of the Navy and Army mention it as a port which is most in need of defense. The War College has so reported, and the Army maneuvers have so demonstrated. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. BRYAN. Mr. Chairman, I observe the words of my colleague [Mr. HUMPHREY of Washington] in his suggestion that he deprecates the fact that some word of criticism was expressed here, which means, of course, he deprecates what I said. My idea about the Puget Sound Navy Yard is to get for it what is coming to it. As an institution of this Government it should stand strictly on its merits, and if the Puget Sound Navy Yard can not be maintained as a Government institution strictly on its merits without having this arrangement with Mare Island of "I tickle you and you tickle me," then it ought to go out of existence. I believe there ought to be some intelligence given Congress on these subjects and that they ought to be discussed on their merits in place of operating under the old river and harbor idea of dividing up the spoils, the "you help me and I will help you" method of dealing with appropriations. [Applause.] I am willing to go back to the people of Bremerton and Charleston and Port Orchard, and it so happens my colleague and I both represent this navy yard here on this floor, but, to the misfortune of one of us, we can not both represent it any longer. The legislature has reapportioned the State, and the people are going to pluck one of us from this firmament at the next election. But, as I said, I am willing to go to the people of these navy-yard towns and the people of Seattle and say that hereafter, if I am elected to Congress, I am going to stand for the Puget Sound Navy Yard getting what it is entitled to, and nothing more.

I am going to oppose giving to the Mare Island Navy Yard and the Union Iron Works, San Francisco, or any other institution, any more than that to which they are entitled. After a million dollars is expended on a channel and the channel is not then deep enough to take a dreadnaught or a ship useful in the present Navy, it ought not to be called a first-class navy yard. And if Puget Sound is not better equipped by nature than that, if Puget Sound does not come up to the requirements that ought to be made of a strictly first-class yard, then the Puget Sound yard ought to be wiped out and one created at Hunters Point, San Francisco, or somewhere else——

Mr. MADDEN. Grays Harbor.

Mr. BRYAN. Grays Harbor or anywhere else. That is what I stand for, that is my position. I do not want for a moment to have the gentleman from Mare Island think there is any unpleasantness here or any desire to criticize on my part. I

want the Mare Island yard and the people of Vallejo to prosper. It is a conviction of duty with me. I believe that the Puget Sound Navy Yard is recognized by every man who has ever gone out there as being a yard of first-class proportions, and that the Mare Island Navy Yard is not and can never be equipped to handle big vessels, and when you talk about establishing a dreadnaught dry dock at Mare Island Navy Yard you are talking about an absurdity, and I am going to tell the Congress that every time the matter comes up here, and we must not proceed any more on the you tickle me and I tickle you basis in getting these yards cared for. Puget Sound has had enough of that kind of benevolent understanding. The workmen of Bremerton and the people of Bremerton and Seattle have been beat right along at that kind of a game.

Mr. MADDEN. The proper place for a navy yard is right out in the center of the United States at Chicago, where we have plenty of water.

Mr. BRYAN. Here are some figures furnished upon request by Assistant Secretary Roosevelt under date of April 29, 1914:

Cost per year of dredging the channel leading to navy yard, Mare Island, from July 1, 1904, to March 31, 1914, was as follows:

Fiscal year:	
1905	$166,812.13
1906	86,299.53
1907	80,208.84
1908	26,819.95
1909	11,833.99
1910	135,133.35
1911	111,448.71
1912	171,635.45
1913	25,167.60
1914	218,379.18
Total for 10 years, as shown by Navy Department	1,033,738.73

The cost of repairs to ships at navy yards, Mare Island and Puget Sound, for the past 10 years were, respectively, as follows:

Fiscal year.	Navy yard, Mare Island.		Navy yard, Puget Sound.	
	Repairs to ships title D.	Construction of new ships title A.	Repairs to ships title D.	Construction of new ships title A.
1904	$573,924.78	$186,826.05	$425,854.69	$35,211.20
1905	656,680.98	308,935.75	448,330.17	33,761.42
1906	653,549.13	46,433.40	254,536.92	21,827.68
1907	543,999.71	99,803.98	233,651.24	16,930.40
1908	732,103.85	764,136.96	878,549.39	57,549.15
1909	938,043.78	581,136.35	864,356.44	12,055.55
1910	1,418,441.80	263,142.00	1,052,601.46	.....
1911	1,395,906.31	2,704.57	1,100,468.57	.....
1912	1,105,236.96	608,276.06	894,353.62	.....
1913	758,162.08	756,122.42	706,855.97	.....
Total	8,776,108.39	3,617,517.55	6,859,558.47	117,335.40
Grand total, repairs an construction	.....	12,393,625.94	.....	7,036,893.87

The total cost of the last dry dock built at Puget Sound was $2,298,646.88.

Let my colleagues and let the people of the first congressional district notice these grand totals:

Mare Island Navy Yard		$12,393,625.94
Puget Sound Navy Yard		7,036,893.87
Difference in favor of Mare Island		5,356,731.07
It will be observed that there was spent for river improvement at Mare Island during same period, as shown in Navy Department reports		1,033,738.33
But there should be added to these river improvements the following, which the Chief Engineer in the War Department reports:		
1906	$53,000	
1911	400,000	
1912	122,000	
1913	278,000	
1914	40,000	
		893,000.00
Making total for hydraulics in 10 years at Mare Island		1,926,738.33
Recapitulation.		
Received from Federal Government by Mare Island in 10 years for "improvement of hydraulics"		$1,926,738.33
For repairs to Navy vessels		8,776,108.39
For construction of new Navy vessels		3,617,517.55
Total for 10 years, exclusive of appropriations to establish and equip the yard with buildings, tools, dry docks, etc		14,320,364.27
Received from Federal Government by Puget Sound for same purposes		7,036,893.87
Difference in favor of Mare Island		7,283,470.40

Here you have the milk in the coconut. Mare Island has received a little more than a quarter of a million more than twice as many dollars as the Puget Sound, notwithstanding the fact that there is no sort of comparison as to natural facilities. If this sum had been even divided in half, the Puget Sound yard would have obtained over three millions more than we have received.

Yet my colleague [Mr. HUMPHREY], who has been a Member of this House every minute of the 10 years referred to, deprecates my statements made to-day in an effort at fair play, and boasts that he has never had a word to say against Mare Island and Mare Island has never had a word to say against Puget Sound.

There is going to be said a few things from now on. I know such a policy can not get worse results than the "let us work together" scheme of California's shrewd delegation in this House and in the Senate. If the people do not like the way I represent them they will keep me at home next fall. I have just about as much fun there as I do here anyway.

But there is another feature of this case. The yard which gets the ship to repair gets the increased local business from caring for the fleet. In this way large sums of money have been held in San Francisco and Vallejo that ought to have gone to Seattle, Bremerton, and Charleston.

Pitiless publicity is what the Puget Sound Navy Yard wants, and if Mare Island does not want the same thing let the friends of that yard quit trying to make the yard try to shoulder a bigger load than it can shoulder.

If California wants to establish a new yard at Hunters Point where battleships and dreadnaughts can be repaired and docked, then that is another thing, and we will meet that issue squarely and fairly. I hope such an effort will fail.

Mr. MANN. Mr. Chairman, it is refreshing to get the truth once in a while. This morning we had the Virginia Representatives tell us the truth about Philadelphia, and Philadelphia did not get a building slip. Then we had the Philadelphia Representatives tell us the truth about Norfolk, and the Norfolk yard did not get an addition. Now we have the gentleman from Washington tell us the truth about Mare Island. If we only could proceed far along enough to get the Mare Island people to tell us the truth about Puget Sound, we might properly send a navy yard to Unalaska or some other proper place for it.

Mr. JOHNSON of Washington. Grays Harbor.

Mr. MANN. For years I served on the committee that had to do with aids to navigation, and these gentlemen from Puget Sound said how it was impossible for any vessel safely to go into Puget Sound and get to any anchorage place, because there were not sufficient aids to navigation; that the aids to navigation were very few in that territory covered with fog night and day.

Mr. BRYAN. Will the gentleman yield?

Mr. MANN. No; the gentleman has occupied enough of the time of the House to permit me to proceed for a moment.

Mr. BRYAN. All right.

Mr. MANN. Now we are getting gentlemen to tell us the truth about other places.

Mr. HUMPHREY of Washington. The gentleman does not mean that I was here at the time that occurred. I do not want the committee to get the impression that I went before the committee, because I never did.

Mr. BRYAN. That is what I wanted to get at; that if my colleague would stand for it then, I will not stand for it now.

Mr. MANN. Oh, but gentlemen have come asking for additional aids to navigation on the ground you could not enter.

Mr. BRYAN. If the gentleman will name a responsible and reliable officer or mariner who will make that statement, I will make an extra donation to the marriage fund.

Mr. MANN. For years they have been begging and praying and imploring and threatening and everything else to get additional aids for navigation, saying it was not safe to get a vessel in and out of Puget Sound, and if the gentleman has not discovered it he is not properly representing his district.

Mr. BRYAN. The statements are not true. The gentleman puts it too strong. We, of course, want buoys and aids to navigation, but it is not correct as the gentleman states it. He misstates the facts.

Mr. MANN. I do not.

Mr. MADDEN. What good are lighthouses in fogs?

Mr. MANN. They want lighthouses, fog signals, bells, and seagoing tugs. They want submarine signals also.

Mr. BRYAN. That is on the ocean.

Mr. MANN. They have stated to us that a lighthouse was not sufficient, because you could not see a light; that the fog signals were not sufficient, because the sound from a fog bell would jump over the fog, but that you had to get a submarine signal so that you could be sure of getting a sound so that a vessel could come into the Sound. And this is the harbor that the gentleman tells us is the greatest and finest harbor in the world.

The gentleman from Washington says it does not go on the principle of "you tickle me and I will tickle you." No; he wants the whole thing. He is not asking you to put the dock where it properly belongs; he is not asking you to find the best place to put the dry dock or to choose the best harbor. He is asking you to put it in his district. He wants the whole thing. I think it would be a good idea for us to judge these things on their merits and cut out most of them. [Applause.]

Mr. JOHNSON of Washington. Mr. Chairman, I renew my request for unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Leave was granted to the gentleman.

Mr. STEPHENS of California. Mr. Chairman, I move to strike out the last two words.

Mr. PADGETT. Will the gentleman yield for just a moment?

Mr. STEPHENS of California. Yes.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that all debate on the pending paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. STEPHENS of California. Mr. Chairman, I have the honor to represent the Pacific coast on the Naval Committee. Neither of the navy yards that have been talked about for the last few minutes is in my district. The nearest one, Mare Island, is 500 miles away, and Bremerton much farther. As a member of the committee, I am trying to serve both of those yards, as well as all other navy yards in the United States. My endeavor is to serve them impartially and for the general good of the Nation. I can not agree with the gentleman from Washington [Mr. BRYAN] that the proper and the best way to get what one navy yard deserves is by criticizing some other yard. I think the better plan is to set forth the particular qualifications of one's own yard for the purpose proposed. Personally, I shall favor only that which each yard deserves, whether it be Mare Island or Bremerton. There should not be a dollar spent in either place unless it is believed to be for the best interests of our ships of war.

Mare Island Navy Yard has cost the Government something like $14,000,000, and it is but a plain business proposition to further improve it as recommended by the Navy officials.

There seems to be no question in the mind of many eminent engineers that a little more dredging will enable Mare Island to take care of the deepest draft vessels that are to come through the Panama Canal. The contract for this dredging has been let. There is no reason why it should not be completed, and so have the matter determined as to whether or not a larger dry dock can be located advantageously at Mare Island.

Mare Island can now be reached by most of our vessels at any hour day or night, and by those of deepest draft at high tide. Complete the dredging project there, and the very largest dreadnaught can easily and readily dock for repairs.

Mr. Chairman, I was much impressed with the navy yard at Bremerton when I visited it last November. We should all be proud of it and be ready to meet all reasonable requests for appropriations for it. The Government needs both yards, and we should adequately equip them for every use the Government may have for them.

Mr. MOORE. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

Mr. PADGETT. Let us take up the next matter first. Let us read some.

Mr. MOORE. Very well.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Naval station, Pearl Harbor, Hawaii: Four officers' quarters, $20,000; to complete torpedo-boat slips, $50,000; in all, $70,000.

Mr. MADDEN. I wonder whether or not "to complete torpedo-boat slips" would not be subject to a point of order, as it has been on all other matters to which it had reference? I suggest a point of order against the words "to complete torpedo-boat slips."

Mr. PADGETT. This means berthing places for the torpedo boats.

Mr. MADDEN. That was what the other was.

Mr. PADGETT. No, sir; the other was for building slips. These are slips that are in the water, for the berthing of torpedo boats. It is work in progress, and this is to complete it.

Mr. MADDEN. This is a slip in which you may berth a ship?

Mr. PADGETT. Yes.

Mr. MADDEN. And not a pillow slip? [Laughter.]

Mr. PADGETT. No, sir; nor a slip of the tongue. [Laughter.]

The Clerk read as follows:

The limit of cost of the dry dock at the naval station, Pearl Harbor, Hawaii, is hereby increased to $4,986,500.

Mr. HENSLEY. Mr. Chtirman, I make a point of order on that.

Mr. PADGETT. I hope the gentleman will not do that. It is subject to a point of order. The gentleman knows it is the fact that there has been a mishap out there. The bottom of the dock was blown up. We have a project there, the building of a naval station that controls the Pacific Ocean, and essential to our proper defense of the west coast, involving, according to the estimates that have been submitted and the program which Congress has been following for five or six years past, about $10,000,000. And in order to complete this dock, about which all the rest of the enterprise centers, it will be necessary to increase this limit of cost.

Mr. HENSLEY. Now, Mr. Chairman, in explanation of the position which I take upon this proposition——

The CHAIRMAN. The Chair is ready to rule if the gentleman makes the point of order.

Mr. PADGETT. Does the gentleman insist upon the point of order? It is subject to a point of order. It is not necessary to argue that.

Mr. HENSLEY. I insist upon the point of order.

Mr. MANN. Will the gentleman reserve it for a moment?

Mr. HENSLEY. I simply wanted to explain the amount of money we have expended on that. And I have very substantial reasons for insisting on the point of order. However, I will reserve it.

Mr. MANN. Mr. Chairman, I do not know the details as the gentleman from Missouri and other members of the Naval Committee will know them, but I know the map, as we all do.

The Hawaiian Islands control the Pacific Ocean. It will not be many years until the Atlantic Ocean will be like the Mediterranean Sea used to be, as compared with the commerce of the world. The commerce used to be on the Mediterranean Sea. Now it is in the main on the Atlantic Ocean. It will not be many years until it is largely transferred to the Pacific Ocean, as the oriental races really wake up; and I take it that there is no process in the world now, so far as race is concerned, more rapidly going on than the awakening of the Chinese.

We have control of the Pacific Ocean from the Hawaiian Islands. If there is any place that we ought to keep absolutely and unquestionably in our power, it is the Hawaiian Islands—Pearl Harbor. [Applause.] There never ought to be any doubt about our absolute command of Pearl Harbor. I do not know what may be necessary to be done there. Every one knows, however, that eventually they must have a dry dock there if the place is maintained as a naval station ought to be maintained.

I have joined with the gentleman from Missouri [Mr. HENSLEY] in advocating his peace resolution. I never have been an ardent advocate of a great increase in the Navy. But if ever I am called upon to part company with my distinguished friend from Missouri [Mr. HENSLEY] on the question of peace and the question of the Navy, it will be when he objects to our maintaining our supremacy, both of race and Nation, by our command of the Pacific Ocean, which lies at Pearl Harbor. [Applause.] And if the gentleman insists upon driving me away from him, I will part company from him with no pleasure to myself, but I will part company, nevertheless, and then join with the big-navy advocates. If the people who do not agree on having an extremely large Navy still have to join with those who do believe in it in order to protect the Nation in the Pacific Ocean, we will have to go together—that bunch of us—with the big-navy crowd.

Mr. GARNER. Mr. Chairman, will the gentleman yield?

Mr. MANN. Yes.

Mr. GARNER. I agree with the sentiments expressed here by the gentleman from Illinois. I wanted to ask the gentleman a question with reference to the population of Hawaii, whether it is safe now under the present conditions with respect to their patriotism toward this country?

Mr. MANN. I feel satisfied that we have now protection at Pearl Harbor if we proceed with the plans that we have, and that we can maintain Pearl Harbor against the world for a short time. But we can not maintain it permanently without a dry dock.

Mr. GARNER. But if the population itself in Hawaii is against this country, and we should have trouble, and an uprising should occur, what is the status of Pearl Harbor?

Mr. MANN. Well, Pearl Harbor is still protected by an army, in my judgment.

Mr. BATHRICK. Mr. Chairman, will the gentleman yield there?

Mr. MANN. Yes.

Mr. BATHRICK. The gentleman knows also that if this increase is refused, an increase made necessary by changes required in construction, all the money already expended will have been wasted there and the whole project will be stopped?

Mr. MANN. I do not know anything about the details. I do not want to make any criticism. I simply wanted to relieve my feelings a little, because I believe that the future conflicts we will be engaged in will not be on the Atlantic Ocean, but upon the Pacific. In the course of time—how soon it will come nobody can tell; I hope it is hundreds of years away; but no one knows—but in course of time when you bring together two races, each moving in an opposite direction, when you bring them against each other there is an inevitable conflict of some kind. It may be commercial, or it may be warlike. Whichever it may be, we ought to be ready to protect ourselves, our civilization, our race from anyone else. [Applause.]

Mr. HENSLEY. Mr. Chairman, will the gentleman yield for a question?

Mr. MANN. Certainly.

Mr. HENSLEY. The gentleman realizes, of course, the amount of money that has already been expended upon the dry dock there?

Mr. MANN. Yes.

Mr. HENSLEY. The gentleman certainly would not insist upon more money being expended on the dry dock there than is absolutely necessary?

Mr. MANN. Of course I would not; but "absolutely necessary" is "necessary." I will say this to the gentleman——

Mr. PADGETT. This item, Mr. Chairman, does not appropriate one dollar. It simply increases the limit of cost.

Mr. MANN. Of course it involves more money. Do not let us hide behind that. In effect it means more money.

Mr. PADGETT. Yes; but the appropriations are still within the control of Congress. I had a conference this morning with Admiral Stanford, and he told me they had plans under which satisfactory results were being worked out. He said to me that he hoped they would be able to complete the work well under the amount provided for by this increased limit of cost, but that he thought it well to have this limit of cost increased, so that they would not have to come back to Congress again.

But, as I said before, everything revolves around and depends upon this dock. If we do not have a dock at Pearl Harbor we might as well abandon the station, because the repair shops, the machine shops, and everything else depend wholly and absolutely upon having a dock there to make them available, and I do beseech the gentleman from Missouri that he will not tie up an enterprise involving $10,000,000 that has been progressing along—an enterprise of the imperative and overwhelming importance of this matter, on this occasion, by making a point of order.

Mr. HENSLEY. The gentleman well recalls the fact that I called his attention to this item when the matter was before the Committee on Naval Affairs, and then and there I made it plain that if there was not some explanation made with reference to the matters I called the gentleman's attention to I would be compelled to raise a point of order to this item.

Mr. PADGETT. The question was whether or not the dock could be built for a certain amount, and I said to the gentleman that from the information I had it could not be built, but the amount to be appropraited will come along. It is necessary for the department to have an opportunity to deal with this question.

Mr. HENSLEY. Mr. Chairman, I make a point of order on that.

Mr. HENSLEY. Mr. Chairman, I desire to say that I appreciate full well the importance of this matter. I appreciate full well the force of the argument made by my friend from Illinois [Mr. MANN]. I understand that he looks upon this as being a very serious move, but I undertake to say here and now to the membership of this House that if the gentleman from Illinois were apprised of the facts as I have been apprised of them, if he understood the situation as it has been explained to me, he would not sit silently by and permit this item to go through in the bill. I am acting advisedly. I do not believe this item is right. I have been advised that beyond any sort of question the construction company would have completed this dry dock for $500,000. It seems, indeed, peculiar to me that all these years we have continued increasing the limit of cost for this dry dock. The first authorization will be found in the appropriation bill of 1908. A limit of cost not to exceed $2,000,000 was placed in the bill. The limit of cost was increased to $2,700,000 in 1910. In 1912 it was further increased to $3,486,500. It is sought by this bill to further increase the limit to $4,986,500, representing an increase of $1,500,000 in the present bill.

Mr. ROBERTS of Massachusetts. Will the getleman yield for a question?

Mr. Hensley. Yes.

Mr. ROBERTS of Massachusetts. Will the gentleman tell the committee why that increase was made?

Mr. HENSLEY. I am not going into that. The gentleman from Massachusetts can explain these matters to the committee in his own time.

Mr. BATHRICK. No; pending the point of order.

Mr. ROBERTS of Massachusetts. If the gentleman wants to go on giving a false impression, he can do it.

Mr. HENSLEY. It is not my purpose to make any false impression upon the minds of the members of this committee. I say the gentleman can explain these things if he desires.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. HENSLEY. I certainly will yield.

Mr. MADDEN. The gentleman has stated that he has information which leads him to believe that his attitude is the correct attitude for him to take.

Mr. HENSLEY. Absolutely.

Mr. MADDEN. I think it is not fair to the House for him to make that statement and then leave unsaid what ought to be said as to the reasons.

Mr. HENSLEY. There are some things that the Navy Department regards as being against public policy to reveal. On some occasions and under certain circumstances it is necessary for a Member of this House to make reservations in connection with certain facts of which he has been apprised.

Mr. CALLAWAY. Will the gentleman yield?

Mr. HENSLEY. Yes; I yield to my friend from Texas.

Mr. CALLAWAY. Does the gentleman mean to say that the reason for increasing this limit of cost is a secret known to the committee?

Mr. PADGETT. No.

Mr. HENSLEY. I do not mean anything of the sort.

Mr. CALLAWAY. Does the gentleman mean to say that there is any reason why the House should not know all about this?

Mr. HENSLEY. I mean to say, Mr. Chairman, that, beyond any sort of question, I have facts sufficient to satisfy me in making the point of order.

Mr. CALLAWAY. But the gentleman from Massachusetts [Mr. ROBERTS] certainly knows whether it is a secret that the committee is not disposed to give out as being against public policy. The gentleman from Massachusetts has made the statement here that the gentleman from Missouri ought to give the reason.

Mr. HENSLEY. It refers to the condition of the work there and why these amounts have been increased from year to year. The gentleman from Massachusetts can detail those facts to the committee, if he desires. I intend to insist upon the point of order.

Mr. BATHRICK. Will the gentleman yield for a question?

Mr. HENSLEY. Yes.

Mr. BATHRICK. Does not the gentleman know that the reason the increase has been made from time to time is because there is a peculiar chemical situation there?

Mr. HENSLEY. I am as familiar with those facts as the gentleman from Ohio.

Mr. BATHRICK. The water contains chemical ingredients which have affected the cement.

Mr. HENSLEY. I certainly understand that.

Mr. BATHRICK. That is one of the reasons why this increase has been demanded from time to time.

Mr. HENSLEY. I insist, Mr. Chairman, that this item is unwarranted. The adverse conditions recited by the gentleman from Ohio constitute no reason why this bill should carry an increase of $1,500,000, since a certain construction company, fully apprised of all these facts, would have performed the same service for $500,000, as I have reason to believe from information which I have received.

Mr. PADGETT. Will the gentleman yield for a question?

Mr. HENSLEY. Yes.

Mr. PADGETT. Will the gentleman waive the point of order and let the House vote upon the amount? The gentleman can offer an amendment to reduce the amount, if he wants to, and let the matter come before the House.

Mr. HENSLEY. I have in the past had some experience with reference to a certain request to go back and recur to an item.

Mr. PADGETT. I do not ask to go back and recur; but will the gentleman just waive the point of order and offer an amendment? If this is not the right amount, let the gentleman offer an amendment to reduce it.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. HENSLEY. I yield to the gentleman from Illinois.

Mr. MADDEN. Is the gentleman in possession of information which leads him to the conclusion that this is not a legitimate appropriation or a legitimate authorization, and that somebody is getting something he is not entitled to as the result of this authorization? I think the House ought to know.

Mr. HENSLEY. I will say that, in my judgment, at least, $1,000,000 of the amount carried in this bill is absolutely unwarranted.

Mr. MADDEN. For what reason? We are all anxious to do the right thing.

Mr. HENSLEY. You may be anxious——

Mr. MADDEN. We are all anxious to do the right thing, and if the gentleman has information he ought to give it.

Mr. HENSLEY. I called the attention of the chairman of the committee to this fact, and I besought him at the time to investigate this proposition, but I was not permitted to inquire into the matter, and I never got an opportunity to have these facts detailed before the committee so that we all might have the information.

Mr. MADDEN. If the gentleman has information which will help the members of the committee in reaching the right conclusion, does he not think it is a public duty to give that information to the Members, so that they may be able to decide the question as it ought to be decided?

Mr. HENSLEY. Probably that is the way the gentleman from Illinois would have it.

Mr. MADDEN. I certainly would.

Mr. HENSLEY. Then I will say to the gentleman that as a public servant, measuring distances and trying to do my full duty, I have information which, to my judgment, warrants me in insisting upon a point of order against this item.

Mr. PADGETT. Will not the gentleman waive the point of order and offer an amendment to reduce the amount to what he thinks it ought to be, and let the House pass upon that question?

Mr. HENSLEY. I am willing to have an agreement to adopt the amount of $500,000 in lieu of the $1,500,000 carried in the bill.

Mr. PADGETT. I am not asking the gentleman to agree to any amount. I am asking him to offer an amendment for such an amount as he thinks this sum should be reduced and let the House pass on it.

Mr. HENSLEY. And reserve my point of order?

Mr. PADGETT. Oh, no; the gentleman can not reserve his point of order and have a vote, too. The point of order must be waived.

Mr. HENSLEY. I will not do that. I must insist upon the point of order against this item.

Mr. UNDERWOOD. Mr. Chairman, I desire to address myself to the point of order, but really more to the merits of the case, if the House will pardon me. I recognize the fact that I shall be proceeding out of order. I wish to say in reference to this case that I do not believe that this item ought to stand in the bill as it is reported by the committee, if my understanding of the case is correct. Of course I have not had the opportunity to give full investigation to this matter, but some information has come to me in reference to it. The information I got in reference to this dry dock is that Congress made the original appropriation; I do not recall the exact amount.

Mr. MADDEN. Two million dollars.

Mr. UNDERWOOD. The gentleman says $2,000,000. The engineers in the Navy were proceeding to build the dry dock. They were having some difficulty with the bottom of the dry dock on account of the pressure coming from below; that during the process the contractors, not acting with the advice of the engineer in charge, withdrew the water from a portion of the dry dock inopportunely and the dry dock blew up from below.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. UNDERWOOD. I do not want to yield now. The gentleman from Massachusetts may be better informed than I am.

Mr. ROBERTS of Massachusetts. I wanted to point out where the gentleman from Alabama is in error.

Mr. UNDERWOOD. The gentleman can give the House his information in his own time. I am giving the House the information that I have, and I think it is correct. As I say, the bottom of the dry dock moved up from below, and then the order was given that they should cease work. An investigation was made and a board of inquiry was sent out there to determine whether that dry dock could be rebuilt according to the original plan.

My understanding is that the engineer in charge of the dry dock reported that it could be rebuilt according to the original plans with some modifications. In other words, that they would have to change the form of putting down this concrete bottom, and that the contractors by that change and modification would not have been released from their contract. I understand that a high authority was called in by the Navy Department, and, although that engineer authority stated that other plans might be better and more costly, that it was practicable and feasible to carry out the plans of the engineer who had the matter in charge. I understand, more than that, that it will probably cost this Government a million dollars more to adopt these new plans and release the contractors than it would if the original plans were carried out along the lines of the proposal of the engineer who had the matter in charge.

That information has come to me, but I have had no time to investigate it thoroughly. I believe it is a serious matter. I believe it should require a more full investigation on the part of the committee of the House. I think the House ought to strike the item out, and the gentleman from Missouri ought to insist on his point of order, so that the bill will go to the Senate with the item out, and let the Senate committee fully investigate it, with the option of the House to pass upon it when it comes back from conference.

Mr. HENSLEY. Mr. Chairman, I make the point of order.

Mr. PADGETT. Will the gentleman reserve it a moment, so that I may make a statement?

The CHAIRMAN (Mr. SHERLEY). Does the gentleman reserve his point of order?

Mr. HENSLEY. I will reserve it.

Mr. PADGETT. Mr. Chairman, when this dry dock was first authorized it was of much smaller dimensions. Afterwards Congress determined to build a much larger and deeper dock and increase the limit of cost. Then there arose troubles with reference to the chemical action of the water, and it became necessary to modify the contract in order to get a stronger cement, and the limit of cost was increased to $3,486,500.

The contractors were proceeding under the contract and, according to the information we have, not in opposition to the engineering chief, but the inspectors and engineers and the contractors worked in perfect harmony. There was no discord and no disagreement. They had laid about 8 feet of concrete base under water and began to pump out the water in a section 200 feet long in the dock. They had pumped the water down to something like 36 feet when the hydrostatic pressure from the outside sea coming through the porous condition of that coral formation of the island lifted the bottom out of the dock. Taking off the top pressure of 36 feet of water above, the hydrostatic pressure was so great coming underneath as to produce this breaking up and shooting up, as it is called, of the bottom of the dock.

Then came the question as to whether or not the construction of the dock could be proceeded with. Admiral Stanford, the present Chief of the Bureau of Yards and Docks, made a visit to Pearl Harbor and made a thorough investigation, as he said, and he reported that in his opinion, with modifications, it could be carried out. The engineers of the contractor submitted their opinion that the original plans could not be carried out and build a successful dock. Thereupon the Navy Department secured Mr. Alfred Noble, one of the most distinguished civil engineers in this country, a man of international repute in civil engineering, to go and make an investigation. Mr. Noble did so and submitted a report. His report stated that it might be possible, with extraordinary care, to construct a dock according to the original plans, but that he would not advise the attempt to construct the dock according to the original plans. He said he doubted very substantially that if the dock was completed it would be a substantial and workable dock after it was completed.

Mr. UNDERWOOD. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. UNDERWOOD. Has the gentleman Mr. Noble's report?

Mr. PADGETT. I have it in my office, but I have not it here.

Mr. UNDERWOOD. Did not the engineer in charge of the dock make a report as to the carrying out of the original plans that would not release the contractor, and did not Mr. Noble, in his report to the department, say that the plans could be carried out and the dock built along that line, although he would prefer a different plan?

Mr. PADGETT. He asserted, and I have the report in my office, that with extraordinary care the dock could be built according to the original plan, but that, as an engineer, he would advise that it be not attempted.

Mr. UNDERWOOD. Is the gentleman sure of that in his report?

Mr. PADGETT. I think so.

Mr. UNDERWOOD. My information was that he had advised——

Mr. PADGETT. I was going to call attention, therefore I suggested to the Secretary of the Navy that Mr. Noble come here, and he did so. Mr. Noble; Mr. Harris, the man who built Dock No. 4 at New York; Admiral Stanford; Mr. Roberts; and myself were present, and the Secretary and the Assistant Secretary, and there was also a civil engineer whose name I do not now recall who was present in the construction of the dock at Pearl Harbor. We talked the matter over. I asked Mr. Harris a question, If the dock could be built according to the original plans? His answer to that was that he had been designated by the Secretary of the Navy to undertake to construct this dock according to the original plans and that he had written out his resignation and had it then in his pocket to send it to the Secretary of the Navy to retire from the service rather than to undertake to be responsible for the construction of the dock according to the original plans.

Mr. UNDERWOOD. Now, let me ask the gentleman as a matter of fact was Mr. Harris ever in charge of that dock?

Mr. PADGETT. No, sir; but he was named, he was designated——

Mr. UNDERWOOD. He never was designated.

Mr. PADGETT. Yes.

Mr. UNDERWOOD. Mr. Harris's statement merely was that he was appointed——

Mr. PADGETT. No.

Mr. UNDERWOOD. I challenge the gentleman to show any statement——

Mr. PADGETT. That was the statement.

Mr. UNDERWOOD (continuing). To show he ever was appointed.

Mr. PADGETT. I have nothing to show in writing, but I can say what took place there. He stated he had written out his resignation and had it in his pocket to send it to the Secretary of the Navy rather than to assume the responsibility of that dock. Now, then, Mr. Noble was there. I said to Mr. Noble that I wanted to find out about this matter, and I asked him the question if this dock could be constructed according to the original plans, and he stated in that conference that it might be constructed according to the original plans by extraordinary care and great delay. I said to him, "If it is constructed according to the original plans, after it is constructed will it be a workable and substantial dock?" He said he would not so represent it.

Mr. SAUNDERS. Let me ask the gentleman this question——

Mr. UNDERWOOD. Let me say to the gentleman——

Mr. PADGETT. In a moment. We then said to him, "Will you, as a civil engineer, recommend us to proceed with the construction of this dock according to the original plans?" And he said that he would not. I said to him, "Mr. Noble, would you as a civil engineer take the job to build this according to the original plans?" And he said he would not.

Mr. UNDERWOOD. Let me ask the gentleman did not Mr. Noble prepare a plan and submit it to the Navy Department for a rebuilding of this dock without so changing the plans as to release the contractor?

Mr. PADGETT. He submitted the plans; they are here in the report.

Mr. UNDERWOOD. Did not he submit one plan himself to rebuild this dry dock nearly according to the original plans that would not have released the contractors; and would not there have been at least a half a million dollars less in amount of cost than the plan that is proposed in this bill?

Mr. PADGETT. No, sir.

Mr. UNDERWOOD. My understanding is different.

Mr. PADGETT. Here is a copy of the report. He submitted a plan, and they did not follow the original plan. He says nothing about the release or not releasing the contractors in his report. He simply submitted it as an engineering officer, but does not deal with the question of whether the contractors should be held or released.

Mr. UNDERWOOD. Well, now, I will ask the gentleman this: If they had not built this dry dock along the line of the original plan and adopted by Mr. Noble's suggestion about sinking the caissons in there, or boats, or whatever they call them, to the bottom, the contractors would have still to be held to the contract, and it would have cost the Government very much less than to wipe out that contract and make an entirely new contract.

Mr. PADGETT. This does not propose to wipe out the contract.

Mr. UNDERWOOD. It releases the contractors.

Mr. PADGETT. No, sir; it does not.

Mr. UNDERWOOD. Are not you going to make a new contract with the contractors?

Mr. PADGETT. No; this does not say anything about it——

Mr. UNDERWOOD. I know it does not say anything, but does it not contemplate it?

Mr. PADGETT. The Secretary said the idea is to enter into a supplementary agreement, continue this agreement, but put another supplemental or additional to it by which they will agree to a new plan according to the modification of these plans submitted by Mr. Noble and by Admiral Stanford.

Mr. UNDERWOOD. This bill contemplates the making of a new contract with the contractors.

Mr. PADGETT. No; not a new contract, but a modified contract.

Mr. UNDERWOOD. Well, a supplemental contract is a new contract. It wipes out the old contract, and you will pay these contractors for the work they have done up to this time notwithstanding it was inefficient work, and will you not have to make this new contract?

Mr. PADGETT. That is a matter with the department. I do not know how they will adjust that.

Mr. UNDERWOOD. The gentleman is in charge of the bill.

Mr. PADGETT. Yes.

Mr. UNDERWOOD. And I have no doubt he has information on a matter of this importance. Now, these contractors made a contract to build a dry dock according to certain specifications, and they had not succeeded because it blew up at the bottom.

Mr. PADGETT. Now, these specifications did not call for anything according to the plans submitted by Mr. Noble; they were entirely different specifications and different requirements.

Mr. UNDERWOOD. But they accepted a lot of money on work that did not prove efficient.

Mr. PADGETT. That is true.

Mr. UNDERWOOD. Now, the proposition here is that by making a new contract or making a supplemental contract with them you are going to pay them for all the work that they did for the Government without accomplishing the results desired.

Mr. PADGETT. As to whether or not the department will pay them for it, I do not know. But I presume that that matter will be adjusted in the contract. But the question is to get a contract to build the dock, or a lawsuit, or to authorize this man to go ahead with the contract. Now, the Secretary did issue a letter to these contractors to proceed to build this dock according to the original contract, and they replied that they would proceed. But after he held his conference with Mr. Noble, with Mr. Harris and Mr. Stanford present, he modified that and asked these gentlemen to hold up until they could look into the matter further and proceed on a safer basis.

Mr. SAUNDERS. May I ask the gentleman a question now?

Mr. PADGETT. Yes, sir.

Mr. SAUNDERS. This seems to be quite a large item, with many important ramifications to it, and calling for careful inquiry.

Mr. PADGETT. Yes, sir.

Mr. SAUNDERS. And was all this matter that you are describing here brought to the attention of your committee?

Mr. PADGETT. No, sir.

Mr. SAUNDERS. And this item was considered with no knowledge on the part of the committee, outside of what you have described?

Mr. PADGETT. There is a whole lot of it in here.

Mr. SAUNDERS. And the gist of the whole matter is being developed now?

Mr. PADGETT. I have had a number of conferences with the Secretary and Mr. Noble and these men that did not come before the committee.

Mr. SAUNDERS. What I was trying to develop is, when we are entitled to know these things, and information that comes to our committees, whether all of this matter that has just been reported, was laid before the full committee, and developed in the committee, with such inquiries as the full committee desired to prosecute, or, rather, the opportunity given for such inquiry as the committee desired to prosecute and to be prosecuted?

Mr. PADGETT. Many of the things I have mentioned have transpired since the bill was reported and put upon the calendar.

Mr. HENSLEY. Have not these vital things you have gone over transpired when you and Mr. ROBERTS were there only, in spite of the fact that I, as a member of the committee, came to you and wanted information on this subject?

Mr. PADGETT. I told you that I would give you the benefit of everything I had.

Mr. HENSLEY. Why did you not have these parties come before the committee and give the committee the facts as you and Mr. ROBERTS and others have gotten them?

Mr. PADGETT. Many of these facts took place since the bill was reported and put on the calendar.

Mr. SAUNDERS. If we are to be aided in our committee work, ought not that entire committee to have the information that is essential, or that relates to so important an item in the bill as this which we are considering?

Mr. PADGETT. Yes, sir; and they did get the benefit of everything I had up to that time; but because we had additional information, since the committee acted and the bill went upon the calendar, it does not preclude me from giving the House the benefit of everything I have learned since the committee acted upon the matter.

Mr. BUCHANAN of Illinois. Mr. Chairman, I understood the gentleman to state that if the dock was completed in accordance with the present contract—or it was stated by some one—it would not be workable?

Mr. PADGETT. That is what Mr. Noble and Mr. Harris said.

Mr. BUCHANAN of Illinois. Will the gentleman explain why that would not be so? The engineers have planned this dock, and after it is completed as first planned then it will not be workable. Why will it not be?

Mr. PADGETT. It has been stated that the conditions that have developed in the attempt to build the dock have disclosed such conditions there, changes in the soil and so much additional water pressure, that the dock would not have that strength and sufficiency of support to be such a safe dock after it was turned over to the Government as to justify us to put our ships in.

Mr. MADDEN. Was the bottom of this dock intended to be built on caissons?

Mr. PADGETT. To be built within caissons and upon piles.

Mr. ROBERTS of Massachusetts. That is the plan now.

Mr. PADGETT. They had big caissons, going around.

Mr. ROBERTS of Massachusetts. That was a cofferdam.

Mr. PADGETT. That is what I mean.

Mr. MADDEN. That is a different proposition.

Mr. PADGETT. I mean a cofferdam going around, and pumping the water out of it.

Mr. ROBERTS of Massachusetts. They put this concrete on the mud, and when they found it would not stay they modified the plan and put piles there, and with the concrete bedded in about 6 or 7 feet of the top of the piles.

Mr. PADGETT. Four feet.

Mr. ROBERTS of Massachusetts. And it was given out to these contractors that the suction, if I may use the term—the clinging power of the piles—in that mud would hold the concrete down. The contractors went ahead under that statement, and under that supposition and understanding we framed the contract. And when they put in this concrete, to something like 7 feet, the head of the piles being bedded in it to a depth of 4 feet——

Mr. MADDEN. Is that manner of construction provided for in the specifications?

Mr. ROBERTS of Massachusetts. Yes. And they had to build according to those plans and specifications, and in no other way. And when they started to pump out, up came the piles, concrete and all, showing the Government engineers had misled and misinformed the contractors in respect to this foundation. The engineers told me that they did not consider, when they ordered the piles put in there, the holding-down effect of the piles at all, but they merely contemplated the holding-up effect. In other words, the piles would be strong enough to hold the concrete up and no thought was given of any holding down. And they had to admit finally, in answer to my question, that they did contemplate and did understand that there was a holding-down effect of these piles as well as an uplifting effect, and then they explained to me that the piles did not hold down as they thought they were going to do.

Mr. BUCHANAN of Illinois. If we make this further appropriation, what guaranty have we that they will not come in and ask for more?

Mr. ROBERTS of Massachusetts. The plan now proposed will give a suitable foundation for this dock, one that is guaranteed on his reputation by a very high authority on this class of work.

Mr. BUCHANAN of Illinois. Was there any such guaranty before in the contract?

Mr. ROBERTS of Massachusetts. Not beyond six months.

Mr. BUCHANAN of Illinois. There is no end to this appropriation.

Mr. ROBERTS of Massachusetts. The dock will stand indefinitely if built under the plans and specifications as now proposed.

Mr. LINTHICUM. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Massachusetts yield to the gentleman from Maryland?

Mr. ROBERTS of Massachusetts. Yes.

Mr. LINTHICUM. I would like to know what will be the loss to the Government on the work that has already been done and which is of no value?

Mr. PADGETT. It has been estimated to be from three to five hundred thousand dollars.

Mr. ROBERTS of Massachusetts. Between $600,000 and $700,000 is involved in controversy between the contractor and the department. The department officials wrote to the Attorney General recently for an opinion as to who was responsible for the loss, and the Attorney General sent back in answer an opinion, carefully guarded and qualified, to the effect that if so-and-so existed the contractor was responsible. I spent a whole day in going through the contract, plans, specifications, and reports from all the engineers who have had anything to do with this dock from the beginning. In the conference with the Secretary of the Navy I expressed the opinion that in my judgment this Government stands to-day liable for all the loss that the contractor has suffered, and that as a lawyer I would not want any softer snap than to take his case on a good fat commission.

Mr. CALLAWAY. I wanted to ask a question of the gentleman.

Mr. ROBERTS of Massachusetts. Yes.

Mr. CALLAWAY. Whether the chairman of the committee as well as the gentleman from Massachusetts understands that these contractors ought not to stand the loss incurred, but that the Government should stand it?

The CHAIRMAN. Is a point of order made?

Mr. HENSLEY. Yes; I make a point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

Naval proving ground, Indianhead, Md.: Toward extension of powder factory, $500,000.

Mr. WITHERSPOON rose.

Mr. BROWNING. Mr. Chairman, I make a point of order against that paragraph.

Mr. WITHERSPOON. Mr. Chairman, I wanted to make one myself.

The CHAIRMAN. A point of order is made by the gentleman from New Jersey [Mr. BROWNING] and by the gentleman from Mississippi [Mr. WITHERSPOON].

Mr. PADGETT. Mr. Chairman, I wish the gentlemen would state their point of order.

Mr. BROWNING. It is new legislation, without any authority of law. It is not a continuing appropriation. It is not a continuation of any authorized appropriation.

Mr. PADGETT. Mr. Chairman, we have had at Indianhead a powder factory at which we are manufacturing powder, something like 3,000,000 pounds a year, and this is to extend and enlarge the capacity of the factory.

Mr. WITHERSPOON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from Mississippi?

Mr. PADGETT. Yes.

Mr. WITHERSPOON. What does the gentleman mean by this extension? Does the gentleman mean adding to old buildings and making them bigger and higher and longer, or does he mean constructing entirely new buildings?

Mr. PADGETT. There are some places where they are building entirely new buildings, and there are others where they are enlarging existing buildings and modifying some of the existing buildings and getting additional and new machinery, and things of that kind.

Mr. WITHERSPOON. How many new buildings does this plan propose to construct?

Mr. PADGETT. I have not counted them up. There are several.

Mr. WITHERSPOON. There are few changes in old buildings?

Mr. PADGETT. They are modifications and changes and the enlargement in the capacity of the building.

Mr. WITHERSPOON. Is it not a fact that the modifications and changes of old buildings are very insignificant?

Mr. PADGETT. No; I could not say that they are very insignificant.

But the question presented, Mr. Chairman, is this: Here is a factory. The factory is an entity, taken as a whole. The factory is for a certain purpose, namely, to manufacture powder. In order to manufacture powder it is necessary to have different buildings and different kinds of machinery, and it is necessary to have them located at different places. Now, this is to en-

large it, and in order to enlarge it it is necessary to construct some new buildings, to enlarge some existing ones, and to modify some of the existing ones. Now, the factory is authorized by law, and is an existing institution or factory of the Government, operating; and this is simply to add to it so as to enlarge its capacity.

Mr. BROWNING. Mr. Chairman, I would like to be heard on the point of order. Paragraph 2, Rule XXI, provides as follows——

Mr. PADGETT. One moment, if you please. I want to call your attention to this: The naval act approved March 4, 1898, besides providing for the purchase and manufacture of smokeless powder in the amount of $250,000, also contains the following paragraph:

Smokeless powder factory: For the erection of buildings on Government ground for the manufacture of smokeless powder, for the necessary machinery and equipment, $93,727.

But there was no limit of cost fixed in the act, and since then extensions and enlargements have been made from time to time; and I say that it is entirely proper in this bill to carry an appropriation to enlarge and extend the capacity of the factory as a whole.

The CHAIRMAN. Has the gentleman from Tennessee the act which authorized the powder factory?

Mr. PADGETT. I can get it for the Chair.

Mr. BROWNING. Mr. Chairman, paragraph 2 of Rule XXI of the House provides as follows:

"No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for such public works and objects as are already in progress. Nor shall any provision in any such bill or amendment thereto changing existing law be in order."

The appropriation in the bill before the committee "Toward extension of powder factory $500,000," violates the first clause of this rule, as, by its terms, it extends and enlarges the present powder factory and is not an appropriation in continuation of appropriation for public works and objects already in progress.

In the testimony of Admiral Strauss before the Committee on Naval Affairs of the House is given the object for which this appropriation is requested. Hearings, page 473, wherein it is specifically stated that the appropriation is intended for the erection of new buildings as well as the enlargement of some existing buildings for the specific purpose of manufacturing more powder than the present capacity of the present powder factory.

It has been repeatedly held, Mr. Chairman, that "while appropriations for new buildings at existing Government institutions have sometimes been admitted as in continuance of a public work, they are not regarded as establishing a principle."

In volume 4, section 3755, page 505, Hinds' Precedents, "the construction of barracks at a navy yard was held not to be the continuation of a public work or object," although marines have been stationed at and doing duty at the navy yard since the date of its authorization.

In volume 4, section 3756, page 506, Hinds' Precedents, an appropriation for a naval prison at Pensacola Navy Yard was held to be not in order.

In volume 4, section 3758, Hinds' Precedents, an appropriation for officers' quarters at a navy yard is not in order as in continuance of a public work.

In volume 4, section 3761, Hinds' Precedents, page 506:

"It is not in order on the naval appropriation bill to appropriate for a new foundry not previously authorized by law at a navy yard," although foundry work had been authorized and performed at the navy yard for many years.

In volume 4, section 3752, Hinds' Precedents, page 503, the erection of laboratory buildings for the Department of Agriculture was held not to be in continuation of a public work already in progress.

In volume 4, section 3605, Hinds' Precedents, page 404, for establishing a plant for the manufacture of powder was held not in order on an appropriation bill.

In volume 4, section 3606, Hinds' Precedents, page 404, while it is in order on an appropriation bill to provide for the repair of a building, it is not in order to provide for a new building in place of one destroyed.

In volume 4, section 3703, Hinds' Precedents, page 464, an amendment for the enlargement of a general service of the Government was held to be not in order under the clause relating to the continuation of a public work or object.

Now, in the hearings it appeared from the statement of Admiral Strauss that most of the proposed buildings were to be new buildings. Some of them were extensions of old buildings, but most of them were to be new. On page 474 of the hearings Admiral Strauss distinctly says:

Some will be new and others additions to the old buildings.

I took special pains to have Admiral Strauss bring a blue print and point out on that blue print the number of new buildings, and it appeared that nearly all of them were to be new.

Mr. Chairman, the particular point that I wish to make is that most of the buildings provided for are to be new buildings, and therefore the paragraph is subject to the point of order.

Mr. BROCKSON. Mr. Chairman, I want to add, to what the gentleman has already said, some statements in the testimony of Admiral Strauss. On page 479 you will find Mr. BROWNING referred to the map and questioned him as follows. I quote from the printed hearings:

Mr. BROWNING. Under this improved plan that you have, are those buildings to be enlarged or are they all to be new buildings?

Admiral STRAUSS. Some will be enlarged and others will be entirely new, notably the dry houses, of which we require a great many.

Admiral Strauss filed an itemized list, which appears on page 473, in which he specifies 10 new dry houses and several other new buildings to be constructed. This shows that it is the intention not simply to make improvements to this plant, or to make small enlargements of existing buildings, but that it is the intention of the department to double the capacity of the plant, as testified by Admiral Strauss. The chairman asked him to tell about an item of $50,000 for addition to facilities. Admiral Strauss said:

We have submitted a recommendation for increased facilities at the powder factory which would be capable of doubling the output there. That involves an expenditure of $500,000 the first year and about half that subsequently. If that is granted, then this item of $50,000 can be omitted.

Admiral Strauss also testified that they were now manufacturing at the Government plant nearly half the powder used by the Government, and stated that they proposed to double the output.

It plainly appears that a large part of the money sought to be appropriated by the pending paragraph is for the construction of buildings and equipment not authorized by law. Therefore the point of order should be sustained.

The CHAIRMAN. The Chair finds that in the act making appropriations for the naval service for the fiscal year ending June 30, 1899, and for other purposes, this language appears:

Smokeless-powder factory: For the erection of buildings on Government grounds for the manufacture of smokeless powder, for the necessary machinery and equipment, $93,727.

The Chair is of the opinion that that amount of $93,727 was appropriated for a complete powder factory, and that the item contained in the bill now before the committee appropriating $500,000 for the extension of the factory is subject to a point of order.

Mr. PADGETT. If the Chair will allow me just a moment, I will state that since then Congress has been appropriating for and extending that factory until the investment to-day is, as I remember it, $1,300,000 in addition to that amount. That does not represent the completed factory.

The CHAIRMAN. The Chair was about to say that in the opinion of the Chair this was subject to the point of order, and the fact that the appropriations to which the gentleman refers have been made does not, in the opinion of the Chair, relieve this item from the point of order. The point of order is sustained.

The Clerk read as follows:

Depots for coal and other fuel: For additional fuel-oil storage at Melville, R. I., $20,000; additional fuel-oil storage at Norfolk, Va., $150,000; fuel-oil storage at San Diego, Cal., $50,000; steel coaling tower at San Diego, Cal., $45,000; fuel-oil storage at Puget Sound, Wash., $105,000; contingent, $30,000; in all, $400,000, to be available until expended.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order.

Mr. PADGETT. I want to offer an amendment to strike out "expended" and insert "June 30, 1916," as we have been doing at the other places.

Mr. STAFFORD. My reservation of the point of order was for the purpose of obtaining from the chairman of the committee information as to whether these items are such as require a continuity of appropriations?

Mr. PADGETT. Yes.

Mr. STAFFORD. Why can not these appropriations be exhausted in one year?

Mr. PADGETT. Simply because these structures are built of steel. Orders must be given for the construction of the steel and the metal to make the tanks, and then it has to be transported, and after that has to be put together, and it runs over more than a year.

Mr. STAFFORD. Is it intended that the Government shall do this work or that it will let it out by contract?

Mr. PADGETT. Ordinarily they do it by contract. I do not know of the Government doing anything of that sort directly.

Mr. STAFFORD. If it is let out by contract, if the contract is let within the fiscal year, the appropriation is available for the two succeeding years, even though the performance of the contract runs beyond the fiscal year. In these instances there is no need of providing for authorization beyond the fiscal year.

Mr. PADGETT. The words "to be available until expended" were put there because the department asked that they be put there.

Mr. STAFFORD. I do not think in this instance there is any ground whatsoever, as there was in the prior instances, where the work was to be performed by the Government, and where they could not complete the work, and could not estimate how much work would be finished within the fiscal year.

Mr. PADGETT. I appreciate that.

Mr. STAFFORD. I recognize that there is great potentiality in the position taken by the chairman in desiring to have that money available beyond the fiscal year.

Mr. PADGETT. I appreciate the gentleman's position, and I have no objection to striking out the words "to be available until expended." Mr. Chairman, I move to strike out the language "to be available until expended."

Mr. STAFFORD. Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 24, line 16, strike out the words "to be available until expended."

The question was taken, and the amendment was agreed to.

Mr. COX. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from Indiana?

Mr. PADGETT. I do.

Mr. COX. I want to ask the gentleman a question for information. What percentage of the appropriation for fuel is used for the purchase of oil for the fleet?

Mr. PADGETT. I could hardly state that in per cent. It is a matter that has increased very rapidly of late. It is estimated that we will use 30,000,000 gallons during the fiscal year 1915, for which this appropriation is made.

Mr. COX. What I mean is, taking the total amount of money appropriated for fuel purposes for the fleet, what per cent of that is used in the purchase of oil?

Mr. PADGETT. That I can not give definitely, but the torpedo boats and submarines and two of the battleships use oil exclusively. It has increased rapidly. For the current year the amount estimated was 15,000,000 gallons, and next year it will be about 30,000,000 gallons.

Mr. COX. How does the cost compare with coal?

Mr. PADGETT. That depends upon which coast the vessel is. On the Pacific coast the oil is cheaper than coal, and on the Atlantic coast the coal is cheaper than the oil.

Mr. COX. Are all of the dreadnaughts prepared at the time they are built to burn either oil or coal?

Mr. PADGETT. The older ones were not. Some were built to burn oil exclusively, and some were built to burn coal, and some of the recent ones have been built to burn both.

Mr. KAHN. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. KAHN. I want to say that some of the commercial lines on the Pacific coast burn oil in place of coal, and they say that it is a very great saving.

Mr. PADGETT. I stated that it was cheaper on the Pacific coast.

Mr. KAHN. Even if the oil costs a little more, there is a saving. There are so many other ways that it saves money. They do not have to pay for painting as much as they do where they burn coal. The oil does not throw any cinders, and in that way it makes a material saving. Then they do not have to have so many stokers in the hold.

Mr. COX. Does oil make a stronger heat?

Mr. KAHN. It is just as good a heat and very much steadier, very much easier to handle and regulate, and it is not so hard on the boilers.

Mr. COX. Are the railroads out there burning oil?

Mr. KAHN. Altogether. The railroads in California along the Pacific coast, almost to the Rocky Mountains, burn oil and say that it is preferable as a fuel in many ways.

The Clerk read as follows:

Repairs and preservation at navy yards and stations: For repairs and preservation at navy yards, coaling depots, coaling plants, and stations, $1,100,000.

Total public works, navy yards, naval stations, naval proving grounds, depots for coal and other fuel, Naval Academy, Naval Observatory, and Marine Corps, $3,548,000; and the amounts herein appropriated for public works, except for the Naval Observatory and for repairs and preservation at navy yards and stations, shall be available until expended.

Mr. MANN. Mr. Chairman, to that I reserve a point of order. Where is it intended to establish these depots for coal and other fuel?

Mr. STAFFORD. Those are the ones mentioned in the paragraph above.

Mr. MANN. I understand that certain ones are mentioned above, but here is $3,000,000 that may be used for new depots for coal that are not mentioned above.

Mr. PADGETT. That is simply the summary; it says "total for public works."

Mr. MANN. I see; I did not notice that.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order on the words "to be available until expended."

Mr. PADGETT. That is language that has been carried for years. This is for public works and has been carried year after year, and it is not new language at all.

Mr. STAFFORD. Would not the presence of that language—"to be available until expended"—apply to all of the appropriations carried in this section?

Mr. PADGETT. Only those that come strictly under the head of public works under the interpretation that has been placed on it heretofore.

Mr. STAFFORD. I would like to have the opinion of the chairman whether the continuation of this clause at the conclusion, which relates to all that goes before, would not apply to each and every appropriation or paragraph in the entire section?

Mr. PADGETT. I suppose it would.

Mr. STAFFORD. What was the need, then, of striking it out in the preceding paragraphs?

Mr. PADGETT. It had been put in there when the department sent down estimates. They had the language in and we kept it in there. It has been the universal custom and practice of Congress in legislating for public works to make it available until expended.

Mr. STAFFORD. As I understand the gentleman's position, you carry such a limitation in every separate item where it is needed, and why should you carry it at the end?

Mr. PADGETT. These two places where we had it in was for ordnance, and not in public works.

Mr. MANN. It is carried in all items in relation to public works.

Mr. STAFFORD. I am asking why they carry it in the omnibus clause, and if it does not make all the items in the section available until expended?

Mr. MANN. They are all public-works items, and it does make them all available until expended.

Mr. PADGETT. Public works have always been appropriated for in this way. It is not new language or a new procedure.

Mr. STAFFORD. I think it is a procedure that is open to severe criticism.

Mr. PADGETT. I do not know of any abuse of it.

Mr. STAFFORD. It is always advisable to have the naval officials account each year as to the amount of money they have expended.

Mr. MANN. This is mostly for buildings and things of that sort, and it is always made available until expended, like appropriations for rivers and harbors.

Mr. STAFFORD. I question that.

Mr. MANN. Appropriations for river and harbor improvement made 40 years ago are available, and so are appropriations for public buildings, the same way.

Mr. BARTLETT. Let me call the gentleman's attention to the fact that we passed a joint resolution the other day appropriating the unexpended balances for public works for the New Orleans Navy Yard that had accumulated for years amounting to $200,000.

Mr. STAFFORD. My purpose is to prevent that very condition. Now, will not the gentleman from Georgia [Mr. BARTLETT], who is well versed in this character of legislation, give the committee the scope of the general law we passed which turns back into the Treasury all the appropriations which are not availed of within the fiscal year, or within two years after, if the work is contracted for?

Mr. BARTLETT. It does not apply to appropriations for public works, public buildings, and rivers and harbors.

Mr. STAFFORD. The gentleman says, from his acquaintance with this subject, it does extend to all characters of public works as was suggested.

Mr. BARTLETT. I was not dealing with the policy of it; I might agree with my friend on the policy of it, but it is the law, all the same.

Mr. STAFFORD. It has been stated this clause has been carried for several years, and although I question the propriety of it, I withdraw the reservation.

The CHAIRMAN. The point of order is withdrawn.

Mr. GERRY. Mr. Chairman, I offer the following amendment which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After line 3, on page 25, add: "The Secretary of the Navy is hereby authorized and directed to investigate and report at the next regular session of Congress upon the selection of a suitable site for a first-class naval station on Narragansett Bay in accordance with the recommendations of the Army and Navy board under date of November 27, 1911."

Mr. PADGETT. Mr. Chairman, I reserve a point of order upon the amendment.

Mr. GERRY. Mr. Chairman, I do not believe that we should economize by not building battleships, for I think that the chief reason for our appropriations is to maintain our naval strength among the great nations of the world, and that this can only be done by building dreadnaughts; but I do think that the 35 naval stations that we at the present time support are too many, and a sound policy of economy would be commenced by cutting down these stations.

There has been a great deal of discussion this afternoon with regard to which is the best harbor on the Pacific coast. There seems to be some doubt between two harbors, but I do not think that such discussion would be pertinent to the Atlantic coast, because Narragansett Bay undoubtedly leads all the others. It is extremely fortunate in its depth of water. From Fort Adams to Bristol Ferry, a distance of 10 miles, the channel has a depth varying from 10 to 25 fathoms. Between these points there is an area having a depth of 5 fathoms or more, about 10 square miles in extent, sufficient room to anchor 100 heavy vessels at 400 yards distance and leave a free channel of adequate width for incoming and outgoing ships. In addition to this there is a large area of 4 fathoms or more for the accommodation of smaller craft. Strategically there is a splendid location for a naval base near the headwaters of the bay, which would be absolutely safe from attack.

In support of my contention I have the recommendations of the joint board, dated November 27, 1911. That board said:

The considerations which should govern the location of a navy yard are the following:
(a) It should be at an important strategic point.
(b) It should be easily accessible from the sea under all conditions.
(c) It should have a near-by protected anchorage sufficient for a fleet.
(d) It must be safe from attack.
(e) It should be close to a commercial center wit.. suitable labor and supply facilities.
(f) It should have a good climate, sanitary and hygienic conditions.
Secondary considerations are—
(g) Suitability as a liberty post.
(h) Proximity to good drill and practice grounds for all classes of vessels.

Narragansett Bay fulfills these requirements better than any other point on the north Atlantic coast. It is my view that if we adopt the policy of having the least number of yards that would meet strategic conditions a large amount of money would be saved, enough probably to build an additional dreadnaught.

Mr. HOLLAND. Will the gentleman yield?

Mr. GERRY. Certainly.

Mr. HOLLAND. Will the gentleman tell me the other naval bases recommended by the joint Army and Navy board?

Mr. GERRY. They recommended Newport News——

Mr. HOLLAND. And Norfolk and Hampton Roads. If, as a matter of fact, Narragansett Bay did not fare any better than Norfolk Navy Yard under this bill, does not the gentleman think it would be useless to have the investigation?

Mr. GERRY. I have no comment to make on that. I append as a part of my remarks the following:

JOINT BOARD, MILLS BUILDING,
Washington, D. C., November 27, 1911.

SIR: Referring to the letter of the honorable the Secretary of the Navy transmitting various reports and opinions on the subject of navy yards and coaling stations, and requesting the opinion of the joint board on the following:

(1) What navy yards, naval stations, and coaling stations are necessary for the service of the fleet, and what may be given up or reduced, in the Atlantic Ocean, the Gulf of Mexico, and the Pacific Ocean?

(2) Should any of the present stations within the continental limits of the United States be moved to other positions in the same general locality?

The recommendations on the above should be predicated generally on the following considerations:

(a) The general strategic demands of possible wars, the depths of navy-yard waters and future draft of our vessels, and the available or projected fixed defenses.

(b) That the policy of the Navy Department is to have the ships self-sustaining, as far as possible, thus reducing the amount of work at navy yards.

(c) That the use of floating docks in connection with present navy yards, or in deep waters in connection with repair facilities on shore, may be advisable.

(d) That if the number of navy yards is to be reduced, due weight should be given to the possible need of greater water front and facilities for those yards which are left.

The joint board has the honor to report as follows:

That the principal considerations which should govern the location of a navy yard are the following:

(a) It should be at an important strategic point.
(b) It should be easily accessible from the sea under all conditions.
(c) It should have a near-by protected anchorage sufficient for a fleet.
(d) It must be safe from attack.
(e) It should be close to a commercial center with suitable labor and supply facilities.
(f) It should have good climatic, sanitary, and hygienic conditions.

Secondary considerations are:

(g) Suitability as a liberty port.
(h) Proximity to good drill and practice grounds for all classes of vessels.

The number of yards should be the least that will fulfill strategic considerations. On economical considerations alone it would be ideal to have only one great yard on the Atlantic coast and one on the Pacific coast, since the repairing, docking, and supplying of the fleet could then be so regulated and systematized as to give the highest economy with efficiency, both as regards the fleet and the yard. Military (naval) considerations, however, must also be regarded.

THE ATLANTIC.

There are two important strategic points on the east coast of the United States which fulfill the above requirements better than any other points—Narragansett Bay and the lower part of Chesapeake Bay.

Narragansett Bay has exceptional depth of water, carrying a minimum of 10 fathoms in the channel from the sea up to Bristol Ferry, 10 miles from Fort Adams, the depth varying from 25 to 10 fathoms in the channel from Fort Adams to Bristol Ferry. It has, between these points, an area of depth of 5 fathoms or more of about 10 square miles in extent, sufficient room to anchor about 100 heavy vessels at 400 yards distance and leave a free channel of sufficient width for incoming and outgoing vessels. In addition to this, there is a very large area of 4 fathoms or more for the accommodation of smaller craft. The entrance to Narragansett Bay is peculiarly well adapted to fortifications and a navy-yard site at the upper end of the deep water would be entirely secure from bombardment.

Norfolk and its fleet anchorage, Hampton Roads, is somewhat deficient in depth of approach and in anchorage area. The controlling depth before the recent dredging began in to Hampton Roads was 29 feet. A channel 500 feet wide and to be dredged to 35 feet of depth at low water is now in process of making, which will give access to Hampton Roads to the heaviest ships. The channel from Hampton Roads up to the Elizabeth River to the navy yard has now a controlling depth of 30 feet. The anchorage of Hampton Roads between Fortress Monroe and the Newport News middle ground will accommodate, at 400 yards distance and within the 5-fathom contour line, about 50 heavy ships. There is also available anchorage for heavy ships to the eastward of Fortress Monroe on the sides of the channel. There is also anchorage for a considerable number of heavy ships, from 15 to 20, in the deep water off Newport News, but the channel to this anchorage should be improved. Altogether about 80 heavy ships can be accommodated with ample area in shoaler water for ships of less draft than 30 feet. Hampton Roads is protected by the fortifications at Fortress Monroe and is well behind the proposed fortifications at Cape Henry, and the immediate vicinity and approaches are well adapted for mining operations.

Taking into consideration all the above-mentioned requirements of a first-class navy yard, it will be seen that Narragansett Bay and Norfolk (with Hampton Roads) are superior to all other places on the Atlantic coast.

Portsmouth has a good dock, good shops, and a deep-water entrance, which, though crooked, presents no difficulty at slack water. Its berthing facilities are incomplete and would require extensions in order to provide for a division of battleships. It can dock any vessels prior to the *Arkansas* class. It has no fleet anchorage. It has not an adequate labor supply and can be attacked from the open sea.

Boston is superior to Portsmouth in all its yard facilities except the size of its largest dock; has a fair labor supply at hand. Its fleet anchorage (President Roads) is inadequate. It can repair a division of existing battleships.

The New York yard is superior in its labor, industrial, and supply facilities to any other existing yard. It has not room to expand sufficiently to meet the growing requirements of the fleet. Its fleet anchorage is inadequate without interference with the demands of commerce. There are shoal spots in the East River which hamper the bringing of heavy ships to the yard, practically limiting that operation to once every day at high water. The water about the yard is constantly shoaling, necessitating a dredging expenditure of approximately $100,000 each year to maintain depth. The yard has no connection with any railroad. It might be practicable to obtain another site in the vicinity of New York with better physical conditions, but the inadequacy of its fleet anchorage can not be remedied.

Philadelphia possesses great advantages in being the center of a great industrial and commercial district, but is too far from the sea for a fleet base and has no fleet anchorage. Modern battleships damaged in such a manner as to increase their draft and impair maneuvering power would find it difficult to reach this yard. The Philadelphia yard has convenient railway communication and is excellently suited for such manufacturing as may be desirable to have done in navy yards.

Norfolk (with Hampton Roads) possesses all the principal requirements of a navy yard and naval base. The channels to the yard and to the sea (from the fleet anchorage) need improvement, which is gradually being made and which can be completed within a reasonable cost.

Narragansett Bay has all the requirements of a navy yard, as set forth in the first paragraph, except (e) and (g). It possesses (a), (b), (c), (d), (f), and (h) in a high degree. It is near centers of industry which would afford a fair labor supply.

The joint board recommends, therefore, that steps be taken to establish a first-class docking, repair, and supply yard in Narragansett Bay; that while this is building the docking, repair, and supply facilities of New York, Boston, and Portsmouth be retained, transferring them to the new yard as its development proceeds. It would be the intention that this new yard should replace in all respects the three yards named

above when in such condition as may become necessary to meet the demands of the fleet, and that when it shall have been completed the navy yards at New York, Boston, and Portsmouth would be closed and sold. The proceeds of such sales would go far to equip the new yard. All desirable machinery and equipment capable of being transferred should be taken to the new yard. This substitution of one yard for three would result in greatly increased economy by reducing fixed charges and by establishing a great navy yard on a sheet of protected water exceptionally well suited for a naval base; would also increase military efficiency.

That the Philadelphia yard be retained as a base and home yard for the reserve fleet, which is growing to large proportions. This yard possesses advantages over any other for this purpose in having a large fresh-water basin in which to lay up ships in reserve. This yard is also well adapted for fitting out auxiliaries in time of war.

That the docking facilities of the Norfolk yard be improved and its channel of approach deepened. The water area opposite the yard should be widened to provide for large ships.

That the docking, repairing, and supply of the entire active fleet in the Atlantic be divided between the Narragansett and Norfolk yards.

That Charleston and Key West be maintained as torpedo flotilla bases, and the latter be improved for this purpose. These yards may be regarded as auxiliary to Norfolk and Guantanamo, respectively. Key West as the base of a torpedo flotilla controls the northern entrance to the Gulf, while Guantanamo as the base of the main fleet controls the entrance from the south.

Guantanamo and Colon: The two yards at Narragansett Bay and Norfolk would satisfy the strategic requirements of the east coast of the continental United States. There must also be naval bases for that great strategic area comprising the Gulf of Mexico and the Caribbean Sea. It is to be noted that Guantanamo Bay is very well situated as a base for a fleet whose object is to control that strategic area. By establishing an adequate navy yard at Guantanamo, fortifying the isthmus of Panama, and establishing a base for the torpedo flotilla at Key West, the Gulf of Mexico becomes, from a naval point of view, an inland sea and may be considered safe from attack.

The joint board recommends that Guantanamo be developed by the establishment there of a large dry dock or floating docks and sufficient repair and supply facilities to enable the battle fleet to maintain itself in that vicinity for several months if need be.

The board further strongly recommends that steps be taken as soon as practicable to adequately fortify Guantanamo.

It is not contemplated that we will need a navy yard at the Atlantic terminus of the Panama Canal if docking and repair facilities for commercial vessels sufficient to meet all requirements of the Navy in time of war be provided there under Government ownership and control.

To summarize, the joint board finds the following navy yards are required in the Atlantic: Narragansett Bay, Norfolk, Guantanamo, Philadelphia, Charleston, and Key West.

All other navy yards in the Atlantic or Gulf of Mexico are now or will become, upon the completed development of the above yards, superfluous, and to continue indefinitely their maintenance would be a waste of money to the detriment of the Navy.

The board recommends the immediate discontinuance of the yards at Pensacola, New Orleans, San Juan, and Culebra.

THE PACIFIC.

The most important strategic points on the western coast of the United States are Puget Sound and San Francisco Bay, but the navy yards at those localities are not adequate in their docking, repair, and supply facilities for the maintenance of the fleet for any prolonged period.

Puget Sound: This is the natural base for naval operations on our northwest coast and Alaskan waters. In many respects the location of the yard is excellent. While it is at a considerable distance from the open sea, access to it is comparatively easy. It is well protected naturally and fairly well artificially; has ample depth of water and good anchorage. As regards repairs, its facilities, while sufficient for the fleet now maintained in the Pacific, should be increased without delay in anticipation of a possible transfer of the battle fleet to that ocean.

San Francisco: The Mare Island Navy Yard is critically deficient in several of the essentials of a navy yard. It is above the San Pablo Flats, crossed by a long and narrow channel, which is maintained at a navigable depth for large vessels only by extensive dredging. The yard itself is inaccessible for the largest battleships, and would be inaccessible for battleships of any size with increased draft due to injuries. Steps are now being taken to improve the channel and approach to Mare Island in accordance with the recommendation of a joint Army and Navy board, for the purpose of ascertaining if adequate depths in channel approach and depth at the navy yard itself can be maintained for large vessels. It is, at least, doubtful if this can be accomplished except at prohibitive cost. Furthermore, the water at the yard is filled with alluvial matter which clogs the condensers and flushing systems of vessels lying at the wharves. Unfortunately there has grown up here an extensive plant, which, while of little value to the fleet in its present situation, can not well be abandoned.

Should investigation prove that permanent improvements which will render the conditions satisfactory can not be made, the joint board recommends that steps be taken to establish a new navy yard with adequate facilities in the lower part of San Francisco Bay on a suitable water front; that the repair and supply facilities of the Mare Island yard be transferred, so far as practicable, to the new yard and that when the latter is ready for use the Mare Island yard will be closed as a docking, repair, and supply yard, but employed for other naval purposes to which it may be suited.

PEARL HARBOR, HAWAII.

This yard, owing to its advanced position and natural advantages as a naval base, is practically indispensable to our own fleet in any operation against an Asiatic power, and would be a great menace to us if it were permitted to fall into the hands of an enemy. It should be made as nearly as possible impregnable, in order that it may be safely held and that the fuel and other supplies of our fleet and its communications may be kept intact.

PANAMA.

The strategic relation of Panama to the trade routes in the Pacific through the Panama Canal suggest that a navy yard may eventually be needed at that point. In view, however, of the existing uncertainty as to the scope of the facilities planned by the Canal Commission the board is of the opinion that it will be enough for the present to assure that sufficient suitable area be reserved for the use of the Navy Department for a navy yard and that the time of the actual establishment of the yard be left open to future decision.

GUAM.

This is an important point in the trans-Pacific line of communication; means should be provided to protect it from a raid, to improve its harbor, and to increase its facilities as a coal and supply station, for if well fortified and garrisoned it would be of great importance.

In reference to the subhead (d), covering the question of the safety of navy yards from attack, the Army members of the joint board are of the opinion that should a navy yard be established under this recommendation at Narragansett Bay that the fixed defenses now established on that bay are adequate for the protection of the bay against forceful entry by hostile ships; but that, in their opinion, the existing defenses of Narragansett Bay should be reenforced by the establishment of heavy guns on Beaver Tail and of guns of smaller caliber on Seaconnet Point to insure sufficient area of protected water for the debouchment of the fleet and its formation for battle.

In the same connection, regarding the fixed defenses of the navy yard at Norfolk, the Army members are of the opinion that when the project for the establishment of fixed defenses on Cape Henry, already recommended by the joint board, shall have been completed, that the fixed defenses for the protection of that yard will be adequate for the purpose, and the Army members further express the opinion that in the event of war there will be greater probability of the Army being able to assemble sufficient mobile forces to protect the reduced number of navy yards than the present number against any raiding force which may reasonably be expected to be landed in the vicinity with a view to taking these positions in reverse.

In these opinions the joint board concurs.

COALING STATIONS.

The general board, under date of April 13 and June 14, 1911, made recommendation concerning coaling stations, to which it adheres under existing conditions. Should, however, a great navy yard be established in Narragansett Bay and the yards at Portsmouth, Boston, and New York be abandoned, the joint board is of the opinion that the recommendations as to coaling stations would be subject to modification in certain respects.

Very respectfully,

_____, _____,
Admiral of the Navy, Senior Member.

The honorable the SECRETARY OF THE NAVY.

Mr. O'SHAUNESSY. Mr. Chairman, I wish to congratulate my distinguished colleague [Mr. GERRY] for calling the attention of the committee to the splendid facilities of Narragansett Bay for a naval base. Nature has been generous in its endowment. It has been my privilege heretofore to introduce a bill in this House by which useless naval stations would be sold and the money arising from the sale would go to the establishment of a great naval base at Narragansett Bay, R. I. Of course it is hardly necessary to dwell upon the fact that efficiency and economy would arise from having central places where waste would be done away with and efficiency would be promoted. Whether that is a dream or not I do not know. Suffice it to say during the last administration great progress was made in that direction, and I felt I would be a defaulter to my sense of duty as a Representative in this Congress if I did not heartily indorse the efforts of my colleague [Mr. GERRY] in calling the attention of the committee to the recommendations of the Army and Navy board. Now, if men who make serious and deliberate study of these questions know anything about it, if their attempt is to be of benefit to the people, if their investigations are to be seriously considered, then I think that this question ought to engage the attention of Congress with a view to working out reforms suggested by trained minds. I have read repeatedly where naval stations have been established in this country by virtue of some political influence. I think I can recall a statement made in the Senate by Senator TILLMAN—I think it was a year or two ago—when he rose in his seat and said he might as well get a little of the pork which was going around for the navy yard down in his district. I believe, even though I represent a district that can not speak as eloquently, for instance, as Puget Sound and Mare Island did this afternoon, if in that district or in any establishment in that district any money has been expended by the Government that was not expended wisely and judiciously, then that plant ought to be abolished. No plant should be nurtured by the Government for political purposes. Let me cite here from an article by A. Maurice Low on Secretary Meyer's reforms:

A navy yard, according to Mr. Meyer, is primarily a military establishment rather than an industrial establishment, which is the great difference between a Government yard and a private yard, because, as Mr. Meyer pointed out before the Naval Committee of the House: "A navy yard exists as a repair machine shop for the sake of the fleet only. If the fleet is wiped out, you do not need the navy yard, and that is where the military question comes in." Although a navy yard can not be fairly considered in the same way as a private manufacturing establishment, Mr. Meyer has seen no reason why some of the methods employed by private concerns should not be utilized by the Government in the interest of economy and efficiency. Every manufacturer keeps an accurate account of the cost of the work done, otherwise it would be impossible for him to tell whether he is doing business at a profit or loss and whether some jobs are not costing more than others. The Navy Department has never made any attempt to place its affairs on a business basis. When a ship was ordered to a yard to be repaired, a board reported that the work would cost so much, and if the money was available or Congress made the appropriation the repairs were ordered carried out. It has often happened that practically identical work done at different yards, or even at the same yard after an interval, varied

greatly in the cost. A proper cost system would show where the fault lies.

Such a system Secretary Meyer has installed, and it is asserted that it has fully justified its expectations. He now knows the money paid for material and labor, and instead of the accounts being checked by the manager of the yard they are audited in the Bureau of Supplies and Accounts in Washington, so that careful supervision is exercised over all disbursements. By instituting a uniform system of accounts and bookkeeping it is possible to compare the cost of work in one yard with that in another and any extravagance or slackness can quickly be detected; and it will lead to rivalry among officers and men to obtain for their yard the highest reputation for both efficiency and economy.

Mr. Meyer has not only reorganized the navy yards, but he has also reorganized the Navy Department, and of course there was no hope of the proper administration of the yards unless the department was efficiently constituted. Mr. Meyer recognized that a civilian Secretary must have professional advice, but if he relied upon his bureau chiefs there was always danger of that advice being colored, and yet under the system then existing he could not seek outside assistance. To meet this he created what might be regarded as a professional cabinet by appointing four officers of large experience and sound judgment to act as his aids, who have no executive authority, but whose duties are to keep him informed and to act as his expert and responsible advisers. These four officers are officially known as the aids for operations of the fleet, inspections, personnel, and matériel. The functions of the bureau have not in any way been changed, but when a recommendation is made by a bureau and the subject is too technical for the nontechnical Secretary to be able to deal with it intelligently, he can ask the opinion of the aid in whose division the work belongs. The aid criticizes the recommendation from a purely impersonal standpoint, and as he is neither the author of the recommendation nor charged with its execution he can discuss it impartially and bring out the weak points, which the bureau will have to meet before the Secretary gives his approval. Mr. Meyer's expert advisers should be the means of reducing friction between the bureaus and coordinating their work, to the great advantage of the department and the efficiency of the fleet, and that, after all, is what the department exists for. A great many secretaries have acted on the theory that the fleet was merely a useful device to keep the Navy Department in operation; Mr. Meyer acts on the principle that the fleet is the Navy and the Navy is the fleet and everything else is subordinate and incidental.

Mr. Meyer, after a personal inspection of the navy yards of the country, came to the conclusion that there are too many, and that those regarded as most important would be of little value in time of war; that the test to which a navy yard must be subjected is the character and quality of its work and the rapidity with which it can be done in an emergency. The three yards on the eastern Atlantic coast are at New York, Boston, and Portsmouth, and these yards Mr. Meyer would abandon and in their place create a great modern establishment on Narragansett Bay, with anchorage grounds sufficient for the entire fleet and dry docks enough for six or eight of the largest battleships afloat to be repaired simultaneously, and with shops equipped with the latest machinery, so that the United States would have a plant second to none in the world. The consolidation would not only result in great economy, but would increase efficiency, as operations in one yard could be carried on better than in three and the establishment could be kept in operation all the year round. Of the yards that Mr. Meyer would abandon, Portsmouth has no value strategically and has not much greater value as a manufacturing establishment; New York and Boston have also lost their military importance, and while their plants have been kept up to date, they are cramped for room and have not sufficient water front for ships to find a safe anchorage. It is a peculiar thing, as Mr. Meyer discovered after looking into the subject, that in Europe the large naval stations are not in great commercial centers, such as New York and Boston, but at less important ports where there is less danger of interference by merchant ships with vessels of war. With the opening of the Panama Canal the strategical center will shift, and Guantanamo, which Cuba ceded to the United States as a naval base, will become one of the most important American naval stations because of its proximity to the canal. When the canal is in operation the fleet will divide its time between the east and west coasts until such time as there are fleets in both oceans, and the Gulf of Mexico will be the winter drill ground, so that repairs will be made more frequently at Guantanamo than in New York or Boston. Still, of course, it is necessary to maintain adequate yard facilities on the eastern coast, and that is why Secretary Meyer advocates the Narragansett Bay establishment, which has the support of the most experienced officers of the Navy as well as the joint board of defense, composed of Army and Navy officers.

And there ought to be a concentration of these yards in order that we may proceed in a more businesslike and more economical way. It is hard for us to do so, because I think some writer has spoken of Congress as "a convention of local envoys." We are all jealous of our districts and wish to do whatever we can for them, but the time must come when we will have to forget our districts and remember the country; and when we do remember the country as a whole I think we will come to a sounder and a better and a more judicious way of administering our navy yards. [Applause.]

In that connection, Mr. Chairman, I ask leave to extend my remarks by inserting in the RECORD a magazine article which deals more eloquently with the subject than I am able to do.

NAVY-YARD CONSOLIDATION—SHOULD THE NORTH ATLANTIC NAVY YARDS BE SOLD BY THE GOVERNMENT?

(By George F. Stowers, inspection department, navy yard, Boston, Mass.)

About to retire to private life Senator Aldrich electrified the country with the declaration that the conduct of Government business on a business basis would annually save to the people $300,000,000. This was truly a startling presentation of a situation with which the American public has long been familiar; to which, as a rule, it has been sublimely indifferent, for it has long been common knowledge that millions of dollars have been wasted annually in the reckless expenditure of public funds for the erection and maintenance of unnecessary and unnecessarily expensive public buildings; for the prosecution of ill-considered and unsystematic rivers and harbors projects; for our ever-increasing pension burden; and for the maintenance of certain navy yards and other Federal establishments the necessity for which has never been fully apparent to the average citizen. Indeed, this knowledge has been of such long standing and attempts to obtain remedial action have heretofore been so futile that the people have well-nigh accepted the situation as inevitable. Of course, the people of this country would like to save $300,000,000 annually; such saving would be a decided factor in the reduction of the present high cost of living; of course they absolve themselves from all responsibility for a situation that they firmly believe is strictly up to the public officials whom they send down to Washington to manage their business for them.

So with the passing of the first shock of Senator Aldrich's somewhat spectacular announcement the people relapsed into their usual attitude of seeming indifference and the game went merrily on. But did it? Even as the Senator gave utterance to his opinion certain Government officials, Cabinet members, were actively engaged in the work of reorganizing and systematizing, with a view to increased efficiency and economy, the executive departments of which they were the responsible heads. Of these officials none has shown himself to be more zealous or has brought to his work greater business acumen and capacity than the Secretary of the Navy, George von L. Meyer. There can no longer be any question that the so-called "Meyer scheme" of navy-yard administration has justified itself in the economies already attained; but the economies so far effected are insignificant as compared with the millions that the Secretary believes he can save to the public if Congress will but grant him the authority necessary to a comprehensive and complete application of his plans. It is the knowledge that the larger economies can only be attained through the influence of public opinion and the cooperation of Congress that has undoubtedly prompted the Secretary recently to take the public into his confidence regarding some of his more important plans.

Thus it has come about within the last few months that great interest has been aroused throughout the country, particularly in those States which have navy yards within their borders, through the fact that the Secretary of the Navy has let it become known that Navy Department officials are seriously considering the feasibility of selling certain Atlantic coast navy yards and concentrating their activities at three permanent naval bases, and that he personally believes that some such change in the status of navy yards is inevitable. The Secretary now has before him for consideration two special reports, one submitted by the joint Army and Navy board, the other by the general board of the Navy, both of which reports recommend the sale of the Portsmouth, Boston, and New York Navy Yards and the centralization of their activities at a great naval base to be established upon Narragansett Bay; this proposed naval base on Narragansett Bay to be one of three such naval bases to be maintained on the Atlantic coast, the other two to be located at Norfolk, Va., and Guantanamo, Cuba. As already intimated, such a plan can only be consummated as a result of favorable legislation by Congress, and the congressional delegations from those States and cities threatened with the loss of navy yards, urged on by their constituents, are already planning a determined campaign in opposition to any legislation that may be introduced into Congress for this purpose.

This question of consolidation of navy yards has in one phase or another attracted the attention and received the consideration of naval authorities for years past, and its development to its present importance has been coincident with the development of the new Navy and of the conditions that have prompted the extension of the country's industrial and political activities. Such a consolidation was partially effected in the early eighties under the direction of Secretary of the Navy William E. Chandler, who practically closed the Boston Navy Yard by the simple expedient of transferring its activities to the Portsmouth Navy Yard.

Now, that the Panama Canal is nearing completion the effect that its use will have on the history of our naval expansion is patent to all, as it will permit of the fleet dividing its time between the Atlantic and the Pacific and will enhance the importance of the naval bases at Guantanamo and upon the Pacific, including the great naval base now under construction at Pearl Harbor, near Honolulu. With the opening of the canal, extensive fleet maneuvers and target practice can be held in the Pacific as well as in the Atlantic, and these and other activities incident to the opening of the Canal mean that whatever the Pacific navy yards in this way gain, the Atlantic yards will lose; and the loss will be particularly felt by the North Atlantic yards, as their importance in the maintenance of the fleet will greatly decrease. It is this situation that now brings before the public the question of whether or not some of the North Atlantic yards should be sold.

Any discussion of this question necessarily involves the use of terms the different interpretations of which have caused considerable confusion, and to avoid misunderstanding it is here deemed pertinent to give certain definitions. The definitions of the terms "navy yard" and "naval base" are those published by the Navy Department in its General Order 135, of December 6, 1911, for the information and guidance of the naval service. A navy yard is a single establishment for docking, repair, and supply. It may include building and manufacturing facilities. A naval base is a point from which naval operations may be conducted and which is selected for that purpose. Its essential feature is an adequate anchorage for a fleet with its auxiliaries, preferably sheltered from the sea and fortified against attack. Naval bases are permanent or temporary. The latter would generally be established nearer the theater of war than any permanent base and would be called an advanced base. A permanent base would have docking and repair facilities. The industrial establishment of a navy yard is that part of the equipment and activities of the yard that constitute the industrial plant. The military establishment of a navy yard is that part of the equipment and activities of the yard that has to do with the strictly military aspects of our naval establishment.

The opposition to the sale of the Boston Navy Yard seems to have crystallized itself in the contentions that the sale of the navy yard would mean loss of business to Boston; that the concentration of the North Atlantic navy yard activities at a naval base on Narragansett Bay would impair the military efficiency of the Navy; and that such concentration would be an act of extravagance, in that large sums of money have been expended in building up an industrial plant at the Boston Navy Yard, in developing the military establishment, and in deepening channel approaches. The opponents of the plan supplement these contentions with the assertion that there is no guaranty that the work now performed at the three North Atlantic yards would be performed materially cheaper when concentrated in one plant at the proposed naval base.

If we find that these arguments or contentions are correctly premised; if we find that they are based on the axiom that navy yards exist for

the Navy and not the Navy for the navy yards; if we find that they give due consideration to impending changes in conditions, changes that demand recognition in the successful and permanent solution of the question; then, as fair-minded persons, we must perforce concede that these considerations are of sufficient weight to warrant the definite conclusion that the Boston Navy Yard should not be sold. The opening of the Panama Canal is an impending change in conditions that has not only precipitated the question we are now considering, but it is a change that is fraught with great opportunities for the commercial expansion of Boston, and with positive danger to the industrial welfare of the North Atlantic navy yards, inasmuch as it will cause those navy yards to suffer a decided loss in work and importance; consequently it is a change that has a direct bearing on the issues involved, which are: "Would the sale of the Boston Navy Yard be to the advantage or disadvantage of industrial Boston? Would the sale of the Boston Navy Yard and the concentration of the North Atlantic navy-yard activities at a naval base on Narragansett Bay promote or impair the military efficiency of the Navy? Would or would not the sale of the Boston Navy Yard and the concentration at a naval base on Narragansett Bay of the navy-yard activities of the North Atlantic result in an appreciable saving of expense? In other words, is the sale justified on the grounds of economy?

This last question naturally falls into the three following subdivisions: (a) Would or would not such concentration result in a substantial saving in the cost of maintenance (indirect expense) of the industrial establishment or plant? (b) Would or would not such concentration result in a substantial saving in the cost of the labor and material directly chargeable to the output of the industrial establishment or plant? (c) Would or would not such concentration result in saving a large part of the present cost of maintenance of the military establishments at the Boston, New York, and Portsmouth yards?

The Massachusetts Legislature of 1911 enacted into law a bill creating a board of directors of the port of Boston, and delegating to that board the power to make all necessary plans for the development of Boston Harbor and to take immediate charge of the construction of piers and of improvements in connection therewith. (Chapter 748, Acts of 1911, Massachusetts Legislature.) The bill creating the board of directors also provided for an initial appropriation of $9,000,000 to enable the board to perform its delegated administrative and other duties. The board also considers itself responsible, under the law, for the conduct of a progressive campaign to stimulate the industrial activities of the city, and to increase its importance as an industrial and shipping center by taking active steps to increase its commerce. That the board thus interprets its obligations is evidenced by the fact that it is now seeking additional funds with which to purchase for the Commonwealth certain steamship terminals, the acquisition of which it considers necessary to facilitate the entry into Boston of the Grand Trunk and other railroads; also funds with which to encourage by conservative financial backing the establishment of new steamship lines, particularly a line to the Gulf that will insure to Boston a share in the increased commercial activities that are expected to accrue with the opening of the Panama Canal. Thus the necessary administrative and financial facilities for the commercial expansion of the city already exist, with prospects good that the additional $50,000,000 requested by the board will soon be forthcoming.

To quote its chairman, the directors of the port "enter upon their duties with all the developed water front of Boston under miscellaneous private control * * * the acquisition of the important water front is inevitable * * * New York owns 90 per cent of the water front of Manhattan Island." There is much truth in the chairman's statement relative to the miscellaneous private control of the developed water front, but all of the developed water front is by no means under such control; on the contrary, one of the largest, best developed, and most valuable water-front properties—the Boston Navy Yard—a property the actual transfer of which could be effected easily and expeditiously, is available for and peculiarly adapted to the very purposes which the directors of the port have in mind.

The acquisition by the Commonwealth of the navy-yard site and water front would lend to commercial expansion that would far outweigh in value to the city the necessarily restricted activities of a local navy yard, as it would immediately and greatly increase the tide-water terminal facilities of the port by adding over 3,500 feet (official map of Boston Navy Yard, showing improvements to June 30, 1911) to the commercial water front, with many excellent docks and space for more, and by making immediately available for commercial purposes one large modern dry dock, one smaller dry dock, a selected site for a third dry dock, many large and substantial buildings (suitable for warehouses), power plants, railroad trackage, coal pockets, etc. The site contains about 90 acres (records on file at the Boston Navy Yard) of land, and there is ample room for the erection of cold-storage plants, grain elevators, additional warehouses, and any other buildings that may be required to meet the exigencies of a rapidly developing foreign and coastwise trade. That such a transfer of the navy-yard property would immediately and materially aid the city of Boston in its competition with New York as a shipping port is very evident.

Commercial activities on the site of the navy yard would affect favorably far more wage earners than the navy yard plant ever could, even if run to its full capacity, for a commercial plant would affect favorably a far larger number of local commercial enterprises employing many men of many trades. A commercial plant that would be constantly in operation would be of incalculably greater advantage to Boston than a navy-yard plant operated to but a fraction of its full capacity.

With a comprehensive administrative and financial program for the commercial expansion of the city of Boston already well under way; with the necessity for State control of the Boston water front already recognized by the directors of the port; with the opportunity afforded the State to acquire, at one transfer, what is probably the largest, best equipped, and best located water-front property in the harbor; with the surety that such acquisition would be to the great advantage of local commercial enterprises, would encourage the establishment of others, and would thus favorably affect a large number of wage earners; with all these conditions assured, it is at once evident that the sale of the Boston Navy Yard would be to the advantage of industrial Boston.

When, through the irresistible political, social, and industrial tendencies of the times, a conflict is precipitated between sentimentalism or local pride on the one hand and progress on the other, local pride must ever be sacrificed in the interest of the larger efficiency and the general welfare. Experience has shown this to be axiomatic. Hence Boston, Portsmouth, and New York, with their wealth of historical associations antedating and overshadowing in sentimental importance the navy yards that lie within their borders, must rise to the occasion by recognizing and accepting new conditions that demand, in the interest of the common good, the removal of those navy yards.

If it were possible for Uncle Sam to enter into a contract with nature to supply the Government with a location for a naval base that would meet the definitions and specifications of the naval experts, he could not hope to obtain more ideal conditions than those that now exist, ready-made, at Narragansett Bay, for Narragansett Bay has all the essential features of such a base. It has an adequate anchorage for a fleet with all its auxiliaries, sheltered from sea. (United States Coast and Geodetic Survey (chart) of Narragansett Bay, R. I.) As it has direct access to the open sea via broad and deep channels that afford unexcelled opportunity for submarine and mine defense, and as it is already defended by modern fortifications on the island midway of the entrance and on the nearby headlands, it can be made practically, if not absolutely, impregnable against direct attack. Inasmuch as it would be impossible for an enemy to effectually obstruct such wide and deep channels, and inasmuch as any attempt by an enemy to mine the entrance to the bay would be foiled by the activity of our submarines and by countermining, all possibility of a foreign foe successfully bottling up any of our ships operating from the proposed base would be precluded.

On Narragansett Bay there are many acres of vacant land available for the establishment of a navy yard in which the work of docking and repairing an entire fleet, with its auxiliaries, could be carried on expeditiously, and in which, if necessary, new ships might be built. An entire fleet could not be accommodated at the Boston Navy Yard, for the necessary expansion of the yard would not be feasible because of the prohibitive cost. The yard is set in a crowded part of the harbor, with insufficient anchorage, and there is no chance for a rendezvous of men or for drilling. These same conditions also apply in the case of the New York Navy Yard; and at Portsmouth there is practically no safe anchorage.

Although it is argued that it would be folly to place all of our naval eggs in one basket—on Narragansett Bay—yet this point is not well taken, for the proposed naval base on Narragansett Bay would be but one of three such bases on the Atlantic coast. It is also held by some that the Government should not part with the dry docks at the Boston Navy Yard, but this point is hardly material, for even though these dry docks were turned over for commercial purposes they would still be available for naval purposes in time of war, as they would be under the protection of the harbor fortifications.

Narragansett Bay, then, meets all the requirements of a naval base. This being the case, the sale of the navy yards at such points as Boston, Portsmouth, and New York, points that do not meet the requirements of a naval base, and the concentration of the North Atlantic navy-yard activities at a naval base on Narragansett Bay would promote the military efficiency of the Navy.

As a thorough analysis of the third issue presented by a discussion of the question under consideration must necessarily be largely based on data that is available only as the result of the activities of the inspection department of the Boston Navy Yard, it is considered profitable here to briefly describe the functions of that department. The inspection department is distinctly a feature of the "Meyer scheme" of navy-yard administration. To it is delegated the duty of inspecting all work, during progress and upon final completion, performed by the two divisions of the manufacturing department, and all work must receive its stamp of approval. It is also responsible for the proper performance of much the same functions in connection with the activities of the navy yard as the Boston Finance Commission performs in connection with the activities of the city departments; that is, the inspectors and subinspectors of the inspection department of the Boston Navy Yard are constantly investigating navy-yard costs and conditions and inefficiencies that operate to increase costs. In the performance of its interrelated duties of making physical inspections and cost inspections the inspection department has exceptional opportunities for analyzing cause and effect, and hence is peculiarly qualified to make intelligent efficiency and betterment recommendations to the end that economy may be attained.

So much for the inspection department. Incidentally it may be said that the inspection department of the Boston Navy Yard has found, as will presently appear, that all navy-yard costs are excessive, due to conditions that can only be eliminated by the concentration of navy-yard work at a few plants, and running those plants to approximately full capacity.

Two important classes of expense enter into the cost of the output of an industrial plant—the indirect or maintenance expense, variously designated as overhead expense, general expense, surcharge; and the direct or productive expense, labor and material directly chargeable to the output of the plant.

It is an accepted fact that when a large plant is running to but a fraction of its full capacity the indirect or maintenance expense immediately becomes an overwhelming burden on the cost of the output, this for the reason that the maintenance expense remains practically the same whether a plant is run to a fraction of its capacity or whether it is run to full capacity. (Harrington Emerson, efficiency engineer, in pamphlet entitled "Shop Betterment and the Individual Effort Method of Profit Sharing.") The officials of the inspection department of the Boston Navy Yard have repeatedly been impressed by the fact that the Boston Navy Yard is a large plant that is operated to but a fraction of its present capacity. Hundreds of thousands of dollars have been expended on the yard machinery plant; machine tools of the latest and best designs have been purchased irrespective of whether or not the demand for their use warranted the expense; these machine tools are not run to anything approaching their full capacity, as compared with navy-yard standards even; as compared with scientifically determined standards, the present output is but a fraction of the possible maximum capacity of the plant; the efficiency of the machines is necessarily very low, as practically no attempt has been made to standardize speeds and feeds, to properly group the machines, or to eliminate inefficiencies in belting, etc. In short, little or nothing has been accomplished in the way of improving and standardizing conditions, largely for the same reason that little or nothing has been accomplished in the elimination of soldiering or loafing; and this reason is the lack of that incentive and stimulus that only comes with the knowledge on the part of the foremen and workmen that there is at all times enough work ahead to tax the maximum capacity of men and machines. Indeed, present navy-yard conditions furnish a direct incentive for perpetuating soldiering and other inefficiencies; inevitable changes, due to the opening of the Panama Canal, will only serve to accentuate these conditions, for, be it remembered, the opening of the canal means an immediate decrease in the amount of work to be performed in the north Atlantic yards.

The output of the Boston Navy Yard for the calendar year 1911 was burdened with an indirect expense totaling more than $1,575,000 when figured on a commercial basis.[1]

Figured on this same basis the indirect expense at the New York yard for the fiscal year 1911 totals over $2,000,000, and at the Portsmouth yard approximately $500,000. The total actual indirect expense of the three plants, exclusive of the salaries of the many officers who are heads and assistant heads of yard departments, runs well over $4,000,000 annually.

Concentration would greatly reduce the burden of indirect expense imposed upon the consolidated output of the three industrial plants, for as compared with the requirements of the present three independent plants it would mean a great reduction in the nonproductive labor expense through the fact that fewer foremen, tool dressers, repair men, clerks, draftsmen, etc., would be needed; it would mean a reduction (due to elimination of duplication in buildings, machine tools, etc.) in the expense for repair material, depreciation, etc. Throwing the work of the three present plants into one consolidated plant would insure a large consolidated output; there would be a decided reduction in the percentage of indirect expense chargeable to this output; hence there would be a decided reduction or saving in the unit cost of the output. Mr. Harrington Emerson, efficiency engineer, has stated that "the best way * * * to reduce the percentage of general expenses (indirect expenses) is to increase output." (Harrington Emerson, "Shop Betterment and the Individual Effort Method of Profit Sharing.")

The argument often made, particularly by navy-yard employees, that all the larger navy yards should be allowed to build battleships and their auxiliaries, as well as repair them, in order to increase the output of the industrial plants to full capacity is not economically sound, for the cost of Government-built ships is practically prohibitive. The U. S. S. *Connecticut*, built at the New York Navy Yard, cost the Government about $400,000 more than her sister ship the U. S. S. *Louisiana*, built by private contract; and this comparison does not take into consideration the indirect expense that should have been, but was not, charged to the construction of the *Connecticut*. (Data quoted by Chairman Foss, Naval Affairs Committee, CONGRESSIONAL RECORD of Feb. 20, 1911, pp. 1910–1911.) The U. S. S. *Florida*, also built at the New York Navy Yard, cost the Government approximately $2,182,000 more than her sister ship the U. S. S. *Utah*, built by private contract, notwithstanding that an indirect expense of about $500,000 that should properly have been charged during construction, and would have been charged by a private shipyard, was excluded from the indirect cost of the *Florida*.

The saving effected in the productive or direct expense by the concentration proposed would be immediate, important, and would apply to both labor and material directly chargeable to the output of the industrial plant. Under present conditions a large sum of money is constantly tied up in the stock of material that must be maintained at each of the three yards, and most of the purchases for the yards are made independently. The stock of material for the one plant would be appreciably less than the aggregate stock it is now necessary to keep on hand for the three plants; furthermore, this stock could be replenished more systematically and consequently more economically.

But the greatest saving of all would be effected in the direct labor expense. It is but natural that the men in the shops of the Boston Navy Yard should feel as they do, that they must "nurse" their jobs to avoid working themselves out of employment on account of lack of work. They reason, and their reasoning is based on experience, that nursing the work will postpone the inevitable lay off. With the concentration of the North Atlantic navy-yard work at the proposed plant on Narragansett Bay, the one plant could be run to at least approximately full capacity. A large force of men would thus have the assurance of permanent employment, and the most compelling incentive for systematic soldiering or loafing would at once be eliminated. With the elimination of the incentive for soldiering there would be eliminated the practice most responsible for excessive navy-yard costs, for systematic soldiering is the greatest and most expensive of industrial evils.

This is demonstrated by the extremely high cost of the work performed on those ships laid up at the Boston Navy Yard for extensive overhaul and repairs. The tendency is to treat extensive work on a ship undergoing general overhauling as "knitting work," with the result that important jobs drag along for weeks and months, until a date is set for the departure of the ship from the yard, when, in order to finish the work on time, that most expensive of navy-yard practices—the introduction of extra shifts of men, who must necessarily work at a disadvantage—is resorted to, with the likelihood that the emergency of bringing the work to final completion will necessitate the yet more expensive procedure of working the men over eight hours per day and allowing them pay and a half for such overtime. Right now (February) extra shifts are at work on the U. S. S. *Illinois*, a ship that has been under overhaul at the Boston Navy Yard since the summer of 1909 and is due to go to sea March 15, 1912; an overhaul period within which a new battleship could be built, commissioned, and sent to the other side of the world.

The inspection department has repeatedly noted and reported the existence of systematic soldiering on work for the *Illinois*. Here are a few specific examples: Four men consumed 90 working hours putting 3 sections of fire main and 1 tee in place; work that should not have taken more than 8 hours each for 1 machinist and 2 helpers, or a total of 24 working hours. Sixty-six working hours were consumed by six men in erecting two sections of fire main; work that one machinist and a helper could have performed in eight working hours. Forty working hours were consumed by two men in laying out two holes for gas ejector piping; work that one machinist could perform in half an hour. One more case just to drive home the fact that all navy-yard costs are excessive, and be it remembered that these quoted navy-yard costs would be even higher if the indirect expense were figured on a commercial basis: Two 6-inch drill guns were repaired for the *Illinois* at a cost of $656.66. One of these drill guns, of the latest type, was made in a navy yard at a cost of $258.49. Had these two guns been scrapped instead of being repaired, and had two new drill guns been manufactured at a cost of $258.49 each, or $516.98 for the two guns, the service would have had two new guns of the latest type and $139.68 would have been saved to the Government.

Mr. Frederick W. Taylor, consulting engineer, and the author of the so-called "Taylor" system of scientific management, has stated that "The natural laziness of men is serious, but by far the greatest evil from which both workmen and employers are suffering is the systematic soldiering * * * which results from a careful study on the part of the workmen of what they think will promote their best interests." (F. W. Taylor, Shop Management, pp. 30–32.)

Concentration would permit of the introduction of a common-sense system of modern management that would, by the elimination of wasted effort, wasted material, clumsy methods, etc., and the introduction of scientific planning of work, result in increased economy without any impairment of the fighting efficiency of the fleet. The first aim of scientific management is to increase efficiency; increased efficiency unites high wages (paid in recognition of individual effort) with a low labor cost (the result of increased output), and this means economy. It will thus be seen that scientific management, to be successful, must result in increased output. Present navy-yard conditions clearly indicate, however, that even the inducement of higher wages for the work they perform would not be sufficient to induce the workmen to increase their daily output if they believed that by so doing they would soon throw themselves out of employment altogether—by reason of lack of work. Hence the knowledge on the part of the employee that there is plenty of work ahead of him, that when he is finished with one job another will be ready for him, is absolutely essential to the successful introduction of scientific management. This end can be accomplished by concentrating at one plant enough work to keep steadily employed a large permanent force.

Concentration would permit of a better, more just, and more economical classification of the trades; for with a large force always at work the inducement of permanent employment would attract more and better workmen, and there would no longer be any necessity for overrating men in order to compensate them for frequent lay-offs and to insure their return to the yard when their services are again needed.

Although it is claimed that the proposed location in Narragansett Bay is impracticable because of its being too remote from a labor market, yet this argument is not founded on fact, for Narragansett Bay is near the labor centers of Providence, R. I., and Fall River, Mass. Moreover, Narragansett Bay is but a few hours' ride from Boston and New York. Large industrial plants that are comparatively isolated from labor markets experience no difficulty in securing an ample supply of competent help. This is exemplified in the case of the steel plant at Gary, Ind. England has found it impracticable to locate naval bases near centers of population. The wages of the employees would mean more to them in comfort and health than in the congested conditions of this city or of New York.

It is clear that the proposed change would effect a saving in the direct or productive expense; that the saving would be substantial is evidenced by the fact that the productive labor expense at the Boston Navy Yard for the calendar year 1911 approximated $1,100,000; that the productive labor at the New York Navy Yard for the fiscal year 1911 totaled $2,267,000; that this expense at the Portsmouth yard totaled about $642,000 for the last fiscal year; that the total annual productive-labor expense of the three yards is approximately $4,100,000.

Centralization would save a large part of the present cost of maintenance of the military establishments at the Boston, New York, and Portsmouth Navy Yards, for it would mean the elimination of the duplication of expense that now exists by reason of duplication of military functions at the three yards. At the Boston Navy Yard the annual maintenance cost of the general storekeeper's department alone, none of which expense is charged to the industrial plant, is over $100,000.

Everything else being equal, it must be the decision of an unprejudiced public opinion that the economies herein shown to be possible—economies that insure annual savings aggregating hundreds of thousands of dollars—permit of but one inevitable conclusion—that the Secretary of the Navy should be given that measure of public support and congressional authority necessary to a comprehensive and complete application of his plans. The justice of this decision becomes even more clear in the light of the knowledge that the consummation of these plans will be to the distinct advantage of industrial Boston and will promote the military efficiency of the Navy. The situation does not permit of a choice between present navy-yard conditions and the conditions it has been shown would pertain under centralization, for with the opening of the Panama Canal present navy-yard conditions will no longer exist. In the last analysis the people must choose between a policy that will not only perpetuate but increase present inefficiencies, and a policy that will eliminate those inefficiencies, make possible an immediate and material saving in expense, and that will at the same time insure the progressive attainment of further economies.

This question of selling useless navy yards is not a sectional question; it concerns every citizen in these United States, and it is a question the responsibility for the correct and sane solution of which the people can not shift to their Representatives at Washington. The time has arrived when the people must realize that in demanding of their Representatives that they stand sponsor for present navy-yard inefficiencies they are virtually demanding of these representatives that they aid and abet just such reckless expenditure of public funds as is exemplified in the disgraceful perpetuation of public buildings and rivers and harbors extravagances, for while the Representatives from navy-yard States are being importuned to prevent the sale of navy

[1] At the Boston Navy Yard the indirect expense is figured in accordance with the following formula:

Shop expense + power expense + pro rata of general industrial expense ÷ productive labor of shop concerned = indirect per cent.

In this way the percentage for each shop is figured each month, and the actual percentages for one month are used as estimated percentages for the following month. The indirect expense of a given shop for a given month is prorated to the output of that shop by taking the prevailing shop percentage of the direct labor of each specific job order and adding the amount thus obtained to the cost of the output covered by the job.

But from the indirect expense as figured at the navy yards is excluded the following items that would be included by private shipyards and industrial establishments:

1. Officers' salaries (heads and assistant heads of departments).
2. Clerical wages and salaries.
3. Pay of draftsmen.
4. Pay allowed employees on leave.
5. Pay allowed employees for holidays.
6. Expense of handling and testing stores.
7. Depreciation.
8. Fire insurance.
9. Interest on capital invested.
10. Taxes.
11. Expense of repair jobs that cost over $25.

The total indirect expense of the Boston Navy Yard for the calendar year 1911, when figured to include all but the first of the above-excluded items of expense, is approximately $1,575,000. The writer has computed this total on the basis of the value of the navy-yard industrial plant as appraised by expert accountants, and depreciation, fire insurance, interest, and taxes have been figured in accordance with the usual commercial practice, the depreciation percentages used being those recommended by the accountants.

yards other Representaties are confronted by the insatiable demands of their constituents for ever-increasing appropriations for public buildings, etc., with the natural and inevitable result that, willy-nilly, the Representatives are forced to pool their interests and complete the vicious cycle.

Not only because of the benefits that would accrue as a direct result of such action, but by virtue of the even larger Federal economies that would accrue as the result of such a conspicuous repudiation of a vicious and self-perpetuating practice—economies that would go far toward saving to the public the aforesaid $300,000,000—the Boston Navy Yard and the New York and Portsmouth yards should be sold by the Government.

The CHAIRMAN. The gentleman from Rhode Island [Mr. GERRY] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The CHAIRMAN. There is a point of order pending.

Mr. PADGETT. Mr. Chairman, I make the point of order.

The CHAIRMAN. The point of order is sustained, and the Clerk will read.

The Clerk read as follows:

Contingent, Bureau of Medicine and Surgery: For tolls and ferriages; care, transportation, and burial of the dead; purchase of books and stationary, binding of medical records, unbound books, and pamphlets; hygienic and sanitary investigation and illustration; sanitary and hygienic instruction; purchase and repairs of wagons, automobile ambulances, and harness; purchase of and feed for horses and cows; trees, plants, garden tools, and seeds; incidental articles for the Naval Medical School and naval dispensary, Washington; rent of rooms for naval dispensary, Washington, D. C., not to exceed $1,200; naval medical supply depots, sick quarters at Naval Academy and marine barracks; washing for medical department at Naval Medical School and naval dispensary, Washington; naval medical supply depots, sick quarters at Naval Academy and marine barracks, dispensaries at navy yards and naval stations, and ships; and for minor repairs on buildings and grounds of the United States Naval Medical School and naval medical supply depots; for the care, maintenance, and treatment of the insane of the Navy and Marine Corps on the Pacific coast; for dental outfits and dental material, not to exceed $38,000, and all other necessary contingent expenses; in all, $142,000.

Mr. O'SHAUNESSY. Mr. Chairman, may I at this moment renew my request to extend my remarks in the RECORD?

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Transportation of remains: To enable the Secretary of the Navy, in his discretion, to cause to be transferred to their homes the remains of officers and enlisted men of the Navy and Marine Corps who die or are killed in action ashore or afloat, and also to enable the Secretary of the Navy, in his discretion, to cause to be transported to their homes the remains of civilian employees who die outside of the continental limits of the United States, $15,000: *Provided*, That the sum herein appropriated shall be available for payment for transportation of the remains of officers and men who have died while on duty at any time since April 21, 1898, and shall be available until used.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order to the clause "and shall be available until used." I would like to inquire of the chairman whether there is any need for having this appropriation.

Mr. PADGETT. It has been explained to us by the head of the bureau that it is, for the reason that these men in the service abroad die in different countries. They have different laws and regulations relative to the transportation of remains, some requiring that there shall be burials for certain periods before they shall be transported from place to place across the country, and in other places they are buried and later the families at home conclude they desire to have the remains brought to this country, and make requests for that, and as long as there is this uncertainty as to the lack of uniformity in the regulations of different countries, and the families here at home at different times asking for remains after a lapse of time, and it being only a small appropriation—$15,000—we thought it ought to be allowed.

Mr. STAFFORD. It is not a question of amount. It is a question of principle and a question of accounting. Can the gentleman conceive of any case where there is a contrariety of custom and where the time that would be consumed would be more than two years?

Mr. PADGETT. This is a year.

Mr. STAFFORD. I thought perhaps the gentleman would be willing to say "until June 30, 1916," instead of "until used."

Mr. PADGETT. I have no objection to that.

Mr. STAFFORD. Instead of saying "shall be available until used" make it read "shall be available until June 30, 1916."

Mr. PADGETT. Make the motion.

Mr. STAFFORD. I would prefer that the gentleman would make it.

Mr. PADGETT. Mr. Chairman, I offer the amendment, on page 26, line 20, to strike out the word "used" and insert "until June 30, 1916."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 26, in line 20, by striking out the word "used" and inserting "until June 30, 1916."

The CHAIRMAN. The question is on the adoption of the amendment.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

BUREAU OF SUPPLIES AND ACCOUNTS.

Pay of the Navy: Pay and allowances prescribed by law of officers on sea duty and other duty, $10,287,744; officers on waiting orders, $500,000; officers on the retired list, $3,099,433; clerks to paymasters at yards and stations, general storekeepers ashore and afloat, and receiving ships and other vessels, $320,520; 2 clerks to general inspectors of the Pay Corps, $3,625; 1 clerk to pay officer in charge of deserters' rolls, $2,000; not exceeding 10 clerks to accounting officers at yards and stations, $17,355; dental surgeon at Naval Academy, $2,400; commutation of quarters for officers on shore not occupying public quarters, including boatswains, gunners, carpenters, sailmakers, machinists, pharmacists, and mates, naval constructors and assistant naval constructors, $400,000; and also members of Nurse Corps (female), $14,120; for hire of quarters for officers serving with troops where there are no public quarters belonging to the Government, and where there are not sufficient quarters possessed by the United States to accommodate them, or commutation of quarters not to exceed the amount which an officer would receive were he not serving with troops, $100,000; pay of enlisted men on the retired list, $359,127; extra pay to men reenlisting under honorable discharge, $964,812; interest on deposits by men, $34,568; pay of petty officers, seamen, landsmen, and apprentice seamen, including men in the engineers' force and men detailed for duty with Naval Militia, and for the Fish Commission, 48,000 men, $23,027,777.40; and the number of enlisted men shall be exclusive of those undergoing imprisonment with sentence of dishonorable discharge from the service at expiration of such confinement, $283,854.60; and as many machinists as the President may from time to time deem necessary to appoint, not to exceed 20 in any one year, $200,000; and 3,500 apprentice seamen under training at training stations and on board training ships, at the pay prescribed by law, $275,808; pay of the Nurse Corps, $116,580; rent of quarters for members of the Nurse Corps, $1,000; in all, $40,010,724; and the money herein specifically appropriated for "Pay of the Navy" shall be disbursed and accounted for in accordance with existing law as "Pay of the Navy," and for that purpose shall constitute one fund.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph. I would like to inquire, if the gentleman will permit, where this item was carried in last year's bill. Is it not out of the usual order in this bill?

The CHAIRMAN. The Chair did not hear the gentleman.

Mr. STAFFORD. I was addressing an inquiry to the chairman of the committee, having reserved a point of order.

Mr. PADGETT. It was in an earlier part of the bill heretofore, and was carried as a lump sum. If we had put it last year, it would have been forty million at the conclusion, but we thought it proper and better legislation to divide up so large an appropriation and give the House an idea of the amounts that were appropriated for these different items. Heretofore it has been in the bill simply in this language, commencing with the beginning of it and running down to the end, and the bill last year had $39,364,000, the amount stated there.

Mr. STAFFORD. There is no new phraseology as carried in the existing item?

Mr. PADGETT. No, sir. It is transferred from the Bureau of Navigation to the Bureau of Supplies and Accounts for the reason that the Bureau of Supplies and Accounts has distributed it heretofore and handled it and done everything except estimated for it, and the Chief of the Bureau of Navigation and the Chief of the Bureau of Supplies and Accounts stated that by transferring it to Supplies and Accounts, where it properly belongs, they could save the clerical hire for several clerks.

Mr. STAFFORD. Mr. Chairman, I certainly wish to compliment the committee for segregating these various items so that Congress can have a greater control over the expenditure of the various items included here. I certainly do not wish to stop the good work that is being done by this excellent committee, and accordingly I withdraw the reservation of the point of order.

The CHAIRMAN. The reservation of the point of order is withdrawn.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

Mr. PADGETT. Let me offer an amendment first, and then I will take it up with the gentleman. Mr. Chairman, I offer an amendment to correct a misprint.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Tennessee [Mr. PADGETT].

The Clerk read as follows:

Amend, page 27, line 11, by striking out the figures "$400,000" and inserting in lieu thereof the figures "$499,000."

Amend, page 27, line 17, by striking out the figures "$100,000" and in lieu thereof inserting "$1,000."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. MANN. Mr. Chairman, I have noticed that the "Pay of the Navy" is put under the Bureau of Supplies and Accounts, and the first item of the bill is "Pay, miscellaneous." Is that all handled in the same place in the Navy Department?

Mr. PADGETT. It is in the Navy Department; but "Pay, miscellaneous," is under the Secretary himself, in his control, while "Pay of the Navy" is placed here under the Bureau of Supplies and Accounts. It was formerly under the Bureau of Navigation.

Mr. MANN. It was under the Secretary of the Navy?

Mr. PADGETT. "Pay, miscellaneous," was.

Mr. MANN. "Pay of the Navy" was under the Secretary of the Navy heretofore?

Mr. PADGETT. Yes; but estimated for by the Bureau of Navigation.

Mr. MANN. I do not know who estimated for it, but I am speaking of the form of the bill.

Mr. PADGETT. Yes, sir.

Mr. MANN. I think it might be wise to change the title of "Pay, miscellaneous" in another bill. It is not pay at all. It is a contingent fund. Anybody examining the bill would suppose that that was the place where he would find "Pay of the Navy."

Mr. BARTON. Mr. Chairman, I desire to oppose the amendment. I would like to ask the chairman of the committee a question. At the bottom of page 26, line 25, is an item, "Officers on the retired list, $3,099,433." What officers does that include? What does it mean?

Mr. PADGETT. It includes all the officers on the retired list of the Navy, from the highest to the lowest.

Mr. BARTON. I would like to know at what age they are retired.

Mr. PADGETT. At the age of 62, ordinarily; but sometimes they may be retired for disabilities incurred.

Mr. BARTON. Are they retired on full pay?

Mr. PADGETT. No; on three-fourths pay.

Mr. BARTON. A similar item is found on page 27, line 17, "Pay of enlisted men on the retired list, $359,127."

Mr. PADGETT. Yes; they are retired after 30 years' service.

Mr. BARTON. Thirty years' service?

Mr. PADGETT. Yes, sir.

Mr. BARTON. Does the gentleman know how many officers we have on the retired list?

Mr. PADGETT. There is a tabulated statement of them given here in the book of hearings. I could not state them offhand.

Mr. BARTON. About how many? I have not had an opportunity to examine the hearings.

Mr. PADGETT. There are 1,026 officers on the retired list and 423 enlisted men on the retired list.

Mr. BARTON. Do they have any other perquisites outside of their salary?

Mr. PADGETT. Nothing except that three-fourths pay.

Mr. BARTON. Three-fourths?

Mr. PADGETT. Yes, sir. Did the Chairman submit the amendment which I offered to a vote?

The CHAIRMAN. No. The question is on agreeing to the amendment offered by the gentleman from Tennessee.

The amendment was agreed to.

Mr. PADGETT. Mr. Chairman, I have another amendment which I desire to offer as a separate paragraph.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Tennessee.

The Clerk read as follows:

Amend, page 28, after line 12, by inserting the following as a separate paragraph:

"That the accounting officers of the Treasury are hereby authorized and directed to allow in the accounts of disbursing officers of the Navy all payments heretofore made by them in accordance with orders or regulations of the Secretary of the Navy for commutation of subsistence to members of the Nurse Corps of the Navy at the rate therein specified."

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on that.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] reserves a point of order on the amendment.

Mr. PADGETT. In the law of last year, approved March 4, 1913, there appeared this language, inserted for the benefit of the members of the Nurse Corps:

That the accounting officers of the Treasury are hereby authorized and directed to allow in the accounts of disbursing officers of the Navy all payments heretofore made by them in accordance with orders or regulations of the Secretary of the Navy for commutation of subsistence to members of the Nurse Corps of the Navy at the rate therein specified.

This is a letter which I have received from the Secretary of the Navy:

NAVY DEPARTMENT,
Washington, March 13, 1914.

MY DEAR MR. PADGETT: I inclose a copy of my predecessor's letter to you of January 6, 1913, in pursuance of which the following provision was incorporated in the naval act approved March 4, 1913 (37 Stat., 892):

"That the accounting officers of the Treasury are hereby authorized and directed to allow in the accounts of disbursing officers of the Navy all payments heretofore made by them in accordance with orders or regulations of the Secretary of the Navy for commutation of subsistence to members of the Nurse Corps of the Navy at the rate therein specified."

The inclosure clearly indicates that the legislation therein recommended was primarily for the relief of the nurses who had been checked, and the department believes that your committee and the Congress so understood it.

That was correct. It was so stated on the floor that it was for the purpose of allowing these nurses who were checked for what had been held to be an overpayment on account of their commutation of subsistence. There was a difference, running in varying amounts, and Congress intended to put this clause in to benefit the nurses themselves. I read further:

Yet, in a decision dated April 29, 1913, the Comptroller of the Treasury ruled that the provision above cited was for the relief of disbursing officers involved and not for the relief of the nurses; or, in other words, that those nurses whose accounts had not actually been checked need not be checked, the payments made being allowed to stand, while those whose accounts had been checked could not be reimbursed, but must be made to bear the checkage. Some were checked as much as $180, requiring from six months to a year to liquidate.

The department earnestly desires that a relief measure may be included in the pending bill, upon which there may be no likelihood of a misinterpretation of its intent, and suggests that the following would have the desired effect—

Which is what I have heretofore referred to,

Mr. MANN. Will the gentleman read that again?

Mr. PADGETT. It is—

That the accounting officers of the Treasury are hereby authorized and directed to allow members of the Navy Nurse Corps the amounts which, as commutation of subsistence, have been at any time checked against their accounts or withheld from them as the result of the decisions of the Comptroller of the Treasury dated December 21, 1912, and April 29, 1913, and to pay said sums out of any appropriation for "Provisions, Navy."

Mr. STAFFORD. I have no objection to the amendment, after the statement of the chairman of the committee.

Mr. MANN. I make the point of order against the amendment.

The CHAIRMAN. The point of order is sustained.

Mr. PADGETT. We attempted to legislate for this last year, and under the decision of the comptroller some of the nurses get the benefit of the legislation and some do not.

Mr. MANN. Mr. Chairman, I made the point of order last year, but it was fixed up somewhere else.

The CHAIRMAN. The point of order is sustained.

Mr. MANN. This is just an effort to increase their pay, and, if you want to do it, do it directly and squarely.

Mr. PADGETT. No; this is for commutations.

Mr. MANN. We went all over it last year.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The grade of acting chaplain in the Navy is hereby authorized and created, and hereafter original appointments shall be made by the Secretary of the Navy, not to exceed the number hereinafter provided, in the grade of acting chaplains in the Navy after such examination as may be prescribed by the Secretary of the Navy, and while so serving acting chaplains shall have the rank, pay, and allowances of lieutenant, junior grade, in the Navy. After three years' sea service on board ship each acting chaplain before receiving a commission in the Navy shall establish to the satisfaction of the Secretary of the Navy by examination by a board of chaplains and medical officers of the Navy his physical, mental, moral, and professional fitness to perform the duties of chaplain in the Navy, and, if found so qualified, shall be commissioned a chaplain in the Navy with the rank of lieutenant, junior grade. If any acting chaplain shall fail on the examinations herein prescribed he shall be honorably discharged from the naval service, and the appointment of any acting chaplain may be revoked at any time in the discretion of the Secretary of the Navy.

Mr. STAFFORD. I reserve a point of order against that paragraph.

Mr. TRIBBLE. I reserve a point of order.

Mr. STAFFORD. I yield to the gentleman from Georgia, a member of the committee.

Mr. PADGETT. I ask unanimous consent, pending the reservation of the point of order, to read the other paragraphs relating to the chaplains, so that the whole matter may be considered at once.

Mr. STAFFORD. I have no objection to that.

The CHAIRMAN. What is the request?

Mr. PADGETT. That the Clerk read the other paragraphs relating to chaplains.

Mr. STAFFORD. To have them all considered as one paragraph?

Mr. PADGETT. Yes.

Mr. MANN. That the three paragraphs be considered as one paragraph.

Mr. PADGETT. Certainly.

Mr. STAFFORD. With the point of order considered as pending?

Mr. PADGETT. Yes.

Mr. STAFFORD. I have no objection to that.

The Clerk read as follows:

Hereafter the total number of chaplains and acting chaplains in the Navy shall be 1 to each 1,250 of the total personnel of the Navy and Marine Corps as fixed by law, including midshipmen, apprentice seamen, and naval prisoners, and of the total number of chaplains and acting chaplains herein authorized 10 per cent thereof shall have the rank of captain in the Navy, 20 per cent the rank of commander, 20 per cent the rank of lieutenant commander, and the remainder to have the rank of lieutenants and lieutenants, junior grade.

Naval chaplains hereafter commissioned from acting chaplains shall have the rank, pay, and allowances of lieutenant, junior grade, in the Navy until they shall have completed four years' service in that grade, when, subject to examination as above prescribed, they shall have the rank, pay, and allowances of lieutenant in the Navy, and chaplains with the rank of lieutenant shall have at least four years' service in that grade before promotion to the grade of lieutenant commander, after which service chaplains shall be promoted as vacancies occur to the grades of lieutenant commander, commander, and captain: *Provided*, That not more than seven acting chaplains shall be commissioned chaplains in any one year: *And provided further*, That no provision of this section shall operate to reduce the rank, pay, or allowances that would have been received by any person in the Navy except for the passage of this section, and that all laws or parts of laws inconsistent with the provisions of this section be, and the same are hereby, repealed.

Mr. MADDEN. I make the point of order against the paragraph.

Mr. TRIBBLE. I make the point of order.

Mr. PADGETT. It is subject to a point of order, if gentlemen insist upon it.

The CHAIRMAN. The point of order is made by the gentleman from Illinois [Mr. MADDEN], the gentleman from Georgia [Mr. TRIBBLE], and the gentleman from Wisconsin [Mr. STAFFORD].

Mr. STAFFORD. I reserved it.

The CHAIRMAN. The gentleman from Wisconsin reserved the point of order. Does the gentleman from Georgia or the gentleman from Illinois make the point of order?

Mr. MADDEN. I have made the point of order, Mr. Chairman.

The CHAIRMAN. The point of order is made and sustained against the three paragraphs. The Clerk will read.

Mr. LOGUE. Mr. Chairman, I ask unanimous consent to return to page 22, line 21, for the purpose of asking unanimous consent that the point of order made by me against that paragraph may be withdrawn—that I may have the privilege of withdrawing it.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to return to page 22, line 21, and that the point of order made by him to that paragraph be withdrawn. Is there objection?

There was no objection.

The CHAIRMAN. There being no objection, the point of order is withdrawn.

Mr. PADGETT. Mr. Chairman, I offer an amendment, to insert in the bill, on page 22, at line 20, the language contained from lines 20 to 24, inclusive, which went out on the point of order.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After line 19, page 22, insert the following:

"Navy Yard, Norfolk, Va.: Repairs, buildings, St. Helena, $25,000; the 150-ton crane authorized by the act of March 4, 1913, shall be of the floating revolving type, and the limit of cost is hereby increased to $450,000."

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Tennessee.

Mr. STAFFORD. Mr. Chairman, as this is quite a large project, will the gentleman inform the committee as to the need of changing the former authorization of a land crane to a floating, revolving type of crane?

Mr. PADGETT. It is not a land crane. It is a floating crane in both instances, but when they designed the crane within the limit of cost authorized in the other bill——

Mr. STAFFORD. What was that amount?

Mr. PADGETT. That was $300,000—it became very manifest that it would be an inefficient crane and would not answer the purpose; and, at the suggestion of members of the committee, I asked the Secretary to hold up the letting of the contract under the old authorization until this matter could be submitted to the Congress, so that there could be a crane built that would be sufficient to answer the purpose and not be a waste of the money.

Mr. STAFFORD. As I recall, there is a floating crane at the New York yard and one at the Boston yard.

Mr. PADGETT. Yes; and this one has been authorized at the Norfolk yard.

Mr. STAFFORD. Is this a new type or design, different from those in use at the Boston and New York yards?

Mr. PADGETT. Yes. When we visited the Boston yard last summer we were so impressed with the awkwardness and inferiority of the type of crane that was being used there and its bunglesome character that we recommended this change. This gives a revolving type. The other is not a revolving type.

Mr. STAFFORD. Is it a cantilever?

Mr. PADGETT. It is a cantilever crane, and it will just reach out and pick up an object on the land. To replace it, they would have to turn the whole crane around.

Mr. STAFFORD. I assume this new type of crane is in use in some of the large private shipyards?

Mr. PADGETT. Yes; it is in use in some of the private yards, but not in a Government yard.

The amendment was agreed to.

Mr. MADDEN. Mr. Chairman, I suggest that it might be wise if we could have a quorum here. There are one or two very important items that may be reached.

Mr. PADGETT. Will not the gentleman let us run for 15 minutes? I will move that the committee rise in 15 minutes.

Mr. MADDEN. Very well.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Provisions, Navy: For provisions and commuted rations for the seamen and marines, which commuted rations may be paid to caterers of messes, in case of death or desertion, upon orders of the commanding officers, commuted rations for officers on sea duty (other than commissioned officers of the line, Medical and Pay Corps, chaplains, chief boatswains, chief gunners, chief carpenters, chief machinists, and chief sailmakers) and midshipmen, and commuted rations stopped on account of sick in hospital and credited at the rate of 50 cents per ration to the naval hospital fund; subsistence of officers and men unavoidably detained or absent from vessels to which attached under orders (during which subsistence rations to be stopped on board ship and no credit for commutation therefor to be given); and for subsistence of female nurses, and Navy and Marine Corps general courts-martial prisoners undergoing imprisonment with sentences of dishonorable discharge from the service at the expiration of such confinement: *Provided*, That the Secretary of the Navy is authorized to commute rations for such general courts-martial prisoners in such amounts as seem to him proper, which may vary in accordance with the location of the naval prison, but which shall in no case exceed 30 cents per diem for each ration so commuted; and for the purchase of United States Army emergency rations as required; in all, $7,713,954.50, to be available until the close of the fiscal year ending June 30, 1916.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order to make an inquiry. I notice there is a provision increasing the amount on the rations heretofore allowed in the hospitals from 30 to 50 cents, and later on in the paragraph we find a provision where the amount of the ration is limited to 30 cents.

Mr. PADGETT. That is a commutation of rations for the well. In the hospitals, where the commutation is required, it requires more delicate food and better preparation and in a more careful way. Upon the recommendation of the department, in order to care for the sick in the hospital, we put it at 50 cents, while the general commutation for the whole force is 30 cents.

Mr. STAFFORD. I presume there is additional allowance needed for those confined in the sick room, where they require better rations?

Mr. PADGETT. Yes; better preparation and a different character of food.

Mr. STAFFORD. Now, as to the last clause making this large appropriation of nearly $8,000,000 available until the end of the fiscal year 1916.

Mr. PADGETT. That has been carried heretofore.

Mr. STAFFORD. Whether it has been carried heretofore or not, I ask the chairman's opinion as to the need of it. Glancing over the list of enumerated items I can not see where there is anything that needs continuing beyond the end of the fiscal year.

Mr. PADGETT. That matter was fully discussed before the committee last year and also in Congress. Very often they advertise for products of various kinds. There are certain products that will be advertised for and can not be furnished until the end of the fiscal year or the beginning of the next year, and the result is that very often they have to turn back into the Treasury money available for this purpose when they receive the supplies, say, at the end of July or the 1st of August.

Mr. STAFFORD. The concrete case given by the gentleman would be where the advertisement would be so close to the end of the fiscal year that the contract might not be let until a few days after the end of the year and, of course, that money would not be available.

Mr. PADGETT. Yes.

Mr. STAFFORD. I withdraw the point of order.

The Clerk read as follows:

Maintenance, Bureau of Supplies and Accounts: For fuel; the removal and transportation of ashes from ships of war; books, blanks, and stationery, including stationery for commanding and navigating officers of ships, chaplains on shore and afloat, and for the use of courts-martial on board ship; purchase, repair, and exchange of typewriters for ships; packing boxes and materials; interior fittings for general storehouses, pay offices, and accounting offices in navy yards; coffee

mills and repairs thereto; expenses of naval clothing factory and machinery for the same; modernizing laboratory equipment and bringing the same up to date; purchase of articles of equipage at home and abroad under the cognizance of the Bureau of Supplies and Accounts, and for the payment of labor in equipping vessels therewith, and the manufacture of such articles in the several navy yards; musical instruments and music; mess outfits; soap on board naval vessels; athletic outfits; tolls, ferriages, yeomen's stores, safes, newspapers, and other incidental expenses; labor in general storehouses, paymasters' offices, and accounting offices in navy yards and naval stations, including naval stations maintained in island possessions under the control of the United States, and expenses in handling stores purchased and manufactured under "General account of advances"; and reimbursement to appropriations of the Department of Agriculture of cost of inspection of meats and meat food products for the Navy Department: *Provided*, That the sum to be paid out of this appropriation, under the direction of the Secretary of Navy, for chemists and for clerical, inspection, and messenger service in the general storehouses, paymasters' offices, and accounting offices of the navy yards and naval stations for the fiscal year ending June 30, 1915, shall not exceed $643,000; in all, $2,031,487.25.

Mr. MADDEN. Mr. Chairman, I reserve a point of order on the language "and reimbursement to appropriations of the Department of Agriculture of cost of inspection of meats and meat food products for the Navy Department," lines 9 to 12, page 32.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. PADGETT. As I understand the gentleman, he reserves a point of order on the language in line 12 down to the word "*Provided*."

Mr. MADDEN. Yes. I wish to ask the chairman of the committee what the purpose of reimbursement is to the Department of Agriculture. The Department of Agriculture is inspecting the beef and food products for all the people in the United States, and I wish to know the reason why they should be reimbursed for the work done for the Navy Department.

Mr. PADGETT. The Navy Department is very careful and thorough in the inspection of all food products, and has been utilizing the inspectors of the Department of Agriculture. The department has been doing that, but during the last fall or summer the Secretary of Agriculture notified the Navy Department that it was becoming so large and the demands were so great that the force was unable to devote so much of their time and so many of their inspectors to the work of the Navy Department without compensation—that they could not do it unless the Navy Department bore some of the expense, and in order to secure the benefit of that and pay for it and not require the Department of Agriculture to increase its appropriation, in order to do the work for the Navy Department, the Navy Department should pay for its own inspection, and this clause was inserted.

Mr. MADDEN. Does the gentleman think that was a wise thing to do?

Mr. PADGETT. I do; yes.

Mr. ROBERTS of Massachusetts. May I call the attention of the gentleman to the fact that we were advised that the Bureau of Meat Inspection wanted the Navy Department to take over bodily these inspectors that had been doing the naval work, and the Navy Department did not want to do it, because the work is not continuous and localized enough to warrant carrying a permanent division but they can utilize from time to time the inspectors of the Agricultural Department? In that way the Navy Department would get the best inspection for its meat and maintain the cost of the inspection.

Mr. MADDEN. I do not want to embarrass either department, and so I will withdraw the point of order.

Mr. STAFFORD. Mr. Chairman, my reservation was largely to the matter which the gentleman from Illinois has just referred to, but I would like to inquire as to some new phraseology in the paragraph, and that is the purchase of articles of equipage. Will the gentleman inform the committee what those words refer to?

Mr. PADGETT. It appears as new language inserted here, but it is not new language as it has appeared in legislation from time to time. The gentleman will note that the Bureau of Equipment, that has been for a number of years in a suspended state under an Executive order, its duties having been distributed and the appropriations distributed among the various bureaus, is now abolished. We are simply putting in this bill the language under which in all former bills these duties have been distributed and administered.

Mr. STAFFORD. This phraseology "articles of equipage" has a well-defined and technical meaning in the department?

Mr. PADGETT. Yes; and has been carried in the bill under Bureau of Equipment.

Mr. STAFFORD. I withdraw the point of order.

The Clerk read as follows:

Coal and transportation: Coal and other fuel for steamers' and ships' use, including expenses of transportation, storage, and handling the same; maintenance and general operation of machinery of naval coaling depots and coaling plants; water for all purposes on board naval vessels; and ice for the cooling of water, including the expense of transportation and storage of both, $4,800,000.

Mr. THOMSON of Illinois. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, in his last annual report Secretary Lane called attention to the necessity of the Government taking action to retain sufficient oil lands in the West to meet the needs of our Navy and make our ships independent of the world so far as fuel is concerned.

I wish to call the attention of the House to the following statement contained in that report:

The United States will need oil for its Navy as well as coal, and probably in increasing quantities as the modern oil-burning or gas-burning engines are recognized. It would be economical to substitute oil for coal for many reasons—to reduce labor cost, to avoid the building and maintenance of colliers, and the purchase and support of coaling stations. The Diesel engine can, with the fuel carried from the home port, take one of our greatest ships around the world without dependence upon a renewed supply of fuel. England's adventure in this direction will presumably force other nations into like enterprise, and yet England has no oil fields on which to draw, while we have already the largest producing fuel-oil fields in the world, and others are appearing. Already we know of oil in Alaska, and within a few weeks a fine grade of oil has been found on the Quinaielt Indian Reservation in Washington. The Indian oil lands we do not own. They belong to the Indians, and their product must be sold for the Indians' profit. The one sole reservation of oil lands for Governmental use is that in California, over the withdrawal of which litigation is now pending. Under these conditions it would seem of the highest expediency that the Government make such offers as will induce the proving of our lands, and of these proved lands retain sufficient to make our ships independent of the world and as fully competent as their rivals.

At the hearings held by the Committee on Naval Affairs testimony was given by Secretary Daniels and Admiral Griffin to a similar effect. The latter official testified before the committee on January 13, 1914, as follows:

In general, it may be said that all of the oil produced in the eastern part of the United States is too valuable for use as fuel; that the only oils which should be used as fuels are those produced in Mexico and California.

On the following day Admiral Griffin said:

I would like to add to what was said on the subject of oil yesterday that a supply of oil is absolutely necessary for us, and is becoming more and more necessary every year, because all the vessels we are now building are exclusively oil burners. The coal burners are being put in reserve. This last year we put five coal-burning destroyers in reserve, and next year we will get two oil-burning battleships. They will be our first oil-burning ships and will replace two coal-burning ships. Henceforth all ships added to the fleet will be oil burners. All ships we build will be oil burners, and unless we are sure of a cheaper supply of oil our fuel bills are going to mount up very rapidly. I understand that the Land Office has no funds sufficient to investigate all the claims and patents for oil lands within the confines of the naval petroleum reservation, and, of course, that handicaps us in making any move whatever to get oil of our own from these reserves. I merely wish to let you know the situation so that you will understand that the fuel bills are going to mount very rapidly unless we can get cheaper oil

On the 13th the chairman of the committee, Mr. PADGETT, made the following statement:

The question of oil, which the department is considering, is a very serious one. The consumption of oil for the present fiscal year is estimated at about 16,000,000 gallons, and for the next fiscal year it is estimated that we will use over 30,000,000 gallons. The price of oil is going up. It has gone up more than 50 per cent during the last year so that we are multiplying the consumption and very largely the companies are multiplying the price, and it is raising a very serious question. The Secretary is considering the question, and we have been discussing with him some plan so that the Navy could make itself independent of having to purchase from these companies by reserving Government lands or acquiring them, if it is necessary, and the Government developing its own oil.

May I also call your attention to further statements to be found in the report of the recent hearings had by the Committee on Naval Affairs.

On page 660 we find a statement made by the chairman, Mr. PADGETT, in reply to a question by Secretary Daniels, in which statement he said:

My understanding is that President Taft withdrew certain lands in California from entry, but they are in litigation; that several concerns, the railroad company, and a lot of other concerns, are litigating the title of the Government, and that they are at this time involved in suits.

Secretary Daniels stated to the committee that we now have 60 ships in the Navy using oil only, and that the Engineering Bureau of the Navy estimated that they would use 30,000,000 gallons of oil in the year ending June 30, 1915, as against 14,000,000 for the current year. The Secretary stated that there should be an appropriation of $500,000 to buy or lease oil-bearing lands. He called attention to the fact that Great Britain had been very alert to secure oil fields, for the use of her navy, in Mexico and in Central America, and said he felt it essential that we look ahead and do something along the same line in our country, adding: "It is hard to get oil lands, and that is the reason we should begin early, and press it." He also called attention to the fact that British capitalists have already secured one-quarter of the oil lands in California and that they have large holdings in Oklahoma.

Again, in the hearings we find the following (p. 667):

Secretary DANIELS. Probably all of the California lands are claimed; some within the withdrawal are patented and some are in litigation. The Land Office has not as yet made a complete investigation.

Mr. BUTLER. The only opportunity is in California?

Secretary DANIELS. Yes; unless we can secure Indian lands in Oklahoma, or, in the ordinary course of business, buy or lease other lands.

On page 694 of the hearings we find a statement by the Secretary of the Navy in which he sets out the advantages of oil burning in the ships of the Navy. He there says:

The advantages of oil burning are so great that they can not be given up by us for military purposes. A far better ship can be built using oil instead of coal, and this carries with it reliability and ease of steaming, the element of human exhaustion in firing and trimming coal and its effects being eradicated. Boilers may be crowded close together, thus saving weight and space which can be utilized elsewhere. One smokestack only is necessary, thereby giving a more convenient arrangement of turrets and angles of train; the interference of smoke and gases with fire-control parties and gunnery is reduced to a minimum, and smoke and smokelessness may be had at will, which in certain tactical cases is of marked advantage.

Last September I introduced a resolution in this House, after the Attorney General's office had tried to persuade me not to, which referred to certain California oil lands, title to which is claimed by the Government but possession of which is had by the Southern Pacific Railroad Co. That resolution was referred to the Committee on the Judiciary. It reads as follows:

Whereas by act of Congress approved July 27, 1866, there was granted to the Southern Pacific Railroad Co. certain lands, with a proviso excluding all mineral lands from said grant (except iron or coal lands); and

Whereas patents were issued to said company for said lands, which patents excluded in express terms all mineral lands (except iron or coal lands); and

Whereas the lands described in said patents included mineral lands bearing petroleum, approximately to the extent of 125,000 acres and of the estimated value of over $1,000,000,000, which lands are claimed by said Southern Pacific Railroad Co., which company denies that the United States has any right, title, or interest in or to said lands, or any part thereof; and

Whereas after a lapse of more than two years, during which time it was well known to the Department of Justice that the Southern Pacific Railroad Co. and its lessees were drilling wells on this land and extracting petroleum therefrom in large quantities, a bill was filed by said department on December 20, 1912, in the United States District Court for the Southern District, Northern Division, of California, wherein it is sought to have the title to approximately 46,000 acres of said petroleum lands adjudged to be in the United States, free from all claims by said railroad company or its lessees, and it is reported that other suits are to be started to cover the remainder of said petroleum lands; and

Whereas certain private parties, claiming that said petroleum lands did not pass from the United States to said Southern Pacific Railroad Co. under said grant and said patents, have made certain mining locations upon said petroleum lands, and, basing their claims on said locations, have filed certain suits against the said Southern Pacific Railroad Co., claiming title to said lands under and by virtue of said locations, one of which suits is Burke against Southern Pacific Railroad Co. and Kern Trading & Oil Co., wherein the demurrer of the defendants to the bill of complaint was sustained in the court below, and which case is now pending in the United States Supreme Court on seven certain questions of law which have been certified to it by the circuit court of appeals; and

Whereas it is alleged in the Government's bill of complaint above referred to that at the time the Southern Pacific Railroad Co. selected the lands in question and applied for patent thereto it was well known by it that a large quantity of the lands applied for were mineral lands within the provisions of the grant of July 27, 1866; and further alleges that there was a mutual understanding between the company and the Government to the effect that the issue of the patent should not be considered as any adjudication by the Department of the Interior as to the mineral or nonmineral character of any of the lands described therein; and that it was further agreed by and between said company and the Government that if the Department of the Interior should issue said patent, excepting from its terms said mineral lands, without any examination or adjudication as to the mineral or nonmineral character of said lands, the said exception of mineral lands should be valid and effective, wherefore said company is estopped to deny the validity or effectiveness of said exception; and further, it is alleged in said bill of complaint that in order that said company might enjoy the fruits of their fraud in assuming title to said mineral lands by extracting and selling mineral deposits in said lands and at the same time conceal from the Government the true facts in the premises, the said company caused the codefendant, Kern Trading & Oil Co., to be organized, since which time the railroad company has been engaged through said oil company in extracting and selling large quantities of minerals from said lands; and

Whereas it became generally known that the Government proposed to bring suit to establish its title to said mineral lands on or about January 1, 1910, and at that time the said railroad company had about 40 producing wells on said lands, and immediately thereafter the operations of said company, through said oil company, were rapidly increased until it now has more than 40 drilling outfits working night and day, seven days in the week, constructing new oil wells on said lands, and said oil company is now extracting petroleum from approximately 150 wells in large quantities and of a value of approximately $250,000 each month, and is increasing this output as rapidly as it possibly can, and several other companies are doing the same thing under pretended leases from the Southern Pacific Railroad Co., for which all said oil companies are paying a royalty to said railroad company; and

Whereas it is reported that no further steps are to be taken by the Department of Justice in the suit of the Government against said companies until the Supreme Court has decided the case brought by private individuals against said companies; and

Whereas it is reported that the cases brought against said companies by said private individuals were delayed at the request of the Department of Justice upon the representation that suit was to be instituted by the Government and that the Government was in a position to present a much stronger case than the private litigants could, which delays extended over one year, when the said private litigants refused to delay longer; and

Whereas the issues raised in the suit of the Government against the railroad company and the oil company are not the same as those presented in the suits brought against said companies by said private litigants, and therefore the decision of the Supreme Court in the latter cases can not preclude the success of the Government in its case; and

Whereas it is reported that during the past three years this litigation has been so handled by the Department of Justice as to be most advantageous to the Southern Pacific Railroad Co. and that the attorneys responsible for the policy of the Department of Justice now in charge of this litigation are conducting it in a manner most advantageous to the Southern Pacific Railroad Co. rather than to the Government: Therefore be it

Resolved, That the Attorney General be, and he is hereby, directed to inform the House of Representatives what action, if any, has been taken by the Department of Justice, or any duly organized agent or attorney thereof—

First. To stop the construction of oil wells on the lands hereinabove referred to as the mineral lands claimed to have been excepted from the operation of the grants and patents issued to the Southern Pacific Railroad Co.

Second. What action, if any, has been taken by said Department of Justice to stop the extraction of petroleum from such lands by said railroad company or those who claim to be its lessees or assigns.

Third. What action has been taken by said department to protect the interests of the Government in and to said lands and minerals, other than the filing of the bill of complaint on December 20, 1912, as hereinabove referred to.

From the facts set forth in this resolution you will see that by act of Congress approved July 27, 1866, certain lands were granted to the Southern Pacific Railroad Co., which act contained a proviso excluding from its operation all mineral lands except coal and iron lands.

Under this act patents were issued to the company for these lands, which patents excluded in express terms all mineral lands except coal or iron lands.

The lands described in the patents included mineral lands bearing petroleum, approximately to the extent of 125,000 acres and of the estimated value of over $1,000,000,000. These lands are now claimed by the Southern Pacific Railroad Co., which company denies that the United States has any right, title, or interest in or to the lands or any part thereof.

Certain private parties, claiming that these petroleum lands did not pass from the United States to the Southern Pacific Railroad Co. under this grant and these patents, made certain locations thereon under the mining laws, treating the lands in question as public lands of the United States. The Government, however, refused to recognize such locations, taking the position that the lands in question had passed from the people of the United States into the hands of the railroad company; whereupon these private parties I have referred to filed certain suits against the railroad company, claiming title to said lands under and by virtue of the locations they had made, and one of these suits is entitled "Burke *v.* Southern Pacific Railroad Co. and Kern Trading & Oil Co." This case is now pending in the United States Supreme Court.

The Southern Pacific Railroad Co., not having the power under its charter to engage in the business of producing and selling oil, the Kern Trading & Oil Co. and the Associated Oil Co. and others furnish the convenient instruments through which the railroad company operates on these oil lands. The former is owned wholly by the Southern Pacific interests and the latter is controlled by that company through the ownership of 51 per cent of its stock. These companies are operating the lands in question under alleged leases from the railroad company and selling the oil, and this oil is being marketed through the connections these companies have with the Standard Oil Co.

On January 1, 1910, the Southern Pacific interests had fewer than 50 producing oil wells upon the 125,000 acres of oil land included within the lands described in the patents which had been issued to the railroad company. Since the question of the passing of these oil lands under these patents has been raised, these companies have put down over 150 wells and are taking millions of dollars' worth of oil from them. It is asserted that these companies are removing oil from these lands of a value of approximately $250,000 each month, and they are increasing this output as fast as they possibly can, for all of which the companies are paying a handsome royalty to the railroad company. At the present time these dummy oil companies have more than 40 drilling outfits working on these lands day and night, seven days in the week, constructing new wells so that the exploitation of these lands by the Southern Pacific Railroad may yield the greatest possible amount of profit before the question of the status of these lands may be determined.

Up to the time of the institution of the suits by Edmund Burke and other independent oil producers who have been in

competition with the Standard Oil Co. for years nothing had been done by either the Department of the Interior or the Department of Justice to clear the title of the United States from the claim of the Southern Pacific. They took the position that title to these oil lands had passed from the United States to the railroad company by the issuance of the patents, and that the Department of the Interior had no jurisdiction over them. But as soon as the independent operators filed their suits, attempting to acquire some of these lands through locations under the mining laws, and the acquisition of the oil by the big oil interests of the country bid fair to be interfered with, we witness the spectacle of the Department of the Interior reversing itself. As soon as these private parties and independent operators made their locations and filed their suits, Secretary Ballinger, notwithstanding the position previously assumed, issued an order withdrawing the lands from appropriation by citizens on the theory that they were then public lands of the United States. The only effect of this action was to protect the Southern Pacific from the annoyance of further locations and suits. This was in September, 1909.

During December, 1912, B. D. Townsend and T. J. Butler, special assistants to the Attorney General, wrote a brief to be filed in the Supreme Court in the Burke case, which I have referred to. Mr. Knabel, Assistant Attorney General, furnished the attorneys of the Southern Pacific a copy of this brief in manuscript, and after they had criticized it and objected to certain parts of it, he very accommodatingly rewrote it and eliminated from it the parts that did not please the railroad attorneys. This being done, the brief was filed in the Supreme Court. Of course, it can not be possible that it is a practice followed by the Department of Justice to furnish opposing counsel with copies of briefs on behalf of the Government before they are filed in court, for the purpose of revision by them. Then why are we to suppose it was done in this case? Is there anything in the fact that we find independent oil producers on one side of the case and the Southern Pacific Railroad Co. on the other side, together with their subsidiary oil companies transacting business through the Standard Oil Co.? Is there anything in that situation, I repeat, which would seem to warrant the Attorney General or his assistant, Mr. Knabel, appearing in the case as the friend of the court and collaborating with counsel for the latter interests in the preparation of the Government's brief? If there is any such thing, I fail to appreciate it. And yet we have Mr. Maxwell Evarts, representing the Southern Pacific interests, stating in the Supreme Court, at the argument of the Burke case, that he had received a copy of the brief above referred to from Mr. Knabel and had objected to parts of it, and that those parts had been eliminated before the brief was filed.

You will further see from the facts set forth in the preambles to the resolution that after the Government had known of the contentions of the independent operators and the increasing operations of the railroad company through its dummies for over two years a bill was finally filed on December 20, 1912, in the United States District Court for the Southern District, Northern Division, of California against the Southern Pacific and others, wherein it is sought to have the title to approximately 46,000 acres of said petroleum lands, adjudged to be in the United States, free from all claims by said railroad company or its assigns or lessees.

It may be noted that this suit covers only a portion of the lands in question. About a year ago Mr. Butler, then in charge of these cases, requested the Attorney General to secure abstracts of title for the lands in patent No. 25, issued to the Southern Pacific, which have been found to be petroleum-bearing mineral lands. The abstracts were never forthcoming, and no suits other than the one I have mentioned have been started in this matter. And all the while the railroad company, through its lessees, is pumping this land dry. Under date of August 21, 1913, the California Oil World printed as news a statement that the Associated Oil Co., a subsidiary of the Southern Pacific, was hauling material to commence the drilling of wells upon part of the land that would have been included within the suit covering the lands under patent No. 25. The article stated that 30 wells were to be constructed upon one section which would have been included in that suit.

It is interesting to note, in passing, that in whatever conveyances the railroad company has made affecting any of the lands included in these patents it has taken the precaution to insert a clause reading, "reserving all claim of the United States to the same as mineral lands." It should also be noted that the exceptions in these railroad grants are not reservations of the minerals in the lands, but of the lands themselves.

In the suit which I have referred to, started against the Southern Pacific Railroad Co. on December 20, 1912, the bill which was filed on that date alleges that at the time the railroad company selected the lands in question and applied for patent thereto it was well known by it that a large quantity of the lands applied for were mineral lands within the provisions of the grant of July 27, 1866; and it is further alleged that there was a mutual understanding between the company and the Government to the effect that the issue of the patent should not be considered as any adjudication by the Department of the Interior as to the mineral or nonmineral character of any of the lands described therein; and that it was further agreed by and between said company and the Government that if the Department of the Interior should issue said patent, excepting from its terms said mineral lands, without any examination or adjudication as to the mineral or nonmineral character of said lands, the said exception of mineral lands should be valid and effective; wherefore said company is estopped to deny the validity or effectiveness of said exception; and further, it is alleged in said bill of complaint that in order that said company might enjoy the fruits of their fraud in assuming title to said mineral lands, by extracting and selling mineral deposits in said lands, and at the same time conceal from the Government the true facts in the premises, the said company caused the codefendant, Kern Trading & Oil Co., to be organized, since which time the railroad company has been engaged, through said oil company, in extracting and selling large quantities of minerals from said lands.

Among other things, the bill prays for the appointment of a receiver, that the interests of the people of the United States both to the lands and the oil may be conserved.

This case is referred to in the annual report of the Attorney General, Mr. Wickersham, for the year ending June 30, 1912. On pages 40 and 41 of that report, after referring to other land litigation, the report proceeds as follows:

> In this connection it is proper to refer to other litigation concerning the same character of subject matter—mineral, and particularly petroleum lands of immense value—but of different legal aspect, which is soon to arise between the Government and the Southern Pacific Railroad Co. and others claiming under it. The legislation under which that company obtained its grants of public lands expressly excepted mineral lands other than lands valuable chiefly for iron or coal. A large number of patents have heretofore been issued to the company which in express terms except from the premises patented all mineral lands other than iron or coal lands. Among the lands described in these patents which, but for the exceptions, they would purport to convey are large areas of petroleum-bearing lands in California, said to be of a value exceeding $500,000,000. It is the contention of the railroad company and those claiming under it that the exceptions in the patents are void. This department, however, and the Department of the Interior have for many months been engaged in making preparations to institute suits in equity for the purpose of testing this question judicially, contending that in view of the provisions of the granting acts, the express terms of the exceptions of the patents, and the circumstances under which the patents were delivered and accepted, the exceptions are not void, but must be deemed valid and operate to exclude the petroleum lands in controversy and all other mineral lands from the premises granted by the patents. The preparations for the institution of these suits are about completed, and the suits will be instituted at an early day. In the meantime a case to which the Government was not a party, but which involves directly some of the points which the Government will raise in its proposed litigation, has reached the Supreme Court upon certification of questions by the circuit court of appeals for the ninth circuit, and has been advanced for hearing in January next. Upon motion of the Solicitor General, the court granted leave to the United States to file a brief. (Burke *v.* Southern Pacific Railroad Co. et al., No. 682, October term, 1912.)

The last annual report of the Attorney General, Mr. McReynolds, again refers to this case. The paragraph in that report to which I refer reads as follows:

> The last report spoke of prospective litigation of great importance respecting oil lands in California claimed by the Southern Pacific Railroad Co. under patents containing express exceptions of all mineral lands other than iron and coal lands. The work of preparation then referred to was completed during the last fiscal year as to one of the patents, which affects more known oil land than any of the others, and on December 20, 1912, suit was instituted asserting title to approximately 46,000 acres. This suit is pending on motion to dismiss the Government's bill of complaint upon the general grounds that were urged in the private suit of Burke *v.* Southern Pacific Railroad Co. et al., now pending in the Supreme Court, and referred to in the last annual report. Suitable provisions have been made to expedite the litigation, to bring new suits, and to protect in every practicable way the Government's rights in the land and to the oil which has been and is being extracted from certain parts of it.

With these assurances from the Attorney General in mind, let us see what has been done with this case of the United States against the Southern Pacific Railroad Co., started a year ago last December. It is still pending on a motion to dismiss the Government's bill. Not a finger has been lifted by the Government in that important litigation in all this time beyond the filing of the bill. The Attorney General's office has not even made a motion for the appointment of a receiver. Not a finger has been raised, even to asking the court to overrule the motion entered by the defense to dismiss the bill.

Contrast with this record the conduct of the prosecution of the suits by the Government against the independent producers to test the validity of the withdrawal orders. The first of these suits was filed in the United States District Court for the Dis-

trict of Wyoming during the latter part of January or in February, 1913. That suit was long since put on its way from the circuit court of appeals to the Supreme Court of the United States, while the suit filed on December 20, 1912, against the Southern Pacific et al., is reposing peacefully in the same status that existed when this Wyoming suit was filed. But the Attorney General will point out that suits against independent producers similar to the Wyoming suits were filed in California by the Department of Justice, but have not been pushed. Of course not. No one would expect an official or a department to so far forget himself or itself as to furnish such a contrast as would be produced by pushing litigation against independent operators in the same court in which a case against the Southern Pacific was being permitted to lie dormant.

But let us inquire why this important case has been permitted to remain pending on a motion to dismiss the bill for more than a year. A pretended reason for this course of action is contained in the language I quoted some minutes ago from the last report of the Attorney General, where it is stated that the motion to dismiss is pending—

upon the general grounds that were urged in the private suit of Burke v. Southern Pacific Railroad Co. et al., now pending in the Supreme Court.

In other words, it is claimed that the decision of the Supreme Court in the Burke case will determine the issues raised in the Government's case. That is a complete withdrawal from the position taken by the department when it urged the independents (Burke and others), as they did, to postpone their litigation until the Government could prosecute its suit, because the Government was in a position to make a stronger case against the railroad company than the private parties could.

The Department of Justice would seem to be prolific in nothing if not in its ability to reverse itself completely when the occasion would seem to call for action as forced as that.

The department was right in contending that the Government was in a position to make out a stronger case against the railroad company than the private interests could, for it can raise an issue of estoppel against the Southern Pacific and its allied interests, as alleged in the bill already filed, which the private interests are not in a position to raise and have not raised in their suit, and Mr. Townsend himself admitted this important difference in the cases when I mentioned the matter in a conversation I had with him on the occasion of a visit he made to my office a few days before I introduced my resolution on this subject. It had been intimated to the department that I had the matter in mind, and the Attorney General sent Mr. Townsend to see me and endeavor to induce me to forego the introduction of my resolution.

We are assured in the quotation I have made from the last annual report of the Attorney General that—

Suitable provisions have been made to expedite the litigation, to bring new suits, and to protect in every practicable way the Government's rights in the land and to the oil which has been and is being extracted from certain parts of it.

In view of the fact that the litigation in question has not been expedited, that new suits have not been started, and also that the Government's rights in the land and to the oil are not being protected, information as to what the "provisions" referred to are would at least be illuminating.

Upon the introduction of my resolution the Attorney General attempted to submit the information requested, not to the House nor to the Committee on the Judiciary, to which the resolution was referred and where it has peacefully slumbered for nearly seven months, but to the public through the press. I wish as briefly as possible to refer to the different paragraphs of his reply.

This statement was issued by the Attorney General October 3, 1913. In his statement the Attorney General says:

The securing of injunctions and the capping of the present producing wells would mean the flooding of many of the wells with water and their consequent ruin. In some cases this would mean the ruin of whole fields of petroleum.

In answer to this, it should be stated that in all these wells the oil is cemented off wherever water has been encountered in the overlying strata. Only a small proportion of the wells are bothered with water. If the withdrawal order I have referred to is effective to reserve the land and the mineral deposits in it to the United States, the taking of the oil is unlawful and the court has the power to appoint a receiver upon application of the Government to operate the wells which have been completed and to do all things necessary to protect them and to sell the oil, pay the necessary expenses, and hold the surplus proceeds pending the final determination of the controversy. Indeed, in the bill which the Government has filed it asks for the appointment of a receiver, but the Department of Justice has never seen fit to press that request. Why, pray?

The Attorney General's statement further reads:

Every barrel of oil extracted by the Southern Pacific and its allied concerns is recorded. The pending suit asks for an accounting and for indemnity for oil taken out, and there will be no difficulty in computing the exact sum due the Government if the oil-land suits are won.

Is this a comedy the Attorney General is performing? Think of this Government relying upon the accurate data compiled by the Southern Pacific on which to base the amount of damages to be disgorged and forced from that charitable organization upon losing the litigation brought against it by the Government.

But suppose that were possible; it would not be the railroad company that would be liable to pay this money, but the lessee oil companies. And what condition are they in? Why, the Kern Trading & Oil Co. can be thrown into bankruptcy in a moment, and by no less a power than the Southern Pacific Railroad Co. itself. The Southern Pacific Co. has loaned to the Kern Trading & Oil Co., the largest producer from these lands, the sum of $6,000,000, and no doubt has a mortgage upon all of its property to secure the debt; and it is quite as certain that all of its property is not sufficient to pay this first lien. The Attorney General should at least stop trying to be funny where so much is involved.

The statement proceeds to say:

Practically the only way to prove the mineral character of the lands involved is by sinking wells. Every producing well drilled by the Southern Pacific is an aid to the Government cases.

It has been quite beyond my powers of comprehension to understand why the Department of Justice seeks to insure a monopoly to the Southern Pacific in the matter of furnishing the Government proof in litigation against that company. Shed a tear for the poor Southern Pacific Railroad Co., my friends, or, better still, wire their attorneys and acquaint them with the facts, so that that poor, ignorant corporation may be stayed in this suicidal rush in which it is engaged.

Again, the statement says:

The securing of injunctions on the disputed lands embraced within the Roosevelt withdrawal order of 1909 would cripple practically all the independent producers of California, to the great advantage of the Standard Oil Co.

The Attorney General should explain how an injunction affecting operations on odd-numbered sections of land would interfere with the independent producers of California, who are all operating on mining locations of 160-acre tracts or less, and nearly all of them on the even-numbered sections.

Finally, the statement says:

The securing of injunctions is doubtful, as the Government would have difficulty in making a showing of irreparable injury in view of the solvency of the companies operating and the fact that an exact record of all the oil abstracted is kept.

Oh, consistency, thy name is not McReynolds! First this gentleman tells us the Government should not seek an injunction, because it would cause irreparable injury, and now he winds up with the statement that the Government could not get an injunction because it could not show irreparable injury. Of course, nobody suffers an irreparable injury by the unlimited sinking of wells and removal of oil by corporations on land that belongs to the people! Certainly not! Are not these dummy companies solvent, and do they not keep accurate records against the day of reckoning? There can be no doubt of it! Why not allow our dreams full sway and imagine them depositing all their gains in a trust fund for safe-keeping, merely awaiting the outcome of the little matter of this friendly litigation?

I have already pointed out how active the railroad company has been in the meantime. They have been pumping that land day and night, removing oil of a value of approximately $250,000 each month and marketing it through their dummy companies to the Standard Oil Co.; and more than that, I have called attention to the fact that they have many drilling outfits working on these lands day and night, seven days in the week, constructing new wells, so that the exploitation of these lands may yield the greatest possible amount of profit before the question of the status of these lands may be determined, as it will be whenever the Attorney General sees fit to go ahead with this and other similar cases that he has failed to even start as yet.

Weeks ago I wrote to Secretary Daniels calling his attention to this sleeping litigation that is the subject of the resolution I introduced last fall, and expressing the hope that he would urge the necessities of the case upon the Attorney General from the standpoint of the needs of the Navy.

And what has become of my resolution? That, too, has been put to sleep by the Committee on the Judiciary of this House.

A fine spectacle indeed! Behold the Secretary of the Navy urging Congress to appropriate half a million dollars to secure oil lands in California to furnish our Navy with the fuel it must

have for its many ships that burn oil, and only oil, while the Attorney General's Office and the powers that be in this House sit still and allow the Southern Pacific Railroad Co. to hang onto a billion dollars worth of oil lands in California, title to which is in the United States, and continue to pump the land dry to the tune of a quarter of a million dollars' worth of oil a month.

It seems to me that this Southern Pacific litigation has been so handled by the Department of Justice as to be most advantageous to the defendants in that litigation, and that the attorneys responsible for the policy of that department, who are now in charge of the matter, are conducting it in a manner most advantageous to the Southern Pacific Railroad Co. and its associates rather than to the people and the Government.

Mr. Chairman, if these facts I have brought to the attention of the House are not correct, the Attorney General owes it to himself, to his department, and to the administration to transmit to this body the information called for in the resolution and esablish that fact.

If these facts I have outlined are true, then we owe it to the people of this country, whom we are representing here, and to ourselves as their Representatives, to require a reply to the inquiries propounded in this resolution, to call the attention of the country to the matter, and to take such further action as may seem to be warranted. [Applause.]

The Clerk read as follows:

Those portions of the acts of June 25, 1910, and March 4, 1911, which create the "Naval supply account" under the Bureau of Supplies and Accounts, are hereby so modified and amended that hereafter the appraised value of all stores, equipage, and supplies turned in from ships, and ships' equipage turned in from yards or stations (except salvage), shall be credited to the current appropriations concerned, and the amounts so credited shall be available for expenditures for the same purposes as the appropriations credited until expended; and all acts or parts of acts in so far as they conflict with this provision are hereby repealed.

Mr. MADDEN. Mr. Chairman, I reserve a point of order on the paragraph. I think we ought to have a quorum.

Mr. PADGETT. Let us dispose of this.

Mr. MANN. The gentleman will have a better explanation in the morning as to what this naval supply account means.

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to; accordingly the committee rose, and the Speaker having resumed the chair, Mr. JOHNSON of Kentucky, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 14024—the naval appropriation bill—and had come to no resolution thereon.

BILL TO CONSTRUCT DAMS ACROSS NAVIGABLE WATERS.

Mr. UNDERWOOD. Mr. Speaker, at the request of the gentleman from Georgia [Mr. ADAMSON], chairman of the Committee on Interstate and Foreign Commerce, and concurring in his request, I ask unanimous consent that H. R. 16053, a bill to amend an act to construct dams across navigable waters, that is now on the calendar, be made a continuing order, not to interfere with appropriation bills. I will say that this bill is of very great importance. It is impracticable to build dams across navigable streams under the present dam act, because we can not pass a bill to conform to it in Congress. Within the last 10 years, I think, three dams have been built across navigable waters and a very large number of dams built across waters that are not navigable. I think this is a good bill and should be considered by the House. I do not ask for any limitation on its consideration, but just to make a general order that it may be called up for consideration.

Mr. MANN. What the gentleman means is simply to give it a privileged status not to interfere with Mondays or Wednesdays or——

Mr. UNDERWOOD. Or appropriation bills.

Mr. JOHNSON of Kentucky. Mr. Speaker, reserving the right to object, I wish to inquire of the gentleman if he could not extend his request so as not to interfere with District of Columbia business.

Mr. MANN. This will not interfere with that.

Mr. UNDERWOOD. It does not interfere with Mondays or Wednesdays or appropriation bills.

The SPEAKER. The gentleman from Alabama asks unanimous consent to give the bill H. R. 16053 a privileged status and to make it a continuing order not to interfere with appropriation bills or Mondays or Wednesdays.

Mr. BUCHANAN of Illinois. What about pension days—Fridays?

Mr. UNDERWOOD. I will say to the gentleman I can assure the gentleman it will not interfere.

Mr. MANN. The best form in which to put this is to give it the status of a bill reported from a committee with the right to report at any time, and then it is subject to recognition and does not take the place of any regular order asked for.

Mr. UNDERWOOD. I concede that; that is satisfactory to me.

Mr. GARRETT of Tennessee. Reserving the right to object, I understand the same thing is to be requested for another bill.

Mr. UNDERWOOD. I understand there will be a similar request made for another bill. This bill comes from the Committee on Interstate and Foreign Commerce. I think it is an important bill, and my purpose in asking this is really to give a chance to consider it when appropriation bills are not being considered, or on Wednesdays or Mondays, and so far as Fridays are concerned——

Mr. GARRETT of Tennessee. There is no conflict between this bill and the other?

Mr. COVINGTON. Not at all.

The SPEAKER. The Chair would like to inquire for his own information, to help business along, so we may get away from here some time or other, about how long will it take to discuss this bill?

Mr. UNDERWOOD. I believe if we get a whole day the chairman of the committee could probably dispose of general discussion in a day's time in the Committee of the Whole if he can get it at one time. The purpose of this order, Mr. Speaker, is not to interfere with the general business of the House, but to enable them to take up this bill when the House is not crowded on something else, and for that reason I thought it wiser not to put in pensions, although I can assure the gentleman pensions will not be interfered with, because some days there may be an hour or two after pensions are disposed of when this bill could be considered.

The SPEAKER. The gentleman from Alabama asks unanimous consent that H. R. 16053 be given a privileged status, to be the continuing order, not to interfere with appropriation bills or Mondays or Wednesdays, or pensions. The Chair will put that in himself. The Chair does not want to get into a hobble about it. Is there objection? [After a pause.] The Chair hears none.

INTERSTATE TRADE COMMISSION.

Mr. COVINGTON. Mr. Speaker, I would like to make the same request for the bill H. R. 15613, a bill to create an Interstate Trade Commission and defining its powers and duties.

The SPEAKER. The gentleman from Maryland makes the same request as to H. R. 15613, the trades commission bill. Is there objection?

Mr. GOLDFOGLE. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Maryland what is the haste about this bill at this time?

Mr. COVINGTON. There is no unnecessary haste about the bill, I will state to the gentleman from New York [Mr. GOLDFOGLE]; but the Commission on the Revision of the Laws now occupies the call on Calendar Wednesday, and it apparently has a bill pending which, based upon the situation relating to a similar bill three or four years ago, will probably occupy that calendar day for the remainder of this session of Congress. The bill to create an Interstate Trade Commission has no privileged status, and it can only be considered by unanimous consent or as the result of a special rule. The Committee on Interstate and Foreign Commerce believes that the bill, which is a part of the definite administration trust program, will have no chance to be considered at this session of Congress, unless a consent such as I have asked is acceded to by the House.

The SPEAKER. Is there objection?

Mr. BUCHANAN of Illinois. Mr. Speaker, reserving the right to object, I would like to know if this bill will take the place of or interfere with any of the trust legislation which is going to be introduced?

The SPEAKER. This will come up first, unless some arrangement is made——

Mr. COVINGTON. The bill is itself a part of the trust legislation.

The SPEAKER. Unless somebody asks the same status for the trust bills.

Mr. COVINGTON. I hope the gentleman will withdraw his objection until I explain what the bill really is.

Mr. BUCHANAN of Illinois. Will it interfere with any of the special rules which the Committee on Rules may bring in?

Mr. COVINGTON. Not at all. It will not interfere with any program to facilitate the trust legislation. It is part of that trust program outlined by the President in his trust message and subsequently referred to the Committee on Interstate and Foreign Commerce. It does not run counter to any of the legislation now pending in the Committee on the Judiciary, nor

has the Committee on the Judiciary pending in the committee any bill bearing in any way on the subjects dealt with by the interstate trade commission bill. The two committees are laboring to complete the definite trust program.

Mr. BUCHANAN of Illinois. I do not want to let a condition develop where this bill will have privilege over the trust legislation.

Mr. COVINGTON. This bill will have no privilege over the remainder of the trust legislation which will in any way cause delay to the subjects the gentleman is interested in.

Mr. BUCHANAN of Illinois. At this time I do not feel that I can give my consent to let it be privileged over the trust bill.

The SPEAKER. Is there objection?

Mr. BUCHANAN of Illinois. Mr. Speaker, I object.

LOT 44, SQUARE 172, WASHINGTON, D. C.

Mr. SLAYDEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 5031 and put it on its passage. It is a bill to remove a slight cloud on the title to one of the lots in plat 172, recently purchased for the site of the memorial building to the women of the Civil War period.

The SPEAKER. The gentleman from Texas asks unanimous consent to take from the Speaker's table and consider the Senate bill which the Clerk will report.

The Clerk read as follows:

A bill (S. 5031) quieting the title to lot 44 in square 172 in the city of Washington.

Be it enacted, etc., That for the purpose of removing a cloud from the title to lot 44 in John Rothert's subdivision in square 172 in the city of Washington, D. C., whatsoever right, title, or interest the United States may have in and to said lot by reason of escheat or otherwise, be, and the same is hereby, quitclaimed unto Delia C. Condron, owner of the record title.

Mr. MANN. Mr. Speaker, reserving the right to object, and I think I shall not object, because of the interest of the Red Cross in this, the fact is that there is no occasion whatever for the passage of the bill. It is proposed that the United States shall buy the title to this property, and now it is proposed here that the United States convey its present title to persons who claim to own the lot. Well, if the United States acquires their title, it will have a good title to the property. The truth is, we have law providing that persons who are foreigners, and who die, do not transmit their real estate by inheritance. Every time it takes effect we pass a special bill to remove the effect. There has been no instance, I think, that has been called to the attention of the Congress, where the law took effect, that we did not pass a bill to remove the effect in the District of Columbia, where the law only applies. Now, here is a case where we are buying a lot and, finding that we already own the title to it, we propose to convey the title to the person who does not own the title in order to buy it back from that person. But, as I say, on account of the interest of the Red Cross in the matter I shall not object, although I think it is a very foolish proceeding.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read a third time, and passed.

On motion of Mr. SLAYDEN, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. SLAYDEN. Mr. Speaker, I move to lay on the table H. R. 14730, a bill of identical wording, reported from the committee of this House.

The SPEAKER. The gentleman moves to lay on the table the identical House bill. Without objection, it is so ordered.

There was no objection.

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 3468. An act for the relief of the heirs of the late Samuel H. Donaldson.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 5148. An act for the reinstatement of Lieut. Col. Constantine Marrast Perkins to the active list of the Marine Corps; to the Committee on Naval Affairs.

HOUR OF MEETING TO-MORROW.

Mr. PADGETT. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

Mr. MANN. Reserving the right to object, at what time will the committee rise to-morrow if it meets at 11 o'clock a. m.? I am willing to agree with the gentleman that the House meet at 11 o'clock a. m. if we adjourn in time to go to the ball game.

Mr. PADGETT. I want to finish the bill to-morrow if we can, and I think we can.

Mr. MANN. Well, that is impossible. Therefore I object.

ADJOURNMENT.

Mr. PADGETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 15 minutes p. m.) the House adjourned until Saturday, May 2, 1914, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. PARK, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 15110) to acquire by purchase, condemnation, or otherwise, additional land for the post office in the city of Thomasville, Ga., reported the same without amendment, accompanied by a report (No. 600), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. EAGAN, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 13180) to amend the act of March 4, 1913 (37 Stats., p. 872), so as to provide that in the construction of the public building at Roseburg, Oreg., provision shall be made for the accommodation therein of the United States post office, land office, Forest Service, Weather Bureau, Indian agent, and other governmental offices, reported the same with amendment, accompanied by a report (No. 603), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. CLARK of Florida, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 15000) authorizing the Secretary of the Treasury to disregard section 33 of the public-buildings act of March 4, 1913, as to site at Huntingdon, Tenn., reported the same without amendment, accompanied by a report (No. 604), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SINNOTT, from the Committee on the Public Lands, to which was referred the bill (H. R. 12919) to amend an act entitled "An act to provide for an enlarged homestead," reported the same with amendment, accompanied by a report (No. 605), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (S. 533) to consolidate certain forest lands in the Ochoco National Forest, Oreg., reported the same without amendment, accompanied by a report (No. 606), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. McKELLAR, from the Committee on Military Affairs, to which was referred the bill (H. R. 9335) for the relief of James H. Kelly, reported the same without amendment, accompanied by a report (No. 601), which said bill and report were referred to the Private Calendar.

Mr. BURNETT, from the Committee on Immigration and Naturalization, to which was referred the bill (H. R. 7781) admitting to citizenship and fully naturalizing Gordon W. Nelson, of the city of New York, in the State of New York, reported the same with amendment, accompanied by a report (No. 602), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. PETERSON: A bill (H. R. 16169) providing for the nomination of President and Vice President and the election of a member of the national committeemen for each State of each political party for whose candidates for presidential electors

20 per cent or more of the popular vote of the voters of the United States was cast at the last election for presidential electors, or for which hereafter 20 per cent or more of the popular vote of the voters of the United States may be cast for presidential electors; to the Committee on Election of President, Vice President, and Representatives in Congress.

By Mr. WINGO: A bill (H. R. 16195) to provide for the purchase and equipment of a mine rescue car and headquarters station therefor, and for other purposes; to the Committee on Mines and Mining.

By Mr. WILLIS: Petition of Frank S. Roof and 30 other citizens of Bellefontaine, Ohio, protesting against the adoption of House joint resolution No. 168, relating to national prohibition; to the Committee on the Judiciary.

SENATE.

SATURDAY, *May 2, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we bless Thee for government founded upon the principles of the Christian religion and dedicated to that which is godlike in man. In this great Government committed to our hands and sent out on its mission in the world's life, the responsibilities resting upon Thy servants in this honorable Senate grow more and more, and we look to Thee for Thy guidance and blessing that with a clear discernment of the divine plan they may so discharge the duties of this day and every day as to receive the divine favor and to continue under the divine leadership. For Christ's sake. Amen.

The Vice President being absent, the President pro tempore took the chair.

The Secretary proceeded to read the Journal of yesterday's proceedings.

Mr. BRYAN. I ask unanimous consent that the further reading of the Journal be dispensed with.

Mr. McCUMBER. I object, Mr. President.

The PRESIDENT pro tempore. Objection is made, and the Secretary will proceed with the reading of the Journal.

The Secretary resumed and concluded the reading of the Journal, and it was approved.

Mr. McCUMBER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from North Dakota suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Goff	Overman	Smith, Mich.
Borah	Gore	Owen	Smith, S. C.
Brady	Hitchcock	Page	Smoot
Brandegee	Jones	Perkins	Sterling
Bristow	La Follette	Pittman	Stone
Bryan	Lane	Poindexter	Sutherland
Burleigh	Lea, Tenn.	Pomerene	Swanson
Burton	Lippitt	Ransdell	Thomas
Catron	Lodge	Reed	Thompson
Chamberlain	McCumber	Robinson	Thornton
Clapp	McLean	Saulsbury	Tillman
Clark, Wyo.	Martin, Va.	Sheppard	Townsend
Clarke, Ark.	Martine, N. J.	Sherman	Vardaman
Crawford	Nelson	Shively	Walsh
Cummins	Norris	Simmons	West
Dillingham	O'Gorman	Smith, Ariz.	Works
Fall	Oliver	Smith, Ga.	

Mr. SHEPPARD. I desire to announce the unavoidable absence of my colleague [Mr. CULBERSON]. He is paired with the Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.

Mr. McCUMBER. I wish to announce the unavoidable absence of my colleague [Mr. GRONNA]. He is paired with the senior Senator from Maine [Mr. JOHNSON].

The PRESIDENT pro tempore. Sixty-seven Senators having answered to their names, a quorum of the Senate is present.

RIVER AND HARBOR IMPROVEMENTS (S. DOC. NO. 477).

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 9th ultimo, a statement showing by States outstanding liabilities and contract obligations under authority of law to June 30, 1913, for each river and harbor and canal, etc., and also a statement of amounts authorized to be contracted for for rivers and harbors and canals to June 30, 1913, for which appropriations have yet to be made, etc., together with a statement showing contract obligations authorized on account of the Panama Canal, which, with the accompanying paper, was referred to the Committee on Commerce and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House agrees to the amendment of the Senate to the bill (H. R. 3468) for the relief of the heirs of the late Samuel H. Donaldson.

The message also announced that the House had passed the bill (S. 5031) quieting the title to lot 44 in square 172 in the city of Washington.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the President pro tempore:

H. R. 3468. An act for the relief of the heirs of the late Samuel H. Donaldson; and

H. R. 2314. An act for the relief of Allen Edward O'Toole and others, who sustained damage by reason of accident at Rock Island Arsenal.

CITIZENSHIP OF FIVE CIVILIZED TRIBES.

Mr. OWEN. I ask permission to have reprinted Senate Document No. 472, with certain additions.

The PRESIDENT pro tempore. The Senator from Oklahoma asks that a certain document may be reprinted. Is there objection?

Mr. McCUMBER. I do not know whether there will be objection or not. I think the Senate is probably entitled to know what the document is that the Senator asks to have printed, and I object until we get some information upon the subject.

The PRESIDENT pro tempore. The Secretary will state what the document is.

The SECRETARY. Senate Document No. 472 of the present Congress and session, entitled "Citizenship of Five Civilized Tribes," a communication from the Assistant Secretary of the Interior to Hon. ROBERT L. OWEN, submitting a list of names of persons apparently equitably entitled to enrollment on the rolls of various tribes composing the Five Civilized Tribes of Oklahoma, and the list approved by attorneys of the Choctaw and Chickasaw Nations.

Mr. McCUMBER. There is nothing in the caption of that instrument to indicate any necessity for the public printing of the instrument.

Mr. OWEN. It has already been printed, Mr. President, and the addition which is proposed is the assent of the attorneys representing the various tribes.

Mr. McCUMBER. What is the object of the whole matter?

Mr. OWEN. The object of it is to place before the Senate the list of those persons who are found by the Interior Department apparently equitably entitled to be enrolled, and the assent is given by the attorneys of the Choctaw and Chickasaw Nations and the Creek Nation, those principally involved, to the enrollment of those persons.

Mr. McCUMBER. Is it the purpose of the Senator to have it referred to the Committee on Indian Affairs and printed for their convenience?

Mr. OWEN. It is my purpose to have it printed for the information of the Senate and referred to the Committee on Indian Affairs for their information.

Mr. McCUMBER. Has the Senator the slightest idea that any Member of the Senate, other than those who are directly interested in the possible question whether certain citizens may be put upon the rolls, will ever read a word of it? Has the Senator even the slightest belief that one single word will be read by other Senators?

Mr. OWEN. If the Senator objects to it, I shall not insist upon it. I think it ought to be printed for the use of the committee and for the use of the Senate.

The PRESIDENT pro tempore. Does the Senator from North Dakota object?

Mr. McCUMBER. Yes.

The PRESIDENT pro tempore. The Senator objects.

PETITIONS AND MEMORIALS.

Mr. POMERENE presented memorials of sundry citizens of the State of Ohio, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of 385 voters and school children of Salem, Ohio, praying for an appropriation of $100,000 to be used by the Department of Agriculture to enforce the migratory-bird law, which was referred to the Committee on Appropriations.

Mr. BORAH presented petitions of sundry citizens of the State of Idaho, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. CATRON presented a petition of sundry citizens of Quay County, N. Mex., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. BRANDEGEE presented a petition of the Connecticut Peace Society, praying for a peaceable settlement of the difficulties between the United States and Mexico, which was referred to the Committee on Foreign Relations.

Mr. WARREN presented a memorial of the board of education of Hanna, Wyo., remonstrating against the treatment accorded citizens in southern Colorado by the military authorities of that State, which was referred to the Committee on Education and Labor.

Mr. GOFF presented petitions of 554 citizens of Harrison County, 54 citizens of Randolph County, 21 citizens of Boone County, 19 citizens of Upshur County, 19 citizens of Mason County, 25 citizens of Pendleton County, 52 citizens of Ohio County, 18 citizens of Morgan County, 33 citizens of Hancock County, 40 citizens of Brooke County, 15 citizens of Fayette County, 51 citizens of Wood County, 39 citizens of Raleigh County, 48 citizens of Hancock County, 31 citizens of Braxton County, 45 citizens of Taylor County, 136 citizens of Cabell County, 26 citizens of Wirt County, 26 citizens of McDowell County, 75 citizens of Mingo County, 78 citizens of Kanawha County, 66 citizens of Harrison County, 48 citizens of Nicholas County, 260 citizens of Kanawha County, 96 citizens of Randolph County, 78 citizens of Wood County, 14 citizens of Jackson County, 26 citizens of Mason County, 25 citizens of Harrison County, and 130 students of Salem College, all in the State of West Virginia, for the passage of Senate joint resolution No. 88, proposing an amendment to the Constitution of the United States for nation-wide prohibition of the beverage traffic in intoxicating liquors, which were referred to the Committee on the Judiciary.

Mr. SHERMAN presented a petition of Local Union No. 64, United Garment Workers, of Rockford, Ill., praying for the enactment of legislation to regulate the shipment and sale of convict-made goods, which was referred to the Committee on Manufactures.

Mr. WEEKS presented a petition of sundry citizens of Newtonville, Arlington Heights, Brookline, Dorchester, Newton, and Newton Center, all in the State of Massachusetts, praying for the enactment of legislation to provide for Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

He also presented a petition of the Massachusetts Fish and Game Protective Association, the Massachusetts Society for the Prevention of Cruelty to Animals, and the Massachusetts Audubon Society, praying for an appropriation of $100,000 for the enforcement of the so-called migratory bird law, which was referred to the Committee on Appropriations.

He also presented a resolution adopted by the directors of the port of Boston, Mass., favoring the refunding of all tolls collected from American coastwise ships passing through the Panama Canal, which was ordered to lie on the table.

Mr. POINDEXTER presented a resolution adopted by the Tacoma Business Girls' Club, of Washington, favoring the enactment of legislation making it a felony to willfully and intentionally desecrate the flag, which was referred to the Committee on the Judiciary.

He also presented a memorial of members of the Open Forum, of Seattle, Wash., remonstrating against the conditions existing in the mining districts of Colorado, which was referred to the Committee on Education and Labor.

Mr. PAGE presented a petition of the congregation of Bethany Congregational Church, of Montpelier, Vt., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. BURLEIGH presented petitions of sundry citizens of the State of Maine, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. CHAMBERLAIN presented petitions of sundry citizens of the State of Oregon, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. PERKINS presented a memorial of sundry citizens of Stockton, Cal., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of the Epworth League of the Methodist Episcopal Church of Hollister, Cal., praying for the enactment of legislation to provide for Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

He also presented a memorial of sundry citizens of Norwalk and Artesia, in the State of California, remonstrating against the enactment of legislation to compel the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. COLT presented petitions of sundry citizens of Scituate and Newport, in the State of Rhode Island, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. BRADLEY presented a memorial of Local Union No. 4, United Brotherhood of Carpenters and Joiners, of Louisville, Ky., remonstrating against war with Mexico, which was referred to the Committee on Foreign Relations.

He also presented petitions of Plain City Lodge, No. 238, of Paducah; of Pride Lodge, No. 502, of Louisville; of Local Division No. 15, of Lexington; of Local Division No. 603, of Covington; and of Local Division No. 463, of Corbin, all of the Brotherhood of Locomotive Firemen and Enginemen, in the State of Kentucky, praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

He also presented a memorial of the Workman's Sick and Death Benefit Fund Association of New York City, N. Y., remonstrating against the conduct of the Colorado militia in the mining districts of that State, which was referred to the Committee on Education and Labor.

Mr. ASHURST. Mr. President, I present a large number of memorials and telegrams from citizens of Arizona, protesting against the repeal of the so-called "free-tolls act." I ask that they may be referred to the Committee on Interoceanic Canals, and I request the committee to consider them at their next meeting.

The PRESIDENT pro tempore. The Senator from Arizona presents certain telegrams and memorials, which will be referred to the Committee on Interoceanic Canals.

Mr. ASHURST subsequently said: Mr. President, this morning I submitted certain petitions and telegrams relating to the Panama Canal controversy. I now ask that they may be incorporated in the RECORD. I will not ask that they be read, but I ask that they may be incorporated in the RECORD.

Mr. BRANDEGEE. Mr. President, I think I shall have to object. The committee has already reported the bill, and the proper course is that the telegrams be ordered to lie on the table.

The PRESIDENT pro tempore. The Senator from Connecticut objects.

Mr. O'GORMAN. Mr. President, I desire to say, in reference to the request made by the Senator from Arizona [Mr. ASHURST], that the Committee on Interoceanic Canals has considered the bill to which they refer; it has made its report thereon, and it is not likely at this time to give further consideration to the subject.

RANDOLPH SUMMERLIN.

Mr. SMITH of Georgia. Mr. President, I ask permission to read a few lines from a telegram sent by a brother of Randolph Summerlin, a Georgia marine, who died a week ago yesterday at Vera Cruz from a wound received in the first occupation of that city.

The PRESIDENT pro tempore. Unless there is objection, permission will be granted. The Chair hears none.

Mr. SMITH of Georgia. A telegram was sent to a newspaper correspondent at Willacoochee, Ga., instructing him to interview Summerlin's father. The telegram reads as follows:

Please interview Summerlin's father on uselessness of sacrifice if the United States is now to accept mediation. Does he not think it outrageous to have to send boys to be killed and then the Government decide fighting is wrong?

This was the reply:

Referring to telegram, beg to say my brother Randolph Summerlin was killed at Vera Cruz in defense of our country's honor. We favor President Wilson and Democratic administration, and Randolph has four brothers and a father who are ready and willing to make the same sacrifice if called upon. We think the Wilson policy is absolutely right.

L. W. SUMMERLIN.

A telegram was also sent by citizens from Willacoochee to this effect:

B. F. Summerlin, father, and W. W. Summerlin, brother of Randolph Summerlin, killed at Vera Cruz, take the request as a gross insult not only to relatives and friends but entire country. If we could not be loyal to our country we would move out.

The patriotic spirit shown by the father and brother of the dead hero reflects the attitude of the entire people of Georgia.

REPORTS OF COMMITTEES.

Mr. VARDAMAN, from the Committee on Military Affairs, to which was referred the bill (S. 4853) for the relief of John J. Fisher, submitted an adverse report (No. 480) thereon, which was agreed to, and the bill was postponed indefinitely.

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which was referred the bill (S. 4417) to reinstate Francis Graves Bonham as a cadet at the United States Military Academy, reported it without amendment and submitted a report (No. 479) thereon.

Mr. O'GORMAN, from the Committee on Naval Affairs, to which was referred the bill (S. 5445) for the relief of Gordon W. Nelson, reported it without amendment and submitted a report (No. 481) thereon.

MEMORIAL TO JOHN ERICSSON.

Mr. LEA of Tennessee. From the Committee on the Library I report back favorably with an amendment the bill (S. 1086) for erecting a suitable memorial to John Ericsson, and I submit a report (No. 477) thereon.

Mr. CLAPP. I ask unanimous consent for the present consideration of the bill.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment of the Committee on the Library was, in line 3, after the words "sum of," to strike out "$100,000" and insert "$25,000," so as to make the bill read:

Be it enacted, etc., That the sum of $25,000, or so much thereof as may be necessary, is hereby authorized for the erection, in the city of Washington, D. C., of a suitable memorial to John Ericsson, the inventor and constructor of the *Monitor*, said sum to be expended for the purposes herein named by a commission consisting of the chairman of the Committee on the Library of the Senate, the chairman of the Committee on the Library of the House of Representatives, and the Secretary of the Navy.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

IMPROVEMENT OF CHANNELS.

Mr. CHAMBERLAIN. From the Committee on Commerce I report back favorably, without amendment, the joint resolution (S. J. Res. 95) providing for method of improving channels giving access to military reservations or fortifications, and I submit a report (No. 478) thereon. I ask unanimous consent for the present consideration of the joint resolution.

The PRESIDENT pro tempore. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

Resolved, etc., That whenever, in the opinion of the Secretary of War, the work of dredging or improving any channel of any navigable water for the purpose of giving access to any wharf on a military reservation or fortification, including any dredging in front of or along such wharf, under any appropriation available for the purpose, can be more economically done by the use of any Government dredge or other plant purchased for river and harbor improvement, or by combining the same with any authorized project for river and harbor improvement, the Secretary of War may, in his discretion, authorize such use or combination

upon the reimbursement of the river and harbor appropriation for the actual cost of the work, as determined by the Chief of Engineers with the approval of the Secretary of War.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. REED:

A bill (S. 5462) to authorize the county of Barry, in the State of Missouri, to construct a bridge across the White River in Barry County, Mo., at or near a point known as Goldens Ferry; to the Committee on Commerce.

By Mr. CATRON:

A bill (S. 5463) to authorize the Secretary of the Interior to lease allotted or unallotted Indian lands for mining purposes; to the Committee on Indian Affairs.

By Mr. MARTIN of Virginia:

A bill (S. 5464) to amend the act entitled "An act granting to certain employees of the United States the right to receive from it compensation for injuries sustained in the course of their employment," approved May 30, 1908; to the Committee on Claims.

By Mr. RANSDELL:

A bill (S. 5465) regulating the method of keeping mortality statistics by the Census Bureau, and providing for tabulating and rating separately white and colored people; to the Committee on the Census.

By Mr. CHILTON:

A bill (S. 5466) to amend and reenact section 113 of chapter 5 of the Judicial Code of the United States; to the Committee on the Judiciary.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. VARDAMAN submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. SHEPPARD submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. SWANSON submitted an amendment proposing to appropriate $16,000 for the construction of a bituminous macadam road from the wharf at Yorktown, Va., via the National Monument to the National Cemetery, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. HOLLIS submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. TILLMAN submitted an amendment authorizing the Secretary of the Navy to exceed the amount appropriated under maintenance of yards and docks in an amount equal to the total of such expenditures in navy yards heretofore charged to other appropriations as properly constituted a part of yard maintenance, etc., intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

Mr. OLIVER submitted an amendment proposing to increase the salary of the civil engineer, office chief, Quartermaster Corps, from $1,800 to $2,000 per annum, intended to be proposed by him to the legislative, executive, and judicial appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. CHILTON submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

PANAMA CANAL TOLLS.

Mr. WALSH submitted an amendment intended to be proposed by him to the bill (H. R. 14385) to amend section 5 of "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone," approved August 24, 1912, which was ordered to lie on the table and be printed.

AMENDMENT TO AGRICULTURAL APPROPRIATION BILL.

Mr. McCUMBER. Mr. President, I wish to submit an amendment to the Agricultural appropriation bill and have it printed; but if the appropriation bill comes up to-day there will be no time for the printing of the amendment. Before submitting the amendment, I desire to ask the Senator from Oklahoma [Mr. GORE] who is in charge of the bill if he purposes to move to take it up to-day for consideration?

Mr. GORE. Mr. President, it is my intention to call up the bill as soon as the morning business has been concluded.

Mr. McCUMBER. I will not submit the amendment at this time, but will do so if the Agricultural appropriation bill is not disposed of to-day.

WITHDRAWAL OF PAPERS—JOSEPH H. MAYO.

On motion of Mr. MARTIN of Virginia, it was—

Ordered, That the papers accompanying the bill S. 1529, Sixty-third Congress, granting a pension to Joseph H. Mayo, be withdrawn from the files of the Senate, no adverse report having been made thereon.

PANAMA CANAL TOLLS.

Mr. BORAH. I submit a resolution, and ask that it be read and lie on the table for the present.

The resolution (S. Res. 347) was read and ordered to lie on the table, as follows:

Whereas the three political parties now represented in the executive and legislative departments of the Government, and which alone will have to do with pending legislation, went before the voters in the last national campaign solemnly committed to the policy and the justice of exemption of tolls from American vessels engaged in coastwise trade; and

Whereas the three candidates for the Presidency of each of said political parties individually declared in favor of the justice and wisdom of such policy; and

Whereas it is now deemed by some the part of wisdom, notwithstanding such pledges and platforms, to impose tolls upon American vessels engaged in coastwise trade; and

Whereas national honor and the fundamental principles of representative government require that we deal in the utmost good faith with the electorate, and that all public servants carry out the pledges solemnly made to the people and upon and by reason of which pledges they are delegated to act for the people; and

Whereas at the approaching November election the entire House of Representatives and 32 Members of the Senate are to be elected, all of whom must be elected by popular vote; and

Whereas in this way a referendum for all practical purposes may be had upon this important question heretofore submitted to the people; and

Whereas no injury of any moment can possibly arise or be incurred by reason of delaying the passage of this bill for the next few months: Therefore be it

Resolved, That a vote upon House bill No. 14385, providing for the repeal of that portion of the act of August 24, 1912, providing for the exemption of tolls upon vessels engaged in coastwise trade, shall be postponed until after the convening of Congress, December 7, 1914, to the end that this matter may again be submitted to the voters of the United States, whose right and privilege it is to finally determine this question.

ADDRESS BY HON. MANUEL L. QUEZON.

Mr. HITCHCOCK. I ask unanimous consent to have printed as a document an address by Hon. MANUEL L. QUEZON, Resident Commissioner from the Philippine Islands, delivered to the Chamber of Industry, Cleveland, Ohio, April 16, 1914.

The PRESIDENT pro tempore. The Senator from Nebraska asks unanimous consent that a certain address delivered by the gentleman named by him may be printed. Is there objection?

Mr. SMOOT. I ask the Senator if he will not have it referred to the Committee on Printing, and have the committee pass on it, as is done in the case of all similar requests?

Mr. McCUMBER. Mr. President, there is objection to its printing. Whatever that may count for I do not know, but I want to make that objection; and if Senators wish still to debate it, of course they are at liberty to do so.

Mr. HITCHCOCK. I presume the request will be referred to the Committee on Printing.

The PRESIDENT pro tempore. The request of the Senator from Nebraska, together with the accompanying document, will be referred to the Committee on Printing.

DISCRIMINATIONS IN SHIPMENTS OF COAL.

Mr. TILLMAN. Mr. President, I ask unanimous consent to have the letter I send to the desk read, and then I will ask to have the table accompanying the letter printed in the RECORD with it.

The PRESIDENT pro tempore. Is there objection to the reading of the letter presented by the Senator from South Carolina? The Chair hears none, and the Secretary will read it.

The Secretary read as follows:

CONSOLIDATED NEWS, STATISTICS,
AND TRANSPORTATION BUREAU,
Philadelphia, May 1, 1914.

Hon. BENJAMIN R. TILLMAN,
Senate Chamber, Washington, D. C.

MY DEAR SIR: *Coal Trust manipulation of chief coal fields by railroads, of which the dominant factor is and has been for many years the Pennsylvania Railroad Co.*

Your move for an inquiry is most timely, and if incisively and fearlessly undertaken by the committee would reveal conditions that, when understood, could be rectified. Suppose you undertake to secure from any department of Government at Washington a statement of tide-

water receipts and shipments of coal—bituminous and anthracite—for calendar year 1913. You won't get it. We hand you a statement for 1912 and several previous years. The State of Maryland never produced over 5,500,000 tons of bituminous coal in a year. Pennsylvania produces 170,000,000 tons of bituminous coal. The Pennsylvania coal fields are substantially the same distance from Philadelphia as from Baltimore, but on our export and coastwise shipments of coal the Pennsylvania Railroad charges Philadelphia 7 cents more per ton freight than the Pennsylvania Railroad charges Baltimore. This is manipulated by a "joker," as the public tariff rates, as printed, are the same to each port.

You will therefore see that, as was recently the case, it cost owners of a 9,000-ton cargo of coal $630 more to load said cargo of Pennsylvania coal at Philadelphia than it would cost to have loaded the identical cargo of Pennsylvania coal at Baltimore. This is one of the kinds of discrimination which we understand you are complaining against. We have been trying for 15 years to assist in rectifying such injustices. We believe conditions surrounding export and coastwise coal shipments have never been thoroughly investigated.

Yours, very respectfully,

FRANK L. NEALL, *Manager.*

There being no objection, the table referred to was ordered to be printed in the RECORD, as follows:

Atlantic tidewater shipments of coal, 1907 to 1912.

[Tons, 2,240 pounds.]

Calendar years.	Port.	Anthracite.	Bituminous.	Total.

PANAMA CANAL TOLLS.

Mr. STONE. Mr. President, I see on the front page of the calendar a notice the Senator from Wisconsin [Mr. LA FOLLETTE] gave on yesterday that on Tuesday morning next, following the routine business, he would address the Senate on a certain bill. I rise merely to give notice or to state that if the Panama Canal tolls bill is not the unfinished business of the Senate at that time I will ask leave to speak on the bill I have just named following the address of the Senator from Wisconsin. If the Panama Canal tolls bill is to be taken up at 2 o'clock on Tuesday, I will not intrude myself on the morning hour, but will speak to it when it is called up as the unfinished business.

The PRESIDENT pro tempore. The announcement made by the Senator from Missouri will be noted.

AGRICULTURAL APPROPRIATIONS.

The PRESIDENT pro tempore. Morning business is closed.

Mr. GORE. I ask unanimous consent that the Senate proceed to the consideration of——

Mr. O'GORMAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from New York?

Mr. GORE. Not until I have made my request.

Mr. SMOOT. I ask for the regular order.

The PRESIDENT pro tempore. The Senator from Oklahoma has been recognized. The Chair will hear what he has to say.

Mr. GORE. I ask unanimous consent that the Senate proceed to the consideration of House bill 13879, being the Agricultural appropriation bill.

Mr. McCUMBER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from North Dakota?

Mr. GORE. Yes, sir.

Mr. McCUMBER. I understand the Senator has made a request or a motion, but on account of the noise in the Senate Chamber I could not understand what it was.

The PRESIDENT pro tempore. The Senator from Oklahoma will repeat his request.

Mr. GORE. I ask unanimous consent that the Senate proceed to the consideration of the Agricultural appropriation bill.

Mr. McCUMBER. Mr. President, before giving unanimous consent—at least, on my part—let me call the Senator's attention to the fact that, in my humble judgment, he will scarcely be able to get through with the bill to-day, and, as I understand, other motions will be made.

I wish to say to the Senator that the grain-grading bill is dead; that there is joy in the ranks of all of the boards of trade; and that to-day is a holiday throughout the States in which such boards are located. While the taste of the blood of that bill still lingers on the lips of the Senate, I simply desire to inform the Senate and the Senator from Oklahoma that the principle which that bill contains is not dead, and that it will continue to come up, like Banquo's ghost, just so long as the robbery against the farming population of this country is allowed to continue. An amendment will be offered to place upon the bill the Senator has in charge the very provision which these boards of trade surreptitiously brought into the Senate for the purpose of giving us the idea that they did not object to Government supervision or to Government standardization or to uniformity. I knew that they did object to those things, and that those who followed their behest would vote against them, as was done, in the Senate. That amendment will be offered again to this bill, and I purpose, Mr. President, during the discussion of the bill, to see that there is a quorum in the Senate.

During the last several days we have had to debate subjects when there were not three Senators present, although the aroma of cigar smoke came from the halls outside, and while there was not a single sound here except that of one speaker dictating to the reporter, interspersed a little with the echo of a snore from one or the other of the two cloakrooms and the click of a ball out on the golf grounds. That is going to cease in the Senate of the United States. I saw the evil result of having but a handful of Senators present during the debate upon an important proposition that affected the farmers of my own State to the extent of more than $5,000,000 a year, and which affected to the amount of $30,000,000 or $40,000,000 a year the agricultural interests of the entire Nation, and having that bill voted upon without any knowledge and without any hearing; and I want to assure the Senate that, so far as it is in my power to keep a quorum here, the day has passed for you to vote during this session upon a matter in which you have not at least an opportunity to come in every three minutes, if it may be necessary, to keep a quorum here in the Senate. If the matters that come before us are not worthy of consideration by the Senate, it is better that we should adjourn and give the country at least a rest; otherwise we will stay here until the 15th of November next, and take the usual recess that we have been taking in the past few years.

I desire the Senate to understand clearly that this bill is going to be debated, and debated at length, and that I am going to have a hearing—if I have to convert the Senate Chamber into a kindergarten, it is going to be done—upon these matters that affect the people of the great Northwest; and the hearing is not going to be out in the cloakrooms of the Senate.

Mr. GORE. Mr. President, I wish to assure the Senator that I have enjoyed his several soliloquies on the grain bill, and I appreciate the assurance which he gives that a quorum is to be maintained.

The Senator will doubtless derive consolation from the assurance that the pending Agricultural appropriation bill perpetrates and perpetuates the extreme irony of continuing an appropriation authorizing the Secretary of Agriculture to investigate the handling, grading, and transportation of grain, not with a view of establishing uniform standards, because, as suggested by the Senator, the voice of the farmer is not always heard and the voice of the farmer is not always heeded, perchance, in this body; but I shall join him in his proper attempt to secure just and expeditious legislation upon the subject to which he refers.

I renew my request that the Senate proceed to the consideration of the Agricultural appropriation bill.

The PRESIDENT pro tempore. Does the Senator from Oklahoma ask unanimous consent or move to proceed to the consideration of the Agricultural appropriation bill?

Mr. GORE. If a motion is in order, I move to proceed to its consideration.

The PRESIDENT pro tempore. It will not be in order until 1 o'clock.

Mr. GORE. That was my understanding. For that reason I did not make the motion.

Mr. LODGE. On the point of order, I wish to call the attention of the Chair to page 10 of the Rules of the Senate, clause 3, under which this whole difficulty has arisen.

The PRESIDENT pro tempore. Yes; the Chair sees the alternative there.

Mr. LODGE. The statement is:

Until the morning business shall have been concluded and so announced from the Chair, or——

The PRESIDENT pro tempore. The motion is in order.

Mr. LODGE. It is disjunctive; if either of those conditions exists.

The PRESIDENT pro tempore. The Chair stands corrected.

Mr. LODGE. One moment, if the Chair will permit me.

The PRESIDENT pro tempore. The Chair will be pleased to listen to the argument of the learned Senator.

Mr. LODGE. If the Chair will permit me, the last section of Rule VIII reads as follows:

All motions made before 2 o'clock—

Recognizing the power to make a motion—

to proceed to the consideration of any matter shall be determined without debate.

The PRESIDENT pro tempore. The Chair was advised of all that. The remarks of the Senator from North Dakota [Mr. McCUMBER] were so interesting that the Chair did not feel like taking upon himself the right to stop him. The motion of the Senator from Oklahoma [Mr. GORE] is in order, to proceed to the consideration of the Agriculture appropriation bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

The PRESIDENT pro tempore. The Secretary will state the first amendment passed over.

Mr. McCUMBER. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Dillingham	Martin, Va.	Smith, Ariz.
Bankhead	Fall	Martine, N. J.	Smith, Mich.
Borah	Goff	Nelson	Smith, S. C.
Brady	Gore	Norris	Smoot
Brandegee	Hitchcock	O'Gorman	Sterling
Bristow	Hughes	Oliver	Stone
Bryan	Johnson	Overman	Sutherland
Burleigh	Jones	Page	Swanson
Burton	Kenyon	Perkins	Thompson
Catron	La Follette	Pittman	Thornton
Chamberlain	Lane	Poindexter	Tillman
Clapp	Lea, Tenn.	Pomerene	Townsend
Clark, Wyo.	Lee, Md.	Ransdell	Vardaman
Clarke, Ark.	Lippitt	Robinson	Walsh
Colt	Lodge	Sheppard	Warren
Crawford	McCumber	Sherman	West
Cummins	McLean	Simmons	Works

The PRESIDENT pro tempore. Sixty-eight Senators having answered to the roll call, a quorum of the Senate is present. The Secretary will state the first amendment passed over.

The SECRETARY. The first committee amendment passed over is on page 1, relative to the salary of the Assistant Secretary of Agriculture. In line 12 the committee proposes to strike out "$5,000" and to insert "$6,000: *Provided*, That if the position is held by any other than the present incumbent the salary shall be reduced to $5,000."

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the committee.

Mr. CLARK of Wyoming. Mr. President, I do not know whether we have had any explanation of this increase as applicable to this particular officer or not. I should like to have some information from the chairman of the committee in regard to it, and also how it compares with the compensation of the Assistant Secretaries of other departments.

Mr. GORE. Mr. President, I will answer both of the questions of the Senator.

The particular reasons which moved the committee to report this increase are as follows: The present Assistant Secretary of Agriculture has been in the department and in the service of the Government for 26 years. He recently surrendered a place paying him $5,000 a year, which was in the civil service, which, of course, meant a life tenure, and accepted the assistant secretaryship at $5,000, which does not afford him the protection of a life tenure. On account of his long experience he is preeminently qualified for the duties of this particular place. I am advised that he has recently been tendered an appointment as dean of one of the largest agricultural colleges in the United States at a salary of $7,500 a year, carrying with it, in the event of his death, a pension to his widow and free education to his children. It is his wish, as I am informed, to retain this position and not to sever an association which has continued so long and with so much benefit to the department and to the country.

If this increase is granted, the salary of this position will be larger, I believe, than that of any other Assistant Secretary in any other department of the Government. I think it ought to be. It is more difficult to secure a man peculiarly fitted for this particular place than for any other assistant secretaryship. I believe I violate no confidence when I say to the Senate that the Secretary of Agriculture assured me that he would be much puzzled if a vacancy should arise here, and he should be called upon to select a man entirely adequate to the position, or as much so as the present incumbent.

These are the reasons why the committee has seen fit to report this increase; and I trust the Senate will sustain the committee.

Mr. CLARK of Wyoming. Mr. President, I have not the least doubt but that the Senate will sustain the committee. It occurs to me, however, that it is rather a novel basis on which to place a salary that this particular man, who undoubtedly has served the department well, is the only one who probably could be secured to fill this position.

I have had the notion for a good many years that the former Assistant Secretaries of the department were competent and worthy men, and that their work, together with the work of the former Secretary of Agriculture, has resulted in great good to the country. If, as a matter of fact, as the Senator states, the duties of this office are such that a good man can not be secured for less than $6,000 a year, then we ought not to place this limitation upon the appropriation, but we ought to fix generally the salary for this office at $6,000.

I suppose it will not be contended that any of the officers of this grade and character are getting in the public service what they could get in private service, or in employment outside of the Government service. That is true in the legislative branch of the Government as well. I suppose there are few, if any, Senators here who did not make a pecuniary sacrifice in coming to the Senate.

It seems to me the only just reason for this increase is that the services of the First Assistant Secretary of Agriculture are worth $6,000, or $1,000 more than those of the Assistant Secretary of any other department of the Government; and in that case I think there ought not to be the limitation that is incorporated in the amendment, namely, that the salary of $6,000 shall apply only so long as this particular individual fills the office.

Mr. VARDAMAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Mississippi?

Mr. GORE. I yield.

Mr. VARDAMAN. I wish to ask the chairman of the committee if the proposed increase of this salary was a condition precedent to the man retaining the place?

Mr. GORE. Mr. President, I have not consulted the Assistant Secretary on that point. It has been my hope, and the hope of the committee, that in case this increase should be granted he would feel justified in retaining the position.

Mr. VARDAMAN. Did he say to the committee that it would be necessary, in order to retain him, to increase his salary?

Mr. GORE. He did not say so.

Mr. VARDAMAN. I wish to say, while I am on my feet, that I agree with the Senator from Wyoming [Mr. CLARK] that it is bad policy to fix a salary for the man who happens to occupy the place. I have no doubt that the services of the man who fills this position just now are worth just as much as any man who could be put there, and if the services to be rendered are worth $6,000 a year the salary ought to be fixed unconditionally. The salary should go with the office rather than the man.

Mr. CLARK of Wyoming. Mr. President, I desire to make a point of order.

The PRESIDENT pro tempore. The Senator from Wyoming will state it.

Mr. CLARK of Wyoming. I make the point of order against the proviso that it is legislation upon an appropriation bill.

Mr. GORE. I think the proviso is subject to a point of order.

Mr. OVERMAN. Mr. President, for information, before the point of order is passed upon, I should like to make an inquiry. The question was asked whether or not we can hold this man. As I understand, the man who occupies the position at present has been in the employment of the Agricultural Department for a long time, has he not?

Mr. GORE. Twenty-six years, I think.

Mr. OVERMAN. What salary was he getting before he was made Assistant Secretary of Agriculture?

Mr. GORE. He was receiving $5,000 a year.

Mr. OVERMAN. The same salary he is now getting?

Mr. GORE. Yes; and that was a civil-service position, with life tenure. I may add that the duties of the Assistant Secretaryship devolve upon him the duties of the Secretary in case of the absence of the Secretary.

Mr. WARREN. Mr. President, will the Senator from Oklahoma yield to me?

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the junior Senator from Wyoming?

Mr. GORE. I yield.

Mr. WARREN. The question is asked whether the present incumbent will probably remain. While I think none of us has any authority to state positively that he will, I believe, from his personal conversation with Members of the Senate, that he intends to remain.

There is no doubt in my mind about the proviso being subject to a point of order. I ought to say, on the part of the committee, that there are precedents for recognizing men by special appropriation, as this proposes for the present incumbent; but such a proviso is usually adopted only when there is unanimous consent. The committee thought that perhaps, if the proviso were put in the bill, it would not lead to the increase of the salaries of other Assistant Secretaries quite so soon; but, of course, the proviso can be withdrawn or voted down.

Mr. JONES. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from Washington will state it.

Mr. JONES. Would this provision in the bill raising this salary to $6,000 continue any longer than the current year under the provisions of the bill? It does not say that hereafter the salary of the Assistant Secretary shall be $6,000, but it simply is placed at that much in this bill. I understand that it would not be a permanent increase, but simply for the current year.

The PRESIDENT pro tempore. The Chair was about to ask the senior Senator from Wyoming to state some of the reasons that induced him to think the provision was subject to a point of order on the ground of being general legislation. The Chair does not take that view of it.

Mr. WARREN. If I may answer the inquiry of the Senator from Washington, there is an item in another bill now before the Committee on Appropriations which, if accepted by the Senate and by the conference committee, will provide that all salaries included in these appropriation bills shall be the salaries of the respective positions hereafter until changed. Of course, the salaries can be changed in any bill; but if this is adopted, and the provision in the other bill is adopted, it will leave the salary at this figure until it is specifically repealed.

Now, as to the Chair's inquiry——

The PRESIDENT pro tempore. The Chair is not disposed to take the view that this limitation or direction as to the manner in which a specific sum of money is to be expended is general legislation in the sense of our rule on the subject. The Senator from Wyoming [Mr. CLARK], however, spoke to the contrary, with such confidence, that he raised a doubt in the mind of the Chair.

Mr. CLARK of Wyoming. It was my own construction of the rule, that it is general legislation upon an appropriation bill. If the Chair shall take the point of view that legislation which limits an appropriation or states how an appropriation shall be expended is not general legislation, of course the point of order will fall; but I am sure the Chair will find by examining the precedents that, whether rightly or wrongly, the point of order has been very frequently made, and as frequently sustained.

Mr. OVERMAN. Mr. President, I think this is a statutory salary; that the Assistant Secretary's salary is fixed by statute at $5,000.

The PRESIDENT pro tempore. Is it fixed by statute, or is it fixed by an item in an appropriation bill, as in this case?

Mr. OVERMAN. It is fixed by statute, I understand.

The PRESIDENT pro tempore. Has the Senator that statute before him?

Mr. OVERMAN. I have not; but that is the reason it went out on a point of order in the other House—because the statute fixed these salaries originally, and when an appropriation bill changes the salary that is new legislation.

The PRESIDENT pro tempore. The Chair will state that his ruling is in line with a precedent made when we had under consideration an item in an appropriation bill providing that certain officers should be exempt from the operation of the civil-service law. The appropriation was designed to make a certain investigation in connection with this class of officers; and the Senator from North Carolina made the point, and the Vice President sustained it, that any legislation which sought to give direction for the expenditure of, or place a limitation upon a particular item of appropriation was not subject to that point of order; that it was not general legislation. If Congress has power to appropriate the money it has an incidental right to say how it shall be actually expended. The Chair holds that the point of order is not well taken.

Mr. NORRIS. Mr. President, I wish to say just a few words in regard to this amendment. The reasons that impel me to favor it are different from any of those which have been advanced.

As a general rule, and as a general proposition, the Assistant Secretaries in the various departments are selected for partisan, political reasons. They are selected because of some work they have performed or contribution they have made, either in human effort or in money, in behalf of some political party. I do not mean to say by that that they would necessarily not be competent and able to perform the duties of their office, but when, as a general rule, men are appointed to office for partisan, political reasons, and when, especially in a department where there should not be any partisan considerations given and where no man's duty is in any way partisan, a Secretary deviates from that rule and selects a man entirely for his fitness, who had been serving the department in the classified service and had worked up to the position, it seems to me it would be a wise thing for Congress to give its approval to such a course by paying to such an official a higher salary than is paid to one who was appointed simply for political reasons. As I understand it, the Assistant Secretary of Agriculture has been in the service of the department for a long number of years; for 26 years, I think. He gradually worked up in the department under the civil service until he reached the highest point that could be obtained in the department under the civil service, and when Secretary Houston came into office he selected this man as his Assistant Secretary. He therefore made the selection entirely on account of the fitness of the man whom he selected for the place.

In my judgment, if the President, or the Presidents of the future, should follow the example of the Secretary of Agriculture here and select men for the heads of departments who had come up from the ranks by their own efforts, rather than select men for political reasons and partisan purposes, we would increase the efficiency of every department of our National Government.

I feel therefore like going contrary to what, as a general rule, I would favor and vote to place in the bill a provision that this increase shall apply only so long as the present incumbent holds the position. I should like to apply the same rule to every other department, if the Assistant Secretary was selected in the same way for the same purposes. It seems to me it is good legislation, and if such a precedent could be established by congressional action it would be an inducement to heads of departments in the future to follow this course. Certainly a man who has by his service shown his efficiency to hold this position, who has worked up under the civil service, is a more valuable man than one selected outside of the department, who knows nothing about its details, and when the very reason for his selection is political or partisan.

Mr. CLARK of Wyoming. Mr. President, I have not the slightest objection to the action of the committee in fixing the salary for this position at $6,000. On the contrary, I approve it. I make no criticism whatever of the present incumbent of the office. For many years I have known and have approved so far as it has come to my knowledge his efficiency in that department. But I do believe it is a bad way to legislate to fix a salary for a particular person instead of fixing it for the office which he holds.

If we should apply that rule to the general governmental service, what would we have? We would have some of us in the Senate receiving $5,000 a year, others more efficient $6,000 a year, and others still more efficient would receive $7,500 a year. Take it through the departments and you would have a salary list with the salary attached not to the office or the service in the office, but you would have a salary list attached to the individual who happened for the time being to fill the

office. There is no question whatever that that would be a bad way to carry on the business of the Government.

Mr. President, the point of order having been overruled, I move to strike out from the committee amendment the proviso:

Provided, That if the position is held by any other than the present incumbent the salary shall be reduced to $5,000.

That will leave the salary of the present incumbent at $6,000.

I move to amend the amendment of the committee by striking out the proviso.

The PRESIDENT pro tempore. The Senator from Wyoming moves to amend the committee amendment by striking out the proviso, which will be read.

The Secretary read as follows:

Provided, That if the position is held by any other than the present incumbent the salary shall be reduced to $5,000.

Mr. BRADY. Mr. President, I hope that this amendment to the amendment will not prevail. The committee gave very careful thought and consideration to the peculiar qualifications and fitness of the present Assistant Secretary of Agriculture for this position. The amendment was agreed to for the reason that we believed it was only right and fair that we should give Dr. Galloway a compensation in line or nearly so with the salary he could earn elsewhere. It is my candid opinion that the present Assistant Secretary will remain at his post whether we make his salary $5,000 or $6,000, but it is known to every member of the committee that he could receive a salary many hundred dollars greater than $6,000 at any time he would want to accept the position. He is not a man of means; he has devoted his life and his best efforts for the benefit of the agricultural interests of this country, and I believe that we can in no better way show our appreciation of faithful services honestly rendered than by recognizing his ability and making the increased salary apply to him individually.

Mr. JONES. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from Washington?

Mr. BRADY. I do.

Mr. JONES. I do not understand that there is any disposition to oppose the provision giving the Assistant Secretary a salary of $6,000. If that is true, what is the objection to cutting out these other words, because the raise to $6,000 in the bill would apply only for the current year? The Senator does not think this man is going to retire during the current year?

Mr. BRADY. I want to go on record as favoring the salary for this particular man and to set an example for something of this character in other departments.

Mr. JONES. I do not understand that there is any opposition to the specific raise.

Mr. BRADY. Let it be understood that when a new man comes into the office he shall receive a salary of $5,000 unless he earns more.

Mr. LANE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from Oregon?

Mr. BRADY. I do.

Mr. LANE. I desire to know who the gentleman is. What is his name?

Mr. BRADY. Dr. Galloway, Assistant Secretary of Agriculture.

Mr. LANE. How long has he been connected with the department?

Mr. BRADY. The record shows what his work has been there.

Mr. LANE. Does the Senator know how long he has been there? I understood the Senator to say that he had investigated all his qualifications, and he was recommending the increase for that reason. I wish to ascertain some of the reasons why the Senator has recommended it after such investigation.

Mr. BRADY. He has been connected with the department for over 15 years. This increase was recommended by every member of the committee who had any personal acquaintance with him. It is well known to all members of the committee what his life work in that department has been and how he had been promoted under the civil service to the position he occupied before receiving this appointment.

Mr. LANE. I merely wish to say, if I may be allowed to intrude, that it strikes me this is special legislation, and, in a general way, that such legislation is usually bad.

Mr. BRADY. I agree with the Senator on that point, but in this case special legislation is justified.

Mr. LANE. I am not going to vote to make invidious distinctions between this and other departments. The record of the department is such, I am told, that I have not the highest respect for it. We spend millions and millions of dollars on the department, and as a matter of fact the records of the Government show that the average production of wheat per acre in the United States has been gradually going downhill for the last 25 years. It may not be the fault of this gentleman; it may be the fault of the methods in which the department is handled, but it has gone from 25 bushels of wheat an acre to 12 bushels on an average. In Germany the yield has increased from 12 bushels to about 40 bushels.

There is something wrong with our Agricultural Department. I do not think it is because of this man, and I rather presume it is not, but it is not a department which is giving the largest return to the people for the money expended upon it. In my opinion it is closely akin in its general management and its results to the Indian Bureau. It is a department which ought to be checked out pretty closely. I would not vote for it at all if I thought he was in any wise responsible for it, but the methods of the Agricultural Department and its results are not such that anyone can be particularly proud of it.

Mr. SMOOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from Utah?

Mr. BRADY. I do.

Mr. SMOOT. I desire to say that Dr. Galloway has been in the employ of the Government in this department for about 26 years, and I do not think that there is a man in the Government service who is better qualified for filling the position occupied than he. In relation to the amount of wheat per acre produced in the United States, I certainly do not think the Senator from Oregon ought to charge that up against Dr. Galloway. The reason for that is well understood. The farmer has been robbing the land, and there is no one in this country who has called attention to that fact and done more to have it rectified than Dr. Galloway.

I believe, Mr. President, that if there is any man in the Government service who is entitled to an increase of salary it is Dr. Galloway. I find in this bill here other increases. I find——

Mr. LANE. Special in legislative form?

Mr. SMOOT. Special in legislative form.

Mr. LANE. I think it ought to be cut out.

Mr. SMOOT Some have already been agreed to.

Mr. POINDEXTER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from Washington?

Mr. BRADY. I do.

Mr. POINDEXTER. If it is true that Dr. Galloway is responsible for the decreased annual yield of wheat per acre, it would be a good principle to fix his salary on a sliding scale. Let it go up when the crop yield is up, and if he allows it to go down make his salary go down. [Laughter.] Would not that be a wise provision?

Mr. TOWNSEND. Will the Senator from Idaho yield to me?

Mr. BRADY. I yield to the Senator from Michigan.

Mr. TOWNSEND. I am very much interested in the statement of the Senator from Oregon [Mr. LANE]. I confess it surprised me when the Senator said that the wheat yield had decreased during the last 20 years. I hold in my hand the Statistical Abstract of the United States, and on page 143 I find that the yield of wheat has increased. Although slightly, it has gradually increased from 1866. The yield is given for every year. In 1866 it was 11.9 bushels per acre, and it is now 15.9 bushels per acre.

Mr. LANE. Is that the average throughout the country?

Mr. TOWNSEND. That is the average throughout the country.

Mr. LANE. Does that take into consideration all the new land that has been opened in North Dakota, South Dakota, Oregon, and Washington?

Mr. TOWNSEND. I was looking at the table here.

Mr. LANE. I think you will find, if you check it out, that land——

Mr. BRADY. I suggest that we do not question the agricultural reports of our country.

Mr. LANE. I would like to inquire if it takes in all the new wheat land which has been thrown into cultivation, some of it producing 40 bushels to the acre. If it makes an average from that, by including that land, as showing an increase in the yield of wheat, it is not worth the paper it is printed on as evidence of any increase due to improved agricultural methods.

Mr. BRADY. Are we to assume then that Dr. Galloway's salary should be changed on that particular account?

Mr. LANE. If he made that report, he ought to be dismissed or his salary lowered, if he is responsible for that as a showing for his department.

Mr. BRADY. We all believe that the reports issued by the Agricultural Department are reliable, and if they have not

been correct in every way, there is no man who will strive harder to have them correct than Dr. Galloway.

Mr. McCUMBER. Mr. President, will the Senator allow me to add my little mite to what I think should be a matter of justice to Dr. Galloway? Yesterday this Dr. Galloway had a bill before the Senate that he had prepared and which the Senate had declared to be a wondrously fine bill. All the boards of trade through different Senators had been talking about the good bill that had been gotten up by the Agricultural Department under the auspices of Dr. Galloway. That bill was presented to the Senate yesterday for a vote and it was defeated overwhelmingly. I think the bill that was drawn by Dr. Galloway, this great statistician, this individual whose salary should be raised from $5,000 to $6,000, ought to have had a little consideration yesterday when the Lever bill was before the Senate. Nearly every one of the Senators who think that Dr. Galloway's salary ought to be raised because of his efficiency voted solemnly against the bill that he had presented, to which he had given years of study, so they said, to get a good bill before the Senate.

Let me call attention to one provision in this bill showing not only the efficiency but the conservatism of Dr. Galloway. He was acquainted with the boards of trade; he knew their proclivities; he knew that the Agricultural Department would have something to do with those boards of trade, and in his conservative and wise nature he took no chances. So he proposed to provide in section 12:

> That every person who forcibly assaults, resists, impedes, or interferes with any officer or employee of the United States Department of Agriculture in the execution of any duties authorized to be performed by this act or the rules and regulations made hereunder shall, upon conviction thereof, be fined not less than $100 nor more than $1,000, or be imprisoned not less than one month nor more than one year, or by both such fine and imprisonment.

I did not think it was necessary to put that provision in my bill. I had suspicions about boards of trade not always being imbued with the highest ideas of integrity toward the people they dealt with, but I never had felt that they were so voracious that it was unsafe for a member of the Departmennt of Agriculture to go within their confines. But the wise Dr. Galloway found that it was necessary; and the principal and most important provision in the bill this wise statesman has presented to the Senate was one to guard himself and his force if they dared to put their heads within the confines of a board of exchange to inquire placidly about the conditions there in order to get necessary information.

I repeat, however, that having voted down Dr. Galloway's bill, after having given him a slap in the face because of the bill which he presented here, it is probably justice to him that you now compliment him and salve that wound by another thousand dollars pasted over it.

Mr. GORE. Mr. President, I should like to say to the Senate that there is nothing confidential about this proviso. Senators may talk about it——

The PRESIDENT pro tempore. The Senator from Idaho [Mr. BRADY] has the floor. Does he yield to the Senator from Oklahoma?

Mr. BRADY. I yield to the Senator from Oklahoma.

Mr. GORE. I wish to say that there is nothing confidential about this pending proviso, and if Senators care to talk about it they will violate no confidence in so doing and will not be out of order. Otherwise I ask that the discussion proceed.

Mr. BRADY. Mr. President, referring to the remarks made by the distinguished Senator from North Dakota [Mr. McCUMBER], I was under the impression that we had the grain-inspection bill under consideration long enough, and that it is hardly necessary for us to discuss it in considering Dr. Galloway's qualifications as Assistant Secretary of Agriculture.

Mr. McCUMBER. We have hardly got started in the discussion of that bill, I will say to the Senator from Idaho.

Mr. BRADY. Again, I want to suggest that, owing to the action of the Senate yesterday, as I happened to vote with the Senator from North Dakota for his bill, it might be wise to raise Dr. Galloway's salary and to lower the salary of Senators from our point of view. I do not think that any of these things which have been mentioned should have any particular bearing on the question as to whether we should place Dr. Galloway's salary at $5,000 or $6,000. I have had considerable experience as a business man, and I can not agree with the distinguished senior Senator from Wyoming [Mr. CLARK] that you should not pay a man in accordance with the services he performs. The very best money that I have ever invested was in paying competent men for performing good service, and not raising the salaries of the men who did not perform their duties properly. I believe that we can do more to add to the benefits to be derived from this Agricultural appropriation bill by saying to the man who really has the work in charge, that we appreciate his efforts, than we can do in any other way. The chairman of the committee discussed the matter with us very fully and discussed it with the Secretary of Agriculture. It was the opinion of the committee that it was nothing but just and equitable that we should make this increase in Dr. Galloway's salary.

I am not in favor of going on record, and I shall not go on record, as favoring placing this salary at $6,000 at the present time, except with the understanding that it will be lowered to the present salary at the end of his service. I want to vote for the amendment that Dr. Galloway is to receive $6,000 a year so long as he stays in that office, and that when he retires and the next Secretary comes in his salary will be $5,000 until he demonstrates to the people of the country and to the Senate that he is worth more.

Mr. McCUMBER. Mr. President, I want to ask the Senator from Idaho and other Senators who are asking for an increase of this salary upon what basis do they make the request? Do I understand that it is because Dr. Galloway is especially proficient; that he peculiarly understands the needs of the agricultural people of the United Sates? Is that the ground on which Senators ask that his salary be increased? I ought to receive a direct answer to that question.

Mr. BRADY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Idaho?

Mr. McCUMBER. I yield to the Senator from Idaho.

Mr. BRADY. So far as I am individually concerned, that is the exact reason why I favor the increase of Dr. Galloway's salary.

Mr. McCUMBER. Very well, Mr. President, I want to just follow that out.

Mr. GORE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota also desire the views of the Senator from Oklahoma?

Mr. McCUMBER. Not just now, though I will yield in a moment.

Mr. President, I have always understood that by its fruit ye shall know the tree. I have supposed——

Mr. SMITH of Georgia. Will the Senator from North Dakota yield to me?

Mr. McCUMBER. In just a moment.

Mr. SMITH of Georgia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Georgia?

Mr. McCUMBER. I shall yield in a moment, but not just now.

The PRESIDENT pro tempore. The Senator from North Dakota declines to yield.

Mr. McCUMBER. If this wonderful tree had produced this wonderful fruit, I would suppose that fruit would at least be worth looking at and adopting; but while Senators by an overwhelming vote said that the results of six years' labor of Dr. Galloway were not worthy of consideration in the Senate, the very next day they come around and say that we should increase his salary $1,000 because of his efficiency. Now I yield to the Senator from Georgia.

Mr. SMITH of Georgia. Mr. President, in the first place, if we put the increase of salary upon the ground that it is for Dr. Galloway, and if we were to measure him by the substitute offered by the Senator from Oklahoma yesterday, as I voted for the substitute, to that extent I would be consistent in voting for the increase in salary; but I do not put my support of this increase of salary solely upon the purpose to increase the salary of the present incumbent. I think the Assistant Secretary of Agriculture should be master of the work of the Agricultural Department and of scientific agricultural work generally. At the present day there are many colleges of agriculture all over the United States that are calling for capable men to take positions as their head. I think our Assistant Secretary of Agriculture ought to rank with the presidents of the agricultural colleges; and in scarcely any of them do those gentlemen receive less than $6,000 a year. Many of them receive more; and I think $6,000 a year for the office permanently is not an excessive salary. I do not vote for the salary solely upon the idea that it was to go to one man; I will vote for it upon the idea that it is a proper salary for the place.

Mr. McCUMBER. Mr. President, I will not challenge the good judgment of those who believe that the action and the work of Dr. Galloway entitle him to an increase of salary, and who have voted for his work; but I do challenge both the good judgment and the sincerity of those who will vote against his propositions and kick them into the waste basket without one moment of consideration, and then come around and offer to

increase his salary because of his great efficiency. I think I have a right to ask those people to put themselves upon record here to show why it was a proper thing to kick Dr. Galloway's bill out of the Senate yesterday, and then to-day to come around and vote him the great compliment of a thousand dollars extra salary for having drawn that bill. But I am not surprised, Mr. President. During all of the argument that we heard yesterday, when the Senator from South Dakota [Mr. STERLING] was here dictating to the reporter, there were present another Senator and myself. I called for a quorum. After some time we got a sufficient number to make 49 Senators, and within three minutes there were but four of us left in the Senate. Then those Senators, who in some way have found out about the peculiar virtues of the Assistant Secretary of Agriculture, came in and overturned his long efforts. They did not even pay him the compliment of sustaining section 8 of his bill, which provided for protection against the assaults on the agents of the department by the agents of the boards of trade and the exchanges.

Mr. SMOOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Utah?

Mr. McCUMBER. I yield.

Mr. SMOOT. Mr. President, I voted the same way as the Senator from North Dakota did on that bill. The bill was offered as a substitute, and I think it is a great compliment to the Senator from North Dakota that his measure was thought of greater value than the one that was prepared by Dr. Galloway. There was no direct——

Mr. McCUMBER. Let me correct the Senator right there.

Mr. SMOOT. There was no direct vote on that bill.

Mr. McCUMBER. I know that; but let me correct the Senator. My bill was not thought to have any greater virtue. The fact is there was no thought on it; there was the whole trouble; that is what I complain of; there was nobody here to think; Senators did not want to trouble themselves about thinking in regard to anything that would require them to listen to debate upon a subject that affected eight or ten billion dollars' worth of produce in the United States. If the Senator wants the truth of it, those who voted against the substitute voted against it not with the idea that they were unfavorable to the substitute or favorable to my bill, but they voted against it with the idea that they were to destroy it, and then destroy the other bill. Nobody was fooled; I do not even think the Senator from Oklahoma [Mr. GORE] was at all deceived into the idea that those who were opposing Federal inspection were at heart in favor of his substitute. It was brought into the Senate under a disguise, with a wolf's internals inside a sheep's skin, with the idea that it would fool somebody and make people think that the boards of trade were really humane and wanted to do the right thing so far as they knew how to do it. Nobody was deceived about it, I want to inform the Senator, and I knew what the result would be.

When I go to the State of Illinois I know it contains Chicago, I know there is a board of trade there, and I know its workings, and I immediately count 2 votes against Federal inspection; when I go to Minnesota, I know that there is a very important system there, and I count 2 votes against inspection; when I get to Massachusetts I know that there is a great exporting place in that State and that the business is controlled by a board, and I count 2 more votes against inspection; when I get to New York I count out another 2, and so on; so that by the time I get through this system of elimination I know before I have introduced my bill just exactly what votes I will be able to get for it.

Mr. SMITH of Georgia. Mr. President——

Mr. McCUMBER. Just a moment, and I will yield to the Senator. I want to say to the Senator from Georgia, after the reading of the grain-inspection bill, after the Senator had learned of the conditions under which we were suffering and which had been reported again and again to the Senate, after he had listened to the reading of all of the resolutions that have been passed in different sections all over the country, I really thought, when he saw and reflected upon the fact that the grain growers were suffering from the same imposition as were the cotton growers because of the grades established in these great centers, that I would have the hearty support of the Senator from Georgia [Mr. SMITH] as well as that of the Senator from South Carolina [Mr. SMITH]; but they got their cotton bill through; they protected the cotton farmer of the South; and as these matters were afterwards presented to the Senate, the Senator from Georgia sat back in his seat, smiled complacently, and thanked God that he had at least gotten the cotton growers away from that condition. Then he immediately turned around and said, "Let the grain growers take care of themselves; we have not got time to consider the matter or to give it any thought whatever; canal tolls and half a thousand other things are coming up here, and it does not make much difference what happens to these few Yankee farmers up there in North Dakota or elsewhere; we are protected now in the South; we have protected the farmer in the South against the cotton thieves; now let the grain growers take care of themselves."

I really thought that I ought to have had the support of every one of those Senators who knew how their own farmers had suffered because of the manipulation of cotton grades in the Southern States; that I would at least have had some support in some way to get a bill through here that would protect the northern farmer against exactly the same character of manipulation.

Mr. SMITH of Georgia. Mr. President——

Mr. WEST. May I interrupt the Senator?

Mr. McCUMBER. Certainly.

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the senior Senator from Georgia?

Mr. McCUMBER. I first will yield to the senior Senator from Georgia [Mr. SMITH], because he first requested me to yield, and if the junior Senator from Georgia [Mr. WEST] will pardon me I will afterwards yield to him.

Mr. SMITH of Georgia. Mr. President, I wish to call the attention of the Senator from North Dakota to the fact that there are 14 Senators who voted against the substitute offered by the Senator from Oklahoma who voted finally for the bill introduced by himself.

Mr. McCUMBER. Yes.

Mr. SMITH of Georgia. If they had joined those of us who voted for that substitute, we would have passed the legislation. I wish to assure the Senator, for myself, that I voted for the substitute in good faith, expecting or hoping that it would pass.

I wish to add, further, that in respect of the cotton bill we asked for no Federal appropriation; we asked for no Government inspector to go to New York to inspect cotton. The real trouble I have had about the Senator's bill was the force of Government officials who were to do the inspecting. We have put into the Agricultural bill an appropriation of $75,000 or $76,000 to start the work of grading grain, and I believed that the bill presented by the Senator from Oklahoma, which carries an appropriation of, I think, about $300,000, would be all that would be necessary to bring the protection to the wheat growers that they require.

Mr. McCUMBER. Now, if the Senator will listen to me for one moment, how much does this bill carry for inspecting the meat of the packers? Will the Senator from Georgia inform me?

Mr. SMITH of Georgia. I do not know.

Mr. McCUMBER. Will the Senator from Oklahoma inform me how much the bill carries for that purpose?

Mr. GORE. I think there is a permanent statute which provides an annual appropriation of $3,000,000 for that purpose.

Mr. McCUMBER. Very well, Mr. President. Now, let us stop a moment and consider. The grain-inspection bill did not carry one cent of expense to the Government; that bill provided that every dollar of expense that was to be incurred by the Government should be charged against the grain, and when you would get through there would not be one single dollar to be paid by the Government of the United States. There can be no excuse upon that ground.

Now, suppose it had cost a million and a half dollars, as was stated by the Senator from Missouri [Mr. REED]—it would not cost a cent, but suppose it would. Let us put the two men together, the farmer who raises eight billion dollars' worth of grain and loses upon it, on the average, a grade, or nearly a grade, amounting to millions upon millions of dollars, comes before the Senate and says, "I want to have my grain inspected by the Federal Government, because I know that it will be honestly inspected; I know that people who buy it will have confidence in the inspection made by the Government." The Senate answered, "No; we will not give you any protection or any Government certification, because it may possibly cost something." Then comes the packer from Omaha and from Chicago and from Kansas City to the Senate of the United States, with his diamonds gleaming on his breast and his millions of dollars back of him, and he says, "I can sell my meat better if I can get Government inspection, because the public will then have confidence in my product with that Government certificate upon it that it is good, and I can sell it." You say to him, "But it is going to cost $3,000,000." "Ah," he says, "do not charge that to me; let the Government pay that," and immediately you say, "All right," and you go down into the

United States Treasury for these meat packers, these men who have more wealth than any other class of people in the United States according to their number, and give them $3,000,000; but the farmers, who come to you in great numbers, can not get a little appropriation, even where they have said they will take their chances and pay the entire expense.

I want to ask the Senator if he has any idea that there is any element of fairness or justice in that character of legislation? I admit that I stand here as a representative of the farmers; I will come branded with that stigma, if you want to brand me with it, for the interest of the farmers is about all I have in that section of the country, and I will admit that I have had to fight against these boards and exchanges for years. I know their influence; we met in the arena yesterday; and, well fortified, this little band of Spartans were able in the defiles of the mountains to destroy an army of farmers, and we went down to inglorious defeat.

You may get the benefit of it. We perhaps do not remember as well as some other people. We do not know always just how to get our rights. We have not the organization. If we did have it, I tell you this bill would not have been here six months before it would have been enacted into law.

I know what the farmers of this country want. I know what the grain dealers want. I know what the independent elevators of the country want. I say, there is no excuse on the face of the earth to stand here year after year and defy their pleas to be protected.

You got your cotton bill through, however. That is all you wanted. Your farmers are protected; and these same people of North Dakota, who lose from 3 to 5 cents a bushel on every bushel of grain they raise, are going down into their pockets this summer and are going to take out their hard-earned dollars to take care of your boll weevils, for your protection, against which you are appropriating millions.

I think we have a right and I had a right to ask of you, who are protecting your own people, that you meet me halfway and try to protect the farmers of the great Northwest, the cereal raisers, against a condition exactly similar to that against which you were battling with such eminent success. If we can not reach it in the same way, then you ought to have assisted me in getting a bill that would reach it.

Mr. WEST. Mr. President——

The PRESIDING OFFICER (Mr. HITCHCOCK in the chair). Does the Senator from North Dakota yield to the Senator from Georgia?

Mr. McCUMBER. I yield to the Senator from Georgia.

Mr. WEST. I think the Senator from North Dakota is a little unfair in his argument.

Mr. McCUMBER. I think somebody else was unfair yesterday.

Mr. WEST. I made no argument on the grain bill.

Mr. McCUMBER. I know it. I did not mean in the argument. I meant in the vote.

Mr. WEST. I voted for the substitute, but I did not vote for the main bill, because, as I told the Senator from North Dakota, I did not like the machinery of the bill. I thought the States ought to look after the inspection of this grain, and not the National Government. We have taken away too many of the States' rights to-day; and if the National Legislature continues as it has in the past four years, we will have here one great National Government, without any State lines.

Mr. SMITH of South Carolina. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from South Carolina?

Mr. McCUMBER. I yield, Mr. President.

Mr. SMITH of South Carolina. The Senator from North Dakota, I presume, referred to me when he said "the Senator from South Carolina."

I think it is fair to me and to him to make the statement that I was paired with a Member on the other side who was to vote against his proposition. I wish to make the statement here and now that I was heartily in sympathy with the legislation proposed, as the Senator from North Dakota evidenced his sympathy with the legislation that I had proposed. I was one of the few members of the committee who, when it was proposed to have the bill reported favorably by the junior Senator from North Dakota [Mr. GRONNA], voted to have it reported out.

The Senator from North Dakota knew more of the particulars and the needs of the section and of the produce than I did; but had I been at liberty to vote on yesterday, I should have voted for the bill, because the Senator was responsible for it. He represented the people concerned in the case of the grain-inspection bill, and I represented the people of the South in the case of the cotton bill, and I would not have hesitated for one moment to vote for his bill had I been at liberty to do so.

It is hardly fair, therefore, for the Senator to charge me with having gotten my cotton bill through, and then being indifferent to the passage of a bill to relieve the grain growers. Whether or not his bill would have done it is a question for him to decide. I was willing to follow him, as he showed a willingness to follow me.

I wanted to make this explanation for the reason that I will not sit in the Senate and permit any criticism of my attitude toward the class to which I belong, and which I know does stand so sorely in need, if not of actual legislation in its favor, at least of the repeal of some legislation that is operating against it.

Mr. McCUMBER. Mr. President, I want to thank the Senator for his entire fairness in this matter. In speaking of cotton I did not have reference to individual Senators. I had reference to the vote of a section, and what the vote of that section really meant to the farmers of the Northwest.

Mr. GORE. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Oklahoma?

Mr. McCUMBER. In one moment, Mr. President. I am not even criticizing those from Northern States who voted the other way. I think I am inclined to be reasonably fair and just, and I think I know the conditions and influences that surround them. I have never questioned the integrity of the Senator from Minnesota [Mr. NELSON]. He was the father of this grain-inspection system in Minnesota. He has been tied to it with a love knot by a pink and white ribbon, and nothing on the face of the earth could ever separate his allegiance from that system.

But, Mr. President, I know the conditions, and I have filled the RECORD full of complaints about them on so many days that I was ashamed to continue it. I was, however, giving all this information to vacant seats. I will say now that I do not believe that 1 in 20 of the Senators who voted against this bill had the slightest idea of what the bill was, had ever read it, or had ever listened to a single argument on either side of the question.

It is because I had no opportunity to present the case to them, because they came in here with their prejudices and voted without any knowledge of the subject, that I have a right to complain. I wanted to show that and make it clear by their attitude in voting down a bill drawn by Dr. Galloway; and then, on the very next day, coming in and voting him an extra salary because of his efficiency.

Those little misunderstandings are likely to come into existence, and we are not always consistent when we do not know what is going on in the Senate of the United States.

Mr. WEST. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Georgia?

Mr. McCUMBER. I yield.

Mr. WEST. Dr. Galloway's substitute got 26 votes. The committee propose to give him $6,000. The bill of the Senator from North Dakota got 20 votes, and the Senator gets $7,500.

Mr. McCUMBER. Very well, Mr. President. I will not, of course, put my intelligence nor my worth in the balance with that of Dr. Galloway. I appreciate what the Senator has said—that he might have been more valuable than I if he had been in the Senate of the United States; and I will accept from the Senator whatever disparagement he may see fit to utter in reference to my efficiency or what I may be able to accomplish on the floor of the Senate.

Mr. WEST. It is not a question of disparagement.

Mr. McCUMBER. Probably he would measure that efficiency by the vote I got for a bill as compared with the vote against it. I would not complain of measuring it in that way if the judge had read one syllable of the evidence on which he based his judgment.

Mr. WEST. Mr. President, I wish to say to the Senator from North Dakota that, except when the grain-inspection bill was first taken up, when I was away from here, I heard nearly all of his argument. I heard it presented here in this Chamber and listened to it attentively; so the Senator can not complain of me on that line. I voted against the bill because it placed this inspection under the civil service of the National Government, and for that reason I was opposed to it, but I am in favor of the standardization of the inspection of grain.

Mr. McCUMBER. Mr. President, there will be an opportunity to put that provision upon this bill, because I shall introduce as an amendment to the Agricultural appropriation bill the Lever bill. I will see then how many Senators will stand by that for which they have been pleading and who are afraid lest civil service would interfere with something—I do not really

know what. I shall be glad to offer that bill as an amendment, either as a whole or part of it. For the good credit of the Assistant Secretary of Agriculture I will suggest that if I do offer it as an amendment I ought to leave out the clause relating to the necessity of protection from assault, and I would do it, certainly, in a bill that saw fit to raise his salary from $5,000 to $6,000.

Mr. President, this bill created no other machinery at all. It was changing, you may say, a State machine to a Federal one. It did not add to the number. It did not change the machinery. It simply provided machinery one part of which was related to the other, and all parts of which would work in harmony.

When you presented your cotton bill you did not present it to the Legislature of South Carolina or the Legislature of Georgia. You knew that the evil was not within your own State, and you reached out into another State. You had to tie your legislation to some power of the Federal Constitution in order to get relief.

That is just exactly what I did. I abandoned the State, because we can not get the authority in the State. I appealed to the power of the Federal Constitution, because that was the only power that I could invoke to get the proper relief.

Mr. GORE. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Oklahoma?

Mr. McCUMBER. I yield.

Mr. GORE. I wish to say to the Senator from North Dakota that he is under some misapprehension as to the real situation with reference to cotton legislation in regard to the standardization of grades.

It is true that the substitute which I offered yesterday was prepared under the supervision of the Agricultural Department—the bill for the standardization of grain grades. I have also introduced a bill for the standardization of cotton grades. That bill was prepared under the direction of the Department of Agriculture. It is now in the Committee on Agriculture and Forestry. It never has been reported out. I think, from the action of yesterday, I can foresee awaiting the bill for the standardization of cotton grades the same slaughterhouse to which the bill for the standardization of grain grades has already gone. Perhaps the Senator is not aware of the introduction of that bill.

Mr. McCUMBER. Let me ask the Senator a question. The Senator introduced and reported the Lever bill as an amendment to my bill?

Mr. GORE. I did; yes.

Mr. McCUMBER. Would the Senator be willing to accept that as an amendment to the bill now before the Senate?

Mr. GORE. I should be glad to accept it.

Mr. McCUMBER. I ask the question because I shall offer it. I shall not offer all of it, at least in the first instance, because there are some portions that I know are so incongruous and so injurious to the trade, and would benefit only those who were assistants in drafting the bill—the great exchanges—that I would not want to put them in; but I have cut out portions of that bill, so as to include only Federal standardization and uniformity of applying it, because if we can get that far I am reasonably certain that in a very short time we will secure entire relief.

Mr. LANE. Mr. President, I wish to say that I did not intend and do not want to do any injustice to the gentleman who is being specially legislated for in this amendment. He may be a well-qualified man; I do not know whether he is or not. I made the statement awhile ago, however, that if we were to judge by results this department is not accomplishing very great benefit to the people, not sufficient to justify the expenditure of the $19,000,000. I stated that the average production of wheat had decreased since we began to raise it in this country.

The Senator from Michigan [Mr. TOWNSEND] called attention to a table here which is contained in Statistical Abstract No. 35, for 1912. He called attention to some statistics which I do not think prove his contention that the average has increased.

In 1866 there was an average yield of 26.1 bushels per acre. In 1912 it was 20.2. In 1911 it was 23.9, which is less than it was in 1866. That, I presume, was a bad year, for I find it follows all through the various products.

Mr. O'GORMAN. Mr. President——

Mr. TOWNSEND. Is the Senator referring to wheat?

Mr. LANE. Yes; wheat. In 1911 it was 23.9. In 1866 it was 26.1.

Mr. O'GORMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from New York?

Mr. LANE. I would like to finish this. It will take only a moment.

Mr. McCUMBER. The Senator must be mistaken.

Mr. TOWNSEND. I think the Senator is mistaken about that.

Mr. LANE. I was; that was corn.

Mr. TOWNSEND. Oh, yes; that is different.

Mr. LANE. In wheat it was 11.9 in 1866, and in 1911 it was 12.5, an increase of not quite 1 bushel.

Mr. O'GORMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from New York?

Mr. LANE. Yes.

PANAMA CANAL TOLLS.

Mr. O'GORMAN (at 2 o'clock p. m.). Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gore	Norris	Smith, S. C.
Bankhead	Hitchcock	O'Gorman	Smoot
Brady	Hollis	Overman	Stone
Bristow	Hughes	Page	Swanson
Bryan	Johnson	Perkins	Thomas
Burleigh	Jones	Pittman	Thompson
Burton	Kenyon	Ransdell	Tillman
Catron	Lane	Robinson	Townsend
Chamberlain	Lea, Tenn.	Sheppard	Vardaman
Chilton	Lee, Md.	Shields	Walsh
Clark, Wyo.	Lewis	Shively	Warren
Colt	McCumber	Simmons	Weeks
Cummins	Martine, N. J.	Smith, Ga.	West
Dillingham	Nelson	Smith, Mich.	

The PRESIDING OFFICER. Fifty-five Senators have answered to their names. A quorum is present.

Mr. O'GORMAN. I move that the Senate take up for consideration the bill (H. R. 14385) to amend section 5 of "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone," approved August 24, 1912.

Mr. WALSH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Montana will state his inquiry.

Mr. WALSH. Yesterday, upon the conclusion of the consideration of the grain-inspection bill, I secured the floor and moved that the Senate proceed to the consideration of Senate bill 4405. At the very earnest and anxious solicitation of the acting chairman of the Committee on Foreign Relations I gave way to a motion for an executive session. I desire to inquire now of the Chair whether the disposition of my motion is not the unfinished business of the Senate, and if not, whether by the rules of the Senate and the courtesy of the Senate I am not now entitled to be recognized for the purpose of making that motion. I should like to have the view of the Senator from Indiana [Mr. SHIVELY] on the subject.

Mr. SHIVELY. Mr. President——

Mr. BRADY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Indiana [Mr. SHIVELY] has been recognized. Does he yield?

Mr. SHIVELY. I do.

Mr. O'GORMAN. I suppose I have the floor. I yielded to the Senator from Montana, who rose to make a parliamentary inquiry. Of course, I suppose that I still have the floor.

The PRESIDING OFFICER. The Chair understood that the Senator from New York had made the motion and yielded the floor.

Mr. O'GORMAN. Oh, no.

The PRESIDING OFFICER. Then the Senator from New York will be recognized.

Mr. WALSH. I suppose that, having made a parliamentary inquiry, I am entitled to occupy the floor until that is disposed of.

The PRESIDING OFFICER. The Chair understood that the parliamentary inquiry was not addressed to the Chair.

Mr. WALSH. I did address the Chair upon it.

Mr. O'GORMAN. I suggest that the motion made by me is in order, and I presume it should be put to the Senate.

Mr. WALSH. My inquiry was whether my motion is not in order and whether it is not the unfinished business of the Senate.

The PRESIDING OFFICER. The Chair, as advised, would say that it is not the unfinished business, and that there is no unfinished business before the Senate. The Senate went into executive session yesterday before that motion was considered. There is no unfinished business, and the motion made by the Senator from New York is in order.

Mr. WALSH. Then I should like to have the idea of the Senator from Indiana as to whether I ought not to be recognized.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from North Carolina?

Mr. SIMMONS. I make the point that the motion is not debatable.

The PRESIDING OFFICER. The motion is debatable after 2 o'clock.

Mr. O'GORMAN. I yield to the Senator from Indiana [Mr. SHIVELY].

Mr. SHIVELY. Mr. President, it will be remembered, I think, that we adjourned last evening after 6 o'clock. It was late in the afternoon when the grain-inspection bill was voted upon. I had been requested by a number of Senators to move an executive session, as there was some executive business to be transacted. The Senator from Montana [Mr. WALSH] had made a motion to take up the bill of which he has charge, and I think I did express to him a desire to make a motion to go into executive session. I do not think I undertook to say that that would fix the status of his bill at all. Of course, it is known that a motion to go into executive session is privileged and can be made at any time.

Mr. SMITH of South Carolina. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from South Carolina?

Mr. O'GORMAN. I do.

Mr. SMITH of South Carolina. I rise to a parliamentary inquiry. I had intended, immediately upon the conclusion of the consideration of the grain-inspection bill, to ask the Senate to proceed to the consideration of House bill 6060. I wish to know if it would be in order to move, as a substitute for the proposition of the Senator from New York, the consideration of bill 6060, which is the immigration bill. We recognize thoroughly that the country is waiting for the solution of the tolls bill, and also for the passage or defeat of the immigration measure. I should like very much to have that bill disposed of, because I am sure it is going to take quite a while to dispose of the tolls bill. I wish to know whether I can move, as a substitute, to take up the immigration bill. I do not think that bill will consume so much time, and we could dispose of it before we proceed to the consideration of the tolls proposition. I make the inquiry of the Chair.

The PRESIDING OFFICER. The Chair did not understand the inquiry.

Mr. SMITH of South Carolina. The inquiry is whether a motion offering another bill as a substitute for the tolls bill is in order.

The PRESIDING OFFICER. It is not. The motion made by the Senator from New York is not subject to amendment.

Mr. SMITH of South Carolina. A motion to substitute another bill for that motion would not be in order?

The PRESIDING OFFICER. It would not be in order. The question is on the motion of the Senator from New York.

Mr. O'GORMAN. Mr. President, I desire to say, in explanation, that I do not press my motion in any spirit of contention with the Senator from Montana [Mr. WALSH]. If the Senate desires to give the tolls bill, as I believe it does, the position of unfinished business, then the motion made by me will prevail. If the Senate for any reason does not care to accord it that position, then the Senator from Montana is, of course, free to tender his own motion. I ask for a vote on my motion.

The PRESIDING OFFICER. The question is on the motion of the Senator from New York, that the Senate proceed to the consideration of House bill 14385.

The motion was agreed to.

The PRESIDING OFFICER. The Chair lays the bill before the Senate.

The SECRETARY. A bill (H. R. 14385) to amend section 5 of "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone," approved August 24, 1912.

The PRESIDING OFFICER. The bill is before the Senate as in Committee of the Whole, and——

Mr. O'GORMAN. I ask that the bill be temporarily laid aside so that the pending discussion upon the Agriculture appropriation bill may proceed.

The PRESIDING OFFICER. The Senator from New York asks unanimous consent that House bill 14385, which was just laid before the Senate, be temporarily laid aside. Without objection, it will be temporarily laid aside, and the Senate resumes the consideration of the Agricultural appropriation bill.

AGRICULTURAL APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

The PRESIDING OFFICER. The Senator from Oregon [Mr. LANE] is entitled to the floor.

Mr. LANE. Mr. President, I will be brief. An examination of the statistical table which was quoted by the Senator from Michigan [Mr. TOWNSEND]——

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from North Dakota?

Mr. LANE. I do.

Mr. McCUMBER. I suggest the want of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Borah	Hollis	O'Gorman	Smith, S. C.
Brady	Johnson	Oliver	Smoot
Bristow	Jones	Overman	Sterling
Bryan	Kenyon	Page	Sutherland
Burleigh	La Follette	Perkins	Swanson
Burton	Lane	Pomerene	Thompson
Catron	Lea, Tenn.	Ransdell	Thornton
Chamberlain	Lee, Md.	Reed	Tillman
Chilton	Lewis	Robinson	Townsend
Clapp	Lippitt	Saulsbury	Vardaman
Clark, Wyo.	Lodge	Sheppard	Walsh
Clarke, Ark.	McCumber	Shields	Warren
Colt	McLean	Shively	Weeks
Cummins	Martin, Va.	Simmons	West
Fall	Martine, N. J.	Smith, Ariz.	
Gore	Nelson	Smith, Ga.	
Hitchcock	Norris	Smith, Mich.	

The PRESIDING OFFICER. Sixty-five Senators have answered to their names. A quorum is present. The Senator from Oregon will proceed.

Mr. LANE. Mr. President, I will continue and I will be brief. There seems to have been an increase since 1866 of the average production of wheat, amounting to about 3 bushels per acre. When the fact is taken into consideration that during that time the great wheat-growing belt of the country has been opened and put into cultivation, and that that land produces from 30 to 40 bushels per acre, I think a close analysis will show that in the older wheat-growing sections the average production has been materially reduced. In Germany during the same length of time they have doubled the production of wheat.

As I said in the first place, this seems to be special legislation, and I am not in favor of such legislation in a general way. If it is to be applied to this gentleman and all of his successors, and if the work is worth that salary, I am perfectly willing to vote for it. But I do not think we ought to pass such legislation, nor is there anything in the results of the work of that department which I think justifies the expense, if a close analysis of it is made. I think, like the Indian appropriation bill, this measure needs to be looked into very carefully, and that it carries much deadwood, and that that fact will be ascertained whenever it is examined into, and I say that without intending any reflection upon the gentleman concerned whom I do not know.

Mr. RANSDELL. Mr. President, we have had a good deal of discussion here which does not bear upon the motion before us at all.

Mr. McCUMBER. Will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from North Dakota?

Mr. RANSDELL. I do.

Mr. McCUMBER. I simply want to say to the Senator that the Senate is beginning to show a degree of weariness, and after a call the seats immediately become vacant. I think Senators ought to listen to the logic the Senator is about to give them as to why they should vote an extra thousand dollars for a particular agent of the Government whose real worth has been demonstrated by kicking his bill out of the Senate. I therefore suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hitchcock	Norris	Smith, S. C.
Borah	Hollis	Oliver	Smoot
Brady	Hughes	Overman	Sutherland
Brandegee	Johnson	Page	Thomas
Bristow	Lane	Perkins	Thompson
Bryan	Lea, Tenn.	Pomerene	Thornton
Burton	Lee, Md.	Ransdell	Townsend
Chamberlain	Lewis	Reed	Vardaman
Chilton	Lippitt	Saulsbury	Walsh
Clark, Wyo.	Lodge	Sheppard	Weeks
Clarke, Ark.	McCumber	Shields	West
Colt	McLean	Simmons	Works
Cummins	Martine, N. J.	Smith, Ariz.	
Dillingham	Nelson	Smith, Mich.	

Mr. THOMAS. My colleague [Mr. SHAFROTH] is unavoidably detained and will not be in the Senate to-day. I make this statement to stand for the day.

The PRESIDING OFFICER. Fifty-four Senators have answered to their names. A quorum is present. The Senator from Louisiana will proceed.

Mr. RANSDELL. Mr. President, to resume what I was about to say, I do not think the present Assistant Secretary of Agriculture needs any defense at my hands. Anyone who has been connected with the Agricultural Department, or is familiar with the work of that department for the past 26 years, or any portion of that period, knows that Dr. Galloway, the present Assistant Secretary of Agriculture, has been one of the most faithful and efficient officials that department has ever had. It has been my good fortune often to come in contact with this gentleman, and I have been surprised and delighted at the very effective manner in which he handled the particularly difficult duties of his present office, as well as that which he held for many years as Chief of the Bureau of Plant Industry.

Whether he is to blame for our not having a greater yield of wheat per acre, I can not say; but it seems to me, Mr. President and Senators, that had it not been for the truly magnificent work of the Department of Agriculture, especially the Bureau of Plant industry, we would not be getting anything like as great a yield of wheat as we are receiving to-day.

I am not very well posted on wheat; we do not raise wheat in the section of the country where I live; but I can testify personally that had it not been for the splendid efforts of the Department of Agriculture in aiding the southern cotton growers to combat the boll weevil we would not be producing anything like as much cotton as we are making to-day, and that particular work was conducted by the Farmers' Cooperative Demonstration Work, one of the divisions under the Bureau of Plant Industry, of which Dr. Galloway was chief.

Mr. President, in considering the proposition to raise the salary of this office, I wish to call to the attention of the Senate a rather remarkable and far-seeing piece of advice given to the Senate Committee on Agriculture and Forestry in 1896 by Mr. J. Sterling Morton, then Secretary of Agriculture. It is very pertinent to the matter before us, and relates to a subject which I hope to see enacted into law, not at this session, but certainly at the next session of Congress. This document is dated Washington, D. C., February 15, 1896, and is addressed to the Committees on Agriculture of the United States Senate and House of Representatives. It is very brief, so I hope you will listen patiently. It reads as follows:

GENTLEMEN: After mature deliberation and conference with gentlemen who have made the scientific work of this department a special study, I am convinced that it is my duty to ask Congress to provide in the pending appropriation bill for a director in chief of scientific divisions, who shall be charged with the supervision of the very important, comprehensive, and constantly growing scientific work done in the Department of Agriculture.

The Department of Agriculture has for its object the discovery, exploration, development, conservation, and proper utilization of the agricultural resources of our country. This is accomplished through various agencies, which are classified as either purely scientific, technical, or simply business, administrative, or educational agencies. These agencies are organized in the department under two large bureaus and a number of divisions and offices. The Weather Bureau includes 3 executive or business offices, 6 technical divisions, and 5 scientific experts engaged in research, besides 154 technical observing stations and 52 signal stations along the coast and on the Great Lakes. The Bureau of Animal Industry includes 2 administrative offices, 152 technical stations or agencies engaged in meat inspection, quarantine work, etc., and 3 laboratories for scientific investigations. Of the remaining divisions in the department, 7 are engaged in administrative business, publishing and distributing information, 8 are classed as technical, and 7 are chiefly engaged in scientific investigations or surveys of the country's resources.

An analysis of the last act shows that of the $2,400,000 appropriated for the Department of Agriculture, over $1,700,000, or over 70 per cent, was given for this scientific and technical work, as distinguished from the administrative or general work.

A canvass of the rolls of the department shows that 993 out of a total of 2,019 employees are engaged chiefly upon this scientific and technical work.

Mr. President, at the present time we have in the Department of Agriculture 14,478 employees, the growth since 1896 having reached this great figure. We had that year 2,019 and have at the present time, I repeat, 14,478. In that year we had an appropriation of $2,400,000. The bill now before us shows that the appropriation for next year will amount to $19,511,000, if every item is retained. It is therefore apparent from these figures that there has been a remarkable growth in the Department of Agriculture since 1896.

Secretary Morton continues:

It would seem a simple business proposition, needing no argument to support it, that this vastly important and comprehensive work, promoting, as it does, the development of almost every resource of our land and every industry of our people, our production at home and our markets abroad, and concerning even the food and health of a large part of our population, for which $1,700,000 are annually expended, and in which nearly a thousand scientific and technical experts are engaged, should have a permanent, broadly educated, and experienced scientific superintendent.

Mr. President, I have not the exact figures, but I have no doubt that out of this 14,478 employees at the present time, more than 7,000 are scientific and technical men of high character and ability. Mr. Morton continues:

No permanent and adequate direction and supervision is provided in the present organization of the department. It is not to be supposed that the Secretary of Agriculture, a member of the President's Cabinet, even if a farmer and an experienced executive, will always be a technically trained scientific man. Even if he should be, he occupies the position only four years, and thus scarcely becomes familiar with the difficult and complex work of the department before he leaves it.

Let me say here that it was very fortunate for this country that the late Secretary of Agriculture, Mr. Wilson, held his place, if I recollect correctly, for 16 years instead of for 4 years. He performed public duties of the highest character, and I, as a Democratic Senator, am glad to testify to the splendid services rendered by him.

Mr. McCUMBER. Mr. President, may I make a suggestion to the Senator from Louisiana?

THE PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from North Dakota?

Mr. RANSDELL. I yield to the Senator from North Dakota.

Mr. McCUMBER. I desire to suggest to the Senator from Louisiana that while he as one Democrat is extolling the virtues of this gentleman there are very few Democrats on that side of the Chamber who are listening to him doing so.

Mr. RANSDELL. I hope the Senator is not going to raise the point of order now. I certainly would not have yielded if I had had any idea that the Senator was going to interrupt me twice in the course of a very brief speech to make the point of no quorum. I trust the Senator will not now make that point, but will allow me to proceed. I repeat, I would not have yielded to the Senator for that purpose.

Mr. McCUMBER. I could not make the point of order now, because the Senator does not yield for that purpose.

Mr. RANSDELL. No; I would not yield for that purpose. I shall yield for a question.

The PRESIDING OFFICER. The Senator from Louisiana declines to yield.

Mr. RANSDELL. Mr. Morton continues:

The Assistant Secretary of Agriculture is subject to the same conditions. Because he must represent the Secretary in the administration, he must go with the administration. These conditions, which are necessary and inherent in our system of government, it is not proposed to change. A Secretary and Assistant Secretary are both needed. But another permanent officer is needed to direct the work of the various scientific bureaus of the department, under the general authority of the Secretary.

I ask the attention of Senators to this point, because it is the meat of the proposition which I am trying to lay before you:

In order to accomplish the best and most permanent results, this department must have a permanent policy with regard to all its scientific work. This department has less relation to the general executive business of the Government and less connection with what is usually called politics than any other department of the Government.

I can corroborate that statement. I always heard that Secretary Wilson was very much of a partisan, but I can say that when it came to administering the duties of his office he did everything possible for that portion of the country where I live, and we never heard the word "politics" in connection with the Department of Agriculture any more than we hear of it to-day under Secretary Houston.

Mr. Morton continues:

In fact, the scientific work of the great bureaus, divisions, and surveys, above referred to, should be kept free from politics to be efficient and impartial to the interests of all. The numerous bureaus and divisions do not have under the present organization, in fact, can not have, the attention and direction which the interests involved demand. After a change of administration the department is practically headless, and to a great extent helpless, until the new Secretaries have had time to master the details of the technical work.

We all know that it takes a great deal of time and much study to master the details of the technical work of these great departments.

Mr. Morton continues:

Such a director of scientific divisions is needed, therefore, if for nothing else, to carry on the scientific work of the department from one administration to the next. Is it conceivable that any great manufacturing, railroad, or mining company, undertaking such difficult scientific work and using so much money and so many men, would provide for it no permanent scientific direction or supervision whatever, and then change all the heads every four years, leaving the work practically at a standstill, or, which is worse, entirely without direction or supervision for six months to a year? The change of administration affects the work of this department even more than it does that of others, because its work is less of a routine character, is more progressive, changes more frequently, and thus requires constant direction to keep it usefully going. The bureaus and divisions of this department can not do practically the same thing year after year, as they do in the great business departments of the Government, but must, if they serve the people properly, do a new and different thing almost every month in the year. They therefore need constant assistance and supervision much more than do the divisions of other departments.

Aside from these special considerations with regard to the scientific work, the Department of Agriculture greatly needs another general executive officer. It has only two Secretaries authorized to take official action. There is no provision in the laws for any officer of the department to act in case of the absence of the two Secretaries as there is in

some of the other departments. Either the Secretary or the Assistant Secretary has to be present in the department every day and every official hour during the year.

Mr. CLARK of Wyoming. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Wyoming?

Mr. RANSDELL. I yield for a question.

Mr. CLARK of Wyoming. I was not in the Chamber when the Senator from Louisiana began his speech, and I do not know from what he is reading; but the last statement which he has just read seems not to be in accordance with the practice, at least, because within the past two years I have many times known when the head of the Weather Bureau has acted as Secretary of Agriculture, and it has so appeared in communications.

Mr. RANSDELL. I can not say as to that. The report from which I am reading is one made by the Secretary of Agriculture, J. Sterling Morton, in 1896, and it bore so forcibly upon the question of selecting a scientific man like Dr. Galloway as Assistant Secretary of Agriculture, one who was thoroughly trained, one who could pick the work up immediately where the former administration left it off and carry it on, that I wished to read it here and then to make a very few suggestions in regard to it.

Mr. Morton continues:

> The bureaus and divisions in Washington are, contrary to the popular idea, much the smaller part of the Department of Agriculture. Outside of Washington there are 154 observing stations, 52 signal stations of the Weather Bureau. There are 100 meat-inspection stations in 40 different cities and towns in the country; 21 different quarantine stations for import cattle at points on the coast, the Canadian and Mexican boundary; 9 different stations for inspecting export stock and 19 for inspecting stock for Texas fever, making a total of about 150 stations in the Bureau of Animal Industry, which should have inspection and supervision occasionally by the highest authority of the department. The agricultural experiment stations, located in different States and Territories, and several experiment stations of the Department of Agriculture must be inspected by this department. In addition to these, the department has many other agencies for studying soils, foods, and food dietaries, testing timbers, and collecting material illustrating our natural resources scattered all over the country. The Secretaries or director should be in position to visit and examine the work of the various agencies for the purpose of informing themselves as to their uses and needs. In view of the great amount of business done, and of the large number of branches of the department scattered all over the country, another executive officer is greatly needed in order to permit a better distribution of work and a more regular and thorough supervision of the outlying branches of the department. The new officer here asked for should therefore be authorized to act, when called upon by the Secretary, as a Second Assistant Secretary.
>
> The salary attached to the position should be sufficient to secure the services of a broadly educated, scientific man, who has had the necessary experience in the administration of affairs and the direction of scientific work, and should be equal to that paid for similar services in other branches of the Government.
>
> I therefore respectfully recommend that you insert, after line 11, page 1, of the bill making appropriation for the Department of Agriculture for the fiscal year ending June 30, 1897, H. R. 5161, the words: "Director in chief of scientific bureaus and investigations, to serve during good behavior, to have the authority to act as Assistant Secretary, and to perform such other duties as the Secretary may direct, $6,000."
>
> Respectfully submitted.
>
> J. STERLING MORTON, *Secretary.*

Mr. President, that recommendation was made by a Secretary of Agriculture 18 years ago, when the department was very small and unimportant compared with what it is to-day. Mr. Morton realized the necessity of having a technical scientific man as either Assistant Secretary, or Second Assistant Secretary of Agriculture, a man who could tide over that great department from one administration to another, a man who could handle it in a proper way, a man who could be the real head of that department while the new Secretary and his Assistant Secretary were learning the business of a great office for which they had had no special training. Secretary Morton strongly advocated such a change, and if needed then, as I am firmly convinced it was, it is much more essential to-day. Our present very efficient and able Secretary of Agriculture, Mr. Houston, realizing the wisdom of that advice given 18 years ago, when selecting his Assistant Secretary sought the aid of a man who for 25 years has been giving all of his great ability to the service of the Department of Agriculture. This choice fell upon Dr. B. T. Galloway, at that time Chief of the Bureau of Plant Industry, who was enjoying a nice position at the very comfortable salary of $5,000 a year, with a life tenure, under the civil-service regulations, which entitled him to hold the office for life. Dr. Galloway accepted the position of Assistant Secretary at a salary of $5,000, the same that he had been receiving, knowing that at the end of four years he was subject to the ordinary exigencies of politics and might possibly go out with his chief at the end of that time.

The Committee on Agriculture, realizing the wisdom of the course pursued by Secretary Houston, and knowing that Dr. Galloway is entitled to more pay, have sought to increase this salary by $1,000, making it $6,000 instead of $5,000. They have coupled with it a provision, which I personally do not believe in, that the increased salary shall be limited to the term of office of the present incumbent. I do not believe in that kind of legislation. I believe that we should go further and say that there shall be a scientific head in the Department of Agriculture, to be called the director in chief of scientfic and regulatory work, who should receive a salary of at least $6,000, and who should serve during good behavior.

If we get the proper kind of director, why should he be subject to the exigencies of politics? We can not train that kind of man in a few years. If Dr. Galloway is the man, and I am convinced that he is, let us make him the director of scientific work; if he is not the man, let us find some other who is the proper person, and make him director of the scientific work of the Department of Agriculture and ex officio Assistant Secretary of Agriculture, and let him hold the position during good behavior, just as he would if under civil-service rules.

That kind of provision would be wise. I admit it is not before you now; you can not vote upon that proposition at this time; but I wish you to consider it, because it is going to be before you some day, if I can bring it, in the interest of good administraton of this great department, which I consider is the one that does most for the people of the country, and certainly the one that comes closest to those with whom I come in contact—the great agricultural classes.

Mr. MCCUMBER and Mr. VARDAMAN addressed the Chair.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. VARDAMAN. I am going to detain the Senate but a moment——

Mr. MCCUMBER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from North Dakota?

Mr. VARDAMAN. Not at this time.

Mr. MCCUMBER. I rise to a point of order.

The PRESIDING OFFICER. The Senator will state the point of order.

Mr. MCCUMBER. The point of order is that the suggestion of the want of a quorum is proper at any and all times, and no Senator can hold the floor continuously with all of the seats vacant and have no quorum here present to listen to him.

The PRESIDING OFFICER. The Chair overrules the point of order.

Mr. MCCUMBER. I addressed the Chair first, fully half a minute before the Senator from Mississippi addressed the Chair, and I had a right to have the recognition of the Chair at that time. So I raise the point of order that the Chair's duty in enforcing the rules of the Senate was to recognize the Senator who first addressed him.

The PRESIDING OFFICER. The Chair recognized the Senator from Mississippi, and the Senator from Mississippi declines to yield.

Mr. VARDAMAN. Mr. President, I am greatly interested in the passage of this bill. The department of this Government which affects most vitally the interests of and whose functions come closest to and deal most intimately with the American people is the Agricultural Department. We all realize that agriculture is the source of all real wealth. Upon the products of the farmer, the products of the soil, all enduring prosperity is based.

I am sorry that the discussion has taken the form that it has as to this particular clause of the bill. No one has questioned the loyalty of Dr. Galloway to the duties of the place which he now holds or his fidelity in the office which he has held for the last 25 years. He is efficient; he is capable; and it was only in recognition of his splendid service, I am advised, that he was taken from a position in the classified service and made Assistant Secretary of Agriculture. That he is entitled to the salary of $6,000 a year I do not for a moment question. He ought to have it. I know of no man who can bring more experience, more skill, and more learning to the performance of the functions of the office than he; but that is not the question before the Senate. The question is as to whether or not there shall be special legislation that the salary shall be suited to the man rather than to the office.

If the amendment proposed by the Senator from Wyoming [Mr. CLARK] should be voted down, you are going to open up a veritable Pandora's box of trouble; the legislative branch of the Government will be appealed to continuously to increase the salaries of men who have performed with especial or marked ability the functions of some particular office. I want to say in this connection that no man should be put into that place who is unfit and incapable of performing the duties of the place. Capable men are obtainable, and it is the duty of the Secretary

of Agriculture and of the President, who has the appointive power, to pick out the man to do the work.

Fix the salary at what it ought to be, a salary which will command the services of a capable and efficient man, and let it stand at that rate; and then, if you want to show some special honor or pay some special compliment to Dr. Galloway for efficiency, do it in some other way. But do not give the salary to the man; fix it for the office, and let all men who come to perform the duties of the office enjoy the same compensation. If you do not do that, I repeat, you will set a precedent which will vex you continuously in the future, because every time a man is appointed to a place, if he is a man of especial worth, some Senator will come into the Senate or some Member will come into the House and propose a bill to increase the salary of that office while the extraordinary Mr. Jones or Mr. Smith may occupy it. The policy will be pernicious and the system intolerable. It will not do, and I warn the Senate against it.

Mr. BRADY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Idaho?

Mr. VARDAMAN. I do.

Mr. BRADY. I know that the Senator from Mississippi is very much in earnest in advocating the line of action suggested in his address; but I want to ask him if he does not believe that when we find a public servant who is efficient and honest——

Mr. VARDAMAN. He could not be efficient without being honest. There is no permanent success or enduring efficiency without good judgment, guided by honesty and a high sense of duty.

Mr. BRADY. And entirely capable of earning the salary that we propose to pay, it is right and proper that we should recognize his services in that way?

Mr. VARDAMAN. You have done that in unmistakable terms by raising the salary to $6,000 a year.

I asked a question a moment ago of the chairman of the committee which I think I ought to explain. I asked him if the raising of this salary was a condition precedent to Dr. Galloway retaining the place.

If Dr. Galloway had made that a condition precedent to keeping it, I should have been opposed to increasing the salary; but since he had nothing to do with it, and his services are so manifestly, so incontrovertibly efficient he is entitled to this consideration, and I am willing to vote for the amendment for the increase in the salary. I do not, however, want the provision inserted that if the present incumbent shall be removed or shall resign the salary shall go back to $5,000. There may be other men who will be put there who ought to have $6,000. I think that would hardly be fair to Dr. Galloway's successor. It might be an unwarranted reflection upon the man's true worth and general qualification.

Mr. BRADY. That is the very thing of which I am very much in favor. I am voting to raise this salary for Dr. Galloway because of his many years of experience in this line of work—of his special ability to perform the task he has performed so well; but I am not in favor of saying that we will give $6,000 to every man who occupies the position. Let us give a new man $5,000, as we have done in the past, until he demonstrates by years of experience that he is entitled to receive more, and then give it to him.

Mr. VARDAMAN. Would the Senator be in favor of applying that rule to all offices under the Government?

Mr. BRADY. I have applied it to all lines of business in which I have ever been engaged, and have found it the most profitable investment I have ever made. I say frankly and honestly that I am in favor of applying this rule to every branch of the Government where a man shows special fitness for a position. It is done in other branches of work.

I am advised that a member of the force of the Senate is named in the bill, and it is provided that the position shall carry a certain salary during his incumbency. Why do we that? Because we know that from years and years of efficient service he has reached a point where we can not dispense with his services, and we are willing to name him. That is an unusual thing, but it is right, and it is proper; a just recognition of faithful and efficient service.

Mr. VARDAMAN. If the Senator should apply that system in the management of the affairs of this great Government, he would have matters in such a state that nobody could ever tell just what it was going to cost to conduct the Government. As a matter of fact, you can not do that.

Mr. BRADY. I am of the opinion that cases of this kind will very seldom arise. I would not be in favor of doing this indiscriminately, but I do believe that in this particular instance it ought to be done. I know that with the sense of fairness and justice that the Senator from Mississippi possesses, if he knew as much about this matter as the committee, whose members have gone into it very thoroughly and conscientiously, he would agree with us that in this particular case it is right and proper that we should specify that when Dr. Galloway ceases to be Assistant Secretary of Agriculture the salary of the position shall go back to $5,000, and when a new Assistant Secretary of Agriculture is named let his salary be $5,000 until he demonstrates, as Dr. Galloway has demonstrated, that he is worth $6,000 a year.

Mr. VARDAMAN. I do not think it is any injustice to Dr. Galloway to decline to put in the bill a provision of the kind. I do not think it is an injustice at all to him. As I said a moment ago, however, we are setting a precedent here that is going to rise up to vex us interminably in the future. You have shown your confidence in Dr. Galloway by raising his salary. He accepted the office for $5,000. Because of his superior wisdom, because of his large experience, because of his fidelity to duty, you have shown your appreciation for his services and his true worth by increasing the salary to $6,000. That is enough. I submit that it will be a mistake to put that sort of a provision in general legislation.

Mr. McCUMBER. Mr. President——

Mr. VARDAMAN. If you want to pay him a tribute, introduce a resolution in the Senate and in the House extolling him, proclaiming to the world our confidence in him and our appreciation for his services, and I will vote for it. Propose a medal to him for efficiency, and I will vote for that; but such a provision as this has no place in legislation of this character, and I submit that the Senate will make a mistake if it puts it there. I am opposed to it. I am not opposed to the salary of $6,000, but I am opposed to putting in the provision which the Senator from Wyoming [Mr. CLARK] has moved to strike out. I sincerely trust that the motion made by the Senator from Wyoming may prevail.

I yield now to the Senator from North Dakota. Did the Senator from North Dakota address me?

Mr. McCUMBER. I am not asking the Senator to yield. I addressed the Chair upon a right, not a privilege, and that was that I could raise at any time the point of there being no quorum present. The Chair refused to allow me to present the matter to him under the rules, and the decision under the rules. I am obeying the command of the Chair.

Mr. VARDAMAN. I hope the Senator will not "shake his gory locks at me." I am not responsible for the Chair's ruling.

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from North Dakota?

Mr. VARDAMAN. I yield to the Senator if he desires to address——

Mr. McCUMBER. I did not ask the Senator to yield to me. When the Senator is through, if the Chair will allow me, and will recognize whoever addresses him first, I may possibly get recognition.

Mr. VARDAMAN. I will yield the floor.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. McCUMBER. I thank the Chair very much for recognizing me before some one else appeared.

Mr. President, we might as well settle another little matter right here, which I am going to discuss in connection with this bill.

Mr. JONES. Mr. President——

Mr. McCUMBER. I raised a point of order, and I have a right to present that point of order.

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Washington?

Mr. JONES. I desire to make the point of order that we can not settle anything here without a quorum.

Mr. McCUMBER. Very well, Mr. President——

Mr. JONES. I suggest the absence of a quorum.

Mr. McCUMBER. Mr. President I have yielded to no one; and I will let the Chair rule again whether any Senator can make a point of order——

The PRESIDING OFFICER. The Chair rules that a Senator can not be taken off his feet by a point of no quorum against his consent.

Mr. JONES. Mr. President, I appeal from that decision.

Mr. McCUMBER. Mr. President, let me call attention to a little rule we have on this subject. Possibly it might not be inappropriate to quote the Constitution of the United States in a case of this kind.

The Consitution, in Article I, section 5, provides:

A majority of each (House) shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent Members, in such manner and under such penalties as each House may provide.

The Senator from Mississippi [Mr. VARDAMAN] was addressing the Senate. I assume that when any Senator is making an argument before the Senate the Senate is doing business. If it is not, I do not know what it is doing here. If arguments are not a part of the business of the Senate, I do not know what is a part of the business of the Senate. If it is possible that the Chair can look over and see three or four Senators here, and a Senator desires to take the afternoon, while the rest, or 60 per cent, of the Senate is at the ball game, and there is no method by which you can call the Senate back into the Chamber—if there is a rule that will prohibit us from obtaining any relief under those circumstances, I really want that rule pointed out.

I wish to call the attention of the Chair to the fact that I appreciate that it has been ruled that a Senator could not be taken off his feet——

Mr. WALSH. Mr. President——

Mr. McCUMBER. But I think it is an improper rule.

Mr. LANE. Mr. President——

Mr. McCUMBER. I want to call attention right now——

Mr. WALSH and Mr. LANE addressed the Chair.

Mr. McCUMBER. I want to call attention right now to the late ruling upon that point.

The PRESIDING OFFICER. Does the Senator from North Dakota yield, and to whom?

Mr. WALSH. I desire to make a parliamentary inquiry.

Mr. McCUMBER. I yield to the Senator from Oregon.

Mr. LANE. I simply wish to call the Senator's attention to the fact that that is exactly the game he worked on me a while ago.

Mr. McCUMBER. Yes.

The PRESIDING OFFICER. The Senator from Montana desires to make a parliamentary inquiry.

Mr. WALSH. I am very desirous of following this discussion, and I will ask what is the question before the Senate?

The PRESIDING OFFICER. The question before the Senate is the Agricultural appropriation bill.

Mr. WALSH. I understood that the Senator from North Dakota was addressing himself to some other question.

Mr. McCUMBER. Connected with the Agricultural appropriation bill is the right to have a quorum of the Senate present during the discussion, and I am raising a point of order upon that right. I have seen the evils resulting from having an argument go on in the Senate when practically no one was present.

Mr. WALSH. Mr. President, that was the purport of my inquiry. I understood that some question of order had been raised, and I was desirous of being advised what the point of order was.

The PRESIDING OFFICER. There is no question before the Senate except the Agricultural appropriation bill.

Mr. McCUMBER. Now, let me call the attention of the Chair to the precedents and decisions and points of order on page 405, where it has been held that a point of order that no quorum is present can not be made without the consent of the Senator holding the floor. It was so held in 1870. There is a note in the middle of the page which seems to accord with sound reason, and is certainly in conformity with the Constitution, which reads:

> The later decisions are to the effect that the absence of a quorum can be suggested at any time, it being in the nature of a point of order, which, under Rule V, clause 2, can be made at any time. The clause in question reads as follows:
>
> "If at any time during the daily sessions of the Senate a question shall be raised by any Senator as to the presence of a quorum, the Presiding Officer shall forthwith direct the Secretary to call the roll and shall announce the result, and these proceedings shall be without debate."

The Chair can easily see that these later decisions are right. Otherwise we are continuing to transact business in the Senate without a quorum, and we have no method of protecting ourselves and bringing a quorum here.

Mr. President, while that is not the direct question right at this point, I submit it to the Chair, so that in his moments of leisure he may consider it a little, and possibly we may have an opportunity to have a means by which we can keep this Chamber in a condition to do business by having a quorum present.

I now desire to reply briefly to the Senator from Louisiana [Mr. RANSDELL], who said he would not yield the floor for anything but a question. The Senator from Louisiana——

Mr. REED. Mr. President——

Mr. McCUMBER. Has spent considerable time in the discussion——

Mr. REED. A question of order.

The PRESIDING OFFICER. The Senator from Missouri raises a question of order. The Senator will state it.

Mr. REED. What matter is now before the Senate?

The PRESIDING OFFICER. The Agricultural appropriation bill is before the Senate.

Mr. REED. Is the Senator speaking on the Agricultural bill or speaking on a point of order?

The PRESIDING OFFICER. The Chair understands that the Senator is speaking upon the Agricultural appropriation bill.

Mr. REED. If that is the case, I have nothing to say.

The PRESIDING OFFICER. There is no point of order before the Senate.

Mr. REED. I was out for a moment.

The PRESIDING OFFICER. The Chair has ruled, and no appeal has been taken from the ruling of the Chair.

Mr. McCUMBER. I am under great obligations to the Senator from Missouri for allowing me to go on.

Mr. REED. No, Mr. President; the Senator is under no obligation to me. If he were, I would permit him to cancel it instantly.

Mr. McCUMBER. The Senator would if he could, certainly.

Mr. President, as I was about to say, the Senator from Louisiana [Mr. RANSDELL] has been discussing the question whether or not the salary of the Assistant Secretary of Agriculture should be raised. The Senator has evidently given the subject a great deal of consideration, as shown by the quite lengthy address he made upon the subject. I only wish the Senator had given the same consideration to the labors of the Assistant Secretary of Agriculture.

It has been stated on the floor that the Assistant Secretary of Agriculture had given six years of time in formulating a bill to come before the Senate. That bill was brought before the Senate yesterday in the form of a substitute. It was a bill which was admittedly drawn by the Assistant Secretary of Agriculture, whose salary is to be raised because of his efficiency. Upon that vote the Senator from Louisiana voted against the substitute proposed, the work of the very man whose salary he now asks to have raised because of his efficiency.

The Senator has discussed at some length the inspections that are being carried on by the Assistant Secretary of Agriculture. The Assistant Secretary of Agriculture asked permission that he might go further; that he might make a standardization of his labors in the bill which he presented to the Senate. When that bill was presented the Senator from Louisiana and others voted against granting him any such authority.

The Senator from Louisiana extols the farmers of this country and discusses his own friendship toward them. I appreciate the fact of his great friendship toward those, possibly, whom he knows; but it is evident that he has little knowledge of the farming conditions in the great Northwest, which are to be affected by this legislation.

Mr. President, I know how difficult it is ever to espouse the real cause of the farming public in a body like this. They are an unorganized mass of labor on the American continent. They can not speak to the Congress as readily, it may be as intelligently, as some others, and can not bring to bear directly upon the committees of Congress their desires on any particular point. It may be that because of the lack of association, because they are scattered all over the broad surface of the country, they have not the concentrated knowledge upon any particular subject that would enable them to know exactly what their own interests are; and one who seeks earnestly to serve their interests may sometimes be very much discouraged because he does not receive the great, strong, earnest support that he would receive if his voice were raised in behalf of these boards or the other institutions that operate through their own organization.

I desire in this connection to call the attention of the junior Senator from Georgia [Mr. WEST] to a question that he asked yesterday. He was not present when I replied to the question. He asked at that time whether or not a carload of grain would have to be inspected under that bill if it should happen to pass through a corner of a State. He was answered, I think, in the affirmative by the Senator from Missouri [Mr. REED].

I think if either of the Senators had read the bill carefully they scarcely could have made that assertion; but the particular point I desire to make plain to the Senator is how much easier it is to find these little technical faults when the matter pertains to the rights and the benefits of a great unorganized class as compared with when it is for the benefit of a very small organized class.

Let me call the Senator's attention to the fact that we appropriate $3,000,000 a year out of the coffers of the Government for the purpose of inspecting the meat-packers' products. When that bill was under consideration nobody inquired whether or not you could take a piece of pork from one side of a State line to another without its being reinspected. Nobody delved into

those little questions to see whether or not it would work a hardship upon the farmer who wanted to haul a quarter of beef across an imaginary State line and sell it in a little town on the other side of the line; and so you passed the bill. You passed it without any great opposition, and you prevented the interstate shipment of any meat whatever at any point unless it was inspected.

Did you stop to think how that operated upon the farmer who wanted to sell his own meat in the market? I will tell you how it operated.

We have on the Minnesota side of the line a little town called Moorhead. We have on the North Dakota side another little town called Fargo. We have a number of Jews in the city of Fargo. I imagine that they did not have the proper official to kill their beef for them, and so a Jewish rabbi on the other side of the river had done the butchering for the benefit of a few Jewish families upon the North Dakota side. That little quarter of beef was brought over, and this Jew was immediately arrested and proceeded against by the great Government of the United States for having taken a quarter of beef from one State over into another.

We hear no great complaint about that. In fact, it is very beneficial to the Chicago meat packers, because then their market is not interfered with in the slightest degree, and the Chicago meat packers can take their beef which has been properly butchered in the city of Chicago and send it on to these orthodox Jewish families. When, however, it comes down to a matter as between the farmer and the Government we can easily see all of those little defects in a bill which might operate, as you think, unjustly.

The man who wanted to bring that quarter of beef over the State line would have had to take it clear down to St. Paul, 265 miles away, to have it inspected, and then bring it across the river. That is the bill we have been supporting for years. It seems to me, when we are trying to find all kinds of excuses upon the face of the earth against a proposition that will benefit the farming community of the country, that we ought to direct our eyes for a moment toward the kind of bill that is protecting the meat packers of the country.

Mr. President, while I am on the floor, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

Mr. SIMMONS. Mr. President, a question of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. SIMMONS. I make the point of order that there has been no business transacted by the Senate since the last roll call.

The PRESIDING OFFICER. The Chair will overrule the point of order.

Mr. SIMMONS. I desire to be heard upon that suggestion. I disagree with the Chair. If the Chair has definitely made up his mind, of course I will not express the disagreement; but I assume that the Chair is open to a change of mind upon the subject.

I remember very distinctly that a year or two ago—and I do not recall any subsequent ruling upon the subject which would change the ruling then made—when we were engaged upon the debate with reference to certain matters connected with the powers of the Interstate Commerce Commission as to fixing rates the Senator from Wisconsin [Mr. LA FOLLETTE] was engaged in delivering to the Senate a very elaborate argument. He had spoken for a long time, and a call was made for a quorum. The roll was called and disclosed the presence of a quorum. The debate was resumed. Within a short time, nothing having transpired except debate—and I think in that case the debate was a continuation of the speech of the Senator from Wisconsin—another suggestion of the absence of a quorum was made. The point was then raised that no business had been transacted since the first call. My distinct recollection is that the Chair then held that debate was not such intervening business as made the second call for a quorum in order.

Mr. SMOOT. Mr. President, I wish to say to the Senator that the case now before the Senate is not at all parallel with the case referred to by him. If the Senator will remember, the Senator who was speaking on the former occasion himself called for a quorum, and then continued speaking on the same subject, and then himself called for a quorum again. In this case the Senator from Louisiana [Mr. RANSDELL] has spoken since the last quorum was called for.

Mr. SIMMONS. How does that affect the principle?

Mr. SMOOT. Oh, the principle is entirely different.

Mr. SIMMONS. The mere fact that in one case the Senator calling for the quorum continued to occupy the floor for an hour or so, and then called again for a quorum would not differentiate it, according to my mind, from the situation we have here to-day. As I understand, the Senator from North Dakota called for a quorum a little while ago, and every time I have happened to be in the Senate since that time the Senator from North Dakota has been speaking.

Suppose, however, some one else had, we will say, participated in the debate along with the Senator from North Dakota. Can it be that where one Senator alone occupies the floor for two hours that is not such intervening business as would make another call in order, but where two Senators have occupied the floor during the two hours that is such intervening business as would make another call in order?

Mr. SMOOT. Mr. President, I think there is no question about there having been intervening business in this case, because I think two or three Senators have spoken upon this subject since the last quorum was called for. I think the Chair is perfectly right in his ruling.

Mr. GORE. Mr. President, I think there is no doubt that under the rules the Senator from North Dakota has the right to raise the point of no quorum, and I should regret to see any precedent to the contrary established; but I wish to appeal to the Senator not to raise the point at this juncture. I wish to remind him that the bill is under consideration now through the grace of the Senator from New York [Mr. O'GORMAN]. The canal-tolls bill has been made the unfinished business, and I understand it is the purpose of the junior Senator from New York to call up that bill for consideration on Monday, and probably to press it until its final conclusion. It is important therefore that this measure should be pressed forward.

I have great respect for the high intelligence of the Senator from North Dakota, and I am willing to join him in any well-directed, diplomatic effort to secure legislation in regard to the standardization of grain grades. I am not perfectly persuaded that the course now being pursued will contribute to the end which the Senator and I both have so much at heart. I might also say that I refrained from undertaking to displace the grain-inspection bill by calling up this appropriation bill, although in one sense it was a privileged measure. I hope now that I shall enjoy some reciprocity at the hands of the Senator and that we may be allowed to proceed.

The PRESIDING OFFICER. The Chair has ruled that the Senator from North Dakota can properly suggest the absence of a quorum. The last quorum suggested was at 2 o'clock and 20 minutes. The Chair is prepared to rule that a point of no quorum made simply for dilatory purposes without any intervening business may be held to be out of order, but the Chair thinks that business has intervened, and if the Senator from North Dakota requests it the Secretary will call the roll.

Mr. McCUMBER. Mr. President, with the kind permission of the Chair, I will withhold that point, as it is not debatable, that I may make a mere suggestion to the Senator having the bill in charge.

This particular amendment deals with the raising of the salary of the Assistant Secretary of Agriculture. I think before we raise the salary we ought to determine whether or not the work of the Assistant Secretary of Agriculture has been efficient, and the best way to determine his efficiency is by voting into this bill a recommendation which he has tried to get before Congress for years. I will not go any further than his present recommendation. Then I would know better after the Senate has passed judgment upon his work as to whether I should join with the Senate in adding a thousand dollars here for his proficiency in that work.

If the Senator would just allow me to present this other bill and have it accepted or put into the Agricultural appropriation bill, I then would certainly not do anything that would delay his bill. I prefer that it should go over until Monday, that the Senator and myself and others might see if we could not get an amendment that would be entirely satisfactory.

Mr. REED. Mr. President, I rise to a question of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. REED. The Senator from North Dakota raised the question of a quorum. I call attention to paragraph 2 of Rule V:

> If at any time during the daily sessions of the Senate a question shall be raised by any Senator as to the presence of a quorum, the Presiding Officer shall forthwith direct the Secretary to call the roll, and shall announce the result, and these proceedings shall be without debate.

The suggestion having been made, the roll must be called.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Burton	Gore	Lea, Tenn.
Brady	Chamberlain	Hitchcock	Lee, Md.
Brandegee	Chilton	Johnson	Lodge
Bristow	Clarke, Ark.	Jones	McCumber
Bryan	Cummins	Kenyon	McLean
Burleigh	Dillingham	Lane	Martine, N. J.

Nelson	Ransdell	Smith, Mich.	Townsend
Norris	Reed	Smith, S. C.	Vardaman
O'Gorman	Robinson	Smoot	Walsh
Oliver	Saulsbury	Sterling	Warren
Overman	Sheppard	Sutherland	Weeks
Page	Sherman	Swanson	West
Perkins	Shields	Thomas	Works
Pittman	Simmons	Thompson	
Pomerene	Smith, Ga.	Thornton	

Mr. WARREN. I wish to announce that my colleague [Mr. CLARK of Wyoming] is unavoidably absent from the Senate. He is paired with the Senator from Missouri [Mr. STONE].

Mr. SMOOT. I desire to announce the unavoidable absence of the senior Senator from Kentucky [Mr. BRADLEY] and the junior Senator from Wisconsin [Mr. STEPHENSON].

The PRESIDENT pro tempore. Fifty-eight Senators have answered to their names. A quorum of the Senate is present.

Mr. WARREN. Mr. President, I have only a word to say on this amendment regarding the salary of the Assistant Secretary. I am for that raise and the amount of $6,000 as the salary of that officer whether the proviso may be stricken out or not. If the proviso is stricken out, it will be, of course, until changed by later legislation, the salary, no matter who may occupy the place, and left in that way we will have perhaps early and more pressing demands from Assistant Secretaries of other departments.

I believe if there is any department which deserves to have the best that can be had, not only for Secretary but for Assistant Secretary, it is the Department of Agriculture. As to the present incumbent, I think it is within the knowledge of nearly every Senator in the body that he is a most competent man, a most experienced one, and one who could easily get a much larger salary in any one of many of the institutions of this country.

I sincerely hope that there will be no opposition to the subject matter itself of raising the salary. Earlier in the debate, when the present occupant of the chair was in the chair, a point of order on the ground that it was general legislation was overruled, which was undoubtedly right. If it is legislation, it would be special legislation, and that term should have been used. But whatever it is, a vote might as well come up on the matter itself as to whether it shall be stricken out or not. I understand under the present conditions a motion is before the body to strike out the proviso. May I inquire of the Chair if I am correct?

The PRESIDENT pro tempore. The Senator is correct.

Mr. WARREN. We have heretofore provided in this proposed manner for certain officers—for instance, for the Assistant Secretary of the Interior. He was paid $6,000 or $6,500 a year during the incumbency of one appointee. I think the salary was carried through as many as four or five appropriation bills. We have made the same distinction in some of the salaries of officers of the Senate, and it has been understood, while first it was the endeavor to pay what a useful man was worth, on the other hand, to allow it was to compliment the particular person in that particular way. It can easily be applied to his successor if we leave it open. If we strike out this provision and adopt the remainder of the amendment as offered, of course the salary then remains at $6,000 unless repealed, and will apply to whoever may be appointed, and it will undoubtedly bring us various demands from Assistant Secretaries of other departments.

I am not quite sure but that it ought to be demanded and granted and that all the First Assistant Secretaries should receive $6,000. It is noticeable that in some instances we pay a commissioner $6,000, and we are besought to raise the salaries of Assistant Attorneys General and many others to $6,000, and even to $7,500.

While an assistant to a Cabinet officer, who is the principal in the absence or illness of the head of the department, is Acting Secretary his acts are just as binding as if he were the Secretary himself, and I for one would be glad to afford a salary of $6,000 to all the First Assistant Secretaries of all the great departments.

So I feel free to say we ought to give the present Assistant Secretary of Agriculture the salary that is proposed.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the senior Senator from Wyoming [Mr. CLARK] to the amendment of the committee.

Mr. McCUMBER. Mr. President, I wish to direct my remarks to the Senator having charge of the bill. I wish the Senator would pass this amendment over for a short time and let me offer as an amendment to another portion of the bill that portion of the Lever bill which deals only with standardization and uniformity of grades, without anything else, cutting out all the balance of the bill relating to supervision or having any control, or even the examination of those who are to do the inspecting. It is only a portion of the bill that has been reported by the Assistant Secretary of Agriculture, but it assures those two things that we have been fighting for for years, and is a long way toward the goal we hope some day to reach. As all the Senators who have spoken against the grain bill have inuded at least that portion of the Lever bill, we might save a great deal of argument and considerable time upon this proposition if we could have that put in as an amendment.

Mr. GORE. Mr. President, so far as I am individually concerned, I should be very glad to accept the amendment which the Senator intends to propose, but I have no authority to do so.

Mr. OVERMAN. Mr. President, I rise to a point of order.

The PRESIDENT pro tempore. The Senator from North Carolina will state his point of order.

Mr. OVERMAN. I do not want to antagonize the Senator from North Dakota, but I suggest that in the consideration of appropriation bills usually unanimous consent is given to consider the committee amendments first. Was that agreed to be done in this case?

The PRESIDENT pro tempore. The procedure is so uniform in that behalf that the Chair rules that it is one of the laws of the Senate.

Mr. GORE. That was the original request. I had not intended to raise that point at this time. I will say to the Senator from North Dakota that I anticipate the amendment he intends to propose will be met with a point of order. As far as I am concerned, I would be very glad to accept it. I am with the Senator at any time in an effort to secure that legislation; but I do not think he can make progress in that direction now.

Mr. McCUMBER. I can not imagine that it would be subject to a point of order or that any one of those, at least, who have extolled this other bill will raise a point of order against it. I offer a portion as an amendment to that section which provides already in the bill for $78,000, I think, for inspecting and fixing standards of grain. So it is certainly pertinent. It is simply an amendment to that particular section.

Mr. GORE. I wish the Senator would defer his amendment until we finish the consideration of the committee amendments. That is the usual order, and undoubtedly it is the best order of procedure in the Senate. I am certain his amendment will not be accepted by the Senate. I have no control of that situation. I believe the Chair has ruled that the amendment would be out of order.

The PRESIDENT pro tempore. The uniform usage since the Chair has been in the Senate is that committee amendments are first in order, but the Chair has not looked to see definitely upon what specific authority it rests. That will be the ruling of the Chair under the present state of the Chair's information on the subject.

Mr. McCUMBER. That is true, Mr. President, but I understand that any one of the committee amendments can be passed over.

The PRESIDENT pro tempore. The Chair did not hold anything to the contrary.

Mr. McCUMBER. I ask that the amendment may be passed over for the time being and that some other committee amendments may be taken up. If the Senator will just pass over this one amendment for the time being and take up the next committee amendment, I think we might facilitate the progress of the bill. That could be done without interfering with the rule.

Mr. GORE. I should like to have the Senator state his request again. Is he merely asking that we pass over this amendment without involving any agreement that he shall offer an amendment?

Mr. McCUMBER. Yes. I ask just to pass it over temporarily, and I think I will have an opportunity possibly to see the Senators and ascertain if there will be any objection to the particular amendment that I wish to present, because my action and vote and discussion of this portion of the amendment will depend very much on what is done with the other. I assure the Senator that I want to do nothing except to get this moiety of justice.

Mr. GORE. Very well. I am sorry that the Senator did not prefer that request an hour ago.

The PRESIDENT pro tempore. Without objection, the amendment will be temporarily laid aside.

Mr. JONES. Mr. President, I see no reason why we should pass over this amendment. I can not see where the salary of this officer has anything to do with the grading of grain, and so forth. So I object.

Mr. OVERMAN. Mr. President, I suggest to the Senator from Oklahoma that possibly he can not do anything further with the bill this afternoon. We ought to have an executive

session. It is now 10 minutes of 4. Will not the Senator consent to lay the bill aside so that we may have an executive session? I suggest that the Senator from Oklahoma and the Senator from North Dakota get together and compose their differences by Monday morning.

Mr. McCUMBER. I think we could.

Mr. GORE. Mr. President, I may say that I have been accommodating everybody in the Senate by deferring the consideration of this bill at everybody's request, in particular at that of the Senator from North Dakota; that is, I have refrained from antagonizing his bill or trying to deprive it of its place by pressing the appropriation bill. It seems to me useless to insist upon the further consideration of the bill to-day.

Mr. McCUMBER. I may say to the Senator, with the permission of the Chair, there is one great advantage the Senator in charge of the bill has, and that is that this Congress will not adjourn until it has passed his bill.

Mr. GORE. I think that observation is not supported by the history of the bill up to to-day. If we are to thrash over grain every day as we have done to-day, I fear that two or three harvests will come and go before the Agricultural bill will be passed.

Mr. McCUMBER. I do not think so.

POSTAL SAVINGS BANK FUNDS.

Mr. BRYAN. I move that the Senate proceed to the consideration of House bill 7967, the postal savings bank bill.

Mr. SMOOT. I hope the Senator from Florida will not make that motion at this time, because there are a number of Senators away who did not expect it to come up to-day, and I ask him not to do it. I want to say to the Senator that there are a number of objected cases on the calendar, and I am aware it will take some time to dispose of those.

Mr. BRYAN. Mr. President——

Mr. SWANSON. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from Virginia will state his parliamentary inquiry.

Mr. SWANSON. Would that motion interfere with the unfinished business if the postal savings bank bill is taken up?

Mr. BRYAN. It will not.

The PRESIDENT pro tempore. That depends upon what transpired soon after 2 o'clock. The present occupant of the chair was not in the chair at the time the unfinished business was laid aside.

Mr. SWANSON. Temporarily.

The PRESIDENT pro tempore. If it was laid aside generally, without specific reference to the Agricultural appropriation bill, the motion of the Senator from Florida would not interfere with it.

Mr. SMOOT. I wish to say if the motion of the Senator that House bill 7967 be taken up, is agreed to and the bill is not disposed of before adjournment, it will displace the unfinished business and become the unfinished business.

Mr. BRYAN. I thank the Senator, but I am aware of that. There is no purpose upon my part to undertake to displace the unfinished business. I have no such intention. We have spent three or four hours to-day and have done nothing.

The PRESIDENT pro tempore. It all depends upon the language of the order laying aside the unfinished business. If it was laid aside generally, the motion of the Senator from Florida would not displace it. If it was laid aside for the specific purpose of permitting the Agricultural appropriation bill to be considered, the motion of the Senator from Florida would displace it.

Mr. O'GORMAN. The unfinished business was laid aside temporarily to permit the Senator from Oklahoma to proceed with his appropriation bill. I understand he has concluded the consideration of that bill for to-day, and it seems to me that the business now before the Senate is the canal bill.

The PRESIDENT pro tempore. That is true.

Mr. BRYAN. Let me ask the Senator from New York if he will agree to lay the bill aside temporarily in order that the Senate may consider the postal savings-bank bill?

Mr. O'GORMAN. Without prejudice?

Mr. BRYAN. Without prejudice.

Mr. LODGE. By unanimous consent?

Mr. O'GORMAN. By unanimous consent.

Mr. WARREN. It can be done by unanimous consent.

Mr. SMOOT. That is the only way it can be done.

The PRESIDENT pro tempore. What request does the Senator from New York make in connection with the unfinished business?

Mr. O'GORMAN. I ask that it be laid aside temporarily by the consent of the body.

Mr. SMOOT. Before consent is given, I want it distinctly understood that, if it is given, I shall call for a quorum for the purpose of getting Senators interested in the bill here.

Mr. BRYAN. Of course, I can not help that. There are more Senators now here than there were some time ago.

The PRESIDENT pro tempore. The Senator from New York asks that the unfinished business may be still further laid aside temporarily to permit the consideration of such bill as the Senate may see proper to take up on a vote.

EXECUTIVE SESSION.

Mr. SWANSON. Pending that motion, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 30 minutes spent in executive session the doors were reopened.

CONFIRMATION OF ROBERT H. TERRELL.

Mr. SMITH of Georgia. Mr. President, I ask unanimous consent that my vote on the confirmation of Robert H. Terrell as a judge of the municipal court of the District of Columbia be made public. I desire it to be known that my vote was cast against his confirmation.

The PRESIDENT pro tempore. If there be no objection, it is so ordered.

Mr. BANKHEAD. I move that the Senate adjourn.

The motion was agreed to, and (at 4 o'clock and 23 minutes p. m.) the Senate adjourned until Monday, May 4, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 2, 1914.

CONSULS.

J. Paul Jameson, of Pennsylvania, now interpreter and vice and deputy consul general at Hankow, to be consul of the United States of America at Antung, China, vice Edwin L. Neville, nominated to be consul at Tansui.

Edwin L. Neville, of Ohio, now consul at Antung, to be consul of the United States of America at Tansui, Taiwan, vice Adolph A. Williamson, nominated to be consul at Dalny.

Willys R. Peck, of California, now Chinese secretary to the legation of the United States of America to China, to be consul of the United States of America at Tsingtau, China, vice James C. McNally, resigned.

Albert W. Pontius, of Minnesota, now consul at Nanking, to be consul of the United States of America at Newchwang, China, vice William P. Kent, nominated to be consul at Leipzig.

Charles L. L. Williams, of Ohio, now consul at Dalny, to be consul of the United States of America at Nanking, China, vice Albert W. Pontius, nominated to be consul at Newchwang.

Adolph A. Williamson, of the District of Columbia, now consul at Tansui, to be consul of the United States of America at Dalny, Manchuria, vice Charles L. L. Williams, nominated to be consul at Nanking.

UNITED STATES DISTRICT JUDGES.

Henry D. Clayton, of Eufaula, Ala., to be United States district judge for the middle and northern districts of Alabama, vice Thomas Goode Jones, deceased.

Wilbur F. Booth, of Minneapolis, Minn., to be United States district judge for the district of Minnesota, vice Charles A. Willard, deceased.

PROMOTIONS IN THE ARMY.

CAVALRY ARM.

Lieut. Col. Daniel H. Boughton, Eighth Cavalry, to be colonel from April 30, 1914, vice Col. Joseph Garrard, Fifteenth Cavalry, retired from active service April 29, 1914.

Maj. Robert D. Walsh, Eighth Cavalry, to be lieutenant colonel from April 30, 1914, vice Lieut. Col. Daniel H. Boughton, Eighth Cavalry, promoted.

Capt. George P. White, Ninth Cavalry, to be major from April 30, 1914, vice Maj. Robert D. Walsh, Eighth Cavalry, promoted.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 2, 1914.

UNITED STATES JUDGE.

Henry D. Clayton to be United States district judge for the middle and northern districts of Alabama.

POSTMASTERS.

ARKANSAS.

Robert S. Allen, Mena.
William D. Jacoway, Dardanelle.
John H. Nance, Earl.
W. A. Ragon, Clarksville.

INDIANA.

Thomas J. Shelburn, Zionsville.

MASSACHUSETTS.

Michael E. Comiskey, Plymouth.

NORTH CAROLINA.

Horace McR. Gudger, Biltmore.

TENNESSEE.

A. W. Ashton, Hohenwald.
Rufus R. Doak, Lebanon.
Philip D. Harris, Greenfield.
George E. McKennon, Columbia.

HOUSE OF REPRESENTATIVES.

SATURDAY, *May 2, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Father Almighty, hear us when we pray for a universal faith which shall dispel doubt and unite mankind into one great family, a universal justice which shall right all wrongs, a universal love which shall drive out hate and still unholy strife, a universal peace which shall be stronger than war and unite all hearts in the glad acclaim, "Glory to God in the highest, and on earth peace, good will toward men." In the name of the Prince of Peace. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed without amendment joint resolution of the following title:

H. J. Res. 242. Joint resolution authorizing the Secretary of War and the Secretary of the Navy to loan equipment, for the purpose of instruction and training, to sanitary organizations of the American National Red Cross.

REVISION OF THE PRINTING LAWS.

Mr. BARNHART. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BARNHART. The Committee on Printing has reported a bill. In the ordinary course of events bills from the Printing Committee are considered privileged. I want to inquire if the House bill 15902, providing for a revision of the printing laws, would be considered privileged?

The SPEAKER. What is it about?

Mr. BARNHART. It is a general revision of the printing laws.

The SPEAKER. It would not be.

Mr. BARNHART. Then, Mr. Speaker, I want to ask unanimous consent that this bill be considered as privileged, to be called up at any time that an agreement can be made between the three leaders of the House and the Speaker and the chairman of the Committee on Printing for its consideration.

Mr. FITZGERALD. Mr. Speaker, if it is to be given an opportunity to be called up in preference to an appropriation bill, I shall object.

Mr. BARNHART. I will say that it is not intended that it shall interfere with an appropriation bill.

The SPEAKER. The Chair would like to make a statement himself.

Mr. HENRY. Mr. Speaker, what was the request?

The SPEAKER. To make the bill privileged. The statement the Chair wishes to make has no particular reference to this bill, but has reference to the practice generally of making bills privileged. The tendency is to make a multitude of bills privileged.

Mr. HENRY. Mr. Speaker, before it gets too late, I want to reserve the right to object.

The SPEAKER. The gentleman from Texas [Mr. HENRY] reserves the right to object. This practice gets the Speaker and everybody else into trouble. Appropriation bills are now privileged, and certain other bills are privileged, and conference reports are privileged; and according to my recollection you made one or two bills privileged yesterday. If you go on making them all privileged, you might as well not make any of them privileged. These observations, however, have no special reference to this particular bill. They are made in the way of a general admonition all around.

Mr. HENRY. Mr. Speaker, reserving the right to object, I want to say that I concur in everything that the Speaker has said about such bills. It seems to me that in all these matters we ought to pursue the usual course, and that wherever the rules are to be amended and the business of the House is to be changed and upset these matters ought to go to the Committee on Rules. If we allow a lot of requests like this to be granted, to pile up a lot of things before the Speaker's table that ought not to be there, confusion will result. They ought to come up in the regular way; and, therefore, believing that this is not a good practice, I shall hereafter object to all such requests as this, and I shall also object to this.

Mr. BARNHART. I hope the gentleman will reserve his objection.

Mr. HENRY. I will reserve it for a moment.

Mr. BARNHART. My purpose, Mr. Speaker, in making this request is to obtain early consideration of this bill. It is a bill not political in its nature but of immense interest, a bill which the Joint Committee on Printing of the Senate and the House has considered to be of much importance to the House and to the Senate and to the country, having to do with matters that have for several years been considered important. But that is not all of it. There are provisions in the bill for the improvement of economies in the Government printing, for the regulation of the franking privilege, for improvements in the form and publication of the CONGRESSIONAL RECORD, in the regulation of the insertion of matter therein, and many things which I believe would appeal, if the report were read, to every Member of this House.

Mr. HENRY. I believe it is a very important bill, Mr. Speaker, and if the gentleman will only write his rule and drop it in the basket, I think the Committee on Rules will give it proper consideration.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. BARNHART. Yes.

Mr. MANN. Has not the Joint Committee on Printing a good chance of being reached shortly on a call of committees? It is only a little way down the list before the Committee on Printing will be reached.

Mr. BARNHART. No; I have not looked it up, but I believe the prospect is not assuring.

Mr. MANN. As I understand, the Committee on Printing is only a few committees off.

Mr. BARNHART. How many, did the gentleman say?

Mr. MANN. Only three or four committees have bills on the calendar ahead of the Committee on Printing.

Mr. BARNHART. I have no desire to violate the precedents or to impose upon the rules, Mr. Speaker, but I think it important to get this bill up at the first opportunity between consideration of the supply bills or at the first lapse of business. But if you do not want to consider it I shall withdraw my request.

Mr. MURDOCK. Mr. Speaker, will the gentleman yield?

Mr. BARNHART. Yes.

Mr. MURDOCK. Has the gentleman considered the device of a night session or night sessions? The Committee on Claims has been forced to night sessions.

Mr. BARNHART. I do not understand the nature of the gentleman's question. Have I considered a night session?

Mr. MURDOCK. Yes; or several night sessions?

Mr. BARNHART. No; I have not. The Committee on Printing will be glad to take any time for the consideration of the bill the House will provide.

Mr. MURDOCK. The gentleman's committee will not be reached at any near-by time on call of committees?

Mr. MANN. It is within three or four committees. The gentleman from Indiana undoubtedly voted to put in a bill and consume time ahead of his own committee.

Mr. BARNHART. No; I did not.

Mr. HENRY. Well, Mr. Speaker, to end it, I object.

The SPEAKER. The gentleman from Texas [Mr. HENRY] objects.

PEARL HARBOR DRY DOCK.

Mr. PADGETT. Mr. Speaker, I wish to state that in the discussion yesterday over the point of order against the increase of limit of cost of the Pearl Harbor dry dock I omitted to read into the RECORD some matters which I think are pertinent and which should appear in the RECORD. I wish to quote the exact language of Mr. Alfred Noble in his report to the Secretary of the Navy, in which he states:

It has been recited that the piles could not be driven to the depth indicated by the computations as necessary; that other resistances to

uplift were doubtless overestimated; disaster resulted; and it must now be considered whether by some modification in the method within the restrictions of the contract the work could be executed. It is obvious that if riprap or other loading properly distributed had been placed on the concrete as the unwatering proceeded in such manner that the load added equaled the weight of water withdrawn the uplift would not have occurred during the unwatering. It would be necessary, in order to complete the work, to remove such loading in sections, so that the concrete could be placed. The displacement of at least one of the blocks of concrete in section 2 at the time of the collapse (and possibly more than one) suggests a danger in this procedure, although such displacement would be less probable if there were no violent disturbance of the bottom. It is clear, however, that it would be necessary to restrict the removal of the load to small areas at any one time; the work would have to be done piecemeal, with considerable risk, with great delay and additional cost, and the finished work would be rendered less satisfactory by such subdivision.

In my opinion the plan was no longer judicious when it was found that piles could not be driven to depth necessary to hold down the concrete seal, and it should be modified or abandoned. It has been suggested that the plan might be modified by placing the full amount of floor concrete required by means of the tremie before pumping out. Computations similar to those on page 50 show that this amount would hardly be sufficient to withstand hydrostatic pressure alone without the margin of resistance given by arch action in the bottom; this is so uncertain in amount that it should not be relied upon, particularly in view of the several accidents that have occurred.

I believe, therefore, that a different method of construction should be adopted; one that will be safe at every step in the construction and afford a satisfactory dry dock when completed."

I desire also to quote from a letter addressed to me by the Secretary of the Navy, of date February 14, 1914, in which he states:

After this failure, on receiving advice as to the seriousness of it, the department directed the Chief of the Bureau of Yards and Docks and Civil Engineer F. R. Harris to go out there and examine the work and advise as to the steps necessary to carry it out to a successful completion, and, at a later date, arranged with Mr. Alfred Noble, an eminent civil consulting engineer of New York, to visit Pearl Harbor and report on conditions and suggest remedies. The gist of all of these reports were that the department's plans for this dry dock could probably be carried out, but would involve great delay and serious hasard and gave no great assurance of the successful completion of the work or of its entire satisfaction after completion.

After negotiations with the contractors for this work, the San Francisco Bridge Co., looking to some arrangement whereby the work could be carried on with assurance of success, all of which negotiations came to nothing, the department asked for the advice of the Attorney General as to the responsibility of the contractors under this contract, and on being informed, in an opinion of January 5, 1914, to the effect that the contractors were required to bring the dock contracted for to completion if it were physically possible to do so, but were not required to guarantee that the dock shall endure and discharge its duty successfully after completion. In view of this, and of the failure to induce them to open up any negotiations looking to a change of plan or method of construction, the department, on January 26, 1914, directed them to proceed with their contract on the old plans and specifications. However, on further negotiations, on February 10, 1914, the contractors submitted a letter to the department stating they were proceeding with the work, but in view of all of the circumstances and their familiarity with the site, they did not desire to stand in the department's way of securing a good dry dock which would stand and endure, and that they did not think that such a dry dock could be secured under this contract, and indicated their readiness to take up the question of changes in their contract to secure the desired end.

At a conference at the Navy Department, at which you were present, between Mr. Alfred Noble, the consulting civil engineer referred to, the Chief of the Bureau of Yards and Docks (Mr. Stanford), and Civil Engineer F. R. Harris, all expressed the opinion that the construction of this dry dock under the present plans and specifications was not alone fraught with the greatest hasard and probable delay in eventual completion, if completed at all, but was inadvisable as an engineering work and was not based on satisfactory assurance and factors of safety which are usually required in good engineering practice. In short, that it was impracticable.

These three engineers agreed that a different design, depending upon the use of floating caissons or boats, gave every assurance of the successful and early completion of this work, but that it would involve an increase in the authorization for this work of approximately, but not over, $1,500,000.

The contract obligation for the dry dock now stands at $3,168,461.61, of which the sum of $1,096,330.01 has been paid the contractor on monthly vouchers on account of work done.

There are sufficient funds remaining under the appropriation to defray the cost of proceeding with this dry dock on the new plans indicated during the next fiscal year, but to enable the department to enter into an agreement with the contractors to proceed on the new plans it will be necessary to increase the limit of authorized cost for this structure.

These extracts clearly show the opinion of the department and of the engineers.

QUESTION OF PROCEDURE AS TO MESSAGES.

Mr. LEVER. Mr. Speaker, on yesterday the Senate, through one of its clerks, sent a message to the House. Included in that message was the statement that the agricultural extension bill, H. R. 7951, had been returned to the House. A statement of that fact does not appear in the RECORD, and I suggest that the RECORD be made to show that the messenger from the Senate made the announcement; and then I submit a parliamentary inquiry as to whether or not that is a sufficient message to give notice to the House that the Senate has agreed to the conference report on that bill?

Mr. MANN. Mr. Speaker, that would depend upon the message itself.

The SPEAKER. The Chair understands that what happened was this: That the Secretary of the Senate, or one of the clerks of the Senate, brought over sundry bills and recited that the Senate had done this, that, and the other with those bills, and then he announced that he returned to the House the bill to which the gentleman refers. Now, he had no more right to return a bill to the House than had the man in the moon.

Mr. MANN. What took place before was that the Senate sent a message to the House stating that the Senate had agreed to the conference report. Then they sent a message requesting the House to return the papers and the message.

The SPEAKER. Yes.

Mr. MANN. That was granted, and both the papers and the message were returned to the Senate. Now, in order to make the RECORD complete we must have a message from the Senate as to whether they have agreed to the conference report.

The SPEAKER. The Chair thinks the gentleman from Illinois is right. The only question is what to do about it.

Mr. MANN. I suggest that the way to do is to have some one telephone to the office of the Secretary of the Senate and call attention to the fact that a proper message has not been sent over here.

The SPEAKER. The Chair again agrees with the gentleman from Illinois.

Mr. LEVER. Mr. Speaker, I will see that that is done.

The SPEAKER. And the gentleman from South Carolina [Mr. LEVER] says he will see that they send a message over here.

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14084, the naval appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. JOHNSON of Kentucky in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the naval appropriation bill, the title of which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 14084) making appropriations for the naval service for the fiscal year ending June 30, 1915, and for other purposes.

Mr. LEVY. Mr. Chairman, I ask unanimous consent to return to page 28, line 12, for the purpose of offering a separate paragraph.

The CHAIRMAN. The gentleman from New York asks unanimous consent to return to page 28, line 12, for the purpose of offering an amendment. Is there objection?

Mr. MANN. What is the amendment?

Mr. PADGETT. Mr. Speaker, reserving the right to object, I will ask that the gentleman's amendment be read for information.

The CHAIRMAN. The Clerk will report the proposed amendment.

Mr. PADGETT. For information.

The CHAIRMAN. For information only.

The Clerk read as follows:

Amend by inserting as a separate paragraph, following the word "fund," line 12, page 28, the following:

"The grade of commodore on the active list of the United States Navy is hereby reestablished and the President is hereby authorized to appoint, by and with the advice and consent of the Senate, from the senior captains on the active list of the United States Navy nine commodores on the active list of the United States Navy, who shall receive the same pay and allowances as are allowed a brigadier general in the Army."

Mr. PADGETT. Mr. Chairman, I reserve the right to object to returning to the paragraph which has already been passed, and I shall also make a point of order against the amendment. I understand the gentleman wishes to speak on this subject, and I am willing that he be recognized to address the committee on his amendment.

The CHAIRMAN. If there be no objection, the gentleman from New York will be recognized for five minutes.

Mr. LEVY. Mr. Chairman, the amendment proposed by me would restore the rank of commodore in our Navy. Until the year 1861 captains in the United States Navy commanding, or having commanded, squadrons were recognized as commodores, though never commissioned as such, and flew a broad pennant distinctive of that rank. By the act of March 3, 1899, the rank of commodore was abolished in the Navy.

There were many brave, heroic, and gallant officers in our Navy who held the rank of commodore, and among them may be mentioned the following.

Commodore John Paul Jones, who in 1779 commanded a little squadron composed of the *Duras*, *Pallas*, *Cerf*, *Vengeance*, and *Alliance*, that cruised in English waters, making many captures. While in command of the *Duras*—her name being changed to the *Bon Homme Richard*—he engaged His Britannic Majesty's ship *Serapis*, Capt. Pearson, September 23, 1779, in the British Channel, and captured her after one of the most obstinate and desperate naval duels on record. The ships were equally armed and manned, and each lost about one-half of her crew in killed and wounded. He was decorated by the French Government and made a chevalier.

Commodore John Barry, who, in command of the *Alliance*, sailed in February, 1781, with our minister, Laurens, to France, and on his return in the same year captured the English sloop *Atlanta* and brig *Trepassa*, and was severely wounded. On his return from Habana in March, 1782, he was chased by three English ships, but, engaging the first, so injured her that he was able to escape. During the war with France he cruised in European waters in the *United States*, protecting our commerce. On May 16 there will be unveiled in Franklin Park, in the city of Washington, a magnificent statue in memory of this gallant naval officer, for which Congress appropriated $50,000.

Commodore Thomas Truxtun, who, on February 9, 1799, while in command of the *Constellation*, captured the French frigate *L'Insurgente*. On February 1, 1800, still commanding the *Constellation*, he fought and drove into Curacoa, in a sinking condition, the French frigate *La Vengeance*, but was prevented from taking possession of his prize on account of the loss of the *Constellation's* mainmast. For this action Congress awarded him a gold medal.

Commodore Oliver H. Perry, who led the vessels in Commodore Chauncey's attack on Fort George May 27, 1913. He had been assigned to the command of the forces on Lake Erie, and returned there after this action. By great exertions he assembled a fleet, and on the 10th of September defeated the English squadron of six vessels in the celebrated Battle of Lake Erie, off Put-in-Bay. His ship, the *Lawrence*, was so battered that he abandoned her during the action, going in a boat to the *Niagara*. On his flag was inscribed the dying sentence of Lawrence, "Don't give up the ship." For his victory he received a gold medal from Congress.

Commodore Isaac Hull, who, at the outbreak of the War of 1812, commanded the *Constitution*, in which vessel in 1811 he carried specie to Ireland for payment of a debt in Holland, and was chased by a squadron, but escaped. He sailed again on July 12, 1812, and from the 17th to the 20th was chased by an English squadron of seven vessels, escaping by the most consummate skill and seamanship. Sailing again on August 2, he captured five merchantmen, and on the 19th, after a bloody fight, captured and destroyed the British frigate *Guerriere*. For this he was awarded a gold medal by Congress.

Commodore William Bainbridge, who, on September 15, 1812, relieved Commodore Hull in command of the *Constitution*, and sailed down the coast of Brazil. When in latitude 13° 6′ S. and longitude 31° W. he fell in with and captured the English frigate *Java*. The *Constitution* went into action and came out with royal yards across, and without losing a spar. The *Java* was reduced to a mastless wreck, too much injured to be taken into port. The *Constitution* had 9 killed and 25 wounded. Commodore Bainbridge was seriously shot with a musket ball and hurt by a splinter from the wheel. The *Java* had 124 killed and wounded, and her captain—Lambert—was fatally wounded. Among the prisoners taken was Lieut. Gen. Hislop, bound to Bombay as governor. For this action he received a gold medal from Congress.

Commodore John Rodgers, who commanded the *John Adams*, with which and the *Enterprise* he successfully attacked, in June, 1803, a Tripolitan cruiser of 22 guns and several gunboats at anchor near Tripoli. In the spring of 1811, in the *President*, off Annapolis, he heard that a seaman had been impressed off Sandy Hook by an English frigate. Sailing for that point without delay, May 16, he hailed a vessel of war, but received no response. After a little delay, the stranger hailed, and immediately fired a shot that entered the *President's* mainmast. After a short engagement, in which his opponent was much crippled, he ceased firing, and on the following morning boarded, discovering her to be His Britannic Majesty's ship *Little Belt*. On receiving official notice on June 21, 1812, of the declaration of war against Great Britain, he sailed from New York in command of a squadron; on June 23, while chasing the British frigate *Belvidere*, during a running fight a gun burst, killing and wounding 16, Commodore Rodgers being among the latter. In a subsequent cruise he took the British packet *Swallow*, with a large amount of specie, and the schooner *Highflyer*. He rendered important service in the defense of Baltimore during the war.

Commodore Charles Stewart, who, in November, 1814, in command of the *Constitution*, captured the British ship *Pictou* and a number of vessels after having assisted in the defense of Norfolk. On December 17, 1814, he crossed the Atlantic and made two prizes. He captured the *Cyane* and the *Levant* on February 20, 1815, after a gallant fight, and was afterwards chased by a squadron and lost the *Levant*. For his heroism he received a gold medal and a sword, the thanks of Congress and of the Pennsylvania Legislature, and the freedom of the city of New York. He was the grandfather of the distinguished Irish patriot Parnell.

Commodore Thomas McDonough, who, while in command of the forces on Lake Champlain in 1813, had two of his small squadron captured. It was increased the following year, and on September 11, while at anchor near Plattsburg, he was attacked by an English squadron of 4 ships and 13 galleys, but by consummate ability and seamanship, particularly in anchoring his ships, he defeated the enemy with his squadron of 4 ships and 11 galleys after a long and bloody battle. For his bravery and valor he received a medal from Congress.

Commodore David Porter, who, in command of the *Essex* and the *Essex, Jr.*—being the *Georgiana*, a whaler previously captured and converted into a vessel of war—arrived at Valparaiso on February 3, 1814. On the 8th His Britannic Majesty's frigate *Phoebe* and sloop *Cherub* arrived and anchored near the *Essex*. On March 28 the *Essex* made an attempt to get to sea, but in doubling a headland was struck by a squall which carried away her foretopmast and caused the loss of several of her crew. In this crippled condition the ship anchored less than 3 miles from the town, only half a mile from the shore, and while within neutral waters was attacked by the *Phoebe* and *Cherub*. The *Phoebe's* fire proved very destructive, as she occupied a position where her long guns could rake the *Essex*, while that vessel could hardly bring a gun to bear against her, the *Cherub* meanwhile pouring in a galley fire. The latter vessel, however, soon found her position such a hot one that she was driven to leeward near the *Phoebe*; where both vessels kept up a raking fire on the American frigate. Commodore Porter soon got his guns at the stern port to work so well that in about one-half hour both the attacking vessels hauled off to repair damages. Having finished their repairs, the enemy took up their position on the starboard quarter of the *Essex*, out of reach of her carronades and where her long guns could not be brought to bear upon them. Their fire was very severe, and Commodore Porter had no alternative but to get under way and become the assailant.

The *Essex* ran down upon her assailants, and for a short time succeeded in closing with them so as to use her carronades with such effect that the *Cherub* was forced to haul off, and for a few minutes the hope was entertained that the enemy were so far disabled as to permit the *Essex* to escape; but the hope proved a vain one, as the *Cherub* kept up a destructive fire with her long guns, and the *Phoebe* chose the distance best suited to her long guns, where, out of range of the carronades of the *Essex*, she kept up a deliberate and destructive fire. The battle had now lasted over two hours, and the *Essex* lay like a target riddled by every shot from the enemy. The crew were completely exhausted, and had become so weakened in numbers that they entreated the captain to surrender in order to save the lives of the wounded, and accordingly the order was given to haul down the colors. The contest was a most unequal one, the enemy having the advantage in every way. The *Essex, Jr.*, brought the survivors of the action to the United States, where Commodore Porter was received with great honors.

Commodore Stephen Decatur commanded a division of vessels in an attack on Tripolitan gunboats August, 1805, where he was wounded, and captured two prizes. In 1811 he hoisted his broad pennant on the *United States*, and captured the English sloop *Macedonian* October 25, 1812, in a brilliant engagement. Entering New York with his prize, he was blockaded and his ship laid up, when he was given the *President*. He commanded a fleet sent to Algiers in May, 1815, and on the 17th of June captured the *Mashouda*, with the Algerian admiral.

Commodore Daniel T. Patterson, who in 1832 commanded the United States naval forces at New Orleans, and who so ably cooperated with Gen. Jackson in the defense of that city that he received the thanks of Congress.

Commodore William B. Shubrick, who commanded the squadron in the Pacific in 1847 and captured Mazatlan and other ports from the Mexicans.

Commodore Uriah Phillips Levy, who was officer of the brig *Argus*, which escaped the blockade during the War of 1812 and took out Mr. Crawford, minister to France, and destroyed in the British Channel 21 sail, with cargoes worth approximately $2,500,000. The *Argus*, in command of Capt. William

Henry Allen, engaged in a bloody battle in the English Channel with His Britannic Majesty's ship *Pelican*. Capt. Allen was shot through the leg during the engagement and the *Argus* was captured and the members of her crew—among them Commodore Levy—were held prisoners in Dartmoor Prison for 13 months, Capt. Allen dying from his wounds.

In 1817 he was made lieutenant, in 1837 commander, and in 1844 post captain. At the request of President Jackson in 1834, Commodore Levy purchased Monticello—the home of Thomas Jefferson—which ever afterwards he maintained as his home. He was the originator and prime mover in the movement for the abolition of flogging in the United States Navy. He published a manual of rules and regulations and etiquette of the United States Navy which, to a great extent, is in use at the present time. He was one of the first to tender his sword and fortune to President Lincoln at the outbreak of the War between the States. In 1834 he presented to the Government of the United States a bronze statute of Thomas Jefferson by David d'Angers which now stands in the Rotunda of the Capitol. In 1834 he was presented with the freedom of the city of New York and a gold box, and during the same year President Jackson presented him with a massive gold jeweled ring. He died in the city of New York on March 22, 1862.

Mr. Chairman, owing to the many brave and heroic acts performed by our commodores, this grade of commodore should be restored to the ranks of our Navy in memory of these gallant officers, and I sincerely hope that the amendment offered by me will be adopted by the committee. [Applause.]

Mr. PADGETT. Mr. Chairman, I object to returning to the paragraph indicated.

The CHAIRMAN. Objection is made to returning to the paragraph. The Chair is ready to rule on the point of order which was pending when the committee rose yesterday.

Mr. MANN. What was the point of order?

The CHAIRMAN. A point of order was made against the paragraph on page 33, beginning with line 5 and ending with line 16.

Mr. PADGETT. It was not made. It was reserved. I wanted to offer an amendment striking out the words "until expended," in line 15. I believe it was the gentleman from Illinois [Mr. MADDEN] who reserved the point of order.

The CHAIRMAN. The gentleman from Tennessee seems to be thinking of another point of order.

Mr. PADGETT. No; I am speaking of that one.

Mr. MANN. Reserving the point of order, will the gentleman state what the effect of this will be? The gentleman remembers that we had for a while a naval-supply fund and then a naval-supply account, which, I think, nobody except the Navy Department and the members of the Naval Committee understood. Now, what is the effect of this?

Mr. PADGETT. I can explain it better by explaining the workings under the naval-supply account as it is now provided by law. By means of the naval-supply account stores, and so forth, are purchased, and then as they are issued to the various ships, or are used in the service, they are paid for out of the proper appropriation, and charged to the bureau that utilizes them.

To illustrate the working of it, say that an anchor is purchased by the naval supply account at a cost of $5,000, and pays for it. Whenever it is needed for a ship it is furnished to the ship and the supply account is repaid out of the appropriation for the Bureau of Construction and Repairs available for the purchase of anchors. Later on the ship temporarily goes out of commission and the anchor and other stores and supplies are removed from the ship and placed with the general storekeeper. Under the law he credits that to the naval supply account.

Now, when that ship goes back into commission, in order to get back its anchor it has to purchase it again out of the appropriation current at the time. So the appropriation would pay for the anchor twice, and the same with the other stores.

This is simply to remedy that so that when it comes into the naval supply account and is credited to them on the books, when it is reissued it will be credited to the appropriation that was originally credited to the supply account by the reception of these stores.

Mr. MANN. The naval supply account is a revolving fund?

Mr. PADGETT. Yes.

Mr. MANN. We do not make any direct appropriation for it?

Mr. PADGETT. It is authorized by law, but it is rather a method of bookkeeping by the department.

Mr. MANN. Not entirely a method of bookkeeping; they have to buy the stores.

Mr. PADGETT. Yes; they buy them out of the amount.

Mr. MANN. Out of the naval supply account. How much is the naval supply account?

Mr. PADGETT. About $23,000,000 now. That is for all stores, exclusive of ordnance and ordnance stores.

Mr. MANN. How much has it increased within the last few years?

Mr. PADGETT. For the last few years it has decreased. At one time it amounted to $60,000,000.

Mr. MANN. If the naval supply account gets pay for everything that it furnishes to vessels, and then sometimes gets paid twice for the same thing, how is it possible for the amount to decrease?

Mr. PADGETT. I will explain. In Admiral Rodgers's time it had accumulated about $60,000,000.

Mr. MANN. That was the naval supply fund. I am talking about the naval supply account.

Mr. PADGETT. I can not tell the gentleman how much it has increased lately.

Mr. MANN. The increase would show how much duplication there had been by reselling the same thing.

Mr. PADGETT. That is one thing we want to obviate.

Mr. MANN. Under this provision the naval supply account will practically remain stationary, and it is sufficiently large to provide for the purchase of these things which it is necessary to dispose of to the ships.

Mr. PADGETT. That is correct.

Mr. STAFFORD. Will the gentleman yield?

Mr. PADGETT. Certainly.

Mr. STAFFORD. How often are the supplies credited to this account? How often does the ship, under ordinary circumstances, go out of commission so as to have the supplies taken off the ship and credited to this fund?

Mr. PADGETT. There is no definite time for that. It depends on the emergency. If the ship has to go into the dry dock to be repaired, the repairs might take only a few days, and the stores would not be taken off at all. But it may have to go in for repairs where it would remain for a number of months. There have been instances where the ship has gone out of commission for several years.

Mr. STAFFORD. How large an amount is overturned every year—how large is the fund that goes into the account in any one year?

Mr. PADGETT. I could not tell the gentleman, but it is tremendous. It takes all the stores, provisions, and supplies of every kind and character in that service except ordnance and ordnance stores and a few other items specifically exempted.

Mr. STAFFORD. Is it contemplated to take a credit of the supplies whenever there is an appraisal of the stores and the ship is placed out of commission?

Mr. PADGETT. When a ship goes out of commission the supplies are appraised and turned in to the storekeeper and credited to that fund. When disposed of they are disposed of at the appraised value. They may not go back to the same ship; they become a part of the general stock and may be issued to another ship.

Mr. MANN. Will the gentleman allow me to ask him another question?

Mr. PADGETT. Certainly.

Mr. MANN. The gentleman speaks of a ship going out of commission. A ship goes into a dry dock; is she out of commission?

Mr. PADGETT. Not necessarily; it does go out of commission temporarily.

Mr. MANN. The ship does not have to go out of commission in order to turn supplies over to the storekeeper.

Mr. PADGETT. No; I was simply illustrating by saying that when they did go out of commission.

Mr. MANN. I have heard that this sometimes takes place, although I have no information about it. I am told that this is not an infrequent occurrence where a ship comes in and is temporarily out of commission it can turn its supplies over to the storekeeper, to be credited to the naval supply account, in which case the ship is credited to supplies turned over. Then if the ship afterwards takes the supplies, the appropriation is again charged to it. In order to obviate that, instead of turning over the supplies to the officers in charge of the naval supply account, where they could be kept most economically, and I think with good reason, they will store them somewhere else at some expense.

Mr. PADGETT. Some expense and some risk. That is correct, and it is to remove that situation that this provision is intended.

Mr. MANN. Under this provision when a ship goes out of commission and has to dispose of everything that it has on

board, it will be turned into the regular storekeeper and accounted for?

Mr. PADGETT. Yes; the gentleman is correct.

Mr. STAFFORD. Will the gentleman state the purport of the amendment that he said he was about to offer?

Mr. PADGETT. It was simply to strike out the words "until expended." They were inadvertently inserted, and it is not necessary to have them in there.

Mr. STAFFORD. So that the officials of the department will always be able to tell the committee the amount of the available funds in the respective items of expenditure?

Mr. PADGETT. Yes, sir.

The CHAIRMAN. Is the point of order withdrawn?

Mr. STAFFORD. I do not know, but I believe I reserved the point of order; at least I intended to reserve the point of order, if I did not.

The CHAIRMAN. The point of order was reserved.

Mr. STAFFORD. As far as I am concerned, I withdraw the point of order.

The CHAIRMAN. The point of order is withdrawn.

Mr. PADGETT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Tennessee offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 33, line 11, by striking out the words "until expended."

The question was taken, and the amendment was agreed to.

Mr. GARDNER. Mr. Chairman, I move to strike out the last word.

In connection with the remarks of the gentleman from New York [Mr. LEVY] recounting the exploits of the fathers of the American Navy, I can not refrain from reminding this House that none of our early sailors excelled Commodore John Barry.

On June 4, 1906, the bill providing for a statue to Barry's memory passed the House of Representatives under suspension of the rules. In those days it was hard to get Speaker Cannon to consent to the passage of a bill in that manner, and yet it was only under suspension of the rules that the Barry bill could be passed.

I well remember that Mr. Driscoll, of New York, Mr. McCleary, of Minnesota, and I, with a number of others, visited the Speaker in a body. Driscoll's tongue must have been tipped with blarney, for Uncle Joe visibly softened under the eloquent treatment which the Member from New York lavished upon him. At all events, at last Mr. McCleary was recognized by the Speaker. He moved to suspend the rules; and so, after long endeavor, the plan to pay tribute to John Barry's memory was started on its course through Congress.

In this beautiful city there is no more beautiful square than that which bears the name of Franklin. At this moment in that favored spot a statue, heavily veiled, awaits the coming of the 16th day of this month of May. When that day arrives, in the presence of a vast multitude, the monument will be unveiled. It is our tribute to John Barry, a splendid, stainless representative of a splendid, stainless race.

John Barry was a Wexford man by birth, and everyone knows that Wexford has always been a nursery for poor boys with strong hearts and clear heads.

America has cause to be grateful to the Irish, who have fought in her battles by land and sea. To no one more than to John Barry does she owe a heavy debt of gratitude.

It was George Washington who discovered the qualities in Barry which brought him into public notice. Washington made him captain of the *Lexington* in 1776. In the *Lexington* he put to sea, the first to fly the Colonial colors in pursuance of the act of the Continental Congress, which established the Navy of the Revolution. In the *Lexington* he made his first fight and won his first victory. Soon he was given command of the *Effingham*. His splendid courage was again displayed. After the destruction of the *Effingham*, Barry fought on land as a soldier under Washington until he was ordered to the command of the *Ralcigh*. Finally he commanded the *Alliance* in the last naval action of the Revolutionary War. It was in this brilliant battle that Barry was so seriously wounded. History has it that his sailors would have surrendered the ship while he lay wounded below. Whether this be so or not, I believe it to be an unquestioned fact that in the extremity of his pain he issued orders that he be taken back to the deck of his sorely beset ship so that his presence might inspire the gunners.

When the war was over Barry remained in the public service. Under his watchful guidance and intelligent direction our infant Navy was nurtured. Barry's dazzling star will ever shine resplendent amid the Milky Way of luminaries which shed luster on our history.

The Clerk read as follows:

BUREAU OF CONSTRUCTION AND REPAIR.

Construction and repair of vessels: For preservation and completion of vessels on the stocks and in ordinary; purchase of materials and stores of all kinds; steam steerers, pneumatic steerers, steam capstans, steam windlasses, air craft, and all other auxiliaries; labor in navy yards and on foreign stations; purchase of machinery and tools for use in shops; carrying on work of experimental model tank; designing naval vessels; construction and repair of yard craft, lighters, and barges; wear, tear, and repair of vessels afloat; general care, increase, and protection of the Navy in the line of construction and repair; incidental expenses for vessels and navy yards, inspectors' offices, such as photographing, books, professional magazines, plans, stationery, and instruments for drafting room, and for pay of classified force under the bureau; for hemp, wire, iron, and other materials for the manufacture of cordage, anchors, cables, galleys, and chains; specifications for purchase thereof shall be so prepared as shall give fair and free competition; canvas for the manufacture of sails, awnings, hammocks, and other work; interior appliances and tools for manufacturing purposes in navy yards and naval stations; and for the purchase of all other articles of equipage at home and abroad; and for the payment of labor in equipping vessels therewith and manufacture of such articles in the several navy yards; naval signals and apparatus, other than electric, namely, signals, lights, lanterns, rockets, running lights, lanterns and lamps and their appendages for general use on board ship for illuminating purposes, and oil and candles used in connection therewith; bunting and other materials for making and repairing flags of all kinds; for all permanent galley fittings and equipage; rugs, carpets, curtains, and hangings on board naval vessels, $9,788,000: *Provided*, That no part of this sum shall be applied to the repair of any wooden ship when the estimated cost of such repairs, to be appraised by a competent board of naval officers, shall exceed 10 per cent of the estimated cost, appraised in like manner, of a new ship of the same size and like material: *Provided further*, That no part of this sum shall be applied to the repair of any other ship when the estimated cost of such repairs, to be appraised by a competent board of naval officers, shall exceed 20 per cent of the estimated cost, appraised in like manner, of a new ship of the same size and like material: *Provided further*, That nothing herein contained shall deprive the Secretary of the Navy of the authority to order repairs of ships damaged in foreign waters or on the high seas, so far as may be necessary to bring them home. And the Secretary of the Navy is hereby authorized to make expenditures from appropriate funds under the various bureaus for repairs and changes on the vessel herein named in an amount not to exceed the sum specified for said vessel, *Constellation*, $50,000: *Provided further*, That the sum to be paid out of this appropriation, under the direction of the Secretary of the Navy, for clerical, drafting, inspection, watchmen (ship keepers), and messenger service in navy yards, naval stations, and offices of superintending naval constructors for the fiscal year ending June 30, 1915, shall not exceed $958,100: *Provided further*, That the Secretary of the Navy is hereby authorized to enter into contract for the use by the Government of dry docks at Hunters Point, San Francisco, Cal., one of which docks shall be capable of docking the largest vessel that can be passed through the locks of the Panama Canal, for a period not to exceed six years from completion of such dock, at a compensation of $50,000 per annum during said period of six years, the right of the Government to the use of said docks in time of war to be prior and paramount: *Provided*, That the construction of the large dock shall be undertaken immediately upon entering into this contract and shall be completed within 24 months thereafter: *And provided further*, That said contract shall provide for docking rates not in excess of commercial rates, and for such other conditions as may be prescribed by the Secretary of the Navy, prior to entering into such contract: *And provided further*, That in the event, during the said contract period of six years, the necessities of the fleet require the docking of vessels which will necessitate a charge greater than $50,000 per annum, the Secretary of the Navy is authorized to have said vessels docked at a rate of charge not greater than price stipulated in said contract.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph. It is almost one-half the bill, judging from its length, and provides a good many distinctive propositions as to which I desire to inquire.

Mr. PADGETT. Does the gentleman reserve it to the paragraph or the proviso beginning at the bottom of page 35?

Mr. STAFFORD. For safety I will reserve the point of order at the present time on the entire paragraph. I wish to inquire of the chairman whether the language found on page 34, beginning line 7, after the semicolon and running down three or four lines, is new phraseology?

Mr. PADGETT. It is the same, as I explained to the gentleman the other day in reference to the appropriations for another bureau. It is new language in this paragraph, but it is not new language in the bill. It was transferred from appropriations for the Bureau of Equipment, that was consolidated and part of its work came to this bureau and part went to other bureaus.

Mr. STAFFORD. Can the gentleman indicate in an existing act where there is an authorization for the Navy Department to manufacture cordage, anchors, cables, galleys, and chains?

Mr. PADGETT. Yes, sir. The same language that is here was in the law for years, and we are manufacturing chains and cordage, rope, and everything of that kind at the navy yard at Boston, Mass., very extensively.

Mr. STAFFORD. Can the gentleman inform the committee what percentage the Government makes of those articles as compared with that which it uses?

Mr. PADGETT. I think all our rope, cordage, and all chains; that is, the largest chains, the anchor chains, and things of that kind.

Mr. STAFFORD. Does the gentleman know the reason why the Government indulges in the manufacture of this line of

merchandise when it can be purchased, perhaps, from private concerns?

Mr. PADGETT. The Navy Department has always insisted that chains and rope for use upon war vessels were required to be superior to those manufactured in the common trade, and that requires a much more careful manufacture in order to have greater strength.

Mr. STAFFORD. Does the gentleman know whether we go to the extent of manufacturing the steel, or do we buy the high-grade Swedish steel which may be required for these chains?

Mr. PADGETT. My information is—I have not looked carefully into the matter—that we buy the steel and do the work of manufacturing the chains. These chains are manufactured by hand and welded by hand labor. They can not use machinery for it to a very large extent.

Mr. STAFFORD. Does the gentleman know whether we use electric furnaces in the manufacture of this steel?

Mr. PADGETT. Yes, sir; I think so; not in the manufacture of the steel——

Mr. STAFFORD. If they use electric furnaces, which gentlemen all know is the one furnace to obtain the very highest grade of steel possible, for that furnace eliminates from steel all the foreign substances that cause it to be brittle, such as sulphur and phosphorus.

Mr. PADGETT. I do not know, and I am not prepared to say they manufacture the steel, but when they have the steel they do the manufacturing of the chains.

Mr. STAFFORD. Possibly the gentleman from Massachusetts [Mr. ROBERTS] can give more enlightment.

Mr. ROBERTS of Massachusetts. If the gentleman will pardon me a moment, I understand he wants to know whether the language which appears on page 34, after the semicolon, line 7, has appeared in a prior appropriation bill. I have here the print of the naval appropriation bill approved March 4, 1913, and, on page 8, under the head of "Bureau of Equipment," he will find this same language for hemp, wire, iron, and other material, and so forth. As the chairman has already stated, this merely repeats the language that has appeared in prior appropriation bills under the Bureau of Equipment now transferred by this bill to various bureaus.

Mr. STAFFORD. As the gentleman is very well acquainted with the conditions at the Boston Navy Yard, where the chairman says this work is carried on, can he inform the committee as to what we are manufacturing so far as these chains are concerned, whether we have electric furnaces there or some other character of furnaces——

Mr. PADGETT. The Boston yard makes a specialty of rope and cordage.

Mr. STAFFORD (continuing). For the manufacture of chains.

Mr. PADGETT. I said Boston makes a specialty of rope and cordage.

Mr. STAFFORD. Where are the chains manufactured?

Mr. PADGETT. I think they are manufactured, some of them, in New York and perhaps some in Boston.

Mr. ROBERTS of Massachusetts. At one time, Mr. Chairman, there was a large industry of manufacturing chains in the Boston yard. I am not certain at the present moment how much of that work is chain manufacturing. I know they still are manufacturing chains at the yard.

Now, the gentleman asks as to the particular apparatus used. My observation is that there is no electrical welding. It is all done by hand. My impression is and my observation is that we do not use any electrical machines in welding those links or putting the pieces in the chain. The metal is heated in furnaces that have liquid fuel—I think oil—and the work is done by hand.

Mr. STAFFORD. It is the ordinary small oil furnace where they heat the bar iron prior to welding it together.

Mr. ROBERTS of Massachusetts. They heat the links after they have shaped them. Is that the information the gentleman wished?

Mr. STAFFORD. That is sufficient information.

I thought the House would be interested in having an explanation from the chairman of the committee as to the reason why we are entering into some kind of an arrangement with a private concern for the building of a dry dock on the Pacific coast. The House has heretofore taken the position that whenever there was need for the Government having a utility, for instance, like a dry dock, that it has the means to build it itself. Here we have a proposition for the first time, if I remember, where, before the dry dock is ever constructed, we are to enter into a contract to compensate a private party at a certain rate for the use of a dock by naval vessels. I think it is a very important proposition and that it should receive considerable consideration at the present time.

Mr. PADGETT. I should be very glad to give the gentleman and the committee all the information I have. It occurs to me that it is a very fine proposition for the Government. It is not necessary to argue that we need such a dock on the Pacific coast. We have one such dock at Bremerton up at Seattle. There is another one being constructed at the Balboa end of the canal.

Mr. MOORE. Will the gentleman give the dimensions of those two docks while he is discussing them?

Mr. PADGETT. The two docks are a thousand feet, or about a thousand feet, long; large enough to accommodate any ship that can be passed through the Panama Canal.

Mr. STAFFORD. As I remember the original proposition, when authorization was made to change the then plan of docks so as to provide for the largest ship afloat the dock was stated to be 1,200 feet in length.

Mr. PADGETT. Where is that?

Mr. STAFFORD. When we had this matter under consideration some five years ago the proposition was to increase the size of the docks, to increase the size of the dock at New York, to increase the size of the dock at the Norfolk Navy Yard, and also at the Bremerton yard——

Mr. PADGETT. We have no 1,200-foot docks.

Mr. STAFFORD. I was under that impression. I know that the dock as then designed was less in extent, and the proposition was to have the House increase it so as to provide for the largest ship afloat.

Mr. PADGETT. The 1,000-foot dock will be large enough to accommodate the largest ship that can pass through the canal.

Mr. MOORE. Will the gentleman give me the dimension of the Bremerton dock?

Mr. FALCONER. I will give the gentleman the dimensions. The length of Dock No. 2 is 827 feet and 6 inches.

Mr. MOORE. Before you go further, will not the chairman of the committee tell whether that is not the largest dock on the Pacific coast?

Mr. PADGETT. It is the largest dock that is completed. There is a dock under construction at the Pacific end of the Panama Canal that is larger. That is 1,000 feet in length.

Mr. MOORE. In order to clearly understand, the Bremerton dock is sufficiently large, this 827-foot dock, to accommodate the largest battleship constructed by the Navy?

Mr. PADGETT. Yes; or authorized. That is correct.

Mr. MOORE. So that dock would be sufficient to meet all present and all reasonable future demands?

Mr. PADGETT. If you had your ship up there. But a disabled ship, in an emergency, that had to go there north 600 miles or south 1,400 miles, would want a dock midway very badly.

Mr. J. I. NOLAN. Will the gentleman yield for a moment for a correction? Instead of being 600 miles from San Francisco to Bremerton, it is 900 miles.

Mr. KAHN. It is nearly 1,000 miles. It is 967 miles.

Mr. PADGETT. That only adds to the importance of what I was stating. It is some 1,200 or 1,400 miles to the mouth of the dock at San Francisco, if I remember, from Panama.

Mr. STAFFORD. Will the gentleman in that connection permit an interruption?

Mr. PADGETT. Yes, sir.

Mr. STAFFORD. As I recall, Secretary Meyer had under consideration the building of a new navy yard on the Pacific coast and had some certain site in view. Am I wrong in that impression?

Mr. PADGETT. I do not know of anything of that kind. But I will state that this proposition was first submitted to the Congress when Mr. Meyer was Secretary, and it met his cordial and hearty approval. He indorsed it and recommended it to the committee, and it appears in the hearings at that time with his hearty indorsement and approval and the approval of the bureau chiefs. When Mr. Meyer ceased to be Secretary and Mr. Daniels became Secretary the offer was renewed. He took it up and gave it very careful investigation, and has given it cordial indorsement and approval, and the committee has recommended it.

Now, we have one dock at Seattle, and the other one is at the mouth of the canal. They are something like more than 2,000 miles apart. A dock that is needed for a war vessel is needed worse in an emergency, and every consideration requires that we should have a dock at San Francisco. Now, this is not intended, as I understand it, to supplant ultimately the Government constructing a dock at Mare Island.

At San Francisco, if an emergency should arise, we would need more than one such dock. But here is this business firm there that will undertake to build a dock within the next two years that will accommodate any ship that will pass through the Panama Canal.

Mr. MURDOCK. What is the probable cost of that dry dock?

Mr. PADGETT. I was going to give it. The estimated cost is less than $2,000,000. They think they can build it for about that amount. The estimate for which the Government would undertake to build a dock was more than that. But putting it on the basis of $2,000,000, 3 per cent for the money the Government invested in it would be $60,000 interest upon the investment. Then the operation of the dock to do the docking, if the Government owned it and did the docking itself, would cost $30,000 or $40,000 a year.

Mr. MURDOCK. That is, the cost of operation of this dock would be paid out of the Government?

Mr. PADGETT. No. The operation of a Government dock, if the Government owned the dock and operated it itself, would cost the Government some thirty or forty thousand dollars. To operate its own dock, to pump out the water and fill it in, to supply the electric power, the machinery, the fuel, the hands, the labor, and all of those charges in the operation of the dock would be an additional charge.

Mr. MURDOCK. That is, in this instance the company that owns the dock pays the expenses of operation?

Mr. PADGETT. Entirely.

Mr. MURDOCK. Do I understand the estimated cost of this dry dock is $2,000,000?

Mr. PADGETT. Yes.

Mr. MURDOCK. And for a period of six years we are to pay $50,000 annually for the use of it?

Mr. PADGETT. Yes; for the full use of it. Now, this contract simply adds that for a period of six years we shall enter into a contract to pay them a minimum amount of $50,000 a year, if we choose to give them that much dockage.

Mr. MURDOCK. Then do I understand that if we should use this dry dock on regular commercial rates in excess of $50,000 we would pay for the excess?

Mr. PADGETT. Yes; we would pay for the excess. Now, then, as to the dockage, it appears in the hearings that Admiral Watts stated that if all the vessels that would likely be on the Pacific coast should be docked it would cost somewhere from $20,000 to $60,000 a year to dock them, so that the $50,000 is about the sum that it would require to dock them.

Mr. STAFFORD. This yard is tributary to the Mare Island yard?

Mr. PADGETT. It is between San Francisco and the Mare Island yard.

Mr. J. I. NOLAN. It is on San Francisco Bay. You come into the bay and go around the Hunters Point yard. You go in the bay and go into Carquinez Straits up to the navy yard.

Mr. STAFFORD. You go up the bay to reach both of them?

Mr. KAHN. Yes. They are about 35 miles apart.

Mr. STAFFORD. It is not much out of the way of the regular channel to vessels going up to Mare Island?

Mr. J. I. NOLAN. No.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from Pennsylvania?

Mr. PADGETT. Yes.

Mr. MOORE. How long is this dock?

Mr. PADGETT. A thousand feet.

Mr. MOORE. Then it will be the largest dock in the United States?

Mr. PADGETT. No; there will be a bigger one at Balboa, on the Canal Zone.

Mr. MOORE. I mean in continental United States?

Mr. PADGETT. Yes.

Mr. MOORE. It will be larger than any dock in the United States except the new commercial dock at Boston.

Mr. PADGETT. Yes.

Mr. MOORE. I want the gentleman to answer some questions about the size of docks, because it is extremely important.

Mr. PADGETT. It is larger than the dock at New York.

Mr. MOORE. There has been a great controversy about the size of docks and their adaptability to the use to which the Navy desires to put them. The State of Massachusetts and the city of Boston have appropriated $9,000,000 for improvements to the harbor front at Boston, which is to include a new dock 1,200 feet long, which dock the Government will utilize under some such arrangement as this, as I understand?

Mr. PADGETT. Yes; and pay for the dockage.

Mr. MOORE. And if this arrangement at Hunters Point goes through—and I think it is proper for the Government defense on the Pacific side—then the Govenment will have at its disposal a commecial dock on the Atlantic side at Boston and a commercially owned dock on the Pacific side at Hunters Point, on San Francisco Bay. That is the fact, is it?

Mr. PADGETT. Yes.

Mr. MOORE. Then the next best dock that the Government will have, belonging to itself, will be the Brooklyn Dock No. 4, and next to that the dock at Bremerton, Wash., which is eight hundred and seventy-odd feet long. Is that right?

Mr. ROBERTS of Massachusetts. That is not quite correct.

Mr. MOORE. Is there any other Government-owned dock equal in size to that at Brooklyn?

Mr. ROBERTS of Massachusetts. The dock at the Panama Canal is larger.

Mr. MOORE. I am speaking of continental United States.

Mr. ROBERTS of Massachusetts. As to continental United States, the gentleman is correct.

Mr. MOORE. Then this is the situation: The Government has a large dock at Brooklyn, which it owns, and it has a second large dock at Bremerton, on Puget Sound, a thousand miles above San Francisco, leaving the coast line unprovided in between; and now by this arrangement it is intended to provide for itself, not at the original cost of a dock but at a rental cost, a commercially owned dock at San Francisco?

Mr. PADGETT. For a period of six years; yes.

Mr. MOORE. Having already reached an understanding or made a contract with the State of Massachusetts that it would utilize, if necessary, the 1,200-foot dock at Boston. Is that the situation?

Mr. PADGETT. I did not suppose that any understanding exists as to the dock at Boston. I understand that the Government authorities are willing to use it, but I do not understand that any plans have been consummated for its use.

Mr. MOORE. Being in sympathy with what the gentleman proposes in this bill, to locate at San Francisco a dock of sufficient size to accommodate the largest vessels of the Navy, and that suggestion being in line with the recommendation of at least two Secretaries of the Navy, I would like to ask the gentleman what has become of the recommendations of those two Secretaries of the Navy in regard to a thousand-foot dry dock to be built somewhere by the Government along the Atlantic seaboard?

Mr. PADGETT. Well, Mr. Secretary Meyer submitted a recommendation for a dock somewhere on the Atlantic coast, but designated no particular place. Secretary Daniels recommended the location and construction of a dock of that character at the Norfolk Navy Yard. I might state that there appeared to be upon that subject an intimation of a lack of harmonious agreement between the Norfolk people and the Philadelphia people on the question, and the committee has not reported either.

Mr. MOORE. I believe there ought to be a thousand-foot dry dock along the Atlantic coast; and the gentleman does, too, does he not?

Mr. PADGETT. Yes.

Mr. MOORE. I would like to know officially, if possible, what has become of the recommendation of the Secretary?

Mr. PADGETT. There has been no disposition made of it.

Mr. MOORE. There is no provision in this bill for a thousand-foot dry dock along the Atlantic seaboard, as recommended by the Secretary of the Navy?

Mr. PADGETT. There is not.

Mr. HOBSON. Mr. Chairman, will the gentleman yield there for a moment?

The CHAIRMAN. Does the gentleman yield?

Mr. PADGETT. Yes.

Mr. HOBSON. I took occasion to analyze the business side of the proposition to enter into a contract for the use of the dock at Hunters Point, and an item that the gentleman from Tennessee did not mention should, I think, be included in the record, namely, that of depreciation. The pumping plant and other movable equipment would probably depreciate at the rate of 10 per cent, and the fixed equipment would probably depreciate at the rate of 5 per cent, and that would make a very material item in making it of greater business advantage to the Government to enter into the contract.

Mr. STAFFORD. Will the gentleman yield for a question?

Mr. PADGETT. Certainly.

Mr. STAFFORD. I assume that even if the Government should not enter into this most favorable contract with this private company, there is sufficient business there to warrant the construction of this dry dock?

Mr. PADGETT. I want to state to the gentleman upon that point that it has been represented by the department, and also by some of the gentlemen who called to see me at the time when

the matter was submitted to Mr. Secretary Meyer in a former Congress, that after the completion of the Panama Canal, when business has readjusted itself to the new conditions, there will be sufficient business to justify the company to undertake it; but they stated that at the present time they did not feel that there was sufficient docking business to justify them to go into that, pending the period between now and the expiration of the six years.

Mr. STAFFORD. We have just reached that opportune time, when the transportation is developing.

Mr. PADGETT. Yes; but they want to build this dock, to get the benefit of that, and they want to get this limited contract with the Government to tide them over until that time.

Mr. HOBSON. If the gentleman will yield to me for a moment, I want to ask unanimous consent to extend my remarks in the RECORD in connection with two measures that the Secretary of the Navy has caused to be introduced, one bearing on vocational education and the other on the elimination of the sale of liquor from officers' messes on board ships and in the navy yards. On that particular question I propose to go into the matter of the rights of naval officers and the rights of citizens and the rights of States in the matter of the sale of intoxicating liquors. I should like unanimous consent to print on both of those subjects.

The CHAIRMAN (Mr. HARDWICK). The gentleman from Alabama asks unanimous consent to extend his remarks in the RECORD.

Mr. STAFFORD. On dry docks and dry territory.

Mr. MANN. Does the gentleman want to extend his remarks on dry docks or on dry territory?

Mr. HOBSON. Both.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent to extend his remarks. Is there objection?

There was no objection.

Mr. HOBSON. I want to say to the gentlemen that I have gone into the question of the rights of individual officers and individual citizens and the rights of the States in the matter of the sale of intoxicating liquors. I made a statement yesterday before the Senate subcommittee investigating that subject in connection with the resolution for an amendment to the Constitution for national prohibition, and I want to put that statement in whole or in part with modifications in the RECORD, where it will be more available.

Mr. BRITTEN. Will the gentleman yield for a question right there?

Mr. HOBSON. Certainly, if the chairman will yield to me further.

Mr. PADGETT. I would ask both gentlemen to forego the discussion of dry versus wet, which does not relate to this bill, and to let us proceed.

Mr. BRITTEN. That was the purpose of the question I desired to ask.

Mr. MURDOCK. Mr. Chairman, will the gentleman from Tennessee yield to me?

Mr. PADGETT. I yield to the gentleman.

Mr. MURDOCK. I want the chairman of the committee to state, if he will, in order to save time, that there is no agreement, implied or otherwise, in this provision of the bill that obligates the Government to continue this payment of $50,000 or more after the expiration of the six years.

Mr. PADGETT. That is distinctly and emphatically understood.

Mr. MURDOCK. And the chairman here so states.

Mr. PADGETT. I do; and I so stated to the representative of the company who mentioned it to me a couple of years ago, and the contract will so stipulate.

Mr. MURDOCK. This is a departure. As I understand it, the Government hitherto has built its own dry docks. We are now proposing to rent one.

Mr. PADGETT. For a limited period.

Mr. MURDOCK. And there is no agreement in the six years' proposition which will permit this company to ask for an extension after the expiration of the six years.

Mr. PADGETT. None whatever; that is, none based on the contract.

The CHAIRMAN. Does the gentleman insist on the point of order or reserve it?

Mr. STAFFORD. I still reserve the point of order, and am trying to get some information. The gentleman from California [Mr. CURRY] wishes to submit some remarks.

The CHAIRMAN. The point of order ought to be disposed of. We are under the five-minute rule——

Mr. STAFFORD. This is entirely with the approval of the chairman of the Committee on Naval Affairs.

Mr. PADGETT. I think we can develop the whole situation in this way and save the discussion of the matter under the regular five-minute rule.

Mr. CURRY. Will the gentleman yield for a statement?

Mr. PADGETT. Yes.

Mr. CURRY. I understand that it is the policy of the Government to encourage the construction of a private dreadnaught dry dock in San Francisco Bay by entering into a temporary contract or lease with the Union Iron Works for the use of such a dry dock, to be constructed by that company at Hunters Point, and that later the Government intends to construct a public dry dock at some point on the bay—more than likely at Mare Island—so that in case of necessity the Navy may have the use of two dry docks in that harbor.

Mr. PADGETT. Just at that point; of course, the gentleman can not understand me as stating what the Government intends to do in the future. I stated that there was nothing in this provision that precluded the Government from that, and that I thought the necessities would require and justify more than one such dock at San Francisco, and that the Government would have the right to construct a dock at Mare Island; but, of course, I could not say what would be the intention or the act of a future Congress. There is nothing here to prevent, impair, or hinder a future Congress from authorizing the construction of as many docks as it sees fit. This is a temporary arrangement made for the use of a dock for six years at a place where we have none.

Mr. CURRY. The Secretary of the Navy stated to me that it was to encourage the construction of a private dock, and that it was the present intention to construct a public dock later on.

Mr. PADGETT. He is authorized to speak of it as the present intention of the department.

Mr. J. I. NOLAN. Will the gentleman yield to me for a statement?

Mr. PADGETT. Yes.

Mr. STAFFORD. I ask unanimous consent that the gentleman's time be extended five minutes.

Mr. WITHERSPOON. Mr. Chairman, I make a point of order against this item in the bill.

Mr. PADGETT. Will not the gentleman forego making that point of order, and let us include it in the bill, for I think it is a very meritorious matter?

Mr. WITHERSPOON. I am sure, Mr. Chairman, that we have four times as many dry docks now as we can use; they are idle a large part of the time, and we do not need any new ones.

Mr. J. I. NOLAN. Mr. Chairman, the site selected for the proposed dock is situated in my congressional district. Naturally, I have given it some little attention. I have taken the matter up with the Secretary of the Navy, in relation to this proposed contract. The Secretary of the Navy states that at the present time the department is not in a position to know what future needs the Navy might have on the Pacific, but they feel that after five or six years, after the Panama Canal is opened, they will know how much of a fleet is to be maintained in the Pacific, and will be in a better position to negotiate for the construction of a Government dock.

I am in favor of a Government docking its own ships in its own docks, and I am in favor of this proposition, because it is advantageous to the Government on account of the reasonable proposition made. It is not for the use of one dock only. It does not depend on the completion of this 1,000-foot dock, for the company owns, at Hunters Point, two docks, and the Government will have the first call on them at the commercial rates during the life of this contract. If we are not successful in our plan of mediation with our neighbor at the south, it might be that we shall need docks in the Pacific in the near future, and we will be in a position, pending the completion of the 1,000 foot dock, to use the company's two docks besides the one at Mare Island.

Mr. GOULDEN. Will the gentleman yield?

Mr. J. I. NOLAN. Yes.

Mr. GOULDEN. What is the size of the two docks that the company owns and are now completed?

Mr. J. I. NOLAN. I can not give the exact dimensions, but one is somewhere about 700 feet long and the other about 500 feet long. They are not large enough for big battleships, but they are large enough for some of the cruisers. This is a matter that has been under consideration by the present Secretary of the Navy, and by his predecessor, Mr. Meyer, and he made the same recommendation, that we enter into a contract with the Union Iron Works Co. Ex-Secretary Meyer wrote a letter on that subject, which will be found on page 240 of the hearings, under the date of February 12, 1913.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. PADGETT. I concede, Mr. Chairman, that it is subject to a point of order.

The CHAIRMAN. To what part of the paragraph does the gentleman from Mississippi make the point of order?

Mr. WITHERSPOON. Against the proviso for the Hunters Point dry dock.

Mr. KAHN. Does the gentleman from Mississippi make the point of order?

Mr. WITHERSPOON. I have made it.

Mr. KAHN. Then, Mr. Chairman, I suggest that there is no quorum present. I think we ought to have a right to discuss this matter.

Mr. STAFFORD. Will not the gentleman from Mississippi withhold his point of order so that the matter may be discussed?

Mr. WITHERSPOON. I will reserve it, but I thought I would save time by making the point, because I am going to make it eventually.

The CHAIRMAN (Mr. HARDWICK). First let the Chair understand to just what provision the gentleman from Mississippi makes the point of order.

Mr. PADGETT. To the proviso beginning at the bottom of page 35, line 24, to the end of the paragraph.

The CHAIRMAN. The Chair understands the gentleman from Tennessee to concede the point of order is good.

Mr. PADGETT. Yes, whenever it is insisted upon; but I understand the gentleman from Mississippi is to reserve the point of order.

Mr. WITHERSPOON. I will reserve the point of order.

Mr. KAHN. Then, I withdraw the point of no quorum, Mr. Chairman.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the time of the gentleman from Tennessee be extended five minutes.

Mr. MANN. Can not we have some understanding as to how much time will be devoted to the discussion of this provision?

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that there may be 17 minutes discussion on this provision, and at the end of that time the Chair rule on the point of order.

Mr. MANN. Mr. Chairman, may I ask the attention of the gentleman from Mississippi for a moment? I would like to ask him to what portion of the paragraph he makes the point of order?

Mr. WITHERSPOON. To that part of the paragraph with reference to the dry dock.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee [Mr. PADGETT] for unanimous consent to proceed with the discussion for 17 minutes, and then that it be closed and the Chair rule on the point of order? [After a pause.] The Chair hears none.

Mr. STAFFORD. Mr. Chairman, I withdraw my reservation of the point of order to the paragraph.

Mr. J. I. NOLAN. I would like to have the gentleman from Tennessee yield to me.

Mr. PADGETT. I yield to the gentleman five minutes.

Mr. J. I. NOLAN. I yield to my colleague, Mr. CURRY.

Mr. CURRY. Mr. Chairman, I want to ask my colleague if he is aware of the fact that there are two dry docks at the Mare Island Navy Yard, one large enough to accommodate the *Utah* and any other ship in the Navy, except dreadnaughts, and that last year 75 vessels were dry-docked at that yard at a total cost to the Government of $28,000?

Mr. J. I. NOLAN. I realize that. My statement with reference to the other two docks was that they were to be available in the event of hostilities with another country. I realize that it might only be necessary to use the dry dock at Hunters Point that is contemplated if this provision of the naval bill is carried. As far as locating a permanent dry dock at San Francisco Bay is concerned, I leave that to the naval experts. If they decide that one should be located at the Mare Island yard, I am going to stand by and permit them to do what is best for the needs of the Navy. I do not think this ought to be a selfish proposition at all. I believe the battleships that are going to go through the canal, and especially the largest dreadnaughts, ought to have some point between the Panama Canal and Puget Sound where they could dock the vessels for repairs. This is the opportunity. This is a contract that will cost 2½ per cent on an investment of $2,000,000. The Government in six years' time will be in a better position to decide what their needs will be. I think this is an excellent business proposition and the Government should accept it. If they have to transport a dreadnaught from San Francisco Bay to Puget Sound—900 miles—it is going to cost several thousand dollars, without any reason in doing it. There is going to be plenty of work for all the docks on the Pacific coast after the canal opens, because the greater part of our fleet will be in the Pacific, and this will be especially so in reference to our dreadnaughts, and it is for this type of ship that this new dock will be needed until the Government decides on a site and builds its own dry dock. I agree with the statement of the gentleman from Illinois [Mr. MANN], made the other day, that the great activities of our Navy will be on the Pacific in the future, and we will be in a better position in six years from now to determine the location, size, and capacity of the particular type and size of dock or whatever docks it may be necessary to construct for the future needs of our Navy.

I think this is an excellent business proposition and that the gentleman from Mississippi should withdraw his point of order. I believe there are some Members from the Pacific coast who have in mind making the point of order, and they ought to give up any selfish view they have of it. They ought to let this proposition go through and permit the Government to take advantage of this excellent business proposition.

In support of this contention I quote Admiral Watt, from page 235 of the hearings on this bill before the Naval Affairs Committee, in which he answers the question of the chairman of the committee as to what recommendation he would make:

The CHAIRMAN. I will ask you to state what recommendation you submit with reference to this proposition?

Admiral WATT. At the present time, should it become necessary to dock one of our large battleships on the west coast, she would have to proceed to Seattle to dock. With the opening of the Panama Canal it is probable that our principal fleet will have periods of duty on the west coast. This provision would permit the docking of these ships at Hunters Point, San Francisco, instead of sending them 900 miles farther north.

I also wish to incorporate at this time the papers and letters passing between former Secretary of the Navy, Mr. Meyer, the Chairman of the Naval Affairs Committee, and the representative of the company in reference to this proposition:

DEPARTMENT OF THE NAVY,
Washington, February 12, 1913.

MY DEAR MR. CHAIRMAN: I wish to invite the consideration of your committee to the conditions that exist on the Pacific coast of the United States relative to dry-docking facilities.

Upon the completion of the Panama Canal it is probable that the time of the fleet will be about equally divided between the Atlantic and the Pacific coasts, and there should be provided in the vicinity of San Francisco, in close proximity to the Mare Island Navy Yard, a dry dock capable of docking the largest vessels of the fleet, it being impracticable to build such a dry dock at the Mare Island yard itself.

The only dry dock on the Pacific coast which will be large enough for this purpose is the one now nearing completion at the navy yard, Puget Sound, Wash., about 900 miles from Mare Island.

The dry dock at Pearl Harbor, the completion of which is due about July, 1915, while large enough to accommodate any vessel of the fleet, is located over 2,000 miles from the Pacific coast, and can not, therefore, serve the demands which are likely to arise from yearly visits of our fleet to the Pacific coast.

I have in my annual report recommended the provision of 1,000-foot dry docks on both the Atlantic and Pacific coasts, but have not as yet made specific recommendation as to the location of these docks, and that matter is now under consideration by the department.

Recently, the department has received a proposition from the Union Iron Works, of San Francisco, offering to construct a dry dock at Hunters Point, San Francisco, capable of accommodating any vessel that could pass through the locks of the Panama Canal; to equip and maintain it in an efficient manner; and to give the Navy Department, for a term of years, priority in its use and in the use of two smaller docks which the company now has in operation at Hunters Point. The company will undertake to complete the new dock within two years after the acceptance of its offer. The company asks that, in consideration of this, the department agree to pay for such dockage as may be required for naval vessels, at rates lower than those prevailing in this country, and agree also that the compensation paid by the Government for the use of its three docks shall be not less than $50,000 a year during the term of the department's priority. According to the company's estimate, the proposed dry dock, with its equipment, would cost about $2,000,000. A copy of the company's letter, containing the above offer, is inclosed herewith.

In a general way this offer commends itself to the department, and I recommend that, in the naval appropriation act for the coming year, the Secretary of the Navy be given authority to enter into a contract with the Union Iron Works Co. for the use of its docks, the terms of the contract, including those which will govern the size and construction of the dock, the duration and terms of the Government's priority, and the rate of compensation to be paid for dockage, including the minimum annual compensation to the company, to remain subject to such adjustment as the department may deem necessary for the proper protection of the Government, but that the term of the proposed contract shall be limited to six years from the completion of the dry dock, and that the rate of compensation for dockage shall not be greater than the rate named in the company's offer, nor shall the amount of compensation guaranteed to the company annually exceed $50,000.

There is inclosed herewith copy of a suggested amendment to the naval appropriation act for the fiscal year 1914.

Very respectfully,

G. V. MEYER.

Hon. L. P. PADGETT,
Chairman Committee on Naval Affairs,
House of Representatives.

PROPOSED AMENDMENT.

That for the purpose of obtaining further facilities on the Pacific coast to dock, repair, and alter naval vessels of the United States the Secretary of the Navy is hereby authorized and empowered to enter into a contract with the Union Iron Works Co. of California, for the use of the docks of said company at Hunters Point, San Francisco, Cal., for a

period of six years from the completion of a modern dock to be constructed by said company of such size and facilities as to be capable of accommodating any vessel that may be able to pass through the locks of the Panama Canal, and to guarantee said company a sum not exceeding $50,000 annually for the use of its said docks, to be applied as part payment of docking charges.

JANUARY 17, 1913.

Re proposal of Union Iron Works with respect to the construction and maintenance of a dry dock at Hunters Point, San Francisco, and the use thereof by naval vessels.

MY DEAR SIR: By direction of the Union Iron Works Co., I beg to submit to you the following proposition:

The Union Iron Works Co. will undertake to construct and operate a dry dock at Hunters Point, San Francisco, in close proximity to the two dry docks which it now has in operation at that place, and to place the facilities of the proposed dry dock and of the two now in operation at the disposal of the Navy Department, for the docking and repair of vessels, upon the following terms and conditions:

I.

General description and dimensions of the existing docks and of the proposed dock: The blue print which I hand you herewith represents the location and dimensions of the company's dry docks now in operation at Hunters Point (Nos. 1 and 2) and the location and dimensions of the proposed dry dock (No. 3) together with its appurtenances, including the pump house and suction conduits. This plan is drawn to scale and the dimensions of the docks are given by a table on the blue print, entitled "Notes." The location of these docks is ideal, there being a great depth of water close to shore at that point. The land consists of soapstone, which can be excavated easily, and, at the same time, will be impervious to water, thus reducing to a minimum the risk of the dock becoming temporarily unfit for use. An idea of the capacity of the proposed dock (No. 3) can be obtained from the blue print, which represents a vessel 900 feet long, 100 feet wide, and 72 feet molded depth, as she would be, when in that dock, on the blocks.

Your attention is invited to the following features of the plan:

(1) The proposed dock would be provided with a sliding gate, located about midway between the ends of the dock, as well as a floating caisson, located at its entrance. By means of the sliding gate the dock could be divided into two sections, each section being available for use independent of the other, and both of them being available for use contemporaneously independent of each other.

(2) The proposed dock (No. 3) would be equipped with electrically driven pumping apparatus, consisting of four 54-inch main centrifugal pumps and one 15-inch drainage pump; also with four electrically driven capstans on each side of the dock; also with all piping necessary to supply electric current, compressed air, and fresh and salt water. Stairways would be provided, leading from either side of the outer section to the bottom of the dock, through inclined tunnels; also two similar stairways for the inner section and two open stairways at the shoreward end of the inner section.

(3 The dry docks now in operation at Hunters Point (Nos. 1 and 2) are provided with an efficient power plant, which produces the electric and pneumatic power used in their operation and is capable of producing enough power for the operation of the proposed dock in addition to that of the two existing docks. Furthermore, the Union Iron Works has recently entered into a contract with the Pacific Gas & Electric Co., of San Francisco, by which the latter has agreed to supply it with all electric current needed to operate its works and also with power needed for the operation of the docks at Hunters Point, including the proposed dock. By this contract the Pacific Gas & Electric Co. guarantees that it will furnish any amount of current that may be needed for any and all purposes to which the Union Iron Works Co. may wish to apply it. The term of this contract is 10 years.

(4) The proposed dry dock would be equipped with a traveling crane, operated by electric power. By means of a runway or tracks, extending along both sides of the dock, this crane would be available to serve a vessel in the dock, at any point. The crane will have a capacity of 50 tons and will have a reach extending to the middle of the dock, at least.

Docks Nos. 1 and 2 have been found adequate to meet all demands for dockage that have arisen heretofore in the port of San Francisco. They are entirely adequate to meet present demands, and there is no certainty that demands will arise in the future which the two existing docks could not meet. At least, there is not sufficient certainty of an increased demand for dockage to justify the Union Iron Works or any individual in making the outlay necessary for the construction and maintenance of the proposed dock, without some assurance of income from the dock, which would enable the company to meet part of the operating expenses and interest charges. It is thought, however, that, with the opening of the Panama Canal, vessels of the Navy and merchant vessels will call at San Francisco, which could not be accommodated in either of the existing docks, and, with a guaranty of income such as that described below, the Union Iron Works Co. would be willing to risk an investment estimated at $2,000,000 in a dry dock having a capacity sufficient to accommodate any vessel which could pass through the locks of the Panama Canal.

If the proposed dock should be built, it is the purpose to make it first class in every respect and at least equal in capacity and efficiency to the largest and best docks now in existence, here or abroad, so that it could provide safe and efficient docking facilities for any vessel that might call at the port of San Francisco.

II.

Conditions under which the Union Iron Works Co. will undertake to construct and operate the proposed dock: The terms and conditions upon which the company offers to construct and maintain the proposed dock are these:

(1) It will begin the construction of the dry dock as soon as possible after the preparation and approval of detailed plans thereof and the execution of a contract between the United States and the company providing for the dockage and repair of vessels of the Navy upon the terms and conditions named below and will complete the structure in conformity with the plans and put it in operation within two years after their approval and the execution of the contract.

(2) In consideration of the payments to be made for dockage and the guaranty of revenue hereinafter described, the company will agree that, throughout the term of the contract, the Navy Department will have priority in the right to use any one or more of the three docks when desired for the accommodation or repair of naval vessels. In time of peace the priority enjoyed by the United States will be subject to the right of the company to complete work in progress upon other vessels which may be contained in its docks at the time when any naval vessel makes application for dockage. This limitation of the Government's priority is believed to be reasonable and necessary to meet the exigencies of the other business of the dock. It is believed, too, that this limitation would never occasion inconveniences to any naval vessel, for it is highly improbable that all three of the docks would ever be occupied by merchant vessels all requiring extensive repair. In time of war the requirements of the Navy would be considered paramount and would be accorded absolute priority.

(3) The charge to the department for the use of the proposed dock or either of the two docks now in operation would be at the rate of 6½ cents per ton of displacement per day for each day that a naval vessel may occupy one of the docks; the length of occupancy to be reckoned from the time that the dock is made available for the naval vessel's accommodation until she leaves it. This rate is regarded as fair and reasonable and has been fixed by the company after due consideration of the considerable amount of dockage that the Government will probably require for its naval vessels after the Panama Canal shall have been opened. Six and one-half cents per ton of displacement per day would be considerably less than the rate charged by the Government for the docking of commercial vessels in naval dry docks and less than the rates charged by commercial docks. The company is aware that it is the practice of the Navy Department to compute its charges for docking naval vessels on a basis quite different from that which governs its charges for docking merchant vessels and from the basis of charge prevailing in private establishments. According to the practice of your department, naval vessels are not charged for what are termed "lay days," i. e., the time that the vessel remains on the blocks. That may be a suitable basis of charge for the department to adopt with respect to naval vessels and naval docks, because the docks are built and operated at the Government's expense, and it is optional with the department to charge its vessels for their use or not. You will appreciate, however, that such a basis would not be possible where, as in the present case, a dock is to be built and operated at private cost and risk and where the owner must depend upon the income derived from the dock to defray expenses incident to its operation and to pay interest charges on the capital invested.

(4) Before the company will be required to commence the construction of the proposed dock, the United States will enter into a contract with it, undertaking to pay it at the above rate for dockage furnished to naval vessels and guaranteeing that the compensation paid by the Government for the use of all three docks will be not less than $50,000 in any one year, and if the compensation actually paid to the company for the dockage of naval vessels during any one year shall be less than $50,000, the difference shall be paid to the company by the United States at the end of that year. The term of the contract shall be 10 years from the date of the dock's completion and the company will guarantee to complete and make it ready for operation within two years after the signing of the contract: *Provided, however*, That if the proposed dock should, at any time, fall into a condition in which it would not be safe and efficient for the accommodation of naval vessels and such condition were attributable to the neglect of the company to employ proper and efficient means for its upkeep and maintenance, the company will be liable to forfeit a part of the sum of $50,000, guaranteed to be paid annually, proportionate to the part of the year during which the incapacity of the dock may continue: *Provided, further*, That in the event of a strike or standout of workmen employed by the company to operate its docks, the United States may operate them itself, employing its own men for that purpose, and shall thereupon be entitled to offset against the company's charge for dockage and the above guaranty such reasonable sum or sums as the United States may be required to expend for the operation of the docks: *Provided, further*, That for any delays of the company in furnishing dockage to vessels of the Navy, except in case where docks are in actual use by other vessels, the company shall be subject to suitable penalty, to be deducted from any sum or sums that may become payable by the United States under this contract: *Provided, further*, That for any delays in the completion of repairs that the company may be called upon to make upon a naval vessel while contained in its dry docks, due to fault or neglect of the company, it shall forfeit all right to charge for the use of such dock during the period of delay.

The company estimates that $50,000 will represent about one-half of the company's annual outlay for interest upon the money invested in the dock.

(5) By the above contract the company will agree to do any repair work upon any naval vessel that may be ordered by your department, while she is occupying one of its dry docks, upon the following basis of charge: Cost of raw material to company; add 10 per cent of cost of raw material for handling charges at company's plant; actual cost of labor paid to workmen; add 65 per cent to cost of labor to overhead burden and use of tools; to the sum total of the above add 10 per cent for the company's profit: *Provided, however*, That in cases where the company's actual outlay for labor will be very small as compared with the charge for use of tools, the company's compensation shall be determined by a board of naval officers appointed for that purpose.

When it is considered that the overhead charges that the company would have to meet in performing repair work include many items, such as insurance, depreciation, and interest on capital invested, which do not enter into your department's estimates of the cost of repair work performed by it, we are assured that you will consider the above basis of charge fair and reasonable.

III.

Conditions to govern the construction and operation of the proposed dry dock: Prior to the signing of a contract for the purposes mentioned in paragraph II, the company would submit to your department for its approval detailed plans and specifications of the dock, its equipment, and appurtenances, and these would be followed in the construction of the dock. While the work of construction was in progress the company would accord to representatives of your department every opportunity to observe the manner in which the work was being done, to the end that your department might be satisfied of the safety and efficiency of the structure. Furthermore, upon the completion of the dock representatives of your department would be accorded an opportunity to inspect the dock and its operation in every particular, to assure themselves that it was being maintained in a proper and efficient manner, and thus assure themselves that the requirements of the plans and specifications have been fulfilled in every respect. After the completion of the dock and its inspection in the manner just mentioned representatives of your department would be accorded opportunities to inspect it at intervals of six months, or oftener, if desired, and kept in readiness for the safe accommodation of naval vessels. It is submitted that the foregoing plan of inspection and approval would meet all requirements of the Navy Department. Inasmuch as the dock would be built and operated at the cost and risk of the company, and would be owned by

the company, there would be no occasion for the approval of the work during its progress.

The company has already made an extensive investigation of the methods of dry-dock construction prevailing abroad. Before beginning the work upon the dock it would send experts to Europe to inspect and study the construction of the largest and best dry docks to be found in England, Germany, and other countries. It would hope, also, that your department would give it an opportunity to study the plans and specifications of docks recently completed by the United States or now under construction for it.

The foregoing offer is made in the belief that its acceptance would result in benefit to both parties and that it would be to the advantage of the Government to obtain the use of a dry dock in close proximity to the Mare Island Navy Yard where the largest naval vessels could be docked without being required to make any outlay for construction of the dock. In addition, it is believed that the dockage charges would be equal to the amount of the annual guaranty, and that the department would be relieved of the responsibility and cost of maintaining the dock during the considerable periods when its use would not be required by naval vessels.

I remain, very respectfully, yours,

JAMES H. HAYDEN,
Attorney for the Union Iron Works Co.

Hon. BEEKMAN WINTHROP,
Assistant Secretary of the Navy, Navy Department.

I trust the point of order that the gentleman from Mississippi has reserved will not be insisted upon, and that the House will permit this item in the naval bill to pass, because if it is insisted upon it will cost this Government many thousands of dollars, unless it is restored in the Senate.

There should be no objection to this contract from any of my colleagues from the Pacific coast, as all of the yards and docks on the Pacific will get their share of ships to dock and repair when the fleet is in our waters, and unless we have facilities for docking our largest ships in the Harbor of San Francisco without their making the long journey of 900 miles to Bremerton, it is more than likely the Navy Department will keep their large dreadnaughts in the Atlantic and at Balboa on the Pacific end of the canal and the selfish objections of any individual will be for naught.

I trust all objections will be withdrawn in the best interests of our Navy.

Mr. BRITTEN. Mr. Chairman, in order to show the necessity for another large dry dock on the Pacific coast I desire to call to the attention of the committee the amount of business done by Dock No. 2 at the Bremerton yard. This is the only dock on the coast at the present time capable of berthing our largest battleships. Dock No. 2 went into service in March of last year and was in operation for 121 days of the last fiscal year, and during those 121 days it was in absolute use day and night 105 days, exclusive of Sundays. Now, that means that that dock was in use practically 24 hours out of every day that it has been in commission during the last fiscal year, and that in itself will prove conclusively the great necessity of having another dock on the Pacific coast, preferably at San Francisco. I merely wanted to place this statement before the committee.

Mr. FALCONER. Mr. Chairman, I wish to ask my friend, the gentleman from Illinois, Why is it they are turning off about 800 men at the Bremerton Navy Yard in the last 90 days?

Mr. BRITTEN. I do not know; I merely tried to show the importance of having another dock on the Pacific coast.

The CHAIRMAN. If the gentleman will permit, the Chair understands the agreement was that he was to recognize two other gentlemen.

Mr. FALCONER. My colleague from California does not need——

The CHAIRMAN. If the gentleman will pardon the Chair, there was an agreement made by which two other gentlemen were entitled to five minutes each.

Mr. FALCONER. Mr. Chairman, I was one of those gentlemen.

The CHAIRMAN. The Chair was in error; the Chair recognizes the gentleman from Washington.

Mr. FALCONER. Mr. Chairman, I desire to say there is no disposition on the part of any Member from the Pacific coast to be unfair in the consideration of this question, but the economics of this whole proposition resolves itself around this one thing—whether the United States Government is going to do its own work or whether a private corporation, nurtured, hothoused by the Government, is going to do it. Why should the United States Government give any private corporation or any concern a bonus for repair or manufacture of ships? There is no valid reason why we should give the Union Iron Works $50,000 a year for six years, legislating, as we are, every year. That is the one thing which presents itself to this Congress. The Union Iron Works, of San Francisco, has had the advantage of Government repair and construction work for the last generation.

Mr. J. I. NOLAN. Will the gentleman yield?

Mr. FALCONER. No; I will not yield. The gentleman can make his statement on his own time.

The CHAIRMAN. The gentleman declines to yield.

Mr. FALCONER. I am not using this argument for the purpose of setting aside the importance of San Francisco in this connection. I think there ought to be a dock of large dimensions in San Francisco Harbor, a Government dock, but there is no reason why we should bind ourselves for six years to pay to a private corporation for work which the Government of the United States can and ought to do. It means simply this, that ships that might go elsewhere in the absence of a large dock in Mare Island—to Panama or Puget Sound, for instance—will be retained in the vicinity of San Francisco, thereby benefiting a private concern $50,000 per annum, while hundreds of men in the Government yards may be laid off. Now, it is a question of economics, it seems to me, whether we wish to favor a private concern with a string on Government business or the Government doing its own work in its own plants. This provision of the bill does not appeal to me.

Mr. KAHN. Mr. Chairman, the gentleman from Washington [Mr. FALCONER] says that so far as the proposition submitted here is concerned he is opposed to it because it is going to foster some private enterprise, or words to that effect. The gentleman is fearful the Government is giving private enterprise an opportunity to do some Government work. The only contract the Government will make with this company under the paragraph now pending will be one that will grant the right to dock its big battleships at these docks. Repair work will be done by the lowest responsible bidders, as at present. I agree with the gentleman that the Government ought to do the Government work, but there is no large dry dock at Mare Island.

Mr. J. I. NOLAN. Will my colleague yield?

Mr. KAHN. In a moment. Now, as a matter of fact, this is a patriotic proposition. A modern battleship of the dreadnaught type costs $15,000,000. When she is injured she should be brought to a dry dock without delay. It should not matter whether it be a private dock or a Government-owned dock, if she has to be promptly repaired. It is all important that she be docked expeditiously in case she should be seriously injured. Unfortunately there is no dry dock at San Francisco for these large vessels. There should be one, but the Navy has not constructed it. Now, I will yield to my colleague.

Mr. J. I. NOLAN. Is it not a fact that as far as the Union Iron Works are concerned they have not done any of the repair work of the Navy on battleships or cruisers?

Mr. KAHN. For some time.

Mr. J. I. NOLAN. No repair work, and have not done any big work since the time the whole fleet was out there.

Mr. KAHN. As a matter of fact, the Mare Island Navy Yard has been doing most of the repair work, not only on the battleships and cruisers but also on the Army transports.

Mr. FALCONER. Will the gentleman yield?

Mr. KAHN. No. I am sorry, but I can not do so.

Now, as a matter of fact, the Bremerton dry dock, if it were on the eastern coast, would be at a point in northern Maine and the San Francisco dock would be at Richmond, Va. There is not a suitable dry dock for docking ships of the size of our large battleships of the dreadnaught type between those two points on the Pacific; or, a distance that would extend from northern Maine to Richmond, Va., on the Atlantic seaboard, relatively speaking.

They certainly do need dry docks out there. This dock, if built, will be leased, virtually to the Government for six years. During those six years the situation at Mare Island will be fully determined. There has been some question as to the depth of water in the channel near Mare Island. During the next six years that matter will be fully developed, and the Government will determine whether it wants to build a dock at Mare Island or at some point further down on the Bay of San Francisco. In the meantime, if this paragraph were allowed to stay in the bill, the Government would have the right to use this dock, would have the first call, no matter what ships might be in the harbor waiting to be docked. The big battleships would have the right to go to this dry dock without delay, in order that necessary repairs could be made. It would be of inestimable value to this Government to have a dock of that character at San Francisco for that purpose. While we hope no accidents will occur to any of our ships, if one representing an investment of $15,000,000 should be lost on account of the refusal of Congress to make suitable provision for a dry dock on San Francisco Bay, the country would have a right to feel indignant at the shortsightedness of legislators who refused to take advantage of an exceptionally favorable offer for the construction of such a dry dock by the Union Iron Works at Hunters Point.

The CHAIRMAN (Mr. JOHNSON of Kentucky). The time of the gentleman has expired.

Mr. J. I. NOLAN. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FALCONER. Mr. Chairman, I have only used four minutes of my time and did not yield any back, and I am wondering if I can not proceed for one minute.

The CHAIRMAN. The Chair is informed by the clerk who keeps the time that all time has expired.

Mr. FALCONER. Then I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. LINTHICUM. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on this paragraph.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WITHERSPOON. Mr. Chairman, I make a point of order on this proviso in the bill.

The CHAIRMAN. The Chair will inquire of the gentleman whether he makes a point of order on the whole paragraph or a portion of it.

Mr. WITHERSPOON. Just to the proviso at the bottom of page 35.

The CHAIRMAN. The point of order is sustained.

Mr. GERRY. Mr. Chairman, I move to strike out the last word.

The *Constellation* has been at Rhode Island for the last 20 years, acting as a receiving ship and radio school, and also as an exhibit of the former wars of our country. She is an interesting relic. The Secretary of the Navy now wants to send her to the Star Spangled Banner Celebration at Baltimore. We of Rhode Island do not want to be selfish. I am very glad to say that the Secretary of the Navy has promised me that she is, after her trip, to be returned to Rhode Island.

I append herewith the letter of the Assistant Secretary of the Navy to that effect:

NAVY DEPARTMENT,
February 13, 1914.

Hon. PETER G. GERRY,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN: Confirming our talk with the Secretary of the Navy to-day, I want to assure you that it is the intention of the department to have the U. S. S. *Constellation* return to the naval training station, Newport, R. I., after she has made the contemplated visit to Baltimore at the time of the Star-Spangled Banner celebration, next September. Of course we shall probably want to have her visit various other ports on her way from and to Newport, as we feel that the historical record of the ship makes her an object that would interest many thousands of persons if they had a chance to see her.

Very sincerely, yours,

FRANKLIN D. ROOSEVELT,
Assistant Secretary of the Navy.

Mr. MURDOCK. Will the gentleman yield?

Mr. GERRY. I will.

Mr. MURDOCK. How much will this trip cost?

Mr. GERRY. It is stated in the bill here under the repair of the *Constellation*.

Mr. MURDOCK. I did not know to what paragraph the gentleman was speaking. Where is it?

Mr. GERRY. It is on page 35, line 17.

Mr. PADGETT. The repairs for the ship, it is estimated, will cost not exceeding $50,000.

The CHAIRMAN. The Clerk will read.

Improvement of construction plants: For repairs and improvement of machinery and implements at plant at navy yard, Portsmouth, N. H., $10,000.

Mr. COOPER. Mr. Chairman, I ask unanimous consent to address the committee for five minutes on the bill, introduced yesterday, I believe, which proposes that Congress shall cede part of Alaska to England.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. COOPER. I have in my hand a newspaper containing a rather elaborate editorial, which I have just been reading, on the bill to cede a part of Alaska to England, which cession, the bill declares, ought to be made in order to insure us the good will of that country.

Mr. Chairman, this proposal to cede part of Alaska to England is attracting much attention and comment, and yet, in my judgment, it is wholly without merit. The Congress of the United States has no power to alienate any part of Alaska. Congress has no such power, because the Constitution of the United States has been extended over Alaska. The treaty by which that Territory was ceded to the United States granted all the privileges and immunities of citizens of the United States to all the people of Alaska, excepting the uncivilized natives, who renounced their allegiance to Russia within three years. The Constitution of the United States is extended over Alaska, and its thousands of civilized inhabitants are citizens of the United States.

Now, Mr. Chairman, the Supreme Court of the United States has decided that territory over which the Constitution has been extended is forever made a part of the United States. I remember that in 1902, in opening the debate on the bill to establish civil government in the Philippines, I called attention to this decision of the Supreme Court during my discussion of the democratic proposition then before the House, in which it was declared not only that the Constitution was over the Philippines but also that we ought to withdraw from the islands and give them up. Referring to that two-edged proposition, I called attention to the decision of Mr. Justice White, now Mr. Chief Justice White, of the Supreme Court, in the case of Downs against Bidwell, in which he, speaking for the court, expressly held that if the Constitution be extended over any territory it thereby becomes indissolubly a part of the United States, and, of course, beyond the power of Congress to alienate. In that case the court also expressly held that the clause of the Constitution which gives Congress the power to dispose of the territory of the United States did not confer power to transfer sovereignty where the Constitution has been extended.

This being the law, the Congress of the United States can not cede to England so much as one foot of the Territory of Alaska. No territory that is under the Constitution of the United States can be taken from the jurisdiction of the United States Government except by force, and that means by war.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. COOPER. I will.

Mr. GARRETT of Tennessee. On the Philippine matter the treaty was not, of course, the same as it is with regard to Alaska.

Mr. COOPER. No. But the decision of the Supreme Court——

Mr. GARRETT of Tennessee. I understand that perfectly, and I think I understand the point the gentleman makes, and I think he makes it very clear. But in the Alaskan case it is predicated upon the treaty.

Mr. COOPER. By which they are given all the rights, privileges, and immunities of citizens of the United States.

Mr. GARRETT of Tennessee. By which they are given all the rights, and so forth. Now, so far as the Philippines are concerned, the treaty does not make any such provision.

Mr. COOPER. No; but that is immaterial in discussing this bill to cede part of Alaska. The point here and now is that the Supreme Court has decided that if the Constitution has been extended over territory no portion of that territory can ever be taken from the sovereignty of the United States by cession or by treaty. It can be done only as the result of war.

Mr. LINTHICUM. Will the gentleman yield?

Mr. COOPER. I will.

Mr. LINTHICUM. The gentleman does not think that Congress has any idea of doing any such thing as this?

Mr. COOPER. I had just been reading an editorial on the bill which proposes to do it, and thought it might be well to present what I understand to be the facts and the law. The proposal is important and is being much discussed.

Mr. GOULDEN. I would like to suggest to the gentleman from Maryland [Mr. LINTHICUM] that his colleague from Maryland introduced the bill.

Mr. LINTHICUM. That is the reason I mentioned it. I have not any idea of doing any such thing as giving Alaska away.

Mr. COOPER. I have no comment to make on the suggestion of the gentleman from Maryland [Mr. LINTHICUM] except to say that it was a gentleman from his State who introduced the measure.

The Clerk read as follows:

For repairs and improvement of machinery and implements at plant at navy yard, Philadelphia, Pa., $15,000.

Mr. MOORE. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 37, line 5, strike out "$15,000" and insert in lieu thereof "$215,000."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. PADGETT. Mr. Chairman, I would like the gentleman to state for what purpose his amendment is offered.

Mr. MOORE. That is to provide for certain repairs and improvements and such implements as may be necessary to carry out the direction of the Secretary of the Navy upon work which he has authorized to be done at the Philadelphia yard.

Mr. PADGETT. I will call the attention of the gentleman to the fact that that amendment would not accomplish his purpose if it were adopted, because he will notice that this is for improvement and repair of machinery and implements, and would not authorize construction. That would simply repair a larger number of machines that are already in the shops.

Mr. MOORE. Well, Mr. Chairman, I submit that "repairs and improvements" is an expansive term.

Mr. PADGETT. When it is limited to improvements of machinery it is not expansive.

Mr. MOORE. It is "machinery and implements at the plant," which makes it an extremely expansive term, and this would make it possible for the Secretary of the Navy to carry out the purposes he has in mind. It seems to me that this is an amendment which is entirely germane. It is not contrary to the rule, and it enables the head of a great department, who has already undertaken to do a work with a plant already in existence, to provide the facilities to do work directed to be done by Congress.

The CHAIRMAN. The question is on the adoption of the amendment.

Mr. PADGETT. Mr. Chairman, the purpose of the gentleman is to build these slips. He has offered an amendment increasing by $200,000 the amount of $15,000 here; to increase it to $215,000, which is specified for the improvement of the machinery, for the repair and improvement of machinery. That would not authorize the construction of the slips that are outside of the shops. This is in the shops of the yard.

Mr. MOORE. Mr. Chairman, it is the plant to which the repairs and improvement are to be made, and the plant is a part of the equipment of the yard. Necessarily so. There must be a plant with which to do work. There must be implements with which to operate the plant, and the plant must be repaired and improved. That is what is proposed here, to furnish the means with which to do it.

The CHAIRMAN. A point of order has not been made.

Mr. SAUNDERS. I make a point of order.

Mr. PADGETT. It is too late for a point of order now to be made. It is not subject to a point of order, because this is to improve——

Mr. SAUNDERS. Mr. Chairman, I understand from the gentleman from Tennessee that so far as concerns the purpose in view here it could not be accomplished by this amendment anyhow?

Mr. PADGETT. It could not.

Mr. SAUNDERS. And that it would be a futile amendment there, and I understand that the committee is opposed to it.

Mr. PADGETT. Yes. This is for the repair and improvement of machinery at the plant. It is not to construct a slip.

Mr. BRITTEN. Does not that also apply to the improvements, and not to the machinery only?

Mr. PADGETT. It applies to the improvement of machinery and implements at the plant. But there is no semblance of slips there to improve. Is does not authorize new construction.

Mr. MOORE. Mr. Chairman, I want to ask the gentleman whtther everything mentioned in this paragraph does not pertain to equipment?

Mr. PADGETT. No. I am in sympathy with the gentleman's object, but I do not want to get it by putting it where it should not be, and where it could not be used.

Mr. MOORE. The gentleman is in sympathy with the proposition, and so is the chairman.

The CHAIRMAN. The question is on the adoption of the amendment.

Mr. MOORE. Mr. Chairman, I want to be heard for a moment.

The CHAIRMAN. The Chair understood that the gentleman had been recognized and then surrendered the floor to another.

Mr. MOORE. Mr. Chairman, I am sure the Chair understands this situation: That the Secretary of the Navy desires to construct a transport; that he has designated a place where it is to be constructed; that all this has been in accordance with an act of Congress, and that all necessary implements have not been provided. I leave the matter with the Chair. The Chair understands what is proposed to be done here.

Mr. SAUNDERS. Mr. Chairman, it has been expressly stated by the chairman of the Naval Committee that the object which the gentleman has in mind could not be accomplished by the amendment he has offered. The chairman of the committee has made that statement in emphatic terms.

Mr. MADDEN. Mr. Chairman, I have just looked up in the dictionary the meaning of the word "implement," and the dictionary defines it as an agent or means for the accomplishment of a purpose. Now, it seems to me with that definition before us——

The CHAIRMAN. The gentleman is arguing a point of order when there is no point of order pending.

Mr. MADDEN. No. I am arguing in behalf of the amendment offered by the gentleman from Pennsylvania [Mr. MOORE], and I contend that it will accomplish the purpose for which it was intended and for which it was offered.

I believe, Mr. Chairman, that the Secretary of the Navy ought to have the means to carry out the order which he has issued for the construction of the transport at the Philadelphia Navy Yard, and if the amendment of the gentleman from Pennsylvania, offering to increase this appropriation by $200,000, should be adopted the Secretary of the Navy would at once have authority to expend the money for any purpose which would accomplish the object, namely, the construction of a transport at the Philadelphia Navy Yard.

Mr. MOORE. Mr. Chairman, may I add to that "and the means"? He would then have the means or the agency "for the accomplishment of the purpose," which purpose is already indicated and is in accordance with the law.

Mr. SAUNDERS. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Virginia moves to strike out the last word. The gentleman is recognized for five minutes.

Mr. SAUNDERS. Mr. Chairman, the rules of the House plainly declare that a nongermane amendment shall not be in order. The paragraph of the bill relates to one thing, the amendment to another. Hence it is not in order. But waiving the question of order, the amendment should be voted down for the obvious reason that the Secretary of the Navy could not in good faith use an appropriation which in terms is for implements about a shop, for another and different purpose, however anxious he might be to make that application.

The chairman of the Committee on Naval Affairs, has dealt very frankly with the Committee of the Whole. He has stated that he favors building a slip at Philadelphia, but is opposed to the pending amendment, because it will not accomplish that result. If this matter could come squarely before the committee, and be voted upon, as was done in the case of the Boston Navy Yard, the losers would have nothing to say. But this is an effort to do by indirection something that the chairman of the Committee on Naval Affairs tells us can not be done in this fashion. The Secretary of the Navy would be in an awkward plight should he use the funds provided by this amendment to build a way and slip at the Philadelphia Navy Yard. He would violate the plain meaning of the amendment.

We do not wish to legislate by indirection, and to have the Secretary give a meaning to a law which the plain language of the law does not carry. If the House wishes to authorize the Secretary of the Navy to do a particular thing, it ought to afford that authority in plain and manifest terms. He ought not to do something which he can not do, unless he violates the law which is the foundation authority of his action, and gives it a meaning which is manifestly contrary to its plain intent. It would be unjust to the Secretary to ask him to do such a thing, since in effect it would be a perversion, and misapplication of the funds provided in the amendment. Apparently meaning one thing, this amendment is intended to carry another and very different meaning, if it is intended to give the Secretary authority to construct a building way at the Philadelphia Navy Yard.

The chairman of the committee has so frankly told the Committee of the Whole that the object in contemplation by the gentleman from Philadelphia can not be accomplished by this amendment, that it ought to be overwhelmingly rejected. The purpose of language in the bill, as stated by the chairman of the committee is to provide for certain machinery in the shops. If it is desired to add something to this language intended to accomplish something confessedly entirely outside the purpose of the bill, then even if adopted, the amendment would fail of its purpose. The Secretary of the Navy would certainly not apply the money, afforded, contrary to the plain meaning of the amendment. An amendment to give the Secretary of the Navy authority to build these slips has been held out of order. But now it is proposed, by engrafting on the bill an amendment of this sort, to accomplish by indirection what may not be done by direction.

Mr. MOORE. Mr. Chairman, I wish to oppose the amendment to strike out the last word.

Mr. PADGETT. Go ahead for five minutes, and then I think we ought to close the debate on this.

Mr. MOORE. Mr. Chairman, the gentleman from Virginia [Mr. SAUNDERS] finds fault with the committee, and falls back upon the ground that we would not be keeping good faith with

the committee were this amendment to be adopted. If this amendment is not adopted, the committee will be eating its own words, because it recommended this very proposition. The committee want this thing done. They want it done because the Secretary of the Navy has acted officially and in accordance with the law. What does it all mean if this provision is not to go in? Were we bunkoed, to use a word of common parlance, when Congress said we were to build this transport in a navy yard? Were we bunkoed when the Secretary of the Navy said that this transport should be built in the Philadelphia Navy Yard? Were we bunkoed when the Committee on Naval Affairs brought in a provision here on page 22 of this bill providing for "building slips and equipment, $200,000"? What was the purpose of all this? Why did Congress pass the act of March 4, 1913, providing that this transport should be built in a navy yard, if it did not intend that it should be done? What did the Secretary of the Navy mean when he came over to Philadelphia and selected that yard as the proper place for the construction of this transport, if it is not to be done. What does the Committee on Naval Affairs mean when it brings in a provision here for "building slips and equipment, $200,000," if it is to be knocked out? If we are to be "so soon done for" in a matter of this kind, "what were we ever begun for"? What is the purpose of Congress? What is the purpose of the Secretary of the Navy? What is the purpose of the Committee on Naval Affairs? If we are to take them at their word and in good faith, then we are to appropriate the money to enable them to carry out the purpose that Congress intended when it passed that act of March 4, 1913.

The chairman of the Naval Affairs Committee knows that it is the purpose of the Secretary of the Navy to build this ship in the manner indicated. The Chairman of this Committee of the Whole House on the state of the Union has indicated that that was the purpose not only of the law but of the department, and apparently it is the purpose of Congress. Are we now to be left in that peculiar position between heaven and earth where we are to build this ship somewhere, up in the air, without the tools with which the work is to be done? I do not believe that is the purpose of Congress. If it is, we had better repeal the provision in the act of March 4, 1913, which directed the construction of this ship in a navy yard. We had better take back our instructions to the Secretary of the Navy, and the Secretary of the Navy had better take back his designation of the Philadelphia Navy Yard, as the place of construction. This is not a joke. Certainly the Secretary of the Navy has not been fooling us on this proposition, and yet you would seem to leave him in that position, unless you provide for him the means with which to go ahead and do the work Congress directed him to do. The motion is in order. It is not subject to the point of order. It is a fair motion. It simply means to carry out the will of Congress as the Secretary of the Navy has undertaken to carry it out. I believe the committee ought to vote on the question, and in due course I shall ask for a vote.

Mr. GOULDEN. Will the gentleman yield for a question?

Mr. MOORE. Certainly.

Mr. GOULDEN. Is the gentleman afraid of the point of order being renewed to the item for building slip and equipment?

Mr. MOORE. That point of order was made yesterday and sustained; and, I think, if the gentleman will read the decision of the Chair, he will find that that decision was made with great reluctance.

The CHAIRMAN (Mr. GARRETT of Tennessee). The time of the gentleman from Pennsylvania has expired. If there be no objection the pro forma amendment will be withdrawn. The question is on the amendment of the gentleman from Pennsylvania [Mr. MOORE].

The question was taken; and on a division (demanded by Mr. MOORE) there were—ayes 18, noes 28.

Accordingly the amendment was rejected.

The Clerk read as follows:

For repairs and improvement of machinery and implements at plant at navy yard, Mare Island, Cal., $15,000.

Mr. MADDEN. I should like to ask the chairman of the Committee on Naval Affairs why it is that all the plants and machinery at all the navy yards seem to be in the same condition and to need the same amount of repairs? One would imagine that no consideration whatever had been given to the item recommended by the Navy Department for improvement of machinery and implements in the navy yards, or that all the navy yards had exactly the same amount of the same kind of machinery and that the machinery is in the same state of decay. It looks rather singular that all the navy yards in the country require just exactly the same amount of money for repairs.

Mr. PADGETT. These were the estimates submitted by the Navy Department, and these particular yards do have substantially the same machinery and equipment, so far as repairs are concerned. The department submitted the estimate of $15,000, and the committee allowed that amount.

Mr. MADDEN. There was no inquiry made?

Mr. PADGETT. Yes; we asked each one of them if that would meet the necessities and requirements of the yard, and they said it would.

Mr. MADDEN. All I have to say is I think it is very singular that every yard is to have the same amount of repairs made on its machinery, and that it amounts to $15,000 for each yard.

Mr. PADGETT. The gentleman is hardly correct in that, because at New York it is $20,000 and at Puget Sound only $10,000.

Mr. MADDEN. They divided that so as to give $5,000 more to one and $5,000 less to the other, but on the average it is $15,000.

Mr. PADGETT. That is the fact.

Mr. REED. Mr. Chairman, Portsmouth, N. H., gets only $10,000, and I think the amount for repairs, and so forth, is entirely inadequate.

Mr. PADGETT. The department submitted these estimates, and they usually take care of the yards pretty well.

The Clerk read as follows:

For repairs and improvement of machinery and implements at plant at navy yard, Puget Sound, Wash., $10,000.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I ask unanimous consent to return to pages 28, 29, and 30, to the provision with regard to chaplains of the Navy, in order that the gentleman from Illinois [Mr. MADDEN], if he so desires, may withdraw the point of order which he made the other day.

Mr. MADDEN. I have been looking into the question of chaplains in the Navy, and I am convinced that in making the point of order which I made I ought not to have done so, and I wish to ask unanimous consent to withdraw the point of order.

The CHAIRMAN. Is there objection to the request of the gentleman to return to the paragraphs mentioned?

Mr. REED. May we not have the paragraphs to which the point of order is made reported?

Mr. ROBERTS of Massachusetts. It is the provision as to the increase of chaplains in the Navy.

Mr. MANN. It will still be subject to a point of order.

Mr. REED. I do not wish to make a point of order, but I want to know what I am consenting to. What is the amount of appropriation carried in that paragraph?

Mr. MANN. There will be some discussion about it.

The CHAIRMAN. Is there objection to returning to the paragraphs? [After a pause.] The Chair hears none.

Mr. MANN. Now, I understand my colleague withdraws his point of order?

Mr. MADDEN. I withdraw the point of order.

Mr. PADGETT. Mr. Chairman, I move to amend page 28, following line 12, by inserting the language as it appears in the bill from line 13, page 28, to and including line 10, page 30.

Mr. MANN. Let the amendment be reported.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk began reading the amendment.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I ask unanimous consent that the reading of the amendment be dispensed with. It has been read once and is familiar to every Member.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MANN. Mr. Chairman, I wish to reserve a point of order on the amendment.

Mr. MURDOCK. Mr. Chairman, it seems that the other day these paragraphs relating to the corps of chaplains in the Navy went out on a point of order. Is that correct?

The CHAIRMAN. That is correct.

Mr. MURDOCK. And to-day the gentleman withdraws the point of order.

The CHAIRMAN. By unanimous consent, the committee returned to the paragraphs in the bill, and the gentleman withdrew his point of order, and the language originally in the bill is offered as an amendment, and to that the gentleman from Illinois reserves a point of order.

Mr. MURDOCK. The point of order by the gentleman from Illinois did not operate, then, at the beginning?

The CHAIRMAN. Yes; the language went out on the point of order by the gentleman from Illinois [Mr. MADDEN], and now the same matter is offered again by the gentleman from Tennessee and a point of order is reserved by the gentleman from Illinois.

Mr. TRIBBLE. Mr. Chairman, I reserve a point of order to these paragraphs.

The CHAIRMAN. A point of order has already been reserved. Whenever a point of order is reserved, it is reserved for the whole committee.

Mr. REED. Mr. Chairman, do I understand that the amendment covers the original language in the bill that went out on the point of order made by the gentleman from Illinois [Mr. MADDEN]?

The CHAIRMAN. The Chair understands it is identically the same language.

Mr. TRIBBLE. Mr. Chairman, I desire to be heard on this. First of all, it will be found that on page 354 of the hearings Mr. WITHERSPOON asked the question, "That would be a chaplain to each of the 39 battleships?" I read that part of the question for the purpose of making this point, that the discussion in the Naval Committee proceeded with the idea that the increase of 65 chaplains carried in this bill is for the purpose of placing chaplains on ships. I would not oppose this measure if it required those in authority to station the chaplains on ships. Also, it should take from the chaplain authority to require of the enlisted seamen any religious duty that conflicts with the Constitution of the United States granting religious freedom to all men. The men should be permitted to worship God according to the dictates of their own conscience.

There are 24 chaplains in the Navy, and of that number 7 are on battleships. The others are located in the navy yards. I want to say to you, Mr. Chairman, that I do not propose to stand on the floor of this House and see chaplains placed in the navy yard at Washington, New York, and other places where the men have their homes and can go to church, and where they can receive the benefit of clergy just the same as my constituents receive it in their homes. My constituents pay their preacher. These navy yards are located, many of them, where there are all kinds of denominational churches almost in a stone's throw, and the men in the navy yards have their own homes and can go at will to any kind of religious services they like. The machinist and skilled laborers receive from $4 to $6 per day—very few less and many more than $6 per day. They work eight hours, get sick leave, and 30 days' vacation. Tell me why my constituents should pay a chaplain to administer to their religious wants.

One chaplain is stationed in the navy yard at Washington. I would like for some gentleman to give me some reason why the country should be called upon to pay the expenses of a chaplain stationed at the navy yard in the great city of Washington.

Mr. ROBERTS of Massachusetts. Will the gentleman yield?

Mr. TRIBBLE. Yes.

Mr. ROBERTS of Massachusetts. I would like to state to the gentleman that the chaplain to whom he alludes is on his way to Vera Cruz for service on the fleet. He has been dispatched from the navy yard here to Vera Cruz, where his services are needed.

Mr. TRIBBLE. I read from the Navy Register, and the facts are Chaplain Byard has been stationed here in Washington several years, while many of the ships have had no chaplain.

Mr. PADGETT. I call attention that in this bill it is provided that, with reference to chaplains, they must have three years' sea service on board ship before they can receive a commission as chaplain at all; that is, three years' actual service for qualification.

Mr. TRIBBLE. This bill gives the chaplain too much authority. They are clothed with too much power. I call attention to the fact that out of 23 chaplains recorded in this book 3 of them were born in a foreign country.

Mr. BRITTEN. Does the gentleman think that interferes with their qualifications and service?

Mr. TRIBBLE. I think it does. I am not willing to turn over our young seamen to foreigners to receive their religious instruction and require them to submit to the regulations that may be required pertaining to religious creeds.

Mr. GOULDEN. Are they not American citizens?

Mr. TRIBBLE. I do not know. I doubt if they are, for one of them is a young man who entered the Navy within the last two years.

Mr. GOULDEN. They must be American citizens before they can get a commission; and if they are American citizens they have a right to hold any position to which they are appointed.

Mr. TRIBBLE. The gentleman does not convince me that foreigners should administer religious ceremonies on our battleships. I suppose I belong to the old school who sought refuge in America. This innovation does not appeal to me.

Mr. RAGSDALE. Will the gentleman yield?

Mr. TRIBBLE. Yes.

Mr. RAGSDALE. Would the gentleman be in favor of a law that prohibited foreign-born chaplains from serving?

Mr. TRIBBLE. I would.

Mr. RAGSDALE. Would the gentleman be in favor of a law prohibiting foreign-born citizens from serving in the Cabinet?

Mr. TRIBBLE. I prefer not to go into that question.

Mr. RAGSDALE. Would he be in favor of a bill that would limit them?

Mr. TRIBBLE. I do not care to discuss that question at this time. It does not relate to this issue.

Mr. PADGETT. They have to be citizens in order to get a commission.

Mr. TRIBBLE. Mr. Chairman, I regret that this religious question has been injected into this discussion. I considered it seriously before I made the point of order. I felt that Members would insist that I should go into a full discussion of the question.

Mr. ROBERTS of Massachusetts. I understood the gentleman to say that he read from the Naval Register of January 1, 1913?

Mr. TRIBBLE. I did.

Mr. ROBERTS of Massachusetts. I have it for January 1, 1914, and it appears that 10 out of the 27 chaplains are stationed on ships.

Mr. TRIBBLE. Where are the others? The gentleman has not answered my question as to why the people should be called upon to pay for a chaplain in New York or Washington or of some other naval station.

Mr. ROBERTS of Massachusetts. I will tell the gentleman where these others are stationed.

Mr. TRIBBLE. I know where they are stationed. I have the book in my hand.

Mr. ROBERTS of Massachusetts. One is at the naval training station, Great Lakes; one at the navy yard in New York; one at the naval disciplinary barracks, Port Royal; one at the Naval Academy; one at the naval training station, St. Helena, Va.; one at the navy yard, Norfolk; one at the navy yard, New York; one at the navy yard, Washington, who has been detached and sent to Vera Cruz; one at the navy yard, Boston; one at the Naval Home, Philadelphia; one at the training station, San Francisco; one at the naval training station, Newport; one at the navy yard, Mare Island; and one at the training station, Great Lakes. Now, the gentleman will notice that with few exceptions these chaplains are stationed where the men are gathered in large bodies.

Mr. TRIBBLE. The gentleman has assisted me in establishing my contention. Every place the gentleman mentioned is abundantly supplied with churches and ministers. Listen: Boston, Philadelphia, Norfolk, San Francisco, New York, Washington—the great cities of the Union.

Mr. Chairman, I arose to urge the present location of the chaplains as objectionable, therefore opposing the increase until it shall be made obligatory that chaplains go to sea on ships, where the law intends they shall be, and also to oppose giving them additional rank and authority. This question was considered by the Naval Committee. I did not make the record I am going to read from the hearings. I did not ask a question. The creed or religious question was injected by others. The proper distribution among the religious denominations was discussed by Father O'Hern, representing the Catholic Church.

The CHAIRMAN. The time of the gentleman has expired.

Mr. TRIBBLE. Mr. Chairman, I ask unanimous consent that I may proceed for five minutes.

The CHAIRMAN. Is there objection. [After a pause.] The Chair hears none.

Mr. TRIBBLE. The Secretary of the Navy asked the Naval Committee for 24 welfare secretaries. He said, in part:

> I would not advise any rank for chaplains or any other religious officers or workers; but it is a condition, and having had this rank a long time, I do not wish to make any recommendation for a change. I think there is very great need on our ships of young men—young men who are interested in religion and what you call social welfare. I believe that in this work the young man would help us tremendously in the educational policy. I do not want him to have any status and I do not want him to have any pensionable rights. I do not expect him to stay permanently.

Why was not this request granted? The secretaries were not granted the Secretary of the Navy. I did not desire to discuss this issue, but gentlemen insisted upon forcing it on me. I will not express any opinion, but read you the record which others made and is printed as part of the proceedings of this House. From page 352 of the hearings I will read you the following letter:

> CARDINAL'S RESIDENCE,
> 408 NORTH CHARLES STREET,
> *Baltimore, January 15, 1914.*
>
> Rev. LEWIS J. O'HERN, C. S. P.,
> *Apostolic Mission House, Washington, D. C.*
>
> MY DEAR FATHER O'HERN: As our representative in matters pertaining to Army and Navy chaplains, may I ask you to personally call on the members of the Committee on Naval Affairs, both of the Senate and the House of Representatives, and urge upon them the necessity

of more chaplains for the Navy? Explain to them that the proposed scheme of substituting "welfare secretaries" for chaplains does not meet with the approval of the American Catholic archbishop, since no laymen can do the work of an ordained clergyman.

Most faithfully, yours, in Xt.

J. CARDINAL GIBBONS,
Archbishop of Baltimore.

Mr. PADGETT. Will the gentleman yield?

Mr. TRIBBLE. No, sir; I will not yield until I read this. I am reading from the hearings, and this House has the right to know what goes on in the Committee on Naval Affairs.

Mr. PADGETT. Certainly; and I invite it, but I wanted to ask the gentleman, if he will permit me at this point——

Mr. TRIBBLE. I can not yield; the gentleman can state it when I have concluded. On page 356 I will read again:

Mr. BRITTEN. The service that is given or rendered aboard ship is practically the same irrespective of the religious denomination of the chaplain?

Father O'HERN. Well, no, sir; not entirely. At the morning service a Catholic priest would celebrate mass. That is our official form of divine worship, and all the Catholics would, I expect, be present at that. Whether others would come I am not prepared to answer, but there is held in the evening a general service, consisting of the singing of hymns and preaching.

Now, listen to what he says. Here is a man who speaks for the chaplains:

I presume that the character of this service is more or less determined by the chaplain.

It is not determined by the Naval Committee or the Navy Department or anybody else but the chaplain. He is an officer of rank and his command is law, and I say that this authority given to these chaplains is going too far. Mr. Chairman, the Constitution of the United States provides that every man can worship God in this country as he pleases. That is a privilege the Constitution gives him, and I say there should not be any encroachment upon that privilege. I read again on page 357:

Mr. BRITTEN. Will the gentleman yield for just one second?

Mr. TRIBBLE. When I read this, I will yield to the gentleman. Father O'Hern, continuing his testimony, submits a brief of the relative standing of several churches, and then the following appears, as stated in the hearings, page 357, as follows:

The CHAIRMAN. In the report of the Federal Council of the Churches of Christ in America in the quadrennial session assembled at Chicago December 9, 1912, on the point suggested, it says:

"We also believe that the providing of chaplains ought not to be treated as a mere matter of denominational proportion in an effort to distribute offices among the various Christian bodies, but rather in the interest of providing adequate moral influence and spiritual help."

Father O'HERN. According to the figures quoted above, the Catholic Church is entitled to a little more than 41 per cent of the religious leaders, and in a representative Government such as ours she should have something to say about the kind of religious leaders appointed.

Mr. BRITTEN. I merely desire to call attention to the fact that attendance at religious services is not compulsory on board ship. Our seamen or sailors do not have to go to mass unless they want to do so. They do not have to go to evening services unless they want to. It is entirely optional with them.

Mr. TRIBBLE. Well, I do not admit that.

Mr BRITTEN. If the gentleman will read the hearings, he will see.

Mr. TRIBBLE. I have been on these battleships where these chaplains are and I have been told the seamen are required to participate in certain religious formalities. I got my information from seamen aboard ship.

Mr. ROBERTS of Massachusetts. Will the gentleman yield?

Mr. TRIBBLE. I will not at this time. Gentlemen having heard the testimony as given in the committee and observing the fate of the recommendation of the Secretary of the Navy for 24 welfare secretaries and the substitution of 65 more chaplains will no doubt understand why I have called your attention to these facts I have placed before you shown by the record. The issue of division was raised as shown.

Mr. CALDER. How many has the Dutch Reformed Church got?

Mr. TRIBBLE. None. The Congregational Church has one, the Disciples of Christ has one, the Universalist has one, Catholic six, Episcopalian five, Methodist six, Baptist three, and Presbyterian one. I have called attention to the statement of Father O'Hern where he claims nearly half for his church.

Mr. O'SHAUNESSY. Will the gentleman yield?

Mr. TRIBBLE. I do.

Mr. O'SHAUNESSY. I merely wanted to ask the gentleman if the request of Father O'Hern was joined in by the other denominational representatives.

The CHAIRMAN. The time of the gentleman from Georgia has again expired.

Mr. O'SHAUNESSY. I ask that the gentleman be given five minutes. I have asked him a question.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. TRIBBLE. The hearings speak for themselves.

Mr. O'SHAUNESSY. What I wanted to get is this: The gentleman is calling attention to a specific part——

Mr. TRIBBLE. Is the gentleman asking me whether the representatives on the Naval Committee joined in asking that this provision be made, 41 per cent going to the Catholic Church? Is that the question? If so, I answer they did not.

Mr. O'SHAUNESSY. That is not what I am asking. I am asking if they made representations to the committee that religious exercises could be conducted better by the ministrations of ministers and priests rather than by these secretaries to whom the gentleman refers. That is what I wanted to know.

Mr. TRIBBLE. I do not think they did.

Mr. O'SHAUNESSY. I am not a member of the committee, but I would like to get that on the record now.

Mr. PADGETT. Will the gentleman yield to me at just that point?

Mr. TRIBBLE. Only three ministers testified before the committee. They all requested chaplains.

Mr. O'SHAUNESSY. Will the gentleman answer my question? I would like to have it cleared up.

Mr. PADGETT. Will the gentleman yield to me?

Mr. TRIBBLE. I will.

Mr. PADGETT. I want to state——

Mr. TRIBBLE. I yielded to you for a question and not for a statement, because you have your own time.

Mr. PADGETT. I will reply, then, in my own time.

Mr. BRITTEN. Will the gentleman yield for a question?

Mr. TRIBBLE. I will yield to the gentleman.

Mr. BRITTEN. Is it not a fact that all the religious denominations were represented before our committee during this entire hearing?

Mr. TRIBBLE. I do not know how many denominations were represented, quite a number of gentlemen were there, but only three spoke.

Mr. BRITTEN. Were not 7 or 8 or 10 of them represented?

Mr. TRIBBLE. I stated to the gentleman that I do not know, as only three were heard by the committee.

Mr. ROBERTS of Massachusetts. The gentleman is wrong. Bishop Laurence and others were heard.

Mr. LEVY. Will my colleague tell me if there were any Hebrews represented?

Mr. TRIBBLE. There were no Hebrews represented

Mr. LEVY. A large number of the sailors are Hebrews.

Mr. BRITTEN. There are but a few Hebrews in the Navy, and they are good men.

Mr. LEVY. I beg the gentleman's pardon. The first one killed in the Mexican trouble was a Hebrew.

Mr. TRIBBLE. Mr. Chairman——

Mr. BROWNING rose.

Mr. TRIBBLE. I yield to the gentleman from New Jersey [Mr. BROWNING].

Mr. BROWNING. I would like to ask my colleague if all the ministers that were present at that hearing were not opposed to the welfare secretaries?

Mr. TRIBBLE. I can not answer that question, because only three of them spoke there, and the spokesman seemed to be Chaplain Bayard, who has been stationed in the navy yard here for three years——

Mr. ROBERTS of Massachusetts. Will the gentleman yield just a moment?

Mr. TRIBBLE. Yes, sir.

Mr. ROBERTS of Massachusetts. I understood the gentleman to say that only two ministers spoke.

Mr. TRIBBLE. Three.

Mr. ROBERTS of Massachusetts. Did he include the Rev. Charles S. MacFarland as one of the three?

Mr. TRIBBLE. I think he was one of the three.

Mr. ROBERTS of Massachusetts. The Rev. Charles S. MacFarland is secretary of the General Council of the Church of Christ in America, representing 30 denominations.

Mr. TRIBBLE. I do not know.

Mr. ROBERTS of Massachusetts. He came before the committee representing a conference of the 30 denominations and the consensus of opinion of all these denominations on this matter of chaplains.

Mr. TRIBBLE. I will tell the gentleman that I have recently received a letter from my district, from one of the best preachers that I know, a young man who has been trying to get an appointment as chaplain in the Navy, and the response comes back that there is no place here for the denomination he represents—that there is no vacancy.

Mr. BRITTEN. Why does not the gentleman see the Secretary of the Navy?

Mr. TRIBBLE. I saw the Secretary of the Navy and wrote him several times.

The official rank proposed in this bill should not be granted to chaplains. They should have no official authority to command sailors to conform to the mandate of any religious creed, and every man should feel at perfect liberty to serve God according to the dictates of his own conscience. This House should guard with jealous care that religious right.

Mr. PADGETT. Mr. Chairman, this is a point of order, and it is all by unanimous consent, but I simply wanted to make one or two statements. At the time we had the hearings there were representatives of 31 Protestant denominations at the hearing and 1 Catholic. That is one subject on which the Catholic Church and the Protestant Church have all agreed, and this Federated Council of the Church of Christ in America, representing 31 denominations, passed, unanimously, resolutions indorsing this movement. And there have been more petitions and memorials that have come to the Committee on Naval Affairs on this subject than all other subjects combined. The number of chaplains in the Navy, 24, was established in 1842, and has not been increased until this day, and all over this country, from every denomination in the country, has come an insistent demand that the number of chaplains in the Navy should be increased in order to meet the moral and religious welfare in the Navy. And, in addition to that, every representative of all the churches, without exception, Catholic and Protestant, opposed the substitution of welfare secretaries for ordained ministers as chaplains in the Navy. There was not a single protest or exception to the establishment of the chaplains. There was a universal demand for them and there was a universal protest against substituting the welfare secretaries.

Mr. MURDOCK. How much is it possible for a chaplain in the Navy to get now, anyway?

Mr. PADGETT. Counting it when he reaches the highest grade, $5,000.

Mr. MURDOCK. How much under the new provisions?

Mr. PADGETT. It starts in at $2,000.

Mr. MURDOCK. And ends where?

Mr. PADGETT. It ends with the length of service and grades which they can reach. They can reach the grade of captain, but their pay is limited to that of a lieutenant commander, with longevity pay.

Mr. MURDOCK. That will be about $5,000?

Mr. PADGETT. Five thousand dollars after they reach the highest pay.

Mr. MURDOCK. So far as the pay is concerned, then, the maximum is about the same?

Mr. PADGETT. Yes, sir. We do not interfere with the pay; we just increase the number.

Mr. GOULDEN. How many years of service does it require to reach that maximum pay and rank?

Mr. PADGETT. Twenty years.

Mr. TRIBBLE. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. TRIBBLE. I will ask the gentleman if I did not try to avoid this fight, and did I not go to him yesterday afternoon after this section was passed over and ask the gentleman to refuse to go back to that section?

Mr. PADGETT. You asked me to refuse to go back to the section without your being in the Hall. As I saw you sitting there, I presumed you knew I was going on, and the presumption was verified.

Mr. LEVY. Mr. Chairman——

Mr. PADGETT. I can not waste any more time. Does the gentleman insist on his point of order?

Mr. TRIBBLE. I certainly do.

Mr. PADGETT. I ask the Chair to rule.

Mr. THOMAS. Mr. Chairman, I just came into the House, and I observed some of the Members seemed to be talking about religion. I have many times noticed that men usually talk most about that of which they know least. [Laughter.] The gentleman from Georgia [Mr. TRIBBLE] was speaking about Baptists in connection with the Navy. Well, the Navy, it seems to me, is a peculiarly appropriate place for a Baptist. [Laughter.]

Now, I do not think we ought to raise any excitement about this question of religion, because from my acquaintance with the Members of this House I believe there are very few Members here who could pass a civil-service examination in religion. [Laughter.]

Mr. TRIBBLE. Mr. Chairman, I call for the regular order.

The CHAIRMAN. The regular order is demanded by the gentleman from Georgia.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I desire to make a statement on behalf of the minority leader, the gentleman from Illinois [Mr. MANN].

The CHAIRMAN. A point of order has been made, and the regular order is demanded.

Mr. ROBERTS of Massachusetts. I wish to state, Mr. Chairman——

Mr. TRIBBLE. I will withdraw my demand for the regular order.

The CHAIRMAN. The gentleman from Georgia [Mr. TRIBBLE] withdraws his demand for the regular order.

Mr. ROBERTS of Massachusetts. Mr. Chairman, the minority leader, the gentleman from Illinois [Mr. MANN], had reserved a point of order on this paragraph. He desired me at the proper time to withdraw the reservation of the point of order. I wish to keep the RECORD straight in his behalf.

Mr. PADGETT. Mr. Chairman, I ask that the reservation be reserved for a moment. The gentleman from Mississippi [Mr. WITHERSPOON] wishes to address the Chair for a moment on the subject of the point of order.

Mr. HOBSON. Mr. Chairman, I would like to address the Chair if the gentleman from Mississippi does not do it now.

The CHAIRMAN. Does the gentleman from Mississippi [Mr. WITHERSPOON] wish to address the Chair now?

Mr. HOBSON. Mr. Chairman, I desire to point out the fact that the Navy is a God-fearing service. At Annapolis every cadet must go to church every Sunday. There is a chaplain who conducts services in the chapel, but there are squads of midshipmen who go out to the various churches in the town of Annapolis. They have their choice, but all must go to church every Sunday. More than three-fourths of all the midshipmen are members of the Young Men's Christian Association.

Chaplains go out to sea on cruises with midshipmen, and before sunset—at the time of sunset—no matter what the condition of the weather, all hands will be called; if it is good weather, all hands will be called on deck and prayers will be offered by the chaplain. If there is a chaplain on the ship, whether there are midshipmen or not, whether it is a midshipmen cruising ship or not, if there is a chaplain on the ship cruising at sea anywhere in the world at sunset all hands will be called together for prayers. The Navy never goes to sleep without saying its prayers.

Mr. LEVY. Mr. Chairman, will my colleague allow me a moment?

The CHAIRMAN. Does the gentleman from Alabama yield to the gentleman from New York?

Mr. HOBSON. In one moment. The deepest impression ever made upon me as a boy—I entered the service when I was not quite 15 years old, at the age of 14—was received on my first Sunday on a war vessel; it was on the *Constellation*, by the way, I will say to my colleague from Maryland, who is interested in the rehabilitation of that old vessel. If I remember correctly, we were at anchor near the capes of the Chesapeake. About 10 o'clock Sunday morning the boatswain's mate piped his whistle and called, "Lay aft port watch of afterguards and rig church!" They got out the little portable organ, erected a little altar, and arranged the camp stools with hymnals and prayer books. At 10.30 the bell began to strike slowly. It was the call to divine service, and officers, midshipmen, and enlisted men began to assemble aft. As the bell began to strike I saw the Stars and Stripes come down. It astounded me to see the national flag come down. No enemy had ever been able to make that flag come down from the peak. Then I saw another flag start up on the yardarm halyards. It had a blue cross on a white background. We call it the church pennant. It was hoisted to the yardarm. Then I saw the national flag start up again, this time on the yardarm halyards. It rose slowly, and then it stopped reverently, just beneath the church flag; and there it was flying during the whole service out there under the sky. I watched it all during that service, and the symbolism of the sight was engraven forever in my heart.

I have since then realized the significance; notably once, when I was on the deck of one of our ships in the harbor of Corfu, in the Mediterranean, with the first White Squadron, on the old *Chicago*, flagship of Admiral Walker, who was in command of the squadron. When I came up on deck before breakfast one day—it was a gala day ashore, a feast of the passover of the Greek Church—the flags were flying. Looking out I happened to notice a hoist of flags on the promontory on which stood the governor's palace. It was the official flagpole. There was a hoist of flags, practically of all nations, as it seemed, with the American flag about halfway up. There was the English flag and the French flag and the Italian flag. I counted several flags above ours, although ours were the only ships in the har-

bor. I felt a strange sensation. I did not know what to make of it. I knew that at that time our little Navy was the laughingstock of the civilized world, but I knew that the Nation it represented was not to be made light of, and I wondered by what precedent they were called upon there to put other flags of other nations, above ours, right in our teeth. At that point Admiral Walker came up on deck. It was his custom to take a little constitutional on deck before breakfast. He saw the scene before him and stopped, and his eyes finally fell on the governor's palace and then that hoist of flags. He was an old sea dog. I can see him now.

His brows began to knit; he took out his binoculars, leveled them on the hoist of flags to make sure, and then called over his shoulder down the gangway, "Bugler, call away the barge." Nobody ever heard of the barge being called away for an official visit at that time of the day. The barge's crew hurried aft to man the boat. Then he turned to his orderly—how well I can see him now as he said, "Orderly, tell the flag lieutenant to report to me on deck in full uniform at once." Soon the flag lieutenant came hurrying on deck with his sword dangling, and saluted. The admiral said to him, "Proceed ashore at once in the barge." Now, this was before breakfast. The governor was doubtless still fast asleep. It is against the precedents of official intercourse to call before 10 o'clock. He said, "Proceed ashore at once in the barge. Ask to see the governor yourself, in person, and tell him, with my compliments, that if he wishes to use that flag at all while my fleet is in his harbor he must hoist it at the top." [Applause.] There is no other flag under heaven, the emblem of human power, that may float above the Stars and Stripes. But there is a flag that does float above it every Sunday morning, and I can see our proud flag there, looking up in humility, seeking help and guidance and spiritual strength and fortitude from the flag of the cross above, a true symbol of our Navy, that inaugurated the ceremony, and of our Nation, that we are a God-fearing people; the greatest agency ever raised up by a kindly Providence for service and uplift of humanity—24 chaplains for fifty-odd thousand men are not enough for attending properly to the religious welfare of our citizens in the Navy. [Applause.]

Mr. TRIBBLE. Mr. Chairman, I call for the regular order.

The CHAIRMAN. The regular order is demanded by the gentleman from Georgia.

Mr. LEVY. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The regular order is demanded by the gentleman from Georgia. The gentleman from Georgia has made a point of order, and upon that he demands the regular order. The Chair sustains the point of order.

Mr. HEFLIN. Mr. Chairman, a great deal has been said during this discussion about expenditures and extravagance in the various departments. I believe that when we find a Government official who has been faithful and efficient, one who really practices economy in the department over which he presides, he is entitled to a word of praise instead of criticism at the hands of Congress.

The fact that I am a member of the Committee on Agriculture has brought me into close touch and intimate relationship with the Bureau of the Census, and I want to pay a deserved tribute to the head of that bureau, the Hon. William J. Harris, of Georgia. [Applause]. In the 10 years that I have served in this House no man has devoted himself more industriously, more intelligently and conscientiously to the duties of his office than has this able and courteous Chief of the Bureau of the Census. [Applause.] He has instituted more reforms for the benefit of the people than any department head that I know about in Washington.

When he assumed charge of the bureau in July, 1913, he found the work very much in arrears and the office force greatly demoralized. He reorganized the office on a business basis and increased the efficiency of the office force. He has made the bureau's publications of real service to the American people, and has placed the expenditures of that department upon the soundest economic basis ever known in the history of the department. [Applause.] The law had required that the Thirteenth Decennial Census be completed within three years. That period ended on June 30, 1912. One year later only 4 of the 12 volumes of the final report of the census had been published, and the annual report and permanent investigations were considerably behind.

Mr. Chairman, since he has assumed charge of the bureau, he has had completed seven of the remaining volumes of the final report of the Thirteenth Census, leaving only one unfinished, and that one will be ready for distribution some time during this month; so it will be seen that he has performed a great deal of work that belonged to his predecessor. Of the annual reports and the permanent investigations, he has issued reports on financial statistics of cities for 1912 and reports on mortality statistics for 1910, 1911, and 1912. In 10 months he has issued two delayed reports on one subject and three delayed reports on another. Not only that; he has issued thousands of bulletins, pamphlets, and circulars; the most popular of these is probably the pamphlet on the "Ravages of the Boll Weevil," which has a circulation already of more than 300,000 copies. One of the most important reforms that he has instituted is that of adding the names of more than a hundred thousand farmers and business men to the mailing list to receive publications in which they are vitally interested. He has inaugurated a great publicity bureau of valuable information for the American people. [Applause.] To the newspapers alone there have been issued over 230 press summaries, carrying a total of 255,000 copies, each summary reaching from 1,000 to 3,000 daily papers and 15 press associations, which in turn furnished it to more than 13,000 weekly papers.

Mr. Chairman, it takes two things to try out a man's fitness for public office—opportunity and responsibility. And here is a man who has utilized his opportunity to the utmost and has measured up to the highest requirements of the responsible position that he holds. [Applause.] His rearrangement of the whole work and organization of the force under him has made possible promptness in the issuance of publications in which the people are greatly interested. Reports on mortality statistics and the reports on financial statistics of cities, about two and a half years behind, have been brought up to date. The reports on street railway, electric power and light stations, and telephones and telegraphs, which were made every five years and formerly issued from two to three years after securing the data, will now appear in final reports in less than one and a half years after the beginning of the work. [Applause.] The inquiry on wealth, debt, and taxation, which is taken decennially, cost approximately $275,000 10 years ago and was carried on over a period of from 3 to 5 years, the final report not being issued until about 5 years after the work began.

The present investigation began November 1, 1913, and the first bulletin on the subject will be issued in this month and the final report for the entire United States will be ready for distribution before the end of the present year. Its cost will be approximately one-third of what it was 10 years ago. [Applause.] Much of the work heretofore done by agents in the field he is now having done in the office by the use of printed reports made for cities, counties, and States, and on this one piece of work alone he will save to the people thousands of dollars.

When he took charge of the bureau he found on the rolls of the machine shop a lawyer drawing $3,000 per annum. There was no record in the office to show that this lawyer had given any time or attention to the service of the bureau for two or three years past. Something happened to this man. Mr. Harris immediately dropped his name from the pay roll. [Applause.] He found an expert special agent at $8 per day, a gentleman residing in New York City and engaged in other business, to which he devoted his time, and he, too, was dropped from the roll, and the work that he was supposed to be doing has been completed by the regular office force. He has made the Bureau of the Census a real serviceable institution. He is giving the people the benefit of valuable information gathered by him and his office force. For instance, a census of manufactures is taken every five years. The next one covers the calendar year 1914 and will be taken shortly after the 1st of January, 1915. In order to interest the manufacturers in this census, which will probably be the most important census of manufactures ever taken, he has visited manufacturers' associations, chambers of commerce, and boards of trade in a number of cities throughout the country, thus obtaining the information at first hand and impressing the people with whom he came in contact with his desire to be of service to them. It is no wonder that he has secured the cooperation of the manufacturers of the country for the forthcoming census. The law provides for a census of agriculture to be taken in the fall of 1915, and he has already taken up the preliminary work with the leading agriculturists of the country. By correspondence and by conferences he is interesting the farmers in the forthcoming census in order to secure their cooperation, and I make the prediction that this census of agriculture will be the best ever reported by the Census Bureau. [Applause.] He is rendering valuable service to the cotton producers of the South in various ways.

He has raised the number of cotton reports to 27 during the year, and these reports now cover cotton production, cotton

distribution, and cotton consumption—valuable information for all persons interested in cotton.

Mr. Chairman, he has instituted one reform that has been worth millions of dollars to the cotton producers during the last cotton-selling season, and that is the separation of the report of linters from the report of cotton ginned. Heretofore the reports have read, for instance, thirteen and one-half million bales, including linters, and not one man in a thousand would stop to think that linters were anything else but cotton. The bear speculators used the amount of linters, counting it with cotton ginned, to confuse the public and depress the price of cotton, and they succeeded to the great injury of the cotton producers. For the first time in the history of the Census Bureau linters are not reported with the amount of cotton ginned, and when you see now a report coming from that bureau of so many bales of cotton ginned you may know that it is cotton and not linters. [Applause.] We produce from six hundred and fifty to seven hundred thousand bales of linters per year, and this stuff has no more right to be placed in the column with cotton ginned than seconds, shorts, and bran have to be placed in the column with flour in sacks or barrels.

I had the honor of calling this much-needed change to his attention, and he did not parley about it or dally with it. He instituted it, to the everlasting good of the cotton producers of the South. [Applause.] If he had done no more during his term of office than this for the farmers of the South, he would be entitled to the lasting gratitude of our people. [Applause.]

He has given wide publicity to these cotton reports by adding to the mailing list thousands of farmers in every section of the cotton belt, having these reports to show the information not only by States but by counties, and this information is now given to the local press. In his efforts to carry this information to those most vitally interested—the cotton producers themselves—he has the reports on cotton production, cotton consumption, and cotton distribution printed on large cards and posted in all the local post offices throughout the cotton belt. Through his pamphlet on the Ravages of the Boll Weevil he has called the attention of the cotton producers of Alabama, Georgia, and the Carolinas, as well as those in the other Southern States, to the subject. The States mentioned, with the exception of a portion of Alabama, have not yet been affected by the ravages of the boll weevil, and through this pamphlet he is reaching the producers of cotton in order that they may be prepared to meet this cotton pest in advance of his arrival. He has already aroused interest among the farmers, and in many places they are organizing to intelligently combat the boll weevil. This publication alone will greatly benefit the cotton producer of the South. He has compiled important data for the tobacco producers of the country, and is issuing reports that will be of service to them.

All this has been accomplished in the 10 months that he has been at the head of this department. [Applause.] The reforms that he has instituted and the economy that he has practiced in the department over which he presides stamp him as a man of keen foresight and extraordinary business ability. [Applause.] He has demonstrated that a Government bureau operating a large office force and controlling large expenditures of money can be operated on a business basis. He has converted this mighty machinery of the Government into a tremendous agency for good to the American people. [Applause.]

The trouble with many of the departments has been that the head or chief is unknown to and out of touch and sympathy with the working force under him. This charge can not be laid at the door of the Director of the Census Bureau. He has set a worthy example for officials in the various departments, for he has come in personal contact with the hundreds of men and women working under his direction for the Government of the United States. One of his first acts was that of a big-hearted, manly man. He held a public reception and met every employee of the bureau, from the humblest to the highest. He told them that he wanted their friendly interest, cooperation, and efficient service, and assured them that he felt a keen interest in all of them and stood ready to hear any complaint that they from time to time had to make. [Applause.] He urged them to be courteous and kind in their treatment of one another, and he informed some of the near topers that if they drank during work hours or came in with whisky on their breath they would be punished and ultimately discharged. This order was not only good for the service but has proven beneficial to the men themselves. He immediately gave to the old soldiers and their widows employed in the service new sanitary desks and chairs, and so grateful were the veterans, Federal and Confederate, that they sent a committee to express to him their thanks for his consideration and kind treatment of them.

When he came in office the man over 60 years of age could not serve as a gin reporter. That order eliminated almost entirely all ex-Confederate soldiers. He has abolished that order so that the Confederate soldiers could seek and fill those positions if they desired. [Applause.]

He is rendering the highest order of public service and is entitled to have Congress say of him, "Well done, thou good and faithful servant." [Applause.]

Mr. LEVY. Mr. Chairman, I rise for the purpose of asking my colleague from Alabama [Mr. HOBSON] if it is not the custom, the rule, and the regulation of the United States Navy for the captain of a ship to conduct service regularly every Sunday and to preside at any religious service?

Mr. HOBSON. I would not state absolutely what the practice is now, because it has been several years since I was in the service.

Mr. LEVY. But it was so in the old days?

Mr. HOBSON. In the early days, when there was not a chaplain on board, the captain did conduct the service, and he does preside now; but whether all the captains conduct service every Sunday I can not say.

Mr. LEVY. I think it is a proper regulation to do so.

Mr. HOBSON. I know the captain is authorized to conduct the service. Whether it is compulsory or not is the question.

The Clerk read as follows:

BUREAU OF STEAM ENGINEERING.

Engineering: For repairs, preservation, and renewal of machinery, auxiliary machinery, and boilers of naval vessels, yard craft, ships' boats, and air craft; repairs, preservation, and renewal of electric interior and exterior signal communications and all electrical appliances of whatsoever nature on board naval vessels, except range finders, battle order and range transmitters and indicators, and motors and their controlling apparatus belonging to other bureaus; maintenance of coast signal service, including the purchase of land as necessary for sites for radio shore stations; equipage, supplies, and materials under the cognizance of the bureau required for the maintenance and operation of naval vessels, yard craft, ships' boats, and air craft; purchase, installation, repair, and preservation of machinery, tools, and appliances in navy yards and stations; pay of classified force under the bureau; incidental expenses for naval vessels, navy yards and stations, inspectors' offices, the engineering experiment station, such as photographing, technical books and periodicals, stationery, and instruments; instruments and apparatus, supplies, and technical books and periodicals necessary to carry on experimental and research work in radiotelegraphy at the naval radio laboratory: *Provided*, That the sum to be paid out of this appropriation, under the direction of the Secretary of the Navy, for clerical, drafting, inspection, and messenger service in navy yards, naval stations, and offices of United States inspectors of machinery and engineering material for the fiscal year ending June 30, 1915, shall not exceed $650,000: *Provided further*, That the sum to be paid out of this appropriation for the purchase of land for sites for radio shore stations shall not exceed $50,000: *Provided further*, That the total expenditures under this appropriation at the naval radio laboratory shall not exceed $5,000.

In all, engineering, $8,080,000.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order to the paragraph. I notice in this there is a limit of cost on the amount that may be expended by the department for radio shore stations, $50,000.

Mr. PADGETT. Yes; that is carried every year.

Mr. STAFFORD. The proviso was not carried last year, was it?

Mr. PADGETT. Yes.

Mr. STAFFORD. Will the gentleman kindly inform the House as to the extent the department has availed itself of this appropriation to purchase stations for radio communication?

Mr. PADGETT. I do not know that I can state. They did not purchase anything last year.

Mr. STAFFORD. How many radio stations has the service?

Mr. PADGETT. Shore stations? I do not know. Every navy yard has one, and then they have one on the Pacific coast, one at Alaska——

Mr. STAFFORD. One on the Isthmus?

Mr. PADGETT. Yes; and one at Fort Myer. They have a small one at Panama, but the Panama station will be one of the six provided for in the world belt radio stations that was authorized several years ago.

Mr. STAFFORD. Under that authorization, just what is contemplated?

Mr. PADGETT. Several years ago there was an authorization for a station at Panama, one on the California coast, one at Hawaii, one at the Philippines, and one at Samoa, but they are accomplishing so much better results now and reaching so much farther that Admiral Griffin told me the other day that he thought they would be able to dispense with the one in Samoa; that they could reach across that intervening distance to the Philippines without it.

Mr. STAFFORD. Has not the Navy Department some general plan as to the establishment of radio stations at certain places along the coast and the Gulf?

Mr. PADGETT. Yes; that covers the entire Gulf and the country.

Mr. STAFFORD. That is the complete plan, so far as the continental United States is concerned?

Mr. PADGETT. Yes.

Mr. STAFFORD. Now as to a few minor matters. I notice there has been some change in the phraseology for renewals of machinery, and so forth.

Mr. PADGETT. That occurs on account of the transposition of language from the Bureau of Equipment and incorporated into this bill.

Mr. STAFFORD. I assume that repairs have always taken place in the navy yards for machinery, and so forth.

Mr. PADGETT. Yes. They were under the Bureau of Equipment, and in the distribution we have placed them here.

Mr. STAFFORD. Mr. Chairman, I withdraw the point of order.

Mr. PADGETT. Now, Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amend, page 37, line 19, after the words "air craft" and before the word "repairs," by inserting the following: "distilling and refrigerating apparatus."

Mr. STAFFORD. I suppose that is for the purpose of repairing the refrigerating apparatus that all modern ships have.

Mr. PADGETT. Yes; it should have been incorporated, but in the transposition of the language it was overlooked.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was agreed to.

Mr. PADGETT. I offer the following amendment.

The Clerk read as follows:

Amend, page 37, line 24, after the word "apparatus" and before the word "belonging," by inserting the following: "used to operate machinery."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

The unobligated and unexpended balances of appropriation "Steam machinery" for the fiscal years 1912 and 1913, not exceeding in amount $250,000, which were made available by the act of March 4, 1913, for the development of a heavy-oil engine for one of the fuel ships provided by that act, shall be considered available for that purpose until expended.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. PADGETT. I will explain to the gentleman. Last year there was an appropriation made available on the unexpended balances not to exceed $250,000 for the purpose of developing what is known as the Diesel engine. That is an internal combustion engine. They are at work upon that now, but will not be able to complete the work within the period of the fiscal year. The chief of the bureau, Admiral Griffin, was not prepared to say whether or not it would lapse or would be a continuing appropriation, and in order to be sure of it this language was inserted in the bill.

Mr. STAFFORD. Will the gentleman inform the committee why it should remain available until expended?

Mr. PADGETT. It may not be completed in another year. They are developing the Diesel engine in the New York Navy Yard, and $250,000 of unexpended balances from the steam engineering appropriation that had been saved up to year before last was made available last year.

Mr. STAFFORD. How much of that amount is now available?

Mr. PADGETT. Two hundred and fifty thousand dollars was appropriated last year, and they have not been able to complete the work, and will not be able to during the present fiscal year.

Mr. STAFFORD. Will they not during the forthcoming fiscal year?

Mr. PADGETT. By 1916. This is the engine where the oil will be ignited inside of the engine, dispensing with water.

Mr. STAFFORD. I have no objecton, if the gentleman will limit it to the end of the fiscal year 1916.

Mr. PADGETT. I will move to amend.

Mr. STAFFORD. I will withdraw the point of order.

Mr. PADGETT. Mr. Chairman, I move to strike out the word "expended," line 8, page 39, and insert the words "June 30, 1916."

The CHAIRMAN. The question is on the amendment.

The amendment was considered and agreed to.

The Clerk read as follows:

The Bureau of Equipment of the Navy Department is hereby abolished, and the duties assigned by law to that bureau shall be distributed among the other bureaus and offices of the Navy Department as herein provided, and all available funds heretofore appropriated for that bureau and such civil employees of that bureau as were heretofore authorized by law are hereby assigned and transferred to the other bureaus and offices as herein provided: *Provided*, That nothing herein shall be so construed as to authorize the expenditure of any appropriation for purposes other than those specifically provided by the terms of the appropriations heretofore and herein made.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph. I am entirely in sympathy with this unusual recommendation for the merging of some bureau and which will result undoubtedly in economy, but I am quite concerned as to the provision that makes available the funds that have heretofore been appropriated for the bureau.

Mr. PADGETT. No; it says that they shall not be used for any other purpose than that for which they were appropriated.

Mr. STAFFORD. But it makes available for the various branches of the service funds formerly available in the Bureau of Equipment.

Mr. PADGETT. Exactly.

Mr. STAFFORD. In the case of a resolution which was passed through the House the other day with reference to New Orleans, it made available appropriations running back nearly 20 years, and there may be some funds available for this bureau running back that length of time.

Mr. PADGETT. The gentleman is mistaken about that. The appropriation to which the gentleman referred was along back in 1904; it was not 20 years.

Mr. STAFFORD. I thought it was 1884; I was mistaken.

Mr. PADGETT. This does not affect that. The only effect and purpose of this is to abolish a bureau and allows this distribution of funds that are available, but it does not change their status. This simply means that what we appropriated for the Bureau of Equipment last year can be used by these bureaus during the balance of this year, and still they are available as though they had been appropriated.

Mr. STAFFORD. I understand from the gentleman's statement there are no available funds applicable to this bureau of prior years—that it is only the present fiscal year?

Mr. PADGETT. If there are any, they would not be affected by this.

Mr. STAFFORD. Oh, yes; they would be affected, because it says all available funds heretofore appropriated.

Mr. PADGETT. They would have to be available. It says "all available funds." If they are not available, they would not be affected; and if they are made available one year for expenditure or two years for contract obligations, they would not be available and would go back into the Treasury.

Mr. STAFFORD. Then I have the assurances of the chairman there are no funds older than two years which would be available?

Mr. PADGETT. That is my understanding.

Mr. STAFFORD. Mr. Chairman, then I have no objection. I withdraw the point of order.

Mr. GOULDEN. Mr. Chairman, I move to strike out the last word merely to obtain a little information. The abolition of the Bureau of Equipment is intended, I take it, in the interest of economy.

Mr. PADGETT. Yes.

Mr. GOULDEN. And tends to greater efficiency in the service?

Mr. PADGETT. Yes.

Mr. GOULDEN. There are too many of these bureaus now, perhaps, in the Navy Department——

Mr. PADGETT. I would not say there are too many in the Navy Department now, but for several years they have been in conflict, and several years ago we reported a provision in the bill authorizing the distribution of these duties, and there has been no chief of the Bureau of Equipment.

Mr. GOULDEN. And these other bureaus have been exercising these powers and functions of the Bureau of Equipment?

Mr. PADGETT. And we allowed that to run along for several years until it could be wisely and properly adjusted, and now we are making it legal.

Mr. GOULDEN. In the present crisis or threatened crisis the abolishment of the Bureau of Equipment will not affect injuriously the Navy Department?

Mr. PADGETT. No, sir; it simply legalizes permanently what has been done for two years.

Mr. GOULDEN. Thank you.

Mr. MURDOCK. Does the gentleman contemplate going ahead this afternoon?

Mr. PADGETT. I am only going to the item of "Increase of the Navy." I want to finish these matters about which there

is no dispute, but when we get to the increase of the Navy, where there will be a controversy——

Mr. MURDOCK. I suppose the gentleman recognizes that there is a constantly diminishing attendance here?

Mr. PADGETT. Yes, sir.

Mr. MURDOCK. And it is getting rather thin.

Mr. PADGETT. I hope that these matters which are merely pro forma may be concluded. When we get to a matter where there is controversy, then I will move to rise.

Mr. GOULDEN. The gentleman realizes that there is a baseball game this afternoon.

Mr. MURDOCK. The gentleman from New York speaks of a baseball game. I do not know whether that has anything to do with this or not, but there is virtually no attendance here this afternoon

Mr. BARTLETT. The same old crowd here, about what we have had for 20 years.

Mr. STAFFORD. Mr. Chairman, I object to the use of the language "old" by the gentleman from Georgia.

Mr. BARTLETT. I apply it to myself, and it would be true.

Mr. GOULDEN. Then the gentleman can strike out the word "old."

The Clerk read as follows:

One sword master, $1,600; 1 assistant, $1,200; and 2 assistants, at $1,000 each; 2 instructors in physical training, at $1,500 each; and 1 assistant instructor in physical training, at $1,000; and 1 instructor in gymnastics, $1,200; 1 assistant librarian, $2,160; 1 cataloguer, $1,200; and 2 sheif assistants, at $900 each; 1 secretary of the Naval Academy, $2,400; 2 clerks, at $1,500 each; 4 clerks, at $1,200 each; 4 clerks, at $1,000 each; 4 clerks, at $900 each; 2 clerks, at $840 each; 1 draftsman, $1,200; 1 surveyor, $1,200; services of organist at chapel, $300; 1 captain of the watch, $924; 1 second captain of the watch, $828; 22 watchmen, at $732 each; 3 telephone switchboard operators, at $600 each. In all, pay of professors and others, Naval Academy, $118,556.

Mr. MURDOCK. Mr. Chairman, I move to strike out the last word. I want to ask the chairman of the committee a question.

Mr. PADGETT. Yes, sir.

Mr. MURDOCK. Is not that a rather small amount to pay for the services of an organist, only $300?

Mr. PADGETT. He is the leader of the band and this is supplemental pay for this special service.

Mr. MURDOCK. I was going to suggest you can not get an organist anywhere else at the rate of $300 a year.

Mr. PADGETT. This is simply additional pay for this additional service. He is leader of the band and gets his regular pay as leader of the band and this is supplemental thereto.

Mr. MURDOCK. I am glad to hear that. Now, I want to ask the chairman what does a sword master do?

Mr. PADGETT. He is instructor in fencing and in physical exercises and the development of the physical training of the young men.

Mr. MURDOCK. My understanding is that a sword as an implement of war is practically obsolete.

Mr. PADGETT. Well, that may be, but they accustom these young men to the handling of it, and it is used in the physical development of these young men.

Mr. MURDOCK. I thank the chairman.

The Clerk read as follows:

Commissary department: One chief cook, $1,200; 4 cooks, at $600 each, and 8 assistants, at $300 each; 1 steward, $1,200, and 1 assistant, $600; 1 head waiter, $720, and 2 assistants, at $480 each; 2 pantrymen, at $420 each; 1 chief baker, $1,200; 1 baker, $600; 2 assistants, at $540 each, and 1 assistant, $420; necessary waiters, at $16 per month each, $13,440; 1 messenger to the superintendent, $600; 27 attendants, at $300 each; in all, $35,760.

Mr. TRIBBLE. Mr. Chairman, I ask unanimous consent for the privilege of extending my remarks in the RECORD.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. MURDOCK. Mr. Chairman, I move to strike out the last word. I am curious to know from the chairman of the committee how the four assistant cooks can live on $300 a year. Do they get this in addition to something else?

Mr. PADGETT. I think they get their maintenance, but I am not sure. I suppose they do. They get their food.

Mr. MURDOCK. They are supplied with food; and is that all they get?

Mr. PADGETT. There have been no complaints from them. It is the usual amount that has come up, and there has been no complaint about it.

Mr. MURDOCK. Does the gentleman think that matter of providing each one of these men in this item with provisions, subsistence, is applicable to all the people mentioned in this item?

Mr. PADGETT. Yes, sir.

Mr. MURDOCK. It must be. That is the smallest lot of salaries I have ever seen carried in a Government bill.

Mr. PADGETT. They all get their subsistence there at the academy.

Mr. MURDOCK. There is an assistant baker, at $540. It would be impossible in private employ to get men at these figures.

Mr. PADGETT. It is what these men have been getting for some time. There is no complaint about it. They are satisfied. They get their subsistence there, and are well cared for.

Mr. MURDOCK. Are they mature men?

Mr. PADGETT. I could not tell you. Most of them are colored men.

Mr. FOWLER. Mr. Chairman, will the gentleman from Kansas yield?

Mr. MURDOCK. Certainly.

Mr. FOWLER. I desire to ask the gentleman if it is not a fact that through all of these appropriation bills labor is paid a very poor wage?

Mr. MURDOCK. I will say to the gentleman from Illinois that it is. And in a former Congress, or in the first session of this Congress, we succeeded in raising the salaries of laborers in the Post Office Department from $600 to $620, you will remember?

Mr. FOWLER. Yes.

Mr. MURDOCK. I would like to have seen it go higher. I think a salary of $300 a year in the present condition of affairs is almost unspeakable, and I do not understand how individuals live upon it.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The unexpended balance of the appropriation for dairy, Naval Academy, Annapolis, Md., contained in the naval appropriation act approved March 4, 1913, is hereby made available for expenditure during the fiscal year ending June 30, 1915.

Mr. TRIBBLE. Mr. Chairman, I make a point of order against lines 14 to 19.

Mr. PADGETT. I did not catch the gentleman's point of order.

Mr. TRIBBLE. I make the point of order on the language embraced between lines 14 and 19. I reserve it.

Mr. PADGETT. The gentleman will remember that last year we made an appropriation for the enlargement of the dairy at Annapolis for the furnishing of milk and butter to the eight or nine hundred students there, and that is being carried out. They were fearful they could not get it all done during the fiscal year, and this is simply to make that available. It is not an additional appropriation.

Mr. TRIBBLE. The gentleman will recall, too, that I made the point or order on the floor of this House, and that this went out. Then it went to conference, and it was brought back to this House in the bill and became law in conference.

Mr. PADGETT. It went in in the Senate.

Mr. TRIBBLE. With the consent of the conferees of the House. It did not do any good to knock this out on the point of order, for it went to conference and came back here in the bill, with the consent of the chairman of the Committee on Naval Affairs.

Mr. PADGETT. That does not prevent the Senate from legislating on it, and if they put it in it is in the bill just as if the House put it in, and then it is a matter of agreement between the two Houses. The conferees do not put anything in the bill. It is only a matter of agreeing to what shall stay in of what the other body puts in.

Mr. TRIBBLE. If the gentleman will look over the bill that went to the conferees a year ago, he will see how many things were knocked out on a point of order. They nearly all came back here. And I take the position that the conferees of this House, when these matters go out of this bill, should stand for the action of the House.

Mr. PADGETT. But the point of order is only the action of one man. It is not the action of the House, and you will find that whenever the House has voted on a proposition the conferees have stood steadfastly for it.

Mr. TRIBBLE. But the Naval Committee has no right to come in here and legislate on anything they please, and the House has no right to make——

Mr. PADGETT. But the gentleman takes the position that the objection of 1 man out of 435 is the action of the House.

Mr. TRIBBLE. The House is just wasting its time arguing these points of order.

Mr. TALBOTT of Maryland. I hope the gentleman will not insist on the point of order. This money is as well expended for the health and comfort of the cadets and the institution as any other money that is appropriated. Before this dairy was established they had an epidemic of typhoid fever at the academy. Since they have been producing their own milk and

have their own plant, not only the fever but other diseases have disappeared, and it is purely a sanitary measure for the health and comfort of the students and the people at that institution.

Now, it may go out on your point of order, but I hope you will not insist on it.

Mr. HOBSON. Mr. Chairman, I join with my colleague from Maryland in requesting the gentleman from Georgia not to do this.

Mr. TALBOTT of Maryland. It is the best legislation for the health of that academy that was ever proposed in this House.

Mr. TRIBBLE. I have opposed this proposition from the beginning, because I take the position that the Naval Academy has no right to go into the farming business in competition with the farmers of Maryland and other parts of the United States.

Mr. TALBOTT of Maryland. The farmers do not object.

Mr. TRIBBLE. The farmers of Maryland have not been heard from.

Mr. TALBOTT of Maryland. Oh, yes, they have. I live in Maryland. The farmers do not object.

Mr. TRIBBLE. There are 178 naval officers at the Naval Academy at the present time. There are about 50 additional professors there. There are over 200 men stationed at the Naval Academy, and this is an effort to create other places and station other naval officers there and give them a land job, instead of going to sea, where they ought to be.

Mr. TALBOTT of Maryland. I hope the gentleman will not insist on his point of order.

Mr. HOBSON. Will the gentleman permit me to point out that the dairy down there would not provide for any additional commissioned officers, not even warrant officers?

Mr. PADGETT. It is not money appropriated by the Government, at any rate. It is taken out of what is called the mess fund, and the money goes back into the Treasury of the United States eventually, at any rate.

Mr. TRIBBLE. Who pays the mess fund?

Mr. TALBOTT of Maryland. They are allowed a mess fund, and the boys pay it, and it goes out of the mess fund, and the law authorizes the purchase of this property for the dairy farm.

Mr. TRIBBLE. Considering the statement of the gentleman from Maryland [Mr. TALBOTT], I withdraw the point of order.

The CHAIRMAN. The Chair is of the opinion that the item is not subject to a point of order anyway, and the Clerk will read.

The Clerk read as follows:

Hereafter in addition to the appointments of midshipmen to the United States Naval Academy as now prescribed by law, the Secretary of the Navy is allowed 25 appointments annually from the enlisted men of the Navy who are citizens of the United States and not more than 21 years of age on the date of entrance to the Naval Academy, and who shall have served not less than two years as enlisted men on the date of entrance: *Provided*, That such appointments shall be made in the order of merit from candidates who have passed such physical and such competitive mental examinations as the Secretary of the Navy shall prescribe: *And provided further*, That no mental examination other than the aforesaid competitive examination shall be a requirement for their entrance to the Naval Academy.

Mr. TRIBBLE. Mr. Chairman, I make a point of order on that.

Mr. PADGETT. If the gentleman insists upon it, it is subject to a point of order, Mr. Chairman.

Mr. STAFFORD. Mr. Chairman, will the gentleman from Georgia reserve his point of order for a moment?

Mr. TRIBBLE. I will reserve it.

Mr. STAFFORD. Because if the item is going to be reinserted in another body, it is only owing to the Members of this House that the proponents of this measure should define their position in incorporating it on this bill.

Mr. PADGETT. I shall be very glad to state to the gentleman that it is recommended by the department and that it is intended to open the doors to enlisted men. We have something like 51,000 enlisted men in the Navy, and this is a proposal to allow the Secretary of the Navy, upon competitive examinations each year, to name 25 of these young men to go to the academy and take the course there, so that they can have an opportunity thrown open to receive a commission and official rank in the Navy.

Mr. TRIBBLE. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. TRIBBLE. I thought I had the floor.

The CHAIRMAN. The gentleman from Georgia is recognized.

Mr. TRIBBLE. Mr. Chairman, the reason I make a point of order upon this item is this: I hold in my hand a copy of the Naval Register for the year 1913. There were 102 resignations from the Navy in that year. There were retired on salary 68. In all, Mr. Chairman, there were retired from the Navy 177 men in one fiscal year. This bill provides for 25 boys to be appointed by the Secretary of the Navy annually.

It is time for this House to consider before creating another avenue to get into the Navy. We educate young men for the Navy, expecting them to defend those who educate and pay their salaries, and yet they are retired to the common walks of life after they secure an education, where they compete with other boys who have never had an opportunity to get an education, and they have the additional advantage of a big salary paid by the Government. Is it not time to stop and think before you open other avenues for that kind of thing? Is it not better to close avenues by which 68 men are retired annually on a salary paid by the people of the United States?

I made a point of order here last year to an item of this character, and I call the attention of the House and the attention of the gentleman from Wisconsin [Mr. STAFFORD] again to that fact. I made a point of order last year on an item which provided that each congressional district should have two appointments to the Naval Academy instead of one. I eliminated it from the bill, but the conferees put it back into the bill and it came back here, and it is the law to-day.

I want to know what is the use of a Member of this House making points of order and cutting out of this bill legislation when the conferees appointed by the House reinsert such items stricken out and nullify our act in a conference report? One year ago the number of cadets was doubled by legislation. I opposed it and struck it from the bill, but the conference committee reinserted it and made a law creating two cadets from each congressional district, thus opening an avenue to flood this country with more retired officers.

I want to call your attention to the fact that there are now 1,045 retired officers of the Navy on salaries ranging from $3,000 to $9,000 a year.

Join me, Mr. Chairman and Members of this House, and let us repeal the plucking board. Let us stop this practice of retiring young and able officers on a salary paid by your constituents and my constituents, instead of creating new avenues to make more officers to be retired. This is another innovation. A year ago the conferees put back the item against the will of this House and gave two for each district. Now they come here and ask us to increase that number and make it 25 more annually. Besides, Mr. Chairman, the membership of the House has been increased. Where will this thing stop?

Mr. BARTON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Georgia yield to the gentleman from Nebraska?

Mr. TRIBBLE. Yes.

Mr. BARTON. The gentleman said officers were turned out "in their young manhood."

Mr. TRIBBLE. Yes; in their young manhood.

Mr. BARTON. Are these men retired at an age less than that prescribed by law?

Mr. TRIBBLE. I say to you that the plucking board has retired officers under 30 years of age. I can give the names of them—men who did not want to be retired, and who wanted to remain in the Navy and serve their country.

Mr. BARTON. What was the reason given?

Mr. TRIBBLE. Because they have so many in the service they say it stops the natural flow of promotion, thereby preventing officers from rapidly reaching the highest ranks in the line of promotion. The rank of admiral and captain carry larger salaries than lieutenants. They are all struggling to get to the top, so there must be a plucking board or some method of eliminating many of those contesting for promotion. There are not enough ships for them all to get a command, and this plan of elimination has been tolerated by this House because the Members do not understand it. There should be some regulation whereby men who are better fitted for promotion should receive it without having to retire young, able-bodied men, who have been educated for the service and are anxious to serve.

Mr. PADGETT. Mr. Chairman, does the gentleman insist on his point of order?

Mr. TRIBBLE. I do.

Mr. PADGETT. I concede it is subject to a point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

For pay of officers prescribed by law, on the retired list: For 2 major generals, 5 brigadier generals, 7 colonels, 7 lieutenant colonels, 10 majors, 18 captains, 13 first lieutenants, 4 second lieutenants, and 1 paymaster's clerk, and for officers who may be placed thereon during the year, including such increased pay as is now or may hereafter

be provided for retired officers regularly assigned to active duty, $186,492.50.

Mr. PADGETT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Tennessee [Mr. PADGETT].

The Clerk read as follows:

Amend, page 45, line 9, by striking out the word "two" and inserting in lieu thereof the word "three"; and, on the same page and line, strike out the word "five" and insert in lieu thereof the word "four."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. STAFFORD. Mr. Chairman, in this connection I notice that this is for pay of retired officers of the Marine Corps. It is increasing each year, and I assume it will continue to increase. Is there any set ratio that the committee has at its command or that has been presented to the committee that will determine how rapidly this retired fund for officers increases?

Mr. PADGETT. There is no way that I know. That is only a mathematical calculation. This depends on how many reach the age of 62 years and how many die.

Mr. STAFFORD. Our fund for retired officers of the Marine Corps increases naturally as the years go by and as the members in the service increase. It is mounting up rapidly at this time. I will ask the gentleman, in connection with the next paragraph, how many enlisted men are in the Navy and in the Marine Corps?

Mr. PADGETT. There are 51,500 enlisted men in the Navy, and about 10,000 in the Marine Corps, making about 61,000 in both branches of the service.

Mr. STAFFORD. Yesterday we passed an item providing for the payment of interest to enlisted men for money deposited with the officials during service. Can the gentleman inform the committee what is the practice of the department as to paying interest for money deposited by enlisted men?

Mr. PADGETT. Yes; in order to encourage thrift among the young men in the Navy there is a provision of law authorizing them to deposit their money with the Government, and while it is on deposit they receive 4 per cent interest on it.

Mr. STAFFORD. Is there a similar arrangement as far as the Army is concerned?

Mr. PADGETT. I am not prepared to say as to the Army. I have never investigated that question.

Mr. STAFFORD. I certainly favor the practice, and wish to commend the Navy Department for paying a real rate of interest on savings, as contrasted with the interest paid to postal savings-bank depositors, who receive only one-half the amount generally paid by private savings banks.

Mr. PADGETT. These young men are away from home, and they deposit their money with the Government and get this interest upon it.

Mr. STAFFORD. Is that a recent innovation?

Mr. PADGETT. I do not remember when it was established. It was begun several years ago.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee [Mr. PADGETT].

The amendment was agreed to.

The Clerk read as follows:

In all, for the maintenance of Quartermaster's Department, Marine Corps, $3,000,000; and the money herein specifically appropriated for the maintenance of the Quartermaster's Department, Marine Corps, shall be disbursed and accounted for in accordance with existing law as maintenance, Quartermaster's Department, Marine Corps, and for that purpose shall constitute one fund.

Total Marine Corps, exclusive of public works, $7,345,469.86.

Mr. HENSLEY. Mr. Chairman, I move to strike out the last word, and wish to have read from the Clerk's desk an editorial in the Saturday Evening Post of May 2, 1914, entitled "Great Naval Strategists."

The CHAIRMAN. The article will be read in the time of the gentleman from Missouri.

The Clerk read as follows:

GREAT NAVAL STRATEGISTS.

The finest thing about your great naval strategist is that he always ends by blowing himself up. His proposition is that the three sides of a triangle must always be equal—only one side must always be longer than the others.

The world will lapse into chaos unless each one of four or five combinations exceeds all others. If it is the Mediterranean which engages his attention, he will demonstrate that England must predominate there or lose India and the colonies, while Germany, Austria, and Italy must likewise predominate; and, in any event, England can not predominate in the Mediterranean without losing control of her home coasts and territory. Here is the devil, there the deep sea; you may choose between them, but you have no other choice.

Now, if all this paper naval strategy were only a sort of weird game, played with building blocks in some home for the aged in order to while away a winter evening, it might have much merit, because you may play it forever without coming to any termination. The astounding thing is that intelligent men, holding positions of great responsibility, take it with deadly seriousness, and that vast sums of actual, hard-earned money are squandered to keep it up.

We are amazed at huge follies of the past—a Thirty Year's War; a prerevolutionary France; a Stuart régime; a Mississippi Bubble. Our children will be equally amazed at the great naval strategy of our day.

[Applause.]

Mr. PADGETT. Mr. Chairman, I ask unanimous consent to return to page 46, line 18, for the purpose of offering an amendment as a proviso.

The CHAIRMAN. The Clerk will report the amendment for information.

The Clerk read as follows:

Page 46, line 18, add the following proviso:

"*Provided*, That hereafter no mileage shall be paid to any officer where Government transportation is furnished such officer."

Mr. STAFFORD. I reserve a point of order.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee to return to the paragraph?

There was no objection.

Mr. PADGETT. I am offering that amendment because of a ruling made by the Comptroller of the Treasury recently. The Navy Department has a regulation that when officers are furnished transportation on a Government vessel they are not entitled to mileage; but the Comptroller of the Treasury, who is the supreme authority on that question and is not reversible, has held that mileage under the statute is an allowance, and that the Navy Department can not make a regulation that will prohibit an officer receiving the mileage. For instance, if he travels upon a Government boat the Comptroller of the Treasury holds that he is entitled to his mileage. For that reason I am offering this amendment providing that where they receive Government transportation they shall not be entitled to mileage.

Mr. MADDEN. Mr. Chairman, if a marine officer were sent down from Newport News to Vera Cruz, would he be entitled to mileage when he went on a naval vessel?

Mr. PADGETT. Not in a case of that kind. This ruling applies to certain cases where officers travel without troops.

Mr. LEVY. I make the point of order that this is new legislation.

Mr. STAFFORD. What mileage do these officers receive when they are traveling on railroad trains?

Mr. PADGETT. They get 8 cents a mile.

Mr. STAFFORD. Do they also get an allowance for other expenses, such as sleeping-car fare, while en route?

Mr. PADGETT. No; they do not. The 8 cents a mile covers everything. They do not get any allowance for packing their household effects, and so forth. In the Army the officers get an allowance to cover the expense of packing, moving, and so forth, but in the Navy they do not.

Mr. STAFFORD. Will the gentleman give a concrete case where they are carried on a public conveyance, and still under the ruling of the comptroller they receive mileage?

Mr. PADGETT. For instance, if an officer is traveling without troops, but goes on a Government boat from one place to another, he may claim his mileage. The department made a regulation to disallow it, but the Comptroller of the Treasury, who is the supreme authority on that matter, has overruled the department, and he says the officer is entitled to his mileage. I do not think an officer ought to have mileage under such circumstances.

The CHAIRMAN. Does the gentleman from New York [Mr. LEVY] interpose a point of order against the amendment?

Mr. LEVY. I will reserve the point of order until I can ask a question. As I understand it, these officers have to pay their hotel bills and other expenses, and for all these expenses they get no allowance except the mileage.

Mr. PADGETT. This amendment is only intended to cover cases where they receive Government transportation. It simply carries out a regulation of the department, which the Comptroller of the Treasury has overruled.

Mr. LEVY. I think it is very small business. They get very little as it is in the way of traveling expenses. I make the point of order that the amendment is new legislation.

Mr. PADGETT. The department asks for this amendment. They have covered it by a regulation, but the regulation has been overruled.

Mr. LEVY. I withdraw the point of order.

The CHAIRMAN. The point of order is withdrawn. The question is on the adoption of the amendment.

The amendment was agreed to.

Mr. PADGETT. I make a similar request to return to page 8, at the end of line 18, to add a similar proviso with reference to the Navy. The other one was with reference to the Marine Corps.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 3, at the end of line 18, add the following proviso:
"*Provided*, That hereafter no mileage shall be paid to any officer where Government transportation is furnished such officer."

The CHAIRMAN. Is there objection to returning to the paragraph indicated by the gentleman from Tennessee?

Mr. LEVY. I make the same point. As I understand it, they receive very little as it is.

Mr. PADGETT. This is where they travel on Government ships.

Mr. LEVY. But they have got to pay their hotel bills.

Mr. PADGETT. They get their mileage when they are traveling otherwise than on Government ships. This is only to apply where the Government furnishes the transportation. The Comptroller of the Treasury has held that they are entitled to mileage although the Government furnishes the transportation. We are not doing the officers any injustice.

Mr. STAFFORD. The gentleman would not want a different rule to apply to the Marine Corps from that of the Navy?

Mr. LEVY. Mr. Chairman, I will withdraw the point of order.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was agreed to.

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. JOHNSON of Kentucky, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the naval appropriation bill and had come to no resolution thereon.

ENROLLED JOINT RESOLUTION SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled joint resolution of the following title, when the Speaker signed the same:

H. J. Res. 242. Joint resolution authorizing the Secretary of War and the Secretary of the Navy to loan equipment, for the purpose of instruction and training, to sanitary organizations of the American National Red Cross.

CLASSIFICATION OF UNRESERVED UNAPPROPRIATED PUBLIC LANDS OF THE UNITED STATES.

Mr. RAKER. Mr. Speaker, I ask unanimous consent that I may have five legislative days in which to file minority views on House joint resolution 250, authorizing the Secretary of the Interior to make an approximate classification of the unreserved unappropriated public lands of the United States.

The SPEAKER. The gentleman from California asks unanimous consent for five days in which to file minority views on House joint resolution 250.

Mr. STAFFORD. Reserving the right to object, what is the resolution?

Mr. RAKER. It requires certain information from the Secretary of the Interior as to classification of the unreserved and unappropriated public lands of the United States, which we think to be a very expensive matter for the Interior Department.

Mr. STAFFORD. It is not probable that the matter will be brought up for consideration within the five days.

Mr. RAKER. Oh, no.

The SPEAKER. Is there objection?

There was no objection.

AGRICULTURAL EXTENSION WORK.

Mr. LEVER. Mr. Speaker, the Journal of this morning did not quite state the facts in reference to the message of the Senate relative to House bill 7951, relating to agricultural extension work. We have looked into the situation and we find that this bill has been properly messaged to the House, and I ask that the Journal be corrected to show the facts.

The SPEAKER. The gentleman from South Carolina asks that the Journal be corrected. Without objection, the correction will be made.

There was no objection.

Mr. LEVER. Now, Mr. Speaker, I ask the Chair to lay before the House the conference report on the bill H. R. 7951.

The SPEAKER. The Clerk will report the title to the bill.

The Clerk read as follows:

The bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture.

The SPEAKER. The Clerk will read the report.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman from South Carolina asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The conference report and statement are as follows:

CONFERENCE REPORT (NO. 587).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 4, 5, 11, 15, and 16.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 6, 7, 8, 12, and 14, and agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$500,000"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$4,100,000"; and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment as follows: After the word "contributions" in said amendment, insert the following: "from within the State"; and the Senate agree to the same.

A. F. LEVER,
GORDON LEE,
G. N. HAUGEN,
Managers on the part of the House.

HOKE SMITH,
JOE T. ROBINSON,
JAMES H. BRADY,
Managers on the part of the Senate.

STATEMENT OF THE MANAGERS ON THE PART OF THE HOUSE.

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture, submit the following written statement in explanation of the effect of the action agreed upon in the accompanying conference report on the Senate amendments, viz:

Amendment No. 1. This amendment adds the number of the chapter to the volume number and page number used in the description of the act of Congress referred to. The House agrees.

Amendment No. 2. The House bill provides:

That in any State in which two or more such colleges have been or hereafter may be established the appropriations hereinafter made to such State shall be admitted by such college or colleges as the legislature of such State may direct.

The Senate amendment takes this authority from the legislature and gives it to the governor of the State and the Secretary of Agriculture acting jointly. The Senate recedes from its amendment, and the conference report leaves the bill in this respect as it was originally passed by the House.

Amendment No. 3. This amendment occurs in the proviso which was inserted for the protection of the farm-management work and the farm cooperative demonstration work. The purpose of the amendment is to make clearer and to limit the meaning of the proviso. The House agrees.

Amendment No. 4. The Senate recedes from this amendment, which provides that the work shall be carried on without discrimination as to race, because the amendment, in view of the character of the work to be done, was regarded as unnecessary

and as confusing to the clarity of meaning of section 2 of the act.

Amendment No. 5. This amendment represents an increase of $10,000 in the total of the initial appropriation to the States, and was intended, when taken in connection with amendment No. 15, to extend the provisions of this act to Hawaii. The Senate recedes.

Amendment No. 6. This amendment makes more definite the proviso in which it occurs and changes it from a mandatory to a directory proviso. The House agrees.

Amendment No. 7. This amendment changes the amount for the second year's appropriation from $300,000 to $600,000. The House agrees.

Amendment No. 8. The bill as it passed the House provided that after the first two years there should be for nine years an appropriation exceeding by $300,000 the sum appropriated for each preceding year. Amendment No. 8 changes the number of years from nine to seven, and amendment No. 9 changes the amount from $300,000 to $600,000. The House agrees to amendment No. 8.

Amendment No. 9. This amendment changes the amount to be appropriated annually during the seven years mentioned in amendment No. 8 from $300,000 to $600,000. The House agrees, with an amendment making the amount $500,000.

Amendment No. 10. This amendment changes the final amount to be permanently appropriated each year, in addition to the initial appropriation, from $3,000,000 to $4,800,000. The House agrees, with an amendment making the amount $4,100,000.

Amendment No. 11. This amendment was made to conform with amendment No. 5 described above. The Senate recedes.

Amendment No. 12. This amendment strikes out the word "or," which word, in view of words added later, is unnecessary. The House agrees.

Amendment No. 13. This amendment allows the State to be credited with individual contributions on the same footing as with those provided by official authorities. The House agrees, with an amendment confining such individual contributions to those received "from within the State."

Amendment No. 14. This amendment strikes out the word "annually," which is superfluous. The House agrees.

Amendment No. 15. This amendment, in connection with amendment No. 5, was intended to extend the provisions of this act to Hawaii. The Senate recedes.

Amendment No. 16. This amendment was simply a change of the section number, which is now unnecessary. The Senate recedes.

A. F. LEVER,
GORDON LEE,
G. N. HAUGEN,
Managers on the part of the House.

Mr. STAFFORD. Will the gentleman from South Carolina yield?

Mr. LEVER. Yes.

Mr. STAFFORD. Mr. Speaker, the present conference report has been changed materially so far as the amount originally appropriated in the bill is concerned. From $3,000,000, as provided in the bill as it passed the House, and the total amount to be contributed on the part of the Government, there is by this bill to be appropriated $4,800,000 in addition to the $490,000 initial payment. This bill only emphasizes the trend that is continually going on of foisting on the National Government work that really belongs to the States.

I recall that 10 years ago, when the deceased and lamented colleague of mine, Henry C. Adams, Representative of the second Wisconsin district, made strenuous efforts to get through the House a bill providing for a small increase of a similar character by an annual appropriation of $150,000. At that time it was the prevailing idea on that side, and somewhat on this side, that the work of education belonged strictly to the State.

Here we find the State rights policy departed from entirely, where the National Government is taking some of the burdens of the State, in this instance involving at the end of seven years a total amount of $5,300,000 annually for the cost of education, putting it on the taxpayer generally, taking it away from the burden of the State and foisting it on the taxpayers generally. It may be all well and good, because no one will criticise the purpose if the money is to be used for the benefit of education.

But if it is right, so far as agricultural education is concerned, to make an advance inside of 10 years from a small sum to over $5,000,000, the time will soon come for a demand on Congress to take over all the burdens of taxation.

Gentlemen on the other side are calling the attention of the country to the fact that they are in favor of an economical program. I assume that that does not extend to education; and yet we hear continually, and this is one instance of it, where the National Government is going to be called upon to enact legislation which tends to abolish the local units of the States. I have no objection to the consideration of the conference report at this time.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the conference report was agreed to.

ADJOURNMENT.

Mr. PADGETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 5 minutes p. m.) the House, in accordance with its previous order, adjourned until to-morrow, Sunday, May 3, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATION.

Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, submitting an amended estimate of appropriation increasing amount for suppressing counterfeiting and other crimes from $150,000 to $160,000 (H. Doc. No. 938); to the Committee on Appropriations and ordered to be printed.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Interstate and Foreign Commerce was discharged from the consideration of the bill (H. R. 16173) waiving the age limit for admission to the Pay Corps of the United States Navy in the case of Samuel B. Deal, jr., and the same was referred to the Committee on Naval Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. SINNOTT, from the Committee on the Public Lands, to which was referred the bill (S. 49) to provide for the exchange with the State of Oregon of certain school lands and indemnity rights within the national forests of that State for an equal area of national forest land, reported the same without amendment, accompanied by a report (No. 612), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. HULINGS, from the Committee on Military Affairs, to which was referred the bill (H. R. 13698) to correct the military record of Charles A. Coulson, reported the same with amendment, accompanied by a report (No. 607), which said bill and report were referred to the Private Calendar.

Mr. LOBECK, from the Committee on War Claims, to which was referred the bill (H. R. 9703) for the relief of Thomas S. Johnson, reported the same without amendment, accompanied by a report (No. 608), which said bill and report were referred to the Private Calendar.

By Mr. GREGG, from the Committee on War Claims, to which was referred the bill (H. R. 14479) for the relief of the legal representatives of Sarah J. Montgomery, deceased, reported the same without amendment, accompanied by a report (No. 609), which said bill and report were referred to the Private Calendar.

By Mr. BYRNES of South Carolina, from the Committee on War Claims, to which was referred the bill (H. R. 4248) for the relief of Nelson D. Dillon, executor of Harriet A. Dillon, deceased, widow of Robert Dillon, deceased, reported the same without amendment, accompanied by a report (No. 610), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill H. R. 7140, reported in lieu thereof a resolution (H. Res. 498) referring to the Court of Claims the papers in the case of the heirs of Joshua Nicholls, accompanied by a report (No. 611), which said resolution and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. WEAVER: A bill (H. R. 16237) to increase the limit of cost of the addition to the Federal public building at Okla-

homa City, Okla., and providing an appropriation therefore; to the Committee on Public Buildings and Grounds.

By Mr. LEVY: A bill (H. R. 16238) to amend section 23 of the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909; to the Committee on Patents.

By Mr. WINGO: A bill (H. R. 16239) to exclude from the Arkansas National Forest all lands within the fourth congressional district and restore same to the public domain; to the Committee on the Public Lands.

By Mr. HAMILTON of New York: A bill (H. R. 16240) to provide for the purchase of a site for a public building in the village of Wellsville, N. Y.; to the Committee on Public Buildings and Grounds.

By Mr. AINEY: A bill (H. R. 16241) providing for the survey of the Susquehanna and Delaware Rivers and their tributaries, in Pennsylvania and New York; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 16242) providing for the survey of the Cheat River and its tributaries, Pennsylvania and West Virginia, and the Allegheny, Monongahela, and Youghiogheny Rivers and their tributaries in Pennsylvania; to the Committee on Rivers and Harbors.

By Mr. HINEBAUGH: A bill (H. R. 16243) amending section 12 of the act creating the Interstate Commerce Commission, as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. PAGE of North Carolina: A bill (H. R. 16244) to amend section 98 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; to the Committee on the Judiciary.

By Mr. CLAYTON: Resolution (H. Res. 499) providing for the consideration of H. R. 15657 and amendments thereto; to the Committee on Rules.

By Mr. FERRIS: Resolution (H. Res. 500) instructing the Speaker of the House of Representatives to appoint a committee to inquire into and report upon all matters alleged concerning the refusal of the Standard Oil Co. to receive and convey oil produced from Indian lands, and for other purposes; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BORCHERS: A bill (H. R. 16245) granting an increase of pension to Eliza Helton; to the Committee on Pensions.

By Mr. BRITTEN: A bill (H. R. 16246) granting an increase of pension to Sigmund J. Messing; to the Committee on Pensions.

By Mr. BROCKSON: A bill (H. R. 16247) granting a pension to Laura C. Bailey; to the Committee on Invalid Pensions.

By Mr. DEITRICK: A bill (H. R. 16248) granting a pension to Maria F. Rice; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16249) appropriating the sum of $4,000 to Alfred Roberts for personal injuries received at the United States customhouse at Boston, Mass.; to the Committee on Claims.

By Mr. DERSHEM: A bill (H. R. 16250) granting a pension to Anthony R. Small; to the Committee on Pensions.

Also, a bill (H. R. 16251) granting a pension to Ethelyn M. Ulsh; to the Committee on Pensions.

Also, a bill (H. R. 16252) granting a pension to Lusetta Weary; to the Committee on Invalid Pensions.

By Mr. DICKINSON: A bill (H. R. 16253) granting a pension to John Welsh; to the Committee on Invalid Pensions.

By Mr. FAISON: A bill (H. R. 16254) for the relief of the estate of Edward Cleve, deceased; to the Committee on War Claims.

By Mr. GOULDEN: A bill (H. R. 16255) granting a pension to Herman Siegel; to the Committee on Invalid Pensions.

By Mr. KINKEAD of New Jersey: A bill (H. R. 16256) granting an increase of pension to George B. Eesley; to the Committee on Invalid Pensions.

By Mr. KIRKPATRICK: A bill (H. R. 16257) granting a pension to Hannah U. Hassard; to the Committee on Invalid Pensions.

By Mr. MOORE: A bill (H. R. 16258) granting an increase of pension to Edgar Duffield; to the Committee on Pensions.

By Mr. O'SHAUNESSY: A bill (H. R. 16259) for the relief of Iver Boreson; to the Committee on Claims.

By Mr. PARKER: A bill (H. R. 16260) granting an increase of pension to Ann E. Richards; to the Committee on Invalid Pensions.

By Mr. TAVENNER: A bill (H. R. 16261) granting an increase of pension to Horace B. Hamilton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16262) granting an increase of pension to William H. Huff; to the Committee on Invalid Pensions.

By Mr. WILLIS: A bill (H. R. 16263) granting an increase of pension to Thomas Haggard; to the Committee on Invalid Pensions.

By Mr. BYRNES of South Carolina: Resolution (H. Res. 498) for the relief of the heirs of Joshua Nicholls; to the Committee of the Whole House.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of the Presbytery of Indiana and sundry citizens of Marshfield, La., against polygamy in the United States; to the Committee on the Judiciary.

Also (by request), petition of sundry citizens of Missouri, against Sabbath-observance bill; to the Committee on the District of Columbia.

Also (by request), memorial of the National Association of Vicksburg Veterans, favoring a reunion of Civil War veterans from the North and South to be held at Vicksburg National Military Park in October, 1915; to the Committee on Military Affairs.

By Mr. BEAKES: Petitions of 242 voters of Jackson County, Mich., in opposition to national prohibition; to the Committee on the Judiciary.

Also, petitions of 42 citizens of Monroe County, Mich., favoring the Lindquist pure fabric and leather bill; to the Committee on Interstate and Foreign Commerce.

Also, petitions of Barbers' Union, No. 448, of Jackson; Central City Lodge, No. 95; International Association of Machinists, of Jackson; and Jackson Trades Council, all of Jackson, Mich., favoring House bill 1873 and Senate bill 927, known as the Bartlett-Bacon anti-injunction bills; to the Committee on the Judiciary.

By Mr. BROWNING: Petition of sundry citizens of Blackwood, Magnolia, Ashland, and Lawnside, all in the State of New Jersey, favoring national prohibition; to the Committee on the Judiciary.

By Mr. BRUCKNER: Petition of 62 citizens of the twenty-second congressional district of New York, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of the twenty-second congressional district of New York, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. COVINGTON: Petition of sundry citizens of Rising Sun and the Methodist Episcopal Church of Cherry Hill, all in the State of Maryland, favoring national prohibition; to the Committee on the Judiciary.

By Mr. CURRY: Petition of John J. Donnelly, John C. Donnelly, and Mrs. J. J. Donnelly, of Sacramento, Cal., against adoption of House joint resolution 168 and Senate joint resolutions 88 and 50, relative to national prohibition; to the Committee on the Judiciary.

By Mr. DICKINSON: Petition of 47 citizens of Rich Hill, Mo., petitioning for a modification or revision of the Weeks-McLean bill; to the Committee on the Judiciary.

By Mr. DOOLITTLE: Petition of sundry citizens of the State of Kansas, favoring establishment of a bureau of farm loans (H. R. 11755); to the Committee on Banking and Currency.

By Mr. EDMONDS: Petition of A. O'Donnell and other citizens of Philadelphia, Pa., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. GRAHAM of Pennsylvania: Petition of the Bay View Reading Club, of Lewistown, Pa., favoring passage of the bill relative to United States acquiring Monticello; to the Committee on Military Affairs.

By Mr. HAMLIN: Petition of the B. Y. P. U., of Warsaw, Mo.; also of the Ruhamah Union and mass meeting of Fayette, Mo., asking for the passage of the Sheppard-Hobson prohibition resolutions; to the Committee on the Judiciary.

By Mr. JOHNSON of Washington: Petitions of sundry citizens of Tacoma and Olympia, Wash., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. LEE of Pennsylvania: Petition of sundry citizens of Shenandoah, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. LLOYD: Petition of various residents of Lewis County, Mo., in favor of House bill 12923, the rural-credits bill; to the Committee on Banking and Currency.

By Mr. NELSON: Petitions of sundry citizens and organizations of Lafayette County, Wis., favoring national prohibition; to the Committee on the Judiciary.

By Mr. REED: Petition of 370 people of the Congregational and Free Baptist Churches of Candia; the congregation of the Baptist Church of Gilford; Junior Grange, No. 150, of the Patrons of Husbandry, of Grasmere; Herbert C. Whitney and 11 others of Penacook, all of New Hampshire; also the Pittsburgh Board of Trade, of Pittsburgh, Pa., and the Reformed Presbyterian Church of Apache, Okla., favoring national prohibition of the liquor traffic; to the Committee on the Judiciary.

Also, petitions of F. P. Symonds, of Chatham; Irville T. Proctor, of Alton; Frank Smith, of Alton; Mrs. E. H. Pearson, of Epping; Charles E. Davis, of Alton; 500 people of the Congregational and Free Baptist Churches of Milton; 300 people of the People's Methodist Episcopal Church, of Exeter; 350 people of the First Congregational Church, of Bartlett; 200 people of the Congregational Church of Hooksett; 70 people of the Congregational Church of Lee; 294 people of the congregation of Bethany Methodist Episcopal Church, of Rochester; 125 people of the congregation of Bethel Methodist Episcopal Church, of Rochester; 30 people of the Free Baptist Church, of Loudon; 250 people of the Federated Churches of Meredith; and the Sabbath School of the First Congregational Church of Nashua, all of New Hampshire, favoring national prohibition of the liquor traffic; to the Committee on the Judiciary.

By Mr. SCULLY: Petition of William J. Moody, of Newark, N. J., favoring passage of the Bartlett-Bacon bill (H. R. 18731); to the Committee on the Judiciary.

Also, petition of sundry citizens of Matawan, Old Bridge, and Perth Amboy, all in the State of New Jersey, favoring national prohibition; to the Committee on the Judiciary.

By Mr. SMITH of New York: Memorial of the Employers Association of Buffalo, N. Y., opposing antitrust legislation; to the Committee on the Judiciary.

Also, petition of sundry voters of the forty-first congressional district of New York, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Central Woman's Christian Temperance Union, of Erie County, N. Y., favoring national prohibition; to the Committee on the Judiciary.

By Mr. STEENERSON: Petitions of 110 citizens of Warren, Minn., favoring national prohibition; to the Committee on the Judiciary.

Also, petition signed by E. J. Olson and 75 others, all citizens of the State of Minnesota, purchasers of land under the act of Congress approved February 20, 1904, in favor of House bill 12290, for the relief of said purchasers; to the Committee on the Public Lands.

By Mr. STEVENS of Minnesota: Petition of the St. Paul (Minn.) Pressmen's Union, protesting against increase of rate on second-class mail matter; to the Committee on the Post Office and Post Roads.

Also, memorial of the Evangelical Lutheran Church of the Reformation, of St. Paul, Minn., favoring national prohibition; to the Committee on the Judiciary.

By Mr. SUTHERLAND: Petition of the Farmers Sunday School, of Farmers, W. Va., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of West Virginia, favoring national prohibition; to the Committee on the Judiciary.

By Mr. TAVENNER: Petition of J. Ramser, of Rock Island, Ill., favoring passage of the Stevens bill, relative to setting of prices on goods to be sold; to the Committee on Interstate and Foreign Commerce.

By Mr. TAYLOR of Colorado: Petitions of 700 citizens of Pueblo and the Sunday School Convention of Pueblo County, 37 citizens of Palisade, 40 citizens of Denver, and 115 citizens of Steamboat Springs, all in the State of Colorado, favoring national prohibition; to the Committee on the Judiciary.

By Mr. TEN EYCK (by request): Petition of various members of the Allen Woman's Christian Temperance Union, of Albany, N. Y., in favor of the Hobson-Sheppard-Works bill for national prohibition; to the Committee on the Judiciary.

Also (by request), petition of Charles H. Smith, M. D., and other voters of the city of Albany, N. Y., in favor of Hobson-Sheppard-Works bill for national prohibition; to the Committee on the Judiciary.

By Mr. WALLIN: Memorial of the Trades Assembly of Schenectady, N. Y., favoring Government supervision of labor conditions in certain sections of Colorado; to the Committee on the Judiciary.

By Mr. WILLIS: Petition of Gem City Council, No. 3, United Commercial Travelers of America, of Dayton, Ohio, in favor of the enactment of a law to create a coast guard by combining the existing Life-Saving Service with the Revenue-Cutter Service; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Ladies' Guild, the Women's Home and Foreign Missionary Society, the Council, and the Luther League, all of the First Lutheran Church of Galion, Ohio, in favor of the adoption of House joint resolution No. 168, relative to national prohibition; to the Committee on the Judiciary.

HOUSE OF REPRESENTATIVES.

SUNDAY, *May 3, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father in heaven, whose heart is ever open to the prayers of Thy children and always in sympathy with those who need the touch of Thy spirit, let Thy blessing descend upon us as we gather here to-day in memory of a departed Member, whose life and conduct challenged the respect and admiration of all who knew him. Strong of mind, warm of heart, pure of motive, he lived well, wrought well, and left behind him a clean record. His going has left a void in the hearts of all who knew him; his earthly mission fulfilled, Thou didst call him to a larger service in the great beyond. May we hold him sacred to our memory and strive to emulate his virtues. Be Thou solace to the bereaved family, and inspire them with the hope he cherished in the immortality of the soul. So may we all trust in the infinite love of a heavenly Father revealed in the heart of the Christ, the world's great exemplar.

If I find Him, if I follow, what His guerdon here?
Many a sorrow, many a labor, many a tear.
If I still hold closely to Him, what hath He at last?
Sorrow vanquished, labor ended, Jordan past.
If I ask Him to receive me, will He say me nay?
Not till earth and not till heaven pass away.

Amen.

Mr. KIRKPATRICK. Mr. Speaker, I ask unanimous consent that the reading of the Journal be dispensed with.

The SPEAKER. The gentleman from Iowa asks unanimous consent to dispense with the reading of the Journal. Is there objection?

There was no objection.

Mr. KIRKPATRICK. I ask further that all those members who do not participate in the services here today, and who desire to do so, may have five legislative days in which to extend their remarks.

The SPEAKER. The gentleman from Iowa asks unanimous consent that those gentlemen who do not participate in the services to-day and who so desire may have five legislative days in which to print remarks. Is there objection?

There was no objection.

THE LATE REPRESENTATIVE PEPPER.

The SPEAKER. The Clerk will report the order for to-day's services.

The Clerk read as follows:

On motion of Mr. KIRKPATRICK, by unanimous consent, *Ordered*, That Sunday, May 3, 1914, be set apart for addresses upon the life, character, and public services of Hon. IRVIN S. PEPPER, late a Representative from the State of Iowa.

Mr. KIRKPATRICK took the chair as Speaker pro tempore.

Mr. VOLLMER. Mr. Speaker, I offer the following resolutions.

The Clerk read as follows:

House resolution 501.

Resolved, That the business of the House be now suspended that opportunity may be given for tribute to the memory of Hon. IRVIN S. PEPPER, late a Member of this House from the State of Iowa.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

Resolved, That at the conclusion of to-day's proceedings, the House, as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, do stand adjourned.

The resolutions were agreed to.

Mr. VOLLMER. Mr. Speaker, "Can this be the village of Falling Water?" Methinks I see again, "in my mind's eye, Horatio," the shambling unkempt figure, with its tattered clothes and straggling gray hair, with its quavering accents and bewildered air, created out of the formless mist of folklore by the genius of Washington Irving and visualized and immortalized by that of Joseph Jefferson. "Does no one here know Rip Van Winkle?" is followed by that other inquiry surcharged with pathos: "Are we, then, so soon forgot?" The allusion is not original with me, but the application flashed through my

mand recently while I was taking my oath of office in the House, for I had been in the employ of the House of Representatives of the Fiftieth Congress 26 years ago, and when I turned and faced the present membership of the House there was only one face on this floor that I recalled as belonging to a Member of the Fiftieth Congress—that of the venerable gentleman from New York—the Hon. SERENO E. PAYNE. I have not looked it up—there may be others—but he is the only one that I recall. In that Congress were such Titans as Speaker Carlisle, Thomas B. Reed of Maine, William McKinley of Ohio, Sam Randall of Pennsylvania, Sunset Cox of New York, and others whom we readily recall at this day.

But how about the three hundred and odd other gentlemen of that body—most of them loyal, able, patriotic, whole-souled men of high ideals who rendered great and distinguished service to the Commonwealth? Who can recall more than half a dozen of them after a scant 25 years have rolled by into the ocean of eternity? "Are we, then, so soon forgot?"

In honoring its departed Members, Congress honors itself. The faithful observance of memorial ceremonies speaks volumes for the manliness of the men of whom the House is composed; men who have good rich, red blood, not ice water, in their veins, and who are capable of virile friendships and maintain an exalted standard of human dignity. And I have felt this more keenly than otherwise because, as the successor of the universally beloved IRVIN S. PEPPER, it has been enforced upon me in the words that almost invariably followed immediately upon introductions to his former colleagues: "You follow a good man, sir!" That he should have gained so wide a circle of friends here is not a matter of passing wonder to those of us who knew him well, because his was an open, lovable nature, a stainless character, and the sunny disposition of a great big unspoiled boy. His conscience was free from haunting shadows, and his trust in humanity was unshaken and undisturbed.

IRVIN ST. CLARE PEPPER was born June 10, 1876, and he was reared on an Iowa farm. He received the benefits of the splendid public-school system of that State and graduated from its Normal School in 1897. Successively he became principal of the Atalissa High School and of the Washington School at Muscatine; private secretary to Congressman Martin J. Wade from 1903 to 1905; graduated from George Washington University in law; president of his class in 1905; elected county attorney of Muscatine County in 1906, and reelected to said position in 1908. He was elected to Congress in 1910 and reelected in 1912. He was taken to the hospital on November 21, 1913, and died December 22 of that year, even when the senatorial toga of the State of Iowa seemed about to fall upon his shoulders. He sleeps to-day in the "windowless palace of rest" in the soil of the prairie State which gave him birth.

Are God and Nature then at strife,
That Nature lends such evil dreams?
So careful of the type she seems,
So careless of the single life.

Who would have thought that in the sunniest hour of all the voyage, when friendly winds were kissing every sail, that the inevitable shipwreck was at hand? Never was I so awed with the thought of the certainty and the eternal tragedy of death as at the news of the untimely taking of my friend and yours—"Good old Pep."

If it be now, 'tis not to come; if it be not to come, it will be now; if it be not now, yet it will come: the readiness is all.

Mr. PEPPER was ready, for he had lived in accordance with the injunction conveyed in the immortal words of William Cullen Bryant in Thanatopsis:

So live that when thy summons comes to join
The innumerable caravan that moves
To that mysterious realm where each shall take
His chamber in the silent halls of death,
Thou go not like the quarry slave at night,
Scourged to his dungeon, but sustained and soothed
By an unfaltering trust, approach thy grave
Like one that wraps the drapery of his couch
About him and lies down to pleasant dreams.

Mr. PEPPER was no great orator, but he was a clear, convincing speaker. His deeds spoke for him, and they speak an eloquent language to-day. Few Members of Congress have accomplished more in actual results in many years of service than did this comparatively young man and relatively new Member.

There are a sort of men whose visages
Do cream and mantle like a standing pond
And do a willful stillness entertain,
With purpose to be dress'd in an opinion
Of wisdom, gravity, profound conceit,
As who should say: "I am Sir Oracle,
And when I ope my lips let no dog bark!"

Mr. PEPPER was not one of these, for he was unassuming to a degree, as modest as a girl, and this was true modesty, and not the pride that apes humility.

What may not the future have held in store for this promising young man in the way of public service? No man can tell. It has been said that life is but a narrow vale between the cold and barren mountain peaks of two eternities, from whose hard, unyielding walls comes back to us only the echo of our ineffectual cries, but no answer intelligent to our reason as to the great unsolved riddle of human existence, of life and of death, of this world and the beyond. Faith upturns her shining face in trust and joyous confidence, but the finite intellect acknowledges its failure to bridge the unknown, to comprehend the unknowable, to tear the veil from the future.

Flower in the crannied wall,
I pluck you out of the crannies,
I hold you here, root and all, in my hand
Little flower—but if I could understand
What you are, root and all, and all in all,
I should know what God and man is.

However, it is a thought which should be ever present with every Member of this historic body that we do know that we have it in our power to do something to make this present life a little better, a little more filled with comfort and justice and happiness to the great masses who are now sojourning here and to the untold multitudes who will come after us.

Abou Ben Adhem, who would not write down his name as one who loved the Lord, but as one who loved his fellow men, found, when the angel returned with the list of those who in the eyes of God loved him truly, that his name led all the rest.

And now a few observations of a political nature, but not in a spirit of partisanship. Mr. PEPPER was an Iowa Democrat. Under the political conditions prevailing in that State for many years after the Civil War this required some moral courage, disinterestedness of purpose, and certainly a large portion of buoyant and indestructible hope. It meant that one would have to meet much ridicule, some contempt, and, in the good old days, positive social as well as political ostracism. For you must understand that in those days the Republican Party was a civic institution there of almost equally universal acceptance as the church and the school. To make Democracy respectable in Iowa involved quite as desperate and long-continued a fight as the historic contest of Gov. Russell and his devoted little band in the Old Bay State.

Our Republican fellow citizens in Iowa have not been without honor either at home or abroad. Their party has justly recognized their claims, and they have contributed a galaxy of statesmen who have adorned their country's posts of honor at home and abroad; and that can justly be said also of their present delegation. But the voice of Iowa Democracy has not often been heard or its representatives seen in the councils of the Nation. Without recognition from the powers that be in our own party, we struggled on against overwhelming odds. We met our Republican opponents in every schoolhouse, at every crossroads in the State. We pounded into unwilling ears the more obvious truths of economic science as we saw them, and even when it seemed as though we were down and out for good came our reward. At a time when the sun of victory shone high in the Republican heavens and no political barometer told of the coming of a storm, a cloud no larger than a man's hand appeared on the horizon and in it were concealed the lightnings of popular wrath and out of it came the deluge of 1912. It was called the "Iowa idea," and its genesis can be traced to those little crossroads meetings in that State where Democratic doctrine was made to percolate, and there began the ferment which never ceased until the Republican Party was rent in twain, the Progressive Party was born, and a new political alignment took place from ocean to ocean.

I am not mentioning this in the spirit of partisanship, which would be out of place on a solemn occasion like this, but in the interests of the truth of history and a belated recognition at the Nation's Capital of the debt due from somebody to that heroic band of Iowa Democrats like Mr. PEPPER, which I believe was one of the efficient causes of the great revolutionary political changes of the recent past.

Mr. PEPPER held advanced economic views, but by reason of his mildness and fairness of statement acquired the reputation with many of being ultra-conservative. He was a single taxer by persuasion and by natural impulse and disposition the devoted friend of the old soldiers and of the toiling masses of the land. There have not been many gentler, sweeter natures among men since the Nazarene walked on the shores of Galilee.

In conclusion, I can not do better in paying tribute to our departed friend than to quote the inspired words of a great Southern orator:

I have seen by night the glowing headlight of a giant locomotive rushing onward in the darkness, heedless of danger and uncertainty, and I have thought the spectacle grand. I have seen the lightning flash across the storm-swept sky till night and darkness and the shadow-haunted earth gleamed with noonday splendor and I have

thought the spectacle grand. I have seen the light come over the eastern hills in glory till leaf and tree and blade of grass sparkled like myriad diamonds in the morning ray and I have known that it was grand; but the grandest thing, next to the radiance that flows from the Almighty's throne, is the light of a noble and beautiful life shining in benediction upon the destinies of men and finding its home at last in the bosom of the everlasting God.

I append the following resolutions passed by the Democrats of Clinton County, Iowa:

Whereas, the Great Ruler of the Universe has taken from this district our congressman, the Hon. IRVING S. PEPPER, thereby depriving the district of a representative whose heart always beat loyally toward the people, and whose every act, thought, and wish were for the advancement of the people he represented.

Cut down in the prime of his young manhood, when life's advantages were just unfolding, when opportunities were presenting themselves for further advancement, the district has suffered an irreparable loss.

We who knew IRVING S. PEPPER recognized in him a man of great ability, one who was willing to sacrifice those talents for the benefit of the people of the district he loved so well.

We, the Democrats of Clinton County, in convention assembled, desire to pay a tribute to our deceased congressman; and be it

Resolved, That a copy of these resolutions be sent to the bereaved family and that a copy be sent to the Clerk of the House of Representatives.

L. E. FAY.
D. H. SHEPARD.
W. H. CARROLL.
J. H. INGWERSEN.
J. E. MORAN.

Mr. CLARK of Missouri. Mr. Speaker, into the Sixty-second Congress from out the Central West came a new Member, young, handsome, capable, affable, industrious, graceful, ambitious. He at once became a prime favorite in the House. He discharged his duties cheerfully and well. His name was IRVIN S. PEPPER, and he hailed from Muscatine, Iowa, on the banks of the Great River. He had one decided advantage over most new Members—the fact that he had for two years been secretary to Hon. Martin J. Wade, an exceedingly able man. That gave Mr. PEPPER a clear insight into the way things are done here, both in Congress and in the departments. It also gave him a wide acquaintance with Representatives, Senators, and departmental officials. His service with Judge Wade was of great value to him.

As Missouri and Iowa lie side by side, and as he was the only Iowa Representative of my political faith, and as I was anxious for him to make such headway as to insure his reelection, I sought him out, cultivated his acquaintance, and did all that I could to promote his success. He needed help as little as any new Member I have seen here. He possessed a most generous heart and he repaid my efforts to aid him in Scripture measure, heaped up, pressed down, and running over. He was true as steel, faithful as the needle to the pole, constant as the North Star. I never had a closer or a better friend.

Iowa is an imperial Commonwealth and from her entrance into the Union has been as ably represented in the House, the Senate, the Cabinet, and the Diplomatic and Consular Service as any of her sister States. She is one of the two States on the sunset side of the Mississippi to furnish a Speaker of this House. She seems to have discovered at an early date the wisdom of retaining able and faithful men in Congress. Consequently she has always been prominent in Washington. At one time she counted among her citizens the Speaker of the House, two Cabinet ministers, and the Senator longest in service. In fact, Senator William B. Allison not only lived to be the Nestor of the Senate, but he, of all men, had the longest senatorial service in our history, and he lacked only a few months of having had the longest total service in House and Senate, being exceeded in that regard only by Senator Justin Smith Morrill, of Vermont.

Hon. James Wilson, after long service in the House, held a Cabinet position for 16 years, the longest period ever served by any member of the Cabinet, William Wirt and Albert Gallatin coming next, with 12 years each.

With his early start in Congress and his splendid adaptability for the public service, I have no doubt that, had his life been spared, Mr. PEPPER would have ranked with the best of them. A multitude of people believe that he would have been elected to the Senate this fall; but just when his prospects seemed brightest, just when his hopes were highest, he was cut off untimely—a great loss to his State and to his country.

None knew thee but to love thee,
Nor named thee but to praise.

Mr. MANN. Mr. PEPPER, the Speaker, who has just addressed the House, and myself, all belonged to the same college Greek-letter fraternity. There were in the last Congress, and there are in this, quite a number of members of that same fraternity. I do not know that I can call the names of very many of them at this moment, but there are frequent meetings in Washington of the local chapter, and I believe there is an alumni chapter here; and about the time that Mr. PEPPER came into the House I was informed, either by himself or by some of the other Members, that he was what we call a Delta Tau Delta. In fact, I think those Members of the House who paid any attention to the meetings of that society here very soon learned to rely upon Mr. PEPPER for advice and direction as to whether we should attend a meeting, or make a speech at a meeting, or anything of that sort.

Like every old Member, I take a considerable interest in every new Member who comes into the House, but when you have added to that the college association, the spirit that comes from the college fraternity, you have a very large interest. So that almost immediately, when Mr. PEPPER came to the House, he and I became very warm friends. I think, probably, there is no spirit of friendship closer than that which comes out of the fraternal organization, and I doubt whether there is any fraternal organization that draws the spirits of men closer together than the college fraternity. I soon became a very warm admirer of Mr. PEPPER in the House and elsewhere, and he used frequently to do me the honor to come to me and consult with me about matters in the House in which he was interested. I think all of us learned to love him, because he had a peculiarly lovable spirit and character. He was absolutely reliable; anyone could see that he was thoroughly honest, as most of the Members of this House are without question; but he also had a desire to accomplish things, and was able to succeed.

The Speaker has referred to the fact that a man's value as a Member of Congress increases, at least somewhat, with length of service, and yet it is true that a new Member of the House, in his first term, devoting himself to those things in which he may be particularly interested or in which his district may be particularly interested, can often accomplish what some of the older Members, largely for lack of time, are unable to do.

It is true that new Members coming into the House sometimes think they are neglected by the older Members, principally because they do not have so much to do as the older Members; and the older Members, or some of them, are so busily engaged that they do not have the time, or do not take the time, to show their interest in the younger Members; but I think there is no body of men in the world, possibly outside of a fighting army, where, when a man drops out who may have been beloved by his fellow Members and is succeeded by a new Member, the new Member is so truly received without any feeling against him, and with the desire of other Members to be his friends, as in this House. We let go with our best wishes those who fall, and we take in with our best wishes the new ones who come; and we never took in any new Member of the House who more quickly reached into the hearts and souls of the other Members than did our late colleague, Mr. PEPPER.

Mr. GOOD. Mr. Speaker, we are met to-day to pay our tribute of love and respect to the memory of IRVIN S. PEPPER. On occasions such as this we realize how inadequately our lips convey the feelings of our hearts.

Death is always mysterious. We take a pardonable pride in the great achievements we have made in all of the arts and sciences. We stand appalled when we survey what the ingenuity of man has wrought. As we review the great achievements of mankind we wonder if, after all, there is any mystery which the human mind can not solve. And yet before this proud record of human achievement that has touched every life, mankind must bow in sorrow and defeat in the presence of death. Before the open grave we must acknowledge that death is just as mysterious to-day as it was at the dawn of creation. We do know, however, that the mystery surrounding life and death has not served to lessen our affections in life or to assuage our sorrows in death. The birth of a child fills our heart with gladness; the death of a man plunges us into sorrow. So to-day we mourn the loss of our lamented colleague, IRVIN S. PEPPER, and the poignancy of our grief is increased when we recall that at the time of his death he was less than 38 years old and that he had just entered upon the duties of his second term in Congress.

It was not my privilege to have had an extended acquaintance with Mr. PEPPER, but it was my good fortune to know him somewhat intimately after his election to Congress. He came to Congress splendidly equipped for a brilliant legislative career. He was born and reared on an Iowa farm, received his early education in the country schools of Davis County, and later graduated from the Southern Iowa Normal School at Bloomfield. It was while serving in the capacity of private secretary to a Member of Congress that he completed a course in law and graduated from George Washington University Law School in

1905. He subsequently returned to his native State and engaged in the practice of his profession. At the time of his election to Congress he was serving his second term as prosecuting attorney for Muscatine County.

The rise of this young man from the hard and arduous duties of the farm to school teacher, private secretary to a Member of Congress, prosecuting attorney, and finally to a seat on the floor of this House was not only rapid, but unusual, and was not attained without hard work and great effort.

The hard work and difficult jobs which a farmer boy must do was no exception in the case of young PEPPER, and his early experiences are reflected in his subsequent public career. His work on the farm made him deeply sympathetic for the cause of labor. He took great interest in everything that affected the laboring man. In him the laborers in the Rock Island and other Government arsenals had a friend who had their interests at heart. He was a student of the various systems of shop management, and while in Congress labored diligently for the adoption of every measure calculated to dignify labor and to promote the welfare of the man that toils.

Congressman PEPPER'S untimely death cut short what would otherwise have been a useful, if not a brilliant, legislative career. But during the short time he was a Member of this House his manly qualities left an impress upon those who had the good fortune to know him which death can not efface. Long after his accomplishments and work as a legislator shall have been forgotten we will remember well his sterling qualities of mind and heart and those manly attributes of character which measured his true worth.

To my mind there were three noble characteristics which predominated in Mr. PEPPER'S life. These were industry, integrity, and kindness. To these splendid traits of character, more than to anything else, he owed his remarkable success. After all, are not these the real and substantial elements of true greatness? A man may be brilliant, but if he has not industry he will fail in the end. A man may have natural ability, but if he has not integrity he can not permanently succeed. A man may be brilliant and may possess ability of a high order, yet if his life is not tempered with kindness his success must be temporary. No one can accomplish a great work, achieve a great reform, write a great book, or attain to a high degree of constructive statesmanship unless he be industrious, honest, and kind.

Congressman PEPPER was exceedingly industrious. During the time he was a member of this body he was found at his post early and late in the performance of the arduous duties imposed upon him. I doubt not that to the hard work and close confinement which the duties of his office required more than to anything else was due his untimely death.

Honest and upright himself, he despised dishonesty and hypocrisy in others. He was not only scrupulously honest in all his dealings with others, but he was honest with himself. His honesty made him friends everywhere. His life truly exemplified the precept:

> To thine own self be true,
> And it must follow, as the night the day,
> Thou canst not then be false to any man.

I have been strongly impressed with Mr. PEPPER'S great kindness. He was always most considerate of others. He would not do an unkind thing to anyone, and seemed to take great pleasure in doing little kindnesses for others. I recall with pleasure the kindness and tenderness with which he cared for the comfort of his aged father, who made him a visit during one of the sessions of Congress. His rugged stature, evidencing great physical strength, stood out in striking contrast with his kindly and tender nature. He was as gentle as a child and as tender as a woman.

I shall long cherish the memory of those many traits of character which were so strongly exemplified in his life.

Mr. SHERWOOD. Mr. Speaker, probably I knew Mr. IRVIN S. PEPPER as well as any Member of the House outside of his State. He came here in the Sixty-second Congress, a valiant son of Iowa, without legislative experience, but full-equipped in knowledge, culture, and mental vigor for a successful career. And it can be said of him that no Member of either the Sixty-second Congress or the Sixty-third ever came into this historic Chamber who in so short a career made a more favorable or enduring impression upon his compatriots. Mr. PEPPER was a capable and earnest student of all live and pending problems. His political career, although short, was rarely exceptional. He was born and reared on a prairie farm in Iowa. As a boy he breathed the untainted air of the woods and fields. Born poor—poor in lucre, but rich in brawn and brain and courage, and full of the never-say-die spirit.

In the last Congress over 40,000 bills were introduced, covering every question, social, economic, or political, in the broad and ever-expanding domain of civics. Never before in all our history has it been so difficult for a new Member to achieve prominence on the floor of the House of Representatives as now. We are a continent-wide Republic, with a membership of 435, on a ratio of 211,877. For the past decade the tendency in Congress has been to regulate and control all the multifarious business of the country and to invade the local functions and legislative authority of the States. Hence, the main work of legislation is done in the more quiet seclusion of committees. Argument and oratory on the floor of Congress is no longer a potent force in legislation. The announcement in the House that there is to be a general debate on any question, however vital or continental in import, is followed by a general exodus of Members to their document and garden-seeds rooms in the House Office Building.

Hence, the opportunities of a new Member to make an enviable record and reputation among his fellows has never in the history of the American Congress been as difficult as now. The first Congress of 1789 was composed of only 65 Members, with a population ratio of only 30,000. A quarter of a century later, the ratio was only 40,000. For the first quarter of a century the Government of the people by the representatives of all the people was regarded as an experiment, the first of its scope and purpose in the world's history. Congress was then the central and leading attraction—the star of hope of a new nation on a new continent. To-day, Congress is regarded as a side issue, except in case of war, or some great conflict that stirs the patriotic blood of the people. The CONGRESSIONAL RECORD is generally unread in the presence of the baseball bulletins and the staged bouts of the nose smashers and rib crackers of the brutal prize ring.

Hence, a new Member who comes into this historic Chamber and commands the attention of his fellows as a debater, as a legislator, as a logician, is rara avis, as the old Romans would say of a bird prodigy.

The doings of Congress now and a half century ago are not comparable in general interest.

I first saw the United States Senate in session on the night of February 25, 1859, when the Cuba thirty-millions bill was in debate. William H. Seward, of New York, made an impassioned speech opposing the bill. Robert Toombs, of Georgia, arose and made a furious attack on Seward. Dixon of Connecticut then replied for two hours, opposing the bill. Then Judah P. Benjamin, of Louisiana, arose with a speech full of thunder and threatenings, saying that unless the United States purchased Cuba Spain would emancipate the Cuban negroes, which would ruin all tropical products, as they could only be produced by slave labor. Then arose old Ben Wade, of Ohio, fierce of mien, hot-blooded, and aggressive, and made a vigorous assault on Robert Toombs. They came near a personal collision. Finally, long after midnight, after nine hot hours of continuous debate, the Senate adjourned without action on the Cuban bill. The whole country then gave universal attention to these vital controversies on the floor of Congress. These debates by the old-time statesmen were the foremost topics of the hour in the newspapers, in the public forums, everywhere. How is it now? We seldom see a picture of a Congressman in the newspapers, but the leading journals carry daily (Sunday not excepted) a half-page vignette of some winning baseball pitcher or a full-length picture of a champion bruiser of the prize ring.

In the midst of the environment of some 435 Members, with a large minority of experienced and able gentlemen versed in the subtle legerdemain of modern parliamentary methods, it is a high tribute to our departed friend to say that he won a distinct place not only in the regard of his compatriots on this floor, but the warm friendship of all who recognized his sterling qualities. But for his untimely death Mr. PEPPER would have been the unanimous choice of his party for United States Senator for Iowa, so well had he won the confidence of his State for capability, sagacity, and saving common sense.

I close this modest mention of our departed friend with a stanza by Oliver Wendell Holmes, in a tribute to his dear departed friend, Robert Ware—

> A whiter soul, a fairer mind,
> A life with purer course and aim,
> A gentler eye, a voice more kind,
> We may not look on earth to find.
> The love that lingers o'er his name
> Is more than fame.

Mr. SCOTT. Mr. Speaker, it was not my good fortune to have had either a long or intimate acquaintance with our late colleague, Mr. PEPPER, before my coming into this House a little more than a year ago. We lived at extreme opposite borders of the State, and neither the sphere of his activities nor mine

had served to bring us into any frequent contact. All that I know intimately of Mr. PEPPER's personality I learned after coming here and becoming a Member of this House. Of course, as a citizen of his State I knew him by reputation, by a repute that was most high and enviable from a period even before that which he entered into public life.

But when I came here and met him personally I soon recognized in him a man of superior character, a man of very strong and high ideals personally. He was not a man who made any pretensions to overshadowing genius; he was not a man who unduly pressed himself upon either the acquaintance or friendship of others. At the same time he was always cordial, always evincing a high degree of superiority, with a splendid open disposition which commended him to all as a highly estimable gentleman.

Mr. PEPPER was a character that ought to be observed and studied, not because of extraordinary and overshadowing qualities of outward personality, but because of these qualities of inward character that commend themselves most strongly to us.

Born, as has been said here, in obscurity, poor so far as this world's wealth goes, but one of those characters who accepts life as he finds it, takes hold of his own environments with a view of making the most of the opportunities as they are presented to him in life. He was a man who took life's trial as it led from his abode and station. He took the trial with all its obstacles, never seeking to avoid or shun them, but patiently, sincerely, honestly, and determinedly undertaking to move on and over them, steadily on and upward, accomplishing and ever holding that which he had accomplished.

He lived half a lifetime, but in that patient, steady, unassuming way and method, at the end, he stood far and beyond the point at which the average man reaches in the allotted period of three score and ten years.

When we stop to think of it, Mr. Speaker and colleagues, that is a record of accomplishment, an exhibition of personal achievement that ought to challenge the attention of every young man in this country. It is a record that can fairly and truthfully and justly be held out to the youth of the land as an example of what may be made of the opportunities which our country affords, without help, without assistance, but simply by exerting those faculties which come to the average young man of the East, of the West, of the North, and of the South. When we stop to contemplate the fact that this man, obscure as he was, without being endowed with an unusal genius, was able to go on and up through the schools, through the college, through a technical school of education into an honorable profession and public station, and finally in middle life to walk into this Chamber—a Representative—with all that that appellation means—of one of the congressional districts of one of the greatest States in this Union, to take his seat here and be returned again with the respect and veneration and commendation of the people—not only of his district but of his entire State, irrespective of party—it is an achievement to be proud of.

We may all esteem it a privilege and honor to come here today, not only to acknowledge his worth, his character, and his achievement, but lay a tribute of sorrow, to express regret, that we have been deprived of his presence, his companionship, his counsel, and of his aid. He did not belong to the same political party that I did, but that makes no difference. After he entered this door he became then a representative of the American people, not the champion of a party, and I believe, and I have foundation for my belief in the observation of the man, that no man ever came here who exhibited less of pernicious partisanship, who lived up more truly and fully in his everyday life with the membership of this House as a representative of the American people, than did IRVIN S. PEPPER.

Mr. Speaker, I deem it a privilege to say these broken sentences in memory of Mr. PEPPER, and I shall always treasure my short acquaintance with him, my friendly meetings with him and daily contact, as an advantage and a high privilege.

Mr. CULLOP. Mr. Speaker, IRVIN S. PEPPER was distinctly an American and furnished a striking illustration of what a man in this country can do for himself if he possesses the proper genius and stability of character.

In him were to be found the essential elements necessary to cope with the obstacles which often prevent young men with less courage and determination from accomplishing their ambitions, causing them to fall by the wayside and writing on the pages of human history the failure of a life which had promised much for the country and humanity. He fought his way from the humble and obscure surroundings of his birth and early youth to a position of great distinction and honorable usefulness, furnishing an example which will long live with the people of his State as a character to which many will point with pride as an inspiration to young men and one worthy of imitation.

Doubtless many young men struggling to overcome adversity, almost ready to surrender the hopes of their ideals, relinquish the objects of their ambitions, will renew their courage and redouble their energies as they read and hear from others what this splendid young man accomplished in the short span of the life allotted to him and how his memory is sacredly cherished by those who knew him best and loved him most.

He possessed the essential elements calculated to endear him to all who knew him. Kind in manner, careful in conduct, ever thoughtful of the rights of others, considerate in speech and treatment, he won and retained the friendship and esteem of all who came in contact with him. Unyielding in his determination, firm in his purpose, reserved in deportment, he was able to win the objects he coveted and carry his purposes into successful execution.

His life was made up of successful efforts, because he knew no such thing as failure. Less than 40 years of age, he had earned the means to educate himself, had successfully taught school, held the office of school superintendent, had been a soldier in the Spanish-American War, county attorney, and twice elected to Congress, and at the time of his death was a formidable candidate for the United States Senate from the great State of Iowa.

In every position held by him he had filled the expectations of his warmest and most devoted friends and reflected credit upon the people who were so fortunate as to be his constituents. He earned and deserved the honors with which he was crowned and the gratitude and plaudits of the people he represented. The search of history will furnish but few men so young to have won so many honors all justly and deservedly earned.

He occupied a warm place in the hearts of the people of his State. They knew his worth. They respected his merits and intrusted him with their confidence. The love of honorable place in the public eye is a laudable ambition. It is worthy of the best efforts, the greatest sacrifice any man can make. It pledges good and faithful public service, careful and scrupulous conduct in office, and the honest administration of public duty. It is ever the promise, the hope, the security for duty well performed, and the progress of the Nation's ideals, the improvement of its civic affairs, for the betterment of the people who bear its burdens and share in its blessings.

Death claimed him as his star was in its ascendency, rising to take its place in a greater constellation where opportunity would enable it to radiate farther and wider in the sphere of human usefulness and where he might accomplish more for the great advantage of the people whom he loved and who in return bestowed on him their unbounded confidence and crowned him with the greatest laurels at their disposal. Stricken down in the prime of his life, when opportunity was beckoning and bidding him to higher places of usefulness, to greater fields of human endeavor, he sleeps the long last sleep in the bosom of his beloved State, surrounded by the friends who supported and encouraged him in life, mourned him dead, and emulate his example while living as an inspiration to the young of that great State that it may stimulate them to greater activities, higher ideals, and nobler purposes in life as a striking example of what a young man, surrounded by adversity, may accomplish if he will try, and in trying be true to his purposes and faithful to all the responsibilities in him reposed. I shall never forget the many splendid encomiums paid him at his funeral and how people in all stations of life, irrespective of politics, stood at his bier viewing for the last time all that was mortal of the man who had been their friend and companion and who had won and retained their esteem and had never abused their confidence.

Sleeping the sleep that knows no waking, on the summit of a beautiful hill near by his father's home, overlooking the prosperous city of Ottumwa, nestled on the rich and rolling prairies of Iowa, teeming with the bounties of life, free from the surcease of the busy world, unmindful of the strifes agitating the people as they come and go, he awaits "the great Judgment Day" for the reward of a life well spent and a career of duty well done.

Mr. TOWNER. Mr. Speaker, it is a privilege for a Representative from Iowa to speak honoring the memory of one of her sons who so creditably and worthily served her on the floor of this House. IRVIN S. PEPPER was a native of Iowa, and his life work was inseparably associated with that Commonwealth. Out of her splendid citizenship he came, and in her service he died. He was proud of his birthright and citizenship, and glad that the opportunity came to him to serve the State he loved so well.

Farm boy, school-teacher, lawyer, Congressman, these are the steps that marked his progress. I remember his telling me how, when following the plow, he thought out a plan by which he could prepare himself to teach school and then study law and become a lawyer. This modest ambition was not satisfied until he was 29 years old. But he kept his purpose steadily in view, and finally succeeded. It was a long, hard road. In order to accomplish it he became the private secretary of Congressman Wade and came to Washington.

It was while here, working hard as secretary and carrying on his studies in the law school, that he began thinking that he might come to Congress.

He told me how the idea kept its place in his thoughts that perhaps matters might shape themselves to give him the chance. When he went back to Iowa to commence the practice of law he kept constantly in mind this ambition, and when the opportunity came he was ready to seize it. It was a hard fight, but he won.

The endeavor to rise above the general average, the effort to achieve distinction is one of the motive powers of civilization. Especially is it a characteristic of American youth. Here, where the doors of opportunity swing wide to merit and worth, here where nearly all the examples of success are those where striving against odds marks the pathway to distinction, there is constant incentive and almost certain attainment for honest endeavor.

In every country there is a certain average of capacity. Distinguished men, great men as they are called, leaders in every line of effort are those whose energy and capabilities rise above the general average. In France their bourgeoisie, in England their "middle class," and in the United States our "common people" constitute a somewhat undetermined but still definitely imagined general average. In America we say we have no classes. This is true if by that we mean a fixed and unchanging status. Yet the average American citizen is a concrete and palpable thing. When we speak of the common people in America we mean the general average, and because that general average is so superior to the general average of other lands, we rightly give it the tribute of our respect and consideration.

But whence comes distinction? Not from distinction. It is not from the homes of the great that great men come. It is from the homes of the humble. Distinction arises from the general average. High as that average is in America, it is not to attain it that the American youth strives. It is not to become the average politician that he studies political economy and history. It is not to become an average lawyer, or physician, or engineer that the student aspires. It is of distinction that he dreams. It is for distinction that he strives. His vision is not of the plains, but of the heights, sun-kissed and golden. The commencement orators promise that with effort all may be presidents or governors excites our ridicule. But, after all, this aspiration for the highest has a sound basis. It is the lure that shining through the open door of opportunity has led the American boy, poor and portionless, to distinction and honor; yes, even to immortality and undying fame.

We have taken a boy from a log hut and made him President. We have taken a hunted refugee from foreign oppression, made him a citizen, and placed him in the Senate Chamber, that from such supreme vantage ground he might so plead the cause of liberty that all in the world might hear. We have taken a pauper's child and made him a merchant prince, to show that freedom is the wisest postulate of economics.

Washington in his inaugural address declared that "the destiny of the republican model of government," was "justly considered as deeply and perhaps finally staked on the experiment entrusted to the hands of the American people." Now, we are thinking that these words were not merely the expression of a conjectured hope, but rather the pronouncement of an inspired and justified belief. For nowhere else in all the world, at no time in all the history of nations, has it been so easy to achieve distinction by effort and merit alone as in our own beloved land to-day.

This is shown by the career of IRVIN PEPPER and others like him. His life and success are at once an inspiration and a promise. Hopeful, indeed, would it appear to all those who, like him, are poor, but who aspire; hopeful for all those who can not expect the help of others, but who must depend on their own unaided efforts; hopeful for all those who have only industry, ambition, and honest purpose to speed them in the race of life.

I am glad to draw this other lesson from his life. No one thing so helps a career as much as striking integrity of character. The time when shining gifts without character could hold the confidence of men has gone by. Tinsel now will not suffice. Pure gold is demanded.

I know that with many this view is not accepted. To such the trickster still may win, the scheme still succeed, the demagogue and the corruptionist still have place and power. Exceptional cases and individual instances can be cited to prove their contention, but the rule is otherwise. The bosses have been largely dethroned, the corruptionists driven from public life—we have "turned the rascals out." The people have given unmistakable evidence of their moral soundness. A more sane and wholesome state of public opinion never was known before. The flood of indignation against the public and private wrongdoer has borne the people to a moral height seldom if ever before attained.

Never was there a time when the young man who wishes to strive unselfishly for the betterment of mankind could with more promise of success gird on his armor. Never could an ambitious youth who desires to dedicate his life to honor and truth be more certain to find a welcome for such service.

It is a great age in which we live. To the men and women of to-day, as gradually there comes to them a fuller realization of their obligations to their fellows, there is born a greater charity, a larger humanity. Selfish interests are not primary, and the individual finds his greatest happiness in serving and helping others. More and more the citizen gives up his private right, his individual gain for his fellows. More and more does society become a scheme of individual sacrifice for the common good. No government of to-day can be found which does not in some measure sacrifice individual interests for the common welfare. And yet, by so doing they do not enslave themselves, they only establish a larger liberty. It is not by isolation, but by association that men live the larger life. And so government, which is only a rule of association, gives while it takes away, frees while it restrains.

No laws can be effective for good that are not based on the conscience of the people and supported by their moral sanction. And no work for the public good can accomplish anything which does not ally itself with that public conscience and strive for the approval of that moral sanction.

There can be no government without men. No matter what its form, it will be a reflex of their character. John Stuart Mill said: "Political institutions are the work of men; owe their origin and existence to human will. Men do not wake on a summer morning and find them sprung up. Neither do they resemble trees, which when once planted are ever growing while men are sleeping. In every stage of their existence they are made what they are by human voluntary agency." We are apt to forget this in America. We have almost an adoration for form. We change constitutions to change conditions. We demand a law when we need a man. It is astonishing how many political ills could be cured by the simple expedient of electing good men to office.

God give us men—
Men whom the lust of office does not kill,
Men whom the spoils of office can not buy,
Men who possess opinions and a will,
Men who have honor, men who will not lie.

Kipling put it still better when he described the man who could fully meet the demands of the hour:

With great things charged, he shall not hold
Aloof till great occasions rise,
But serve, full harnessed, as of old,
The days that are the destinies.

He shall forswear and put away
The idols of his sheltered house;
And to necessity shall pay
Unflinching tribute of his vows.

He shall not plead another's act,
Nor bind him in another's oath,
To weigh the word above the face,
Or make or take excuse for sloth.

The yoke he bore shall press him still,
And long ingrained effort goad
To find, to fashion, and fulfill
The cleaner life, the better code.

Gladstone, in one of his great papers, after enumerating the material achievements of England and America, said:

But all these pompous details of material triumph is worse than idle, unless the men of the two countries shall remain or shall become greater than the mere things that they produce, and shall know how to regard those things simply as tools and materials for the attainment of the highest purposes of their being.

And so it is that we read our surest promise of perpetuity as a nation in the character of our citizenship. We see the guaranty of a cleaner political life and a better national code in the prevailing cleanliness of our public men, in the higher ideals of our national life.

In large measure he whose memory we honor this day possessed those elements of sterling manhood and integrity of character that make the standard of which I speak. It was

to them he was indebted for his success. It should be a source of satisfaction to those who love him, that in memory he will ever be recalled for those traits and characteristics which merit unreserved approval. It should be an encouragement to the student and observer of our times that so strongly is the love of justice, the appreciation of righteousness in public service, the admiration for sterling worth ingrained in the consciousness of the people, that one who bases his appeal on these meets with instant approval and steady support.

Mr. RUSSELL. Mr. Speaker, to me it is always a sad occasion when this House meets to consider a resolution like this, when the friends of a former colleague meet in this Chamber to honor the memory of one who has passed away, but my feelings of sadness are intensified when we meet as we do to-day to honor the name and the memory of one who was to me in life such a sincere and such a devoted friend.

I was appointed by the Speaker of this House, who knew that Mr. PEPPER and I were warm friends, to attend his funeral, and I was requested by his friends to deliver a eulogy upon his life and character at the funeral services in his home State. Speaking as I did then in his presence, as he slept in death with my heart filled with grief and emotion, I perhaps better expressed my love and friendship for him, than I could do to-day, and may be pardoned if I repeat in substance some of the sentiments uttered on that occasion.

I met Mr. PEPPER soon after his election to Congress and before he had taken his seat. I was at once attracted to him by his splendid open countenance, his natural frankness, and his generous, manly spirit. We soon became warm personal friends, and as our acquaintance became more intimate the ties of friendship that bound us together became stronger and stronger.

During his service in this House I met him almost daily, both officially and socially. I knew his ambitions and he knew mine. Our mutual confidences and mutual sympathies, it seemed to me, gave vitality to our ambitions and strength to the hope of the future success of us both.

The last day he spent in Washington we took dinner together, and he advised me at the time of his contemplated trip to his home State that he loved so much, and of the purposes of his mission.

Soon afterwards I learned that he was seriously sick and I frequently inquired of his condition. On Friday before his death I was informed that he was out of danger, and went at once to my office and wrote him a brief letter congratulating him upon the information that I had received. That letter, I am now informed by his sister, she read to him on the last day of his life, and but a few hours before his death. In my letter at that time I addressed him as "My dear PEP," a term which to-day might seem disrespectful, but it was not so then; it was to his associates in Washington a term of endearment and one that was inspired by the warmest personal friendship.

On Saturday, the following morning, his secretary showed me a telegram stating that our friend had suffered a relapse and was much worse. I at once felt that all hope of his recovery was gone, knowing as I did of his long and serious sickness and of his necessarily weakened physical condition. On the following Monday morning, when the message came announcing his death, and when the official flag was hung at half-mast, it seemed to me that a cloud of gloom at once covered this capital city, and I know that a feeling of sadness filled the hearts of all who knew him.

About two weeks before his death a bill was under consideration in the House which carried an item for a pension for the deserving widow of an old Union soldier in Mr. PEPPER'S district. An amendment was offered, and an effort made to strike that item from the bill. I at once arose in my place to resist the amendment, stating to the House that this item in the bill was introduced by Mr. PEPPER, who was at that time in his home State seriously sick, and as he was not able to speak for himself I desired to speak for him. I defended the item, the amendment was defeated, and the item remained in the bill and was approved and passed by the House. It will be a great satisfaction to me till the day of my death to remember that I seized this opportunity, the last one that I could ever have during his life, to do him a personal favor. Knowing him and his loyal friendship as I did, I am perfectly conscious of the fact, that if the circumstances had been reversed he would have done as much for me.

Mr. PEPPER had the confidence not only of his constituents in his own district, but was highly esteemed by all of the people of his State, and if he had lived there is but little doubt that he would have been elected to places of higher political distinction. He was a man of great industry and with a remarkable capacity for work. The political party to which he belonged recognizing these qualities had selected him as the secretary of the Democratic congressional committee. As a member of that committee I, at his request, had the pleasure of placing him in nomination at the time of his election.

In the cemetery at Columbia, Mo., where the university of that State is located, the monument at the grave of Dr. Read, an ex-president of the university, bears this inscription: "I tried to do my duty." These were the last words spoken by him. I think that I might with propriety appropriate these words to-day expressive of the life and efforts of our departed friend in whose memory we have met to-day. I know, and every Member of this House knows, that he tried to do his duty and succeeded well.

The confidence, the friendship, and the esteem of the people of Iowa were plainly shown by the large number of distinguished citizens from all parts of the State who attended his funeral. I have never seen a more positive demonstration of universal grief, nor a more genuine expression of profound respect for the dead, than I witnessed on that occasion. There were probably a thousand present in the church, with many more outside who were unable to gain admission. The tears of hundreds of strong men and women gave unmistakable testimony of their love for him in life and for their grief at his bier.

Mr. PEPPER had been an active member of the State militia, and the members of that organization, and all others who ever knew him as he was, were devoted to him as a comrade and a friend, and gave to him a military burial.

The newly made grave was at the brow of the hill overlooking the beautiful little city, and surrounding country, the scenes of his childhood and youth. When his body was slowly lowered into his grave the last volley of his former military comrades was fired over his remains, and as the echo of their solemn notes died away in the distant hills we saw the body of our friend laid to rest.

It was a sad but an impressive scene, and if he could have spoken and prepared the ceremonies and surroundings in every detail, it would not have been changed. In obedience to his last request he was buried by the side of his angeled mother. The ceremonies were plain and simple, in harmony with the life he had lived. The snow-covered landscape was emblematic of his pure life and spotless character. The many floral offerings from former friends and associates were indicative of their love and sorrow. His grief-stricken father and other living kindred stood at the foot of the open grave surrounded by many of the most intimate friends of his professional and official career. Every face, every flower, and every tear seemed to breathe in respectful silence the universal grief, and a loving farewell to our friend, until we shall meet and greet him in a better and a brighter world in that spirit land beyond the grave.

Mr. MOORE. Mr. Speaker, it is something of a coincidence that my bundle of mail this morning should contain a letter from the widow of a soldier saying she had recently written to Mr. PEPPER in support of a bill to correct her husband's military record and that she had not received an answer. She did not know that the service our lamented colleague had undertaken to perform as the chairman of a subcommittee of the Committee on Military Affairs had suddenly ended and that he had responded to a higher call. But her letter, written in the stress of her anxiety, reminded me of the very great devotion to the detailed work of the House which characterized our departed friend from Iowa. As a member of the Committee on Military Affairs he was painstaking and assiduous. To members who had business with that committee he endeared himself by his courtesy and the personal attention given to their claims. It was a pleasure to present a case to Mr. PEPPER, and whether he found himself in favor of or against a bill, his decision left no sting.

And now that we are come to extol his memory, particularly those of us who saw him enter this House, the wonder is that in so great an assemblage of men chosen from the body of the people because of their experience and public service, he should have made so marked a progress in so brief a period. Mr. PEPPER was only 35 years old when he came into this body. He served throughout the Sixty-second Congress only. In that two years he took an advanced position in committee and on the floor. He was modest, but he was forceful. He did not obtrude himself into the proceedings at any time, but when he felt called upon to speak he did so unhesitatingly and with emphasis and decision. Indeed, it was early evident that Mr. PEPPER possessed the elements of statesmanship and that in due course his influence would be strongly felt in Congress.

It is not my purpose to speak at greater length, Mr. Speaker. In God's own time and in His own good way he has called our colleague from the scene of his earthly activities. We wonder that one so young, so well equipped for service to his

fellow men, should thus be taken, but it is not for use to murmur or complain. We know the caliber of man he was; we know the excellence of his heart and mind; we know had he lived that laurels would have clustered thick upon his brow. All this we know and treasure in our memories. 'Tis the best that we can do.

Mr. GOULDEN. Mr. Speaker, we have met to-day to do honor to the memory of a former colleague. IRVIN S. PEPPER, late a Representative from Iowa, served his district, his State, and the Nation well in the Sixty-second and a part of the Sixty-third Congress. He was known as a patient, hard-working Member, ever faithful to the call of duty. Nothing was too small or trivial when he took it up, giving the best that was in him. He was always kind and courteous, ever ready to help those that needed it.

He came from a sturdy stock of farmers from that splendid State that has produced so many patriots, soldiers, and statesmen. Like many sons of the farm he taught school, and in many respects was a self-educated man, of which our favored land has produced so many eminent successful men in all walks of life.

These sturdy Americans that have so materially aided in the development of the country acquired their strength, their clean minds and hearts by contact with nature and nature's God by working on the soil, man's best and truest occupation.

IRVIN S. PEPPER was a splendid illustration of this truth. Actuated always by the principles of right living, honest purposes, and an unflinching loyalty to his country, his loss is seriously felt.

Of him it may well be said what the angel spoke to the wise man of the Far East—

> Abou Ben Adhem (may his tribe increase!)
> Awoke one night from a deep dream of peace,
> And saw, within the moonlight in his room,
> Making it rich, and like a lily in bloom,
> An angel writing in a book of gold:
> Exceeding peace had made Ben Adhem bold,
> And to the presence in the room he said,
> "What writest thou?" The vision raised its head,
> And with a look made of all sweet accord,
> Answered, "The names of those who love the Lord."
> "And is mine one?" said Abou. "Nay, not so,"
> Replied the angel. Abou spake more low,
> But cheerily still, and said, "I pray thee, then,
> Write me as one that loves his fellow men."
> The angel wrote and vanished. The next night
> It came again with a great awakening light,
> And showed the names whom love of God had blessed,
> And lo! Ben Adhem's name led all the rest.

It is a privilege to lay this brief tribute to the memory of a good man and a true patriot, IRVIN S. PEPPER, late of Iowa.

The SPEAKER pro tempore (Mr. TOWNER). The Chair will now recognize the gentleman from Illinois [Mr. TAVENNER].

Mr. TAVENNER. Mr. Speaker, if a stranger had been in the city of Muscatine, Iowa, on the morning of Sunday, December 28, he would have observed that something out of the ordinary was taking place.

He would have noticed groups of men standing about the streets conversing in low tones, and that in every face there was an expression of sadness. As the day advanced, more and more people appeared. By 1 o'clock hundreds had gathered, and then they moved silently toward one of the large churches and went inside, and the down-town streets became deserted.

Muscatine on that day was a grief-stricken city. Muscatine had sent IRVIN S. PEPPER to the Halls of Congress because it had believed in him, and after arriving in Washington he had proven true to the trust that had been reposed in him. He had now been taken by death, and no one in Muscatine on this day could have failed to notice that the hearts of the people had been touched.

Funeral services for Mr. PEPPER had been held in Ottumwa on Friday, following which was planned a special tribute in the form of this great memorial meeting held in Muscatine two days later.

When I saw the doors of the Muscatine church thrown open, and the people pour into and quickly fill the building, the thought occurred to me that it would be a great mistake to assume that this great audience of people had gathered to pay tribute to IRVIN S. PEPPER simply because he had been an able Member of Congress. The mere fact that a man was a Member of Congress would never of itself alone have touched the hearts of the people of this community as the death of IRVIN S. PEPPER touched them.

There was something deeper than his official position, and more important, which explained the presence of so large a throng, and that something was the fact that his life outside Congress, and his acts in Congress, proved that his heart beat in sympathy with the plain people of this land.

Simply because a man is elected to Congress is no indication of greatness; a Member of Congress is worth while only when he takes advantage of his presence here to do something for the masses of the people.

Some men come to the halls of Congress from humble surroundings, as did Mr. PEPPER, only to acquire new and aristocratic ideas and sympathies, and to gradually and unconsciously permit to steal over them a feeling of shame, indeed, if not of contempt, for the old-fashioned plain people at home who, believing their protestations of sympathy, were the very ones who had elevated them to their high positions of trust and honor.

IRVIN S. PEPPER was not one of these. To him it always remained a pleasure to stand by and espouse the cause of that vast majority that Mr. Lincoln referred to as the plain people.

It was IRVIN S. PEPPER who, on the floor of this House and before the committees of the House, fought the introduction of the inhuman Taylor system of scientific shop management, a cruel process of scientifically grinding down the spirit, the hopes, and the ambitions, as well as the physical bodies of those who toil. Of course, strong pressure was brought on Mr. PEPPER to abandon that fight, but he never wavered, and there is pending before one of the committees of the House now, ready to be reported, a bill bearing his name which will prohibit the introduction of the nerve-wrecking Taylor system in the Government arsenals.

Representing adjoining districts, Mr. PEPPER and I were thrown into contact almost daily, and it was our habit to confer on nearly everything. Next to the distinguished Speaker of the House, the Hon. CHAMP CLARK, who was one of the first to help me when I was at the bottom of the ladder struggling to get along, IRVIN S. PEPPER probably did more toward bringing about my election to Congress than any other one man. Mr. PEPPER had no opposition in the last campaign, and took it upon himself to make my fight for a seat in this body his fight, and it seemed to me there was absolutely nothing within his power that was too much for him to do for me.

I mourn for IRVIN S. PEPPER, not only because he was one of my best friends and benefactors, nor merely because he was a Member of Congress, but because I saw him on the firing line in this House, and I saw that he was not ashamed of the cause of the common men and women from whose ranks he sprang; and I observed, too, that whenever the line was drawn as between the forces of special privilege on the one hand and the welfare of all the people on the other, without hesitation and without apology IRVIN S. PEPPER quietly took his place on the side of the plain but godly people who gave him birth.

When IRVIN S. PEPPER passed to the world beyond the people realized they had lost a friend—they were sad.

The SPEAKER pro tempore. The Chair will recognize the gentleman from Iowa [Mr. KIRKPATRICK].

Mr. KIRKPATRICK. Mr. Speaker, I am here to-day to assist in paying tribute in these last sad rites of a departed Member of this House, and I now come to place, as it were, a flower of love and reverence on the newly made grave of IRVIN S. PEPPER.

Notwithstanding the seriousness of the occasion, I am happy in the thought that I have known the Pepper family for many years. The father of the deceased is now bending with age; still he is one of God's noblemen. I have known the deceased from childhood. He was an exemplary boy, always standing for the right and high ideals. Young PEPPER came from a sturdy stock, as evidenced by those who survive him. Not long before his death he was telling me of his departed mother, and, among other things, said:

> If I am permitted to enter the "gates ajar" and do not find mother there, I do not feel that such a condition will be heaven to me.

By reason of his parents having been pioneers in the settlement of the great West he was frequently obliged to face the storms of adversity. In life he was my friend, my neighbor, and my colleague in this the Sixty-third Congress.

In the triumph of his early ambitions the summons came, and he was called beyond the veil which separates all earthly vision from the paradise of God.

> Sure when thy gentle spirit fled
> To realms beyond the azure dome,
> With outstretched arms God's angels said,
> "Welcome to heaven's home, sweet home."

[Mr. LOBECK addressed the House. See Appendix.]

Mr. GREEN of Iowa. Mr. Speaker, I first met Mr. PEPPER when I came into this House as the result of a special election some three years ago. It was easy to become acquainted with

him and our relations were always most cordial. He was the youngest of our delegation, and if I had given a thought to the subject I would have considered that he was likely to be the last to pass away. If he suffered from illness, it was known only to his intimate friends. To me he seemed to be endowed with unusual vigor and strength, and especially fitted to endure the stress of campaigns and the strain incident to service in this House, to which so many succumb, and which since my membership has laid such a heavy toll upon us. His untimely demise admonishes us of the slender hold which we have upon life, and the uncertain tenure of our existence.

There are some who as they draw near the sunset of life are able to look back upon a long career of activity and feel that they are ready to lay down life's cares and burdens. To those who are wearied and discouraged death often seems a happy relief, and those whose efforts have been crowned with success can feel that their work is finished and their race is run. But to the young man who finds in each day a new inspiration, and cherishes the belief that as the years go by he will find new opportunities for rising higher and higher the future is radiant with hope and full of promise. Yet the inexorable messenger of fate spares none, and beckons too oft to those for whom the panorama of life is just beginning to unfold. So it was with our departed friend. Success came to him early. Young as he was he had the promise of a notable career. He had made for himself a position. He had friends in high places, and an admiring and faithful constituency. He could look forward through the vista of years, and see no obstacle that he could not overcome. But just when hope was most high, when the future was most promising, the grim angel of death crossed his path and he heard the call which the strongest can not resist. The promise of the morning faded into the blackness of night. Life's dreams and actualities alike were no more.

Mr. Speaker, such incidents are inexpressibly sad. In our weakness we can not comprehend why such strokes should fall. It is a part of the riddle of the universe that we can never solve. We can only bow our heads in submission to the Ruler of all knowing that a higher wisdom than ours shapes the course of men and nations, and that not a sparrow falls to the ground without His notice.

Another has come to the place of our departed colleague. Able hands will take up his work. Congress does not pause in its duties upon the death of one of its Members no matter how great or influential, but it is well that no public matters, however important, should prevent our rendering a tribute to the memory of the departed.

Mr. PEPPER'S kindly and genial manners attracted to him a host of friends. There was no malice in his disposition nor evil intent. I never heard him speak ill of another, or knew him to injure anyone. The same qualities that made him so attractive in private life contributed to his success in the political arena. He had a strong following in his own district and no one here could refuse him a favor. To meet him was to like him, and he was as good a companion as a friend. It is not alone in public life that his loss will be felt. We shall miss him in that social intercourse which goes far to brighten our lives and ease our tasks. Never again shall we hear his cordial greeting or see his pleasant smile. Let us trust that in another world he may find that sunshine and hope which he so freely imparted when with us.

Mr. CONNOLLY of Iowa. Mr. Speaker, farmer boy, school teacher, county superintendent of schools of Muscatine County, private secretary to Congressman Wade, county attorney of Muscatine County, twice elected by the people of the second Iowa district as their Representative in Congress, and at the time of his death the probable nominee of his party for the office of United States Senator from Iowa, this, in brief, was the ladder of achievement scaled by IRVIN S. PEPPER during a life prematurely and unexpectedly terminated, and with his passing went one of the most promising, one of the noblest, one of the kindest figures in the public life of Iowa.

There are Members of this House who knew him longer, but I question if any knew him as intimately as I did. In the December following the election of 1912 I made a journey to Panama in his company. We shared the same stateroom, and on this delightful trip was born a friendship that grew apace and bound us together by bonds "though light as air were strong as bonds of iron." The frankness of his character, the cheeriness of his disposition, the liberality and unselfishness of his spirit, the quality of his heart and mind, at once drew me to him.

In the balmy breezes of the Caribbean we cemented our comradeship, underneath the southern cross we exchanged our confidences, and the sheen of the moon upon the waters seemed to mark the clear, straight path of a brotherhood that never wavered.

Outside of the love of womankind there is no sweeter, nobler sentiment than the love of a man. The pure, unselfish, loyal love of a kindly man for his fellowman.

Although somewhat my senior we were near of an age and being bachelors we had not known the love of those dear helpmates of life that make the home the shrine of perfect domestic happiness, but we had both been trained in the old-fashioned school of family affection and had responded to the love of a splendid motherhood and fatherhood. We had known the love of women who had watched us from the cradle. We had seen the lovelight in their eyes, that light that never fails, that shineth in the darkness, that beacon that led us in the blackness of worldly tempests to the harbor of peace and righteousness. And in one of our fraternal conferences he had told me that it was the mother who had determined him to run for Congress. When urged to make the race his inclination was to decline, and as he expressed this view to the family gathered around he saw the light of disappointment in the mother's eyes. He read in them the aspirations and ambitions of his dearest friend, so he turned about and addressed himself to the earnest work of the campaign. Her love and cheer were his inspiration, her hopes and pride sustained him, but the pathos of it all came when she was called away by the Great Elector of the Universe just upon the eve of the son's election. As he recalled that incident so epochal in his career there was moisture in his eyes and we gazed silently out upon the waters under the spell and thrall of homely sentiments, the memory turned willingly back to the thoughts of home, and we heard again the songs of childhood. Yea, at that moment there arose above the strains of splendid orchestras, more appealing than the chants of practiced choirs or the tonal peal of a great organ in some grand cathedral, a voice stealing through our sympathetic ears and swaying the tendrils of our hearts—the homely croon and mellow lullaby of those silver-haired guardians of our birth and being.

In the passing of IRVIN PEPPER this House has lost one of its most efficient and capable Members. We all miss his smile and friendly greeting. I feel a peculiar personal loss, as our daily associations were most intimate and agreeable. He was my good friend, my intimate associate, my chum. It is hard to realize that he has gone for good. In the Office Building I turn unconsciously toward his door as if to meet him. In the cloakroom and on the floor I look in vain for his suggestions and counsel. In the evening, after the day's work, I await his call for the customary walk up the Avenue. At every turn and in each hour I yearn for the "touch of a vanished hand and the sound of a voice that is still."

In the last flickering moments at the hospital, with the eyes growing dim and the heartbeats waning, the spirit halting within the vestibule of eternity—he asked his brother about his chances, and the answer was, "You are going to your final sleep," and then his old philosophy in life expressed itself in his familiar phrase, "Well, whatever is, is," and with a smile of fortitude upon his kindly face he went—

> Not like the quarry slave at night,
> Scourged to his dungeon, but sustained and soothed
> By an unfaltering trust, approach the grave
> Like one that wraps the drapery of his couch 'bout him
> And lies down to pleasant dreams.

And in the quiet of that night I voiced our common sentiment with the old lines—

> If I were hanged on the highest hill,
> I know whose feet would follow me still.
> Mother o' mine, mother o' mine.
>
> If I were drowned in the deepest sea,
> I know whose tears would come down to me.
> Mother o' mine, mother o' mine.
>
> If I were damned of body and soul,
> I know whose prayers would make me whole.
> Mother o' mine, mother o' mine.

Others can relate his triumphs, other tongues tell of his honors, of his legion of friends, of his numerous activities.

He stood high in the Masonic and other fraternal lodges that had recognized his sterling manhood, but it was the lodge and shrine of that pioneer, old-fashioned parental home that impressed upon him the hall-mark of character and sentiment and that had influenced the course of his honorable career. And now that course is run. The mother had gone before to prepare for his coming. At the grave I saw the aged father, bowed with grief, as the youngest of the flock slipped quietly into his couch upon the snow-clad hill. The brothers and sisters gathered around with heavy hearts, and I could see in the eyes of each the undisguised and unreserved sentiment of the old-fashioned family love for the brother and the son. In such homes and

through such genuine attachments are the finer, higher, nobler instincts reared.

Mr. McKELLAR. Mr. Speaker, upon coming into the House in December, 1911, one of the first Members that I came to know well was IRVIN S. PEPPER. Only a short time after the beginning of the session he and I both were appointed on a committee to witness the opening of the Oversea Railway to Key West, Fla. On that trip we became warm and true friends—a friendship that was one of the most delightful of the many I have made here.

In politics we had the same views, the same ambitions and aspirations. In social life we had largely the same friends. We served for a long time on the same committee in the House. Rarely a day passed that we were not together. Both being bachelors and about the same age, the friendship that grew up between us was close and intimate and will never be forgotten by me.

IRVIN PEPPER was absolutely straight, clear-headed, vigorous-minded, strong in his views, temperate in his speech, kindly, yet determined, in all his dealings with men, and was, as I esteemed him, one of the highest types of the American citizen.

No Member was more generally or more sincerely loved by all who came within the sphere of his association. No Member deserved more the great popularity that was his.

His ambition was to come to the Senate from his beloved State, and he was to be a candidate at the approaching election, and with great prospects of success. His death was a great loss to his State and to the Nation, but a far greater loss to his loved ones, both relatives and friends. He was cut off in the very flower of a splendid young manhood, and while our hearts are sad that he was taken away, we, who were his friends, will ever cherish his memory and feel grateful that we were privileged to have known him.

Mr. BALTZ. Mr. Chairman, we withdraw for a short time from the scenes of political strife to pay the last sad rites to a departed brother.

His death in the very prime of an active and useful career suggests again the words of Burke on a similar occasion, "What shadows we are, and what shadows we pursue!"

While my acquaintance with Mr. PEPPER was not of long duration, I knew him long enough to be impressed with his sincere and manly stand on all public issues and to be charmed by his courtesy and geniality.

One trait of Mr. PEPPER's character was his tireless devotion to his public duties. Few Members of Congress displayed greater zeal and industry in their public career.

The people who are the fountain of power in this country are quick of discernment. This is strongly illustrated in the career of Mr. PEPPER. He justified in the fullest measure the confidence reposed in him by his constituents. As a Member of the House and as chairman of a committee he gave his time and talent unstintedly to the service of his district, his State, and his Nation. In such a life there is inspiration and encouragement. The memory of his faithfulness may well nerve us to greater faithfulness in our own efforts.

In the presence of death it is hard to sing a song triumphant o'er our tears and our fears; hard, indeed, is it for the bereaved when their dearest is taken from them. But in this terrible test of our faith we have some inspiring examples in the saintly ones who have suffered before us. When Prof. Andrews Norton, of Harvard, was called upon to mourn the loss of his only daughter, dead at womanhood's door, with unshattered trust in God he sat in his study while his beloved child slept the eternal sleep in an adjoining room, and there and then that godly man wrote these brave and courageous words, and with all humility may I commend them to those who as relatives or friends mourn the loss of our departed comrade:

My God, I thank Thee, may no thought
  Ere deep Thy chastisements severe;
But may each heart by sorrow taught
  Calm each wild wish, each anxious fear.

Thy mercy bids all nature bloom,
  The sun shines bright and man is gay;
Thine equal mercy sheds the gloom,
  That darkness round his little day.

Full many a throb of grief and pain,
  Thy frail and erring child must know,
But not one sigh is breathed in vain,
  Nor does one tear unheeded flow.

Thy various messengers employ,
  Thy purposes of love fulfill;
And mid the wreck of human joy
  Let kneeling faith adore Thy will.

ADJOURNMENT.

Then, in accordance with the resolution previously adopted (at 1 o'clock and 55 minutes p. m.), the House adjourned until to-morrow, Monday, May 4, 1914, at 12 o'clock noon.

SENATE.

MONDAY, *May 4, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we thank Thee for every hard task of life, for all our conscious sense of incompleteness, for all hunger of heart or body, for we believe that every limitation and all that narrows and restrains is but a prophecy of the larger life that Thou hast for us. We pray Thee to save us from the path of least resistance. Stir us up to be heroes in the great strife of life. Give to us the spiritual equipment for the highest service among men. Lead Thou us on; in every path do Thou direct our steps. May our lives be God-centered; and in the day that shall dawn upon us in the world that knows no limit, no setting sun, may our life be adjusted and attuned to the infinite. For Christ's sake. Amen.

The Journal of the proceedings of Saturday last was read and approved.

SETTLERS ON SNOQUALMIE FOREST RESERVE LANDS, WASHINGTON.

Mr. THOMAS. Mr. President, throughout the East there is considerable adverse criticism of the sentiment of the western people, without reference to party division, concerning some features of what is popularly known as conservation. I want to read into the RECORD an extract from the World of yesterday, which sets forth in graphic terms an individual instance of hardship and injustice suffered under the administration of the land laws, which is one of a great many of similar character, although differing, perhaps, as to some of the facts. I simply wish to read it into the RECORD without further comment, in order that the country may perceive why this feeling is so profound in the West and how well it is justified. This article is entitled "Nation seizes home fought for for 12 years—Homesteader ousted after suffering hardships in wilderness and spending $1,800." It is dated Everett, State of Washington, May 2.

[From the World, Sunday, May 3, 1914.]

"I have spent the best years of my life trying to build up a home for my family, only to be informed at this time by the United States Government that my claim of 160 acres near Galena is void by reason that the land has been thrown into the forest reserve."

W. E. Dermott, now of this city, thus summarizes the disastrous outcome of 12 years' struggle against the wilderness and its privations 6 miles from Galena, in the Cascade Mountains.

"Twelve years ago last January I took up my homestead 6 miles the other side of Galena," continued the contractor and builder, whose hair has turned gray while he and his family strove against heavy odds to wrest a livelihood from the fertile bottom lands along the south fork of the Skykomish River.

"Two years after we settled on the fine agricultural land the Interior Department, acting on a recommendation from the Forestry Department, included our acreage in the Snoqualmie Forest Reserve. B. C. Hopkins, of Everett, and L. Servis and P. E. Marks, of Snohomish, also had homesteads, but were some time ago frightened away by the Government; but I have expended $1,800 in erecting a one-and-a-half-story house and several other buildings, in planting 1,500 strawberry vines, in clearing 3 acres of land for garden purposes, where we can raise everything in fruit and vegetables we need and more, too; so you see it was harder for us to give up to the mighty Government."

Six or eight months each year the Dermott family lived on the 160 acres high in the mountains, bending every effort to make a comfortable home and investing in improvements every dollar they could earn during the few months of the year when Dermott followed his trade in Everett.

"After all we have accomplished up there," said Dermott, "the Government has informed me that we did not live long enough each year on the homestead, and the department also found fault with the nature of our improvements. I have taken up the question of my rights with our Senators and Representatives.

"There were plenty of hardships during most of the 12 years we lived in the mountains so far from civilization. There were no trails, no schools, no doctors, and few neighbors; we were in the wilderness, but happy and fairly well contented in the belief that some day we would have a comfortable home."

Representative J. A. FALCONER has introduced a bill in the House of Representatives authorizing the issuance of patents to Dermott and some of his neighbors for lands they have entered, all in the vicinity of Galena, upon proof being submitted showing compliance with the homestead laws of the United States, notwithstanding the inclusion of the lands in the Snoqualmie National Forest.

Mr. President, I know nothing about the facts in this case beyond what is contained in this extract, but their relation is so familiar and so similar to other instances that have come under my personal observation that I am inclined to believe they are true. I hope the time will come before long when the objection which we justly make to methods of conservation enforcement will appeal to the judgment and conscience of men throughout all the people of the United States, to the end that they may realize that one such family as that of Mr. Dermott anchored upon the soil of the country is a benefit and value to a State as a unit of the vast number which might so settle that it is almost incalculable.

Mr. BORAH. I desire to know from what paper that extract was taken.

Mr. THOMAS. From the New York World of yesterday.

Mr. JONES. I simply desire to say to the Senator from Colorado that a bill has been introduced——

Mr. THOMAS. So this article states.

Mr. JONES. Trying to take care of that situation. It is now before the Committee on Public Lands and we hope to get the real facts. I have not any doubt that the statements made in that article are absolutely true from what investigation I have made in connection with the matter. I hope we can get relief through Congress, as we can not get it anywhere else.

Mr. BORAH. Does the Senator from Washington mean that a bill has been introduced to cover this particular case?

Mr. JONES. Yes; the case of this particular citizen.

Mr. THOMAS. The article so states, Mr. President. The bill was introduced in the House.

Mr. BORAH. That will be a hopeful but a very small beginning, because there are hundreds of such cases.

Mr. JONES. I concede that.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives by J. C. South, its Chief Clerk, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and acts supplementary thereto, and the United States Department of Agriculture.

ENROLLED BILL AND JOINT RESOLUTION SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bill and joint resolution, and they were thereupon signed by the President pro tempore:

H. R. 7951. An act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and acts supplementary thereto, and the United States Department of Agriculture; and

H. J. Res. 242. Joint resolution authorizing the Secretary of War and the Secretary of the Navy to loan equipment, for the purpose of instruction and training, to sanitary organizations of the American National Red Cross.

PETITIONS AND MEMORIALS.

Mr. PERKINS presented memorials of sundry citizens of Sacramento, Cal., remonstrating against national prohibition, which were referred to the Committee on the Judiciary.

Mr. MARTINE of New Jersey. I present memorials signed by upward of 39,496 citizens of the State of New Jersey, remonstrating against national prohibition. I ask that the memorials be received and referred to the appropriate committee.

The PRESIDENT pro tempore. The memorials will be referred to the Committee on the Judiciary.

Mr. STERLING. I present a petition of citizens of South Dakota, praying for the passage of Senate bill 2651. As the petition relates to a bill now on the calendar which has been passed over on several occasions, I should like to have it read by the Secretary.

The PRESIDENT pro tempore. That will require unanimous consent. Is there objection? The Chair hears none and the Secretary will read.

The petition was read and referred to the Committee on Public Lands, as follows:

To the honorable United States Senate:

Whereas there has been discovered in the State of South Dakota an extensive deposit of kaolin and fuller's earth that, under exhaustive practical and comparative tests conducted by expert chemists and practical refiners in some of the largest packing plants in the United States, has proven to be far superior to any other domestic product yet discovered and is in all respects equal to the foreign product that, because of superiority over the domestic product now available, has a monopoly of the market in the United States; and

Whereas the said mineral deposit is located within a part of an Indian reservation heretofore opened to settlement and entry under an act of Congress (Mar. 2, 1907) which did not authorize the disposal of such mineral-bearing lands, and the mining laws of the United States now in force providing no means whereby title may be procured, development of the said mineral deposits is impossible without the aid of additional legislation; and

Whereas there has been introduced in the Senate of the United States a bill (S. 2651) providing for the disposal of such mineral lands under the provisions of the mining laws of the United States: Now therefore

We, the undersigned residents and citizens of the State of South Dakota, realizing that the development of the said mineral lands will be of great benefit to the people of the State of South Dakota and its surrounding sister States, respectfully petition your honorable body that the bill aforesaid (S. 2651), now before your honorable body, be brought to a speedy vote with all possible dispatch.

Respectfully submitted.

Mr. JOHNSON presented petitions of sundry citizens of the State of Maine, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. KERN presented petitions of sundry citizens of Brazil, Moores Hill, Carmel, Decatur, Lebanon, Seymour, Aurora, Newcastle, Ridgeville, Wabash, Fairmont, Frankfort, Michigantown, Noblesville, Cochran, and Gas City, all in the State of Indiana, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. PAGE presented a petition of the congregation of the First Baptist Church, of Burlington, Vt., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. WILLIAMS presented petitions of sundry citizens of Union, Winona, and Gulfport, all in the State of Mississippi, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of the women of the Mississippi Annual Missionary Conference of the Methodist Episcopal Church South, praying for the passage of uniform child-labor laws, which was referred to the Committee on Education and Labor.

Mr. OLIVER presented a memorial of the Blair County Medical Society, of Altoona, Pa., remonstrating against the enactment of legislation to prohibit the distribution and dispensing of narcotic drugs by physicians, dentists, and veterinarians, which was ordered to lie on the table.

He also presented petitions of sundry citizens of Pennsylvania, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the Foundrymen's Association of Erie, Pa., praying for the postponement until the next session of Congress of action upon the so-called trade commission, interlocking directorates, Sherman law definition bills, and the so-called omnibus bill embodying them, which was referred to the Committee on the Judiciary.

He also presented a petition of the Bucks County Fish, Game, and Forestry Association, of Doylestown, Pa., praying that an appropriation of $100,000 be made to carry out the provisions of the Weeks-McLean migratory law, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of Local Union No. 1339, United Mine Workers of America, of Castle Shannon, Pa., praying for an investigation into the conditions existing in the mining districts of Colorado, which was referred to the Committee on Education and Labor.

Mr. TOWNSEND presented a petition of sundry citizens of Hastings and Coats Grove, in the State of Michigan, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Waucedah, Mich., praying for the enactment of legislation to establish a system of rural credits, which was referred to the Committee on Banking and Currency.

He also presented a memorial of J. B. Richardson Post, No. 13, Department of Michigan, Grand Army of the Republic, of Harbor Springs, Mich., remonstrating against any change being made in the American flag, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Cass City, Mich., praying for equal suffrage, which was ordered to lie on the table.

He also presented a petition of Local Branch, Scandinavian Aid and Fellowship Society of America, of Ishpeming, Mich., praying that an appropriation be made for the erection of a monument to the memory of Capt. John Ericsson, which was ordered to lie on the table.

Mr. POINDEXTER presented a memorial of sundry citizens of Spokane, Wash., remonstrating against the conditions existing in the mining districts of Colorado, which was referred to the Committee on Education and Labor.

Mr. HUGHES presented a petition of sundry citizens of New Brunswick, N. J., praying for the repeal of the exemption clause in the Panama Canal act, which was ordered to lie on the table.

THOMAS SMART.

Mr. WEST, from the Committee on Military Affairs, to which was referred the bill (S. 717) to correct the military record of

Thomas Smart, reported it without amendment and submitted a report (No. 482) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JOHNSON:

A bill (S. 5467) granting an increase of pension to George W. Townsend (with accompanying papers); and

A bill (S. 5468) granting an increase of pension to Albert F. Harvey; to the Committee on Pensions.

By Mr. KERN:

A bill (S. 5469) granting an increase of pension to William P. Mullikin (with accompanying papers); to the Committee on Pensions.

By Mr. DILLINGHAM:

A bill (S. 5470) granting an increase of pension to Patrick Carver (with accompanying papers); to the Committee on Pensions.

By Mr. BORAH:

A bill (S. 5471) to reserve certain lands and to incorporate the same and make them a part of the Lemhi National Forest; to the Committee on Agriculture and Forestry.

By Mr. WILLIAMS:

A bill (S. 5472) for the relief of the legal representatives of James M. Brabston and Roche H. Brabston; to the Committee on Claims.

By Mr. OVERMAN:

A bill (S. 5473) granting an increase of pension to Elizabeth S. Tennent; to the Committee on Pensions.

By Mr. SHAFROTH:

A bill (S. 5474) to provide for the acquisition of a site and the erection thereon of a public building at Alamosa, Colo.; to the Committee on Public Buildings and Grounds.

By Mr. ASHURST:

A bill (S. 5475) to establish a bureau for the study of the criminal, pauper, and defective classes; to the Committee on the Judiciary.

By Mr. STONE:

A bill (S. 5476) granting a pension to John T. Shouse; to the Committee on Pensions.

By Mr. LEWIS:

A bill (S. 5477) to renew and extend certain letters patent; to the Committee on Patents.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. STERLING submitted an amendment proposing to appropriate $50,000 for securing right of way for and construction of a wagon road or highway through the Standing Rock Indian Reservation in Corson County, S. Dak., etc., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

Mr. WALSH submitted an amendment proposing to appropriate $4,900 for the maintenance of an assay office at Helena, Mont., etc., intended to be proposed by him to the legislative, etc., appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. STONE submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. SMITH of Maryland submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

WITHDRAWAL OF PAPERS—ANNA K. CARPENTER.

On motion of Mr. OLIVER, it was

Ordered, That leave be granted to withdraw from the files of the Senate the papers in the case of Anna K. Carpenter which were filed with the bill S. 4962, Sixtieth Congress, no adverse report having been made thereon.

EMPLOYMENT OF STENOGRAPHER.

Mr. LA FOLLETTE submitted the following resolution (S. Res. 248), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Corporations Organized in the District of Columbia be, and hereby is, authorized to employ an additional stenographer at the rate of $100 a month, the term of services of such stenographer to conclude two weeks after the final adjournment of the second session Sixty-third Congress.

PANAMA CANAL TOLLS.

The PRESIDENT pro tempore. A resolution coming over from a previous day——

Mr. BORAH. I ask that the resolution which I submitted on Saturday last and requested to lie on the table and be printed may lie over subject to call.

The PRESIDENT pro tempore. Unless there is objection, such will be the order.

Mr. SIMMONS. I did not hear the request.

The PRESIDENT pro tempore. That the resolution lie on the table subject to call. The Chair hears no objection.

GORDON W. NELSON.

Mr. O'GORMAN. Mr. President, there is an emergency bill on the calendar, and I ask unanimous consent for its consideration. It will take but one or two minutes. It is the bill (S. 5445) for the relief of Gordon W. Nelson.

Mr. Nelson is a student at the Naval Academy, at Annapolis, and will graduate in two weeks. He, however, is not a naturalized citizen of the United States. He can not become naturalized until December of this year. This bill, which has the approval of the department, permits the President, with the advice of the Senate, to appoint him on the date of his graduation an ensign in the Navy, with the understanding that if he does not become naturalized before January 1 next his commission may be withdrawn. When he entered the Annapolis Academy the law provided that a commission would not be issued until after a service of six years. That has been amended so that a commission will now be awarded after a service of four years. Unless this bill is passed the young man, who, although the son of English parents, has resided in this country since his early youth, will not be allowed to receive his diploma with the other graduates. I therefore ask unanimous consent for its immediate consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized to commission, by and with the advice and consent of the Senate, Gordon W. Nelson an ensign in the United States Navy on the date of his graduation after the four years' course at the Naval Academy, to take rank as an ensign with the other members of his class according to their standing as determined by their final multiples for the four years' course at the Naval Academy: *Provided*, That unless the said Gordon W. Nelson becomes a citizen of the United States on or before January 1, 1915, he shall on said date cease to be an officer of the Navy.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PERSONAL EXPLANATION.

Mr. McCUMBER. Mr. President, I rise to a question of personal privilege.

The PRESIDENT pro tempore. The Senator will state it.

Mr. McCUMBER. Mr. President, on Saturday last, when the Senator from Nebraska [Mr. HITCHCOCK] was in the chair——

The PRESIDENT pro tempore. From what page of the RECORD is the Senator from North Dakota about to read?

Mr. McCUMBER. Page 7619. When the Senator from Nebraska was in the chair explaining a ruling of the Chair, he stated as follows:

The PRESIDING OFFICER. The Chair has ruled that the Senator from North Dakota can properly suggest the absence of a quorum. The last quorum suggested was at 2 o'clock and 26 minutes. The Chair is prepared to rule that a point of no quorum made simply for dilatory purposes, without any intervening business, may be held to be out of order; but the Chair thinks that business has intervened, and if the Senator from North Dakota requests it the Secretary will call the roll.

There is in that statement a fair inference, at least, that in calling for a quorum I was adopting dilatory tactics. I want to say that each time before I called for a quorum I counted the number of Senators present, the number ranging all the way from 6 to 21, 21 Senators being the greatest number that were in the Senate Chamber at any time when I called for a quorum. I never have pursued mere dilatory tactics, and I never shall; but I insist that we have a right to have a quorum present, and when there are not one-third of the Senators present it is not adopting dilatory tactics to suggest the want of a quorum.

LANDS AT MONTROSE, COLO.

Mr. THOMAS. I ask unanimous consent for the consideration of the bill (H. R. 5993) authorizing the city of Montrose, Colo., to purchase certain public lands for public-park purposes.

Mr. SMOOT. I have no objection to the passage of the bill, but I wish to ask the Senator from Colorado why it should be acted upon to-day.

Mr. THOMAS. I am informed that the land which the city desires, and which it can now acquire, must be entered very soon, as outside parties may otherwise acquire some of it. The city authorities are very anxious about the matter. I think this is the first time that I have trespassed upon the good nature of

the Senate in asking unanimous consent for the consideration of a bill out of its regular order, and I would appreciate it very much, under the circumstances, if the bill be permitted to pass this morning.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. WALSH. I should like to inquire of the Senator from Colorado how it comes that we are permitted, as proposed in the bill, to dispose of section 16. Does not that land belong to the State?

Mr. THOMAS. I did not catch the Senator's interrogatory.

Mr. WALSH. I wish to inquire of the Senator how we are permitted to dispose of section 16, which ordinarily is the property of the State.

Mr. THOMAS. I can only answer the Senator's question upon the assumption that this is the western part of the State, and that the indemnity lands have not been acquired by reason of the lack of early survey. The land was formerly in the Ute Reservation. That is my impression. I can call for the information from Representative TAYLOR, who introduced the bill in the other House, if the Senator from Montana desires that I shall do so.

Mr. WALSH. I made the inquiry merely for information. If the Senator is satisfied that we are not disposing of property of his State, I have no objection.

Mr. THOMAS. There is no question but that this disposition of the land is proper, or the bill would not have been introduced and passed in the House.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CALLING OF THE ROLL.

The PRESIDENT pro tempore. Morning business is closed.

Mr. JONES. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Washington suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Kenyon	Owen	Stone
Bankhead	Kern	Page	Sutherland
Borah	La Follette	Perkins	Swanson
Bristow	Lane	Pomerene	Thomas
Burleigh	Lea, Tenn.	Ransdell	Thornton
Burton	Lee, Md.	Saulsbury	Tillman
Chamberlain	Lodge	Shafroth	Townsend
Clarke, Ark.	McCumber	Sheppard	Vardaman
Crawford	McLean	Simmons	Walsh
Dillingham	Martin, Va.	Smith, Ariz.	Warren
Goff	Martine, N. J.	Smith, Ga.	Weeks
Hitchcock	Nelson	Smith, Md.	West
Johnson	O'Gorman	Smoot	Works
Jones	Overman	Sterling	

Mr. SHEPPARD. I wish to announce for the day the necessary absence of my colleague [Mr. CULBERSON] and his pair with the Senator from Delaware [Mr. DU PONT].

Mr. STONE. I desire to state that my colleague [Mr. REED] has been called from the city on pressing and important business and will be absent perhaps for two or three days. I wish this announcement to stand for the day.

Mr. SMOOT. I desire to announce the unavoidable absence of the senior Senator from Kentucky [Mr. BRADLEY], and also of the junior Senator from Wisconsin [Mr. STEPHENSON].

The PRESIDENT pro tempore. Fifty-five Senators having answered to their names, a quorum of the Senate is present. Unless the Senate shall otherwise order, the calendar under Rule VIII is in order.

PANAMA CANAL TOLLS.

Mr. O'GORMAN. I ask unanimous consent that the canal-tolls bill be temporarily laid before the Senate, so that the Senator from Michigan [Mr. TOWNSEND] may be given an opportunity to speak on the subject.

The PRESIDENT pro tempore. The Senator from New York asks unanimous consent that the Senate proceed to the consideration of what is known as the canal-tolls bill. Unless there is objection, such will be the order.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 14385) to amend section 5 of "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone," approved August 24, 1912.

Mr. TOWNSEND. Mr. President, in what I shall say on the pending measure I shall hope to be acquitted of any desire to make partisan political capital out of a matter of our foreign relations, which can not well be overmagnified in its importance. It is pregnant with possibilities affecting not only our standing among the nations, but which may involve at a later date our prerogatives as a great, independent, sovereign Republic. We have, sir, reached a critical period in our national life, and the result of the Senate's action at this time and under existing conditions may determine whether the American policies which have guided our statesmen in the past and under which our Nation has commanded the respect of the world shall be maintained; whether we shall continue to settle for ourselves all matters affecting our domestic affairs, our vital interests, and our national honor, or whether, "right or wrong," we shall, at the behest of a President, no matter how sincere, repudiate our past, weaken the Monroe doctrine under which it has been possible to democratize the western continent, and with no new reason except that the President demands it.

President Wilson says that matters of "greater delicacy and nearer consequence," known, however, only to himself and upon which he maintains a silence as profound as that grave in which it is now proposed to inter the American spirit of national sovereignty, demands this proposed action. If, in the course of this debate, the President has been too severely criticized, and if he shall hereafter be improperly arraigned, he can not justly complain. In asking Congress to reverse itself upon a matter which met with his and his party's approval, which met with the approval of the people at the only time they have had an opportunity to speak upon the subject, he should at least have taken the Congress into his confidence and presented the real reasons which were evidently sufficient to effect a change in him. Senators must discuss this proposition according to the facts which have been disclosed and in the light of all the circumstances which illumine it.

The question of a waterway from the Atlantic to the Orient is as old as the dream of Columbus. Periodically it has been an issue in the world's activities since the discovery of America. Spain, Portugal, France, England, and the United States have at various periods in their history agitated the subject of water communication between Atlantic and Pacific across the Isthmus. It remained for the United States, after all men and other nations had failed, to undertake and complete a steamship canal at a cost to its people, first and last, of about half a billion dollars; and now the real question is whether a certain convention, known as the Hay-Pauncefote treaty, entered into between the representatives of Great Britain and the United States prohibits the latter from enjoying any advantage from this mighty enterprise not enjoyed by every other nation—aye, whether the United States shall have even less benefit from it than other nations will have. We are about to determine that question; and if a majority of this Senate shall properly so decide, then, Mr. President, the future historian of our country should record those representatives of the United States who prepared and those Senators who ratified that treaty either as incompetents or as indifferent to the interests of their country. I can not believe that a majority of this Senate will so direct the historian.

Mr. President, early in the life of our Republic, and after two wars for independence and national sovereignty, an American policy known as the Monroe doctrine was adopted by the United States. The doctrine, in brief, is this:

The American Continents are not to be subject to colonization by any foreign non-American nation. The United States will consider any attempt on the part of such nation to extend its system to any portion of the Western Hemisphere as dangerous to our peace and safety. Any interposition by such foreign powers for the purpose of oppressing the independent nations of the American Continent will be considered by the United States as the manifestation of an unfriendly disposition toward us. This doctrine clearly implies that the United States will resent, with such power as is necessary, any attempt by such a nation to violate it. It implies a disapproval of every effort to supplant the sovereignty of our Government, either directly or indirectly, by that of any other nation.

This principle of our national policy proclaimed by President Monroe on December 2, 1823, recognized that at that time certain European nations had possessions in the Americas, and with those possessions there was to be no interference by the United States, but the extension in America of foreign sovereignty was not to be tolerated.

Here on these shores had been established a people's Government which was to work out the experiments and problems of democracy. Their early struggles against the exactions and dictates of monarchy induced the fathers to demand that foreign powers should keep hands off the Western Hemisphere, and no administration, save that of Zachary Taylor, to which I shall refer later, prior to the present one has ever suggested an abandonment of that doctrine. On several occasions foreign nations have attempted to avoid it and to gain a foothold

in the Americas, but always an uncompromising American President has commanded a halt, and his orders have been obeyed. But now, because of reasons withheld from all, aye, even from those distinguished men of his own party who in the Congress of the United States have made a legislative success of his measures thus far, leaders who have never wavered in their loyalty and devotion to him as the head of their and his party, the President has asked Congress to reverse a policy essential, as I believe, to our national honor and welfare.

In this emergency some of us, who after careful study and due deliberation two years ago assisted in writing into our statutes the law which it is now proposed to repeal, are insisting that we shall have a good and sufficient justification for this retreat. We demand as a proper thing that the President shall disclose his reasons for this extraordinary action.

That the President wants this repeal as a means of relieving him from temporary unknown personal embarrassment may be sufficient cause for some Democrats to stultify their individuality, their judgment, and their ideals of patriotism. It seems that some Republican Senators feel that it is their duty to follow the Commander in Chief, "right or wrong," in this matter. They have not always demonstrated that devoted loyalty to Presidents in matters of foreign policy; but for myself, sir, I owe a duty to my country greater than the blind and un-American loyalty I owe to any President or to any party.

There is something not clearly stated in President Wilson's message on this subject. The speeches thus far made in favor of repeal leave something undisclosed, some influence uncovered, some powerful motive shrouded in mystery. Why, England has not to our knowledge asked that this particular action be taken. She has stated, and with some little degree of interest, since a few Americans have given her aid and comfort, that the matter of Panama tolls was in dispute, and that it was a subject for arbitration, but the proponents of this measure do not propose to give the United States the right given to ordinary criminals, namely, the right to present its case to a fair and impartial court. They insist that our country plead guilty to the charges of faithlessness to treaty and disloyalty to national honor and thus make the decision res adjudicata for all time to come against the United States.

It is true that the original administration measure has been amended by the Senate committee, but the amendment, instead of relieving from embarrassment, makes the matter more humiliating to the Senate, more contemptible to the world. It is a palpable delusion and snare, but it will delude only the weak and feeble minded, it will ensnare only those who are looking for an excuse to be caught; it does not change in any particular the spirit or intent of the House measure. It is calculated only to deceive.

Why was it necessary, when the former Secretary of State, Mr. Knox, was negotiating with England on this subject and with bright prospects of satisfactory settlement in the near future, for United States Senators to denounce the American position and thus in a measure to nullify the efforts of our State Department? Why this sudden and unexplained action by the President when the matter was at rest and apparently settled? Why, I repeat, should we close and lock the door against arbitration if arbitration should be demanded? Why this inordinate, this inexplicable haste? Is there some powerful, undiscovered influence behind this project greater than party platforms, greater than public pledges, greater than national honor, greater than the general welfare, greater than patriotism itself? I do not know. I am sorry that Senators who wish to do their duty are compelled to enter the field of speculation in which grow luxuriantly the foul weeds of suspicion.

I voted for the act of August, 1912, exempting the domestic commerce of the United States from tolls, believing it was not in contravention of the Hay-Pauncefote treaty. I knew that our Government constructed the Panama Canal for two principal objects, namely, to increase our naval strength by making it serviceable on both oceans and to benefit our commerce by creating additional facilities which would furnish competition to the railroads of the country. I knew that in building it we were benefiting the world, and I was glad we were; I knew that we purchased the land upon which the canal has been built; I knew that hundreds of American lives had been and would be sacrificed on the project; I knew that half a billion of the people's dollars would be expended upon it; I knew that the United States was to defend and maintain it, not only against the effects of floods and earthquakes but against the hostility of every nation, but I did not believe that the builder, owner, and preserver of that canal had entered into a contract which forever forbade it to extend any especial benefit to the country and people who built it and whose it is.

This matter was discussed and considered in committees, in the Houses of Congress, in the press, in national conventions, in the political campaign, and by the people for months prior to its settlement in 1912 by the enactment of the law which it is now proposed to repeal. No one has advanced a new idea on the subject since that settlement. No one has specified a single embarrassment that has come to our country by reason of our previous action, and yet, sir, it is now demanded of Congress, for reasons known only to the Executive, that it ungrudgingly reverse itself. Congressmen are "not to reason why, theirs is but to do and die." Political death, like physical death for principle, should not make men cowards, but political death for a cause against which principle and patriotism rebel, and in which conscience and reason are stifled by the imperious will of a political Commander in Chief, is dishonorable and a disgrace to American statesmanship.

It would seem that inasmuch as the status quo of this case, so far as the evidence and the relation of the parties are concerned, has not changed since it was before the Senate less than two years ago, no further discussion of the facts were necessary and I shall not go into them in detail. It would seem that Senators who voted for no tolls for the domestic commerce of the United States in 1912 would feel that in common fairness to themselves and to their constituents it was their duty to state to the Senate the reasons which will induce them to change their votes on this matter. I, sir, do not wish improperly to animadvert upon the honesty, sincerity, or patriotism of Senators who differ from me, but inasmuch as they have refused to request the President to submit to the Senate the veiled reasons which induced him to ask this coordinate branch of the Government to do this thing for him; inasmuch as this is a proposition to permit Great Britain to obtain greater benefits from our canal than our country can obtain; inasmuch as the transcontinental railroad companies and every other railroad which will be subject to canal competition have not only fought the construction of the canal from its inception but are now known to be urging this proposed repeal; inasmuch as some Senators are proposing to "about face," it would seem incumbent upon them to enlighten the Senate with the new evidence, if new evidence there be. An explanation is due the country and is being waited with great public interest.

Mr. President, if it can be shown me that we have violated a solemn treaty, I will vote to remedy the wrong without a moment's hesitation, even though that treaty was an economic blunder and notwithstanding it practically destroys the business reason for which the canal was built. But, sir, I will not knowingly vote for any measure which even indirectly or remotely lessens the complete and unequivocal sovereignty of the United States over every foot of land, over every piece of property, over every national right now or hereafter entitled to the protection of our flag, unless I know that our Government intentionally and with aforethought made such a contract.

No sickly sentimentality, no fear of or hope of reward from powerful railroad corporations, no desire to evade full responsibility by the United States of its duties under the Monroe doctrine, no effort to purchase the temporary cooperation of any foreign nation in our clearly defined national duties, will control my action. I am opposed to running up the white flag of surrender when I know that our cause is just.

I have no use for the individual or national bully, nor have I sympathy with the jingoist; but undesirable as all these are, they are, in my judgment, entitled to quite as much respect as the man or nation that would sacrifice honor for the approval and worthless good opinion of an offender. The United States can not yield one jot or tittle of its sovereign powers at the behest of any nation or of even a peace society, for such yielding is but an invitation to greater future trouble. There are some things so vital to a nation as to preclude the possibility of joint discussion even, much less can they be surrendered.

Our domestic conditions were never less hopeful than they are at the present time. The flood of foreign importations is inundating our industries. Commerce is struggling for its very existence, and the clouds of business disaster hang low over our beloved country. This unfortunate condition, however, is one that time will cure, for the bitter lesson of experience will teach wisdom. If loss of business, if privations and financial disaster were our only troubles, or even the greatest of them, we could bear them with the confident hope that we would survive, a poorer but a wiser people. Unfortunately, however, our foreign relations are most distressing, and God only knows what tomorrow may bring forth.

Our attitude in the Philippines has halted progress in those islands, and it is the general impression among the most patriotic and thoughtful residents there that we are shirking our

plain duty to a people whom the fortunes of war placed under our care and protection.

The so-called Pacific coast problem is unsolved.

The administration is seriously negotiating with Colombia over the title to our canal. I believe that the United States owes no apology to Colombia for its conduct in the Panama rebellion, neither does it owe that country $25,000,000. We accepted Colombia's original terms and signed a treaty embracing those terms, only to have our action flouted by the unanimous vote of the Bogota Congress. But now, sir, it is proposed that we reward perfidy and double dealing not alone by the payment of $25,000,000, but by an admission that our Government has been guilty of treachery and dishonor.

I can not discuss now as I could have properly discussed a few days ago our most distressing relations with Mexico. Out of those relations no possible credit or honor can come to our country. The war now on between Huerta and the United States will be recorded in history as having originated in an unjustifiable stated cause.

Was it Cato, the Roman orator, who had such a hatred of Carthage that he closed every speech he made on any subject with the words "Delenda est Carthago"? The destruction of Carthage was his overmastering desire. Our President assumed a similar attitude toward Huerta. He has, however, entered upon armed intervention in Mexico, and every patriotic American will follow the Commander in Chief, "right or wrong," in this instance. Huerta will probably be destroyed, and to accomplish his destruction thousands of America's best boys and of Mexico's guiltless sons may die. I devoutly pray that in some honorable way peace may soon be restored.

It has been intimated that the President's matters of "greater delicacy and nearer consequence" referred to by him in his canal-tolls message to Congress meant some complications involved in the Mexican situation, and now, because some Senators who have in the past sat in silence, while the country's foreign affairs have been almost inextricably complicated, are asking for information, they are called demagogues and bluffers. In this game of war and repeal time is fast disclosing the hands of the players, and it will soon be discovered who is bluffing and who is not.

I oppose this proposed repeal for one reason, because I believe that its defeat may save our Government from another embarrassment in its foreign relations.

The economic side of this tolls question is great, but it sinks into obscurity in the presence of the proposition to surrender a clearly determined position of national right at the behest of any foreign country, aided and abetted by anti-American sentiment in our own land. The senior Senator from Massachusetts, in a most scholarly and eloquent address, has proven that the action of Congress in granting free passage through the canal to our domestic ships was not in contravention of the Hay-Pauncefote treaty; indeed, if I recall his words uttered in 1912 correctly, he stated that he would not have voted for that treaty in 1901 if he had understood that it could be construed to preclude the United States from treating American ships in a different manner as to tolls from the treatment accorded foreign ships; and yet to-day, after our Government has by the formal action of legal enactment interpreted that treaty as he insists it had a legal right to do, he in effect urges the Senate to acknowledge that its interpretation was wrong. For if the Congress passes the administration bill even as amended by the committee its action will be considered by the world as an acknowledgment that our Government had done what the great majority of the proponents of repeal claim was done, viz, willfully and unconscionably violated its treaty obligations. To perfidy and dishonor we are asked to annex an additional vice, cowardice.

The Senator from Massachusetts repeats the assertion of President Wilson that all the rest of the world believe we have violated our national word, and his suggestion is that we do what is equivalent to pleading guilty to the charge of dishonor in order that the world may consider us a magnanimous "good fellow."

Oh, sir, even foreign nations have no respect for the dishonest coward, and that is what we would rightly be if, believing that we have done no legal wrong, we abandon our position because of the charge that we have willfully violated a solemn international treaty. But I do not believe that all the nations of the world have uplifted hands against us. No nation except Great Britain and possibly one of its dependencies has raised a voice of protest at our action. Is it possible that gentlemen who have been listening for anti-American music have caught a sound of protest from any other nation? Have their imaginations made it conceivable that nations not even parties to the canal treaty, which have not contributed a dollar or even a thought to the construction and maintenance of this stupendous enterprise but which are to be permitted to use it at less than it costs to pass their shipping through it—is it possible that these nations are complaining of our lack of generosity? Are they clamoring against our perfidy and dishonor? No; gentlemen are laboring under hallucinations. The noise and confusion of railroads sometimes create a sort of buzzing in the head, which seems to remain when the cause is no longer operative. Maybe the imaginary voices from foreign nations are similar phenomena.

But even Great Britain does not—she can not—feel that our country has been faithless to its treaty obligations. Of course her proverbial British sagacity will not prevent her from taking advantage of any opportunity to profit at the expense of a commercial rival, especially when that rival can be induced to furnish the opportunity and retire from the field. I am not censuring Great Britain for looking after her own. I want the United States to be equally vigilant.

Before the President reopened this question Mr. Innes, speaking officially for his Government, said in a letter to our State Department:

> If the trade should be so regulated as to make it certain that only coastwise traffic, which is reserved for United States vessels, would be benefited by this exemption, it may be that no objection could be taken.

Let it not be forgotten that the exemptions act of 1912 applies only to vessels engaged in coastwise traffic.

Mr. Innes recognized that our coastwise trade, in which Great Britain had no right to participate, was no concern of his country. He knew that this identical principle was raised in 1904 in the case of Olsen against Smith, and that the Supreme Court decided it in favor of the present American contention. That was an action brought by the licensed pilots of the Texas coast against pilots who sought to guide an English vessel into a Texas port. The defendants claimed that under the treaty between the United States and Great Britain made in 1815 the same charges for pilotage must be paid by American coastwise vessels as were imposed upon British ships entering the same American harbor. The treaty provision was and is as follows:

> No higher or other duties or charges shall be imposed in any of the ports of the United States on British vessels than those payable in the same ports by vessels of the United States.

Yet Texas enacted a law imposing a pilotage charge upon vessels engaged in the foreign trade but exempting vessels engaged in the coastwise trade from such charges. The United States had previously to the passage of the Texas statute exempted coastwise traffic from all State charges. It is claimed that free passage through the canal of our coastwise vessels is a violation of the following provision of the Hay-Pauncefote treaty:

> The canal shall be free and open to the vessels of commerce and of war of all nations observing these rules on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic, or otherwise. Such conditions and charges of traffic shall be just and equitable.

Surely the inclusion of domestic boats in this provision is not so clear as it was in the treaty of 1815; and yet, in deciding the case of Olsen against Smith, the Supreme Court said:

> Nor is there merit in the contention that, as the vessel in question was a British vessel coming from a foreign port to the State, laws concerning pilotage are in conflict with a treaty between Great Britain and the United States providing that no higher or other duties or charges shall be imposed in any of the ports of the United States on British vessels than those payable in the same ports by vessels of the United States. Neither the exemption of coastwise steam vessels from pilotage, resulting from the law of the United States, nor any lawful exemption of coastwise vessels created by State law, concerns vessels in the foreign trade, and therefore any such exemption does not operate to produce a discrimination against British vessels engaged in such trade. In substance, the proposition but asserts that because by the law of the United States steam vessels in the coastwise trade have been exempt from pilotage regulations, therefore there is no power to subject vessels in foreign trade to pilotage regulations, even although such regulations apply without discrimination to all vessels in such foreign trade, whether domestic or foreign. (Olsen *v.* Smith, 195 U. S., 344.)

England can not believe we are insisting upon rights and privileges inconsistent with the terms of the canal treaty, or which she would not demand for herself if she had been the builder, owner, and preserver of the canal and the United States the beneficiary of her bounty without cost or responsibility.

Some of her most learned and profound international authorities have spoken on this subject.

Mr. Cox Sinclair, in the London Law Magazine and Review, said:

> The United States can support its action on the precise words of the material articles of the treaty. Its case is strengthened by reference to the preamble and context, and its case is difficult to challenge on the grounds of natural justice.

Mr. C. A. Hereshoff-Bartlett, another eminent English scholar, has given the matter great consideration, and this is his opinion:

> The treaty could never have been intended to prevent the Federal Government from arranging and regulating its domestic or coastwise

commerce and in the use and enjoyment of its own property as it saw fit. No such restriction could have been in view in adopting "as the basis for neutralization" a rule that the canal should be free and open to vessels of commerce and of war of all nations on terms of entire equality. It would be absurd for the United States to solemnly declare that its own vessels of war might openly and freely navigate its own landlocked waterways and enjoy the privileges that belong to the Nation as a sovereign power in the use of its own territory. The use of the words "vessels of war" shows plainly that the word "vessels" as used refers only and exclusively to those of all nations other than those of the United States, and that the word "nations" was restricted to foreign nations; that is to say, nations foreign to the United States.

They believe that our act of August, 1912, exempting our domestic vessels from tolls, was well within our treaty rights. Some of our very ablest international students, including ex-Presidents Roosevelt and Taft, ex-Attorney General Olney, and Hannis Taylor, have expressed themselves strongly in favor of the legality of our Government's position on this question. The argument of the senior Senator from Massachusetts in favor of our exercised right is to me unanswerable. I can not present the case more strongly than he has presented it.

If Great Britain is really demanding as a matter of equity that the United States shall surrender her position on this question because it is a violation of section 8 of the Clayton-Bulwer treaty, referred to in the Hay-Pauncefote convention, then could we apply the old English law maxim, "He who enters a court of equity must come with clean hands."

The Clayton-Bulwer treaty was entered into at a peculiar period of United States history. The great Commonwealth of Texas had a few years before entered the Union. The War with Mexico had just closed, and as a result the United States had acquired what is now California and the great Southwest. The year before gold had been discovered in California and thousands of people from east of the Mississippi were moving into the region of golden promise. Travel across the then western desert was full of danger and death. Thousands found it safer and shorter to take boat on the Atlantic and sail to Colon and thence go on foot or by saddle horse across the Isthmus to Panama, and from there again by boat to Sacramento; but the cost was almost prohibitive. Means of transportation across the Isthmus became most important, and talk of an interoceanic canal was revived.

Contrary to the Monroe doctrine, England claimed a protectorate over the Mosquito Coast in Nicaragua and over Costa Rica. She based her claim on an ancient license to chop wood, obtained from Spain by some Englishmen. This claim was disputed by the United States. In 1849 a private company obtained a concession from Nicaragua to construct a canal through that country. The Caribbean end of this proposed canal was in territory over which Great Britain claimed a protectorate. Under the circumstances Zachary Taylor's administration permitted a waiver of the Monroe doctrine, and thereby the mistake which rises now to plague us was made. But instead of profiting by the experience of that blunder, it is proposed to commit another to-day which will vex us to-morrow. In order to avoid temporary trouble and secure the good will of England the great American principle was surrendered and the Clayton-Bulwer treaty was made, and England was to release her claim to territory in Central American. Under this treaty the United States secured nothing of value, but it gave to Great Britain the position which she and her American allies are using to embarrass and humiliate our country to-day. Deplorable as the fact is now known to be, nevertheless the Clayton-Bulwer treaty was made and our Government was in honor bound to respect it so long as Great Britain observed it. The fact is, however, that England violated it from the very date she entered into it, and continued to so violate it, in spite of protests from our Government, for many years thereafter and until the very reason and purpose for which it was made had ceased to exist. That treaty, as I have said, was entered into by the United States to secure the abandonment by Great Britain of her claim to territory in Central America. It was on the Nicaragua coast that the eastern terminus of the proposed canal was to be located, and through that country the private waterway was to be dug. It was with especial reference to this canal that the treaty was made, but the project was soon abandoned, and yet Great Britain still asserted her claim of authority over the disputed section, and not until President Pierce, in 1855, and again in 1856, had called to the attention of Congress these persistent violations; not until a great committee, composed of Senators John Sherman, George F. Edmunds, William P. Frye, William M. Evarts, J. N. Dolph, John T. Morgan, Joseph E. Brown, H. B. Payne, and J. B. Eustis, constituting the Committee on Foreign Relations of the Senate in the Fifty-first Congress, had, under direction of the Senate, investigated the situation and reported thereon, did Great Britain abandon her claim. This report is most illuminating, and is in part as follows:

We think it can be justly affirmed that the convention of 1850 has become obsolete. One of the provisions of the convention of 1850 most important to the United States and to the preservation of the republican Government on this continent was that which declared that neither party to the convention should "occupy or fortify or colonize or assume to exercise any dominion over Nicaragua, Costa Rica, the Mosquito Coast, or any part of Central America." At that time the "settlement" of British subjects, as it was called, at Belize, on the coast of Central America, was of the smallest dimensions and had no substance or form of a territorial dominion. British woodcutters were there under an ancient Spanish license of timber cutting, and nothing more. This was substantially the condition of things when the convention of 1850 was entered into.

The next step taken after the convention of 1850 was in 1853, when a legislative assembly was constituted to manage the affairs of the settlement. This was followed by a convention between Great Britain and Guatemala in 1859, for the establishment of the boundaries between what the treaty chose to call "Her Britannic Majesty's settlement and possessions in the bay of Honduras" and the territories of Guatemala. By this treaty that which was before a licensed industrial establishment became instantly a possession of the British Crown. The settlement government continued until 1862, when the settlement was declared a colony of the British Crown, and a regular colonial establishment was set on foot; and so from that time to this the form and substance of a regular colonial government as a part of Her Majesty's dominions has continued. It is understood that its geographical dominion has been vastly enlarged from the licensed wood-cutting limitations and boundaries that existed in 1850. All this has taken place systematically and persistently, notwithstanding the declaration of Her Majesty's Government that it should not "colonize or assume or exercise any dominion over the Mosquito Coast or any part of Central America."

In view of all these considerations, the committee is of opinion that the United States is at present under no obligation, measured either by the terms of the convention, the principles of public law, or good morals, to refrain from promoting, in any way that it may deem best for its just interests, the construction of this canal, without regard to anything contained in the convention of 1850.

The President and Senators insist that the United States has broken the Hay-Pauncefote treaty, which, according to their contention, is founded upon a section of the Clayton-Bulwer treaty which had never been observed by Great Britain. Under these conditions, sir, I resent the charge that those who are opposed to repeal are less patriotic, less solicitous for their Nation's honor than those gentlemen who now favor in this controversy the nation which purchased our national birthright for a mess of pottage and then refused to deliver the pottage. The Clayton-Bulwer treaty was a unilateral contract, and no consideration passed to the United States. But, sir, we are asked to continue this kind of bargaining and to deliver the product of hundreds of millions of our treasure and to abandon the foundation principle of independent government—national sovereignty—to a foreign nation for nothing. I refuse to be a party to such incompetency, to such national disgrace. I have recited this history of the Clayton-Bulwer treaty not for the purpose of justifying our action of 1912 under the Hay-Pauncefote treaty but to answer the "holier-than-thou" people who claim to have a monopoly of patriotism and who charge the opponents of repeal with dishonor and infidelity. If the great argument of the senior Senator from Massachusetts shall be accepted as valid—and that it is valid I have no doubt—then our country has not violated the Hay-Pauncefote treaty, invalid as it was and is, for lack of any consideration received by the United States.

The Senator, however, insists that we should surrender all to Great Britain because, among other reasons, the negotiators of the treaty of 1901 understood that "all nations," in paragraph 1 of the rules adopted by the United States for the control and government of the canal, included the United States, and therefore that her domestic commerce should be treated the same as foreign commerce is treated. Other gentlemen have made the same assertion, and letters from Mr. White and Mr. Choate, who assisted in the negotiations, have been offered in evidence in support of this contention. I have read those letters, and while it is true that the writers say they understood that our coastwise ships were to be treated exactly as foreign ships are treated, yet no one of them has stated in his letter that the particular question was ever raised by the negotiators. It nowhere appears that it was even discussed. I prefer to hold a higher opinion of my country's representatives than to believe they would freely and without protest or argument voluntarily throw into a useless agreement their country's right of sovereignty. Silence on a matter which otherwise, under the decision of the Supreme Court in the case of Olsen against Smith, would have to be specifically mentioned in order to include it within the terms of the treaty should be and must be construed as having excluded it from the agreement.

Ex-Secretary of State John Hay, who made the treaty, is quoted pro and con on this question, and he is not here to answer for himself. His understanding of the agreement, however, can best be determined by his subsequent acts. That he believed the United States had the right not only to prescribe rules for the control and government of the canal which would be especially favorable to his country, but which also would be especially favorable to all nations which had been parties to the location and construction of the canal there can be no doubt.

It will be recalled that after the Hay-Pauncefote treaty was

entered into the United States signed an agreement, prepared by John Hay, with Colombia containing this clause:

The Government of Colombia shall have the right to transport over the canal its vessels, troops, and munitions of war at all times without paying charges of any kind.

Great Britain, speaking with authority through Sir Edward Grey, has stated that such provision was and is a violation of the Hay-Pauncefote treaty. Colombia did not agree to the treaty, and thereupon Panama, seeing vanish the vision of great benefits which would come to her through a constructed canal, seceded from the United States of Colombia, and our Government, through John Hay as Secretary of State, subsequently made a treaty with the new Republic in which was this provision:

The Government of the Republic of Panama shall have the right to transport over the canal its vessels and its troops and munitions of war in such vessels at all times without paying charges of any kind.

This provision, practically the same as the one in the proposed treaty with Colombia, was claimed by Lord Grey in 1912 to be in violation of the Hay-Pauncefote convention, and yet John Hay drew and negotiated it and the Senate approved it. This action by the late Secretary Hay furnishes a complete answer to the statement made by the advocates of repeal, that he understood article 3 of the Hay-Pauncefote treaty to include our coastwise ships. Is it possible to conceive that he would sign a treaty which gave our Government the right to exempt from tolls the ships of a country from which we acquired the territory in which to construct a canal when he had previously made a treaty which denied the same privilege to the Government which builds and owns and maintains that canal? The suggestion is preposterous, and John Hay did not so understand the international agreement of 1901.

And, in passing, permit me to say that if the act of 1912 affecting our domestic commerce passing through the canal is repealed our generosity will not have been sufficient to meet the good opinion of the world. Great Britain denies our right to grant free passage to the vessels of Panama, and yet we have given Panama that right. Will the President and his supporting Senators demand that in order to keep the good opinion of Great Britain our Government shall pay the tolls on the vessels of Panama? Certainly the demand will be made if we pass this repealing act, and we can not escape from the logical sequences of our own decision. Are Senators determined to force the United States into a position where she must either annul the treaty with Panama by which was obtained the right of our Government to construct it or else still to remain in the contempt of the world?

Some Englishmen, with as strong reasons as any they have already presented as to the vessels of commerce, insist that our battleships shall be treated exactly as are English battleships. The provision of article 3 of the Hay-Pauncefote treaty is:

The canal shall be free and open to the vessels of commerce and of war of all nations observing these rules on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic or otherwise. Such conditions and charges of traffic shall be just and equitable.

What legerdemain can be employed to distinguish the treatment which shall be accorded to our vessels of war from that accorded to our vessels of commerce? And yet gentlemen do make a distinction between the two classes of vessels and admit that the provision does not mean that our war vessels must pay tolls. In other words, they use common sense in considering one class of vessels, but are bound by a different rule in the other class.

It is also interesting in this connection to note that the senior Senator from New York, who undoubtedly is the most influential exponent of the proposition to repeal in either country, and who has insisted that Congress construed wrongly the treaty of 1901 when it exempted our domestic commerce from tolls, did, as Secretary of State, prepare and sign a treaty with Colombia designed to settle an alleged claim which Colombia had upon the canal territory containing this clause:

In consideration of the provisions and stipulations hereinafter contained, it is agreed as follows:

The Republic of Colombia shall have liberty at all times to convey through the ship canal now in course of construction by the United States across the Isthmus of Panama the troops, materials for war, and ships of war of the Republic of Colombia without paying any duty to the United States, even in the case of an international war between Colombia and another country.

The Senator afterwards explained that this proposed treaty with Colombia signed by him was intended to remove a cloud from the canal title caused by Colombia's claim to Panama. Recognizing that his action in attempting to make this treaty containing the provision I have just mentioned would have been in conflict with his views of our Government's rights under the Hay-Pauncefote treaty to exempt its coastwise vessels from the payment of tolls, he states that he obtained the consent of Great Britain to do the thing he attempted with Colombia. It is unfortunate that after such consent had been given, Lord Grey, speaking for Great Britain, should still insist that our present treaty with Panama containing a similar provision to that in the attempted treaty of 1909 as to free ships for Colombia is in violation of our treaty rights.

Believing as I do that Colombia's claim is without merit, I am compelled to believe that if the proposed treaty of 1909 with Colombia had been ratified it would have been a violation of the Hay-Pauncefote treaty. Colombia is clearly within the "all-nations" provision. She was not and is not a party to the canal ownership or construction. The canal territory was not obtained from her. There is no more reason for exempting her vessels from tolls than there is for granting a similar favor to France. It is different in the case of Panama. Great Britain agreed in the treaty that the United States could construct the canal by such means as were necessary. It was necessary to get the territory from Panama. The United States was obliged to purchase it, and a part of the purchase price was exemption from tolls of the vessels of Panama. Such was not the case with Colombia, and yet the senior Senator from New York evidently believed that in order to remove the invalid cloud of Colombia's claim our Government could grant free passage to Colombian ships, although he does not believe that we have the right to grant the same privilege to American domestic ships.

But if the negotiators did understand that they were making such a contract as is contended for by Lord Grey and it was done without specific mention and by inference, and if a natural and proper construction would retain in the hands of our Government an inherent and sovereign right, I shall abide the decision of the American Congress when in 1912 it solemnly declared its position on this subject.

The Senator from Massachusetts states that he is strongly in favor of ship subsidies for the benefit of our merchant marine. He asserts that the law sought to be repealed exempting our coastwise merchant marine from payment of canal tolls is a subsidy. He also insists that it is impossible to enact a straight and direct subsidy law, and yet by voting out the alleged subsidy now in the law he will defeat the very thing he greatly desires. He thinks that we have a right to do what England will do to her ships, viz, collect tolls when a boat enters the canal and pay them back when it leaves at the other end, but that it would be a perfidious thing to avoid all bookkeeping and omit the farce which the Senator says has the approval of all nations. This argument may satisfy some Senators, but it does not appeal to me.

It occurred to me that the Senator's argument in reference to arbitration was hardly consistent with the principle involved in his subsidy position. He believes we have the legal right under the Hay-Pauncefote treaty to exempt our coastwise boats from the payment of tolls, but he thinks the matter is a subject for arbitration. He would like to have it arbitrated, but he also thinks the Senate would not consent to arbitration, and therefore he proposes to foreclose any possibility for arbitration by yielding on this question now and forever.

To me the Senator's arguments on subsidy and arbitration are confusing when subjected to the same rules of logic.

The Senator illustrates his opinion of the difference between direct subsidies, which he approves, and indirect subsidies, which he condemns, by using the familiar example of an easement across real estate. He says that the right of way is delineated, and to that specific strip travelers must confine their passage. Of course, this is true. The very object of the right requires that this be so. The illustration is not at all applicable to the case under consideration. A right of passage across another's property is granted by the owner of the fee either for a consideration from the user or because of legal necessity. Always a certain damage to the grantor is implied, yet passage by the grantee is desirable and reasonable, but the benefit to the latter is to be obtained at the minimum damage to the former; therefore the way of passage is defined and determined. Clearly equity would not permit the beneficiary of a right of way over another's land to drive at random over that other's property—through his grain or over his meadows. Governmental subsidies are benefits bestowed upon some person, firm, association, or corporation with the ostensible object of encouraging for the public good the development of the business in which such parties are engaged. Will Great Britain be injured to any extent more by the nonpayment of tolls by American vessels than it will be if the United States collects them in the first instance and then repays them immediately? Certainly not.

Is the provision exempting coastwise vessels from the payment of tolls a subsidy to the vessels engaged in domestic commerce?

In a sense it is—in the same sense that our policy permitting American registered vessels the free use of our Government-improved rivers and harbors is a subsidy. We have spent hundreds of millions of dollars in improving the Mississippi and Missouri and Ohio Rivers, and yet not a dollar in tolls or other charges is paid by any vessel which uses them. We have built some of the finest locks in the world at the Soo, in the St. Marys River, through which there passed more tonnage last year than will lock in and out of Panama in several years, and although it was all done exactly as the work at Panama was done, namely, at the public expense, no charge is imposed upon the vessels which pass through those locks. Will Senators say our policy as to the Soo Canal and locks is one of subsidy to our Lake marine? Will the people of the Middle West agree with those who, desiring to be consistent, advocate tolls upon ships using the Government-improved waterways of the Great Lakes? That policy would no doubt meet the hearty approval of the Canadian Pacific and other railroads, and the proposition is on all fours with the one to charge our domestic boats for passing through the Panama Canal, which is also a domestic waterway. I have not felt like denominating our American policy of keeping our waterways open for the free use of our inland and coastwise vessels a subsidy. The fathers did not so name it when they established it. But I do not care to split hairs in endeavoring to define definitions. I regard the river and harbor work of the United States as having been done not primarily for the benefit of the boats which use the improved waters, but in the interest of trade and commerce, which are essential to the highest welfare of the people.

I repeat, that since our Nation's birth it has followed the principle of keeping our inland waterways open to the free use of every boat which could float the Stars and Stripes. Under that doctrine a domestic marine commerce, which outrivals that of any other nation in the world, has been established, and the result has been the lowest transportation rates in the world, not only on water shipments but to points on railroads where even latent or insufficient water competition exists. The Panama Canal will not be an exception to the benefits of water competition. I remember, of course, that the Senator from Massachusetts and other Senators have claimed and still others will claim that the Panama Canal will not affect railroad rates. I will allow the railroads, who ought to know best, to make answer. Their opposition to free tolls for American ships is a most powerful and convincing argument of their belief that the canal will compel reduced rates and improved railroad facilities. What possible grounds have they for opposing the American policy except its effect upon them? Already many places far inland from our seaboard receive a benefit from water transportation competition between Atlantic and Pacific points by way of Cape Horn. What will be the effect when we cut off 8,000 miles of the water distance between New York and San Francisco?

If the evident purpose of these arguments was not clearly the intent to create local prejudice in a matter which is of necessity nation-wide in its magnitude and importance, the efforts of some orators and newspapers to show that Michigan, Wisconsin, Minnesota, Illinois, Iowa, Ohio, Indiana, and other Middle Western States have been discriminated against by the "free-tolls" act of 1912 would be amusing. Suppose it is true that these States will not get as cheap transportation rates to coast cities because of the Panama Canal as Atlantic, Pacific, and Gulf States will get, when before have our great public improvements been controlled by the demand for exact proximate benefits to every section of the country? Will Michigan and the other lake-bordering States complain of discrimination? I do not believe they will. They know that many millions of the money belonging to the people of all the States have been expended in building the Soo Canal and locks, in constructing the St. Clair Canal, in improving the St. Marys River, the Portage Channel, the Straits of Mackinaw, the St. Clair and Detroit Rivers. They know that the lake harbors have been generously, though not too generously, improved. They know that hereafter millions more will be asked of and granted by the Federal Government for river and lake improvements, and some day, not in the very distant future, an ocean waterway from Duluth and Chicago to the Gulf of St. Lawrence will be constructed, and they will demand that it shall be free to their commerce.

To me this argument of local benefits seems most inconsistent and unpatriotic. The Panama Canal, if it shall remain under the undisputed dominion of the United States and its use shall justify the hopes of its builder, will be a benefit not alone to New York and California, but to every State in the Union. The products of Michigan shipped to Oregon will by virtue of cheap transportation through the canal receive a benefit. The rail rate from Detroit to Portland must meet the rail and water rate from Detroit via New York or New Orleans and the canal to Portland. To-day the rail rate from Detroit to Pacific points is affected to some extent by the rates by water from the Atlantic seaboard by way of the Straits of Magellan to Pacific points. It is impossible that the shorter Panama route will not have the effect of either cheapening transportation or bettering the facilities, or both, between the Middle West and the Pacific coast. I do not expect a great reduction in individual rates because of the Panama Canal influence, but the aggregate benefit will be great, much greater than the aggregate of remitted tolls on domestic shipping.

That a boat which pays no tolls can carry freight more cheaply than one which does there can be no doubt. The former can, with the same net profit, transport its cargo through the canal at a less rate than the latter by exactly the toll charge. If the tolls are $1.25 per ton and they are not imposed upon a certain vessel, then that vessel's rate of freight can be $1.25 per ton less than it could be if the toll was not remitted. Evidently England believes that this is so. With no tolls for our coastwise ships she feels that her boats will in some way be obliged to suffer a loss. She must feel that free passage to American ships will in some manner be detrimental to her.

There is no doubt in my mind that a lower transportation rate on passengers and freight passing through the canal will be imposed if no tolls are charged than will be made if they are.

Will the shipper, who will be the producer or merchant, pass this freight benefit on to the consumer, or will he absorb it all? That, of course, is a more difficult question to answer. But without lower transportation charges the consumer can not even hope to get a benefit, while with them he can. Organized public sentiment will demand that reduced shipping rates shall benefit producers and consumers. Reductions in carrying rates in the past have almost invariably been shared by the whole people and there can be no good reason for believing that the remission of canal tolls will be an exception to the general rule.

Mr. President, this attempt to array one section of our country against another is unbecoming to patriotic Americans. By two great wars our fathers established this Republic and freed it from the tyrannical hand of foreign despotism. In a great Civil War a half million of the bravest men of history shed their life's blood to cement the parts of that Republic into an indissoluble union of States, in which the interests of one are the interests of all. The domestic commerce of the United States knows no State lines. American patriotism has no sectional geography.

But when driven to extremity by the arguments in favor of the right and propriety of the act of 1912 the proponents of repeal abandon the President's recent message to Congress, abandon all reasons based upon logic, and assert that the "free-tolls act" is in the interest of the Shipping Trust, or, to use the more refined language of the senior Senator from Massachusetts, its enactment was induced by a "desire to put money into the pockets of a few American citizens in a questionable manner." By "few American citizens" he evidently means the gentlemen engaged in our domestic merchant-marine business.

Those who resort to this argument are mistaken. The real issue can not thus be evaded. A great American principle is involved, and if I favored for economic reasons the imposition of tolls upon domestic vessels I would still oppose the proposition to repeal the act of 1912 at this time and under existing conditions.

If later it shall be found wise to impose tolls upon American coastwise vessels, then let this Government settle that question for itself, unembarrassed by foreign dictation. Let it be done at a time and under conditions as will create no doubt as to what is the intention of the United States, either as to its policy or its power. But, sir, there are sound economic reasons for "free tolls." Our desire is not to put money into the pockets of American shipowners; it is not to benefit a shipping monopoly; it is rather, so far as this branch of the subject is concerned, to keep money in the pockets of American producers and consumers. The only shipping monopoly is that which is engaged in our foreign trade, floated in foreign bottoms, flying foreign flags, and over which our Government has no control. The only merchant marine which our country can boast is that engaged in our domestic commerce, and some Senators would destroy that by admitting to our coastwise traffic, without let or hindrance, the merchantmen of England and of other countries, and that policy will soon be urged by foreign sympathizers after the pending action is taken; indeed, it is now urged by some. What is our coastwise merchant marine to which free passage of the canal is now given? It is the fleet of boats built, owned, and operated in the United States, and under laws enacted by Congress. They must be built in Amer-

ican yards according to regulations assuring healthful sanitary conditions. They must be manned by American seamen who are paid American wages. Such of them as are suitable can be secured by the United States in case of war. They furnish competition with railroads, and thereby do more to secure reasonable transportation rates than all the efforts of railroad commissions, State or National. When the canal-tolls bill was before the Senate Committee on Interoceanic Canals it was shown by competent witnesses that the wages paid to employees on boats flying the American flag were 4 to 10 times the wages paid on foreign boats. It was further shown that combinations clearly in restraint of trade existed among foreign ship companies, and that none existed among American shipowners. But the committee that framed the law which it is now proposed to repeal provided in the bill, and it was enacted into law, as follows:

From and after the 1st day of July, 1914, it shall be unlawful for any railroad company or other common carrier subject to the act to regulate commerce to own, lease, operate, control, or have any interest whatever (by stock ownership or otherwise, either directly, indirectly, through any holding company, or by stockholders or directors in common, or in any other manner) in any common carrier by water operated through the Panama Canal or elsewhere with which said railroad or other carrier aforesaid does or may compete for traffic, or any vessel carrying freight or passengers upon said water route or elsewhere with which said railroad or other carrier aforesaid does or may compete for traffic; and in case of the violation of this provision, each day in which such violation continues shall be deemed a separate offense.

The Interstate Commerce Commission by the law is given full authority to determine whether any railroad is in violation of the above provision. It is thus seen that any trust or combination between railroads and boat lines using the canal is prohibited.

Let it not be forgotten that the free-tolls act also makes it impossible for any boat owned or operated, directly or indirectly, by a trust or combination legally to enter or pass through the canal. This is the provision of law on that subject:

No vessel permitted to engage in the coastwise or foreign trade of the United States shall be permitted to enter or pass through said canal if such ship is owned, chartered, operated, or controlled by any person or company which is doing business in violation of the provisions of the act of Congress approved July 2, 1890, entitled "An act to protect trade and commerce against unlawful restraints and monopolies," or the provisions of sections 73 to 77, both inclusive, of an act approved August 27, 1894, entitled "An act to reduce taxation, to provide revenue for the Government, and for other purposes," or the provisions of any other act of Congress amending or supplementing the said act of July 2, 1890, commonly known as the Sherman Antitrust Act, and amendments thereto, or said sections of the act of August 27, 1894. The question of fact may be determined by the judgment of any court of the United States of competent jurisdiction in any cause pending before it to which the owners or operators of such ship are parties. Suit may be brought by any shipper or by the Attorney General of the United States.

I had confidently hoped and believed that with the law unchanged a great impetus would be given to American shipbuilding, and that the result would be most beneficial to our people in times of peace and of war.

The country will not be deceived by the false issues raised in this controversy. He who utters the cry of special benefit to American shipowners, who during all our past have been encouraged to build and operate American ships, and he who asserts that the advocates of our national doctrine are working in the interests of a ship trust will invite the inevitable criticism upon himself of being interested in the propaganda to destroy competition to railroads and to yield a right of sovereignty which ought not to be surrendered. The advocates of this propaganda have unlimited money, which has been and which is being expended with a lavish hand. The known beneficiaries of this money have been very active in their efforts to secure action favorable to Great Britain. They have been much in evidence here in the Capitol. I would much prefer to believe that they are actuated by high motives and principles; but when they gratuitously assign bad motives to their opponents where no evidence of such motives exist, I am compelled to wonder why.

If I lived in a glass house, I would hesitate before I threw stones lest I demolish my own premises. Has anyone representing the American ship interests appeared here in behalf of those interests? Has any literature been sent out, any lecturers promoted by the shipowners? Does anyone know that these shipowners want "free tolls"? I have not seen anyone interested in American ships; I have not heard from anyone who is interested.

Does anyone doubt that if there was as much evidence of outside influence, backed by such abundant financial means, exerted against repeal as has been used for it that an Executive denunciation against it would have been issued? It would have been denominated a most vicious and insidious lobby, entitled to the maledictions of all good people. But this particular influence is working in harmony with the purposes of the President, and therefore is not the object of condemnation. Again do we have a demonstration of the modern distinction between the good and the bad lobby. If it is for you, it is beneficent; if it is against you, it is corrupt and baneful.

But, Mr. President, this case will not be decided by the American people on any collateral issue. They see the great principle involved; they understand it in all of its mighty proportions. Criminations and recriminations will not assist them in reaching a just conclusion. They will not consent to a predetermined decision right or wrong. They want a right decision, and they will tolerate no other.

Greater than the question of subsidies; greater than all material benefits which can grow out of the canal; greater than the good opinion of all the world, because it includes them all and upon it all depends, is the absolute, unlimited right and power of the United States to do what it pleases in its own domestic affairs. I can not consent to yield any part of that right and power at the command or solicitation of any country or of all the countries of the world. If our Government makes an economic mistake in the conduct of its business, it can be corrected; but if it surrenders its rights of sovereignty, it renders itself naked and helpless in the struggle of nations.

I resent the charge that our behavior as a nation has incurred the hostility and bad opinion of the world. I know that there is no government on the globe that commands greater respect and confidence than this Government commands, and I will not sit in silence while some of its own citizens traduce it. If there has ever been the slightest justification for criticism of its efforts to establish and maintain a great progressive democracy, the occasion has been when it has hesitated to assume and exercise a right essential to its freest, broadest existence. When a country commences to yield or to compromise on a principle involving its sovereignty that moment it becomes the target of the world. To hold the confidence and respect of nations we must retain not only our every sovereign power, but we must retain our own self-respect.

The administration of our Government under which the treaty with Great Britain was made and under which the canal was begun, and also the administration under which the largest portion of the canal was dug, have decided this question in favor of the right of the United States to exempt domestic ships passing through the canal from the payment of tolls, and now, when that canal is about to be opened, I will not repudiate our past nor stultify myself by libeling my country. It has done no legal or moral wrong. I will not, in order to obtain the approval of the selfish shipping interests of any nation or of all nations, vote our Government, of which we are a part, guilty of perfidy and dishonor.

Mr. OWEN. Mr. President, before the Senator yields the floor I wish to call his attention to the letter of Mr. Choate, which I think he perhaps did not observe.

In the letter of August 20, 1901, Mr. Choate, in addressing John Hay, the Secretary of State, said:

As article 8 stands in the Clayton-Bulwer treaty it undoubtedly contemplates further treaty stipulations, not "these" treaty stipulations, in case any other interoceanic route, either by land or by water, should "prove to be practicable," and it proceeds to state what the general principle to be applied is to be, viz, no other charges or conditions of traffic therein "than are just and equitable," and that said "canals or railways, being open to the subjects of Great Britain and the United States on equal terms, shall also be open on like terms to the subjects and citizens of other States, which I believe to be the real general principle (of neutralization if you choose to call it so) intended to be asserted by this eighth article of the Clayton-Bulwer treaty.

I wish to call the Senator's attention to this statement of the United States ambassador to Great Britain negotiating this treaty for us, in his letter to the Secretary of State, explaining what the principle of neutralization of article 8 meant; and then I desire to ask the Senator if he thinks that retaining the principle of neutralization referred to in article 8 in the preamble of both the first and the second drafts of the Hay-Pauncefote treaty and refusing to strike it out by an overwhelming vote does not preclude us from denying the interpretation given by our own ambassador in this negotiation?

Mr. TOWNSEND. I think not. I have so stated. In answer to the Senator from Oklahoma, I will say that I have read the Choate correspondence, and it does not change the statements I have already made. Nothing that has been disclosed yet shows that the question of our coastwise boats, to which I have referred, was ever even discussed between the representatives of the two countries.

The Senator from Oklahoma again speaks of "the overwhelming vote" in the Senate. I am surprised that the Senator should even mention that after what has been disclosed in reference to it. I have not yet known of a single Senator who was in the Senate in 1901, when that amendment was proposed, who has not declared that the reason it was not adopted was because it was thought unnecessary.

Mr. O'GORMAN and Mr. OWEN addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Michigan yield to the Senator from New York?

Mr. TOWNSEND. In just a moment.

The PRESIDENT pro tempore. The Senator from Michigan declines to yield at this time.

Mr. TOWNSEND. The Senator from Massachusetts [Mr. LODGE] himself has stated that he voted against the Bard amendment because he believed it was unnecessary. He reported the treaty for Senator Davis, Senator Davis being ill. He says that Senator Davis also understood that the United States had the right under the treaty to discriminate in favor of her coastwise vessels. He has told the Senate that he voted against the Bard amendment because it was unnecessary, and that he would not have voted for the treaty if he had not understood that under it we had the right to exempt our own domestic commerce if we saw fit.

Mr. OWEN. Mr. President, will the Senator permit me to interrupt him for a moment?

Mr. TOWNSEND. Certainly.

Mr. OWEN. The Senator is speaking about the Bard amendment, proposing an exemption in favor of our coastwise vessels. Senator Bard would not have made the proposal to amend unless he thought it was necessary; and I think every man who does not disclaim his motive in voting for the Bard amendment is bound by the proposal that it was necessary. I was not, however, speaking of the Bard amendment. I was speaking of the Bacon amendment. I was speaking of the amendment which passed by a vote of 60 to 18, to strike out the maintenance of the principle of neutralization referred to in article 8 of the Clayton-Bulwer treaty, which was put in both the first and the second drafts of the Hay-Pauncefote treaty, and which was explained to our own Secretary of State by our own ambassador as meaning that the ships of the United States and the ships of other nations should be treated alike as to tolls.

Mr. TOWNSEND. Mr. President, as used in a treaty neutralization refers to war and can refer to nothing else than to conditions of war. It can not be construed or tortured when used in treaties as referring to anything else than that.

Mr. OWEN. Mr. President, it was so construed by our own ambassador who negotiated this treaty, and it is in the record of the hearings at page 267.

Mr. CLARK of Wyoming. Mr. President, of course I am not competent to speak for anybody except myself. As a Member of the Senate at the time the Hay-Pauncefote treaty was ratified by the Senate, I know that it was my belief and I know that it was the belief of many Members of the Senate that the Bard amendment perhaps was not necessary, because the effect of it was included in the treaty; and it was urged that if it was added in specific language it would not only delay the ratification but would make necessary the resubmission of the treaty to the envoys.

Mr. President, I think it is not too much to say that if any other impression had prevailed, or if any other belief had prevailed, the Hay-Pauncefote treaty would not have been ratified by the Senate as then constituted.

Mr. THOMAS. Mr. President, I have listened with a great deal of interest to the speech of the junior Senator from Michigan [Mr. TOWNSEND], and I am in accord with some of the views which he has expressed. I can not, however, permit the opportunity to pass without noticing for a moment the protest which the Senator has registered against what he assumes to be the influence of Great Britain in the pending bill, which influence, he thinks, seems to have had its effect upon the attitude of the President and those in sympathy with him.

My experience in public life is a somewhat brief one, but I was directly connected with some questions of public importance long before I had the honor of a seat in the Senate; and I long ago discovered that the influence of Great Britain in any American policy is commendable or censurable as it may apply to given subjects. A great many, both in and out of public life to-day, who are now inveighing so much against the supposed influence of Great Britain in this matter seem to forget that that influence was entirely agreeable to them when our financial policy was at stake and when in consonance with its interests one-half of the coined money of the Nation was about to be demonetized. I recall very distinctly that from 1873 to 1900 this foreign influence had much to do in shaping our financial policy and in leaving finally the stamp of their permanent impress upon it. This was made possible with the cooperation of a public opinion which now shudders at the thought of British influence in shaping our economic legislation with reference to the operation of the canal.

Mr. SIMMONS. Mr. President, I do not at this time desire to go into any discussion of the general questions involved in this controversy. The Senator from Michigan [Mr. TOWNSEND] has made a broad statement to the effect that the Bard amendment was voted down because Senators thought it was not necessary, and that the vote upon that question was not upon the merits of the proposition.

There has been placed in the record, in the hearings, statements made by Senator Bacon, who was then a member of the Foreign Relations Committee and who afterwards became chairman of that great committee, showing that his vote was given without any such understanding.

I did not arise, however, for the purpose of enumerating Senators who have declared that their vote upon that amendment was based upon the merits of the proposition. I have risen to call the attention of the Senator from Michigan to a statement of former Senator Fairbanks, who afterwards became the presiding officer of this body, who we all know was most diligent in attending the sessions of this body, and was the senior Senator from Indiana when the amendment was under consideration, and who probably heard all the discussion and all the reasons given by Senators for their vote upon that amendment.

This statement is given in an article which appeared in the May number, 1914, of the North American Review, written by the editor of that great magazine, Col. George Harvey:

Former Senator Fairbanks—

Says Col. Harvey—

on the other hand, declares emphatically that—

Now, here is what he declares—

the Bard amendment was voted down, after full discussion, not because it was regarded as surplusage, but because in the opinion of a large majority of the Senate it was violative of the spirit of equality which had been expressed in the treaty.

Mr. GORE. I should like to ask the Senator in charge of the unfinished business if it would be consistent with his plans to lay it aside temporarily that the Senate may proceed with the consideration of the Agricultural appropriation bill?

Mr. O'GORMAN. I ask unanimous consent to lay the bill aside temporarily so that the chairman of the Committee on Agriculture and Forestry can proceed with his appropriation bill.

The PRESIDENT pro tempore. The Senator from New York asks that the unfinished business may be temporarily laid aside. Unless there is objection, such will be the order. The Chair hears none.

AGRICULTURAL APPROPRIATIONS.

Mr. GORE. I ask that the Senate proceed with the consideration of House bill 13679, the Agricultural appropriation bill.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

The PRESIDENT pro tempore. The pending question is on the amendment——

Mr. McCUMBER. Mr. President, that I may not be accused of dilatory tactics, I have just counted the number of Senators present. There are less than 30 and I understand that is not a majority of the Senate. I therefore suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator cut the Chair off from the floor before he had a chance to state the pending question.

Mr. McCUMBER. I beg the Chair's pardon.

The PRESIDENT pro tempore. The Senator from North Dakota suggests the lack of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Kenyon	Owen	Smith, S. C.
Borah	Kern	Page	Smoot
Bristow	La Follette	Perkins	Sutherland
Bryan	Lea, Tenn.	Pittman	Swanson
Burton	Lippitt	Pomerene	Thomas
Chamberlain	Lodge	Robinson	Tillman
Crawford	McCumber	Saulsbury	Vardaman
Cummins	McLean	Shafroth	Walsh
Goff	Martin, Va.	Sheppard	Warren
Gore	Martine, N. J.	Sherman	West
Hollis	Norris	Shively	Williams
Hughes	O'Gorman	Simmons	Works
Johnson	Oliver	Smith, Ariz.	
Jones	Overman	Smith, Ga.	

The PRESIDENT pro tempore. Fifty-four Senators having answered to their names, a quorum of the Senate is present.

Mr. GORE. Mr. President, I am informed this morning that Dr. Galloway has severed his connection with the Department of Agriculture to take effect the 1st of July. I feel that I ought to say, however, before taking the intended step, I owe

it to that department and I owe it to Dr. Galloway and myself to say that the Senator from North Dakota [Mr. MCCUMBER] was in error when he stated that the substitute offered for the grain-grading bill on Friday last bore the finger prints of the boards of trade and grain exchanges. Hearings have been in progress for a week before the Committee on Agriculture of the House and a number of the representatives of boards of trade have appeared before that committee and registered their opposition to that substitute.

I now ask unanimous consent to withdraw the pending amendment.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the amendment is withdrawn.

Mr. SMOOT. Do I understand that the amendment has been disagreed to?

The PRESIDENT pro tempore. It has been withdrawn by unanimous consent.

Mr. SMOOT. Of course, that is equivalent to disagreeing to the amendment.

Mr. MCCUMBER. Mr. President, it has been stated upon the floor of the Senate that boards of trade have been in conference with the Agricultural Department, and that they have secured a bill which was entirely satisfactory with reference to the inspection and grading of grain, satisfactory both to the Agricultural Department and to the several exchanges in the country. I have no doubt that that is true. I have no doubt that in the drafting of the bill just mentioned by the Senator from Oklahoma there were called in those who had specific knowledge of the operations of the several exchanges. I think it eminently proper that they should be heard. I think, of course, that in securing some provisions in the Lever bill which was presented here they were especially well protected in carrying on certain features of their business that we have been complaining about. But I am making no complaint about that in general.

Now, I want to have the attention of the Senator from Oklahoma. Although the Senator has withdrawn that provision in the bill relating to an increase of $1,000 in the salary during the term of the present incumbent in the office of the Assistant Secretary of Agriculture, I agree with him that it would be most proper to recognize the efficiency and the good work of Dr. Galloway by inserting in this bill a provision that has been drawn by him and is his own opinion as to what ought to be done in reference to the grading of grain.

I did not agree with every provision of the Lever bill. I said, however, on the floor that it had two good provisions. I agreed with the Senators who opposed my bill that there were at least two good provisions in the Lever amendment. One proposition was for Government standards of grades, and the other was for the uniformity of grades. Beyond that I thought, and still think, that the bill was rather inefficient; but those were two very good features, and those two good features I would like to have in this bill.

I want to read to the Senator a letter which I received from Dr. Galloway in reference to this subject when I asked him if there had been any change of his views, and in which he stated that he had not changed his views whatever, but thought that we could do as well with supervision as though he had the actual inspection under his power. I want to read his letter of March 12, 1914, which he wrote to me. It is as follows:

> DEAR SENATOR MCCUMBER: I have your favor of March 10 relating further to the inspection and grading of grain by the Federal Government, or under the supervision of the Federal Government, in which you make inquiry as to any legitimate reason why the grain exchanges should oppose Federal inspection.

That was one of the things I asked him—if he knew any legitimate reason that the Department of Agriculture had ascertained why they should oppose this inspection. Further, quoting:

> In reply I have to advise that while various objections have been raised by the grain exchanges in opposition to Federal inspection, the results of the investigations of this department do not indicate that either Federal inspection or Federal supervision would in any way be detrimental to the legitimate transactions in grain on any of the exchanges.

Now, just note his words. He says that it would not "in any way be detrimental to the legitimate transactions." Of course, he means to convey by that language the idea that it might be detrimental to the illegitimate transactions upon these exchanges, and the department knows of those illegitimate transactions, and he seeks to obtain in this way some method of control over those transactions that would make them all legitimate.

Following, he says:

> It is clearly evident that there is urgent need—

I want Senators to bear this in mind, both the Senators who occupy their seats and those who are out of their seats—

> It is clearly evident that there is urgent need for some legislation which will bring about uniformity and reliability in the grading of grain in all markets.

These are words of wisdom by the Assistant Secretary of Agriculture. When he says there is urgent need for some legislation that will bring about uniformity and reliability in the grading of grain in all markets, he means that there is not reliability in the several markets of the United States at the present time. But to make it clear he goes on:

> So that the producer—
>
> The farmer—
>
> will have some incentive to grow and market grain of better quality and that the consumer will get the grade that he buys.

There are two things in these words of wisdom that have been uttered by the Assistant Secretary of Agriculture. The one proposition is that there is no encouragement on the part of the farmer to raise a better grade or to care for his grain better, because he can put no dependence whatever upon the certification that is given him on his grain. Also, he says, so that "the consumer will get the grade that he buys." If that means anything on earth, it means that under the present system the consumer does not get the grade that he buys.

Can the Senator draw any other conclusion from that? Can anyone else who will listen to me draw any other conclusion from that? Then he goes on further and says:

> The investigations of this department during the past two or three years have led to the conclusion that a system of rigid Federal supervision will be equally as effective as Federal inspection and likewise simpler in its operation. The department, however, stands ready to undertake the enforcement of whatever measure may be enacted by Congress to insure uniformity in the grading of grain entering into interstate and foreign commerce.

I have several other and longer letters from the Assistant Secretary of the Department of Agriculture, which I should like to read, but I notice there are about 18 Senators present at this time in the Senate Chamber, and with only that number present of course I do not feel very much encouraged to impress the matter upon the entire Senate as a body.

However, I want to call the attention of the Senator from Oklahoma to some matters that I think are worthy of consideration at this time. I want to show, if I can, what is meant by this statement of the Assistant Secretary, to the effect that neither the producer nor the ultimate consumer knows what he is getting, under the present system of grading; that the producer is not encouraged to raise any better grain, because he can not depend upon the certification of that grain as being better; and that the miller can not secure the grade that he is entitled to receive.

The PRESIDENT pro tempore. Will the Senator please suspend until the Chair causes the next amendment to be reported to the Senate? There is nothing pending at this time.

The SECRETARY. The next amendment passed over is on page 7, line 5, after the words "Weather Bureau that," to insert "in the judgment of the Secretary of Agriculture," so as to make the clause read:

> For the maintenance of a printing office in the city of Washington, for the printing of weather maps, bulletins, circulars, forms, and other publications, including the pay of additional employees, when necessary, $26,000: *Provided*, That no printing shall be done by the Weather Bureau that, in the judgment of the Secretary of Agriculture, can be done at the Government Printing Office without impairing the service of said bureau.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

Mr. SMOOT. Mr. President, did I understand the Chair to state that the amendment that was just presented was agreed to?

The PRESIDENT pro tempore. Oh, no; it is pending. The question is on agreeing to the amendment.

Mr. KENYON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Iowa?

Mr. MCCUMBER. I yield.

Mr. KENYON. I did not understand the statement of the Chair as to what amendment is now before the Senate. Will the Chair kindly restate it?

The PRESIDENT pro tempore. On page 7, line 6, where it is proposed to add the words "in the judgment of the Secretary of Agriculture."

Mr. KENYON. I thank the Chair.

The PRESIDENT pro tempore. The Senator from North Dakota will proceed.

Mr. MCCUMBER. I know, Mr. President, that very many of the boards of trade do not consider the farmer an important factor in the discussion of commercial problems relating to his

products. His mission, they seem to think, is solely to raise the grain that others may have profit out of its sale and distribution. In many ways, however, the cultivation of his confidence has tended toward better grades and the eradication of this very element of distrust. If he finds that his best wheat, carefully cleaned, is liable to be graded lower than that taken direct from the separator, it is not surprising if he markets his product in a poor condition. He may well say, "What is the use?" He does say now and ever since the grading system has been indulged in—has been saying that his grades are, on the whole, too low; that every doubt is resolved against him and in favor of the purchaser; that the grading is carelessly and inefficiently done.

Mr. President, I am not objecting at all to the silence of the empty seats here in the Chamber, but I do ask the attention of the very few seats that are occupied, and I can not go on until there is less disturbance on the floor.

The PRESIDENT pro tempore. The Senate will please be in order.

Mr. McCUMBER. I want Senators to listen to a little letter that I received from one of the farmers of my own State upon this very matter that the Assistant Secretary of Agriculture is writing about. He says:

> I shipped two carloads of specially good wheat to the terminal market. One car graded No. 2, the other No. 3. I ought to have had No. 1 for both. Both cars of grain were practically the same. I had one car also of very poor wheat, wet and foul.

And I want the attention of the senior Senator from Georgia [Mr. SMITH].

Mr. SMITH of Georgia. Mr. President——

Mr. McCUMBER (reading):

> I had one car also of very poor wheat, wet and foul——

Mr. SMITH of Georgia. If the Senator will address himself to the amendment pending before the Senate, I will be glad to hear him. I do not care to hear these other matters at the present time. I have heard them several times. I shall devote myself to something else. The Senator is addressing the Senate upon a matter that is not before the Senate.

Mr. McCUMBER. I will excuse the Senator from the Chamber if he does not want to listen.

Mr. SMITH of Georgia. I do not desire the Senator to excuse me. He would do me a great favor if he would excuse himself from discussing a subject that is not before the Senate and let us proceed with the bill.

Mr. McCUMBER. The Senator will find that this whole matter is before the Senate, and right on this bill, whether it is agreeable to him or not. The Senator can find an exit in the cloakroom, if he desires.

Mr. SMITH of Georgia. Thank you; I will do so.

Mr. McCUMBER. I do not blame the Senator for leaving. I am not surprised that the subject is disagreeable to him. Cotton has been taken care of. Wheat is of much less value to that section of the country. But I want to read this letter, and I read again the opening sentences:

> I shipped two carloads of specially good wheat to the terminal market. One car graded No. 2, the other No. 3. I ought to have had No. 1 for both. Both cars of grain were practically the same. I had one car also of very poor wheat, wet and foul. I had no room for it—no place to dry it—and I decided to ship it out and get the best I could for it, naturally expecting to have it inspected no grade. It certainly was not even No. 4. You can imagine my surprise when I got my returns; it was graded No. 2, and I got more out of it than I got out of one of the cars of my good grain.

Now, that took place under the particular kind of a system that has been paraded before the Senate as being perfect. I have had considerable experience along the same line myself. It was not very long ago that I shipped a couple of carloads of grain, the first grain that ever had been raised upon a virgin soil, without a weed, without a stick, without a foul seed in it anywhere. It was all put into an elevator. Not a drop of rain had fallen on it after it had been cut. It was in prime condition. It was elevated in that elevator and mixed thoroughly. It was mixed again when it was loaded into two cars as thoroughly as it was possible to mix anything. I got a No. 1 grade for one car, with 1 pound per bushel off. I got a No. 2 grade for the other car, with some 3 pounds per bushel of weight off. That is what we are experiencing every day in our shipments, and that is what we are complaining about. They may be honest; it may be that they have more work than they can do; but the work is carelessly done. I am not reflecting at all upon the integrity of those inspectors, but I do say, Mr. President, that they are inefficient.

The farmers in my State ship a great deal of grain direct to the terminals, and the complaint is universal that absolutely no reliance can be placed upon the grades. The independent buyers at the country elevators find themselves beset exactly by the same conditions and difficulties. They dare not trust their own judgment. They are forced to resolve every doubt as to grades against the producer. Not only this, but in many instances they must compete with the line elevators. They must sell their grain at the terminals to the same company whose agent may be purchasing at an adjoining elevator, and whose interest it would be to drive them out of business. They naturally feel that their competitors, already having that one advantage, ought not to be possessed of the additional one, an inspector who is beholden to them for his position.

When I come to the miller I find the same complaint—no confidence in the grades. He finds himself compelled in many instances to purchase direct from the terminal elevator and to accept the mixture which has been concocted therein and the grade which has been placed on it by the inspector. He generally prefers to do his own mixing. The consensus of opinion of the millers of the country, as near as I can ascertain, points to the unreliability of grades as a great hindrance in their business.

Mr. President, the price of our grain is finally fixed by the foreign demand. If that demand is lively, if it is free from contention and disappointment, no one will deny that it will add to the value of the American product; and if our consular reports are at all reliable, the mixing of grades and inefficient inspection in the grading of our grain have seriously affected our trade abroad during the last 15 or 20 years.

Mr. President, there seems to be an idea that, because the farmers of the country do not write to the individual Senators, they are entirely satisfied with the present condition, and that we need not consider anything that refers to that condition; but even if the farmer does not know the extent to which the rules of trade injure him, ought we not, as representatives of that great class, constituting more than 35 per cent of our entire population, represent him in a way that he ought to be represented? If we know that he is not receiving justice by the methods that are now prevalent throughout the country in the handling of his grain, is it not our duty as his representatives to see that justice is done him without his having to write us letters and to appeal to us again and again for some remedy? Mr. President, it is probably true that the farmer does not know how the remedy may be brought about; he is not in a position to know exactly what kind of letters to write. There are only a few of them who give especial attention to legislative matters, but wherever they have done so they have written us, and they have met and sent resolutions which expressed the wishes of those who have a knowledge of the subject. What more can we ask of the farming community than those expressions?

We have had such expressions as I have suggested not alone from the farmers' organizations in every one of the great Western States, but we have had them from every one of their elevator companies; we have had them from all of the independent elevator companies; we have had them from the millers all over the entire country.

The other day I received a resolution from the Board of Trade of the city of Duluth. Duluth is only secondary to Minneapolis in the handling of the northwestern grain products, and is it not strange, Mr. President, that that particular board of trade should appeal for Federal inspection? I want to ask those Senators who do me the honor of listening if they will stop and consider for one moment why one board of trade in the city of Minneapolis so viciously battles against this bill, while another board of trade, but 115 or 120 miles distant, pass a resolution asking for Federal inspection of grain. There are reasons for both. I do not suppose that the Duluth Board of Trade would appeal unless they felt that there was something to be gained to the individual, nor would the Minneapolis Board of Trade be opposing it unless they were of the opinion that they would profit by maintaining the old system. I am not deceiving myself for one moment into the idea that either of them are making any earnest effort to protect the interests of the producer or of the consumer. Then why is it that the Duluth Board of Trade is appealing for Federal inspection? Mr. President, the Duluth board deal with the sales of grades of grain; they are not the mixing element; they are not so much the owners of the elevators, although, of course, there are owners of elevators there, but they are not so much dominated by them. They are commission men, pure and simple. They buy a grade and they sell that grade on commission. The only thing in which they are interested—because they will get their commission anyway—is that they may have a grade upon which they may depend; that when they buy grain at a certain grade they can sell it at the same grade and be absolutely certain that there will be no complaint on the part of either the person selling to them or on the part of their own customers. That is a simple explanation of

the reason why the Duluth Board of Trade wants this, and that is the particular reason why the millers and the ultimate consumers over the entire country are demanding the same thing.

I have stated before, Mr. President, that my labors in the Senate have been to benefit the farming element of the State which I in part represent. I have always considered it strange that the business of farming could not be carried on like any other business in the country. I can buy a stock of merchandise; I can go into the mercantile business; and if I have to borrow money I will balance the cost, and so forth, and charge for my product an amount that will give me a little profit above the running expenses. I can always do that. I can fix my own price. I do not need to sell for anything less than the thing cost me. The farmers of the country must sell their product for what they can get. The farmer, as a rule, can not hold his product. His is the only business in which a man must pay what the other man demands for everything he purchases and must sell for what the other man will give for everything that he sells.

Farmers labor under this natural disadvantage. I should like to get them out of that condition if it be possible, and to put our farmers in a position where, for instance, if as a farmer I so desired, I could buy a thousand acres or two thousand acres of land, could hire men to work that land the same as you hire men to do your work in your mercantile or manufacturing establishments, and that I could then get a profit upon what they would produce by their labor the same as you get a profit in your mercantile and in your manufacturing establishments; but you know, and I know, that if I hire this work done and put in my capital as my contribution to the business I would go into bankruptcy within a year or two. There is not any farm in the United States that I know anything about that will pay for the hire of labor or for all the work that is done by hired labor with the present price of labor. That is a condition that I should like to overcome. The only way to overcome it is to so frame our laws and the rules under which the farmer's product is disposed of as will enable him to secure the very best possible price. If we do that, in a very short time the farmer would be in a position to meet the balance of the world upon a footing of business equality; but as things now are, when a farmer buys a farm he simply buys an opportunity to labor himself; he simply purchases an opportunity to earn, according to the Agricultural Department's report, 20 cents a day and his board. For that opportunity he gives a mortgage on two-thirds of his working life; and when I appeal to Senators to join with me and to assist me in securing some legislation to put the farmer on a nearer equality with the other lines of business in the United States I have to deal with those who, like the Senator who left the Chamber a short time ago, do not want to listen to his appeals.

I have prepared an amendment that will partially carry into effect the provisions of the Lever bill, which was introduced by me as an amendment the other day, and which was lauded to the skies as being a most perfect bill and one that would do justice to the producer, to the consumer, and to the dealer in grain.

Mr. STERLING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from South Dakota?

Mr. McCUMBER. I yield.

Mr. STERLING. I suggest the absence of a quorum.

The PRESIDENT pro tempore. Without making the action of the Chair at this time a precedent that will be obligatory in the future, the Chair directs the Secretary to call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Kenyon	Owen	Smith, S. C.
Brady	Kern	Page	Smoot
Bryan	Lea, Tenn.	Perkins	Sterling
Chamberlain	Lewis	Pittman	Sutherland
Chilton	Lippitt	Poindexter	Swanson
Clark, Wyo.	McCumber	Ransdell	Thomas
Clarke, Ark.	McLean	Saulsbury	Thompson
Crawford	Martin, Va.	Sheppard	Townsend
Cummins	Martine, N. J.	Sherman	Vardaman
Gore	Nelson	Shively	Warren
Hughes	Newlands	Simmons	West
Johnson	Norris	Smith, Ga.	Williams
Jones	Overman	Smith, Md.	Works

Mr. PAGE. I am requested to announce that the Senator from Oregon [Mr. LANE] and the Senator from Arkansas [Mr. ROBINSON] are absent on business of the Senate.

The PRESIDENT pro tempore. Fifty-two Senators having answered to their names, a quorum of the Senate is present.

Mr. McCUMBER. Mr. President, I want to call the attention of the Senator from Oklahoma to the first two or three sections of the amendment which he introduced the other day when the grain-inspection bill was pending. Section 2 of that amendment provides:

SEC. 2. That, as used in this act, the term "grain" shall include and shall apply only to corn (maize), wheat, oats, barley, rye, spelt, emmer, rough rice, milled rice, flaxseed, and buckwheat, and kafir, milo, durra, and every other sorghum.

I do not know that that is necessary to be inserted, and I have not included it in the amendment which I desire to offer to the pending bill. I propose to amend section 3 of the so-called Lever bill so as to read:

That the Secretary of Agriculture in fixing the said definite grades shall fix and establish from time to time standards of quality and condition for grain. In promulgating the standards the Secretary shall specify the date or dates when the same are to become effective, and may give public notice thereof by such means as he deems proper.

I now read sections 4, 5, 6, and 7 of the Lever bill, as follows:

SEC. 4. That the standards so fixed and established shall be known as the official grain standards of the United States.

SEC. 5. That whenever standards shall have been fixed and established under this act for any grain no person thereafter shall ship or deliver for shipment from any State, Territory, or District, to or through any other State, Territory, or District, or to any foreign country, any such grain which is sold or offered for sale by grade, unless the grade by which it is sold or offered for sale be one of the grades fixed therefor in the official grain standards of the United States and the grain conforms to the standard fixed and established for the specified grade: *Provided*, That variations from the official grain standards may be permitted under such rules and regulations as the Secretary of Agriculture shall prescribe. No person shall, in any contract or agreement of sale or agreement to sell, either oral or written, or in any invoice or bill of lading or other shipping document, relating to such shipment or delivery for shipment, describe or in any way refer to any of such grain as being of any grade other than a grade fixed therefor in the official grain standards of the United States.

SEC. 6. That whenever standards shall have been fixed and established under this act for any grain, no person thereafter shall ship or deliver for shipment from any State, Territory, or District, to or through any other State, Territory, or District, or to any foreign county, any such grain which is sold or offered for sale, whether by grade or not, under any name, description, or designation which is false or misleading in any particular: *Provided*, That nothing contained herein shall prevent the shipment or delivery for shipment, otherwise lawful, of any grain which is sold or offered for sale, without reference to grade, under names, descriptions, or designations which are not false or misleading.

SEC. 7. That the Secretary of Agriculture is authorized to cause inspections and examinations to be made of any grain which has been certified or represented to conform to any grade fixed in the official grain standards of the United States, and to ascertain whether the grain is, in fact, of the specified grade, and whenever, after opportunity for hearing is given to the owner or shipper of the grain involved, it is determined by the Secretary that any lot of grain has been incorrectly certified or represented to conform to a specified grade, he may publish his findings.

I then skip over sections 8, 9, and 10 and take section 11 and modify it so that it will read:

That every person who shall violate any provision of this act relating to the shipment or standardization of grain as herein provided shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined not exceeding $200 for the first offense and for each succeeding offense not exceeding $1,000.

Section 11 as it originally stood read:

SEC. 11. That every person who shall violate any provision of this act or the rules and regulations made hereunder shall be deemed guilty of a misdemeanor—

And so forth.

But with the sections I have indicated omitted, there being no rules, that portion would be inappropriate. If I may again have the attention of the Senator from Oklahoma, I will call his attention to lines 4 to 6, inclusive, on page 19, of the pending appropriation bill, which read:

For investigating the handling, grading, and transportation of grain and the fixing of definite grades thereof, $76,320.

The Senator will observe that by this provision the Secretary of Agriculture is authorized to fix definite grades; at least he is given the amount of money indicated for the purpose of fixing definite grades of grain. Therefore the only matter that I want to bring in there and add to this provision is one against which, as I conceive, there can be no possible parliamentary objection, because after we have appropriated a given sum for a given purpose we can at least amend by directing how that purpose may be carried into effect; that is, in what way the definite grading provided for may be accomplished, if I do not change the amount that is appropriated, and so forth. So at the end of this paragraph, following the figures "$76,320," I desire to insert the following:

That in fixing said definite grades the Secretary of Agriculture shall fix and establish from time to time standards of quality and condition for grain. In promulgating the standards the Secretary shall specify the date or dates when the same are to become effective, and may give public notice thereof by such means as he deems proper.

The Senator will observe that I change the third section of the Lever bill only by inserting the words "in fixing said definite grades the Secretary of Agriculture shall." The remainder of the amendment is in the exact words of sections 3, 4, 5, 6, and 7, and there I stop.

Section 8 of the Lever bill provided for appeals when there were disputes, but as we do not go that far in this amendment, and we give the Secretary no authority, not even a supervisory authority over the grading of grain, of course there will necessarily be no appeal from him. We only provide by the amendment that he shall fix the standards and the methods by which those standards shall be fixed, and then we shall have to trust the board and the State inspection systems to carry into effect the standards which he promulgates, and it is assumed that he will promulgate standards that will be as nearly uniform as possible.

We might possibly dispense with a great deal of argument upon that bill if the Senator will agree and the Senate will agree that the amendment which I offer, covering only a portion of the Lever bill, and which only pertains to the standardization of grades by the Government and those things that are necessary to carry that power into effect, may be adopted by the Senate. May I ask whether that would be satisfactory to the chairman of the committee?

Mr. GORE. Mr. President, it has been the uniform practice of the Senate—and, I think, generally speaking, a wise practice—to dispose of committee amendments before considering other amendments. The presiding officer indicated a few days ago that he would defer to that precedent during the consideration of the present bill.

The PRESIDENT pro tempore. Yes.

Mr. GORE. I have no permission from the committee, much less the Senate, to accept the amendment tendered by the Senator. Speaking for myself alone, I should be glad to accept it if I were in a situation to do so. I may say to the Senator that whenever he presents that issue to the Senate in accordance with the rules of the Senate he will have my hearty cooperation.

The PRESIDENT pro tempore. The Senator can offer the amendment he has just been reading.

Mr. McCUMBER. I should like to offer that amendment at the present time. I appreciate that it has been more or less the custom, but that custom generally has been preceded by a request, that we proceed to the consideration of a bill and first consider the committee amendments. That request generally has been concurred in.

The PRESIDENT pro tempore. The Senator may send his amendment to the desk. The question whether or not the Senate will have to deal with that matter will be presented later. As the Chair understands, the amendment has not been presented to the Senate. The Senator has indicated that he would present such an amendment, but he has not actually presented it.

Mr. McCUMBER. That is correct. I understand, however, that there is really before the Senate at this time a different amendment, and I will await a vote upon that amendment. Then, if the Chair will give me recognition, I will offer this one, and we can test out that rule.

The PRESIDENT pro tempore. The Senator from Utah [Mr. SMOOT] is not in his seat. He intended to have something to say about the pending amendment. He is evidently absent under the belief that this discussion would take longer than it has taken. The Chair will ask one of the pages to be good enough to notify the Senator.

Mr. McCUMBER. What Senator is it?

The PRESIDENT pro tempore. The Senator from Utah [Mr. SMOOT], who has indicated that he desires to discuss the pending amendment to insert certain words on page 7, line 6. It has no relation whatever to the subject matter that the Senator from North Dakota has been discussing.

Mr. GORE. Mr. President, I ask that that amendment be passed over in the absence of the Senator from Utah.

Mr. SMOOT entered the Chamber.

Mr. GORE. I observe that the Senator from Utah has just come in.

The PRESIDENT pro tempore. The attention of the Senator from Utah is called to the fact that the question is on the adoption of the committee amendment which appears on page 7, line 6.

Mr. SMOOT. Mr. President, I wish Senators were——

The PRESIDENT pro tempore. The Chair will state to the Senator from Utah that the chairman of the Committee on Agriculture and Forestry has expressed a willingness to have the amendment go over until a later time.

Mr. SMOOT. I am perfectly willing that that shall be done. I have not the least objection. I am ready to speak upon the amendment now or at any time the Senator may prefer.

Mr. GORE. I should prefer to proceed with the consideration of the amendment. I wish to accommodate the Senator, of course.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

Mr. SMOOT. Mr. President, the other day, when this amendment was under consideration, I was asked at what time the branch printing office of the Agricultural Department was abolished. I did not then remember the exact month, but I have since looked it up, and I find it was November, 1909. The Joint Committee on Printing authorized the Public Printer to abolish the Weather Bureau printing office, except as to maps, charts, and so forth, on December 6, 1910. The object of that was to curtail printing of all kinds, other than that which was absolutely necessary, at the Weather Bureau printing office. As I said before, the policy always has been to consolidate the printing of our Government into the Government Printing Office.

Mr. McCUMBER. Mr. President, I rise to a point of order.

The PRESIDENT pro tempore. The Senator from North Dakota will state the point of order.

Mr. McCUMBER. The point of order is that by actual count made by me there are 19 Senators present in the Chamber; and even without asking the Senator from Utah to yield to me, I make the point of order that I can raise the point of a lack of a quorum at any time, and I now suggest the absence of a quorum in the Senate Chamber.

The PRESIDENT pro tempore. The point of order is not well taken. The Senator from Utah will proceed.

Mr. McCUMBER. Mr. President, I appeal from the ruling of the Chair, and prior to that appeal, as a new matter of business, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The question is, Shall the ruling of the Chair stand as the judgment of the Senate? As many as favor sustaining the ruling of the Chair will signify by saying "aye."

Mr. McCUMBER. I call for a division, Mr. President.

The PRESIDENT pro tempore. Those who favor sustaining the ruling of the Chair will please rise and stand until they are counted. [After a pause.] The ayes will be seated and the noes will rise. [After a pause.] The ayes have it.

Mr. McCUMBER. Mr. President, I ask the Chair to state the number of votes.

The PRESIDENT pro tempore. It is immaterial.

Mr. McCUMBER. I think I have a right to ask for it.

The PRESIDENT pro tempore. The Senator has not.

Mr. McCUMBER. Mr. President, I raise the point of order, which I suppose may as well be determined, that——

The PRESIDENT pro tempore. On a division the question is simply whether the larger vote is on the one side or the other. There is not any question of a quorum involved in it. The Chair has frequently ruled in that way, and its action in doing so has been sustained by the Senate.

Mr. McCUMBER. May I ask the Chair if it is the opinion of the Chair that a motion can be voted upon and carried by less than a quorum?

The PRESIDENT pro tempore. Ninety-nine motions out of a hundred adopted by the Senate are thus disposed of.

Mr. McCUMBER. Then we can do business with less than a quorum?

The PRESIDENT pro tempore. No, indeed; the Senator can call for the yeas and nays if he desires a more definite ascertainment of the sentiment of the Senate than is given by a viva voce vote. The Senator from Utah will proceed.

Mr. McCUMBER. I wish to register my protest right here against the ruling of the Chair that the Senate is not entitled to know how many Senators vote upon a division.

The PRESIDENT pro tempore. The protest will be noted.

Mr. McCUMBER. And I call for the yeas and nays.

The PRESIDENT pro tempore. On what proposition?

Mr. McCUMBER. On this same proposition.

The PRESIDENT pro tempore. It has been disposed of. The Senator from Utah will proceed.

Mr. SMOOT. Mr. President, I wish to call the attention of the Senate to the preliminary report of the Printing Investigation Commission in compliance with public act No. 217 of the Fifty-eighth Congress, third session, made a public document on June 25, 1910, in which I find the following:

Agricultural branch—

That is, referring to the printing branch of the Agricultural Department.

Agricultural branch: The Secretary of Agriculture, under date of March 25, 1910, replied as follows to an inquiry from the chairman of the commission concerning the abolishment of the Agricultural branch printing office:

In answer to the several inquiries propounded in your letter of the 19th instant, I have the honor to submit the following replies:

(1) Will you kindly advise the Printing Investigation Commission whether the abolition of the branch printing office at the Agricultural Department has resulted in any serious inconvenience to your department?

No serious inconvenience has resulted from the abolition of the branch office. During the maintenance of this office an immense amount of small job work was done, and it was executed very promptly—very often within a few hours.

Mr. WARREN. Is that from the Secretary of Agriculture?

Mr. SMOOT. This is from the Secretary of Agriculture—Secretary Wilson.

This was undoubtedly a very great accommodation, but in most instances there was no real necessity for the haste; or, if there was, it was due to negligence in ordering work required. Our people are beginning to get accustomed to the change, which occurred November 20, 1909, and fully understand that more time is now necessary to secure printing of all kinds.

(2) Has the Agricultural Department any criticisms to make of the manner in which its urgent or confidential printing is now being done at the Government Printing Office?

It has not. Occasionally there is urgent necessity for the completion and delivery of work at a specified time. In such cases the Public Printer has been so advised, and without exception our desires have been most promptly complied with. The only delay occurs in work regarding which no instructions as to time of delivery are given. After a reasonable time has elapsed it is the practice of the Chief of the Division of Publications, who is charged with the supervision of such matters, to draw the printer's attention to the desirability of executing the work, and such requests usually receive prompt and courteous compliance. If slight irritation sometimes arises at the apparent delay, it is done with remarkable accuracy and dispatch when the immense volume of the Government's printing is considered.

(3) Has the abolishment of the branch printing office resulted in increasing or decreasing the expense of printing for your department?

The work formerly done at the branch printing office is now done cheaper at the main office, and a further decrease has resulted from the fact that certain small printing is not now done at all, because it can not be obtained from the main office in a few hours and request is not made for it by the various bureaus, divisions, and offices.

Mr. President, Secretary Wilson had before taken the position that it would cost more to have the printing of the Agricultural Department done at the Government Printing Office, and objected to the abolishment of the plant, but after it had been in operation not exceeding one year the Secretary of Agriculture not only said that it was an advantage to the department, but admitted that it was a great saving to the Government. From that time forth we have tried to require all Government printing to be done at the Government Printing Office. This is taking a step to undo the good work that has been done in the past by the commission and by the Joint Committee on Printing of the two Houses.

I call attention to the fact that the estimate of the department does not include the proviso. The House passed it in these words:

That no printing shall be done by the Weather Bureau that can be done at the Government Printing Office without impairing the service of said bureau.

The House desired that no printing should be done at the Weather Bureau that could be done at the Government Printing Office. That, in my opinion, goes too far, because I want to call the attention of the Senate to the work that can be done at the Government Printing Office but that should be done at the Weather Bureau.

When this question was under consideration by the Joint Committee on Printing of the two Houses, we went into it most thoroughly, and agreed that this class of printing, the daily chart, should be printed under the direct supervision and watchful care of the head of the Weather Bureau. There is no objection to this kind of printing; but they have gone further than that.

Mr. WARREN. Including the cards.

Mr. SMOOT. Yes; including the morning cards, as the Senator from Wyoming suggests. They have gone further than that, and I find now in the Weather Bureau they are getting out a monthly abstract of telegraph and telephone messages sent and received. This is not printed. We find that it is lithographed because of the fact that they have no presses to print it. I could show the Senate other monthly statements of a similar character. This is what the Joint Printing Committee of the two Houses object to, and they ask the Senate of the United States to uphold them in the position they have taken. I wish to say to the Senate to-day that if this is not done it will be only the beginning of increasing the expense of our printing in this department, and no doubt it will be followed by the requests of other departments.

I find in the Agricultural appropriation bill hearings before the House of Representatives committee, and the report that was made by Mr. LEVER from the Committee on Agriculture on House bill 13679, on page 6, the following:

The increase in the printing office item is to be used for the purchase of a press and for paper and material. No addition to the printing office force is contemplated. The increase in the allotment for the printing office is only apparent and not actual, however, as a corresponding saving will be effected in expense for printing outside of Washington.

Mr. President, I say that if that printing can be saved outside of Washington under the bill as it passed the House, it can be saved without the addition of the proviso to the bill.

It continues:

This increase in the printing office allotment will also enable the bureau to do much of the work in connection with weather maps, etc., that is now done in the Government Printing Office, and will result in a saving of $22,000 in the amount allotted to the Weather Bureau from the general printing fund for the department.

Mr. President, I do not agree with that statement. I say that every bulletin, every circular, all the work that is being done at the Government Printing Office for the Weather Bureau to-day does not cost the Government a single cent outside of the printer's ink and the paper. Take this work away from the Government Printing Office and put it into the Weather Bureau and I want to say now that there will not be a hand less in the Government Printing Office nor one single cent less paid for maintaining that office.

Let us see what the facts are. It is true that the number of employees would not be increased if this were allowed; but I wish to call the attention of the Senate to the fact that in 1914 the cost of maintenance of the office was $16,750. We appropriated that amount for it. The employees cost $46,480. We have already proposed in this bill to increase the maintenance charge from $16,750 to $26,000. Let me say that in 1910 the maintenance charge alone was $45,000; in 1911, $40,000; in 1912, $18,000; in 1913, $16,750; in 1914, $16,750; and now we are asked to appropriate for that same purpose $26,000.

Mr. BRADY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Idaho?

Mr. SMOOT. I do.

Mr. BRADY. Does the Senator from Utah object to the entire item, or simply to what has been added by the Senate committee?

Mr. SMOOT. What I should like would be to have the proviso stricken out entirely. It was not asked for by the department. I should like to see the amount cut to $17,500. The reason I say that is that if you limit the amount to $17,500, which will be an increase over what they had a year ago, they will then print only such items as can be printed within the limit of cost, unless they do as some of the other bureaus have done in this bill, ask for an appropriation and then provide that a certain amount of it shall be immediately available. I wish to say to the Senator from Oklahoma now that I am going to object to all of the items in the bill providing that a certain amount of the appropriation shall be immediately available. I do it for this reason——

Mr. GORE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Oklahoma?

Mr. SMOOT. Just a minute, and then I will yield.

Mr. GORE. I did not want the Senator to let that sentence crystallize, because there are certain appropriations that relate to the present crops; and unless the appropriation is made now, it means that the experiments can not be made until next year. I hope the Senator will at least make a reservation in regard to those appropriations.

Mr. SMOOT. If there are such cases as that in this bill, I really do not remember which they are. I have reference to the amendments on pages 19, 48, 59, 68, and 69.

Mr. WARREN. Mr. President, I suggest to the Senator that I appreciate the ground he takes about the immediately available appropriations. They always ought to be avoided when we can avoid them; but when a new subject comes up, something that should be started in the spring of the year, right away, I hope the Senator will not make the point against that.

Mr. SMOOT. If there are such items, I shall not object; but I shall object where there have been appropriations year after year made, and then, in this bill, appropriations are made for the coming year, and a certain amount of the appropriation is made immediately available.

Mr. WARREN. That is right.

Mr. SMOOT. The reason I shall do so is that that is really a deficiency appropriation, and the Committee on Agriculture and Forestry has no right whatever to handle deficiency appropriations. There is another committee in this body appointed for that purpose. I do not believe the Department of Agriculture ought to be treated any differently from any other department when they require a deficiency. They ought to come to the proper committee, and the committee ought to pass upon it and report it to the Senate. I think if that is the case, we will have less of it in the future than we have had in the past.

Mr. WARREN. The Senator is right about that.

Mr. SMOOT. Mr. President, I do not want to take up the time of the Senate to do so, but I could go through the hearings we have had in the past and show what the sentiment of Congress was at that time in relation to the future policy of this

Government for its printing, not only in one department, but in all of them. In the report which was made by the senior Senator from Florida [Mr. FLETCHER] the other day, accompanying the bill for the revision and codification of the printing laws, now on the calendar of the Senate, Senate bill No. 5340, I find this statement:

The work done in the printing office of the Weather Bureau was greatly decreased by the Public Printer on the suggestion of the Printing Investigation Commission. A saving of several thousand dollars a year was effected thereby. The Joint Committee on Printing authorized the Public Printer, December 9, 1910, to abolish the printing office of the Weather Bureau, but the Agricultural appropriation bill approved March 4, 1911, contained the following provision under the Weather Bureau appropriation—

I call the attention of the Senator to the amount of the appropriation that followed that very year:

"For the maintenance of a printing office in the city of Washington, including the purchase of necessary supplies and materials for printing weather maps, bulletins, circulars, forms, and other publications, and for pay of additional assistant foremen, proof readers, compositors, pressmen, lithographers, and folders and feeders, when necessary, $18,000."

It is believed that the delegation of authority to abolish or regulate the branch offices as proposed will result advantageously to the Government, as it is impossible to regulate the work of the branch printing offices by acts of Congress. It is an administrative detail of the Government Printing Office, and as such should be handled by the Public Printer and the Joint Committee on Printing. The three branches which were abolished by the Public Printer have resulted in an approximate annual saving of $38,000.

Mr. President, this is the first step backward. This is the first step to undo the saving that has been accomplished by the abolishment of these branch printing offices. I am going to ask the Senator from Oklahoma if it would not be satisfactory to him to strike out altogether the proviso of this paragraph and decrease the amount of the appropriation, $26,000, to $17,500. I wish to say to the Senator now that that will give them an increase from $16,750 to $17,500. They have gotten along fairly well with the amount of the appropriation they have had in the past. They are not asking for any deficiency in this bill, nor have they come to Congress for any deficiency. I fully believe that is ample, and I believe if it is restricted to $17,500, the head of the bureau will not exceed that amount in printing, no matter what form it will be.

Mr. GORE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Oklahoma?

Mr. SMOOT. I do.

Mr. GORE. I should not be willing to consent to any amendment that impaired the efficiency of the service of this bureau. My impression is that they desire this increase of some $9,000 or $10,000 for the purpose of purchasing an additional press; and if that be necessary, I certainly would not be willing to say them nay.

This matter was pretty thoroughly discussed a few days ago, and I have no disposition to canvass the ground again. I agree with the general purpose which the Senator from Utah has in mind. I think the printing of the Government ought to be concentrated in the Government Printing Office. At the same time, I think the exception in this case rests upon solid and justifiable grounds.

A great deal of the printing done in this bureau is technical. There is a daily map which must be run off during certain hours in order to be of service. It is lithographic work. There is also a weekly publication of the same character. I think the monthly publication is printed at the Government Printing Office, excepting the lithographic pages, which are done at the Weather Bureau office.

The publication of the maps require certain hours of the day, I think, extending until some 2 or 3 o'clock in the afternoon. It has been the practice in the bureau after that hour to print certain blank forms and cards which are sent to the various weather stations throughout the United States and are used in making up their reports to be returned to the central office here in Washington.

The only point involved in this discussion is as to whether the men and machinery should be kept idle after 2 or 3 o'clock in order that this printing shall go to the Government Printing Office or whether the men and machinery may be used for the printing of these forms, otherwise allowing the men and machinery to remain idle.

Mr. SMOOT. In this connection I asked the head of that bureau this morning whether it was possible to keep the employees engaged or not, and he told me that he would keep them engaged in some way.

Mr. President, I admit what the Senator says, that this increased appropriation is for the purpose of purchasing a press. That is exactly what I want to avoid. I know they have been lithographing the monthly abstracts of telegraph and telephone messages sent and received. It is not necessary to lithograph those monthly statements. No other department of the Government does it, and there is no necessity for it. The only reason why it is done is because they have not a press. Now, they come to Congress and ask Congress to appropriate money for the purchase of a press. That simply means the first wedge, and a year from now it will not be one press, but they will want another press to take in some other line of work, and we will have a duplication of the work that might have been done at the Government Printing Office if this step is taken now.

Mr. GORE. I may say that the representatives of the department who were before the committee indicated that there was no purpose whatever to enlarge or extend the character of printing done by this office.

Mr. SMOOT. I admit that.

Mr. GORE. The language, "without impairing the service," it was thought might possibly prevent the printing of these forms, and in order to place that beyond doubt the amendment was suggested.

Mr. SMOOT. I wish to call the Senator's attention to the amendment. Let us take the provision just as it came from the House and then take the amendment suggested by the committee and see if it is not a fair statement to make that the conclusion which will be drawn from it is that Congress has reversed the policy that it has followed in the past. The proviso as agreed to in the House is—

That no printing shall be done by the Weather Bureau that can be done at the Government Printing Office without impairing the service of said bureau.

I will admit that those words are far-reaching, but I know that Congressman BARNHART had in his mind to stop a duplication of printing. I think the proviso goes too far, because I believe that some of the printing that is done at the Weather Bureau is absolutely necessary, and should not be done at the Government Printing Office. But, now, see how it reads with the amendment of the committee in:

That no printing shall be done by the Weather Bureau that, in the judgment of the Secretary of Agriculture, can be done at the Government Printing Office without impairing the service of said bureau.

In other words, it takes from Congress the right to say where the printing shall be done. It takes from the Government Printer the power under the direction of the Joint Committee on Printing of the two Houses to say whether the plant shall be abolished or not, and places the matter in the hands of the Secretary of Agriculture. I do not believe that Congress wants to do that. I believe it is a mistaken policy. Therefore, I sincerely trust that the Senate will not agree to this amendment.

Mr. WARREN. Will the Senator yield to me for a moment?

Mr. SMOOT. I yield.

Mr. WARREN. The Senator's argument has largely been against the part of the paragraph which was put in by the House. As I understood the action of the committee, the committee based their amendment upon what was already inserted by the House, and the question of the amount did not come up. I can assure the Senator from Utah that the only motive in putting in this proviso was in the line of economy. It was thought if we were to spend $26,000 for such necessary printing as must be done we should have some one there responsible for it. The proviso that the House put in reads:

That no printing shall be done by the Weather Bureau that can be done at the Government Printing Office without impairing the service of said bureau.

The proposition before us was, Who shall determine that? Therefore, in inserting the language "in the judgment of the Secretary of Agriculture," we proposed to put him upon honor and upon active service to determine what should be done there, with the idea of cutting down rather than increasing the work of this branch printing office.

Mr. SMOOT. I fully realize the object of the committee, but I do not believe that they understood what the result would be. It is for that reason that I have called it to the attention of the Senate. I do not criticize the committee in trying to amend the proviso as it came from the House, because, as I said before, the House provision was too drastic. However, in doing so, as I have said, they are placing in the hands of the Secretary of Agriculture a power that is to-day vested in the Joint Committee on Printing of the two Houses, and I do not believe that that conflict should be allowed.

Therefore I move to disagree to the amendment offered by the committee. I also give notice now that if the amendment is disagreed to I shall then move to strike out the proviso beginning in line 4, down to and including line 8, and if that is agreed to I shall then move to strike out "$26,000," in line 4, and to insert "$17,500." I make that statement in connection with my motion to disagree to the committee amendment.

The PRESIDENT pro tempore. The pending question is whether the Senate shall agree to the amendment of the committee, and it is better to put the question in that affirmative form.

Mr. McCUMBER. Mr. President, I think again that we ought to have more than 23 Senators present. I therefore suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from North Dakota suggests the absence of a quorum. Let the Secretary call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Jones	Overman	Smith, Ga.
Bankhead	Kenyon	Owen	Smith, Md.
Brady	Kern	Page	Smith, S. C.
Bristow	Lea, Tenn.	Perkins	Smoot
Bryan	Lee, Md.	Pittman	Sterling
Burton	Lewis	Pomerene	Swanson
Chamberlain	McCumber	Ransdell	Thomas
Clarke, Ark.	McLean	Saulsbury	Thompson
du Pont	Martin, Va.	Shafroth	Vardaman
Gore	Martine, N. J.	Sheppard	Warren
Hughes	Nelson	Sherman	West
Johnson	Norris	Shively	Williams

Mr. PAGE. I was requested to announce that the Senator from Oregon [Mr. LANE] and the Senator from Arkansas [Mr. ROBINSON] are absent attending to special duties of the Senate.

The PRESIDENT pro tempore. Forty-eight Senators having answered to their names, a quorum of the Senate is present. The Senator from Utah has moved that the amendment be stricken out, but the Chair will put it in the affirmative. The question is on agreeing to the pending amendment.

Mr. McCUMBER. On that I ask for the yeas and nays.

The yeas and nays were not ordered.

The amendment was rejected.

The PRESIDENT pro tempore. The next amendment passed over will be stated.

Mr. SMOOT. As the amendment of the committee has been disagreed to, I desire to strike out the proviso, being all after the numerals "$26,000," in line 4.

The PRESIDENT pro tempore. Under the rule adopted, that amendment is not in order at the present time. On the 29th of April, when the Senator from Oklahoma [Mr. GORE], the chairman of the Committee on Agriculture and Forestry, asked the Senate to proceed to the consideration of the bill, the following took place:

Mr. GORE. I ask that the formal reading of the bill be dispensed with and that it be read for amendment, the amendments of the committee to be first considered.

The VICE PRESIDENT. Is there objection? The Chair hears none, and that order is made.

Mr. SMOOT. The Chair is perfectly right. I will recur to this paragraph after the committee amendments have been disposed of.

The PRESIDENT pro tempore. The next amendment of the committee passed over will be stated.

The SECRETARY. On page 18, line 13, the committee report to strike out "$80,580" and to insert "$180,580: *Provided*, That of the sum thus appropriated $100,000 shall be used for furnishing the primary markets in the cotton-growing States with a set of the samples as standardized by the Government and a sample of the bleached and unbleached yarns made from the different grades showing the waste, tensile strength, and bleaching quality thereof."

Mr. SMOOT. I ask the Senator from Oklahoma if he will not allow this amendment to be passed over for a few minutes? I have sent for a Senator who is interested in it and who wishes to speak on it.

Mr. GORE. I have no objection to that course.

Mr. SMOOT. We can come back to it as soon as that Senator returns to the Chamber.

The PRESIDENT pro tempore. The Senator from Utah asks that the amendment be passed over.

Mr. McCUMBER. Mr. President, I object to passing over the amendment.

The PRESIDENT pro tempore. Does the Chair understand the Senator to object?

Mr. McCUMBER. I object to the amendment being passed over. If we are bound to take up the bill according to the rule and consider the amendments in their order, I want the amendments taken up in their order. I object to the amendment being passed over, because I myself may want to introduce an amendment to it.

Mr. SMOOT. It is a committee amendment.

Mr. SMITH of South Carolina. I should like to state to the Senator from North Dakota that the Senator to whom I presume the Senator from Utah had reference will, I think, add materially to the contention the Senator from North Dakota and myself have been making. This is my amendment, and I hope I shall be able to demonstrate to the Senate that it is a proper one. I would like to hear that Senator's statement before this amendment is passed on, and I hope the Senator from North Dakota will not object to its being passed over temporarily.

Mr. SMOOT. I hope the Senator from North Dakota will withdraw his objection.

Mr. McCUMBER. I do not think that anything will strengthen the bill and the amendment which I have offered. I can not imagine that after the three weeks' debate and the assertion by Senators that they propose to leave the Chamber if the matter is referred to in any way there is much hope of our being able to get a real thoughtful vote upon the amendment.

Mr. SMITH of Georgia. Mr. President, if the Senator will allow me, I did not make that statement.

The PRESIDENT pro tempore. Let the Chair understand the parliamentary status of the question. Does the Senator from North Dakota object to laying aside the amendment?

Mr. McCUMBER. I did object.

The PRESIDENT pro tempore. Objection is made, and the question is on the adoption of the amendment.

Mr. SMITH of Georgia. I only want to reply to the Senator from North Dakota in order to correct his statement. When the Senator introduces his amendment and we come to its consideration, I will stay here and be glad to hear him, and we will vote on it. My statement was that it was not then before the Senate, and that was the reason why I left the Chamber. If the Senator will discuss it and will state simply and briefly as he can, and clearly, just what it is when it is offered, I will sit here and be glad to hear him, and in all probability I will support him.

Mr. SMOOT. Mr. President——

Mr. McCUMBER. I will say to the Senator that I have at all times tried to state my points as succinctly and as briefly as I could, but I had great difficulty in making the empty seats understand really what I wanted to impress upon Senators. I was under the necessity, therefore, of sometimes repeating the same proposition when a Senator happened to drop into the Chamber. Those who were speaking against the bill were exactly in the same position. The Senator from Minnesota [Mr. NELSON] on two different occasions refused to go on any further unless he could have somebody to listen to him. A part of the time there were as many as five in the Senate Chamber listening to his very earnest defense of his side of the case. All I want is to get the attention of Senators to the proposition, and I will trust to the Lord and their own consciences then to vote upon it properly.

Mr. SMITH of Georgia. Mr. President, I was watching for the time when the Senator should offer his amendment, when it will be in order; and unless something providential prevents I intend to be in my seat and hear him when it is regularly before the Senate. My sole point was that the Senator was not discussing the question before the Senate, and I did not think the Senator ought to interrupt me when I was studying something else and while he was speaking upon his amendment, which was not at the time before the Senate.

I wish to add that what I said was meant in no discourtesy to him or to his amendment, because I intend to listen to it when it is read, and I will hear what he says when it is presented.

Mr. McCUMBER. Let me say to the Senator very sincerely and very briefly that there are other Senators here who are kept in the Chamber only through fear that it may come up. They want to oppose it. So it is a pretty good proposition to keep them on an anxious seat and keep them here in the Senate. I withdraw the objection to passing over the amendment.

The PRESIDENT pro tempore. The Secretary will report the next amendment.

Mr. SMITH of South Carolina. Do I understand that the Senator from North Dakota has withdrawn his objection?

Mr. McCUMBER. I withdrew it at the request of the Senator from South Carolina.

The PRESIDENT pro tempore. The amendment will be temporarily laid aside. All the amendments proposed to that paragraph seem to be related to the same question, and unless there is objection they will all be included in the order and the paragraph will be passed over for the present. The next amendment passed over will be stated.

The SECRETARY. The next amendment passed over is on page 20, line 25, after the words "cotton-boll weevil," to strike out "$378,240" and in lieu insert "$628,240: *Provided*, That the entire expense of such service shall be defrayed from this appropriation, and no contribution or endowment for said purpose

shall be received or accepted from any individual, firm, company, or corporation."

Mr. WILLIAMS. Mr. President——

Mr. VARDAMAN. I wish to propose an amendment to that.

The PRESIDENT pro tempore. The senior Senator from Mississippi has the floor.

Mr. WILLIAMS. I hope that the chairman of the committee will find it possible to modify the committee amendment. The committee amendment reads now:

That the entire expense of such service shall be defrayed from this appropriation and no——

Mr. GORE. Mr. President——

Mr. WILLIAMS. Wait a moment until I am through reading this.

Mr. GORE. I wish to say to the Senator that I intend to accept the modification.

Mr. WILLIAMS. The amendment reads:

Provided, That the entire expense of such service shall be defrayed from this appropriation—

And then it continues—

and no contribution or endowment for said purpose shall be received or accepted from any individual, firm, company, or corporation.

It is wrong, in my opinion, and it is bad policy as well to do anything which prohibits or prevents a county or State or municipality in the cotton States from aiding the Federal Government by contribution of money and by cooperation by work of extirpating the cotton-boll weevil.

Mr. VARDAMAN. Mr. President——

The PRESIDENT pro tempore. Will the senior Senator from Mississippi yield to his colleague?

Mr. WILLIAMS. Yes.

Mr. VARDAMAN. If the senior Senator from Mississippi will permit the substitute which I offer to be read, he will find that it covers that objection.

Mr. WILLIAMS. Well, it may or it may not.

The PRESIDENT pro tempore. The Senator from Mississippi declines to yield further.

Mr. WILLIAMS. I yielded for a suggestion, which has been made.

Mr. President, I understand, of course, the object of this amendment. It has been discovered that certain very rich people are engaged in cooperating with the United States Government in much of the work of the Agricultural Department, and they have been furnishing a part of the money for that purpose. I myself do not altogether share that extreme delicacy of sentiment which keeps communities or good causes from taking money which was wrongfully earned and then untainting it by devoting it to a good purpose. But, upon the other hand, I think it a very bad thing to get the employees of the Federal or of the State or of a city government in the habit of relying upon rich men and corporations for aid and assistance, because it brings around in the course of time a certain influence by those contributing parties upon the character of the work of the governmental officer and a certain, perhaps dominating, influence upon the officials themselves that might be and probably would be finally detrimental to the public service or to self-respect and interest of the masses. I shall now yield one moment while the Secretary reads the amendment proposed by my colleague [Mr. VARDAMAN] to see if, in my judgment, it covers the point at issue.

The PRESIDENT pro tempore. The junior Senator from Mississippi offers an amendment at this stage The Secretary will report the amendment to the amendment of the committee.

The SECRETARY. Amend the committee amendment by substituting the following proviso:

Provided, That the entire expense of such service shall be defrayed from this appropriation and such contributions as may be made by the States, counties, municipalities, and firms, associations, individuals, and corporations residing within said States wherein such work is to be done or service rendered.

Mr. WILLIAMS. Mr. President, I do not think the amendment quite covers the object which the committee has in view, because it says "individuals and corporations residing within said States." If it be bad policy to receive a contribution to aid in the public work from an individual or corporation of a certain type living outside the cotton belt because of the fear of the influence that such an individual or corporation may have upon the work of the public departments or on the public interest, then it is equally bad to receive it from individuals or corporations residing within the cotton States who conceivably might be equally rich and equally undesirable citizens of the same type and equally menacing to the institutions, or rather to the working of the institutions, of the Government. I should have no objection to this amendment if the words "associations, individuals, and corporations" were stricken out.

Mr. VARDAMAN. Mr. President, I will state, with the permission of my colleague——

Mr. WILLIAMS. One branch of the Standard Oil Co., for example, resides very largely in the State of Texas.

Mr. VARDAMAN. There are a great many associations in the State of Mississippi which have contributed to this fund. I was told by an officer of the Agricultural Department that in one of the States the bankers' association had contributed to this work, and it was for this reason that I inserted the word "association."

Now, with the indulgence of my colleague, I will say while on my feet that I do not know, except from what one Senator has told me in private conversation, what is desired to be effected by this committee amendment. I presume it is to exclude one certain individual from contributing to this fund, and the only way we could under this proposed law permit the carriers, corporations, individuals, and associations within the State of Mississippi to contribute would be to put language like this into the law, to amend the bill as I propose to amend it.

In a great many of the counties in Mississippi—one, for instance, that I have in mind—the General Government pays $500 to the demonstrator, the county pays $600, and the little county seat pays $400. In that way they raise $1,500 to engage the services of a very capable man. Everyone is wrought up about it; and if this amendment does not reach the end desired, I hope sincerely that the senior Senator from Mississippi will perfect it.

Mr. GORE. Mr. President——

Mr. WILLIAMS. I have the floor yet, I think.

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Oklahoma?

Mr. WILLIAMS. Does the Senator from Oklahoma desire to interrupt me?

Mr. GORE. I wish to send to the desk a substitute amendment for the proviso, which I think will meet the wishes of Senators.

Mr. WILLIAMS. Will the Senator from Oklahoma let me first see it?

Mr. GORE. Yes. I think it will meet the wishes of the junior Senator from Mississippi [Mr. VARDAMAN] and the objections of the senior Senator from Mississippi [Mr. WILLIAMS].

Mr. WILLIAMS. As I understand, the committee will offer this amendment?

Mr. GORE. Yes, sir.

Mr. WILLIAMS. The amendment reads as follows:

For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil, $628,240: *Provided*, That the expense of such service shall be defrayed from this appropriation and such funds as may be contributed by State, county, and municipal agencies, agricultural societies or associations, and individual farmers.

I see no objection to that. It seems to me that that covers the point.

One other word, Mr. President, and then I shall be through with the matter. Of course we understand—and we might just as well speak plainly; there is no reason why we should not mention names—that the reason of the amendment offered by the committee is that it was discovered that Mr. Rockefeller was very largely engaged in contributing money and in participating, through the agencies of the Agricultural Department, in doing this demonstration work. Although the committee is aiming the amendment at that one man, it is simply because that one man is the only man at present of that type engaged in that work; but if it be right to aim it at him, it is also right to aim it at any man of like character with like conceivable motives engaged in like work. It ought to cover the class and not merely the individual.

If it is a blow at what is called predatory wealth, it ought to strike at all predatory wealth when seeking to insinuate into our governmental functioning influence of its sort. It seems to me that the amendment which will be offered by the committee covers the point, and I shall have no objection to its adoption nor to the adoption of the committee amendment as amended.

Mr. McCUMBER. Mr. President, may I ask for the rereading of the amendment?

The PRESIDENT pro tempore. The Secretary will state the amendment as originally reported by the committee, and the amendment now presented.

The SECRETARY. On page 20, line 25, after the word "weevil," the committee originally reported to strike out the figures "$378,240" and to insert "$628,240: *Provided*, That the entire expense of such service shall be defrayed from this appropriation, and no contribution or endowment for said purpose shall be received or accepted from any individual, firm, company, or corporation."

It is now proposed, on behalf of the committee, to amend the paragraph so that it will read:

For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil, $628,240: *Provided*, That the expense of such service shall be defrayed from this appropriation and such funds as may be contributed by State, county, and municipal agencies, agricultural societies or associations, and individual farmers.

Mr. McCUMBER. I want to ask the Senator having the bill in charge if he would object to a few dollars additional to the appropriation for the benefit of the farmers' cooperation in checking the ravages of the cutworm upon their cabbages, onions, and so forth, and also for the ravages of the cutthroats upon their wheat, oats, and barley, so that we might cover the whole field and give some adequate protection?

I should like, in connection with this, to ask the Senator from Oklahoma if he will give me the information as to the extent of the damage yearly caused by the boll weevil? I assume that it has been estimated by the Department of Agriculture.

Mr. GORE. Mr. President, I wish to say, in the first instance, that I think this bill provides for waging war against every bug known to entomology; but if there be any others, we should be very happy to include an appropriation to carry on a crusade against them, excepting possibly the one that does business on the exchange; and I shall join the Senator from North Dakota in that crusade on any proper occasion.

Mr. President, there have been estimates made from time to time as to the extent of loss resulting from the ravages of the boll weevil; but they are not now fresh in my memory. They aggregate, however, many millions of dollars in the State of Texas, in the State of Louisiana, and in the State of Mississippi. In portions of Louisiana and of Mississippi the cotton plantations have almost been abandoned for the production of cotton, and the loss, I repeat, aggregates many millions of dollars.

Mr. VARDAMAN. I will state, with the Senator's permission, that in one county in Mississippi the yield of cotton has been reduced from 37,000 bales annually to about 1,800 bales.

Mr. McCUMBER. But taking the entire crop, the boll weevil, of course, may be very bad in some counties and may not seriously affect other counties; it may be bad some years and in other years not so bad.

Mr. VARDAMAN. The trouble about it is the boll weevil is bad all the time. It is never good, but is the most persistent, energetic, pernicious pest that ever cursed a country. It is an evil without a mitigating qualification.

Mr. McCUMBER. But in some years it is worse than others?

Mr. VARDAMAN. Yes; in some years it is a little worse than others; where there is a great rainfall it is worse; but except in certain portions of Texas, where there is a very light rainfall, the boll weevil has well-nigh destroyed the cotton crop.

Mr. BRADY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Idaho?

Mr. VARDAMAN. I shall do so in a moment, Mr. President. I shall then be glad to yield; but I want to suggest to the Senator from Oklahoma [Mr. GORE], the chairman of the committee, that I am perfectly willing to accept his amendment in place of the one offered by me if he will enlarge it a little. There is a great deal of money contributed to this work by the merchants of the different communities, and under the Senator's amendment a contribution from them could not be accepted.

Mr. WEST. May I interrupt the Senator from Mississippi?

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Georgia?

Mr. VARDAMAN. Yes.

Mr. WEST. Under this amendment could they receive anything from bankers for this work?

Mr. VARDAMAN. I do not think they could under the amendment proposed by the chairman of the committee, though under the amendment offered by me they could receive contributions from anybody residing within the State.

Mr. WEST. The banks have the best intentions with reference to this matter, because the farmers in the various States support the banks.

Mr. VARDAMAN. The bankers' associations have contributed much to this fund. There is one little city in Mississippi I have in mind which gave $400 last year to this work; in fact, they do it all over the State; and I think it would be quite unfortunate for the cotton industry if anything should be put into this bill which would prevent them from contributing. The bankers, the merchants, the lawyers, the sawmill people—in truth, every class and vocation of our people are alive to the necessity for employing every means possible which even promises to exterminate this terrible pest which threatens to destroy the staple crop of the entire South. It is of tremendous importance to all the people of my State.

Mr. KENYON. Mr. President——

The PRESIDENT pro tempore. The Chair now recalls the fact that the Senator from North Dakota [Mr. MCCUMBER] is entitled to the floor. Does the Senator from North Dakota yield, and to whom?

Mr. KENYON. Will the Senator from North Dakota permit me to ask the Senator from Mississippi a question?

Mr. McCUMBER. I yield to the Senator from Iowa.

Mr. KENYON. I want to ask the Senator from Mississippi a question.

Mr. BRADY. I want to ask the Senator from Mississippi a question.

Mr. VARDAMAN. I shall be very glad to answer the question.

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Idaho?

Mr. McCUMBER. I do.

Mr. BRADY. The Senator from Mississippi gave the number of bales of cotton.

Mr. VARDAMAN. Yes.

Mr. BRADY. I should be very glad if the Senator will give me the amount in dollars and cents, so that we may better understand the matter.

Mr. VARDAMAN. Cotton is worth about $50 or $60 a bale, and in addition to that is the seed, which is worth about $15 a bale; so it makes the value of the cotton per bale about $75 this year.

Mr. McCUMBER. I have not yet received an answer to my question.

Mr. GORE. There can be no doubt that the ravages resulting from the boll weevil exceed a hundred million dollars a year.

Mr. McCUMBER. I have not yet got an answer to my inquiry. It is well known by the Department of Agriculture how many acres of cotton are planted every year; it is well known what the yield is where there have been practically no ravages by the boll weevil. From that information I think they could arrive pretty fairly at the percentage of damage that is done, and I wish to secure that information, if I can.

Mr. GORE. I undertook to answer the Senator's question. His query really involves several questions. If the Senator will again propound his inquiry, I will make an answer.

Mr. McCUMBER. I want to know what the yearly damages are as estimated on the cotton crop by reason of the ravages of the boll weevil?

Mr. GORE. Mr. President, I will say I have not the figures before me, though I could obtain them at the department; but the loss undoubtedly exceeds a hundred million dollars a year. Many counties have been made desolate as the result of those ravages.

Mr. KENYON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Iowa?

Mr. KENYON. I think the Senator yielded to me.

The PRESIDENT pro tempore. The Chair stands corrected as to that.

Mr. McCUMBER. I yielded to the Senator from Iowa.

Mr. KENYON. I want to ask the Senator from Mississippi a question. Out of the abundance of his experience, is there any preventive or any method of exterminating the boll weevil?

Mr. VARDAMAN. No such preventive has yet been found. The ingenuity of man up to this time has been baffled and defeated in the effort to find a remedy for the evil.

Mr. KENYON. Has the search for it been abandoned?

Mr. VARDAMAN. It has not. The boll weevil does its damage by making an incision in the square which is the beginning of the fruit. It lays its eggs in that little square, and that seems to act as a poison and the square drops off the stalk. The damage can be somewhat reduced by picking up these squares and burning them before the egg hatches.

Mr. KENYON. Is this work carried on now by the Government?

Mr. VARDAMAN. This work is being carried on by the Government, and conditions are being greatly improved and the losses lessened by intensive farming, by early planting, and a system of cultivation which has enabled the people to make something in the districts where the boll weevil has wrought such fearful havoc. We of the South are very desirous that the work by the Government shall continue. It is our only hope.

Mr. KENYON. What I wanted to get at was this: Whether this appropriation is used for farm demonstration work entirely or whether some part of it is used for eradicating the boll weevil?

Mr. VARDAMAN. Farm demonstration work involves the eradication of the boll weevil, the destruction of the boll weevil, and making a crop in spite of the boll weevil. The method of

cultivation is about the only means we have now of getting around it.

Mr. KENYON. I think in the debate in the House it was suggested and conceded that there was no way to eradicate the boll weevil, and, consequently, the appropriation was not used for that purpose.

Mr. VARDAMAN. The boll weevil is not being eradicated, as a matter of fact. I hope some day a parasite or a poison may be found that will put it out of business, but that remedy has not yet been discovered. The boll weevil has never yielded sovereignty in any country where it has made a conquest; but, as I have said before, the farmers have been able to overcome the difficulty, or to mitigate the evil somewhat, by a different system of farming, and reducing the number of the weevils by picking up the squares that fall off and burning them. That, however, is only a palliative, but it is the best we can do just now. This is a very important matter to the people of the South, and I do hope Senators may realize that fact and not put anything in our way in fighting this little insect which seems to possess almost an infinite capacity to do harm.

Mr. McLEAN. Mr. President——

Mr. McCUMBER. I yield to the Senator.

The PRESIDENT pro tempore. Interruptions should be limited to a single Senator at a time. There are now so many Senators on the floor that it is utterly impossible for the Chair or anybody else to determine what the due and orderly proceedings are. Does the Senator from North Dakota yield to the Senator from Connecticut?

Mr. McCUMBER. I yield.

Mr. McLEAN. Mr. President, I have in my hand the report of the United States Department of Agriculture, Bureau of Biology, issued June 10, 1908, which relates to the subject under discussion; and I think it is a very opportune time to read this document to the Senate, because I think it has a very important bearing upon another appropriation which has been cut out by the Committee on Agriculture and Forestry, and that is the appropriation for the enforcement of the Federal law for the protection of insectivorous birds. Mr. Arthur H. Howell, assistant, Biological Survey, made a report at that time as follows——

Mr. McCUMBER. Mr. President, I supposed when the Senator interrupted me that he did so to give me the information which I was trying to secure.

Mr. McLEAN. If the Senator will be patient, he will get it.

Mr. McCUMBER. I merely wanted to make sure.

Mr. McLEAN. Mr. Howell reported:

> The region now infested by the cotton-boll weevil includes the greater part of the cotton-growing area of Texas and Louisiana and parts of Oklahoma, Arkansas, and Mississippi. Texas and Louisiana produced in 1906 over 5,000,000 bales of cotton, valued at upward of $270,000,000.

Of course, the amount has been greatly increased since that time.

> The loss occasioned by the boll weevil is variously estimated in different localities at from 10 per cent to 50 per cent of the crop, or even more in badly infested areas. Even at the lowest reasonable estimate, the loss to the cotton planters of Texas and Louisiana from the ravages of the pest yearly aggregates many millions. As the weevil extends its range eastward into the more humid regions of the lower Mississippi Valley, the damage it does will be proportionately greater than in the drier regions to the westward.
>
> Investigations conducted by the Biological Survey on the food habits of birds in Louisiana during January and February, 1908, showed that more birds were feeding upon the weevils and that many more weevils were destroyed by them than in any of the more western localities where birds have been collected at a corresponding season. The destruction of weevils in winter is vastly more important than in summer, for the reason that the death of every weevil at that season prevents the production of a very numerous progeny during the early summer and postpones the date when the increase will become so great as to destroy the cotton squares as fast as they appear.
>
> * * * * * * *
>
> During January and February, 1908, the writer visited central and northwestern Louisiana, and studied the food habits of the birds found in and about the cotton fields. Collections were made at Alexandria, Lecompte, Natchitoches, Shreveport, and Belcher. About 600 specimens, representing 50 species, were secured, of which 20 species and 81 individuals were found to have eaten boll weevils, this being 13¼ per cent of the total number taken.

I have here the report for the prior year, 1907, on the same subject, "The relation of birds to the cotton-boll weevil." In this report we find that the Department of Agriculture has made very careful investigation of the subject, and advises that:

> The relation of birds to the boll weevil has been studied by the Biological Survey during portions of four seasons and by the Bureau of Entomology during portions of two seasons. Seventeen species of birds were examined during the seasons of 1903 and 1904 by the Bureau of Entomology, with the result that 11 species were found to feed on the weevil. In November and December, 1904, Vernon Bailey, of the Biological Survey, took up the study of the problem, and as a result of the examination of 354 stomachs collected by him 9 additional species of birds were added to the list of boll-weevil destroyers. The work was carried on in the summer and fall of 1905 by the present writer, 62 species of birds being collected and examined, and 8 additional species found to feed on the weevil. The investigation was continued also by the writer in August and September, 1906, and from February 11 to May 3, 1907. Fifteen species were added to the list of weevil-eating birds by the investigations in the past two seasons, details of which will be given later.

Then follow recommendations as to the proper methods of protecting insectivorous birds. I want to say in this connection, while some, at least, of the Senators from the cotton States are present, that I am heartily in favor of this appropriation. I realize the vital necessity of staying, if possible, the ravages of the boll weevil; but it does seem to me that inasmuch as these appropriations began some 20 years ago—the first appropriation for the investigation of noxious insects, I think, was made in 1879—and inasmuch as we have appropriated millions of dollars for the investigation of the ravages of the boll weevil, it seems to me that it is opportune for us now to take advantage of the advice we have been furnished as a result of the expenditure of this money.

I will say that the British colonial office has been searching for several years to find birds that would eat the boll weevil in Africa, as it has already become prevalent there; and as a result of their investigation they are now importing into Africa the quail and one variety, I think, of the heron, as birds which are most valuable for the destruction of the weevil. I sincerely hope that the Senators from the Southern States, when they come to vote upon the appropriation for the enforcement of the migratory bird act, will realize the wisdom of taking the advice of these men who have been employed for the last 25 or 30 years in investigating the ravages of the boll weevil and to recommend the best means of avoiding its increase.

Mr. WILLIAMS. Mr. President——

The PRESIDENT pro tempore. The Senator from North Dakota has the floor.

Mr. McCUMBER. I yield to the Senator.

The PRESIDENT pro tempore. The Senator from Connecticut will have to surrender the floor, then, as the Chair can not recognize two Senators at a time.

Mr. WILLIAMS. If the Senator will pardon me, I want to file a cross-interrogatory. I am very much interested in what the Senator from Connecticut has just said. Have they the Mexican boll weevil in South Africa? I ask for information, because, if they have, I have not hitherto known of it.

Mr. McLEAN. It is the cotton-boll weevil.

Mr. WILLIAMS. Oh, that may be a totally different thing. The Mexican boll weevil is an entirely new thing. Cotton suffers from many pests—the army worm, the bollworm, and the Mexican boll weevil; but, so far as I know, the Mexican boll weevil, which crossed from the Mexican border, invaded Texas, spread over that State and Arkansas, and then went into Louisiana and Mississippi, and is every year going farther and farther north and farther and farther east in the cotton belt, is peculiar to this continent.

I asked the Senator the question merely for information, because, of course, if they have the Mexican boll weevil in South Africa, and if they have birds there that eat and destroy it, it would not only pay us to preserve those birds in this country, but to make a very liberal appropriation for the purpose of importing them and turning them loose in the cotton States. I think, upon inquiry, however, the Senator will find that the peculiar weevil which is known as the Mexican boll weevil does not exist outside of this continent.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Has the Senator from North Dakota obtained the information he originally sought?

Mr. McCUMBER. I have not obtained the information, but I have been promised it.

The PRESIDENT pro tempore. Does the Senator from North Dakota yield further to the Senator from Connecticut?

Mr. McCUMBER. I yield.

Mr. McLEAN. I wish to call the attention of the Senator from Mississippi to the fact that this appropriation in this bill is for the investigation and control of the cotton boll weevil. I assume that that includes the Mexican boll weevil.

Mr. WILLIAMS. What is meant is the pest from which we are suffering, which is the Mexican boll weevil.

Mr. McLEAN. Yes.

Mr. WILLIAMS. It is true this bill does call it the "cotton boll weevil." I do not know why, except the fact that the Mexican boll weevil eats nothing but cotton; but it is known as the Mexican boll weevil, and there are other weevils which will get on cotton. I have never heard that this peculiar pest—the Mexican boll weevil—exists in South Africa.

Mr. McLEAN. And it is with regard to that particular weevil that the United States Department of Agriculture has advised the protection of the insectivorous birds. I call the attention of the Senator from North Dakota to the fact that this estimate is from 10 to 50 per cent of the production in

the year 1908, which was worth $270,000,000. Of course the value of the annual cotton product is much more than that now; nobody questions that the loss involved is a tremendous one.

Mr. McCUMBER. Mr. President, I am still trying to get as nearly definite information as I can as to what percentage of the cotton crop in the United States and its value is affected by the boll weevil. I do not desire figures merely for one year for one county or for one State.

Mr. SMITH of South Carolina. Mr. President——

The PRESIDENT pro tempore. If the Senator from North Dakota will state what he desires, then the Chair will recognize the Senator from South Carolina.

Mr. McCUMBER. I yield to the Senator.

The PRESIDENT pro tempore. The Senator from North Dakota yields to the Senator from South Carolina.

Mr. SMITH of South Carolina. Mr. President, I should like to state to the Senator from North Dakota that the Director of the Census about eight years ago issued a statement giving the comparative losses sustained by the different States by the presence of the boll weevil. That document is available. I have sent to the document room to see if I could obtain it so as to quote it accurately, but I think the loss is estimated at somewhere about $50,000,000 annually, the estimate being based on the number of bales destroyed by the weevil at the current prices obtained for cotton.

I should like also to state to the Senator that since the advent of the boll weevil on the eastern side of the Rio Grande River its progress has been steady, without an appreciable stay, in spite of all the efforts of the Agricultural Department to check it or to lessen its ravages. In this effort a very early variety of cotton has been developed. This early variety of cotton comes on before the weevil comes out of hibernation, but in the early variety of cotton the gain which accrues because of freedom from the attack of the boll weevil is offset by virtue of the fact that the early variety is of the shorter staple and really of less value than the later-maturing variety, so that, summing the profit and loss, the weevil has not been checked in its ravages upon the value of the cotton production of this country.

I should like to state further in this connection, with the permission of the Senator from North Dakota, that, as intimated by the Senator from Mississippi [Mr. WILLIAMS], cotton is the only food of the boll weevil. By experimenting, the department found that the boll weevil can subsist on nothing else but cotton. It is almost a misnomer to call it a boll weevil, in that it rarely feeds upon the bolls; hence the effort upon the part of the department to get an early-maturing variety, so that the boll will become firm before the weevil comes out of hibernation. The boll weevil feeds upon the little bloom just before it opens, so that after the advent of the weevil in any great numbers in a cotton field you see no more blooms, and therefore you see no more fruit. It is claimed—and I have in my possession holographic letters, not typewritten letters, from entomologists in the employ of the Government to that effect—that the only practical solution of this question is to throw a sufficient zone in front of the weevil over which he can not pass for lack of food, cease cotton planting in that zone, and then, after having eliminated him entirely from that zone, begin a retrograde movement, so that ultimately he can be driven back. It has been stated that that will be less expensive in the long run to the Government, and that it would be absolutely practicable; but that plan has failed of materialization up to the present time, for the reason that they claim that by farm demonstration, the production of early varieties of cotton, and diversification of crops might enable the farmer to make some money, or as much money with the presence of the weevil as without it.

I am stating this as preliminary, though perhaps not particularly germane, to giving the information that up to the present time there has been no check to the progress of the boll weevil, no check to its destruction of the cotton product of America, and it is only a question of time until the boll weevil shall have covered the entire cotton belt and faced those of us in the Southeastern States with a problem we may not solve, because the same conditions do not prevail in the Southeastern States that prevail in the Southwestern States.

Mr. WEST. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Georgia?

Mr. McCUMBER. Mr. President, I will yield in just one moment.

The PRESIDENT pro tempore. The Senator declines to yield.

Mr. McCUMBER. The discussion in the last 15 minutes, I think, has demonstrated beyond any question the great service to the country that I am rendering by insisting that Senators shall be present during the discussion of this bill.

I asked a simple little question as to what damage was being done by the ravages of the boll weevil. Neither the Senator in charge of the bill nor any other Senator on the floor seemed to have the slightest idea about the subject, and I could not tell whether or not I would be voting more money to exterminate the boll weevil than the damage the boll weevil was doing would amount to. I had to recur to the great seat of learning in the New England States, and the Senator from Connecticut [Mr. MCLEAN] was able to give me some information. He said it was several million dollars. The Senator from South Carolina [Mr. SMITH] has given us more information; and as I am holding the floor and yielding, we will finally get some information about this bill and what it is for and why we should vote this particular sum.

I now yield at the request of the junior Senator from Georgia.

The PRESIDENT pro tempore. The Senator has not yet exhausted all the cotton pickers on that side.

Mr. WEST. Mr. President, with the permission of the Senator from North Dakota, I desire to ask the junior Senator from South Carolina what is the probable width of the belt that it is desired to leave in order to stop the ravages of the boll weevil?

Mr. SMITH of South Carolina. Mr. President, if the Senator from North Dakota will allow me, the department estimated that the weevil had arrived at a certain point in Alabama, and that entirely eliminating cotton for one year from a zone 100 miles wide, extending from the Tennessee line to the Gulf of Mexico, would eradicate the weevil. That would necessarily place the zone 100 miles back. They estimated, roughly, that an appropriation of something like $10,000,000 would be necessary for that purpose, but that the saving would offset that.

I should like to suggest to the Senator from North Dakota, as he said he wanted some definite information, that it is practically impossible to get definite figures as to the damage caused by the weevil, for the reason that it is practically impossible to tell what is going to be the price of cotton, just as it is practically impossible for the Senator to tell what is going to be the price of his grain under the present miserable system of marketing.

I wish to state to the Senator that I was heartily in sympathy with his effort to bring about a condition where those who produce grain and produce cotton could at least have some show when they came to sell. If the Senator will allow me, I do not think he is making any headway by laying strictures indiscriminately upon those of us who have spent almost our entire time here working for those we know need legislation that will help them to enjoy a part, at least, of the wealth they produce.

I do not know whether the Senator's bill was exactly in accordance with what was proper or not, but I was willing to follow him. I simply wish to state to the Senator that, so far as the damage done by the weevil is concerned, he can get an idea of its extent when I say that in the State of Louisiana—and the Senators representing that State will confirm me—they formerly made a million bales of cotton, and after the advent of the weevil their production dropped down to something like 300,000 bales. Taking as an average 500,000 bales at $50 a bale, that would make a loss of something like $25,000,000 in one State alone chargeable to this pest. This is a line along which it is impossible for one to give accurate information.

Mr. RANSDELL. Mr. President——

Mr. McCUMBER. I will yield to the Senator from Louisiana in just a moment.

The Senator, I think, has given us the most nearly accurate information we have gotten; and it is evident that he has given the matter some study. I wanted the Senate to have the benefit of the knowledge that has been obtained by the Senators who have given the matter some study. The only way Senators can get the knowledge, of course, is for them to be here and listen to the Senator from South Carolina.

I am not attempting in any way to delay the matter, except to get it clearly before us, so that we may understand what we are voting upon. As a result of my study of the grain question I can make a pretty accurate statement of the loss that results from the present methods. I can take the number of bushels of each kind of grain produced in any year, and take 3 cents a bushel on each grade of grain, and make a fair estimation of what we lose by reason of the present system of grading and inspecting grain.

The Senator from South Carolina has stated that the loss by reason of the damage done by the ravages of the boll weevil amounts to about $50,000,000 a year. Now, side by side with that I wish to put a few figures relating to the damage resulting from the ravages of the evil system of grading and inspecting grain from which we are suffering.

Taking a production of 700,000,000 bushels of wheat a year, I estimate that through wrongful grading we lose at least 3 cents a bushel, which would make a loss of $21,000,000. Taking a billion bushels of corn, there would be a loss of $30,000,000. Taking our flax and our rye and our oats and our barley on the same basis, it would make a loss of $25,000,000, or, altogether, a loss of $76,000,000 annually to the producer.

I want Senators to think of that in connection with the losses to the cotton industry—for these are losses that can be quite accurately estimated and stated, according to all the evidence in the case—when they vote for this item in a short time, after having received the information that has been obtained through considerable labor upon my part, and having to undergo a feeling of anger, possibly, on the part of a few of the Senators on the other side because I have attempted to keep them here. I think we have made great headway; and when I vote to appropriate $800,000 instead of $300,000, which we had in the bill a few minutes ago, for the extinction of the boll weevil, I, for one, will know what relation there is between the ravages of the boll weevil and the amount of money we are asked to appropriate, of which the farmers of my State will go down into their pockets and pay their proportion. I wanted to know just what the relation was, in order that I might vote intelligently upon the subject.

Mr. RANSDELL. Mr. President, will the Senator yield to me?

The PRESIDING OFFICER (Mr. ASHURST in the chair). Does the Senator from North Dakota yield to the Senator from Louisiana?

Mr. McCUMBER. I yield the floor just now.

Mr. RANSDELL. I shall endeavor to throw a little light on that subject. I can not throw much light on it. I am a cotton producer myself, and I have been an unfortunate sufferer from the ravages of the cotton boll weevil.

I generally made, at the lowest calculation, from five to six hundred bales of cotton a year on my plantation. Last year, solely because of the boll weevil, I made 206 bales. I lost a considerable amount of money, but I made a good crop in comparison with many people in my immediate locality. I got in the neighborhood of a quarter of a bale of cotton per acre. I had a great many friends a little south of me who did not make a tenth of a bale of cotton per acre. I visited fields where I saw as fine cotton as I ever witnessed in my life—8 feet and some of it nearly 10 feet high—with not over six or eight bolls on the stalk, cotton that ought to have made a bale to a bale and a quarter, and some of it a bale and a half to the acre, but it was not making a bale to 15 acres. That was due entirely to the ravages of the cotton boll weevil.

I am glad to say that did not extend all over Louisiana. We did make some cotton in the State, but we did not make half, or anything like half, what we were entitled to make and what we would have made but for the ravages of the boll weevil. I speak personally because a burnt child dreads the fire, Senators, and I have been burnt by the boll weevil, and the district I represented in Congress for many years has been burnt by the boll weevil.

Let me give you some official figures from the Statistical Abstract of the United States for 1912. I quote from page 155 of the Abstract:

The cotton crop of Louisiana in 1902 was 886,000 bales. I will not read the odd hundreds. In 1903 it was 836,000 bales. In 1904 it was 1,107,000 bales. In 1905 it was 523,000 bales. In 1906 it was 979,000 bales. Then the boll weevil began to come in, and the next year it dropped to 679,000 bales. In 1908 it dropped to 481,000 bales. In 1909 it dropped to 269,000 bales. In 1910 it was 256,000 bales. In 1911 it was 399,000 bales, and in 1912 it was 391,000 bales.

So, for the past five or six years our crop has fallen short, at the lowest calculation, between 250,000 and 300,000 bales a year. It has fallen short from $20,000,000 to $25,000,000 every year, Senators, because of the cotton boll weevil.

Mr. WILLIAMS. From 33⅓ to 50 per cent.

Mr. RANSDELL. Yes, sir; in actual percentage, from 33⅓ to 50 per cent. Many portions of the State which used to raise good cotton have had to abandon it entirely. The crop of sugar advanced rapidly from the south to the north and took the place of the cotton farms where they used to make cotton very successfully, but where they could not make it at all in the presence of the boll weevil. Then they began to plant sugar cane, and we were getting along pretty well with it; but now they can not even raise sugar cane successfully down there, and God knows what they are going to raise.

We want all the help we can get from this great Government to help us find something to raise on those lands which used to be profitable in cotton and which were profitable in cane; but now, as I say, we know not what to put them in.

Mr. President, any crop pest which causes a single State to lose from twenty to twenty-five million dollars a year is well worth the serious attention of the Government. I can not give the actual figures for Texas or for Oklahoma or for Arkansas or for Mississippi, but I know that the losses have been heavy in all of those States, and I know that, as certainly as the sun shines in the heavens now, it is going to be very bad in Alabama, in Georgia, in North and South Carolina, and in Florida.

The weevil is already in southern Alabama. The weevil is already in a portion of Florida. I look to see it in Georgia next year, to some extent, and within five years I look to see it in every cotton State in the South.

This is a very small appropriation in comparison with the enormous interests involved. I am satisfied that the loss is at the least fifty to seventy-five million dollars a year, and that loss is to the South's greatest staple. That loss is to the crop which brings more money to this Government, directly, at any rate, than any other crop. I admit that corn is agriculturally the king of this Union, worth more than our cotton; but cotton is the crop which makes the balance of trade in favor of this country with foreign lands. It is the part of statesmanship, of wisdom, and of humanity to do everything possible to protect this great crop.

Mr. McCUMBER rose.

Mr. RANSDELL. Does the Senator from North Dakota wish me to yield to him?

Mr. McCUMBER. Yes; if the Senator will allow me.

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from North Dakota?

Mr. RANSDELL. I do.

Mr. McCUMBER. Why can not the farmers of Louisiana raise sugar cane to advantage?

Mr. RANSDELL. Sugar cane was never raised very successfully on what is known as the neutral ground, between the cotton-producing and the cane-producing sections of the State, and, since the enactment of the present tariff law, they can not raise it successfully now, certainly not in the portion which was always the very doubtful cane-producing area of the State.

Mr. McCUMBER. Does the Senator remember how very earnestly I worked to protect his industry down there, and how I voted with him?

Mr. RANSDELL. I do; and I thank the Senator for all his efforts. I am sorry they were not successful.

Mr. McCUMBER. I will say to the Senator that up in my State we are troubled with drought. I have known farmers who sometimes did not raise a single crop for three long years. Hot winds come from the southeast and southwest, and they destroy our crops. The chinch bug alights upon it and destroys it. It is often destroyed by hail and hot weather, and sometimes it is frosted. After we have escaped all of these dangers, when we sell in the general market the little part that we have left in that section of the country, we lose from 3 to 5 cents a bushel on it because we can not get a straight, honest grade.

When the Senator wanted to have his cotton protected in Louisiana and other places throughout the South, I voted with him and with the other Senators to protect their crop from the ravages of the evils of the system in New York; but when I appealed to the Senator from Louisiana to help the farmers of my section of the country to save the little 3 or 5 cents a bushel upon their crops I had a negative vote.

It seems to me that the Senator does not feel as kindly toward my people as I do toward his. I am going to vote for this item. I am going to vote to give those people all the protection the Senator feels they ought to have. I submit, however, that as we can not raise sugar cane in our State, as we can not raise cotton, as we can not raise corn very safely, as we must rely entirely upon our cereals, they being our only reliance, we ought also to be protected and enabled to get the very best we can out of that crop. If the Senator felt as kindly toward that entire section of the North as I do toward his section, we would reach the hand of good fellowship from North Dakota to New Orleans, and we would help the farmers of both sections by our votes.

Mr. RANSDELL. Mr. President, I do not think the Senator will say that I or any other Senator from my section of the Union does not feel kindly to the great grain crop of the Northwest. I always have been in favor of everything that would promote that great industry. I am in favor of it now. If he will show me any way by which I can aid that industry, I will be glad to do it. We are appropriating in this bill $400,000 for that purpose. The item preceding the one under consideration proposes to appropriate $400,000 for farm demonstration work. I believe that is to be used in the Northwest. I understand that it is.

The big difference between the Senator and myself is that he is talking about a law for marketing the crops—for handling the crops after they are made—while I am trying to get through a law here permitting us to make the crops. There is a vast difference between the two things.

Let me suggest another thing to the Senator. All of us from the South are agreed on the wisdom of this proposition; but when his measure about grain came up I found my very eloquent and learned friend from the great grain State of Minnesota—not quite so great as North Dakota, but still a wonderful grain-producing State—Mr. NELSON, for whom I have the highest respect, taking exactly the opposite view from that which the Senator from North Dakota took in regard to the grain-inspection bill. I also found the very eloquent and learned Senator from Missouri [Mr. REED], who comes from a section right on the border line between Missouri and Kansas and Nebraska, that wonderful region, taking exactly the opposite view from the Senator from North Dakota. When the doctors disagree, when you have two learned doctors on one side of the case and only one learned doctor on the other side of the case, do you think we can do anything but say, "We are humble laymen, and we will wait until the doctors agree, and then we will take the medicine which all three of them agree on dosing us with"? That was the proposition, as I understood it.

Mr. McCUMBER. Mr. President, will the Senator allow me to interrupt him right there?

Mr. RANSDELL. I will.

Mr. McCUMBER. When the doctor from Kentucky disagreed with the doctor from Louisiana upon the matter of protection for the sugar cane of Louisiana, I did not hide behind the proposition that the two doctors disagreed. I voted with the Senator from Louisiana, even though three-fourths of the doctors on the other side were against him.

Mr. RANSDELL. May I interrupt the Senator? How much sugar is raised in Kentucky, and how much did the doctor from Kentucky know about sugar?

Mr. McCUMBER. Why, they are consumers, and I do not know how much they use to mix with that other Kentucky ingredient. [Laughter.]

Mr. RANSDELL. May I further ask if it is not a fact that the Senator from Minnesota [Mr. NELSON] represents a very great grain-growing State? Does he not come from a State which handles an enormous quantity of grain? And is not the same true of the Senator from Missouri [Mr. REED]?

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Illinois?

Mr. RANSDELL. I will yield when the Senator from North Dakota has finished answering my question.

Mr. McCUMBER. I was simply making the point that in that case I think we ought to be our own doctor and use our own judgment, after we have studied the question and have given it our attention. If the Senator had listened to the arguments—if he had listened to the argument of the Senator from Minnesota and had been convinced from his argument that he was right, and had listened to my argument and had been convinced that I was wrong—I could accept his decision. I am awfully sorry, however, that it was only the Senator's desk that listened to us, and the Senator could not absorb that knowledge from his desk.

Mr. RANSDELL. Mr. President, I think if the arguments had been a little briefer, not only on the part of the Senator from North Dakota but also on the part of all the other Senators who spoke on that question, we might have listened; but when they lasted for a month or six weeks, we could not possibly listen to all that was said.

EXECUTIVE SESSION.

Mr. STONE. Mr. President——

Mr. RANSDELL. I yield to the Senator from Missouri.

Mr. STONE. I do not wish to interfere unnecessarily with the Senator from Louisiana; but it is 5 o'clock, and I was about to move that the Senate proceed to the consideration of executive business.

Mr. RANSDELL. I have no objection. I had made all the points I wished to make, and tried to answer the question, so the Senator will not interfere with me if he makes that motion.

The PRESIDING OFFICER. The question is on the motion of the Senator from Missouri that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 13 minutes spent in executive session the doors were reopened.

AGRICULTURAL APPROPRIATIONS.

Mr. GORE. I ask unanimous consent that the Senate resume the consideration of House bill 13679, the Agricultural appropriation bill, which was temporarily laid aside.

Mr. McCUMBER. I can not understand what is the Senator's request on account of the confusion in the Chamber.

The PRESIDING OFFICER. The Senator from Oklahoma asks unanimous consent that the Senate proceed to the consideration of the Agricultural appropriation bill.

Mr. McCUMBER. Pending that, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from North Dakota suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Johnson	Overman	Smith, Ga.
Bankhead	Kenyon	Owen	Smith, S. C.
Brandegee	Kern	Page	Smoot
Bristow	Lea, Tenn.	Pomerene	Swanson
Bryan	Lewis	Ransdell	Thomas
Chamberlain	McLean	Saulsbury	Vardaman
Clark, Wyo.	Martin, Va.	Shafroth	Walsh
Clarke, Ark.	Martine, N. J.	Sheppard	Warren
Crawford	Nelson	Sherman	West
Gore	Norris	Shively	Williams
Hughes	O'Gorman	Simmons	

Mr. MARTINE of New Jersey. I desire to announce that the Senator from West Virginia [Mr. CHILTON] is absent on public business. He is paired with the Senator from New Mexico [Mr. FALL].

Mr. WALSH. I wish to announce the absence of my colleague [Mr. MYERS], who is ill.

Mr. SMOOT. I desire to announce the unavoidable absence of the senior Senator from Kentucky [Mr. BRADLEY] and the junior Senator from Wisconsin [Mr. STEPHENSON].

The PRESIDING OFFICER. Forty-three Senators have answered to their names. A quorum of the Senate is not present.

Mr. SMITH of Georgia. The Secretary under the rule must call the roll of absentees.

The PRESIDING OFFICER. The Secretary will call the names of absent Senators.

Mr. WEST. I move that the Senate adjourn. I do not think we shall be able to get a quorum this evening. I have been here all day, and I think it is time to adjourn.

The PRESIDING OFFICER. The Senator from Georgia moves that the Senate adjourn.

The Senate refused to adjourn.

The PRESIDING OFFICER. The Secretary will call the names of absent Senators.

The Secretary called the names of the absentees, and Mr. THOMPSON and Mr. TILLMAN answered to their names when called.

Mr. SMITH of Maryland, Mr. ROBINSON, Mr. LA FOLLETTE, and Mr. LANE entered the Chamber and answered to their names.

The PRESIDING OFFICER. Forty-nine Senators have answered to their names. There is a quorum present.

Mr. GORE. I now ask the Senate to proceed to the consideration of the Agricultural appropriation bill.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

The PRESIDING OFFICER. The pending question is on the amendment proposed by the Senator from Oklahoma [Mr. GORE] to the amendment of the Committee on Agriculture and Forestry.

Mr. GORE. I withdraw the amendment which I offered, and, so far as I am concerned, I accept the amendment offered by the junior Senator from Mississippi [Mr. VARDAMAN], if there be no objection.

The PRESIDING OFFICER. There being no objection——

Mr. WILLIAMS. I object. I should like to have a vote upon it, anyhow. My reason for objecting is that, while it is all right to strike at Rockefeller's participation, I think the language ought to be broad enough to strike anybody else out of participation who is in Rockefeller's situation. In other words, if there is any principle in this matter at all, it ought to be applied to everyone of the class and motive aimed at; it ought to exclude men of like character and purposes and motives residing within the South. I shall not make any difficulty about it. I shall simply vote against the motion if it is made to substitute this amendment for the committee amendment as modified a moment ago by the chairman of the committee [Mr. GORE]. I think the committee amendment as modified accomplishes the purpose that the chairman and the gentlemen of the committee

pretend they desire to accomplish, and that the amendment to it by my colleague does not accomplish that purpose; on the contrary, it leaves room through which to drive a coach and four.

Mr. SMOOT. Mr. President——

Mr. WARREN. I should like to have the amendment to the amendment read.

Mr. SMOOT. The Senator from Wyoming asks that the amendment be read. That is what I rose to ask.

The PRESIDING OFFICER. The amendment to the amendment will be read.

The SECRETARY. In the part proposed to be inserted at the bottom of page 20 after the word "*Provided*," in the amendment offered by the committee, strike out and insert in lieu the following words:

That the entire expense of such service shall be defrayed from this appropriation, and such contributions as may be made by the States, counties, municipalities, and firms, associations, individuals, and corporations residing within said States wherein such work is to be done or service rendered.

Mr. GORE. Mr. President, I wish to say that I withdraw the amendment which I offered, and propose to accept this amendment, because I feel certain that this amendment will be administered by the Department of Agriculture in a way to secure the end which the committee have in view, and I move its adoption.

Mr. WILLIAMS. Mr. President, there is at the head of a great corporation in the State of Texas a man who has been much talked about as one of the men of pernicious activities and "predatory wealth." Why provision should be left in a condition such that he can become a contributor to this fund and a participator in this work, while somebody else outside of the State of Texas equally predacious can not, I do not understand. It seems to me, upon the contrary, that there is more objection to his intermeddling in the affair than of somebody outside doing so, because a man inside a State has an interest in the complexion of the legislature, and if he can bribe public sentiment by contributions to a great public purpose of local interest he is of much more danger to the State and its people than anybody with great wealth and with like supposed or alleged ulterior purposes outside of the locality could be. Rockefeller would have no interest in the complexion of the Legislature of the State of Mississippi or of the State of Texas, but a man of great "predatory wealth," at the head of a great and pernicious trust in one of these States, would have a great interest in precisely that thing. Now, if the reason why this amendment is adopted is to prevent just that sort of thing in the public life of the Nation and upon the governmental functioning of the Nation, then it applies with twofold force to men of that character who reside within the section affected, because their contributions will have much more influence in bringing over to a favorable consideration of their ulterior ends the local men than would the contributions of somebody outside of the territory, who could have no local ends in view. I think that either one of these amendments is better than the language which occurs in the bill as brought from the committee; but I think that the modified language offered by the committee in the first instance is better than this, to which the chairman now for some reason gives way. This reads:

Associations, individuals, and corporations residing within said States wherein such work is to be done or service rendered.

The Pierce-Waters Oil Co. is no more respectable than is the Rockefeller Oil Co., nor is the head of one any more respectable than the head of the other, and there are a great many other companies of like character whose influence and the influence of whose chiefs are to be as much dreaded. The local company's influence is to be much more dreaded than that of a company or an individual whose interests are outside of the territory to be affected and that has no interest in the political complexion of the State.

I will say this before I sit down: I have said what I have, predicating it upon the theory of the committee. I am not as highly supersensitive as are a great many people about taking a tainted dollar and untainting it. After all, it is not the dollar which is tainted, but the man who got it and the nefarious system under which it was gotten. In a little town in Mississippi there was a man who made his business by professional gambling. A Methodist preacher of great character and eloquence came there. This man, thinking to be either insolent or funny, one or the other, went to him one day and said, "Parson, here is $25 for your church; but before you take it I want to tell you how I got it. I won it at the poker table." The parson took it. "Well," he said, "thank God, here are $25 badly and dirtily won that will be taken from a bad cause and made to serve the cause of God and humanity," and he put the money in his pocket and gave it to the church.

As to the dollar itself, it is never tainted; it is the man who is tainted; it is the business that is tainted; and I wish I could get half the dollars such people have away from them by lawful means, so far as that is concerned, and get them directed in some way to a good purpose; but I do realize that when it comes to carrying on the Government itself that is a totally different thing. The Government itself ought to pay its own employees, and it ought not to permit somebody else to be virtually the real employer of its nominal employees, because where the paymaster is there the heart of the employee is, and where the paymaster's interests lie there will the service of the employee go, if at any time in the carrying out of the work there should be or could be a conflict between the interests of the Government, representing the people, upon the one side, and the interests of the contribution, representing the individual or the trust or predatory wealth, upon the other side.

I have heard that there were a good many of the people—the so-called employees of the Department of Agriculture—upon the pay roll—the junior Senator from Iowa [Mr. KENYON] is my informant—who receive a dollar from the Government to fix the nominal character, the nomenclature of their employment, and receive the balance of their pay from Mr. Rockefeller. If so, it is idle to call them employees of the Agricultural Department; they are at heart and in service, if the test should ever come, the employees of Mr. Rockefeller; or else, if they do not serve him as his employees, when the test comes, they will have to resign their positions, because the right sort of men do not take their bread as a voluntary gift from a given source and then work against or hold righteous indignation against that source. Their mere naming or nomination by the Department of Agriculture does not make them the employees of the United States Government. They remain the employees of the man who pays them, of the interest that pays them. Moreover, if you are going to stop this sort of thing, then I think you ought to go further and stop it whencesoever or by whomsoever the menace may come. Leaving in here the words "associations or individuals residing within said States," I should have no objection if it read: "And such contributions may be made by the States, counties, municipalities, mercantile or banking associations, or agricultural associations, farmers or merchants, residing within the State."

But when you put in the broad word "individuals," and just prior to it the word "associations," I do not see how anybody can say that that does not include everybody, subject only to the limitation that they shall be resident within the several States of the cotton belt, and thus possibly, if not probably, defeat the very end aimed at.

A great lumber interest down South might have some legislation that it wanted to put through a local legislature, and it might think that it could gain a few legislative votes by contributing largely to the funds for the extermination of the Mexican cotton boll weevil, thus striking a popular chord and bribing the popular will, unconsciously to the popular conscience. The great cottonseed-oil industry, if it became united in a trust—and thus far it has not, I am glad to say—might conclude that it could make antitrust laws easier in their operation upon it if it would please the farmers and the legislatures representing the farmers by making a large contribution to the extirpation of the Mexican boll weevil, and so on ad infinitum. It seems to me it would be better to confine it, and I would rather, if I could, confine it, to States, to counties, to municipalities, to agricultural and banking associations, and to individual farmers.

Mr. President, I ask unanimous consent to publish in the RECORD at the end of my remarks and as a part of them the telegram which I now send to the desk.

The PRESIDING OFFICER. That will be done in the absence of objection. The Chair hears none, and it is so ordered.

The telegram referred to is as follows:

CLEVELAND, MISS., *April 24, 1914.*

Senator JOHN SHARP WILLIAMS,
Washington, D. C.:

We earnestly urge that you oppose amendment to general Agricultural appropriation bill relative to farm demonstration work. County, State, and individual assistance is necessary if effective work is done in this work.

C. P. METCALF,
W. L. PEARMAN,
C. S. GASSCO,
W. G. HARDEE,
WALTER SILLERS,
W. B. PARKS,
L. H. GAINS,
R. M. EDWINS,
L. E. EDWARDS,
CHARLES OWEN,
Cleveland Business League.

Mr. MARTIN of Virginia. Mr. President, this amendment which has been presented by the committee and which has been modified, or attempted to be modified, by a number of suggestions made on the floor of the Senate, seems to be intended to prevent contributions from the general education board—which I suppose means Mr. Rockefeller—to demonstration work through the agency of the Department of Agriculture in Washington. I confess, Mr. President, I am somewhat at a loss to understand the logic of the idea which refuses to permit contributions to be made for legitimate purposes to worthy objects. For my part, and so far as my State is concerned, I am very glad to see Mr. Rockefeller contribute to worthy objects in my State as liberally as he is willing to contribute.

I have heard very little about this matter until to-day. To-day the president of the Agricultural and Mechanical College of the State of Virginia came to Washington to bring this matter to my attention, and he has prepared a statement and handed it to me within the last 15 minutes, from which it appears that contributions are being made for this current year by the general education board as follows: In Alabama, from the general education board for girls' canning and poultry club work, $5,000; in Arkansas, from the same general education board, for girls' canning and poultry club work, $5,000. Contributions are made from other sources; for instance, in Arkansas business men, business organizations, and county boards of revenue contributed $50,700 for the same purposes.

In all the States large contributions are being made by county boards and by business organizations for these very commendable objects, all of which, under the amendment originally reported by the committee, were struck down. The committee proposed to forbid the philanthropic people of the several States from contributing, in conjunction with the Agricultural Department, to these worthy objects. It is inconceivable to my mind what could have led them to the conclusion that they must legislate to prevent contributions by business organizations, business men's associations, and municipal organizations to worthy objects of great benefit to the public.

In Florida the general education board contributed $5,000 for the same objects—canning and poultry club work of girls. In Georgia, for the same work, girls' canning and poultry club work, $5,000 was contributed by the same board, as well as $12,000 for regular demonstration work. I do not understand how the State of Georgia can be injured by permitting Mr. Rockefeller, be he a good man or a bad man, devoting his money to such uses.

Mr. LANE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from Oregon?

Mr. MARTIN of Virginia. Certainly.

Mr. LANE. There is a prejudice against taking money from Rockefeller. There may be none against taking money from agricultural associations; and there are a million men in this country from whom the people would not object to taking money; but there is an objection to taking money from Mr. Rockefeller and the Standard Oil Co. There are many people who believe that there is sweat and blood and grime and mothers' tears on every penny of his money, and that the curse of God rests on the hand that accepts it; that it is used to demoralize the service of the people. They do not want the money, and they do not want the Senate to vote it onto them. The Senator need make no mistake about that.

Mr. MARTIN of Virginia. It is a prejudice in which I do not participate. If Mr. Rockefeller has money that is covered with blood, take it away from him, if he is willing to give it, and use it for legitimate charity, instead of letting him keep it and use it.

Mr. LANE. Has the Senator read the news from Colorado of how gunmen shot women and children and then set fire to the tents and burned 13 babies to death?

Mr. MARTIN of Virginia. I read all that, and I will say that for whatever wrong he has done let him be punished; let him be punished for every evil deed he has committed, but if he wants to do any good do not interpose a law that will prevent him from doing it.

It will do good in my State. When he gives $38,000 a year for these purposes the people in my State do not object to receiving it; I do not object to receiving it; I would be glad to get a half of all his millions, ill-gotten or not, if they could be bestowed on public charities and useful objects in my State. I would be glad to see him give his money to such purposes.

Mr. KENYON. Mr. President, may I ask the Senator a question?

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Virginia yield; and if so, to whom?

Mr. MARTIN of Virginia. The Senator from Iowa is the only one I see on his feet.

Mr. McCUMBER. The Senator from Iowa first addressed the Chair.

Mr. KENYON. I merely wanted to ask the Senator in that connection if he knew that $2,500,000 worth of Colorado Industrial Co. notes and bonds were held by the general education board, the Colorado Industrial Co. being one of the companies involved in the riots now going on in Colorado, and that some of the money that is given to pay the employees of the Government comes from the funds of that company? Would the Senator want that kind of money?

Mr. MARTIN of Virginia. It will not help them any for us to force Rockefeller to keep it himself. I should like to get the whole estate he has accumulated, if it could be devoted to charity and education and beneficent purposes for the betterment of the world and for the help of the poor.

Mr. KENYON. Does the Senator want employees of the Government, or presumably employees of the Government, paid by the money of this man, which he gets from the bonds of a company such as that in Colorado? That is what is being done to-day. The report of the Secretary of Agriculture shows that 600 employees of his department are paid from this fund, one dollar being paid by the Government and the balance by the general fund. That is what this amendment is striking at. The amendment does not prevent the Senator taking Rockefeller money for his State if he wants to do so, but it does stop the Government having their employees paid by this man; that is all.

Mr. MARTIN of Virginia. The fact that he gives it to a public use does not hurt anybody. We can not take the money away from Rockefeller and give it to those miners. If he got it by any mistreatment of those miners, he ought to be punished for his acts. I know nothing about that.

Mr. KENYON. Does the Senator believe, as to the employees of this Government—as the record now stands, 600 of them paid by the money that comes from that fund—that that is a proper way to pay them? Is not this Government big enough and powerful enough to take care of its own employees without that kind of a contribution?

Mr. MARTIN of Virginia. It has not done it; it is not doing it now; it is not taking care of this demonstration work in my State as it ought to be taken care of, and I wish I could get $200,000,000 of Rockefeller's money and devote it to beneficent purposes in my State.

Mr. KENYON. That is all right, so far as the State is concerned, perhaps; but would the Senator pay the salaries of the Supreme Court judges or United States Senators or any other officers of the Government from a fund of this kind?

Mr. MARTIN of Virginia. Nobody has made any proposition of that sort.

Mr. KENYON. That is being done now as to certain employees of the Government.

Mr. MARTIN of Virginia. The Senator has heard more than I have; I have not heard of that.

Mr. KENYON. Then the Senator has not read the letter from the Secretary of Agriculture in response to the Senate resolution.

Mr. MARTIN of Virginia. Surely the Senator from Iowa does not stand up here and say that Rockefeller is paying the judges of our courts. There is no use of talking stuff like that to me.

Mr. KENYON. I did not say that.

Mr. MARTIN of Virginia. That is what the Senator said. I do not know what he meant to say; but that is what he said.

Mr. KENYON. No; I did not. I say he is paying to-day, out of his money, 600 employees of the Department of Agriculture, and I say you might as well pay the judges of the Supreme Court and you might as well pay the Senators.

Mr. MARTIN of Virginia. I do not think so. He has put $250,000 or $300,000 a year in the hands of the Secretary of Agriculture to be used for demonstration work. I think it was a very creditable donation, a very useful donation, and a very proper donation. So far as it comes to my State, I am glad to get it. I wish he could be induced to double it and to increase it, yes, a hundredfold. I should like to take—well, I would not say every cent. I should not like to pauperize him; but I should like to bring him down to the limits of a hardworking man, working for his living as the Senator and I are working for our living, and use all the balance of his resources for beneficent purposes throughout our country.

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from Kansas?

Mr. MARTIN of Virginia. I do.

Mr. BRISTOW. Mr. President, it seems to me the Senator's proposition is not exactly pertinent to this situation. He might take Rockefeller's funds from him and leave him a common, ordinary man who works as other men do; but this proposition is for him voluntarily to contribute a part of his income, as much as he feels he can spare, to the Government to pay Government officers for doing work which Congress thinks ought to be done; and in order to get the money to pay these men he resorts to the devices which he has practiced to accumulate his enormous fortune, which are criminal devices. Does the Senator from Virginia want to be in partnership with that kind of business?

Mr. MARTIN of Virginia. No; and I am not going to be. I do not want to be in partnership with it, and I am not going to be in partnership with it. I did not make myself clear if the Senator understood me as saying that I would take anything from Mr. Rockefeller, unless he has something that the law can wrest from his control. I say I should be glad to see him donate his entire fortune to public uses, to benevolent purposes, to education, and to charity.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from North Dakota?

Mr. MARTIN of Virginia. I yield to the Senator.

Mr. McCUMBER. I assure the Senator that I agree with him, and I think he is perfectly justified in allowing Mr. Rockefeller to spend as much money as he desires in the State of Virginia; but does not the Senator agree with me that it would be better to let Mr. Rockefeller run his own investigations and render assistance in his own way, without tying him up in any kind of a partnership with the Government of the United States? Would it not be better to let the United States expend what it feels it can afford to expend for this purpose, and then, if Mr. Rockefeller wants to use any of his money to investigate also and assist in any way, to have him use it on his own part, without this partnership arrangement with the Government of the United States?

Mr. MARTIN of Virginia. Mr. President, there is nothing to this idea of a partnership. The Senator can not seriously talk about our being in partnership with Mr. Rockefeller. Nobody is in partnership with him. The Government is carrying on a public work, and Mr. Rockefeller comes along and says: "I will turn over to the Secretary of Agriculture $300,000 a year to be used in this demonstration work."

Mr. McCUMBER. That is what I call a partnership—to do work together.

Mr. MARTIN of Virginia. It is a donation, pure and simple. Is the Senator in partnership with everything to which he donates money for the public welfare?

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from Kansas?

Mr. MARTIN of Virginia. I yield to the Senator.

Mr. BRISTOW. If the Senator will yield again, the Government puts these employees on the pay roll. They are Government officers. They are paid a dollar a year or a dollar a month by the Government out of the public funds, so that nominally makes them public officials. Then Mr. Rockefeller fixes the salary which he thinks they ought to have and pays it to them, and they are under obligations to him for the salaries they receive and for the authority of the United States Government.

Mr. MARTIN of Virginia. Mr. President, according to my information the Senator from Kansas is absolutely incorrect. I am told by those who are close to this work that Mr. Rockefeller never has made a single suggestion of any sort as to who shall be employed or as to what shall be paid them. All Mr. Rockefeller does is to put to the credit of the Secretary of Agriculture $300,000 a year to be used in these beneficent public works. He does not appoint anybody or suggest the appointment of anybody or fix anybody's salary or fix the kind of work they shall do. He seems to have been pleased with the good work being done by the Agricultural Department, and he has donated to that work $300,000 a year.

Mr. BRISTOW. And the Government supplements that by an appropriation of its own; so that there is actually, in fact, a partnership now between the Department of Agriculture and John D. Rockefeller.

Mr. MARTIN of Virginia. Mr. President, I shall not discuss any further the partnership matter. My mind does not enable me to work out any such theory as that. Every donor to a public charity is not in partnership with the charity. He simply makes a donation. As I say, I wish Rockefeller would donate the bulk of his fortune to public uses, to charity, and to educational purposes.

In South Carolina I know that this general education board gives $5,000 to the girls' canning and poultry club work, and for general demonstration work $33,000; so South Carolina gets $38,000 altogether. I will ask my friend the Senator from South Carolina to advert to that particularly. He is on the Committee on Agriculture and Forestry. The bill as reported to the Senate takes away from the State of South Carolina $38,000 which Mr. Rockefeller has turned over to the Agricultural Department to promote the work of canning clubs among girls and general demonstration work on the farms of South Carolina. In Tennessee $5,000 is donated to the girls' clubs and $17,700 to general demonstration work. In Texas $7,500 is donated to the girls' clubs. In Virginia $38,000 is donated for general demonstration work and the girls' clubs. In West Virginia $17,500 is donated.

That is as far as this table goes. It was handed to me a moment ago, while this bill was under consideration, by the president of the agricultural college of Virginia. It shows that $250,000 is donated for those purposes by Mr. Rockefeller, and some additional donations are made for other purposes.

For my part, Mr. President, I do not see how we can undertake to investigate the way in which all the money is earned that is given to public uses, to charity, and set ourselves up as censors upon the morals of other people and determine whether or not they have earned their money in a clean, honest, moral way before we will accept it for beneficent uses. As far as I am concerned, I do not propose to make any inquiries into how Mr. Rockefeller earned his money. It would take more than the few remaining years of my life for me to make any investigation of it if I were to try to make such an investigation. He has gotten immense gains. Whether they were ill-gotten or honestly gotten is with his conscience and between him and his God; or, if he has violated the law of the land, it is between him and the law. If he has done any illegal act, I want him brought to the bar of justice and punished for it; but I do not wish to reject donations which he may make, perhaps to soothe his injured conscience or perhaps from the excess which he possesses.

I can not judge of his motives, and I am not familiar with his methods, but if he wants to give anything to good purposes I think he ought to be permitted to do it. So far as my State is concerned, I am very willing to see the money received. The president of our agricultural and mechanical college says that his donations are exceedingly helpful. They are advancing the welfare of classes who need all that can be bestowed upon them, and I do not think Congress ought to intervene here and undertake to legislate against donations for good, moral, and proper purposes.

I will send up this paper, which I ask to have go in the RECORD.

The PRESIDING OFFICER. Is there objection to the inclusion in the RECORD of the paper presented by the Senator from Virginia? The Chair hears none, and it will be so ordered.

The matter referred to is as follows:

VIRGINIA POLYTECHNIC INSTITUTE,
Blacksburg, Va., May 4, 1914.

DEAR SENATOR: In answer to your inquiry as to the amount of money being spent in the Southern States for girls' canning and poultry club work, for boys' corn-club work (the boys' corn-club work is included in the regular demonstration work), and for adult demonstration work, I submit the following:

ALABAMA.

From the general education board for girls' canning and poultry club work	$5,000
State legislature	25,000
Business men, business organizations, etc	17,643

ARKANSAS.

From the general education board for girls' canning and poultry club work	5,000
Business men, business organizations, county boards of revenue	50,700

FLORIDA.

From the general education board for girls' canning and poultry club work	5,000
State legislature	5,000
Business men, business organizations, counties	12,500

GEORGIA.

From the general education board for girls' canning and poultry club work	5,000
From the general education board for regular demonstration work	12,000
State college of agriculture	6,363
County organizations	3,042
Citizens and business men's organizations (estimated)	3,000

KENTUCKY.

From the general education board for girls' canning and poultry club work	5,000
From the general education board for regular demonstration work	17,500
State department of agriculture	1,000
County boards of revenue	9,075
Agricultural clubs, etc	1,700

LOUISIANA.	
From the general education board for girls' canning and poultry club work	$5,000
From business men, county boards of revenue, business men's organizations, etc	20,300
MARYLAND.	
From the general education board for girls' canning and poultry club work	5,000
From the general education board for regular demonstration work	13,500
Counties, business men's organizations, etc	8,400
MISSISSIPPI.	
From the general education board for girls' canning and poultry club work	5,000
Business men, county boards of revenue	23,000
NORTH CAROLINA.	
From the general education board for girls' canning and poultry club work	5,000
From the general education board for regular demonstration work	33,000
State department of agriculture	18,000
Business men, county boards of revenue	35,000
OKLAHOMA.	
From the general education board for girls' canning and poultry club work	5,000
Business men, county boards of revenue, etc	24,000
SOUTH CAROLINA.	
From the general education board for girls' canning and poultry club work	5,000
From the general education board for regular demonstration work	33,000
Clemson Agricultural College	12,500
Winthrop College	4,800
Business men's organizations, county boards of revenue, etc	16,100
TENNESSEE.	
From the general education board for girls' canning and poultry clubs	5,000
State board of education, county boards of revenue, business men's organizations	17,700
TEXAS.	
From the general education board for girls' canning and poultry club work	7,500
County boards of revenue, business men's organizations, etc	77,680
VIRGINIA.	
From the general education board for girls' canning and poultry clubs	5,000
From the general education board for regular demonstration work	33,000
United board of agriculture, counties, business men's organizations, etc	65,300
WEST VIRGINIA.	
From the general education board for girls' canning and poultry clubs	5,000
From the general education board for regular demonstration work	12,500
State college of agriculture, county boards of revenue, agricultural clubs, business men, organizations of business men	11,500
The total funds given by business men, business men's organizations, county boards of revenue, agricultural colleges, and other sources, including the general education board for the year 1914	740,150
Of this amount the general education board gives	250,000

In the above totals we have not included between $50,000 and $75,000 that are given each year in prizes by railroads, banks, business men, bankers, business men's organizations, clubs, merchants, commercial organizations, and many other sources. These prizes are given in money, merchandise, such as plows, stoves, etc., wagons, horses, mules, pigs, cows, chickens, and scholarships to attend agricultural colleges, scholarships to attend normal schools, short courses in agriculture for boys at agricultural colleges, trips to State fairs, trips to the State capital, and trips to Washington. Also in various other ways.

Mr. VARDAMAN. Mr. President, I approve most heartily the action of the committee in this instance. We need all the money we can get to help us in the great effort which the people of the South are now engaged in to exterminate the boll weevil, but I think it is very proper for this Government to put the stamp of its disapproval upon the methods by which the great fortunes of John D. Rockefeller and men of his class were made.

That they are made up largely of money coined of the blood and tears of the toiling masses of this country no man will question, and he is still making it that way. The money is tainted. Every dollar of his hoard represents a wrong and is reeking with the enforced sacrifices and suffering of the helpless toiling poor. It is a very wholesome lesson to inculcate into the minds of coming generations, that they may so act and so live that men will not be glorified and apotheosized who have amassed fortunes in the way this man has amassed his great fortune and in the way in which he is enlarging it to-day.

There are a few things in this world, thank God, more valuable than money. We do not need Mr. Rockefeller's money, however desperate our situation may be.

But that, however, is not the question now at issue. The question before the Senate is whether or not the people of the various States engaged in this herculean effort may be permitted to promote their own interests by cooperating with the Government in the effort to exterminate the boll weevil.

To meet the objection made by the Senator I am going to submit this proposition, which amends the amendment I offered and which has been accepted by the chairman of the committee, so that it will read in this way:

That the entire expense of such services shall be defrayed from this appropriation and such contributions as may be made by the States, counties, municipalities, firms, farmers' organizations, individuals, mercantile companies, and banking associations located in and residing within said State wherein such work is to be done or service rendered.

Something has been said about the great lumber companies contributing to this fund with a view of controlling legislation. The lumber companies in my State, if they should contribute to it, will do so for the purpose of adding to the value of the lands which they hold. They hold large bodies of such lands. If there were an oil company there—and we have none in Mississippi—it would contribute for the improvement of the lands in the State wherein it is operated. There could be no way by which it could influence a legislature. There could be no way by which it would influence a judge. It would be for the purpose of improving the property of the contributors, and in that way benefiting the entire Commonwealth.

That objection to my amendment, Mr. President, I submit is certainly without merit.

In Mississippi, where we are driven to desperate straits in this matter, the people of the counties have organized. In one county, as I stated here this afternoon, namely, the county of Clay, and the same is true in the other counties, the Government has paid $500 to a man, the county has contributed $600 to his salary, and the citizens of the county seat have contributed $400, making a total of $1,500, which enabled them to employ the services of a capable man. That is the way it is done all over the State of Mississippi. The people are greatly interested in this measure, Mr. President. They have telegraphed me and have written me that if this amendment is agreed to as it came from the committee, the great work which they have begun and are pushing along with such eagerness and with such a bright prospect of ultimate success will be defeated, and all of their efforts will come to naught.

The amendment offered by the committee was for the purpose and with the intent to strike at one concern, one company. It is merely a protest against a system. No other companies that have contributed to this fund are complained of—not one. If this amendment is adopted as I propose it, the work can go on, and the people of the States, cooperating with the General Government, probably will be able to overcome this evil which threatens the destruction of the agricultural interests of the South.

The chairman of the committee has accepted the amendment, and I sincerely hope it may be adopted. It is of vital importance to us. Nothing has come before the Congress that is of more material interest and in which is involved more in dollars and cents for the people of the cotton-growing section than the provision of the bill which we are now considering.

Mr. McCUMBER. Mr. President, during the long struggle of the Colonies for their independence, when we were poor and overburdened with taxation, there was some excuse for the Government or the combination of the States accepting gifts for carrying on their war and their defense. I submit, however, that the Government of the United States can give no valid excuse for the acceptance of contributions now to fatten its Treasury. The United States has within its borders sufficient taxable property to carry on every function of government.

Mr. VARDAMAN. Mr. President, will the Senator yield to me for a moment?

Mr. McCUMBER. In just one minute. If it desires any of the funds of Mr. Rockefeller to assist it, the income tax can be so levied as to secure all the funds that we may need in that particular direction. If Mr. Rockefeller has a right to enhance the volume of money in the Treasury by his gifts, so every widow has a right to put her little mite into the Treasury for some other purpose, and every good man and every bad man has an equal right to subscribe an amount to go into the Treasury of the United States to be used in this investigation and in that investigation.

Mr. VARDAMAN. Mr. President, will the Senator yield to me for a moment?

Mr. McCUMBER. Certainly.

Mr. VARDAMAN. The Senator evidently misapprehends the purpose of this provision. We are not contributing to the General Government fund in this work. We are simply asking the Government to let us cooperate with it to protect our own individual interests. We are not giving this money to be sent away to be used by the Government. We are simply saying to the Government: "When you send your agent here, let us co-

operate with him. You are not giving enough money to do it all yourselves." I think it is very proper that you should not. We are simply asking to be allowed to contribute this money for our own benefit, to be used on our own property, in our own communities. That our request is most reasonable and just, I am sure the sense of right and justice of the Senate will admit.

Mr. McCUMBER. When I made that argument a short time ago the Senator from Virginia [Mr. MARTIN] denied that there was any kind of a copartnership arrangement between the Government and the people who want this work done. It seems to me, from the argument of the Senator from Mississippi, that he establishes that copartnership. That is what I object to. I shall vote against the substitute, and then I shall vote against the amendment offered by the committee. I would simply prevent the Treasury of the United States accepting any donations from any source to help it carry on its functions of government. If any wealthy man in the United States desires to enter upon the investigation of anything that he thinks will be beneficial to the public, there is no law to prevent his doing so, but I want to separate and divorce entirely the Government from acts in connection with the efforts of private individuals to carry on a governmental function. I think the senior Senator from Mississippi [Mr. WILLIAMS] is entirely correct in his argument, and that we ought not to encourage that kind of a Government.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Mississippi [Mr. VARDAMAN] to the amendment of the committee.

Mr. GORE. In order to perfect the committee amendment, I accept the amendment of the Senator from Mississippi.

Mr. SMOOT. It is quite evident we can not vote on this question to-night, and——

Mr. GORE. I do not think there will be anything more than a formal vote required on this question. Let us perfect the pending amendment, anyway.

Mr. SMOOT. I want to have the amendment pending in the morning. We can not get through with it to-night.

Mr. GORE. The Senator from Utah certainly does not object to the last amendment offered by the Senator from Mississippi?

Mr. SMOOT. I know Senators desire to discuss it, and I therefore say to the Senator that it can not be disposed of to-night.

Mr. OWEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to his colleague?

Mr. GORE. I yield.

CITIZENSHIP OF THE FIVE CIVILIZED TRIBES (S. DOC. NO. 472).

Mr. OWEN. I ask unanimous consent to have reprinted Senate document 472 with the corrections proposed. I submitted this request on Saturday, and it was objected to by the Senator from North Dakota [Mr. MCCUMBER], but I understand he withdraws his objection.

Mr. CLAPP. What is the document?

Mr. SMOOT. If there is any correction to be made, I ask the Senator to let it go to the Committee on Printing.

Mr. OWEN. The addition consists of only a few lines.

Mr. SMOOT. I will say to the Senator that in my opinion the document will have to have a new number if it is changed in any way.

Mr. OWEN. Then I ask that it be printed with a new number.

Mr. SMOOT. Then I do not care to have it referred.

Mr. CLAPP. What is the document?

Mr. CRAWFORD. Let it be stated.

The PRESIDING OFFICER. The caption of the document will be stated.

The SECRETARY. Senate Document No. 472 of the present Congress and session, entitled "Citizenship of Five Civilized Tribes," a communication from the Assistant Secretary of the Interior to Hon. ROBERT L. OWEN, submitting a list of names of persons apparently equitably entitled to enrollment on the rolls of various tribes composing the Five Civilized Tribes of Oklahoma, and the list approved by attorneys of the Choctaw and Chickasaw Nations.

Mr. OWEN. The addition adds a few names to the list of those whom the department thought ought to be enrolled.

Mr. SMOOT. The Senator sees the reason why I asked that it might go to the Committee on Printing.

Mr. OWEN. I see no objection to giving it a new number.

Mr. SMOOT. By having two documents with the same number one would be asked for and the other might be given.

Mr. OWEN. I agree to that. Let it take a new number.

The PRESIDING OFFICER. The Chair hears no objection, and the document will be reprinted with the corrections, and it will be given a new number.

AGRICULTURAL APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Mississippi [Mr. VARDAMAN] to the amendment of the committee.

Mr. SMOOT. If the Senator from Oklahoma does not propose to adjourn, I will suggest the absence of a quorum.

Mr. GORE. All right.

Mr. KERN. I was about to move to adjourn.

Mr. SMOOT. Then I will withdraw the suggestion.

Mr. GORE. I will not withdraw my suggestion that I accept the last amendment tendered by the Senator from Mississippi. I have a right to perfect the committee amendment. I have accepted that form of amendment. I have a right under the rule to perfect the pending amendment by accepting the suggestion of the Senator from Mississippi. I will not consent that it shall go over until we make an effort to perfect it.

Mr. SMOOT. Nobody is trying to take any right away from the Senator. The Senator has a perfect right to do that to-morrow. He has a perfect right to do it to-night. I have not tried to deprive him of any of his rights; but I want to say to the Senator that unless we adjourn I shall, as I said, suggest the absence of a quorum, and we will have a quorum here before action on the amendment.

Mr. GORE. The Senator has a right to suggest the absence of a quorum.

Mr. McCUMBER. I move that the Senate adjourn.

The motion was agreed to, there being on a division—ayes 16, noes 8; and (at 6 o'clock and 5 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, May 5, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 4, 1914.

ASSISTANT ATTORNEY GENERAL.

Bert Hanson, of New York City, N. Y., to be Assistant Attorney General (conduct of customs cases), vice William L. Wemple, resigned.

UNITED STATES MARSHAL.

John S. P. H. Wilson, of Auburn, Me., to be United States marshal for the district of Maine, vice Henry W. Mayo, resigned.

PROMOTIONS IN THE NAVY.

Capt. Walter McLean to be a rear admiral in the Navy from the 10th day of March, 1914.

Asst. Naval Constructor Alexander H. Van Keuren to be a naval constructor in the Navy from the 30th day of April, 1914.

Asst. Naval Constructor Edwin G. Kintner to be a naval constructor in the Navy from the 30th day of April, 1914.

Asst. Naval Constructor Fred G. Coburn to be a naval constructor in the Navy from the 30th day of April, 1914.

Pharmacist Richard F. S. Puck to be a chief pharmacist in the Navy from the 24th day of February, 1914.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 4, 1914.

UNITED STATES DISTRICT JUDGE.

Wilbur F. Booth to be United States district judge for the district of Minnesota.

COLLECTOR OF CUSTOMS.

Frank E. Fitzsimmons to be collector of customs for the district of Rhode Island.

PROMOTIONS IN THE ARMY.

CAVALRY ARM.

Lieut. Col. George H. Morgan to be colonel.
Maj. George H. Cameron to be lieutenant colonel.
Capt. Edward D. Anderson to be major.
Lieut. Col. William C. Brown to be colonel.
First Lieut. Consuelo A. Seoane to be captain.

FIELD ARTILLERY ARM.

First Lieut. Lesley J. McNair to be captain.

COAST ARTILLERY CORPS.

First Lieut. Henning F. Colley to be captain.

INFANTRY ARM.

Lieut. Col. Wilds P. Richardson to be colonel.
Maj. Beaumont B. Buck to be lieutenant colonel.

Capt. Ferdinand W. Kobbé to be major.
Lieut. Col. William F. Blauvelt to be colonel.
Chaplain Oscar J. W. Scott to be chaplain with the rank of captain.

MEDICAL CORPS.

Lieut. Col. Jefferson R. Kean to be colonel.
Maj. Charles Lynch to be lieutenant colonel.
Capt. John L. Shepard to be major.

QUARTERMASTER CORPS.

Lieut. Col. George F. Downey to be colonel.
Lieut. Col. John M. Carson, jr., to be colonel.

APPOINTMENTS IN THE ARMY.

MEDICAL RESERVE CORPS.

To be first lieutenants.

George Edward Barksdale.
Theodore David Burger.
Ralph D'Alma Denig.
Charles Marvin Fox.
Clarence Gunter.
Lasher Hart.
Harry Hungate Robinson.
Charles Wallace Sale.
Thomas Hugh Scott.
Fedor Leo Senger.
Jonathan Mayhew Wainwright.

POSTMASTERS.

UTAH.

Berdie P. Olson, Ephraim.

VIRGINIA.

Charles W. Mugler, Newport News.
Wily W. Ward, South Boston.

HOUSE OF REPRESENTATIVES.

MONDAY, *May 4, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Eternal God, our heavenly Father, whose boundless love encircles all, whose infinite wisdom is displayed in all the works of Thy hands, whose almighty power is everywhere manifest, whose gracious providence has shaped and guided the destiny of men and of nations in all the past, we most fervently pray for all that makes for purity in the soul, for all that makes for righteousness in the Nation, that thus susceptible to the heavenly influences we as individuals and as a Nation may fulfill our destiny to the honor and glory of Thy holy name. In the spirit of the Lord Jesus Christ. Amen.

The Journal of the proceedings of Saturday, May 2, 1914, and of Sunday, May 3, 1914, was read and approved.

GEN. DANIEL E. SICKLES.

Mr. GOULDEN. Mr. Speaker, I ask unanimous consent to address the House for three minutes.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for three minutes. Is there objection. [After a pause.] The Chair hears none.

Mr. GOULDEN. Mr. Speaker, last night, Sunday, May 3, in New York City a brave, heroic soldier, Maj. Gen. Daniel E. Sickles, answered the roll call of the Supreme Commander of the Universe. He was the last of the great corps commanders on either side of that memorable struggle from sixty-one to sixty-five.

Gen. Sickles served his country well and faithfully; first as a member of the New York State Legislature in both houses, then as a Member of Congress for four years, beginning with 1856 to the outbreak of the Civil War. Although a Democrat he offered his services to President Lincoln early in 1861, and was commissioned to raise a regiment. This he promptly did, following it with four others, constituting a brigade known as the "Excelsior," of which he was made the commanding officer, with the rank of brigadier general. His previous experience in the State militia as an officer qualified him to drill, discipline, and command troops. In November, 1862, after the Battle of Antietam, where he gallantly led a division of the Third Army Corps, he was made a major general and placed in command of that historic corps, distinguished himself in various battles of the Army of the Potomac, and in an especial manner on July 2, 1863, at Gettysburg, where he lost a leg in the service of his country.

He served as minister to Holland in 1866 to 1869, declining the same position to Mexico, but accepted the appointment to represent this country at the court of Spain.

Gen. Sickles was again elected to Congress in 1894 as a Democrat, serving one term with credit to himself and honor to the Nation.

He was born in New York City October 20, 1820; was admitted to the bar in 1844, and served as corporation counsel for several years in that city.

He was commander in chief of the Loyal Legion and of the Grand Army of the Republic, of which organizations he was a prominent member.

Much of the historic interest of the famous Gettysburg battle field is due to Gen. Sickles, who was one of the commissioners in charge of that work. I saw him there at the fiftieth anniversary in July last, a number of my colleagues being present, where he was a conspicuous figure.

It was my privilege to have personally known this brave, rugged soldier, hero, diplomat, and statesman for many years, and I am pleased to be able as his comrade to pay this brief tribute to his memory this morning in a place where he served with distinction. [Applause.]

Mr. MURDOCK. Mr. Speaker, will the gentleman yield for just a moment?

Mr. GOULDEN. With pleasure.

Mr. MURDOCK. I am curious to know if the gentleman from New York who is now speaking served under Gen. Sickles.

Mr. GOULDEN. No. I regret I did not have that honor. My service was elsewhere.

ELZIE C. FISHER.

Mr. WITHERSPOON. Mr. Speaker, I ask unanimous consent to address the House for five minutes.

The SPEAKER. The gentleman from Mississippi asks unanimous consent to address the House for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. WITHERSPOON. Mr. Speaker, on the 23d day of April at Vera Cruz, Mexico, 17 young Americans lost their lives, falling victims to Mexican bullets, and the remains of those young heroes are now taking their last cruise upon the ocean destined to points scattered throughout the Union where they are awaited by sorrowing friends and relatives to have their last reunion with them.

Among this number was Elzie C. Fisher, a boy 20 years old, reared in Scott County, Miss. His parents are James E. Fisher and Elsie Fisher, who live about 15 miles in the country from a railroad in an humble, unpainted home, but within that home, Mr. Speaker, the light of paternal love is as bright as any illumination in the palaces of the rich.

It seems to me but meet and proper that in the great work of national legislation we should pause long enough to pay the tribute of our commendation to one who gave his life in the execution of our will and to send a message of tender sympathy to soothe, if possible, the wounded love and broken hearts of the father and mother who have lost their boy.

Mr. Speaker, learning and intellect and eloquence and courage do not make the noblest acts of human beings. It is self-sacrifice that raises the act of a man to its highest point. He who gives his life for his country makes the nearest approach to the fulfillment of the divine command, "Thou shalt love thy neighbor as thyself," and the death of this ordinary seaman, by its very contrast with the magnitude of his sacrifice, emphasizes and increases the nobility of his act.

It is not strange, therefore, that the poet's peri on her long mission from the courts above to search throughout the ends of the earth to find the thing most dear to heaven should first alight on the field of battle and secure the "last glorious drop" of blood flowing from the heart of the soldier who had died for his country "before its free-born spirit fled."

"Be this," she cried, as she winged her flight,
"My welcome gift at the gates of light.
Though foul are the drops that oft distil
On the field of warfare blood like this,
For liberty shed, so holy is,
It would not stain the purest rill
That sparkles among the bowers of bliss.
Oh, if there be on this earthly sphere
A boon, an offering heaven holds dear,
'Tis the last libation Liberty draws
From the heart that bleeds and breaks in her cause."

Then from the death of young Fisher let us learn anew the lesson so well expressed by the poet, who says:

Honor and shame from no condition rise;
Act well your part, there all the honor lies.

[Loud applause from both sides of the House.]

ORDER OF BUSINESS.

Mr. TOWNSEND. Mr. Speaker, I ask unanimous consent to address the House for three minutes.

The SPEAKER. The gentleman from New Jersey asks unanimous consent to address the House for three minutes. Is there objection?

Mr. FERRIS. Mr. Speaker, reserving the right to object, there are so many bills on the calendar I can not sit here—I will not object to the gentleman's request, but I will to any more.

The SPEAKER. Is there objection to the gentleman from New Jersey [Mr. TOWNSEND] addressing the House for three minutes?

Mr. KINDEL. Mr. Speaker, I object unless I am granted the same privilege.

The SPEAKER. The Chair can not guarantee——

Mr. TOWNSEND. Mr. Speaker, I withdraw my request.

The SPEAKER. This is Unanimous Consent Calendar day, and the Clerk will report the first bill.

TERMS OF COURT AT STEUBENVILLE, OHIO.

The first business on the Calendar for Unanimous Consent was the bill (H. R. 5849) to amend section 100 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The Clerk read as follows:

Be it enacted, etc., That section 100 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, be, and the same is hereby, amended so as to read as follows:

"SEC. 100. The State of Ohio is divided into two judicial districts, to be known as the northern and southern districts of Ohio. The northern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Ashland, Ashtabula, Cuyahoga, Carroll, Columbiana, Crawford, Geauga, Holmes, Lake, Lorain, Medina, Mahoning, Portage, Richland, Summit, Stark, Tuscarawas, Trumbull, and Wayne, which shall constitute the eastern division; also the territory embraced on the date last mentioned in the counties of Auglaize, Allen, Defiance, Erie, Fulton, Henry, Hancock, Hardin, Huron, Lucas, Mercer, Marion, Ottawa, Paulding, Putnam, Seneca, Sandusky, Van Wert, Williams, Wood, and Wyandot, which shall constitute the western division of said district. Terms of the district court for the eastern division shall be held at Cleveland on the first Tuesdays in February, April, and October, and at Youngstown on the first Tuesday after the first Monday in March; and for the western division, at Toledo on the last Tuesdays in April and October. Grand and petit jurors summoned for service at a term of court to be held at Cleveland may, if in the opinion of the court the public convenience so requires, be directed to serve also at the term then being held or authorized to be held at Youngstown. Crimes and offenses committed in the eastern division shall be cognizable at the terms held at Cleveland or at Youngstown, as the court may direct. Any suit brought in the eastern division may, in the discretion of the court, be tried at the term held at Youngstown. The southern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Adams, Brown, Butler, Champaign, Clark, Clermont, Clinton, Darke, Greene, Hamilton, Highland, Lawrence, Miami, Montgomery, Preble, Scioto, Shelby, and Warren, which shall constitute the western division; also the territory embraced on the date last mentioned in the counties of Athens, Belmont, Coshocton, Delaware, Fairfield, Fayette, Franklin, Gallia, Guernsey, Harrison, Hocking, Jackson, Jefferson, Knox, Licking, Logan, Madison, Meigs, Monroe, Morgan, Morrow, Muskingum, Noble, Perry, Pickaway, Pike, Ross, Union, Vinton, and Washington, which shall constitute the eastern division of said district. Terms of the district court for the western division shall be held at Cincinnati on the first Tuesdays in February, April, and October; and for the eastern division at Columbus on the first Tuesdays in June and December, and at Steubenville on the first Tuesdays of March and October: *Provided*, That suitable rooms and accommodations for holding court at Steubenville shall be furnished free of expense to the Government until the completion of the Federal building: *And provided further*, That terms of the district court for the southern district shall be held at Dayton on the first Mondays in May and November. Prosecutions for crimes and offenses committed in any part of said district shall also be cognizable at the terms held at Dayton. All suits which may be brought within the southern district, or either division thereof, may be instituted, tried, and determined at the terms held at Dayton."

The SPEAKER. Is there objection?

Mr. POST. Mr. Speaker, I ask that that bill be passed over.

The SPEAKER. The gentleman from Ohio [Mr. POST] asks that this bill be passed over without prejudice. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, what is the object of passing it over?

Mr. POST. I want to investigate it myself.

Mr. MADDEN. It has been passed over three times already.

Mr. MANN. I understand it has been passed over several times——

Mr. MADDEN. It has been passed over three times. I have looked up some of the records of the trials in some of these places now where they hold court and I think in one case, Dayton, they have not tried over 25 cases in five years.

Mr. POST. That is my information——

Mr. MADDEN. And there is no sense in starting another place and creating an expense. I suggest it ought to be objected to, and I object to it.

The SPEAKER. Will the gentleman from Illinois [Mr. MADDEN] give his attention to the Chair for a moment?

Mr. MADDEN. Yes, sir.

The SPEAKER. Is the gentleman objecting to it being passed over——

Mr. MADDEN. I object to the bill.

The SPEAKER. To the consideration of the bill?

Mr. MADDEN. Yes, sir.

The SPEAKER. It will be stricken from the calendar. The Clerk will report the next bill.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed without amendment bill of the following title:

H. R. 5993. An act authorizing the city of Montrose, Colo., to purchase certain public lands for public-park purposes.

The message also announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 5445. An act for the relief of Gordon W. Nelson;

S. 1086. An act for erecting a suitable memorial to John Ericsson; and

S. J. Res. 95. Joint resolution providing for method of improving channels giving access to military reservations or fortifications.

MEDAWAKANTON AND WAHPAKOOTA SIOUX INDIANS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11246) for the restoration of annuities to the Medawakanton and Wahpakoota (Santee) Sioux Indians, declared forfeited by the act of February 16, 1863.

The Clerk read as follows:

Be it enacted, etc., That jurisdiction be, and hereby is, conferred upon the Court of Claims to hear, determine, and render final judgment for any balance that may be found due the Medawakanton and Wahpakoota Bands of Sioux Indians, otherwise known as Santee Sioux Indians, with right of appeal as in other cases for any annuities that may be ascertained to be due to the said bands of Indians under and by virtue of the treaties between said bands and the United States, dated September 29, 1837 (7 Stat. L., p. 538), and August 5, 1851 (10 Stat. L., p. 954), as if the act of forfeiture of the annuities of said bands approved February 16, 1863, had not been passed: *Provided*, That the court in rendering judgment shall ascertain and include therein the amount of accrued annuities under the treaty of September 29, 1837, up to the date of rendition of judgment, and shall determine and include the present value of the same, not including interest, and the capital sum of said annuity, which shall be in lieu of said perpetual annuity granted in said treaty; and to ascertain and set off against any amount found due under said treaties all moneys paid to said Indians or expended for their benefit by the Government of the United States since the treaties were abrogated by the act of 1863: *Provided*, That the treaty of 1868 shall not be a bar to recovery, but all equities and benefits received thereunder by the Santee Sioux Indians may, in the discretion of the court, be taken into consideration in the determination of the amount of recovery. Upon the rendition of such judgment and in conformity therewith the Secretary of the Interior is hereby directed to ascertain and determine which of said Indians now living took part in said outbreak, and to prepare a roll of the persons entitled to share in said judgment by placing thereon the names of all living members of said bands residing in the United States at the time of the passage of this act, excluding therefrom only the names of those found to have personally participated in the outbreak; and he is directed to distribute the proceeds of such judgment, except as hereinafter provided, per capita, to the persons borne on the said roll.

Proceedings shall be commenced by petition verified by one of the attorneys who have been heretofore employed by said bands of Indians to prosecute their claims under this act under a contract which has been approved by the Commissioner of Indian Affairs and the Secretary of the Interior as provided by law, upon information and belief as to the existence of the facts stated in said petition, and no other verification shall be necessary. Upon final determination of the cause the Court of Claims shall decree such fees as the court shall find to be reasonable upon a quantum meruit for services performed or to be performed, to be paid to the attorney or attorneys so employed by the said band of Indians and their associates, and the same shall be paid out of the balance found to be due said bands of Indians when an appropriation therefor shall have been made by Congress: *Provided*, That in no case shall the fees decreed by the court amount in the aggregate to more than 5 per cent of the amount of the judgment recovered, and in no event shall the aggregate amount exceed $25,000: *Provided further*, That the court shall by its decree distribute such fees equitably between the attorneys who have been employed by said bands of Indians in said cause.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, when this bill was last under consideration I asked the gentleman from Nebraska [Mr. STEPHENS] to let the bill be passed over until to-day so that I might have further opportunity to examine into the facts. Since that time I have obtained a decision of the Court of Claims in a somewhat similar case that related to another tribe, the Sisseton and Wapeton Band. I find that the Court of Claims, under an act similar in content to the one now under consideration, had rendered judgment to that tribe.

Though the amount here involved is considerable, running up into the hundreds of thousands, I really believe that if Congress in times past has followed one course of action to one tribe who were in revolt in the insurrection of New Ulm, Minn., with which these tribes were also connected, that these tribes should also receive similar treatment. But I would like to inquire of the gentleman as to what amendments he proposes to the bill now before the House.

Mr. STEPHENS of Nebraska. Mr. Speaker, I would suggest an amendment, on line 15, page 2, by striking out the words "for their benefit" and inserting instead "on their account."

Mr. STAFFORD. I have that memorandum now in my bill, recalling that the gentleman at a prior meeting made that suggestion, and in that particular I would like to ask the gentleman what is the purpose of it and what will be covered by the amendment?

Mr. STEPHENS of Nebraska. Well, I do not think that the amendment will make much difference. It seemed that other gentlemen who had objected to the language there thought that this language would cover the subject more effectively.

Mr. STAFFORD. In that connection I direct the attention of the gentleman to the report as found on page 5, the third paragraph from the end, where we find this language:

Attention is invited to Senate report No. 5689, setting forth the reasons of the Senate committee why no payment under the treaty of 1868 should be charged against the forfeited annuities which it is now proposed to restore.

I would like to have the opinion of the gentleman whether in this bill the Government is going to be credited for the annuities that have been paid to these bands under the treaty of 1868, which that report states should not be binding on these Santees.

Mr. STEPHENS of Nebraska. In lines 20 and 21, page 2, I have suggested the amendment by striking out "may, in the discretion of the court," and inserting in lieu thereof the word "shall."

That would make it impossible for these Indians to escape having charged to them by the court the amount paid them under the treaty of 1868. My own opinion is that the amounts paid to them under the treaty of 1868 were for another and specific purpose, namely, the policing of the frontier, in assisting the Government to protect its right of way while it was building the Union Pacific Railway. But other gentlemen think these amounts ought to be charged against the Indians, so I have consented to this amendment.

Mr. STAFFORD. So under the amendment as suggested credit will be given the Government for the annuities paid under the later treaty of 1868?

Mr. STEPHENS of Nebraska. Absolutely. In other words, every dollar that these Indians have received from the Government for any purpose whatever is now to be charged against them as an offset against the obligation that the Government owes these Indians for land that the Government purchased from them, and which obligation was abrogated by the act of Congress in 1863.

Mr. STAFFORD. Does the gentleman believe that the first amendment suggested is broader in its effect than the one now carried in the language in the bill?

Mr. STEPHENS of Nebraska. I think it is, although I am in doubt as to that.

Mr. STAFFORD. At least, the purpose is to make it broader?

Mr. STEPHENS of Nebraska. Yes.

Mr. STAFFORD. What other amendment has the gentleman proposed to the bill, if any?

Mr. STEPHENS of Nebraska. On page 3, line 20, the word "band" is amended to read "bands." It is just a typographical amendment.

Mr. STAFFORD. Are those all the amendments?

Mr. STEPHENS of Nebraska. Those are all the amendments.

Mr. STAFFORD. I would like to have the gentleman explain why the committee did not follow the recommendation of the department, so far as the provision relating to the attorneys is concerned, and striking out, in line 10, page 3, "one of the attorneys who have been heretofore employed by said bands," as recommended by the Indian Office?

Mr. STEPHENS of Nebraska. The object of that was to permit the attorneys who have had this bill in charge for so many years to prosecute the case for the Indians in the Court of Claims. I do not know who the attorneys are. It is a matter of no importance whatever to me whether that provision be left in the bill or not. The judgment of the committee was that these men, who have spent several years in handling this case, ought not to be barred from completing it. It was my recommendation.

Mr. MANN. Will the gentleman yield?

Mr. STEPHENS of Nebraska. I will.

Mr. MANN. Is not the real object of that to prevent, if this bill becomes a law, the Indians being harassed by a whole lot of attorneys, good, bad, and indifferent, who seek to get the job?

Mr. STEPHENS of Nebraska. That is another good reason for this provision.

Mr. STAFFORD. I have been informed, I will say to the gentleman, though this bill has passed the House on prior occasions, it has met opposition somewhere, because of limit of fees enacted in the bill as it passed the House that might be recovered by attorneys. We have here a favorable restriction for the protection of the Government and the Indians by limiting it to 5 per cent of the whole amount that may be recovered, and in no event to exceed $25,000. I have been informed, how reliably

I can not say, through the influence of some persons this bill failed of passage. I wish to say that the attorneys who have heretofore been employed ought not to be displaced. They have certainly prior rights that should be given consideration. But what assurance has the House if we pass this bill with this safeguard as to attorneys' fees, and it should be insisted on, that it will be carried ultimately in case the other body should disagree to it? I see the chairman of the committee before us. I would like to have some expression from him as to whether he believes that it will be insisted upon by the House conferees if this limitation on attorneys' fees should be changed in another body?

Mr. STEPHENS of Texas. We shall certainly take care of the Indians in the proper way, and I think the language is sufficient to provide for its being done in that way. If the gentleman will read line 12 of page 3 he will notice that these attorneys must have had a contract, and that it must have been approved by the Commissioner of Indian Affairs.

Mr. STAFFORD. I am directing my attention to the limit on the amount that may be recovered—5 per cent on the total amount and $25,000 in any event.

Mr. STEPHENS of Texas. I can assure the gentleman we will certainly follow the law.

Mr. STAFFORD. This is not the law. I am trying to obtain from the gentleman an expression of his views in case that would not be deemed equitable in another body and if it would be insisted upon when it goes to conference.

Mr. MANN. Let us ask the plain question: Suppose the Senate should strike out the limitation of 5 per cent and the $25,000 attorneys' fees and return the bill to the House with that provision eliminated. I would like to ask my friend from Nebraska [Mr. STEPHENS] what his position on that amendment would be in the House if the bill came back in that situation?

Mr. STEPHENS of Nebraska. Personally, I will say to the gentleman, I have no concern as to the size of the fees for the service rendered, and if I could secure the passage of the bill as it stands now I would most certainly do so, but it might possibly be necessary to make concession to the Senate conferees in order to come to an agreement.

Mr. MANN. The gentleman did not understand my question. Suppose the House should be willing to pass the bill with the limitation that it now contains as to attorneys' fees, being not to exceed 5 per cent and not to exceed $25,000, and then the attorneys who are interested should, through proper representations, suggest to the Senate that that limitation be stricken out of the bill and the bill should come back with that amendment, what would be the gentleman's position in reference to that amendment?

Mr. STEPHENS of Nebraska. My position would be to insist upon the bill as it stands.

Mr. BURKE of South Dakota. Mr. Speaker, I would like to ask the gentleman from Nebraska if he thinks there is any likelihood of the conferees that would be named by the House on the bill consenting to any report on the bill unless there was a limitation as to attorneys' fees?

Mr. STEPHENS of Nebraska. I do not think so.

Mr. MANN. I feel quite confident that they would not, unless the gentleman from Nebraska [Mr. STEPHENS] should urge the conferees to, and he has given us the assurance that he will not so urge them.

The SPEAKER. Is there objection?

Mr. STAFFORD. I withdraw my reservation.

The SPEAKER. The gentleman from Wisconsin withdraws the reservation of the right to object. This bill is on the Union Calendar.

Mr. STEPHENS of Nebraska. Mr. Speaker, I ask unanimous consent to consider this bill in the House as in Committee of the Whole House on the state of the Union.

The SPEAKER. The gentleman from Nebraska [Mr. STEPHENS] asks unanimous consent to consider this bill in the House as in Committee of the Whole House on the state of the Union. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read the bill for amendment.

Mr. MANN. The bill has already been read, Mr. Speaker.

The SPEAKER. Has any gentleman any amendment to offer?

Mr. STEPHENS of Nebraska. I sent the amendments to the desk, Mr. Speaker, and I ask that the Clerk read them.

The SPEAKER. The Clerk will report the amendments.

The Clerk read as follows:

Amend, page 1, line 15, after the word "expended," by striking out the words "for their benefit."

The SPEAKER. The question is on agreeing to the amendment.

Mr. STAFFORD. I believe there should be inserted the words "on their account."

The CLERK. And insert in lieu thereof the words "on their account."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Page 2, line 20, after the word "Indians," strike out the words "may, in the discretion of the court," and insert in lieu thereof "shall."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will report the next one.

The Clerk read as follows:

Page 3, line 20, after the word "said," insert the letter "s" in the word "band."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. STEPHENS of Texas, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER. The Clerk will report the next bill.

AMENDMENT OF ACT MAKING APPROPRIATION FOR RIVERS AND HARBORS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 14331) to amend section 19 of an act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, approved March 3, 1899.

The Clerk read as follows:

Be it enacted, etc., That section 19 of the act approved March 3, 1899, entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," be, and the same is hereby, amended so as to read as follows:

"SEC. 19. That whenever the navigation of any river, lake, harbor, sound, bay, canal, or other navigable waters of the United States shall be obstructed or endangered by any sunken vessel, boat, water craft, raft, logs, merchantable timber, or other similar obstruction, and such obstruction has existed for a longer period than 30 days, or whenever the abandonment of such obstruction can be legally established in a less space of time, the sunken vessel, boat, water craft, raft, logs, merchantable timber, or other obstruction shall be subject to be broken up, removed, sold, or otherwise disposed of by the Secretary of War, at his discretion, without liability for any damage to the owners of the same: *Provided*, That in his discretion the Secretary of War may cause reasonable notice of such obstruction of not less than 30 days, unless the legal abandonment of the obstruction can be established in a less time, to be given by publication, addressed 'To whom it may concern,' in a newspaper published nearest to the locality of the obstruction requiring the removal thereof: *And provided also*, That the Secretary of War may, in his discretion, at or after the time of giving such notice, cause sealed proposals to be solicited by public advertisement, giving reasonable notice, of not less than 10 days, for the removal of such obstruction as soon as possible after the expiration of the above specified 30 days' notice, in case it has not in the meantime been so removed, these proposals and contracts, at his discretion, to be conditioned that such vessel, boat, water craft, raft, logs, merchantable timber, or other obstruction, and all cargo and property contained therein, shall become the property of the contractor, and the contract shall be awarded to the bidder making the proposition most advantageous to the United States: *Provided*, That such bidder shall give satisfactory security to execute the work: *Provided further*, That any money received from the sale of any such wreck, or from any contractor for the removal of wrecks, under this paragraph shall be covered into the Treasury of the United States."

The SPEAKER. Is there objection?

Mr. MOORE. Mr. Speaker, I reserve the right to object. I wish the gentleman from Louisiana would let this bill go over.

Mr. WATKINS. If the gentleman requests it, I will do so, although, in deference to the Committee on Rivers and Harbors, I have deferred action upon it for nearly two months. I will let it go over if the gentleman requests it.

Mr. MOORE. Has the gentleman conferred with the Committee on Rivers and Harbors concerning this bill?

Mr. WATKINS. I have had frequent conferences with the chairman of the committee, and he looked favorably upon the bill. He wanted a report from the Chief of Engineers. I have a report from the Chief of Engineers, as well as from the Board of Engineers, approving the passage of this measure—not after the bill was filed, but before the bill was filed. That is the basis on which the bill was filed.

Mr. MOORE. The gentleman understands this involves the jurisdiction of committees—Rivers and Harbors and Revision of the Laws?

Mr. WATKINS. I am willing to try that out now, if the gentleman wants to raise that question.

Mr. MANN. Neither one of these committees has jurisdiction.

Mr. WATKINS. If the gentleman wants to raise that question, I am willing to dispose of it now.

Mr. MOORE. If neither of those committees has jurisdiction, I am going to raise objection to the consideration of the bill.

Mr. WATKINS. Then I will agree to let it go over. I am anxious to have it thoroughly investigated.

Mr. MOORE. I have no objection to its going over.

Mr. WATKINS. I ask unanimous consent, Mr. Speaker, that this bill be passed over without prejudice.

The SPEAKER. The gentleman from Louisiana [Mr. WATKINS] asks unanimous consent that the bill may be passed over without prejudice. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the next bill.

NEW ORLEANS, BATON ROUGE & VICKSBURG RAILROAD CO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 5890) for the relief of settlers within the limits of the grant of the New Orleans, Baton Rouge & Vicksburg Railroad Co.

The Clerk read the title of the bill.

The SPEAKER. Does the gentleman from Louisiana [Mr. ASWELL], who introduced this bill, desire to have the original bill read, or the substitute?

Mr. FERRIS. Mr. Speaker, I reported this bill. I ask unanimous consent that the substitute be read in lieu of the original bill.

Mr. STAFFORD. Has unanimous consent to consider the bill been granted yet?

The SPEAKER. It has not.

Mr. FERRIS. The original bill has been stricken out and a substitute reported by the committee.

The SPEAKER. Is there objection to this substitute being read instead of the original bill?

There was no objection.

The Clerk read the substitute.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. TOWNSEND. Mr. Speaker, I object.

The SPEAKER. The gentleman from New Jersey [Mr. TOWNSEND] objects, and the bill will be stricken from the calendar.

Mr. FERRIS. Will the gentleman allow the bill to remain on the calendar?

Mr. TOWNSEND. No; I will not.

Mr. ASWELL. I ask the gentleman to allow the bill to remain on the calendar.

The SPEAKER. What does the gentleman say?

Mr. TOWNSEND. I have said all I want to.

The SPEAKER. The gentleman objects. The bill will be stricken from the calendar, and the Clerk will report the next bill.

IMMIGRATION STATION AT BALTIMORE, MD.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11625) to increase the appropriation for the erection of an immigration station at Baltimore, Md.

The Clerk read the title of the bill.

Mr. FOSTER. Mr. Speaker, reserving the right to object——

Mr. LINTHICUM. Mr. Speaker, I ask unanimous consent that this bill be passed without prejudice.

The SPEAKER. The gentleman asks unanimous consent to pass this bill without prejudice. Is there objection?

Mr. MANN. Reserving the right to object, what is the purpose of that?

Mr. FOSTER. I will say to my colleague that I have been looking into this matter a little, and I desire to have it go over.

The SPEAKER. Is there objection to the request that the bill be passed without prejudice?

There was no objection.

HEIRS OF DECEASED INDIANS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10834) to amend an act entitled "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes," approved June 25, 1910 (36 Stats. L., p. 855).

The bill was read, as follows:

Be it enacted, etc., That section 7 of the act entitled "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes," approved on the 25th day of June, 1910 (36 Stat. L., p. 855), be, and the same is hereby, amended to read as follows:

"SEC. 7. That the mature living and dead and down timber on unallotted lands of any Indian reservation may be sold, under regulations to be prescribed by the Secretary of the Interior; and the proceeds from such sales shall be used for the benefit of the Indians of the reservation in such manner as he may direct: *Provided*, That this section shall not apply to the Menominee Indian Reservation, Wis.

With the following committee amendment:

Amend the bill by striking out all after the word "be," in line 6, page 2, down to and including the word "direct," in line 8, and inserting in lieu thereof the following: "deposited in the Treasury of the United States to the credit of the Indians owning the timber."

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. MANN. Mr. Speaker, reserving the right to object, may I ask the gentleman from Minnesota [Mr. STEENERSON] what his intention is with reference to this bill?

Mr. STEENERSON. It is my intention to offer an amendment to the bill.

Mr. MANN. Has that amendment been agreed to by the committee?

Mr. STEENERSON. The committee have not had a meeting. They have not had a quorum.

Mr. STEPHENS of Texas. I think the bill has not been before the full committee.

Mr. MANN. If that is the case, I will object.

The SPEAKER. The gentleman from Illinois objects. The bill will be stricken from the calendar.

Mr. STEPHENS of Texas. I hope the gentleman will withhold his objection.

Mr. MANN. I will reserve the objection.

Mr. STEPHENS of Texas. I hope the gentleman from Minnesota [Mr. STEENERSON] will withdraw his amendment and permit this bill to pass as recommended by the department, with a committee amendment.

Mr. MANN. That is what I thought the position of the gentleman was, and I object.

The SPEAKER. Does the gentleman from Illinois object?

Mr. MANN. I object.

Mr. STEENERSON. Will the gentleman reserve his objection for a moment?

Mr. MANN. I am perfectly willing to do that.

Mr. STEPHENS of Texas. Will the gentleman permit it to be passed over without prejudice?

Mr. MANN. I object to that, but I will reserve the objection for a moment.

Mr. STEPHENS of Texas. I hope the gentleman will withdraw his amendment.

Mr. STEENERSON. The amendment is not pending. I simply stated for the benefit of the House that I would offer an amendment which is contained in a bill that I introduced on the subject, and which simply limits the authority of the department as to the sale of timber on one reservation in Minnesota. That is the Red Lake Reservation. It simply fixes a minimum price, so that the timber can not be sold for less than that, and provides certain regulations which I thought were proper.

The SPEAKER. The gentleman from Minnesota is speaking about an amendment that he intends to offer?

Mr. STEENERSON. An amendment that I intended to offer, but I will say to the chairman of the Committee on Indian Affairs and to the gentleman from Illinois that the amendment has not been considered by the committee. If the bill is taken up for consideration, I am willing to offer the amendment or to withhold it, just as may be desired. I would like to have the bill considered, and I hope there will be no objection to it.

Mr. STEPHENS of Texas. Will the gentleman permit me to ask him a question?

Mr. STEENERSON. I will.

Mr. STEPHENS of Texas. I desire to ask both the gentleman from Illinois and the gentleman from Minnesota, if we should strike out the words "Menominee Indians" and say "any Indians within the State of Wisconsin," would that satisfy the gentlemen?

Mr. STEENERSON. I understand the gentleman from Wisconsin [Mr. FREAR] proposes to except Wisconsin from the bill.

Mr. STEPHENS of Texas. Would that be satisfactory to the gentleman?

Mr. FREAR. As far as Wisconsin is concerned——

Mr. STEENERSON. I was going to leave Wisconsin out of the bill, so that it would apply to Minnesota.

Mr. MANN. I do not know of anybody either from Wisconsin or Minnesota who is in favor of this bill. What is the use of considering the proposition by unanimous consent?

Mr. STEENERSON. I am in favor of the bill, but I would prefer it with my amendment.

Mr. STEPHENS of Texas. I will say that recently a joint committee of the two Houses investigated this measure in Washington and also in New Mexico. They found that there is on these reservations a great deal of timber that is dead and down and timber that is mature. When forest fires sweep over these mountains, as they do very often, millions of dollars' worth of timber is destroyed.

Mr. MANN. We have the authority now to sell it.

Mr. STEPHENS of Texas. This authorizes the department to make such rules and regulations as may be prescribed for marketing this timber.

Mr. MANN. They already have the authority to sell that timber.

Mr. STEPHENS of Texas. The committee restricts that in this way: They desire to have the right to sell this timber and take the proceeds and use it among the Indians. We object to that and want it to go into the United States Treasury to the credit of the Indians.

Mr. MANN. That is existing law.

Mr. STEPHENS of Texas. No; the existing law is that on all the reservations except those in Minnesota and Wisconsin the proceeds from the sale of timber, burnt timber, goes into the hands of the commissioner, to use as he deems proper.

Mr. STAFFORD. Mr. Speaker, I was informed by my colleague [Mr. LENROOT] that there is a hearing going on now before some committee in relation to this matter.

Mr. STEPHENS of Texas. I think that is a Senate committee.

Mr. STAFFORD. It is not before the gentleman's Committee on Indian Affairs.

Mr. STEPHENS of Texas. No; but before some Senate committee.

Mr. STAFFORD. The gentleman from Wisconsin [Mr. LENROOT] is not favorable to this bill, as far as Wisconsin is concerned, and wishes to have Wisconsin specially exempted.

Mr. STEPHENS of Texas. Does the gentleman desire to have the bill passed over without prejudice so that the Committee on Indian Affairs can take it up and consider it?

Mr. MANN. The committee can take it up and consider it at any time.

Mr. STEPHENS of Texas. If it is stricken from the docket, there would be no chance to pass it in this session, for the gentleman knows that we have a buffer in the way.

Mr. MANN. The gentleman from Texas can restore it to the Unanimous Consent Calendar, and if the committee can get it in shape so that there will be a semblance of protection to the Indians it may go through. But everybody familiar with the situation knows that if this bill should become a law they would sell a lot of this timber for a song, and while a song is worth something it is not valuable to the Indian.

Mr. STEPHENS of Texas. Will the gentleman from Illinois tell me how he would go to work to put this timber on the market if he did not do it through the Indian Bureau?

Mr. STEENERSON. They have a right now to sell the dead and down timber, but now they want to sell the green timber as well.

Mr. MANN. Taking the state of the market, this is not a good time in which to sell Indian timber.

Mr. STEENERSON. As I understand it, the necessity for this legislation is that under the existing law, so far as Minnesota and Wisconsin are concerned, the department only has authority to sell the dead and down timber. On all other reservations the department has the right to sell green live timber as well as dead and down. So Minnesota and Wisconsin are the only exceptions to the general rule. The reason why the department asks for this change is that in the Red Lake Reservation there is a large quantity of timber that is dead and down by reason of forest fires. They further say that they can not cut and can not sell that timber because it can not be cut without cutting green timber. They offered it for sale a year ago and could get no offers, because the condition was that they must take out the dead and down without touching any green timber, and that was impracticable. That timber is going to waste, and the Indians are losing probably from one to two hundred thousand dollars by reason of the inaction of Congress. Although it may be contended that it is for the protection of the Indians that they are objecting to this, I do not look at it in that light. I believe I would be willing to risk passing the bill in the form proposed by the department rather than have it postponed another year, on account of the loss that is sure to result from inaction. I should prefer to have the bureau limited, as I have stated heretofore.

Mr. MANN. The gentleman offers an amendment putting a minimum limit on the price at which the timber shall be sold?

Mr. STEENERSON. Yes.

Mr. MANN. Does the gentleman think that the timber ought to be sold for a price less than the minimum?

Mr. STEENERSON. No.

Mr. MANN. What is the objection to the committee putting in a minimum limit?

Mr. STEPHENS of Texas. Because there are many reservations remote from the railroads or navigable streams.

Mr. MANN. Oh, no; it only applies to the Red Lake, and all the timber there is near the water. Here it is proposed to have the department sell this timber without a limited minimum price, and everybody knows that if they sell it it will be sold for far less than it would have been a few years ago or will be in a few years hence. It will be giving away the Indians' timber, and I am not willing to be a party to it by unanimous-consent agreement.

The SPEAKER. Is there objection?

Mr. MANN. I object.

The SPEAKER. The gentleman from Illinois objects, and the bill will be stricken from the calendar.

SETTLERS ON THE GRANT TO NEW ORLEANS, BATON ROUGE & VICKSBURG RAILWAY CO.

Mr. ASWELL. Mr. Speaker, the gentleman from New Jersey [Mr. TOWNSEND] objected to the consideration of the bill H. R. 5890. He now states that he misunderstood the object of the bill and was laboring under a false impression. I ask that the bill be restored to the calendar.

The SPEAKER. What is the number of the bill?

Mr. ASWELL. It is the bill H. R. 5890, relating to the relief of settlers within the limits of the grant to the New Orleans, Baton Rouge & Vicksburg Railway Co.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

Mr. MANN. Reserving the right to object, the gentleman has the right to place it again on the calendar. It has never gone off before.

Mr. ASWELL. But I would like to have it restored to its original place.

Mr. MANN. I am not going to object to the bill.

Mr. ASWELL. Let me explain. The gentleman from New Jersey misunderstood the bill. He said he did not know anything about it, and he objected for another reason, and now he says he would like to see it restored.

Mr. MANN. I am not opposing the bill. The gentleman can place it on the calendar again.

Mr. ASWELL. But it will be so far down on the calendar that it will not stand a chance of being considered.

Mr. MANN. The gentleman, having lost his advantage, is seeking by unanimous consent to get advantage over some one else.

Mr. ASWELL. No; and the bill lost its place through mistake.

The SPEAKER. The gentleman from Illinois objects.

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 7951. An act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and acts supplementary thereto, and the United States Department of Agriculture.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 5031. An act quieting the title to lot 44 in square 172 in the city of Washington.

AUTHORIZING SHOSHONE INDIANS TO BRING SUIT IN COURT OF CLAIMS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 14869) authorizing the Shoshone Tribe of Indians residing on the Wind River Reservation in Wyoming to submit claims to the Court of Claims.

The Clerk read as follows:

Be it enacted, etc., That all claims of whatsoever nature, both legal and equitable, which the Shoshone Tribe of Indians, residing on the Wind River Reservation in Wyoming, may have, or claim to have, against the United States under the treaty between the United States and said Shoshone Tribe ratified February 26, 1869, or under any other laws or treaties, may be submitted to the Court of Claims, with the right of appeal to the Supreme Court of the United States by either party, for determination of the rights of said Shoshone Tribe in and to said reservation, and the proceeds and profits therefrom; and for determination of the amounts, if any, of the funds of said Shoshone Tribe which have been wrongfully paid by the United States to the Arapahoe Tribe of Indians residing on said reservation; and for determination of the amounts, if any, due to said Shoshone Tribe from the United States for

their being deprived of the use and occupancy of said reservation; and for determination of the amounts, if any, due to said Shoshone Tribe from the United States for portions of said reservation, if any, which have been appropriated by the United States for said Arapahoe Tribe, or individual members thereof; and jurisdiction is hereby conferred upon the Court of Claims to hear and determine all legal and equitable claims, if any, of said Shoshone Tribe against the United States arising out of said treaty, and also any legal or equitable defense, set-off, or counterclaim which the United States may have against said Shoshone Tribe, and to enter judgment, and, in determining the amount of judgment to be entered herein, the court shall deduct from any sums found due said Shoshone Indians any and all gratuities paid said Shoshone Indians, or individual members thereof, subsequent to 1877. The Court of Claims shall advance said cause upon the docket for hearing, and shall have authority to determine and adjudge the rights, both legal and equitable, of said Shoshone Tribe arising out of said treaty, and all rights and equities of the United States in the premises, notwithstanding lapse of time or statutes of limitation; and the final judgment and satisfaction thereof shall be a full settlement of all claims of said Shoshone Tribe against the United States. Such cause shall be commenced within one year after the passage of this act, and in such cause the said Shoshone Tribe shall be party plaintiff and the United States shall be party defendant; and the petition setting forth the cause of said Shoshone Tribe shall be verified by the attorneys employed by said Shoshone Tribe to prosecute their claims under this act under contract approved by the Secretary of the Interior and the Commissioner of Indian Affairs, as provided by law, upon information and belief as to the facts alleged therein, and no other verification to said petition shall be necessary. The Attorney General of the United States is hereby directed to appear in said cause in behalf of the United States. Upon the final determination of said cause, the Court of Claims shall decree such fees as the court shall find reasonable to be paid to the attorneys employed by said Shoshone Tribe, and the same shall be paid out of any sum or sums found due to said Shoshone Tribe, or out of any sum or sums which may be placed to the credit of said Shoshone Tribe as a result of said cause: *Provided*, That in no case shall the fees decreed by said court be in excess of the amount stipulated in the approved contract, nor amount to more than 10 per centum of the amount and value of the judgment recovered in said cause: *Provided further*, That all sums of money which may be found to be due and recovered for the Shoshone Tribe of Indians under the provisions of this act, less attorneys' fees, shall be deposited to the credit of said Indians in the Treasury of the United States, which sum shall thereafter draw interest at 3 per cent per annum.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I understood the gentleman was going to endeavor to get some information as to how much was involved in this bill.

Mr. LOBECK. Well, it is impossible to get reliable information, for the court will determine, and no one can tell what that will be; but there is to be deducted for gratuities to the Shoshones amounting to $464,000 and for cost of irrigation plants costing $561,000, so that there is a total of $1,025,000, which would be deducted from the final claim.

Mr. MANN. How many acres are there involved here, or rather how many millions of acres?

Mr. LOBECK. There are 600,000 acres in the reservation. I said the other day Arapahoes had been allotted 75,000 acres, but the Arapahoes have been allotted about 100,000 acres.

Mr. MANN. There are 600,000 acres in the entire tract, in the tract referred to here as being in controversy, and a portion of that is irrigated land worth $75 to $100 an acre?

Mr. LOBECK. No, sir.

Mr. MANN. What is it worth?

Mr. LOBECK. Well, I can not tell what it is worth, but over a million dollars will be deducted from what improvements have been made on that portion. The irrigated lands of the tract that are subject to irrigation are something in the neighborhood of 100,000 acres situated in the eastern or in the lower part of this tract, and the rest is timberland and mountain land and grazing land that the tribes of the Arapahoes and Shoshones have used together during these years.

Mr. MANN. I do not now recall whether this bill provides for fixing the value of this land at the time it was turned over to the Arapahoes, or whether it fixes it at the time the suit is determined.

Mr. LOBECK. If it be determined at the time the land was taken over by the Arapahoes back in 1877, then there would be no balance; if the court should deduct the amount that has been expended and gratuities, why, they would have no money at all, because that land had no particular cash value at that time.

Mr. MANN. The claim is that some land was given the Arapahoes that belonged to the Shoshones.

Mr. LOBECK. Yes.

Mr. MANN. In the meanwhile we pay the Shoshones more than the land was worth at the time it was taken.

Mr. LOBECK. The Arapahoes got the full benefit of that.

Mr. MANN. And in the course of time we make the land very valuable by our modern system of irrigation, and then the Shoshones come along and want us to pay them the present value of the land, which we have made valuable by a system of irrigation which they would not have done in a million years.

Mr. MONDELL. Will the gentleman from Nebraska allow me?

Mr. LOBECK. Certainly.

Mr. MONDELL. The statement made by the gentleman from Illinois——

Mr. MANN. I put a question only.

Mr. MONDELL. Very well; the question is not an accurate statement of the situation.

Mr. MANN. It was very likely not. Give us one.

Mr. MONDELL. There were more than a million acres of land in the reservation—I think approximately a million and a quarter acres.

Mr. MANN. The gentleman from Nebraska just stated it was 600,000 acres. I do not know——

Mr. MONDELL. The gentleman from Nebraska evidently meant the ceded land. There was approximately a million and a quarter acres in the Shoshone Reservation in Wyoming, a reservation granted to and claimed to be the property of the Shoshone Tribe.

The Arapaho Tribe was placed on this reservation. They have since occupied it as though they were joint owners. Approximately 100,000 acres of the entire area have been allotted to the Arapahoes, so that the claim of the Shoshones under this bill would be for the value of the land which the Arapahoes have taken. Now, with regard to the improvements upon that land, it should be remembered that we are improving these lands; we are building irrigation ditches from appropriations reimbursable from the fund to be derived from the sale of the ceded portion of the reservation. In making up the amount that would be due the Shoshones it would be the original cost or value of the land which the Arapahoes now occupy.

Mr. LOBECK. Very true.

Mr. MONDELL. Added to that what has been taken from the common fund to improve the Arapahoes' land, so that it would not be a question of the value of those lands after irrigation, but as to what the lands were worth originally which the Arapahoes took and then how much of the joint funds have been used for the improvement of those lands. If the court shall hold that the Shoshones have a good case, the court would of course hold that the joint fund was not in fact a joint fund but the Shoshones' fund, and therefore the funds taken from them for improvement of the Arapahoes' land, the court would probably say should be paid back. My understanding is it costs approximately $15 an acre to irrigate those lands. Not all of the 100,000 acres have been irrigated; probably not over 50,000 have been completely irrigated. Those lands have been irrigated from appropriations ostensibly coming out of the Shoshones' funds, but in fact coming out of the Treasury until such time as we shall secure moneys for the reimbursement of those appropriations from the sale of the ceded lands. I think that is as accurate a statement as could be made of what the finding of the court would be, assuming that the court should find that the reservation belongs to the Shoshones and that the Arapahoes are not entitled to share. We would have to pay first for the land, and, secondly, for whatever has been paid from the Shoshone funds for the irrigation of those lands.

Mr. MANN. They would have to pay—whom does the gentleman mean?

Mr. MONDELL. I said we would have to pay.

Mr. MANN. Who would have to pay this?

Mr. MONDELL. The Government would pay for it.

Mr. MANN. That is another proposition.

Mr. STAFFORD. The Arapahoes have no fund at all, I understand.

Mr. MONDELL. The Government would pay, to be entirely accurate. If this reservation is the property of the Shoshones, then the Government would be required to pay whatever the court held the lands which have been allotted to the Arapahoes were worth and whatever sums have been used from the joint fund for the improvement of those lands.

Mr. MANN. The gentleman says, "the lands were worth." Where does the gentleman get any authority for the statement that it will not be the value which the lands "are" worth?

Mr. MONDELL. Well, it could not in the nature of things, in the language of the act, be the value that the lands after irrigation are worth, because the only claim the Shoshones could have would be, first, that some of their land was taken, and, second, that some of their funds have been used for the purpose of improving the value of those lands.

Mr. MANN. Do not the Shoshones claim that they own this land?

Mr. MONDELL. Yes, sir.

Mr. MANN. If a man owns property, why, certainly he would be entitled to the value of it.

Mr. MONDELL. He is entitled to the value of it at the time it was taken from him and whatever else is added to it out of this fund.

Mr. MANN. Here is the claim that the Shoshones have, that they own this land which the Government put the Arapaho Indians on, and they want the value of the land now, as stated by the gentleman from Nebraska [Mr. LOBECK].

Mr. MONDELL. If the gentleman wants to put it that way, I will say to him that these lands are selling, lands that are called "dead Indian lands"—heirship lands—these lands are selling, I am told, with their water rights, the few small tracts that are being sold, anywhere from $20 to $30 an acre.

Mr. MANN. Well, that would be $2,500,000, although my opinion is that they are worth $50 an acre.

Mr. MONDELL. I think they are actually worth that much.

Mr. LOBECK. They are worth about $24 an acre, so I am informed.

Mr. MANN. I think the gentleman should be informed on a question of this kind when it is intended to give the Indians not their legal rights, but their supposed equitable rights. I am willing to give the Indians any time their legal rights.

Mr. MONDELL. Will the gentleman let the bill go over in order that further information can be obtained?

Mr. MANN. I will allow the bill to go over by objecting to further consideration. Has it not gone off the calendar before?

Mr. LOBECK. It was passed without prejudice a week ago.

Mr. MANN. Then I object. It can go back on the calendar.

The SPEAKER. The gentleman from Illinois [Mr. MANN] objects.

LANDS IN SIERRA NATIONAL FOREST, CAL.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13770) to consolidate certain forest lands in the Sierra National Forest, Cal.

The bill was read as follows:

Be it enacted, etc., That for the purpose of preserving scenic features and consolidating certain forest lands belonging to the United States within the Sierra National Forest and the Yosemite National Park, Cal., the Secretary of the Interior be, and he hereby is, authorized and empowered, upon the recommendation of the National Forest Reservation Commission created by act of March 1, 1911 (36 Stats., p. 961), acting upon the advice and recommendation of the Secretary of Agriculture, and after the approval by the Attorney General of the United States of the titles to lands to be acquired, to exchange lands belonging to the United States which are a part of the Sierra National Forest for privately owned timberlands of approximately equal value lying within the boundaries of said Sierra National Forest and the said Yosemite National Park: *Provided*, That upon the consummation of an exchange hereunder the lands acquired by the United States within the boundaries of the Sierra Forest shall become a part of that national forest and that within the boundaries of the Yosemite National Park shall become a part of that park.

Also the following committee amendments were read:

Page 1, after the word "empowered," in line 7, strike out the following language: "Upon the recommendation of the National Forest Reservation Commission, created by act of March 1, 1911 (36 Stat., 961), acting upon the advice and recommendation of the Secretary of Agriculture, and after the approval by the Attorney General of the United States of the titles to lands to be acquired, to exchange lands belonging to the United States which are," and insert "upon the recommendation of the Secretary of Agriculture, and after obtaining and accepting for the Government of the United States of America a valid title to the land to be acquired, which title shall be approved by said Secretary of the Interior, to exchange lands belonging to the United States which are."

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent to consider the bill in the House as in the Committee of the Whole.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to consider the bill in the House as in the Committee of the Whole. Is there objection? [After a pause.] The Chair hears none.

Mr. MANN. Mr. Speaker, the Clerk did not finish reporting the amendment.

The SPEAKER. The Clerk will finish the reporting of the committee amendments.

The Clerk read as follows:

Page 2, line 18, after the word "park" insert the following: "*Provided further*, That only the following privately owned lands in the Sierra National Forest may be acquired by the United States under the exchange: N. ½ SE. ¼ and SE. ¼ SE. ¼, sec. 34, SW. ¼ SW. ¼, sec. 35, and all of sec. 36, T. 4 S., R. 20 E., M. D. M.; E. ½ NE. ¼ and S. ½ SW. ¼ sec. 32, W. ½ NW. ¼ sec. 33, T. 4 S., R. 21 E., M. D. M.; SE. ¼ sec. 1, SE. ¼ SE. ¼ (lot 16) sec. 11, lots 3 and 4, SW. ¼ NW. ¼, SW. ¼ and SE. ¼ sec. 12, lots 2, 5, 6, and 7, sec. 13, T. 5 S., R. 20 E., M. D. M.; lots 2 and 6, sec. 5, portion NW. ¼ NW. ¼ south of traverse, SW. ¼ NW. ¼ portion SE. ¼ NW. ¼ west of traverse, NE. ¼ SW. ¼, SE. ¼ SW. ¼, and that portion of the SE. ¼ west of the traverse, sec. 8, portion of NW. ¼ NE. ¼ west of traverse, SW. ¼ NE. ¼, portion of SE. ¼ NE. ¼ west of traverse, and portion of E. ½ SE. ¼ west of traverse, sec. 17, portion of NE. ¼ NE. ¼ west of traverse, and portion of E. ½ SE. ¼ west of traverse, sec. 20, T. 5 S., R. 21 E., M. D. M.; and that only the NE. ¼ sec. 36, T. 4 S., R. 21 E., M. D. M., in the Yosemite National Park may be acquired by the United States under the exchange; and that only the following lands may be given in exchange by the United States: W. ½ lot 9, and W. ½ SW. ¼ sec. 3; portion of lots 4 and 5 north of traverse, sec. 5; portions of lots 1, 2, 3, and 5, south of traverse; portion of lot 6 east of traverse; lots 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, and portions of lot 20 north of traverse, sec. 6; portion of the N. ½ NE. ¼ south of traverse line, sec. 7; N. ½ NE. ¼, SW. ¼ NE. ¼ and N. ½ NW. ¼ sec. 10; SW. ¼ NW. ¼ and NW. ¼ SW. ¼ sec. 11; SW. ¼ NE. ¼ and SE. ¼ NW. ¼ sec. 13; portion of SW. ¼ NE. ¼ east of traverse, sec. 20, T. 5 S., R. 21 E., M. D. M.; SW. ¼ SW. ¼ sec. 9, NE. ¼ NE. ¼ (lot 1) sec. 17, lot 5, sec. 18, SW. ¼ SW. ¼ and SE. ¼ SW. ¼ sec. 19, SW. ¼ NW. ¼ sec. 28, NW. ¼ NE. ¼ sec. 29, SW. ¼ NE. ¼, NE. ¼ NW. ¼, SW. ¼ NW. ¼, SE. ¼ NW. ¼, lot 1, NE. ¼ SW. ¼, NW. ¼ SW. ¼, SE. ¼ SW. ¼, W. ½ SE. ¼, and SE. ¼ SE. ¼ sec. 30, T. 5 S., R. 22 E., M. D. M.; NE. ¼ SE. ¼ and S. ½ SE. ¼ sec. 2; N. ½ NE. ¼, sec. 11, NW. ¼ NE. ¼, S. ½ NE. ¼, and NW. ¼ sec. 12, T. 6 S., R. 21 E., M. D. M.; NE. ¼ NW. ¼ and S. ½ NW. ¼, sec. 7, T. 6 S., R. 22 E., M. D. M."

Mr. MANN. Mr. Speaker, I wanted to ask the gentleman whether he is assured about the description of the property in this bill? I notice the report does not describe the property. Does the gentleman have a statement from the Department of Agriculture that this is the accurate description of the property involved?

Mr. FERRIS. Mr. Speaker, the gentleman from California [Mr. CHURCH], of the Committee on Public Lands, was designated by the committee to go down and ask them to procure that exact data. He came back with a written report, a written statement, from them, giving us these figures. Since that time they have sent us another notation which shows there is a discrepancy in a word or two, and I am going to ask that that be added. It will embody then precisely the figures they gave us as to the land we are to receive and the amount we are to give away.

Mr. MANN. The only reason I ask is, of course, it is manifestly impossible for Congress itself to know the proper description or purpose except by a report through the department.

Mr. FERRIS. That is very true.

Mr. MANN. They are the ones that ought to be held responsible if there is an error. If they have said this is a description, it is satisfactory to me.

Mr. FERRIS. They have; and we have gotten every one of the figures from them. Now, Mr. Speaker, I send this amendment to the desk, embodying a supplemental report from the department which shows the change to be made. This is an amendment to the committee amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, line 19, page 3, by adding after the word "traverse" the words "portion southeast quarter northeast quarter west of traverse."

Also:

Amend, line 7, page 4, by changing the word "north" to read "south."

The SPEAKER. The question is on agreeing to the amendments.

The amendments to the amendment were agreed to.

The SPEAKER. The question is on the committee amendments.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read a third time, and passed.

On motion of Mr. FERRIS, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE.

Mr. SLAYDEN, by unanimous consent, was granted leave of absence, indefinitely, on account of important business.

INTERNATIONAL CONGRESS OF AMERICANISTS.

The next business on the Calendar for Unanimous Consent was the resolution (H. J. Res. 109) authorizing the President to extend invitations to foreign Governments to participate in the International Congress of Americanists.

The Clerk read as follows:

Resolved, etc., That the President be, and he is hereby, authorized to extend invitations to foreign Governments to be represented by delegates at the Nineteenth International Congress of Americanists, to be held at the city of Washington in September of the year 1914: *Provided*, That no appropriation shall be granted for expenses of delegates, or for other expenses incurred in connection with the said conference.

With a committee amendment, as follows:

In line 6, strike out the word "September" and insert the word "October" in lieu thereof.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, I wish the gentleman from Maryland [Mr. LINTHICUM] would make a brief statement about this, and the necessity for it, and the reason why we should invite people here and then refuse to pay the bills.

Mr. LINTHICUM. We do not refuse to pay the bills. They do not ask us to pay the bills. They will be paid by the society and by friends of the society.

I want to say to the gentleman from Illinois that in the Senate, when this matter was considered, Senator SMOOT said he would object if we should agree to pay any of the bills. Now, when we get it over here the gentleman from Illinois thinks

we ought to pay the bills. The fact is, the society has arranged to pay all the expenses of these delegates, and the Government will not be called upon to pay one cent, and there will not be any feeling about the matter, either. These gentlemen will be treated properly, without expense to the Government.

Mr. MANN. Well, who will pay the expenses?

Mr. LINTHICUM. The society has agreed to pay the bills. The delegates are to be invited to various places. The gentleman from Wisconsin [Mr. KONOP] will explain that.

Mr. MANN. The gentleman will probably remember the unfortunate experience we had in connection with an international congress which met at Buffalo, where it was insisted that the Government would not pay the bills, and then a new Member came in and even had the President to send up a message, stating that we ought to pay the bills, notwithstanding the agreement not to pay.

Mr. KONOP. Dr. Ales Hrdlička, the secretary of the society, has informed me that the organization and friends and members of the society have subscribed funds, and there will be no expense whatever to the Government.

Mr. MANN. Then what good will it do to pass the resolution?

Mr. KONOP. I understand a law has been passed forbidding the President to invite delegates to international congresses to be held in this country without authority of law.

Mr. MANN. What is the object of having the President in the invitation say——

Mr. KONOP. It seems that the delegates to all these congresses have been invited heretofore by the Governments of the countries in which they are held, and I have letters here and extracts from letters from eminent foreigners stating that it is absolutely necessary that they be invited officially by the Government.

Mr. WILLIS. Mr. Speaker, will the gentleman yield to me for a suggestion?

Mr. KONOP. Yes.

Mr. WILLIS. I understand from the report here that—

> The expenses of the Washington session will be defrayed entirely by the scientific men who are charged with the organization of this session from their membership payments and from such voluntary contributions of our friends as we may be able to secure.

Who are these "we"?

Mr. KONOP. I do not know. I am not a member of that organization.

Mr. WILLIS. This is the committee report. The committee will have to pay the expense, as I understand from that language.

Mr. LINTHICUM. No. The committee never pays any bills. [Laughter.] The gentleman knows that. I want to say that the reason why we have to ask the President to invite the delegates here is stated in a letter from President Franz Heger, director of the National Museum at Vienna, saying that it will be absolutely impossible for him to come unless the invitation is extended by the United States Government.

Mr. WILLIS. Will the gentleman state whether in the meetings heretofore the expenses have been borne by the Government?

Mr. KONOP. No. All the expense was borne by the scientific men and the men interested in scientific research. The last one was held in London in 1912.

Mr. MANN. Does the gentleman know how many conventions or congresses are going to be held in San Francisco in the year 1915?

Mr. KONOP. I do not know. I am told that 241 congresses have been invited to meet there.

These people are first to go to Philadelphia and then to the western part of the country to investigate the early history of man in North America, especially the Pueblo Indians, and to make scientific investigations.

Mr. MANN. This matter is largely under the control of the Smithsonian?

Mr. KONOP. Yes.

The SPEAKER. Is there objection?

Mr. GOULDEN. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from Maryland a few questions. Can the gentleman tell me what this body is? It is said to be an international congress of "Americanists." That term "Americanists" is a very broad term. What does the congress stand for?

Mr. LINTHICUM. It is a body of gentlemen who are making a study of archæology and anthropology in the United States. Their work grows largely out of the discoveries in South America made by Humboldt. The society has been in existence about 25 or 30 years and is the outgrowth of the American Society of France organized in 1857. The last international convention was held in London without any expense to the Parliament of Great Britain. The next two are to be held in America, one to be held this year in Washington at the National Museum and then the next one is to be held in La Paz, the capital of Bolivia, in 1916. This society has to do with the study of man and his history and work, especially the Indian races.

Mr. GOULDEN. I can see no objections to this resolution.

The SPEAKER. Is there objection?

There was no objection.

Mr. LINTHICUM. Mr. Speaker, I ask that the Committee on Foreign Affairs be discharged from the further consideration of Senate joint resolution 97, and that that resolution be considered instead of House resolution before us.

The SPEAKER. Is the Senate resolution on the calendar?

Mr. LINTHICUM. No. It is before the committee.

Mr. MANN. It is theoretically before the committee. The papers are here.

Mr. LINTHICUM. The papers are on the Speaker's desk.

Mr. KONOP. The papers are on the desk, Mr. Speaker.

The SPEAKER. The gentleman from Maryland [Mr. LINTHICUM] moves that the Committee on Foreign Affairs be discharged from the further consideration of Senate joint resolution 97. Is there objection?

There was no objection.

Mr. MANN. And that the resolution be considered in the House in lieu of the House resolution.

The SPEAKER. And that the Senate resolution be considered in the House in lieu of the House joint resolution 109. Is there objection?

There was no objection.

Mr. MANN. We should have it read, Mr. Speaker.

The SPEAKER. The Clerk will read.

The Clerk read as follows:

Joint resolution (S. J. Res. 97) authorizing the President to extend invitations to foreign Governments to participate in the International Congress of Americanists.

Resolved, etc., That the President be, and he is hereby, authorized to extend invitations to foreign Governments to be represented by delegates at the Nineteenth International Congress of Americanists, to be held at the city of Washington in October of the year 1914: *Provided*, That no appropriation shall be granted for expenses of delegates or for other expenses incurred in connection with the said conference.

The SPEAKER. The question is on the third reading of the Senate joint resolution.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

Mr. MANN. House joint resolution 109 should be laid on the table.

The SPEAKER. Without objection, the House joint resolution 109, of the same tenor, will lie on the table.

There was no objection.

On motion of Mr. LINTHICUM, a motion to reconsider the vote whereby the Senate joint resolution was passed was laid on the table.

POST OFFICE AND COURTHOUSE, PENSACOLA, FLA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12291) to increase the limit of cost for the extension, remodeling, and improvement of the Pensacola (Fla.) post office and courthouse, and for other purposes.

The bill was read, as follows:

Be it enacted, etc., That the act entitled "An act making appropriations for necessary civil expenses of the Government for the fiscal year ending June 30, and for other purposes," approved August 24, 1912, be, and the same is hereby, amended, so as to increase the limit of cost for the extension, remodeling, and improvement of the Pensacola (Fla.) post office and courthouse in the sum of $30,000, or so much thereof as may be necessary to complete said extension, remodeling, and improvement.

With the following committee amendment:

Page 1, line 3, after the word "act," strike out the words:

"Strike from lines 3, 4, 5, and 6 the words 'making appropriations for necessary civil expenses of the Government for the fiscal year ending June 30, and for other purposes, approved August 24, 1912,' and insert in lieu thereof the words 'to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes, approved June 25, 1910.'"

The SPEAKER. Is there objection?

Mr. FOSTER. Mr. Speaker, reserving the right to object, I observe from the letter of the Secretary of the Treasury, printed in the report, that a part of this appropriation is to provide for a sidewalk around the building. Is that true?

Mr. WILSON of Florida. It is.

Mr. FOSTER. Has the gentleman noticed that within the last two or three days there has been a notice issued in which it is said that the Government will not pay assessments for sidewalks around post offices?

Mr. WILSON of Florida. I will say to the gentleman from Illinois that it has been customary heretofore to build sidewalks, although the Supervising Architect says that there is

no justification for such a course. It has been done very frequently heretofore in many places.

Mr. FOSTER. This additional appropriation will provide for a lot of ornaments in and around this building.

Mr. WILSON of Florida. No. I will say to the gentleman that this building is in my home town, and I know all about the conditions. As United States attorney, I was an occupant of this building for several years, and since then I have been an occupant of a building right across the street. When I was at home a few weeks ago I went through this building with the architect in charge, and he pointed out to me many things that an untechnical mind could readily discern to be necessary for the proper completion of this building. For instance, they have closed up the back of the building and closed several windows and doors. There is no appropriation to paint the walls, and they will be blotched and spotted, unless it can be done by an additional appropriation. In addition to that the woodwork in the post office has been moved back several feet, making the lobby larger, leaving 3 or 4 feet of unfinished flooring work. That makes another botch which they can not proceed to cure unless they get this appropriation.

In addition to that the city of Pensacola has within the last two or three years regraded the streets around this building, and it is anywhere from a foot and a half to 2 feet from the street paving up to the sidewalk. Aside from that, the sidewalk is cracked, worn, and in a very bad condition. Now, there may be one or two items mentioned by the architect in charge that are purely ornamental. For instance, the lights that he mentions may be. Lights of some kind are necessary, and his recommendation is based——

Mr. FOSTER. You mean outside of the building? We are providing lights outside and not inside the building.

Mr. WILSON of Florida. On the Government property.

Mr. FOSTER. These lights are on the street, at the entrance to the building, are they not?

Mr. WILSON of Florida. Right at the entrance. They are in keeping with the lighting system that the city has recently installed. The revolving doors seem to be necessary, because they keep out rain and cold and storm. Now they have only swinging doors, something like those leading into this Hall, and while some items may appear to be ornamental, I will state to the gentleman, though I am not an architect, I know personally that the building will be left in a very unfinished condition unless we make this appropriation, or at least some part of it; and furthermore, in the course of a year or two, I think it will undoubtedly be realized that this work will have to be done, necessitating the tearing up of the building again to some extent. At this time all the officers have vacated this building and are using rented buildings in several parts of the city. This is an old building. It was placed there some time in the eighties. The original appropriation of $100,000 must, we think, be supplemented by this amendment for $30,000 more in order to put the building in proper condition. In fact, I know that it will be uncompleted unless we give this or the greater part of it.

Mr. FOSTER. I will say to the gentleman that I think some of these items are really necessary and ought to be allowed; but, on the other hand, I think there are a lot of these things that are simply put in there as an additional expense; that are not for the good of the building or for the convenience of the public or the men who occupy the building.

Mr. WILSON of Florida. Is the gentleman in a position to suggest the amount which he thinks this appropriation ought to be reduced on account of that?

Mr. FOSTER. No. I will say to the gentleman that I could not tell how much that would be; but I want to call attention to the fact that, in my judgment, we ought not to be allowing for the extension of public buildings and paying a lot of these expenses that are unnecessary. I do not propose to object to this, but I think these matters ought not to be put in these public-building bills, providing for ornaments, which, in my opinion, simply make an expense to the Government.

Mr. MADDEN. Will the gentleman yield?

Mr. WILSON of Florida. Yes.

Mr. MADDEN. I understood the gentleman from Florida to say—although I may not have understood him properly—that part of this money will be expended for street improvement.

Mr. WILSON of Florida. Oh, no; for sidewalk approaches around the building—not on the street at all.

Mr. MADDEN. Not on the street?

Mr. WILSON of Florida. Oh, no. The street is thoroughly paved and lighted by the city.

Mr. ADAIR. Will the gentleman yield to me?

Mr. WILSON of Florida. Certainly.

Mr. ADAIR. I should like to ask a question for information. There is no law, is there, that provides that the Government shall pay any part of the cost of street improvement in front or on the side or rear of Government property?

Mr. WILSON of Florida. I think not, and we do not ask that the street be improved.

Mr. ADAIR. I understand that. I am just asking for information. Is it the practice and policy of the Government to pay for sidewalks in front of Federal buildings?

Mr. WILSON of Florida. I understand it has been the practice to do so, but there is some question about the right to do so. But I will say to the gentleman from Indiana that the city of Pensacola will not build a sidewalk around this building. The sidewalk is 6 or 8 feet in width and, as I stated a moment ago, the old sidewalk is absolutely worn out. I think it was put there before I was born.

Mr. ADAIR. I will say to the gentleman that I think the Government ought to pay for a sidewalk around a Federal post-office building.

Mr. WILSON of Florida. So do I.

Mr. ADAIR. There is no reason, there is no justice, and there is no sense in compelling a city to pay for such an improvement to Federal property, and the Government ought to pay for it.

Mr. FOSTER. It has never been the policy to do that.

Mr. ADAIR. It is a bad policy not to do it.

Mr. FOSTER. No; it is not; and there is no law for it.

Mr. ADAIR. The gentleman can not assign a single good reason why it should not be done.

Mr. FOSTER. It has been refused by the department.

Mr. ADAIR. For what reason?

Mr. FOSTER. It is not the law.

Mr. ADAIR. I understand that there is no law for it; but there should be a law compelling the Government to build sidewalks around and in front of its own property.

Mr. FOSTER. As I say, there is no law for it and ought not to be, so that assessments could be made against the Government.

Mr. ADAIR. Then the Government ought not to build a Federal building.

Mr. FOSTER. I think perhaps the gentleman may be right about that in some instances.

Mr. WILSON of Florida. Mr. Speaker, Pensacola is not a village; it is a town with thirty-odd thousand inhabitants; a very progressive town. Recently the city has built many miles of sidewalks and paved streets. This public building at Pensacola, which was put up in 1887 or 1888, is far inferior to several other buildings in that city. Indeed, right across the street is a 10-story bank building which cost very much more than the Federal building.

Mr. ADAIR. Does not the gentleman think that the Government, where it builds a public building, ought to be able to spend enough to put a sidewalk around it?

Mr. WILSON of Florida. Yes.

Mr. FALCONER. Will the gentleman yield?

Mr. WILSON of Florida. I do.

Mr. FALCONER. I want to ask the gentleman where the estimate was made for the additional cost of this building?

Mr. WILSON of Florida. In the Supervising Architect's Office in Washington.

Mr. FALCONER. The original estimate; but how about the estimate for the extra work? How does the gentleman get another estimate to increase the cost so as to provide for this building in the Supervising Architect's Office when there are 40 or 50 buildings where money has been appropriated for from three to five years, and where it is impossible to get an estimate of the cost of the buildings, resulting in holding them up all over the country?

Mr. WILSON of Florida. Did the gentleman ever build a house and find before he finished that he had not money enough; that there were more things needed than he thought for when he started out?

Mr. FOSTER. As I understand, this is to pay for the original enlargement.

Mr. WILSON of Florida. It is an emergency case.

Mr. FOSTER. After they got along this far they found that there were a lot of improvements that they could not put in. I will say to the gentleman from Washington that I have looked into this matter and that I think some of these things ought to be put in. It is an original enlargement from an appropriation some time ago, but when they got to this point they found that they had not enough money to put in these needed improvements.

Mr. FALCONER. I am not joining the gentleman from Illinois in his apparent enjoyment of deviling a new Member while getting his bill through.

Mr. FOSTER. No; I would not do that; but I saw some things in it that I thought ought not to be there.

Mr. FALCONER. What I wish to emphasize is that in many cities—cities in my own State, for instance—having had an appropriation for some years to build a public building, the buildings have been held up on the statement of the Supervising Architect that he could not get money enough to expend in the architect's office for clerical services so as to advance the building of these buildings. It occurred to me in the discussion of this question to ask how the gentleman found that he needed exactly $30,000 in order to do this work. Was the estimate made in the Supervising Architect's Office; and if so, where did the Supervising Architect get the money to do the work?

Mr. WILSON of Florida. We have not the money yet; we are after the money now.

Mr. FALCONER. Do you spend money without getting an estimate?

Mr. WILSON of Florida. No; the estimate was made by the architect's office.

Mr. FALCONER. Was there enough money provided originally by the architect to make this estimate?

Mr. FOSTER. They though there was; but in repairing an old building they found some things that were required that they are not able to do with the original allowance.

Mr. FALCONER. I am not talking about the appropriation for the building. I am talking about necessary money to provide service in the Supervising Architect's Office.

Mr. MADDEN. The gentleman from Wisconsin wants to know how the Supervising Architect got enough money to make an estimate for these additional repairs.

Mr. FALCONER. Yes. It is the architect's expenses that I am after.

Mr. WILSON of Florida. I can answer that; because, in the course of the improvements which were authorized in 1910, the architect had his man on the ground, and he is now there and has been there several months.

Mr. FALCONER. Then it has cost no extra money or expense in the Supervising Architect's Office?

Mr. WILSON of Florida. None at all.

Mr. FALCONER. Very well; that question could have been answered five minutes ago.

Mr. WILSON of Florida. I did not understand what the gentleman from Washington wanted to know.

The SPEAKER. Is there objection to the consideration of the bill?

There was no objection.

Mr. WILSON of Florida. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. ADAIR. Mr. Speaker, I move to strike out the figures "$30,000," on line 5, page 2, and insert in lieu thereof "$31,000."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 5, strike out "$30,000" and insert in lieu thereof "$31,000."

Mr. ADAIR. Mr. Speaker, just a word. I offer this amendment in order that the Government may be able to construct a sidewalk around this property owned by the Government. I know it is not the law. I have been in a number of cities in this country where they have Federal buildings, and have seen sidewalks around those buildings that are a disgrace to the city and a disgrace to the Government, and I can see no reason why the Government should expend money in erecting a Federal building in which the post-office business of a city is to be transacted and not be permitted to build a sidewalk around it in keeping with the building itself. For that reason I offer this amendment.

Mr. FOSTER. Mr. Speaker, the gentleman from Indiana [Mr. ADAIR] offers this amendment for the purpose of building a sidewalk around this building; but I want to say there is provision made in this bill for the very purpose for which the gentleman offers his amendment.

Mr. ADAIR. If the gentleman will permit, where is it?

Mr. FOSTER. That is the statement in the report of the Secretary of the Treasury.

Mr. ADAIR. I did not so understand the gentleman from Florida.

Mr. MADDEN. The Government does build sidewalks around a building, but does not pave the streets.

Mr. ADAIR. I will say to the gentleman from Illinois that I did not understand the item of sidewalks was included in this estimate.

Mr. FOSTER. Yes.

Mr. ADAIR. Mr. Speaker, in view of the statement that has been made by my good friend from Illinois [Mr. FOSTER], in whom I have the greatest confidence, I withdraw my amendment.

The SPEAKER. The gentleman withdraws his amendment.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. WILSON of Florida, a motion to reconsider the vote by which the bill was passed was laid on the table.

TO VALIDATE CHAPTERS 52 AND 54 OF THE ACTS OF THE ALASKA LEGISLATURE.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11740) to cure defects in and to validate chapters 52 and 54 of the acts of the Legislature of the Territory of Alaska, approved by the governor of the Territory of Alaska May 1, 1913, and for other purposes.

The Clerk read as follows:

Be it enacted, etc., That those two acts of the Legislature of the Territory of Alaska entitled "Chapter 52 (H. B. No. 96), an act to establish a system of taxation, create revenue, and providing for the collection thereof for the Territory of Alaska, and for other purposes," approved by the governor of the Territory of Alaska May 1, 1913, and "Chapter No. 54 (H. B. No. 98), an act to impose a poll tax upon male persons in the Territory of Alaska and provide means for its collection," approved by the governor of Alaska May 1, 1913, be, and each is hereby, ratified and made valid from the date of its respective approval by the governor of the Territory of Alaska, and all their provisions shall be held to be in full force and effect from and after the date of the approval of this act by the President.

SEC. 2. That nothing in that act of Congress entitled "An act creating a legislative assembly in the Territory of Alaska and conferring legislative power thereon, and for other purposes," approved August 24, 1912, shall be so construed as to prevent the courts now existing or that may be hereafter created in said Territory from enforcing within their respective jurisdictions all laws passed by the legislature within the power conferred upon it the same as if such laws were passed by Congress, nor to prevent the legislature passing laws imposing additional duties, not inconsistent with the present duties of their respective offices, upon the governor, marshals, deputy marshals, clerks of the district courts, and United States commissioners acting as justices of the peace, judges of probate courts, recorders, and coroners, and providing the necessary expenses of performing such duties, and in the prosecuting of all crimes denounced by Territorial laws the costs shall be paid the same as is now or may hereafter be provided by act of Congress providing for the prosecution of criminal offenses in said Territory, except that in prosecutions growing out of any revenue law passed by the legislature the costs shall be paid as in civil actions and such prosecutions shall be in the name of the Territory.

The committee amendments were read, as follows:

Page 1, strike out, beginning with line 3, down to and including line 8, page 2.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I know the Delegate from Alaska would like to be heard on this very briefly.

Mr. WICKERSHAM. I refer the gentleman to the chairman of the committee.

Mr. HOUSTON. Mr. Speaker, the bill as before the House upon the report of the committee is embraced in section 2 of the bill, as the amendment proposes to strike out section 1 and substitute section 2 after the enacting clause, and the only thing to be considered is section No. 2, as the balance is to be stricken out if this amendment be agreed to. Now, the object of this section No. 2 is to provide that the Territorial Government of Alaska shall proceed with the collection of taxes of the Territory without any hindrance or delay. It so happens that the Territorial government of Alaska, in chapters 52 and 54 imposes certain duties upon the Federal officers, clerks, in the Federal court, and marshals in the Federal court in reference to the collection of the taxes of the Territory. Now, then, there is a provision in the organic law of Alaska which provides that:

No person holding a commission or appointment under the United States shall be a member of the legislature or shall hold any office under the government of said Territory.

Now, by virtue of that inhibition in the organic law it has been held by the Attorney General of the United States and by the governor of Alaska that it is unlawful for these Federal officers, clerks, and marshals to perform these functions. This merely proposes to cure that defect.

Mr. MANN. The gentleman says that the Territorial laws provide for the collection of taxes by the United States officials. What taxes are collected by the United States officials under the Territorial law?

Mr. WICKERSHAM. Will the gentleman allow me to answer that question——

Mr. HOUSTON. I yield to the Delegate to answer that question.

Mr. MANN. I can answer it myself. The gentleman said "taxes," and I wondered if the gentleman simply meant poll taxes. There is a difference between the collection of taxes and the collection of poll taxes.

Mr. HOUSTON. Well, poll taxes might be used in the plural, I think.

Mr. MANN. Certainly; but still you might be misled in this, unless the gentleman says it does not mean the collection of Territorial taxes, because it does not seem to be in the report. Ordinary taxes under this report are not collected by United States officials at all, but the report says that the commissioner of each precinct is made ex officio poll-tax collector. What do you mean by "each precinct"?

Mr. WICKERSHAM. There is in each precinct a commissioner appointed by the judge of the court who performs the duty of recorder and justice of the peace, probate judge, and coroner—a sort of Pooh-Bah, performing all these functions under the United States statutes.

Mr. MANN. What is a precinct?

Mr. WICKERSHAM. A precinct is a portion of the country bounded by such line as the judge of the court fixes, and in which he appoints one of these commissioners with the power of justice of the peace, recorder, probate judge, and coroner.

Mr. MANN. This has nothing to do with what we call a precinct here?

Mr. WICKERSHAM. No; not an election precinct; nothing at all of that sort.

Mr. MANN. He appoints a United States commissioner or a fish commissioner. Which is it?

Mr. WICKERSHAM. No; he is called a commissioner.

Mr. MANN. This report refers to him in one place as a commissioner and in the next place as a fish commissioner, and I wondered which he was.

Mr. WICKERSHAM. It refers in one place to a commissioner and in another place to a fish commissioner. The fish commissioner is the United States Fish Commissioner or one of his deputies. This is the situation with respect to the duties to be performed there: The Government of the United States now levies a license tax upon certain business in the Territory of Alaska, and it levies a license tax upon those engaged in fishing. A license tax is levied upon certain grades of salmon to be canned. Now, the Territory of Alaska has also passed a similar bill levying a license tax upon the canneries, and in drawing that bill the legislature left the duty of collecting the tax upon the collector of the court who collects the license taxes for the Government of the United States. It would not add a cent of expense. It is the same official, the same sort of a duty, and but one tax is to be collected by him of a specific amount, for the Government, and the other for the Territory.

Mr. MANN. I was under the impression that when we passed the Territorial act Congress reserved the control over the fishery business.

Mr. WICKERSHAM. That is correct.

Mr. MANN. Then how can the Legislature of Alaska pass a special tax against it?

Mr. WICKERSHAM. In the bill the gentleman from Illinois will see, if he will examine it, you gave the legislature specific authority to levy additional license taxes, and that is all. In the performance of that limited duty the intention of the legislature is to have the same official collect the taxes for the Territory and for the United States.

Mr. MADDEN. The license tax which the legislature levies is a tax upon the canneries and not on the fisheries?

Mr. WICKERSHAM. That is right.

Mr. WILLIS. I understand the purpose of this bill is to validate certain acts of the Territorial legislature which has undertaken to impose duties upon certain officials of the United States. Is that correct?

Mr. WICKERSHAM. Yes. That was the original purpose. But in the meantime it was thought this general clause would have that effect, and so the validating clause in the bill was stricken out by the committee.

Mr. WILLIS. Then I want to invite the attention of the gentleman to the language beginning on line 18 and following on page 2, and ask his opinion as to whether or not that would not be a pretty large extension of power. It says:

> That nothing in this act of Congress shall be so construed as to prevent the legislature passing laws imposing additional duties not inconsistent with the present duties of their respective offices upon the governor, marshal, deputy marshals, clerks of the district courts, and United States commissioners acting as justices of the peace, judges of probate courts, recorders, and coroners—

And so on. Does not the gentleman think it rather dangerous legislation to give to the legislature of a Territory authority to prescribe without limit additional duties to be performed by Federal officials?

Mr. WICKERSHAM. Of course that could only be done within the limit of the power granted to them in the organic act. That act prescribes certain limitations beyond which they can not impose duties upon any official. The point of the situation is this: That we have a system of courts and officials now appointed in the Territory of Alaska by the Government for the performance of these particular duties. If this bill does not pass and the legislature does not have this power, then the legislature would be forced to pass additional laws creating a new system of courts and officials for the purpose of enforcing this and other laws.

Mr. WILLIS. What I am trying to get at, as the gentleman will see, is this proposition, that if you pass this bill, not simply validating acts already passed by the Territorial legislature, but looking to the future, is there not danger that you will clog the machinery of government by giving the legislature authority to place additional duties upon all the United States officers? I am perfectly agreed it is proper to validate the acts already passed, but when you take off the limitation as to the future, except, of course, the limitation in the organic act, it would seem to me somewhat questionable as to whether that is wise.

Mr. WICKERSHAM. I do not think so. I can not view it as the gentleman does. Here are present officials, and the courts are in existence, and such duties as would be imposed upon them by the legislature would be very limited, because the jurisdiction of the legislature is limited.

Mr. MANN. Will the gentleman yield? The gentleman will notice in the bill that these duties, according to the bill, must not be inconsistent with the present duties of these respective officials. And I take it if the legislature should pass a law which would be a burden upon these officials, so it would be inconsistent, they would have permission not to perform those duties.

Mr. WILLIS. We can conceive of a case where additional duties would be required that would be entirely consistent with the duties they are now performing, but which would nevertheless seriously interfere with the proper performance of the present duties of the office. It might be consistent with it, all right, and the same kind of duty, but it might be so great in extent that they could not perform it.

Mr. WICKERSHAM. I think it would be inconsistent with their present duties if they had so many others imposed that they could not perform them.

Mr. WILLIS. If the court would so interpret it, I would be perfectly satisfied.

Mr. MANN. The administrative officers would probably so interpret it, and Congress, possibly.

Mr. WICKERSHAM. I will say that this bill was prepared by the governor of Alaska very carefully, and I think it is all right.

Mr. HOUSTON. There is no better authority to determine what duties would be consistent than the Territorial legislature. They would be less likely to impose any hardships or burdens than any other authority. They are the proper ones to determine that question, it seems to me.

Mr. WILLIS. What suggestion has the gentleman to make in response to the question I propounded to the gentleman from Alaska [Mr. WICKERSHAM]? Here you have a Territorial legislature with authority to go ahead and prescribe duties for its own officers and officers of the United States and Federal courts. Does not the gentleman think it would be unwise and unusual to so legislate?

Mr. HOUSTON. I think it would be safe to leave it to the legislature of the Territory to fix those duties that are not inconsistent with the organic act or controlling them and governing them.

Mr. MANN. I take it none of us would agree to it unless we had the power to change it.

Mr. WILLIS. We have the power to change it, but will we change it? That is the question.

Mr. MANN. I would like to ask the gentleman whether this bill was ever submitted to the Secretary of the Interior or the Attorney General?

Mr. HOUSTON. We have the letter of the Attorney General written in regard to this bill, in which he gives his construction of these acts.

Mr. MANN. If the gentleman refers to the letter quoted in the report, it is a letter written not in regard to this bill at all, but a letter in regard to the Alaskan act, in which he held they were not valid.

Mr. HOUSTON. Well, it was a letter in regard to the very item involved in this section 2 here. That was the subject of that letter.

Mr. MANN. I understand; but the Attorney General has certain control of the Department of Justice officials in Alaska

who are affected by this legislation. The Secretary of the Interior also has certain control of officials. Are we not entitled to any knowledge that they have on this subject?

Mr. HOUSTON. Well, I will just say that this bill was not submitted to the Attorney General by me, but I had conferences with him in regard to the letter which he has written in regard to the subject matter of it, in which he concurred fully in the opinion that it was necessary to have the relief that is proposed to be provided here by this act.

Mr. MANN. The idea was that under the existing law the legislature did not have the authority to impose these duties upon the officials?

Mr. HOUSTON. Yes; and he thought they ought to have that authority.

Mr. MANN. There is nothing in this statement to that effect.

Mr. HOUSTON. We believe that the authority ought to be given.

Mr. MANN. I think it would be wiser for us to be protected by the written opinion of these officials.

Mr. HOUSTON. We felt that that covered the subject matter and it was not necessary to go further. Perhaps it is my fault that I did not get from him a written opinion.

Mr. MANN. How about the Secretary of the Interior?

Mr. WICKERSHAM. He has control of none of the officials mentioned in the bill.

Mr. MANN. None of the officials mentioned in the bill?

Mr. WICKERSHAM. The marshals, the deputy marshals, the clerks of the court, the recorders, and coroners, and everything except the governor are in the Department of Justice.

Mr. MANN. The coroner, and so forth——

Mr. WICKERSHAM. Those are in the Department of the Interior. The commissioners are all.

Mr. MANN. The governor himself is under the control of the Department of the Interior.

Mr. WICKERSHAM. I will say to the gentleman from Illinois that the governor prepared this bill and asked me to introduce it.

Mr. MANN. I understand it. The governor is one thing; the head of the office is another thing. Many an official down below has prepared a bill which has not been examined by his superior officer.

Mr. WICKERSHAM. This one is in the way stated by the gentleman from Tennessee [Mr. HOUSTON].

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER. Without objection, the title will be amended to conform to the text.

There was no objection.

On motion of Mr. HOUSTON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

CONSOLIDATION OF SUNDRY FUNDS FROM UNPAID INDIAN ANNUITIES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10835) to authorize the Secretary of the Treasury to consolidate sundry funds from which unpaid Indian annuities or shares in the tribal trust funds are or may hereafter be due.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to transfer upon the books of the Treasury any unpaid and noninterest-bearing annuity or per capita share or shares of any Indian, whether derived from a gratuity appropriation or from the principal of or the interest on any tribal or trust fund of his tribe from the caption or fund under which the share or annuity accrued and became due and unpaid at any time prior to the passage of this act, or which may hereafter accrue and become due and unpaid, to a common fund known as "Indian moneys, unpaid per capita shares, noninterest," to the credit of the individual Indian entitled thereto, and thereafter such annuity or share shall be paid direct from said common fund without further appropriation therefor by Congress, the amounts so transferred, whether previously covered into the surplus fund or not, being hereby permanently appropriated for that purpose: *Provided*, That no such transfer shall be made except upon the certificate of the Commissioner of Indian Affairs, showing the shares due and unpaid and the names of the Indians entitled thereto, and upon settlement of the account by the Auditor for the Interior Department.

SEC. 2. That the unpaid shares which bear the same rate of interest, payable at the same intervals, of all Indians in the funds above described, may in the same manner as hereinbefore provided be consolidated under such title as may be prescribed by the Secretary of the Treasury, and thereafter payments shall be made from the common funds so created without further appropriation by Congress therefor, the amounts so transferred and the interest thereon being hereby permanently appropriated for that purpose.

SEC. 3. That the consolidation and transfers herein provided for shall not be construed to repeal that part of section 1 of the act approved June 21, 1906 (34 Stat. L., p. 327), making provision for the payment of interest on minors' shares retained in the Treasury.

SEC. 4. That any and all annuities or shares transferred in accordance with the provisions of the foregoing sections, together with any interest which may accrue thereon, shall be paid to the party entitled thereto by settlement of an account and the issuance of a warrant in his favor according to the practice in other cases of authorized and liquidated claims against the United States: *Provided*, That the determination by the Secretary of the Interior of the heirs of any deceased Indian, to whose credit any annuities or shares may have been transferred in accordance with this act, shall be deemed final.

With a committee amendment, as follows:

Amend, page 3, line 15, after the word "final," by inserting the following: "except in cases where the estate of the deceased Indian is being legally probated, and the probate court having jurisdiction is determining, or has determined, the legal heirs of such deceased Indian: *Provided further*, That if any person whose share is transferred to the common fund as herein provided is found subsequently not entitled to the same, such share shall revert to the tribe and shall be transferred to the tribal funds upon the recommendation of the Commissioner of Indian Affairs and certification by the Auditor for the Interior Department."

The SPEAKER pro tempore (Mr. GOLDFOGLE). Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, may I ask the gentleman from Texas a question?

Mr. STEPHENS of Texas. Certainly.

Mr. MANN. In reference to these unpaid noninterest-bearing annuities or per capita shares, I wanted to ask how long unpaid are they, or how long may they be?

Mr. STEPHENS of Texas. It refers to the tribal funds in the Treasury, and subject to be paid out at the discretion and direction of the department at the present time. Now, as I understand it, these funds are in the Treasury to the credit of certain tribes or bands of Indians, and the reason for this legislation——

Mr. MANN. I do not see anything in this bill that refers to that.

Mr. STEPHENS of Texas. And the reason for this legislation, I will say, is stated in a letter from the First Assistant Secretary of the Interior:

In explanation of the necessity for the proposed legislation it may be said that for over 30 years past annuity payments and per capita distributions have been made to various Indian tribes from time to time from funds having more than 100 different titles, and that at each payment some shares are unpaid, owing to the inability of the disbursing officer to locate the Indians, to determine questions of heirship, or for other reasons.

And now it seems no appropriation could be made out of funds to the credit of these tribes for the reason that the department could not do it without some specific act of Congress.

Mr. MANN. Here is money in the Treasury, which the gentleman says belongs to a tribe of Indians, and it has been allotted to be paid to the different Indians, so much per capita. Now you want to transfer that money from one fund to another?

Mr. STEPHENS of Texas. No.

Mr. MANN. That is the purpose of it. That is what it means.

Mr. STEPHENS of Texas. I read further:

As the per capita share of an Indian in any payment may be, and frequently is, made up of two or more funds, some of which bear interest and others of which do not, and as the unpaid shares go back into the Treasury to the credit of the particular fund out of which they accrued, a very complicated system of bookkeeping has become necessary under the present laws in order to keep track of the funds, the amounts due to each Indian, and the reserve which must be kept on hand in the funds with which to meet these unpaid shares.

Mr. MANN. The gentleman is reading from the report. I have read that very carefully myself.

Mr. MADDEN. This bill provides that the money that is not paid to a man that can not be found is to be turned back to his credit on the books of the Treasury instead of into the general fund.

Mr. STEPHENS of Texas. For instance, there are 1,000 Indians, and 300 of them do not apply for annuities and payments. That is set aside for them in a specific fund, whereas the other 700 are paid without any legislation at all. The way it is now, the 300 would have to have their part of that fund thrown back into the general fund, because Congress requires all of these funds, if they are not paid at a certain time, to be put back into the general fund; and it creates confusion as to the keeping of accounts with the Indians. That is the very object of this legislation—to prevent the confusion of accounts.

Mr. MANN. Now, if there is a tribal fund, and it is ordered to be distributed, so much money, say, to each one of the Indians, and some of them do not apply, that money stands there, to be paid to those Indians when they do apply?

Mr. STEPHENS of Texas. That is correct.

Mr. MANN. If it is not paid within a certain time, it goes back into the tribal funds. Is that the gentleman's statement?

Mr. STEPHENS of Texas. It is.

Mr. MANN. Still, these specific Indians are entitled to the money if they show up?

Mr. STEPHENS of Texas. Yes; and if they do not, the money goes back into the general fund.

Mr. MANN. In what respect does that change that feature?

Mr. STEPHENS of Texas. In this: It goes back to the general fund at a certain time.

Mr. MANN. Under this bill it does not go back into this fund at any time. Instead of going back into the general fund and being subject to the call of the Indians, it goes into a lump-sum fund known as Indian moneys, unpaid per capita shares, noninterest.

Mr. STEPHENS of Texas. That is right.

Mr. MANN. To the credit of the particular Indian. That is the case, whichever fund it goes into.

Mr. STEPHENS of Texas. Without this bill it is to be refunded and put back into the general fund. Whenever the Indian fails to receive his amount it goes back into the general fund and has to be reapportioned again. This law would permit the Indians who do not apply to have a separate account—and there may be a hundred of them—and those accounts will be kept under one head.

Mr. MANN. Here is the situation: Here is a certain fund which is due to some Indians. It is apportioned among them, so much per capita.

Mr. STEPHENS of Texas. That is correct.

Mr. MANN. A few of the Indians do not apply. In the course of time the money is put back into the common fund, but still to the credit of these Indians when they do apply.

Mr. STEPHENS of Texas. Yes.

Mr. MANN. Now, the gentleman proposes, instead of putting it back into that fund, that it shall be put into another fund?

Mr. STEPHENS of Texas. No; it remains in the unappropriated fund.

Mr. MANN. Not at all. It is put into another fund, where all Indians of different tribes have their money, put under the head of Indian funds, unpaid per capita shares, noninterest; and when the Indians do apply, you have to look through the books and find where the Indians that apply have some money to their credit in that fund, which covers a great many more Indians than would be the case if you only had to look into the fund as to a particular tribe. What is the bookkeeping advantage of it? I take it that this is largely a matter of bookkeeping.

Mr. STEPHENS of Texas. That is correct; but does not the gentleman understand that they keep separate books for every separate tribe?

Mr. MANN. Yes; but I understand that by this bill, as to money which has been apportioned per capita, they will no longer keep separate books by different tribes.

Mr. STEPHENS of Texas. Yes. It will go back to the general fund.

Mr. MANN. Not at all. It is the purpose of the bill to prevent that.

Mr. STEPHENS of Texas. I beg to differ with the gentleman. It goes back to the specific fund of that tribe. That is the intention.

Mr. MANN. If we are so wide apart on the matter, I hope the gentleman will ask to put it over, so that we may each study the bill and see.

Mr. STEPHENS of Texas. Then I ask that the bill be passed over without prejudice.

The SPEAKER pro tempore. The gentleman from Texas asks unanimous consent that the bill be passed over without prejudice. Is there objection?

There was no objection.

CLAIMS ARISING FROM INDIAN DEPREDATIONS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 22) to amend an act entitled "An act to provide for the adjudication and payment of claims arising from Indian depredations," approved March 3, 1891.

Mr. STEPHENS of Texas. Mr. Speaker, without reading that bill, I ask unanimous consent that it be passed without prejudice.

The SPEAKER pro tempore. The gentleman from Texas asks unanimous consent that this bill be passed without prejudice. Is there objection?

There was no objection.

ALLOTMENT AND DISTRIBUTION OF INDIAN TRIBAL FUNDS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10833) authorizing the Secretary of the Interior to lease for grazing, agricultural, and mining purposes unallotted lands within Indian reservations established by act of Congress or Executive order.

The bill was read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to lease for grazing, agricultural, and mining purposes unallotted lands within Indian reservations established by act of Congress or Executive order in such quantities and upon such terms and conditions and under such regulations as he may prescribe: *Provided*, That no grazing or agricultural lease shall be for a period to exceed 5 years and no mining lease for a period to exceed 10 years.

With committee amendments.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Reserving the right to object, I understand it is expected to adopt the committee amendments?

Mr. STEPHENS of Texas. Yes. The committee amendments ought to be adopted.

Mr. MANN. There might be some question as to just what is meant by "such Indian" in line 10, page 2. Does the gentleman have any objection to adding after the word "Indian" the words "as hereinbefore in this act described"?

Mr. STEPHENS of Texas. None whatever. I think it would improve the bill.

Mr. MANN. Then there would be no question about it. I do not object to the consideration of the bill.

Mr. STEPHENS of Texas. I will offer the amendment.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

Mr. STEPHENS of Texas. I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. The gentleman from Texas asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. STEPHENS of Texas. There are two committee amendments: First, to strike out the words "including the," in line 9, page 1, and to insert the words "who is," and in line 1, page 2, insert the words "needy and destitute."

The SPEAKER pro tempore. The Clerk will report the committee amendments.

The Clerk read as follows:

Amend, page 1, line 9, by striking out the words "including the" and inserting the words "who is."

The amendment was agreed to.

The SPEAKER pro tempore. The Clerk will report the next committee amendment.

The Clerk read as follows:

Amend, page 2, line 1, after the word "aged," insert the words "needy and destitute."

The amendment was agreed to.

Mr. STEPHENS of Texas. The gentleman from Illinois has an amendment.

Mr. MANN. I move to amend by inserting, on page 2, line 10, after the word "Indian," the words "as hereinbefore in this act described."

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 2, line 10, by inserting after the word "Indian" the words "as hereinbefore in this act described."

The amendment was agreed to.

Mr. FERRIS. Mr. Speaker, I want to ask the gentleman a question about page 2, line 1. I assume that the bill only intends to reach those who are needy, and so forth. I was wondering if the language of the bill did not bind it down so tight that some people who might need their pro rata share would be unable to get it. For instance, they must be blind, crippled, aged, needy, and destitute.

Mr. STEPHENS of Texas. I think the first part of that section will answer the gentleman's question in this, that it authorizes the Secretary of the Interior—

Under such rules, regulations, and conditions as he may prescribe, to pay any Indian who is blind, crippled, aged, needy, and destitute or helpless, his or her share or any portion thereof of the tribal or trust funds in the United States Treasury belonging to the tribe of which such Indian is a member.

Now, it is true that there are a great many Indian tribes that have quite a large amount of money, and there are blind, crippled, aged, needy, and destitute or helpless Indians, as described here, who ought to have the money and ought to have the use of it. This leaves it in the discretion of the Commissioner of Indian Affairs to pay out these funds to these blind, crippled, aged, needy, and destitute or helpless Indians.

Mr. FERRIS. Of course, a Secretary can work out rules and regulations to carry out the law, but he could not make rules and regulations to overthrow the law. My thought was that if you would change the word "and" to "or," page 2, line 1, he could make the rules and regulations in accordance with what is

intended. You could scarcely find an Indian who was blind, crippled, aged, needy, and helpless altogether.

Mr. STEPHENS of Texas. The regulations would not provide for that.

Mr. MANN. The gentleman from Oklahoma is wrong about his reading of the bill. It says "or helpless."

Mr. FERRIS. But it says "needy and destitute."

Mr. MANN. Here is the qualification: Blind, crippled, aged, needy and destitute, or helpless.

Mr. FERRIS. If the gentleman would take out the "and" and insert the word "or"——

Mr. MANN. You do not need to.

Mr. FERRIS. The word "and" being between "needy" and "destitute" couples up all the others.

Mr. MANN. Not at all; the commas are in there.

Mr. FERRIS. It is true that you have the word "or" in front of the word "helpless," but between "needy" and "destitute" the conjunction "and" is put in, and that couples up all the others.

Mr. MANN. Not at all. "Needy and destitute" is one clause, "aged" is another clause, "crippled" is another clause, "blind" is another clause, and "helpless" is another clause. It is perfect grammatical construction.

Mr. FERRIS. I suggest to the gentleman that on page 1 line 9, the word "either" ought to be put in after the word "is," so that it will read "to pay any Indian who is either blind, crippled, aged," and so forth. In that event there would be no question about it. But I think you will find that the Interior Department will construe this language the way I have stated, and it will be back here for us to amend it.

Mr. MANN. They can not construe it in that way.

Mr. FERRIS. I have seen greater miracles than that.

Mr. BURKE of South Dakota. Let me say to the gentleman that the existing law which this proposes to amend reads the same as this does, only that this bill includes "needy and destitute."

Mr. FERRIS. Do you get along all right with the law as it is now?

Mr. BURKE of South Dakota. Apparently, yes. My understanding is that what prompted the department to send in the bill was to make it general, so that they could pass to the credit of any Indian who was sick, helpless, or otherwise. It practically does what the law does now, only it enlarges a little bit the classes to which it may apply.

Mr. MANN. It inserts the words "needy and destitute."

Mr. BURKE of South Dakota. It does not make much of a change in the existing law.

Mr. FERRIS. I think that unless you put in the word "either" after the word "is," in line 9, page 1, the officer who construes the law will hold that it means "Indian who is blind, crippled, aged, needy, and destitute."

Mr. BURKE of South Dakota. Let me call the gentleman's attention to the law.

Mr. MANN. We schoolmasters do not agree with the gentleman from Oklahoma.

Mr. BURKE of South Dakota. The existing law reads:

> The Secretary of the Interior is hereby authorized to pay to any Indian who is blind, crippled, or helpless from old age, disease, or accident.

That is the existing law.

Mr. MANN. And this bill proposes to insert the words "needy and destitute."

Mr. FERRIS. They have stricken out the word "including."

Mr. MANN. That is not in the existing law.

Mr. FERRIS. But it is in the bill. I do not care anything about it, Mr. Speaker; I am in favor of the bill, but I think it ought to be made clear.

Mr. MANN. It is clear, and the gentleman would cloud it.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. MONDELL. Reserving the right to object——

Mr. MANN. It is too late to object; we have already adopted two amendments.

Mr. MONDELL. Will the gentleman yield for a question?

Mr. STEPHENS of Texas. Certainly.

Mr. MONDELL. I desire to ask the gentleman if it was the thought of the committee in reporting this bill that there would result from it a general distribution of tribal funds?

Mr. STEPHENS of Texas. I think not.

Mr. MONDELL. There are many tribal funds in regard to which there has been no attempt to distribute or allot them individually. The conditions in many cases are such that no such attempt should be made at this time.

Mr. STEPHENS of Texas. This only applies to the classes mentioned here, and they must come in under that class.

Mr. MONDELL. Do I understand that this so enlarges the law that if an Indian of a tribe having a very considerable amount of tribal funds which have not been allotted should be found to come within one of these classes that it becomes the duty of the Secretary of the Interior to attempt to arrive at a decision relative to the amount of such funds due each Indian?

Mr. STEPHENS of Texas. No; I think not. It applies to funds in the Treasury subject to be paid out for the benefit of the Indians.

Mr. MONDELL. Not for the benefit of individual Indians, but for the tribe.

Mr. STEPHENS of Texas. That is correct.

Mr. MONDELL. Many of these funds can only be paid out, unless this changes the law, in accordance with the provision of the treaty for certain specific purposes. Is it the thought of the committee that this legislation will broaden the law so as to affect treaty stipulations?

Mr. STEPHENS of Texas. It does not. It was not the intention to do so, and I do not think it has that effect.

Mr. MONDELL. It only affects trust funds that are now practically apportioned individually.

Mr. STEPHENS of Texas. That is correct. It is to broaden the number of Indians to whom payments can be made.

Mr. MONDELL. Gentlemen on this side suggest that it does not affect anything.

Mr. STEPHENS of Texas. Then there can be no harm in it; but in that case I do not see why the department wants it.

Mr. MONDELL. I should be inclined to object to it if I thought it did not accomplish something.

Mr. STEPHENS of Texas. The gentleman is too late to do that.

Mr. MONDELL. I realize that. I did not use the term in the restricted sense, but I meant that I should not be inclined to favor it. If it is intended by this legislation to authorize and direct or give the Secretary authority to generally segregate funds which are accumulating and which under the treaties can only be used for certain specific purposes——

Mr. STEPHENS of Texas. This is what the department says, and it will answer the gentleman's question.

Mr. MONDELL. I do not think what the department says there will answer the inquiry I have propounded.

Mr. STEPHENS of Texas. It says:

> Upon the satisfactory showing of the need of any Indian to withdraw his individual share of the tribal funds of the Treasury and place it in the bank to his credit under the supervision of the superintendent, to be paid to him in such sums as the circumstances may from time to time justify, or the whole or any part thereof may be expended under the superintendent's direction for his benefit.

Mr. MONDELL. That does not answer the point I have in mind at all.

Mr. STEPHENS of Texas. I will further state to the gentleman from Wyoming that I find this:

> There is a large proportion of the membership of most of the tribes having trust funds in the Treasury which is neither competent nor disabled by reason of disease or old age, as required in the application of the provisions of the act of March 2, 1907, and the department is therefore without authority under existing law to pay such members their pro rata share of the tribal funds or to expend for their benefit any portion of such funds.

Now, that seems to be a provision of the act of March 2, 1907, that would prevent them from giving the relief that this bill gives to these distressed Indians.

Mr. MONDELL. Now, the gentleman is aware there are numerous tribal funds, and I have in mind now tribal funds that are being increased constantly by the sale of lands with regard to which there are treaty provisions that the funds shall be used only for certain specific purposes. This bill does not, I understand the gentleman from Texas to say, and was not intended to give to the Secretary of the Interior authority to segregate such funds as I have referred to and pay out the proportionate share of such funds to any Indians coming within this classification.

Mr. STEPHENS of Texas. The gentleman is correct about that. That is the reason given here. They say:

> The object of the proposed amendment is to extend the scope of the act of March 2, 1907, which experience has shown to be advisable and necessary in order to cover classes and circumstances not now provided in existing law.

Mr. MONDELL. If they intend to extend it to cover classes and circumstances, it is all right, but if it is intended to extend the law so as to lead to a general distribution of the tribal funds which have accrued or are accruing under treaty obligations, under which they can be applied, or which are to be applied for certain specific purposes, then the legislation would be unwise. There are funds accumulating for the purpose of paying the obligations of the Indians for appropriations which have been made for the benefit of the tribe and made reimbursable.

Many of these funds are accumulating for the purpose of improving the lands of the Indians, those funds ought not to be dissipated by dividing the fund so as to find out how much each Indian is entitled to and then paying it over to him if he is an Indian of this class——

Mr. STEPHENS of Texas. Let me ask the gentleman this question——

Mr. MONDELL (continuing). But the gentleman does not propose to do that, I assume, and I do not understand this legislation is giving authority to do that.

Mr. STEPHENS of Texas. It does not. I will state to the gentleman that he was correct in that the tribal fund should be used to first take care of the aged and destitute and those who are in needy circumstances before it should be distributed to those who are able to take care of themselves.

Mr. MONDELL. Another thing. In most every case under these treaties, or in many cases under these treaties, tribal funds may be used to take care of the aged and destitute, to take care of such cases as arise.

Mr. STEPHENS of Texas. The gentleman is correct.

Mr. MONDELL. And they use the tribal funds for that purpose. They do not take the amount which each Indian is entitled to and then pay him the amount he is entitled to or a portion of it, but they pay out of the tribal fund enough to subsist and take care of those aged and infirm Indians. Is it not intended in such cases to change the method so that in the future the assistance is to be given by dividing or attempting to divide the fund?

Mr. STEPHENS of Texas. It does not extend to that at all.

Mr. MONDELL. Then, what does it do?

Mr. STEPHENS of Texas. It just simply adds two classes here—aged and destitute. In this statement I have just read to the gentleman it is stated that this is the whole purpose of the law, and they state the law is not broad enough now to include those classes.

Mr. MONDELL. To use a concrete illustration: The Shoshones and Arapahoes in my State have a fund which is constantly increasing from the sale of public lands. The Government has a claim against that fund by reason of expenditures which it has made under appropriations for the construction of irrigation projects, and so forth; the fund will ultimately, it is hoped, be much in excess of the amount required to meet the Government's obligations. It would be utterly impossible to determine, except for the moment when the distribution was made, how much each individual's share in that fund was, because the fund is constantly varying, growing larger as lands are sold. Now, the treaty under which that fund is being built up provides that a certain amount of it may be used for the care of the aged and infirm, and it is being so used, but it is used as a tribal fund, and under any plan of division——

Mr. STEPHENS of Texas. This does not change that law; they still use the tribal funds.

Mr. MONDELL. But here is a plan of dividing that fund or attempting to divide it and giving infirm and aged and crippled Indians their share. It does not, of course, apply to the case I have cited.

Mr. STEPHENS of Texas. If the law was not broad enough at first, why not broaden it?

Mr. MONDELL. The effect of that would ultimately be that these very Indians who will most need a share in the tribal funds will have used up their part of the funds without leaving any further claim on the tribal funds at all.

Mr. STEPHENS of Texas. Now, this does not take care of that matter in any way. It simply amends the act permitting and authorizing these funds to be used for these Indians, destitute, aged, and crippled.

Mr. MONDELL. These funds to which I have referred, the Arapaho and Shoshone funds in my State, were not affected by this legislation at all, as I understand it.

Mr. STEPHENS of Texas. Not at all in any way. This simply just broadens the law.

Mr. MONDELL. At present payments may be made out of their funds for the infirm, the aged, and the crippled, whereas if we attempted to find out how much each Indian's share in that fund was, and then giving it to him, we would very soon arrive at the condition under which the very Indian that in the future will need the most aid will be unable to secure any, because his proportion of the total fund has been used up.

Mr. NORTON. Mr. Speaker, I move to strike out the last word. As I understand it, this bill simply makes larger the authority of the Secretary of the Interior under the act of March 2, 1907. Under the terms of this bill not only those who are not capable of providing for themselves on account of disease and on account of old age, but the blind, the crippled, and the "needy and destitute" may be cared for?

Mr. STEPHENS of Texas. That is correct. The "needy and destitute" are the classes added to the bill.

Mr. NORTON. Replying to the suggestion made by the gentleman from Wyoming [Mr. MONDELL], it occurs to me—and I want to know whether I am correct or not in this—that under the provision of this bill no money can be paid out of any tribal fund unless, in the judgment or decision of the Secretary of the Interior, there is a certain definite amount of money due the individual Indian from the tribal fund over and above any charges against that fund.

Mr. STEPHENS of Texas. Unless there are tribal funds, of course, there can be no money paid out of such tribal fund to any Indian of any kind or character, needy or destitute or what not. This applies to the funds now in the hands of the United States Government coming to that tribe, and they have the right to segregate that money and pay it out to the Indians who are not able to take care of themselves; and we have added the words "needy and destitute."

Mr. NORTON. Beginning on page 1, line 7, the provision of the bill is:

> The Secretary of the Interior is hereby authorized, under such rules, regulations, and conditions as he may prescribe, to pay any Indian who is blind, crippled, aged, needy and destitute, or helpless his or her share, or any portion thereof, of the tribal or trust funds in the United States Treasury belonging to the tribe of which such Indian is a member.

I will say to the gentleman from Wyoming [Mr. MONDELL] that there certainly must be some definite determination of the amount due any Indian coming under the provisions of this act before any sum whatever can be paid out of the fund.

Mr. STEPHENS of Texas. If there is a gross amount coming to the tribe in the closing of these Indian matters, the excess money is granted to the individual members of the tribe.

Mr. NORTON. A certain amount due each member?

Mr. STEPHENS of Texas. Yes; the crippled people in the tribe. They take the funds of the tribe and pay them to those people.

Mr. NORTON. I am very much in favor of this bill——

Mr. BURKE of South Dakota. Let me say to the gentleman from North Dakota [Mr. NORTON] that this bill is reenacting the existing law exactly as the law reads, with the exception in line 1 it adds two additional words, namely, "needy" and "destitute"; and it does not change the law in any other respect.

Mr. NORTON. I have read the wording of the existing law.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read a third time, and passed.

On motion of Mr. STEPHENS of Texas, a motion to reconsider the vote by which the bill was passed was laid on the table.

SEED, LIVE STOCK, ETC., FOR INDIANS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10846) to authorize the Secretary of the Interior to use in the purchase of live stock, seeds, and agricultural equipment moneys appropriated to fulfill treaty obligations.

The bill was read, as follows:

> *Be it enacted, etc.*, That the Secretary of the Interior may, in his discretion, with the consent of the Indians, use any moneys appropriated for the purchase of subsistence or other supplies for the various Indian tribes, in fulfillment of treaty obligations, which may not be needed for that purpose, in the purchase of live stock, seeds, and agricultural equipment for the benefit of the tribe for which such appropriation is made.
>
> SEC. 2. That all acts or parts of acts in conflict herewith are hereby repealed.

Also the following committee amendment was read:

> Insert after the word "Indians," in line 4 of the bill, the following: "Obtained in a suitable manner and with like effect as that which ratified the original treaty on their part."

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. STEPHENS of Texas. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER. The gentleman from Texas asks unanimous consent that the bill be considered in the House as in the Committee of the Whole. Is there objection? [After a pause.] The Chair hears none. The question is on the committee amendment.

The question was taken, and the committee amendment was agreed to.

Mr. MANN. Mr. Speaker, I move to strike out the last word. It seems to me that this bill, if enacted into law, may be of considerable value, but how will they do about providing live stock, seeds, and agricultural equipment for the benefit of the tribe for which such appropriation is made? In most of these

cases will the tribe as a tribe be in a position to handle the live stock and seeds and equipment and keep it in a common fund?

Mr. STEPHENS of Texas. They are doing it to some extent through the present Indian agents and the department and bureau.

Mr. MANN. Well, they may be doing it to some extent; but what I was getting at was this: Here we make an appropriation, it is true, for the maintenance and support of Indians under some treaty stipulations, but I take it that in the distribution of subsistence or other supplies it is in part, at least, distributed to the Indians individually.

Mr. STEPHENS of Texas. According to their needs.

Mr. MANN. According to their needs. Is it not desirable, if you want to get anybody interested in something, that they own it themselves individually?

Mr. STEPHENS of Texas. We have thought so, and that is the reason for this amendment.

Mr. MANN. But that is what the bill does. That is what I am talking about. You appropriate to give seeds not to individual Indians but to the tribe. You propose to buy live stock, not for any Indian who can own it, but the tribe owns it. You propose to buy plows so that the tribe will own them. Now, is there any way by which that can be arranged so that an individual Indian is induced to take an interest in something because he owns it?

Mr. BURKE of South Dakota. Not out of tribal funds, Mr. Speaker, if the gentleman will permit.

Mr. STEPHENS of Texas. I yield to the gentleman from South Dakota.

Mr. BURKE of South Dakota. My understanding of this bill is that it allows the Secretary of the Interior to expend moneys that, under treaty obligations, we annually appropriate, and that is used for rations and given to the Indians for the purchase of live stock, and it is the intention, as I understand it, of the department to purchase these cattle in common for the tribe as a whole. And I would like to ask the gentleman in charge of the bill, as to the second section, as to whether or not it is necessary or it ought to be stricken out?

Mr. STEPHENS of Texas. I think it ought to be stricken out, and I move to strike out the last section.

The SPEAKER. The gentleman will state the amendment.

Mr. STEPHENS of Texas. On page 2, strike out lines 3 and 4.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, strike out section 2.

The SPEAKER. The gentleman from Illinois [Mr. MANN] withdraws his pro forma amendment, and the question is on the amendment of the gentleman from Texas [Mr. STEPHENS].

The question was taken, and the amendment was agreed to.

Mr. FERRIS. Mr. Speaker, I move to strike out the last word for the purpose of asking the gentleman from Texas [Mr. STEPHENS] a question. I want to ask the chairman of the committee one or two questions as to the way this will work out. Now, it only applies to money that is appropriated, does it not?

Mr. STEPHENS of Texas. That is right.

Mr. FERRIS. And it only applies to money for the fulfillment of treaty obligations?

Mr. STEPHENS of Texas. Yes.

Mr. FERRIS. Does it apply to their trust moneys at all?

Mr. STEPHENS of Texas. I think not. You will remember, many years ago—maybe 40 or 50 years ago—treaty obligations were entered into between various tribes and the United States by which the United States promised to give them, in some instances, so many shoes for a blacksmith and so many horses, and things that are not now needed. It is impossible now to comply with those provisions, and the Indians do not want it.

Mr. BURKE of South Dakota. And pay for a miller somewhere or a blacksmith in the city of Chicago, for example?

Mr. FERRIS. Yes. I have those things in mind. But I also had in mind the idea that we ought not to cut the Department of the Interior loose on the trust funds. Otherwise, you would have war with the Indians on your hands.

Mr. STEPHENS of Texas. The gentleman is right about that. It does not do it.

Mr. FERRIS. Mr. Speaker, I will withdraw my pro forma amendment.

The SPEAKER. The pro forma amendment is withdrawn. Is there objection?

There was no objection.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. STEPHENS of Texas, a motion to reconsider the vote whereby the bill was passed was laid on the table.

LEASING UNALLOTTED LANDS IN INDIAN RESERVATIONS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10833) authorizing the Secretary of the Interior to lease for grazing, agricultural, and mining purposes unallotted lands within Indian reservations established by act of Congress or Executive order.

The Clerk read as follows:

Be it enacted etc., That the Secretary of the Interior be, and he is hereby, authorized to lease for grazing, agricultural, and mining purposes unallotted lands within Indian reservations established by act of Congress or Executive order in such quantities and upon such terms and conditions and under such regulations as he may prescribe: *Provided*, That no grazing or agricultural lease shall be for a period to exceed 5 years and no mining lease for a period to exceed 10 years.

With committee amendments, as follows:

Line 4, after the word "grazing," strike out the comma and insert the word "and."

Line 4, after the word "agricultural," strike out the comma and insert the words "and mining."

Line 9, strike out the words "or agricultural."

Page 2, line 1, after the word "no," strike out the word "mining," and insert in lieu thereof the word "agricultural."

The SPEAKER. Is there objection?

Mr. MONDELL. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Texas [Mr. STEPHENS] if this bill affects so-called treaty reservations in any way?

Mr. STEPHENS of Texas. If there are treaty obligations already entered into that would prevent this character of Executive order reservations——

Mr. MONDELL. Does it affect so-called treaty reservations?

Mr. STEPHENS of Texas. No; I think not.

Mr. MONDELL. It only affects reservations created by act of Congress or Executive order?

Mr. STEPHENS of Texas. Yes; only reservations created by act of Congress or Executive orders, and it so specifies. That is the plain reading of it. The bill says:

That the Secretary of the Interior be, and he is hereby, authorized to lease for grazing, agricultural, and mining purposes unallotted lands within Indian reservations established by act of Congress or Executive order in such quantities—

And so forth.

Mr. MONDELL. What do you mean, or what did the committee have in mind, by the words "reservations established by act of Congress"?

Mr. STEPHENS of Texas. Well, I presume——

Mr. MONDELL. Well, if Congress ratified a treaty under which a reservation was established, would that make such a reservation "a reservation established by act of Congress"?

Mr. STEPHENS of Texas. As I understand it, there are two ways of making reservations. One is by Executive order, which sets apart a certain amount of land for such tribe of Indians, and the other is when it is established by act of Congress, which defines the boundaries of a certain tract of land which is given up to the use and benefit of the Indians.

Mr. MONDELL. Reservations are or were established by treaty and by Executive order.

Mr. STEPHENS of Texas. This does not apply to a treaty reservation.

Mr. MONDELL. By Executive order and by act of Congress. Are these three separate and distinct, or does the fact that Congress may ratify a treaty made with the Indians, establishing a reservation, make such reservation a treaty reservation?

For instance, take the reservation in my State. Of course my first interest in regard to all this legislation is as to its effect upon that reservation. We have what I understand to be a treaty reservation. I understand it to be a reservation that would not be affected by this legislation. I would not want this legislation to affect that reservation for this reason, that at the present time the department holds it has authority to make mineral leases on that reservation. If this bill passes there will be no authority to make mineral leases on the reservations described in it.

Mr. STEPHENS of Texas. I think not. I do not think it will have that effect, for the reason that we have stricken out the word "mining" here.

Mr. MONDELL. The very fact that you have stricken out the word "mining" and have provided for other classes of leases precludes the making of mining leases on the classes of reservations to which you refer. You eliminate mining leases by describing agricultural and grazing leases. If Congress provides that a certain kind of lease shall be made, that action precludes the making of any other kind of lease.

Mr. STEPHENS of Texas. I think not. I think it leaves the original law in existence just as it is now.

Mr. MONDELL. Unquestionably; there can not be any doubt about that. There is now no law allowing leave for mining on unallotted lands on reservations of the classes described.

Mr. STEPHENS of Texas. There is no repealing clause to this act.

Mr. MONDELL. The department informed the committee, and the committee acted in this matter on the suggestion of the department, to the effect that in regard to the treaty reservations it had a right to make certain leases. I will read:

There is authority of law, found in section 3 of the act of February 28, 1891 (26 Stat. L., 795), for leasing lands within treaty reservations.

That is so broad that various kinds of leases are made. Now, that is the condition under which we are operating on the Shoshone Reservation in Wyoming, and it is a very satisfactory one. Reading further, however, from that same report of Assistant Secretary Jones, we find here:

It is the opinion of this department that there is great public need for authority of law for the leasing of lands within Indian reservations that have been established by act of Congress or Executive order.

There, apparently, the department draws a clear distinction between treaty reservations and a reservation created by act of Congress.

Mr. STEPHENS of Texas. Will not the gentleman admit that if you specify, too, the Executive orders and the act of Congress, that will not interfere in any manner whatever with the treaty reservations?

Mr. MONDELL. I was trying to get the gentleman's opinion with regard to that.

Mr. STEPHENS of Texas. I say it does not.

Mr. MONDELL. I think it is very important that it should be made clear that a reservation created by act of Congress shall not include a reservation established by treaty.

Mr. STEPHENS of Texas. I am perfectly willing to add an amendment providing that nothing in this act contained shall refer to treaty regulations, but it would not do it anyway.

Mr. MONDELL. I do not know that it is necessary——

Mr. MANN. We do not have any more treaties with Indians except by act of Congress, do we?

Mr. STEPHENS of Texas. We can not have now, but there are reservations known as treaty reservations.

Mr. MANN. I understand; but what is the distinction in practice between a treaty entered into with Indians when the treaty-making power of the Government was exercised and a treaty entered into now, which is confirmed by an act of Congress? What is the distinction in practice as to the treatment of the lands?

Mr. STEPHENS of Texas. We would have to look to the department for those distinctions. The department have drafted this bill, and they say it shall only apply to those provided by act of Congress and by Executive order.

Mr. MONDELL. The department have drafted the bill, but we want to know exactly what the bill means.

Mr. STEPHENS of Texas. These words have well-known meanings in the department, because these questions have been passed upon frequently.

Mr. MONDELL. Does the gentleman understand what that meaning is?

Mr. STEPHENS of Texas. It is very plain, as I understand it. They know what the regulations are, what the treaty reservations are.

Mr. MONDELL. What is a reservation created by act of Congress?

Mr. STEPHENS of Texas. It is a specific portion of country set apart by treaty for the benefit of certain Indians.

Mr. MANN. Supposing the Government of the United States, through the Indian Office, has made a treaty with the Indians.

Mr. STEPHENS of Texas. That is a treaty reservation, then.

Mr. MANN. Will the gentleman wait until I finish my question? Supposing the Government of the United States, through the Indian Office, has made a treaty with the Indians, and that is presented to Congress and then confirmed by an act of Congress. Is that a treaty reservation or an act of Congress reservation?

Mr. STEPHENS of Texas. I should say that it was a treaty reservation.

Mr. MANN. I should say it required an act of Congress. Who will determine which it is?

Mr. STEPHENS of Texas. The rules and regulations of the department control that matter explicitly. The department drafted this bill, and they certainly knew what they wanted, and there was no objection to the bill.

Mr. MANN. I know; but the department knows or thinks it knows what it wants, but it is our duty to know what the department wants before we enact legislation.

Mr. MONDELL. And it is our duty also to know what Congress wants, Congress being still a coordinate branch of the Government, to a certain extent.

Mr. MANN. This side of the House is a coordinate branch of the Government, but that side is not.

Mr. STEPHENS of Texas. The gentleman is getting into politics now. I want to get back to the Indians.

Mr. MONDELL. No; we are treating of facts.

Mr. STEPHENS of Texas. This bill is not according to the wishes that I had in the matter in this, that I think it should have applied to mining. A bill has passed through the House twice and gone to the Senate and been defeated there, a bill providing for agricultural, grazing, and mining leases on these reservations, and the bill as originally drafted was that way.

Mr. MONDELL. What objection is there to having mining leases on the reservations?

Mr. STEPHENS of Texas. It was objected to, I think, by the Committee on the Public Lands, because they are considering bills of this character.

Mr. MONDELL. Do I understand that the Committee on the Public Lands——

Mr. STEPHENS of Texas. There are certain members of that committee who are on our committee, and they said the Committee on the Public Lands had the whole matter in hand.

Mr. MONDELL. Do I understand the Committee on the Public Lands have agreed to mining leases on Indian reservations?

Mr. STEPHENS of Texas. They have not. I wanted the Indians' reservations and the public lands to have the same provisions relative to the mining leases, so that we could have a uniform mining law, to apply on Indian reservations as well as on public lands, but the committee simply outvoted me on that proposition.

Mr. TAYLOR of Colorado. The Public Lands Committee are considering a bill for the leasing of coal, oil, and other substances, but that bill does not apply to reservations.

Mr. STEPHENS of Texas. But we wanted it to apply.

Mr. MANN. Are the Public Lands Committee also considering the subject of grazing leases on public lands?

Mr. STEPHENS of Texas. I think not.

Mr. MANN. Then the gentleman has another think coming, because they have been fighting over it for a long time. Now, I should like to know——

Mr. STEPHENS of Texas. The gentleman will admit that that is not nearly so important as the mining leases.

Mr. MANN. I am not saying anything about that. The question of grazing leases is, I think, very important. The Public Lands Committee have been working on that subject for some time as to public lands, and as they know a great deal more about it than I do—I trust they do; if they do not, they do not know enough to pass the legislation—I should like to hear from some gentleman on the Public Lands Committee. I see the gentleman from California [Mr. KENT], who has a bill pending, and the chairman of the Committee [Mr. FERRIS], who, I think, has a bill pending. I should like to know from them as to how this bill works in with the ideas of the Public Lands Committee as to grazing leases. We do not want competition between the Indians' reservations and the public lands if we are going to pass legislation on this subject.

Mr. STEPHENS of Texas. Does not the gentleman think it would be bad legislation to have the miners competing——

Mr. MANN. I am not talking about miners. The gentleman from Wyoming can talk about that. I am trying to find out about the grazing business. That is in the bill.

Mr. KENT. In reply to the gentleman's question, I will say that we did have under consideration a grazing bill. We found that there seemed to be but little knowledge in the Department of the Interior as to the arid lands and how they should best be handled, and therefore the grazing bill has been temporarily put in abeyance. A joint resolution is before the House and before the Senate calling for an examination of that portion of the public domain in which 640 acres is not sufficient to support a family on a grazing basis, and the request is made in this joint resolution that a report be made to Congress early in December. We want to get the views of the Interior Department as to how that problem should be handled.

Mr. MANN. What I really wanted to get at was the judgment of the gentlemen on the Public Lands Committee as to whether it would be advisable or not to follow the old method of trying it on the dog first. In other words, in order to figure out what we should do on the public lands we would experiment on the Indian lands to see whether the department could work out something that they wanted to adopt as to our own public lands.

Mr. KENT. In reply to the gentleman I will state that the question of grazing for a temporary period of years has been tried out in many places with eminent success. Texas and a number of States have tried it out. The forest reserves have been, on the various reservations, handled under a licensed per capita for stock pastured with eminent success. It is not experimental, and it is along the lines of reasonable conservation. Under such plan there are definite rights, and the situation is relieved from squabbles and warfare. People can produce live stock in a self-respecting way, knowing what their rights are.

Mr. MANN. I understood the gentleman from California to say that the Interior Department did not have sufficient information on this subject. Is that merely as to the character of the lands?

Mr. KENT. As I understand, the character of the lands and the method of utilizing them.

Mr. MANN. Is it the gentleman's idea that 5 years is a proper limit for a grazing lease?

Mr. KENT. The bill proposes to make an outside limit of 10 years.

Mr. MANN. This makes an outside limit of 5 years.

Mr. HAYDEN. The bill as amended makes it 10 years.

Mr. MANN. The gentleman is mistaken. It is 10 years for an agricultural lease and 5 for a grazing lease.

Mr. KENT. In some localities and some classes of land 5 years is a sufficient length of time, and others, where there is a large expense for developing water and no possibility for the land being used for higher purposes, probably 10 years would yield better results than 5.

Mr. BURKE of South Dakota. Mr. Speaker, I desire to ask the gentleman from Texas a few questions with reference to this bill. The last bill passed authorized the Secretary of the Interior to use certain moneys in purchase of live stock for the benefit of the Indians. I would like to ask the gentleman if it would not be advisable to provide in this bill, if we are to lease reservations, that the proceeds received from such leases might be used in the purchase of live stock, the same as provided in the bill passed a few minutes ago, H. R. 10846?

In my State the Indian reservations have been leased for some years—and they were not treaty reservations, either—and the money has been paid out in annuities to the Indians in amounts of about $3 per capita, and it is absolutely throwing the money away. It is expended for popcorn and pop and other things that do the Indians absolutely no good whatever.

I want to suggest that, if this bill is going to be passed, after the word "prescribe" insert "and may expend the proceeds received in the purchase of live stock for the tribe occupying the reservation leased."

Mr. STEPHENS of Texas. I have no objection to that.

Mr. BURKE of South Dakota. I have not used the word "owned," because on some reservations the Indians do not own the land in any sense. If the gentleman from Texas has no objection to that amendment, after consideration is given, I would like to offer it.

Mr. STEPHENS of Texas. I have no objection.

Mr. STAFFORD. Mr. Speaker, before consent is given, I would like to inquire why the committee changed the recommendation of the department in extending the period of the lease so far as agricultural land is concerned from 5 to 10 years. As the bill was drafted it limited the tenure of grazing and agricultural lands to five years.

Mr. STEPHENS of Texas. As to agricultural lands, we thought they could not be successful; that they could not raise successful crops unless by irrigation, and it would not be possible to do anything under five years' lease if they had to irrigate the land.

Mr. STAFFORD. The bill is not limited to irrigated lands.

Mr. BURKE of South Dakota. I will say to the gentleman that where land is in its virgin state and broken up it is very difficult to lease the land and to get anything out of it unless you can make a lease for a period of not less than five years.

Mr. STAFFORD. My experience has been, when I have leased lands in the West—in the Dakotas—for clients in my State, that you did not get any return at all. The settler out there appropriated everything except the small amount necessary for taxes. If I thought that the Indians would get no more than what nonresidents of Dakota lands received from these lands under lease, I would object to the bill.

The SPEAKER. Is there objection?

Mr. STAFFORD. Reserving the right to object, I would like to obtain some information as to the reason why they went beyond what was recommended by the department.

Mr. STEPHENS of Texas. Because men who live in the West stated that it was impossible to get a man to go on a tract of land and prepare the land to be irrigated on a five-year lease. They want the right to lease longer; and, then, this language does not make it obligatory on the department to give a 10-year lease, but for a period not to exceed 10 years.

Mr. STAFFORD. Does the gentleman have any hope that with a lease, even of 10 years, the settler would erect any kind of a home?

Mr. STEPHENS of Texas. Yes; it is under the discretion of the Secretary of the Interior.

Mr. STAFFORD. Does the gentleman think it would be any inducement to erect any kind of a home on property that the lessor only had a tenure on for 10 years?

Mr. HAYDEN. I know of a reservation in Arizona where they are erecting homes, leveling the ground, and fencing the property; and these improvements are made under the terms of the lease for the benefit of the Indians. The plan is that after the lease has expired the place will be in such shape that the Indian can step in and have a home and make a living from that time on. I think a 10-year limit is proper.

Mr. STAFFORD. Of course under such a lease the settler would have to be compensated in the rental to make up for the improvements that he would be obligated to perform under the terms of the lease.

Mr. HAYDEN. Yes.

Mr. RAKER. Mr. Speaker, reserving the right to object, will the gentleman advise me how many acres of this land is subject to these leases?

Mr. HAYDEN. I could not tell the gentleman how many acres are to be leased in the reservations all over the United States.

Mr. RAKER. Approximately how many acres?

Mr. HAYDEN. I have no idea.

Mr. RAKER. Is there any method by which these lands can be disposed of?

Mr. HAYDEN. No; we can not sell them, because they are Indian reservations. The advantage of this system is that when the Indian comes to occupy his allotment he can make a better living from the very beginning.

Mr. RAKER. Well, I know; but the improvements that the lessee puts upon the land—will he get compensation for his fences, buildings, houses, barns, and wells?

Mr. HAYDEN. That is the theory on which these leases are made. In the particular instance which I mention no rent is paid for the first few years on the condition that certain improvements shall be made. During the latter part of the lease some cash rent must be paid. What the department wants to secure are houses, corrals, and fences which the Indian can use when he goes on his allotment.

Mr. RAKER. Is it the gentleman's theory that by this leasing of land that the man who gets that place will improve it in such shape, put it in such a high state of cultivation and improvement, that he will turn it right over an improved farm?

Mr. HAYDEN. Yes; that is the theory of it, exactly. That is the way they are doing on the Colorado River Reservation.

The SPEAKER. Is there objection?

Mr. RAKER. Mr. Speaker, reserving the right to object, I would like to have some information as to the quantity of the land covered by this bill. Possibly the chairman has some idea.

Mr. STEPHENS of Texas. Under such rules and regulations as the department may prescribe. It does not say 160 acres, 500 acres, or any other amount.

Mr. RAKER. Does the gentleman know the sum total of the number of acres of land that will be subject to the provisions of this bill?

Mr. STEPHENS of Texas. It is impossible to state, because some of the reservations are allotted and some of them are not allotted. I have never seen any specific amount stated.

Mr. RAKER. This would not cover the allotted lands at all, would it?

Mr. STEPHENS of Texas. No; it would be the common lands belonging to the Indians, belonging to the tribe in common.

Mr. RAKER. Does the gentleman think it would bring a fund to the Indians for the use of the land?

Mr. STEPHENS of Texas. Yes; because it is not used at all now. Some of it has valuable grass. Take the Arizona land, and there is a great scope of country there, some whole counties taken up by the Indian reservations, and a great deal of it is very fine grass, the value of which would be lost to the Indians, because on the reservations they have no stock. The white people want to graze there, and there is a great deal of demand for the beef and mutton which can be raised there, and I think it is very bad policy not to permit it to be so used.

Mr. RAKER. Is any use made of this land at the present time at all?

Mr. STEPHENS of Texas. It is not because the Indians can not use it. They have no stock to put upon the land, and unless

some rules and regulations are prescribed by the department and there is authority given by law they can not lease it, and I will call attention to the forest reserves in the gentleman's own State which are being leased now to great advantage.

Mr. RAKER. No; we are not leasing any lands in the forest reserves.

Mr. STEPHENS of Texas. They are in New Mexico.

Mr. RAKER. They do not lease any land, they simply give a permit to turn stock on them in the forest reserves.

Mr. STEPHENS of Texas. But they charge for that permit.

Mr. RAKER. Yes; and that adds just that much cost to the beef and to living. That takes that much more money from the people living in the community in which these expenses are paid.

Mr. STEPHENS of Texas. Does not that furnish more beef to the country at large?

Mr. RAKER. No; it furnishes less, from the statistics presented before the committee. We are getting more and a better beef from private ownership than from men who have a permit that allows their stock to go on the reservation. The number of beef cattle have been reduced, but the general increase comes because of the farmers' intensive cultivations—raising alfalfa and other crops. The farmer is the man who does this.

Mr. STEPHENS of Texas. If the gentleman had lived in my State and observed the manner in which we are using our public domain he certainly would not object to this bill. We are securing every year three-quarters of a million dollars from lease of public domain; from school lands of the State, at 4 cents per acre. Many years ago that was not leased at all, and the lands belonged to everybody in common. The cattlemen and the sheepmen were fighting each other for these lands, as they were all over the United States. Now, no man would go back to the old system. We are preserving our public domain and own and control it.

Mr. RAKER. No; the record from the West shows that for 10 years, from the examination of all who appeared before the committee, there had been no dispute; that there has been no trouble to amount to anything. The record shows it has been used, and used better than any place in the United States today; used better than it is in the Eastern States, where thousands and thousands of head of cattle could be ranged and all the forage should be used; but the trouble is that the large stock interests have been for 20 years trying to get hold of the public range. Now, we want to avoid that in the Indian reservation, because it does not——

Mr. STEPHENS of Texas. What objection has the gentleman to the Indians getting more revenue from the lands they have? The gentleman is aware there are a great many millions of acres of land that belong to these Indians, very good grassland. Why should it not be utilized; why should not they raise beef; why should not the Indians get something for their grassland?

Mr. RAKER. I think the Indians should get something for them, but——

Mr. STEPHENS of Texas. Why should not they get something for them?

Mr. RAKER. But the gentleman has not yet answered my question. I want some information.

Mr. STEPHENS of Texas. Unless the Indians' lands are fenced and have line riders, of course, they run over the lines and get on the Indians' grass, and that creates trouble in the West and creates friction between the Indians and cattlemen.

Mr. FERRIS. Mr. Speaker, will the gentleman yield?

Mr. RAKER. Yes.

Mr. FERRIS. The gentleman from California has some well-defined views about grazing on public lands, and I am partially with him about that and partially against him, but I want to call attention to the fact that this does not necessarily set any precedents by solving or unsolving that question one way or the other. This applies to the unallotted Indian land, and where there is a scope of Indian country that is not subject to homesteads or not subject to any sort of entry by the gentleman's constituents or my constituents or anybody else's constituents this merely lets the Indians lease their own land, and under the amendment that the gentleman from South Dakota [Mr. BURKE] is going to offer in a few minutes it merely takes the proceeds and reinvests them in severality. So I do not think it involves a question which I know to be a very deep-seated one.

Mr. RAKER. What is the suggested amendment of the gentleman from South Dakota [Mr. BURKE]?

Mr. BURKE of South Dakota. I will say, Mr. Speaker, that under the present policy of leasing Indian reservations the money has been paid out per capita to the Indians, and in my State the annual per capita payment has, I think, been about $3, and the amount has been so small it has done the Indian little if any good. Some of them travel 100 miles to get $3. The amendment that I propose to offer will authorize the Secretary of the Interior to take the proceeds received from the leasing of these unallotted tribal lands and use them in the purchase of stock for the tribe as a whole, and thus get them into stock raising.

Mr. RAKER. I understood from the gentleman when he appeared before the Committee on the Public Lands on this leasing question that there had been Indian leases in his State, and it had been a serious detriment as it there existed because of a few getting hold of large tracts of land.

Mr. BURKE of South Dakota. If we had the conditions that obtained a few years ago in my State, I would object to the passage of this bill, I will say to the gentleman, because at that time we had so much Indian reservation that there were large tracts leased to large cattle companies, which I think was not for the best interests of the development of our State. Now the reservations are diminished, the Indians have been allotted, and the surplus lands are in small areas, comparatively, to what they were.

Mr. RAKER. Do I understand from the gentleman, from his experience—and he has some of this land in his State—that the surrounding farmers who have cattle and horses get the benefit of the surplus grass that is on these lands?

Mr. BURKE of South Dakota. Not at all, Mr. Speaker. In fact, it has been very difficult for them to get it, even where they were desirous of paying the highest price for it, simply because the policy of the department has been against allowing the Indian to sell his hay, the theory being, if he was not permitted to sell it, he would put it up and feed it out to stock that he might himself own. And I may say that is a mere theory, as only a few Indians own any stock. The reservations that have been leased have been leased, as a rule, to large cattle companies from outside of the State, though not entirely.

Mr. RAKER. Mr. Speaker, I do not want to object to any bill if it has for its purpose this statement as made by the gentleman from Texas [Mr. STEPHENS], the chairman of the committee, but there is a good deal of false impression which has gone abroad in regard to the West as to the forage on the public domain which is theory and not fact. For 21 years—since the act of 1885, prohibiting the fencing of the public domain—the large stock interests have been centering upon a policy of trying to gobble up, to fence, and control the remaining public domain for the purpose of preventing homesteading, which they themselves in their testimony admit; and, second, that in rounding up their stock they do not want to have the association of homesteaders—those living upon that land. The policy would be to retard the development of the public-land States and put them into a cow pasture, and permitting the few to handle and control it. As I understand from the gentleman now, this bill does not have that effect, is not intended for that, but is intended for the benefit of the Indians. I do not believe that it would have any bad effect, so far as the Indians are concerned, at this time.

Mr. TAYLOR of Colorado. Will the gentleman yield?

Mr. RAKER. I yield.

Mr. TAYLOR of Colorado. Is not the principal objection of yourself and the other Members from the Western States to an agricultural leasing bill the fact that it will prohibit and prevent settlement upon the public domain?

Mr. RAKER. Not only will it prohibit and prevent it, but those interested admit that the homesteading retards the great cattle barons from getting more land and fencing up the remaining public domain.

Mr. TAYLOR of Colorado. If they are honest, they will admit that will put the public-land settlement out of business.

Mr. RAKER. There is no question about that.

Mr. TAYLOR of Colorado. But in this case this land is not open to settlement, anyhow. That objection does not obtain here.

Mr. RAKER. I asked that question, and my distinguished friend from Arizona and the distinguished chairman of the committee advised me that the public would not get any of the grass or forage upon the land anyhow.

Mr. TAYLOR of Colorado. Now, the other question that arises in my mind is why you do not put onto the Indians this leasing of the mines, and the oil, and the coal, and the phosphate, and the scenery? [Laughter.]

Mr. BURKE of South Dakota. I would like to ask the gentleman from Colorado [Mr. TAYLOR] a question.

Mr. TAYLOR of Colorado. Yes.

Mr. BURKE of South Dakota. I would like to ask the gentleman from Colorado if he does not think if we authorize by law the leasing of Indian reservations it may retard the opening to settlement and sale of surplus lands, after the Indians have been allotted, that in the interest of the development of

some of the Western States ought to be on the market at an early date? Now, I suggest that to the gentleman from Colorado and gentlemen from other Western States that may have considerable areas in Indian reservations, that if leases are made for a period of 5 or 10 years it will most likely be more difficult to get that land onto the market and subject it to homestead settlement for that reason.

Mr. TAYLOR of Colorado. That will not go on the market after that. It will be leased forever.

Mr. BURKE of South Dakota. I suggest that for the consideration of gentlemen who may have reservations in their State that they would like to have open to settlement that they had better consider carefully before allowing this bill to be passed by unanimous consent.

Mr. TAYLOR of Colorado. Let me ask the gentleman a question. Ought there not to be some provision in this lease to prohibit a gigantic monopoly of all of this thing? While we all have profound confidence in the present Secretary of the Interior, and in the past one, there will be Secretaries of the Interior in the future that none of us yet know, and ought there not to be some guarded provision in here, some limitation, or something?

Mr. BURKE of South Dakota. I do not wish to be understood to be committed to a policy of leasing Indian reservations. But before this bill is passed I want to offer the amendment I have mentioned and one that I think should be adopted.

Mr. MANN. I would like to ask whether under the provisions of this bill, where a lease may be made for a portion of an Indian reservation for grazing purposes for five years, and another portion for agricultural purposes for 10 years, it would be practicable to either allot the lands in severalty or to open them up for settlement and sale?

Mr. TAYLOR of Colorado. Not very much, no; because those people, in order to get those leases, are going to provide for the extension of them, and there will not be any twilight zone between these tenants.

Mr. MANN. There is no provision here providing for the extension of the lease, but it is perfectly evident that the leases will not all expire at the same time if they give grazing leases and agricultural leases in the same reservation, and of course if they give agricultural leases they will lease to one man one piece of property and to another man another piece of property at different times. Would there be any difficulty of allotting in severalty to the Indians subject to the expiration of the leases or the opening up of the land for sale to settlers, subject to the expiration of the leases?

Mr. TAYLOR of Colorado. Oh, I think the chances are that the Secretary of the Interior, if he understands his business—and we have got to presume that he will be honest—can and will protect the interests of the Indians, although it looks to me that it is clothing him with a wonderful amount of power.

Mr. BURKE of South Dakota. I want to suggest to the gentleman from Colorado, commenting on the observations of the gentleman from Illinois [Mr. MANN], that in my State, while the Indians have tribal lands unallotted, all the newborns shall be allotted. It is possible that there might be some complication if a tract were leased for agricultural purposes, we will say, for 10 years, about the child of some Indian being allotted that land, yet he would be entitled to an allotment. It is a question that ought to have careful consideration.

In reservations where the lands have all been allotted and all the Indians have been allotted, and there is no provision for allotting in severalty thereafter to newborns, I can readily understand how you can lease the unallotted or surplus land for 10 years without injuring the Indians; but where the law provides, as it does, with regard to the reservations in my State, and I think in some other States, that the newborns shall be allotted so long as there are tribal lands, you can readily see how there might be complications if the land is leased for 10 years.

Mr. RAKER. I still reserve my right, Mr. Speaker.

Mr. STAFFORD. Will the gentleman yield to me right there?

Mr. RAKER. In a moment.

I wanted to ask a question of the gentleman from South Dakota right there. Why would it not be better for the Indians and for the development of the country, that after all the allotments have been made to the tribes that are entitled to allotments they be allowed to dispose of that land, so that we might have settlements and towns, and the country built up in homes, as it ought to be, instead of lying open and unused?

Mr. BURKE of South Dakota. The gentleman's question answers itself. So far as I am concerned, I am not in favor, as a general proposition, of authorizing Indian reservations to be leased.

Mr. RAKER. They want a leasing bill properly carried out, permitting fencing of these tracts; and when they once obtain the right to fence, will it not be continued ad infinitum, and will they not maintain that this leasing right shall forever be continued, and the land will never be thrown open to homestead settlement?

Mr. BURKE of South Dakota. Answering the gentleman's question, Mr. Speaker, I thought that would be the condition in my State when leasing was first begun, and it has been the case to some extent; but the present Commissioner of Indian Affairs has adopted a new policy, and is refusing to renew any of these leases. Only a few days ago he extended the time of some lessees, whose leases had expired, to remove their stock, until the 1st of November, I think it is, at a monthly price per head, and the price fixed is so high that it will mean that they will get their cattle out as soon as they mature them this year; so leasing has not worked entirely as I thought it might, to continue to keep the land under lease for all time.

Mr. RAKER. What authority did he have to make these leases, when it is stated in the report that there is no authority for such leasing?

Mr. BURKE of South Dakota. He states in this report that what he terms a "treaty reservation" may be leased. Now, the reservations in my State are created by the act of 1889, which ratified an agreement. There was no treaty, because we ceased making treaties some 10 or 20 years before that, but the reservations have been leased.

Mr. RAKER. As to the land—Indian land and unallotted—that is not leased in your State, do the farmers and homesteaders surrounding or near that land get the forage off of the land?

Mr. BURKE of South Dakota. I will say, Mr. Speaker, that they do not to any considerable extent. The lands are leased in two ways in my State. There are some that we call "large pastures," as large as 50,000 acres or more; and then another system of leasing has been to allow owners of cattle to put the cattle upon the reservation and pay so much per head per year, the reservation being fenced.

Now, I am a little surprised that the department should be asking for the enactment of any bill providing for the leasing of Indian reservations, for the reason that I have been assured by the Commissioner of Indian Affairs and the assistant commissioner and everybody connected with the Indian Office that it is the policy of this administration to discontinue making leases of Indian reservations and as soon as it is possible to get the Indians to use these lands for the grazing of a tribal herd, it being the hope of the Interior Department that Congress may provide such herds by appropriation, or permit the use of tribal funds to acquire such herds.

Mr. RAKER. Is the gentleman going to object to this bill under that statement?

Mr. BURKE of South Dakota. The gentleman is not objecting to the passage of the bill. The gentleman from California can do so if he wishes.

Mr. RAKER. I do not know how to object to a bill. I have never yet done so. The principle of this is all wrong, and there is no information here——

Mr. MADDEN. The gentleman can object to it.

Mr. RAKER. No. I do not want to be in any hurry. I want to get it fully before the attention of the House.

Mr. MADDEN. I ask for the regular order, Mr. Speaker.

The SPEAKER. The regular order is, Is there objection?

Mr. RAKER. Mr. Speaker, I reserve the further right to object.

The SPEAKER. But the gentleman from Illinois [Mr. MADDEN] demands the regular order, and the regular order is for the Speaker to put the question, Is there objection?

Mr. RAKER. I should like to be heard further, reserving the right to object.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. This bill is on the Union Calendar.

Mr. STEPHENS of Texas. I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman asks unanimous consent that it be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. BURKE of South Dakota. Now, Mr. Speaker, I offer the amendment which I send to the Clerk's desk.

Mr. MANN. First, the committee amendments are to be acted upon.

Mr. BURKE of South Dakota. I will wait for the committee amendments.

The SPEAKER. The Clerk will report the first committee amendment.

The Clerk read as follows:

Page 1, line 4, after the word "grazing," strike out the comma and insert the word "and"; and in the same line, after the word "agricultural," strike out the comma and insert the words "and mining."

The amendment was agreed to.

Mr. STEPHENS of Texas. There is another amendment in line 9.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

Page 1, line 9, strike out the words "or agricultural."

The amendment was agreed to.

Mr. STEPHENS of Texas. And in line 1, on page 2, is another amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 1, after the word "no," strike out the word "mining" and insert the word "agricultural."

Mr. RAKER. Mr. Speaker, am I entitled to be heard on the amendment?

The SPEAKER. Yes.

Mr. RAKER. I should like to ask the gentleman why he strikes out the word "mining"?

Mr. STEPHENS of Texas. The committee did it by a vote.

Mr. RAKER. That does not answer the question.

Mr. HAYDEN. I can answer the gentleman's question. There was pending in the Committee on the Public Lands, as the gentleman is aware, a bill for leasing the fuel and fertilizing minerals in the public lands of the United States. From my knowledge of the hearings that had been held before the Public Lands Committee I believed that some plan would be adopted, some principle established, that might be applicable to mining these minerals on Indian reservations. For this reason I did not think it was proper at this time to make a wide-open leasing arrangement for mining on Indian reservations.

Mr. RAKER. I understand, then, that it is the purpose later to have the minerals on the Indian reservations leased, and to have this bill apply only to the agricultural features of the bill.

Mr. HAYDEN. My idea is this, that whatever law applies to leasing of the public domain for mining purposes, that that same law should apply to the Indian reservations.

Mr. RAKER. I see.

Mr. HAYDEN. And therefore I did not think it was proper to have another system inaugurated at this time. I made the motion in the Indian Committee to strike out all mention of mining in this bill.

The amendment was agreed to.

The SPEAKER. The Clerk will report the Burke amendment.

The Clerk read as follows:

Page 1, line 8, after the word "prescribe," insert the following: "And may expend the proceeds received in the purchase of live stock for the benefit of the tribe occupying the reservation leased."

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

Mr. NORTON. Mr. Speaker, I move to strike out the last word.

So that the changes which this bill, if enacted, will make in the existing law may be clearly presented to the House, I wish to read sections 1 and 2 of the act approved February 28, 1891 (26 Stat., 897). These sections are as follows:

SEC. 1. That in all cases where any tribe or band of Indians has been, or shall hereafter be, located upon any reservation created for their use, either by treaty or stipulation or by virtue of an act of Congress or Executive order setting apart the same for their use, the President of the United States be, and he hereby is, authorized, whenever in his opinion any reservation, or any part thereof, of such Indians is advantageous for agricultural or grazing purposes, to cause said reservation, or any part thereof, to be surveyed, or resurveyed, if necessary, and to allot to each Indian located thereon one-eighth of a section of land: *Provided*, That in case there is not sufficient land in any of said reservations to allot lands to each individual in quantity as above provided the land in such reservation or reservations shall be allotted to each individual pro rata, as near as may be, according to legal subdivisions: *Provided further*, That where the treaty or act of Congress setting apart such reservation provides for the allotment of lands in severalty to certain classes in quantity in excess of that herein provided the President, in making allotments upon such reservations, shall allot the land to each individual Indian or said classes belonging thereon in quantity as specified in such treaty or act, and to other Indians belonging thereon in quantity as herein provided: *Provided further*, That where existing agreements or laws provide for allotments in accordance with the provisions of said act of February 8, 1887, or in quantities substantially as therein provided, allotments may be made in quantity as specified in this act, with the consent of the Indians, expressed in such manner as the President, in his discretion, may require: *And provided further*, That when the lands allotted, or any legal subdivision thereof, are only valuable for grazing purposes, such lands shall be allotted in double quantities.

SEC. 2. That where allotments have been made in whole or in part upon any reservation under the provisions of said act of February 8, 1887, and the quantity of land in such reservation is sufficient to give each member of the tribe 80 acres, such allotments shall be revised and equalized under the provisions of this act: *Provided*, That no allotment heretofore approved by the Secretary of the Interior shall be reduced in quantity.

SEC. 3. That whenever it shall be made to appear to the Secretary of the Interior that, by reason of age or other disability, any allottee under the provisions of said act, or any other act or treaty, can not personally and with benefit to himself occupy or improve his allotment or any part thereof, the same may be leased upon such terms, regulations, and conditions as shall be prescribed by such Secretary, for a term not exceeding 3 years for farming or grazing or 10 years for mining purposes: *Provided*, That where lands are occupied by Indians who have bought and paid for the same, and which lands are not needed for farming or agricultural purposes, and are not desired for individual allotments, the same may be leased by authority of the council speaking for such Indians for a period not to exceed 5 years for grazing or 10 years for mining purposes, in such quantities and upon such terms and conditions as the agent in charge of such reservation may recommend, subject to the approval of the Secretary of the Interior.

Mr. Speaker, as will be noted from the reading of section 1 of this act of February 28, 1891, this section refers to three distinct and separate classes of Indian reservations—(1) reservations created either by treaty or stipulation; (2) reservations created by acts of Congress; (3) reservations created by Executive order.

The first paragraph of section 3 gives the Secretary of the Interior authority to lease allotted lands on any of the three classes of reservations belonging to Indians who by reason of age or other disability can not personally and with benefit to themselves occupy or improve these allotted lands.

The proviso contained in section 3 authorizes the Indian council, subject to the approval of the Secretary of the Interior, to lease allotted and unallotted lands not needed by the Indians for farming or agricultural purposes where these lands are in reservations of the first class, which includes reservations where the Indians have bought and paid for their lands. No provision is made in section 3 for the leasing of unallotted lands in reservations of the second and third classes; that is, in reservations created by acts of Congress or by Executive orders. This bill, as I understand its purpose, makes provision for the leasing of unallotted lands in these reservations of the second and third classes. Under the terms of this bill as amended the lands are not to be leased for mining purposes, but only for grazing and agricultural uses.

Mr. RAKER. What has been the gentleman's experience as to the leasing of allotted lands for mining purposes? Have they been leasing these claims as provided under the law?

Mr. NORTON. No; not at all in my State, as far as I have been able to learn.

I am much in favor of the amendment that was offered by the gentleman from South Dakota and which has just been adopted. I believe that every encouragement should be given Indians on these reservations to raise cattle and horses and to use these lands themselves instead of leasing them to white people. Where the Indians can not be induced to make use of these lands themselves, the next best thing, of course, is to lease them, and to do this wisely and for the best interest of the Indians.

Mr. STAFFORD. Mr. Speaker, I want to ask the gentleman a question.

The SPEAKER. The time of the gentleman from North Dakota has expired.

Mr. STAFFORD. I ask unanimous consent that the gentleman from North Dakota may proceed for two minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. STAFFORD. Can the gentleman inform the House from his experience as to the success of this leasing for three years as carried in the existing statute? Here we are extending the period from 3 to 10 years, even against the recommendation of the Secretary of the Interior.

Mr. NORTON. As far as I know from my own knowledge and from hearsay, and speaking only of leasing in my own State, it has not been altogether satisfactory. In fact, there has been a great deal of complaint that the cattle and horses of white lessees have ranged over in their grazing on lands owned by the Indians and not leased, and they have done much damage, which has never been paid for, to the Indians.

Mr. STAFFORD. My inquiry is limited more as to the success based on a limited tenure of 3 years, which we are now extending to 10 years.

Mr. NORTON. I judge that in the case of a lease for 10 years a higher price per acre would be paid the Indians than in the case of a lease for a shorter period.

Mr. STAFFORD. Will not one effect of a long tenure be the withdrawal of the lands from ultimate settlement?

Mr. CARTER. The lands are not subject to settlement now.

Mr. STAFFORD. They may be subject to entry and settlement by some act of Congress later on. If you are going to lease it for 10-year terms, the inducement for settlement is going to be withdrawn.

Mr. MADDEN. Is it not likely that in leasing these lands they will have a cancellation clause in the lease?

Mr. STAFFORD. I think that the Secretary of the Interior would protect the interests of the Government.

Mr. MONDELL. Mr. Speaker, the gentleman from North Dakota [Mr. NORTON], through inadvertence, did not exactly state the situation in regard to the leasing provided for in section 3 of the act of February 28, 1891. The lease as provided for in that section, or the proviso, under the order of the Indian council, relates only to what are known as treaty reservations.

Mr. NORTON. I so stated.

Mr. MONDELL. The gentleman intended to, I have no doubt, but when he reads the notes he will find that he includes all three classes of reservations. At the present time an Indian allotment or any sort of reservation can be leased for mining, grazing, or agricultural purposes; that is, an allotment. The bill before us relates entirely to unallotted lands, and provides for grazing and agricultural leases on unallotted lands on reservations created by act of Congress or by Executive order.

Now, the proviso in section 3 of the act I quoted a moment ago the department applies only to what they call treaty reservations. The proviso itself does not contain the words "treaty reservations," but is as follows:

Where leases are occupied by Indians who have bought and paid for the same.

And the Indian Office has taken the position that treaty reservations are lands which the Indians have bought and paid for. In other words, treaty reservations are those referred to in this proviso. Under treaty reservation the Indian council may provide for leasing of unallotted lands for grazing 5 years, mining 10 years, but no agricultural lease at all.

Now, in my opinion, that is a wise provision. Unallotted lands on Indian reservations should not be leased for farming purposes at all. If they are fit for farming purposes and the Indians do not need them and can not use them, they should be open for settlement. On the other hand, there may be some difference of opinion as to the advisability of leasing the grazing lands on Indian reservations. If it means a permanent lease, a system that is going to continue for a great length of time, then it is a system of doubtful wisdom. If it is only intended to be temporary, to such time as the Indian can acquire cattle and use the land himself, then it may be an entirely proper thing to do. But to lease unallotted agricultural lands on Indian reservations means the establishment of a leasehold farming system upon Indian lands, which I do not believe is a wise thing.

My particular interest in this legislation relates to the fact that it does not apply to the reservation in my State.

Mr. STEPHENS of Texas. The gentleman is correct.

Mr. MONDELL. To put it another way, I should have more interest in it if it did affect the reservation in my State.

The SPEAKER. The time of the gentleman has expired.

Mr. MONDELL. Mr. Speaker, I ask for three minutes more.

The SPEAKER. The gentleman from Wyoming asks that his time be extended for three minutes. Is there objection?

There was no objection.

Mr. MONDELL. I think it wise and proper that they have the authority to lease mineral lands. They are leasing coal lands, they are leasing oil lands to the advantage of the Indians, and in a way it is helpful to the development of the country. This bill, applying to other classes of reservations, as I understand it, prohibits mining leases by reason of the fact that it makes no reference to them, but does provide for other classes of leases. Mining leases not being provided for, can not, of course, be made.

Mr. STEPHENS of Texas. This repeals existing law by implication.

Mr. MONDELL. It does not repeal existing law. There is no law on the statute books on the subject. In other words, there is no authority now to lease these lands on the reservations in these classes.

Now, in the absence of law the Indian Office has not authority to lease any of this land for any purpose; now, if we provide for a law for the leasing of the land for a specific purpose that is the only authority granted. And while the department might have held in the absence of any law on the subject that in the exercise of a supervisory authority it might have leased these lands without any law on the subject, the department certainly can not hold after we have legislated on the subject matter that they can lease for purposes not provided for by law. We foreclosed them as to other kinds and classes of leases by legislating with regard to this class of leases, and so far as at least one of these classes of leases is concerned, to make leases of unallotted land, it is my opinion a mistake, whatever may be said with regard to the grazing lease. So far as the permit is concerned, to which my friend from Wisconsin referred a moment ago, if we are to make an agricultural lease it ought to be for 10 years, and that is particularly true if these lands be irrigable; otherwise it would be impossible to make an advantageous lease for a shorter length of time, but I do not think they ought to be leased at all if they are fit for farming purposes.

The SPEAKER. The gentleman withdraws the pro forma amendment.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read:

A bill authorizing the Secretary of the Interior to lease for grazing and agricultural purposes unallotted lands within Indian reservations established by act of Congress or Executive order.

On motion of Mr. STEPHENS of Texas, a motion to reconsider the vote by which the bill was passed was laid on the table.

PUBLIC BUILDING AT NEWCASTLE, IND.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11317) to increase the limit of cost of the United States post-office building at Newcastle, Ind.

The Clerk read as follows:

Be it enacted, etc., That the limit of cost of the United States post-office building at Newcastle, Ind., be, and the same is hereby, increased $15,000, or so much thereof as may be necessary, to meet the additional cost of construction of said building by the substitution of stone instead of brick with stone trimmings, as specified in the existing specification.

The SPEAKER. Is there objection?

Mr. MADDEN. Mr. Speaker, reserving the right to object, I would like to know how much the cost of this building is to be and what is the purpose of changing from the present construction of the building to a stone construction, and also what is the revenue from the post office?

Mr. FOSTER. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and the Clerk will report the next bill.

MINE RESCUE STATION AT M'ALESTER, OKLA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 3988) for the purchase of a building and lot as a mine rescue station at McAlester, Okla.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to purchase, for and on behalf of the United States, the following-described real estate in the city of McAlester, county of Pittsburg, State of Oklahoma, to wit, the north 50 feet of lot No. 2, in block No. 487, in the original town site of South McAlester, the dimensions of said lot being 50 feet by 165 feet, with 50 feet front on South Third Street, in said city of McAlester, together with the two-story brick building and all other improvements thereon, for the use of the Bureau of Mines for a mine rescue station and for such other purposes as the Bureau of Mines may from time to time desire to use the same, at and for the sum of $5,500, which said sum is hereby appropriated for such purchase out of any money in the Treasury not otherwise appropriated.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I would like to ask the gentleman whether this building is on a railroad switch or not?

Mr. CARTER. I am sure I can not tell the gentleman. I assume, however, it is, although I have never seen the building.

Mr. MANN. Does not the gentleman think we ought to know?

Mr. CARTER. I think that is a very important thing; and I was so sure that such a building would be erected conveniently to switching facilities that it had not occurred to me to ask about that particular feature. I have never seen the building, but I should think the bureau certainly would see that this important matter was considered in the erection of a building for this purpose.

Mr. MONDELL. Has the gentleman any information on that subject at all?

Mr. CARTER. I have not any, except this information. I understand it was erected under the direction of Dr. Holmes, of the Geological Survey, and was located in accordance with the regulations of the department, so it had not even occurred to me it would not be on a railroad switch.

Mr. MONDELL. At one time I think it was the statement of the Mining Bureau that it might be well to establish these mine rescue stations at various points in the country separate and apart from a point or place which is the headquarters of a

rescue car. McAlester, if I recollect rightly, is the headquarters of a mine rescue car, is it not?

Mr. CARTER. I presume so.

Mr. MONDELL. More recently I think the bureau has come to the opinion—I am sure that many others have; I have personally—that any building we have in connection with mine rescue work should, in the main, be a building at the headquarters of a mine rescue car, and should be a building adjacent to a switch on which the mine rescue car is placed when it is not in use.

In other words, what we need in this mine rescue work is not a lot of stations scattered throughout the country more or less separate and apart from the crew and the car works, but headquarters buildings located so as to be convenient to the car crews, buildings that can be utilized as headquarters and by the car crews, for headquarters for the car crews possibly at times for the relief from the monotony of the car, a place for the storage of surplus material so as not to overload the cars with that sort of thing. Now, if this building is located so as to serve the purposes of that particular thing, then by all means we ought to have it. I do not know but what we ought to have it in any event under the circumstances, but if it is located as I have suggested and for the purposes which I have suggested, and in order to be most useful for those purposes it must be adjacent to a car switch, then certainly we ought to acquire the property.

Mr. CARTER. Mr. Speaker, I looked over the record of Dr. Holmes's statement to see if he touched upon this matter, but I suppose the Committee on Public Buildings and Grounds took it for granted that a man of Dr. Holmes's experience would not attempt to build a mine rescue station outside the usual requirements. Now, if the gentleman will permit me, I will read to him just what the building is.

Mr. MONDELL. Is that about its location?

Mr. CARTER. No; it is not.

Mr. MONDELL. There was a view developed possibly at the time this was erected that these stations should be erected at various places, not to be used as car headquarters, but as a separate and distinct establishment.

Mr. CARTER. Let me read what this building is from data prepared by the bureau:
